LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., March 16, 1942.

SIR: I have the honor to submit herewith for publication the sixty-third issue of the Statistical Abstract of the United States. This annual volume is a compilation of authoritative statistics relating to the social and economic condition of the population and to the industrial, commercial, and governmental activities of the Nation. It is designed to serve as a convenient reference work for businessmen, economists, statisticians, students, and others who may have need of a statistical compendium covering a wide range of subjects.

The present volume was prepared in the Division of Statistical Research of this Bureau, under the supervision of Kathleen H. Dugan, editor, and under the administrative direction of Calvert L. Dedrick, Chief Statistician for the Division.

The first 34 issues of the Abstract were prepared and published by the Bureau of Statistics, originally a bureau of the Treasury Department and later of the Department of Commerce and Labor; the next 25 by the Bureau of Foreign and Domestic Commerce, Department of Commerce; and subsequent issues by the Bureau of the Census.

The statistical tables contained in the Abstract are compilations of data collected by the various statistical agencies of the Federal Government, by several State agencies, and by a considerable number of nongovernmental organizations. Many of these agencies have rendered valuable assistance not only in supplying advance data but also in the actual preparation of tables for inclusion in the Abstract. Special mention on this account is due the following-named agencies of the Federal Government: The Bureau of Foreign and Domestic Commerce, the Bureau of Marine Inspection and Navigation, and the Weather Bureau, of the Department of Commerce; the Bureau of Agricultural Economics, the Agricultural Marketing Service, the Office of Foreign Agricultural Relations, the Farm Credit Administration, and the Forest Service, of the Department of Agriculture; the Office of Education and the Social Security Board, of the Federal Security Agency; the Bureau of Fisheries, the General Land Office, the Bureau of Mines, and the National Park Service, of the Department of the Interior; the Immigration and Naturalization Service, of the Department of Justice; the Bureau of Labor Statistics, of the Department of Labor; the Bureau of Customs and the Bureau of Internal Revenue, of the Treasury Department; the Federal Communications Commission; the Board of Governors of the Federal Reserve System; the Interstate Commerce Commission; the Railroad Retirement Board; the United States Maritime Commission; and the Veterans' Administration.

Respectfully,

J. C. CAPT,
Director of the Census.

To HON. JESSE H. JONES,
Secretary of Commerce.

BRIEF BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

The following bibliography is intended to furnish a guide to additional information, particularly to more detailed primary data, than is presented in the Statistical Abstract. References to secondary sources of data are included where primary sources are not readily available, and to one-time studies where these present compilations or estimates for several years or new types of data not available in regular reports.

Statistical data issued by the various States and the reports of municipal and other local agencies are a valuable part of the literature but have been omitted from this bibliography because of the limitation of space. For the same reason many items have been omitted which cover a specialized subject, such as a single commodity or a kind of business.

Major inquiries, such as the Census of Population, are referred to by name rather than by specific volume references.

Subjects are arranged alphabetically but, for convenience, several are sometimes combined into one group. In such cases cross-references refer to the first subject of the group. Within the subject groups, titles of publications are arranged by the issuing agency or publisher. The designation "U. S." is placed before the name of each Federal agency. Reference is usually made to the Bureau, rather than to the Department responsible for the report. All of these agencies are located in Washington.

Source: Department of Commerce, Bureau of the Census; Reports of Fourteenth Census, Population, Vol. I; Reports of Sixteenth Census, except as noted.

No. 2.—Area, by States: 1940

Note.—Figures in this table represent an apparent increase of 3,352 square miles of land in the United States as compared with that given for 1930. (See table 4 in this edition and table 2 in 1940 and earlier editions of the Statistical Abstract.) This is largely due to a rather general decrease in inland waters as shown on latest maps used in this measurement.

[1] Revised.
[2] In comparing this percentage of increase with that shown for the decade 1910–20, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 percent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) is equivalent to 15.7 percent for exactly 10 years; and the 1920 increase for 116½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 15.4 percent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.

No. 5.—Population Per Square Mile, by States: 1800 to 1940

Note.—The population of continental United States has been divided by the total land area in order to obtain the density figures here presented. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The 1930 data, however, are based on the revised land areas used for computing the 1940 density figures and, therefore, differ from the 1930 density data previously published. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and cannot be considered in figuring density of population prior to 1890.

No. 7.—Population for Urban Size Groups and for Rural Territory: 1910 to 1940

Note.—Prior to 1930 all incorporated places and all towns (townships) in Massachusetts, Rhode Island, and New Hampshire, having 2,500 or more inhabitants, were classed as urban areas. For 1930 and 1940, urban areas also include unincorporated political subdivisions with a total population of 10,000 or more and a population density of 1,000 per square mile, and include, for the three New England States named above, only those towns which contain a village of more than 2,500 inhabitants comprising, either by itself or when combined with other villages within the same town, more than 50 percent of the population of the town. The total urban and rural population for 1880, 1890, and 1900 is as follows: Urban—1880, 14,358,167; 1890, 22,298,359; 1900, 30,380,433. Rural—1880, 35,797,616; 1890, 40,649,355; 1900, 45,614,142. Percent urban—1880, 28.6; 1890, 35.4; 1900, 40.0.

No. 10.—Population on Farms and in Rural Areas Other Than Farms, by States: 1930 and 1940

Note.—1940 figures are estimates based on a preliminary tabulation of a 5-percent cross-section of the 1940 census returns. 1940 numbers less than 20,000 are based on relatively small samples, and are subject to error. This is particularly true of numbers less than 5,000.

No. 11.—Population, 1940, and Estimated Future Population, 1945 to 1980, by Age and Sex

NOTE.—Total population for 1940 is final figure; other 1940 figures are estimates based on a preliminary tabulation of a 5-percent cross-section of the 1940 census returns. Estimates of future population are reproduced with the cooperation of the National Resources Planning Board and of Warren S. Thompson and P. K. Whelpton of the Scripps Foundation for Population Research, who prepared them for the National Resources Committee. For details on method of constructing estimates, etc., see report of National Resources Committee, Population Statistics, 1, National Data, Washington, G. P. O., 1937, or article by P. K. Whelpton, "An Empirical Method of Calculating Future Population," Journal of American Statistical Association, Sept. 1936, pp. 457–473.

No. 12.—Population, Estimated as of July 1, by States: 1930 to 1939

Note.—Total population was estimated on the basis of births, deaths, and migration, allowances being made for under registration of births and deaths. Estimates for States are based on the assumption that the increase or decrease each year between the censuses of 1930 and 1940 is equal to the average annual change between the two enumerations. Six States were covered by local censuses for 1 or more years between the Federal censuses. These local census figures were used as additional base points for linear interpolations. The difference between the sum of all the State estimates for any given year and the estimate for continental United States was prorated among those States not having a special census. For actual enumerations, 1790 to 1940, see table 6, p. 4.

No. 13.—Population, Estimated as of July 1, for Continental United States and Certain Outlying Territories and Possessions

Note.—Estimates, except for continental United States and Hawaii, 1930 to 1940, Alaska and Puerto Rico, 1940, and Philippine Islands, 1939 and 1940, are based on the assumption that the increase each year between two successive censuses is equal to the average annual increase between the 2 enumerations. Estimates for continental United States and Hawaii, 1930 to 1940, are based on available data regarding births, deaths, immigration, and emigration, allowance being made each year for unregistered births and deaths. Estimates for Puerto Rico, 1930 to 1939, are based partly upon a census taken as of Dec. 1, 1935.

[1] Enumeration in Southern States incomplete; this affects especially figures for the Negro population.
[2] White population includes Mexicans prior to 1930. The estimated number of Mexicans included in the white classification in 1920 was as follows: Total, 700,541; native white, 243,181 (172,704 of foreign parentage and 70,477 of mixed parentage); foreign-born white, 457,360. For close comparison with 1930, adjusted figures for 1920 may be obtained by deducting these from the white population as reported in 1920.
[3] Exclusive of Indians in Indian Territory and on Indian reservations, not enumerated prior to 1890.
[4] Comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.
[5] Less than one-tenth of 1 percent. [6] A minus sign (—) denotes decrease.
[7] Exclusive of 325,464 persons (117,368 whites, 18,636 Negroes, 189,447 Indians, and 13 Chinese), specially enumerated in 1890 in Indian Territory and on Indian reservations.
[8] Increase over figures adjusted for 1920 on account of Mexicans. See footnote 2.
[9] Increase over estimated number in 1920. [10] Percent not shown where base is less than 100.

[1] Definition of Median.—The median is the numerical value of the half-way point in a series of units arranged according to size, age, value, weight, or some other measurable characteristic. Therefore there are as many units above the median size, weight, etc., as there are below it. One-half the population is older than the median age and the other half is younger. One-half of the homes have a value above the median value, the other half a value below it.

No. 31.—Population of Cities Having, in 1940, Over 100,000 Inhabitants, by Sex and Race: 1930 and 1940

Note.—For total population of these cities, see table 30. 1940 figures are estimates based on a preliminary tabulation of a 5-percent cross-section of the 1940 census returns. Numbers of nonwhites less than 20,000 are based on relatively small samples and are subject to error. This is particularly true of numbers less than 5,000.

[1] A minus sign (—) denotes decrease.
[2] Boundaries changed between 1910 and 1920. Statistics for 1910 relate to pre-war boundaries.
[3] Persons reported in 1910 as of Polish mother tongue born in Germany (190,096), Austria (329,418), and Russia (418,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1919 was divided among Russia, Germany, and Austria, the censuses of 1880 to 1900 listed it as a country of birth.
[4] Created since 1910.
[5] Included as part of Yugoslavia in 1920 and 1930.
[6] Turkey in Asia included with Turkey in Europe prior to 1910.
[7] Albania included with Turkey in Europe in 1910 and earlier years.
[8] Newfoundland included with Canada prior to 1910.
[9] Except possessions of the United States.

No. 39.—Population, by Age Groups, by States: 1930 and 1940

Note.—For totals for all ages, see table 6. For age distribution of urban and rural population, see table 20. 1940 figures are estimates based on a preliminary tabulation of a 5-percent cross-section of the 1940 census returns. Figures less than 20,000 are based on relatively small samples, and are subject to error. 1930 figures exclude 94,022 persons of unknown age.

No. 45.—Families, by Home Tenure, 1930, and by Size of Family, 1930 and 1940, by States

Note.—The number of private families in 1930 is not absolutely comparable with the number of occupied dwelling units in 1940, but it is believed that the differences are so small as to be negligible. A family is defined as a group of persons related either by blood or by marriage or adoption who live together as one household usually sharing the same table. Single persons living alone are counted as families, however, as are a few small groups of unrelated persons sharing the same living accommodations as "partners." A dwelling unit is defined as the living quarters occupied by one family or household. In an apartment house there are, therefore, as many dwelling units as there are separate apartments.

[1] A part of the decreases from 1920 to 1930 in the percentage illiterate in some States is doubtless due to the separate classification in 1930 of Mexicans who were included in 1920 with the white population.

[1] Persons who, at any time during the week of Mar. 24–30, 1940, worked for pay or profit (except on public emergency work) or assisted without pay in a family enterprise; or who, during that week, had jobs (except on public emergency work), businesses, or professional enterprises at which they did not work because of vacation, industrial dispute, bad weather, temporary illness, or a layoff not exceeding four weeks with instructions to return by a specific date.

[2] The number of persons reported in the census as on public emergency work (WPA, NYA, CCC, etc.) was considerably less than the number indicated by the records of the various emergency work agencies. Of those classified erroneously in the census, it is probable that a majority were returned as employed in private or nonemergency Government work.

[3] Persons seeking work during the week of Mar. 24–30, 1940, who were not working on private or nonemergency Government work, nor on public emergency work.

[4] Persons seeking work who had not previously worked full time for one month or more at a single job.

[5] Inmates of penal institutions, hospitals for the mentally diseased or defective, and homes for the aged, infirm, and needy.

[6] Includes some persons whose activity during the week of Mar. 24–30, 1940, could not be determined definitely. It is believed that the great majority of such persons were not in the labor force.

No. 57.—Employment Status of the Population 14 Years Old and Over, in Cities of 100,000 Inhabitants or More: Mar. 24–30, 1940

Note.—Figures are estimates based on a preliminary tabulation of a 5-percent cross-section of the 1940 census returns. Numbers less than 20,000 are based on relatively small samples and are subject to error. This is particularly true of numbers less than 5,000.

No. 58.—Employment Status of the Population 14 Years Old and Over, by States: Mar. 24–30, 1940

Note.—Figures are estimates based on a preliminary tabulation of a 5-percent cross-section of the 1940 census returns. Numbers less than 20,000 are based on relatively small samples and are subject to error. This is particularly true of numbers less than 5,000.

Division and state	Population 14 years old and over	Persons 14 years old and over in the labor force								Persons 14 years old and over not in the labor force [4]

[1] Because of changes made in 1930 in the classification of agricultural pursuits, it is impossible to group the 1920 occupations exactly according to the 1930 classification. It is believed, however, that the effect of the difference in grouping on the comparability of figures here presented is negligible. Figures have been adjusted to exclude those employed on turpentine farms classified in "Agriculture" in 1920 (see note 5).

[2] Since, in 1920, only farm laborers on general farms were distinguished as working on "home farm" or "working out," farm laborers on dairy farms, stock farms, truck farms, poultry farms, etc., who were, in fact, working on the "home farm" as "unpaid family workers" were not included in "Farm laborers (home farm)." Hence, as here compiled for 1920, the number of farm laborers classified as "Wage workers" probably is somewhat too large and the number classified as "Unpaid family workers" somewhat too small.

[3] Many of the machinists' apprentices probably are machine tenders.

[4] Includes, for 1920, groups otherwise classified in 1930 as follows: Apprentices, steam railroad, telegraph and telephone, other transportation and communication; Apprentices, wholesale and retail trade; Apprentices to other professional persons. "Architects', designers', and draftsmen's apprentices," classified in "Manufacturing and mechanical industries" in 1920, was transferred to "Professional service" in 1930.

[5] Persons employed on turpentine farms classified in "Agriculture, forestry, etc.," in 1920, were transferred to "Manufacturing and Mechanical Industries" in 1930.

[6] Not otherwise specified.

[6a] Figures are not comparable with data for 1930.

[19] See note 15, p. 72. [20] Selected occupations. [21] Not classified separately in 1920.
[22] Neither in 1920 nor in 1930 was the attempt to distinguish chauffeurs and motortruck drivers from draymen, teamsters, and carriage drivers very successful.
[23] Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; drivers for bakeries and stores are classified as deliverymen in trade, and drivers for laundries are classified as deliverymen in domestic and personal service.
[24] Included with "Draymen, teamsters, and expressmen" in 1920.
[25] Because of indefinite returns by census enumerators, it is probable that some stationary engineers were included with locomotive engineers, and some firemen of stationary boilers with locomotive firemen.

3. VITAL STATISTICS

GENERAL NOTE.—Births and deaths are registered by the States, and transcripts of the original certificates are received and tabulated by the Bureau of the Census. Because of the gradual expansion of the "registration" areas up to 1933 (see tables 86, 93, and 104), the numbers of births and deaths recorded for earlier years for the areas as a whole are not strictly comparable, but, in most cases, the expansion of the areas had only a negligible effect on the comparableness of the rates. Beginning with 1933, all States have been included in both the birth and death registration areas.

All birth and death statistics in this section, except as noted in table 94, have been compiled according to the places in which the births or the deaths occurred. The alternative is to allocate each birth and each death to the State, city, and county of residence or usual place of abode. (For comparison of births and deaths by place of occurrence and by place of residence, for selected cities, see table 94. For State totals the difference in most cases would be negligible.) Inasmuch as the population census is compiled according to the usual place of abode, the tabulation of vital statistics according to place of occurrence has seriously restricted, for certain purposes, the use of these data. The factors to be considered depend upon the specific purpose for which the data are to be used. If crude death rates—and especially the rates for individual causes of death—are used as indexes of the health conditions of a community, comparisons of rates for different States or cities are not strictly valid unless the age, sex, and racial composition of the population of each area is considered. It is obvious that, if the population in 1 State is generally older than that in another, the crude death rate will be higher, even though there are no essential differences between the rates for identical age groups. Moreover, in a few States the rates for certain causes, notably tuberculosis, are abnormally high because the deaths represented by these rates include those of considerable numbers of persons who have gone to the States in question in the hope of recovering their health. Similar considerations apply also to crude birth rates. For example, comparison of the birth rate of 1 area having a certain proportion of women of childbearing age with the rate of another community of a different population composition is erroneous if the rates are used as a measure of intrinsic biological fertility.

Rates, except as noted, are based on midyear estimates of population. Preliminary estimates based on provisional 1940 population census figures have been used in computing rates for years 1930 to 1939, except in tables 87, 90, 96, and 103, for which estimates based on the 1940 census are not yet available.

Data for stillbirths (see table 98) are excluded from the figures for both births and deaths. In all tables giving statistics by race, data for Mexicans have been included with those for the white population.

No. 94.—Births and Deaths, by Place of Occurrence and by Place of Residence, for Selected Cities: 1939

Note.—The first and second columns compare the numbers of births occurring in the specified cities (regardless of the places of residence of the mothers) with the numbers of births to mothers whose permanent homes were in the specified cities (regardless of the places of occurrence of such births). Similarly, the third and fourth columns compare the numbers of deaths occurring in the specified cities (regardless of the places of residence of the decedents) with the numbers of deaths of residents of the specified cities (regardless of the places of occurrence of such deaths). For example: The total number of births occurring in Akron (including births to mothers having their permanent homes elsewhere) was 4,247; whereas the total number of births to mothers having their permanent homes in Akron (including births occurring elsewhere) was 3,688.

4. IMMIGRATION, EMIGRATION, AND NATURALIZATION

GENERAL NOTE.—In compiling immigration and emigration statistics, Alaska, Hawaii, and Puerto Rico, beginning with 1904, 1901, and 1902, respectively, have been treated as integral parts of the United States. In prior years the transfer of population between these areas and the United States was treated as immigration and emigration. The movement of population between the Philippine Islands and the United States was treated as immigration and emigration prior to July 1, 1898, and has been so treated since May 1, 1934, but was not accounted for in the statistics for the period between those dates.

No. 107.—IMMIGRATION: 1821 TO 1940

NOTE.—For 1821 to 1867 the figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted; for periods they are totals, not annual averages.

No. 111.—Immigration, by Country of Origin, by Decades: 1851 to 1940

Note.—For 1851 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Data prior to 1906 cover countries whence aliens came; thereafter, countries of last permanent residence. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Countries added to the list since the beginning of the World War were theretofore included with the countries to which they belonged. Data are *totals* (not annual averages) for periods ended June 30 since 1870, Dec. 31 theretofore, except as noted.

No. 115.—Immigration Quotas Allotted and Quota Aliens Admitted, by Country of Birth: Years Ended June 30, 1925 to 1940

Note.—The Immigration Act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 percent of the number of foreign-born persons of such nationality resident in continental United States as determined by the census of 1910; the population plan of the act of 1924, to 2 percent according to the census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under the act of 1924, the minimum quota is 100. Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all.

[1] Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, are as follows: 1922, 243,953; 1923, 335,480; 1924, 357,643. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

[2] Quota for 1934 to 1940. The total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific islands.

[3] Austria included with Germany beginning with 1938.

[4] All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

[5] Annual quotas for colonies, dependencies, or protectorates in "Other Europe," Asia, Africa, Pacific islands, and America are included in the annual quotas of the European countries to which they belong.

[6] Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

[1] Includes superintendents, principals, and supervisors for States not reporting them separately, but not for all States. These numbers are, therefore, somewhat smaller than those on which average annual salaries are based.

[2] Includes 231 part-time teachers. [3] Estimated. [4] For 1919. [5] White schools. [6] For 1936.

No. 142.—Vocational Courses, Federally Aided—Students Enrolled, by Class, by States and Territories and for Puerto Rico: Year Ended June 30, 1940

Note.—Institutions Federally aided are reimbursed from Federal funds provided under the act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending the benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for the further development of vocational education. These acts, administered by the Office of Education provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education.

No. 143.—Vocational Rehabilitation of Disabled Persons, by Number and by Cases on Roll, by States and for Hawaii and Puerto Rico: 1930 to 1940

Note.—In accordance with the Civilian Vocational Rehabilitation Act of June 2, 1920, Congress set up a program of cooperation with the States for the vocational rehabilitation of persons disabled in industry or otherwise. By the end of the fiscal year 1940, 48 States (no data available for Kansas which began rehabilitation activities in May 1940), the District of Columbia, Hawaii, and Puerto Rico had accepted the provisions and begun cooperation with the Federal Government. The figures given relate only to cases aided by Federal funds. The total expenditure in 1940 (fiscal year) comprised: Federal funds, $1,972,273; State and private funds, $2,135,532.

7. CLIMATE

No. 157.—Climatic Conditions of Selected Cities, by Months

NOTE.—The table presented herewith shows the more important facts concerning the weather at a number of points in continental United States and outlying areas selected with a view to covering all the important climatic sections. The temperature extremes include the entire period of observations to Dec. 31, 1940. Other data are standard normals or long-time averages covering periods ranging up to 50 years or more. Average hourly wind velocity data are reduced to true velocities. Temperatures are Fahrenheit.

8. MILITARY AND CIVIL SERVICES, ELECTIONS, AND CONGRESSIONAL REPRESENTATION

No. 158.—Army of the United States—Strength of Component Parts: 1890 to 1940

Note.—For period prior to 1914, table covers quinquennial years and years in which considerable changes occurred in Regular Army. Figures for Reserve officers include data for Regular Army enlisted men, and also, for years prior to 1924, for National Guard officers holding commissions in the Reserve. There is, therefore, some duplication in the grand totals, but the amount of this duplication is relatively small.

[1] The reduction in this item from the prior fiscal year was due essentially to discontinuance of disability allowance (nonservice) except for veterans permanently and totally disabled.
[2] For disbursements by wars, see table 164.
[3] Includes veterans of the War of 1812 whose dependents were receiving pensions (1 for 1940), not shown separately.
[4] Included under "Compensation."

No. 179.—Civil Service and Canal Zone Retirement: 1921 to 1940

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act and its amendments, employees of the classified service and certain other groups, including unclassified laborers subject to labor regulations, are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The amendment of May 29, 1930 (effective July 1, 1930), permits the optional retirement of employees 2 years before reaching the retirement age when they have rendered at least 30 years of service and also permits retirement on account of permanent and total disability after 5 years of service. From the basic compensation of each employee within the scope of the acts there is deducted 3½ percent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less $1 per month are credited to the employee's individual account. Under the amendment of May 29, 1930, annuities are composed of (1) a sum equal to $30 for each year of service not exceeding 30, provided it does not exceed three-fourths of average salary for any five consecutive years (amendment of Aug. 4, 1939, effective Jan. 1, 1940, which applies only to high-salaried employees with considerable service, provides that amount shall not be less than employee's purchasable annuity); and (2) the amount of annuity purchasable with the sum credited to the individual's account, together with interest at 4 percent per annum, with the provision that the annuity shall in no case be less than an amount equal to the average salary, not to exceed $1,600 per annum, received during any five consecutive years, multiplied by the number of years of service, not exceeding 30, and divided by 40. By act of Mar. 2, 1931 (effective July 1, 1931), special provision was made for employees of the Panama Canal and Panama Canal Railroad, who theretofore had been eligible for retirement under the civil service retirement and disability act.

No. 186.—Injuries to Civil Employees of the United States and Claims Received Under U. S. Employees' Act: Sept. 7, 1916, to Dec. 31, 1940

Note.—The U. S. Employees' Compensation Commission, created by act of Sept. 7, 1916, is charged with the duty of administering the law providing compensation for civil employees of the United States who suffer personal injury while in the performance of official duties. This table does not include data for Civilian Conservation Corps enrollees or for persons employed as civil employees of the United States on work relief projects financed through funds provided by the several Federal emergency relief appropriations, excepting those administrative employees who are eligible for benefits under the act of 1916.

No. 190.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1940

Note.—The population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of the number of slaves. In 1940, it was held that all Indians are subject to Federal taxation. The apportionment ratios were arbitrarily chosen until 1850. From 1850 to 1900, these ratios were the apportionment population of the U. S. divided by the number of Representatives. From 1910 on, the apportionments were computed from priority lists rather than from ratios. There was no apportionment in 1920. For a discussion of methods of apportionment, see Senate Document No. 304, 76th Congress, 3d session, "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington.

9. NATIONAL GOVERNMENT FINANCES

General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first 3 of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. The figures for actual transactions during a month or year which are calculated to take into account these delayed reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (table 194) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

Government transactions are classified according to the accounts through which they are effected. The three classes of accounts are: General fund accounts, which include the general revenues and from which the operating expenses of the Government, including capital outlays and fixed charges, are paid under appropriations by Congress; special fund accounts, or funds received under special authorizations of law which are earmarked for some specific purpose; and trust fund accounts, representing money received and held in trust for the benefit of individuals or classes of individuals. The latter are not strictly Government moneys and are shown separately in all tables except No. 192. (See headnote of that table.)

All figures for receipts and expenditures include postal surpluses or deficiencies only; postal revenues other than surplus receipts and postal expenditures payable from postal revenues are shown in table 192.

[1] Surplus or deficit takes into account public debt retirements chargeable against ordinary receipts beginning 1918. See p. 179 for expenditures chargeable against ordinary receipts.

[2] Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years 1921 to 1926; in 1927 to 1940 the 3½ percent salary deductions are included.

[3] Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in miscellaneous receipts.

[4] On the basis of warrants issued 1789 to 1930; thereafter, on basis of checks issued.

[5] Average for period Mar. 4, 1789, to Dec. 31, 1800.

[6] Averages are for entire period though there were no amounts under these items for certain years.

[7] Years ended Dec. 31, 1801 to 1842; average for 1841–1850 is for the period Jan. 1, 1841, to June 30, 1850.

[8] Less than $500. [9] Average for 1863 to 1865. [10] Average for 1881 and 1884. [11] One year only, 1895.

[12] See headnote.

[13] Includes processing tax, 1934 to 1938; unjust enrichment tax, 1937 to 1939; and for 1937 to 1941, taxes under Social Security Act, and taxes upon carriers and their employees. [14] Includes unjust enrichment tax.

[15] Sales of public lands included with miscellaneous receipts; postal revenues and expenditures not available.

No. 196.—Internal Revenue Receipts, by Chief Tax Sources: 1863 to 1941

NOTE.—**All figures in thousands of dollars.** The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 191 to 193 and 195 which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table.

No. 199.—Income Tax Returns, Individual, Estate, and Trust—Summary: 1913 to 1939

NOTE.—**All money figures in thousands of dollars.** Statistics are based on the taxpayers' returns as filed, unaudited except to insure proper execution of the return. Under the revenue laws these classes of individuals and fiduciaries were required to file returns: For 1913 to 1916, those with net income of $3,000 and over; 1917 to 1924, and 1932 to 1939, $1,000 and over (except for 1938–1939 a fiduciary return for a trust must be filed if the net income equals or exceeds $100); 1925 to 1931, $1,500 and over; or if married and living with husband or wife filing a joint return, $2,000 for 1917 to 1923, $2,500 for 1924, and 1932 to 1939, and $3,500 for 1925 to 1931; also, beginning 1921, individuals with gross income of $5,000 or over regardless of net income. Data for returns showing no net income, filed in accordance with the latter provision, are not included in statistics shown. Partnership net income or net loss is reported on the individual returns of copartners according to their shares. All income-tax data include Alaska and Hawaii.

[1] Consists of: (1) for 1923, amount of the 25 percent reduction provided by Revenue Act of 1924, (2) for 1924 to 1931, 25 percent of tax on earned net income, and (3) for 1924 to 1933, 12½ percent on capital net loss from sale of assets held more than 2 years.

[2] Includes war excess-profits taxes of $101,250,000 on individuals and of $103,888,000 on partnerships.

[3] Preliminary figures for 1938 returns filed through June 1939, and for 1939 returns filed through June 1940. Complete figures include additional returns filed to December 31.

[4] Includes alternative tax: 1938, $278,907,000; 1938 (prel.) $277,174,000; 1939 (prel.) $319,602,000. The alternative tax is imposed on returns with net long-term capital gain when such alternative tax is less than the sum of the normal tax and surtax computed on net income including net long-term capital gain; and the alternative tax is imposed on returns with net long-term capital loss when such alternative tax is greater than the sum of the normal tax and surtax computed on net income after deducting net long-term capital loss.

[1] Total income and net income for 1932 and 1933 include net capital gains from sale of assets held over 2 years, whereas net income has not been reduced nor have deductions been increased by amount of net capital losses from such sales. For treatment of capital gains and losses for 1934 and later years, see notes 6 and 7.

[2] Excludes salaries and wages of the individual, his wife, or dependent minors derived from business conducted by the individual.

[3] Dividends on stock of domestic corporations prior to 1936, taxable interest on obligations of the United States for all years, and prior to 1934, capital net gain from sale of assets held more than 2 years, received through partnerships and fiduciaries were reported under their respective classifications. For 1934 through 1937, income of partnerships and fiduciaries includes proportion of net capital gains and losses resulting from sales of capital assets through these entities required to be reported under Revenue Acts of 1934 and 1936. For 1938 partnership income excludes capital gains; fiduciary income includes capital gains except amounts received through "common trust fund."

[4] Exclusive of amount taxed as capital net gain from sales of assets held over 2 years.

[5] Amount reported for tax at 12½ percent in lieu of normal tax and surtax.

[6] Under the Revenue Acts of 1934 and 1936, certain percentages (varying according to the period for which assets were held) of gains or losses from the sale of all capital assets are taken into account in computing net income, the deduction for capital losses being limited to $2,000 after subtracting capital gains. Amounts shown as "net capital gain" and "net capital loss" represent the proportion of gains and losses required to be included and are not comparable with "profits (or net loss) from sale of real estate, stocks, bonds, etc." and "capital net gain from sale of assets held over 2 years" reported for earlier years; they exclude gain or loss on sale of capital assets through partnerships or fiduciaries (see note 3).

[7] For 1938 capital assets include worthless stock and exclude property used in trade or business of a character which is subject to the allowance of depreciation. Net short-term gain from capital assets held 18 months or less, or net long-term gain or loss from capital assets held over 18 months include partner's share of gain or loss allowed partnerships and common trust funds.

[8] Consists of net gain or loss from property used in trade or business of a character which is subject to the allowance of depreciation which is excluded from capital assets.

[9] On stocks of domestic corporations prior to 1936; includes dividends on stocks of both domestic and foreign for 1936 to 1938, subject to normal tax and surtax.

[10] Not wholly exempt from tax.

[11] Other than reported for tax credit on capital net loss from sale of assets held more than 2 years.

[12] Excludes amounts reported in business deductions.

[13] No deduction allowed for prior year loss.

[14] Less than $500,000.

[1] Prior to 1935 includes returns of husbands whose wives though living with them file separate returns.
[2] Included in "Joint returns of husbands and wives."
[3] An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income under $5,000, as the net income of one spouse may be $5,000 or over and that of the other spouse under $5,000.
[4] Prior to 1935 returns of estates were distributed according to sex and family relationship of testator or grantor, and returns of property held in trust, according to sex and family relationship of beneficiary or sex and family relationship of testator or grantor if status of beneficiary could not be determined.

[1] Includes net capital gain and net capital loss computed as explained in note 7, table 200.
[2] If not wholly exempt from tax.
[3] Specific exemptions equal or exceed net income.
[4] Consists of (1) returns with no net long-term capital gain or loss and (2) returns with net long-term capital gain or loss which have no alternative tax.
[5] The alternative tax is imposed on returns with net long-term capital gain if such alternative tax is less than the sum of the normal tax and surtax computed on net income including net long-term capital gain. The alternative tax is imposed on returns with net long-term capital loss if such alternative tax is greater than the sum of the normal tax and surtax computed on net income after deducting net long-term capital loss.
[6] Less than five-thousandths of 1 percent.

No. 207.—Income Tax Returns, Corporation—Summary: 1911 to 1939

Note.—**All money figures in thousands of dollars.** Statistics are based on taxpayers' returns as filed, unaudited except to insure proper execution of the returns. They include data for Alaska and Hawaii. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, charitable, etc., not operating for profit. Under the Revenue Act of 1934, the privilege of filing consolidated returns, which had formerly been permitted for groups of affiliated corporations, was limited to steam and electric railroads. The Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railways. These changes resulted in marked differences between the industrial and the net-income or deficit classifications of returns for 1934 and subsequent years and those for 1933 and prior years and also in the distribution of returns by size-of-assets classes. Tables showing the effect of the discontinuance of the consolidated return on the tabulated data will be found in Statistics of Income for 1934, Part 2. In general, corporations are classified industrially on the one business activity which accounts for the greatest percentage of "Total receipts." Therefore, the industrial groups contain corporations not engaged exclusively in the industries in which they are classified. As a result of the application of the Standard Industrial Classification, the number of major and minor industrial groups for 1938 has been increased over that for 1937, and certain changes have been made in the contents of the groups.

[1] For 1935 and prior years, net income or deficit represents amount for income tax computation. For 1936 and later years, net income or deficit represents amount for excess-profits tax computation and includes dividends received on stock of domestic corporations subject to taxation under title I of the effective revenue acts and interest received on certain Government obligations subject to excess-profits tax and excludes contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

[2] Includes inactive concerns prior to 1927. [3] Returns showing net income in excess of $5,000 exemption.

[4] Returns showing net income not in excess of $5,000 exemption or deficit. [5] Not available.

[6] Receipts for year ended June 30 following year in stub as reported by Commissioner of Internal Revenue. Figures shown for 1911 and 1912 and $10,671,000 of the amount shown for 1913 are excise tax receipts.

[7] Figures for 1915 contain approximately 32,000 returns which properly belong in 1914.

[8] Excess-profits tax (effective June 30, 1933, under provisions of the National Industrial Recovery Act).

[9] Includes surtaxes on undistributed profits according to provisions of Revenue Acts of 1936 and 1938.

[1] No income data reported.

[2] For 1928 to 1931 gross income corresponds to total income as reported on face of return, plus "cost of goods sold," and for 1932 to 1938 gross income corresponds to total income as reported on face of return, plus "cost of goods sold" and "cost of operations." For 1934 and 1935 interest on Liberty bonds, etc., has been deducted from gross income as this item was not included in gross income for prior years. For 1936, 1937, and 1938 gross income includes interest received on certain Government obligations which is subject to the excess-profits tax.

[3] See note 1, table 207.
[4] Includes excess-profits tax of $37,540 for 1934 and $19,584 for 1935 on returns with no net income, since credit for interest received on certain obligations of the United States and its instrumentalities is not allowed against net income in the computation of the excess-profits tax.
[5] Includes surtax on undistributed profits.

[1] For definition of net income and deficit, see note 1, table 207.

[2] For historical comparison the 1938 data are adjusted by transferring certain minor groups from the classification in which they are tabulated in tables 211 and 215 to the classification in which they were tabulated for 1937 in this table.

[3] For historical comparison there are inserted additional data for 1937 adjusted by transferring certain minor groups from the classification in which they were tabulated for 1937 in this table to the classification in which they would have been tabulated had the classification for 1938 been used.

[4] "Food products" includes "Liquors and beverages," for years prior to 1933.

[5] "Textile mill products" includes "Clothing and apparel," for years prior to 1936.

No. 212.—Gross Income of Corporations, by Industrial Groups: 1931 to 1938

NOTE.—**In millions of dollars.** For 1931 to 1935 gross income excludes nontaxable income, except dividends on capital stock of domestic corporations, but includes receipts from all other sources. For 1936 to 1938 gross income includes interest on certain Government obligations subject to excess-profits tax, and dividends, unlike former years, are taxable. Sales are included on gross basis, but only net profits from the sale of capital assets are included. See also headnote, table 207.

[1] Excludes nontaxable income, other than interest on tax-exempt obligations for all years and dividends on stock of domestic corporations except for 1936, 1937, and 1938. For 1936, 1937, and 1938, dividends are taxable income.

[2] Where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

[3] Where inventories are not an income-determining factor. Figures for years prior to 1932 represent gross profits from operations other than trade and manufacturing. For 1925, tabulated in "Other receipts." For 1926, 1927, and 1928 such profits for only those corporations classified under "Transportation and other public utilities," "Service," "Finance," and "Nature of business not given" were included in "Other receipts."

[4] Included in "Other deductions" prior to 1933.

[5] Includes obligations of States and Territories and minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States and its possessions, and for 1936, 1937, and 1938 certain obligations subject to excess-profits tax.

[6] Beginning 1936 "Dividends from domestic corporations" are taxable income tabulated with "Other receipts."

[7] These figures are affected by the inclusion in deductions of contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

[8] Compiled receipts less compiled deductions.

[9] See note 1, table 207.

[10] Deducted by concerns reporting net income.

[11] Includes excess-profits tax for 1933 to 1938, and for 1936, 1937, and 1938, surtax on undistributed profits.

[12] Excludes dividends of life-insurance companies prior to 1928.

[13] Other than income and excess-profits taxes and taxes reported under "Cost of goods sold" and "Cost of operations."

[14] Included in "Other deductions."

[15] Deficit.

[1] Includes corporations not reporting nature of business, but excludes inactive corporations.
[2] Excludes nontaxable income other than interest on tax-exempt obligations.
[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Deductions."
[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations," see "Deductions."
[5] Less than $50,000.
[6] Includes "Royalties" which for 1937 were tabulated in "Other receipts."
[7] Unlike 1937, capital assets exclude property used in trade or business of a character subject to the allowance for depreciation. Includes losses from worthless stocks and bonds, which were tabulated in "Other deductions" for 1937. Net capital loss is limited to $2,000 except for certain losses in the cases of banks and trust companies.
[8] Consists of net gain or loss from property used in trade or business of a character subject to the allowance for depreciation, which under the Revenue Act of 1938 is excluded from capital assets. For 1937, net gain or loss from sale of depreciable property was included in "Net capital gain or loss."
[9] Consists of interest on United States savings bonds and Treasury bonds owned in principal amount of over $5,000.

[10] Consists of interest on obligations of States, Territories, or political subdivisions thereof, the District of Columbia, United States possessions; obligations of the United States issued on or before Sept. 1, 1917, Treasury notes, Treasury bills, and Treasury certificates of indebtedness; United States savings bonds and Treasury bonds owned in principal amount of $5,000 or less; and obligations of instrumentalities of the United States.

[11] Unlike 1937, excludes "Royalties."

[12] Includes taxes which are reported in "Cost of goods sold."

[13] Includes taxes which are reported in "Cost of operations."

[14] Excludes (1) Federal income and excess-profits taxes and (2) taxes reported in "Cost of goods sold" and "Cost of operations."

[15] Limited to 5 percent of net income before deduction of contributions or gifts.

[16] Deficit.

[17] "Net income" or "Deficit" is the amount reported for excess-profits tax computation. (See note 1 on table 207.)

[2] Excludes nontaxable income other than interest on tax-exempt obligations.

[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Deductions."

[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations," see "Deductions."

[5] Less than $50,000.

[6] Includes "Royalties" which for 1937 were tabulated in "Other receipts."

[7] Unlike 1937, capital assets exclude property used in trade or business of a character subject to the allowance for depreciation. Includes losses from worthless stocks and bonds, which were tabulated in "Other deductions" for 1937. Net capital loss is limited to $2,000 except for certain losses in the cases of banks and trust companies.

[8] Consists of net gain or loss from property used in trade or business of a character subject to the allowance for depreciation, which under the Revenue Act of 1938 is excluded from capital assets. For 1937, net gain or loss from sale of depreciable property was included in "Net capital gain or loss."

[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Deductions."
[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations," see "Deductions."
[5] Less than $50,000.
[6] Includes "Royalties" which for 1937 were tabulated in "Other receipts."
[7] Unlike 1937, capital assets exclude property used in trade or business of a character subject to the allowance for depreciation. Includes losses from worthless stocks and bonds, which were tabulated in "Other deductions" for 1937. Net capital loss is limited to $2,000 except for certain losses in the cases of banks and trust companies.
[8] Consists of net gain or loss from property used in trade or business of a character subject to the allowance for depreciation, which under the Revenue Act of 1938 is excluded from capital assets. For 1937, net gain or loss from sale of depreciable property was included in "Net capital gain or loss"
[9] Consists of interest on United States savings bonds and Treasury bonds owned in principal amount of over $5,000.
[10] Consists of interest on obligations of States, Territories, or political subdivisions thereof, the District of Columbia, United States possessions; obligations of the United States issued on or before Sept. 1, 1917, Treasury notes, Treasury bills, and Treasury certificates of indebtedness; United States savings bonds and Treasury bonds owned in principal amount of $5,000 or less; and obligations of instrumentalities of the United States.

[11] Unlike 1937, excludes "Royalties."
[12] Includes taxes which are reported in "Cost of goods sold."
[13] Includes taxes which are reported in "Cost of operations."
[14] Excludes (1) Federal income and excess-profits taxes and (2) taxes reported in "Cost of goods sold" and "Cost of operations."
[15] Limited to 5 percent of net income before deduction of contributions or gifts.
[16] Deficit.
[17] "Net income" or "Deficit" is the amount reported for excess-profits tax computation. (See note 1 on table 207.)
[18] Consists of corporations who at any time during the taxable year owned 50 percent or more of the voting stock of another corporation and whose income from such stock was 50 percent or more of the amount of dividends received.
[19] Consists of corporations (other than investment trusts and investment companies) who (a) at no time during the taxable year owned 50 percent or more of the voting stock of another corporation or (b) at any time during the taxable year owned 50 percent or more of the voting stock of another corporation but whose income from such stock was less than 50 percent of the amount of dividends received.

[1] Excludes inactive corporations.
[2] Cash in till and deposits in banks.
[3] Less reserve for bad debts. Includes loans and discounts of banks.
[4] Includes obligations of States and Territories and minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States and its possessions, and for 1936, 1937, and 1938 certain obligations subject to excess-profits tax.
[5] For balance sheets in which common and preferred stock are not reported separately, the combined amount is tabulated as "Common stock." For balance sheets with no par stock and not reporting capital stock value, the net worth is tabulated under "Surplus and undivided profits."
[6] For 1937 and 1938, excludes "Surplus reserves."
[7] Includes "Surplus reserves," "Paid-in or capital surplus," and "Earned surplus and undivided profits." If one or more of these amounts are negative, they are tabulated as "Deficit" and the remaining positive items are tabulated as "Surplus and undivided profits." Prior to 1937 the net amount of "Surplus and undivided profits" or "Deficit" was tabulated from each return.
[8] Consists of negative amounts for "Paid-in or capital surplus" and "Earned surplus and undivided profits."

[1] Returns of active corporations submitting balance sheets.

[2] Adjustments of assets and liabilities are made in tabulating the data, if the following conditions appear on the balance sheets: (1) A negative amount reported in assets is transferred to its appropriate place under liabilities and "Total assets" and "Total liabilities" are increased by the amount; (2) a deficit in surplus shown under assets is transferred to liabilities and "Total assets" and "Total liabilities" are decreased by the amount of the deficit; and (3) reserves for depreciation and depletion when shown under liabilities are transferred to the corresponding asset accounts and "Total assets" and "Total liabilities" are reduced by the amount of such reserves.

No. 219.—Estate Tax Returns, Federal—Summary: 1916 to 1939

NOTE.—**All money figures in thousands of dollars.** Under the various revenue acts estate tax returns are required: (1) In the case of every citizen or resident (only every resident for deaths prior to May 11, 1934) decedent if gross estate exceeds $50,000 for deaths prior to Feb. 26, 1926, and from June 6, 1932, to Aug. 30, 1935; $100,000 for deaths from Feb. 26, 1926, to June 5, 1932; and $40,000 for deaths on or after Aug. 31, 1935; (2) in the case of every nonresident alien (every nonresident citizen and alien if decedent died prior to May 11, 1934) who owned property in the United States at date of death. Estates of decedents dying on or after June 6, 1932, are subject to two taxes, a basic tax levied under the Revenue Act of 1926 or the Internal Revenue Code or either as amended and an additional tax levied under the Act of 1932 or that Act as amended, or the Internal Revenue Code.

[1] Includes returns of all citizen decedents, regardless of place of residence, who died after May 11, 1934.

[2] Basis for net estate classes is amount of net estate used in computing additional tax before deducting specific exemption of $40,000.

[3] Specific exemption allowed under act of 1924 and prior acts is $50,000; act of 1926, $100,000. Specific exemption allowed for computing additional tax under act of 1932 and act of 1932 as amended by 1934, $50,000; and act of 1932 as amended by 1935 and subsequent acts, $40,000.

[4] For years 1936-37 the deduction tabulated is that computed under 1926 act; for 1938 and 1939 the deduction is that used for computing additional tax, except for returns for decedents who died prior to June 6, 1932.

[5] Not reported separately.

[6] Less than $500.

[7] Credits for estate, inheritance, legacy, or succession taxes paid to any of the several States, Territories, or District of Columbia, or if death occurred after June 29, 1939, U. S. possessions, and gift taxes paid to the Federal Government.

[1] Except where otherwise indicated.
[2] Payable 20 years from date of issue.
[3] Amount outstanding is current redemption value. Bonds are sold at a discount payable at par on maturity, 10 years after date of issue. Interest rate is approximate yield if held to maturity.
[4] At option of owner.
[5] Treasury bills are non-interest-bearing short-term securities sold on a discount basis with competitive bids for each issue. The average sale price gives an approximate yield on a bank-discount basis. Yields on all issues outstanding Dec. 31, 1940, ranged between the percents given above.

No. 236.—Assessed Valuation of Property Subject to General and Selective Property Taxes, by States: 1932 and 1938

NOTE.—**In millions of dollars.** Valuation reported is the total that was subject to general and selective property taxes for the State and local units within the State. The proportion of the total valuation that was taxed by different governmental units, and the rates of taxation thereon, varied widely according to State and local legislation. Figures do not show the relative wealth of the several States, owing to differences in the bases of assessment and practices thereunder.

No. 238.—Tax Levies—Total Levies of General Property Taxes of State and Local Governments, by States: 1880 to 1932

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, boroughs, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1860, 1870, and 1890, by States, see table 437, Statistical Abstract of 1922.

[1] For 1912 and 1922, for the grand total and for certain States the sum of the separate per capita figures for State and local debt will not add to the total per capita shown due to the fact that population estimates for different dates were used in computing State per capita and local per capita. (For more detailed explanation see sources given below.) Per capita figures for 1932 and 1937 have been revised to make them comparable with those shown in tables 239 and 240.

[2] Surplus of $57,000 in New Jersey's sinking fund excluded in deducting sinking funds from gross debt.

[3] Surplus of $126,000 in Pennsylvania's sinking fund excluded in deducting sinking funds from gross debt.

[4] Farm-mortgage and other rural-credit assets amounting to $121,337,000 resulting from rural-credit loans, held by the State sinking funds of Minnesota, North Dakota, and South Dakota, were not deducted from gross debt. The sinking funds for these States include farm mortgages and other rural-credit assets as follows: Minnesota, $57,281,000; North Dakota, $31,303,000; South Dakota, $32,753,000.

[5] Farm-mortgage and other rural-credit assets were not deducted from gross debt for Minnesota, North Dakota, and South Dakota.

[6] Data are for fiscal year 1931.

[7] Sinking-fund assets exceeded gross debt.

[8] No State indebtedness reported; the Virginia-West Virginia debt settlement was not made until 1919.

[9] Includes $863,000 of indebtedness of local governments in Indian Territory reported separately in 1902.

[1] Under orders of the Secretary of the Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to the Treasurer of the United States, and under the Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. Gold coin ($287,000,000) shown on Treasury records as then outstanding was dropped from statements.

No. 256.—Money—Stock, by Kind: 1860 to 1941

Note.—Amounts in thousands of dollars. Figures prior to 1890 were revised in 1925 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver for those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude gold earmarked for foreign account.

[1] The totals involve a duplication to the extent that United States notes, Federal Reserve notes, Federal Reserve bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

[2] By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. The value of gold is therefore based on $35 per fine ounce beginning June 1934; theretofore, it is based on $20.67 per fine ounce.

[3] There has been no fractional currency in actual circulation to any extent since 1878.

[4] Silver bullion in Treasury.

[5] Includes silver bullion as follows: June 30, 1934, $1,560,000; June 30, 1935, $313,309,000; June 30, 1936, $708,211,000; June 30, 1937, $835,196,000; June 30, 1938, $1,037,163,000; June 30, 1939, $1,230,586,000; Dec. 31, 1939, $1,296,212,000; June 30, 1940, $1,353,162,000; Dec. 31, 1940, $1,398,091,000; June 30, 1941, $1,435,909,000.

No. 257.—Money in Circulation, Money Held in Treasury and in Federal Reserve System, and Total Stock: 1800 to 1941

Note.—All figures except per capita in thousands of dollars. In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal Reserve banks and agents, and, hence, in stock of money, gold bullion and foreign coin held by them and gold coin and bullion held abroad for the account of Federal Reserve banks, and also to include in the holdings of Federal Reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as Reserve against Federal Reserve notes or otherwise. See also headnote, table 256. Per capita figures based on population estimates of the Treasury Department.

[1] Gold and silver certificates and Treasury notes of 1890 are excluded before combining money outside of the Treasury with money in the Treasury in order to avoid duplication, since the gold and silver held in Treasury as security against these currencies is included. See also notes 1 and 2, table 256.

[2] Both of these items include also reserve against Treasury notes of 1890.

[3] See note 1, table 255. [4] Includes total stock of silver dollars and subsidiary silver.

[5] Gold certificates. This amount is not included in the total since the gold held as security against the gold certificates is included in the column, "In trust against gold and silver certificates."

[1] Figures for loans and investments beginning Dec. 31, 1938, are not entirely comparable with prior call dates because investments and other assets (principally loans) indirectly representing bank premises and other real estate are no longer included in loans and investments but are now reported separately. Such investments and other assets amounted to $94,569,000 and $49,939,000, respectively, on Dec. 31, 1938.
[2] Not reported separately where no figures are shown.
[3] Figures prior to Dec. 31, 1939, represent all loans on securities, except loans to banks and to brokers and dealers.
[4] This is a residual item and, because of revised loan classification beginning Dec. 31, 1938, the residual amounts are not comparable.
[4] Corporate stocks of foreign corporations were reported in combination with bonds, notes, and debentures prior to Dec 31, 1938.

[1] Prior to Dec. 31, 1935, excludes balances with private banks to the extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which, on that date, amounted to $62,000,000 and which, prior to that time, were reported in "Other assets."

[2] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

[3] Aggregate book value of capital stock, capital notes and debentures, surplus, undivided profits, reserves for contingencies, etc.

[4] Postal savings included in time deposits.

[5] Beginning 1933, figures relate to licensed banks only.

[6] Includes United States Treasurer's time deposits, open account.

[7] Central reserve city banks only.

[1] Date of reports of member banks; figures for nonmember banks as of nearest available date.
[2] Exclusive of interbank deposits, with following exceptions: For dates prior to Dec. 30, 1933, member-bank figures include interbank deposits not subject to immediate withdrawal, which aggregated $103,000,000 on that date; nonmember-bank figures prior to June 1940 include interbank deposits to the extent (estimated at $150,000,000 for June 30, 1937, but since reduced to probably a small amount) that they were not reported separately in a few State bank abstracts.
[3] Beginning June 30, 1933, all figures, except for mutual savings banks, relate to licensed banks only, with some exceptions as to nonmember banks.

No. 277.—All Active Banks—Principal Assets and Liabilities, by Class of Banks: 1840 to 1940

Note.—Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands, and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam, and American Samoa. Data are as of June 30 or about June 30 except data for the earlier years for banks other than national, for which reports were of various dates. Figures for banks other than national for the earlier years, especially through 1885, are incomplete. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years; since 1926 only one is included. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935, they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933.

[1] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.
[2] Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.
[3] Includes lawful reserve, exchanges for clearing house, and all cash items except for 1936 to 1940, for which years, cash items not in process of collection are excluded.
[4] Includes reserve accounts, and for banks other than national for 1934 to 1940, capital notes and debentures. Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.
[5] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.
[6] Includes postal savings. [7] Capital only. [8] Includes capital only for banks other than national.
[9] Figures for State banks, except number of banks and capital, estimated. [10] Licensed banks only.
[11] U. S. Government securities only. [12] Includes State bank circulation outstanding.
[13] Includes loan and trust companies and, with some exceptions (see headnote), stock savings banks.
[14] Figures given under capital, surplus, etc., represent surplus and undivided profits, including reserves, except that they include capital for any stock savings banks included (see headnote).

No. 286.—Savings Banks—Number of Depositors and Amount of Savings Deposits, Continental United States: 1820 to 1910

Note.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 287.

[1] Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of $1,942,574,000, and 225 State bank members with deposits of $925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of $1,818,541,000, 152 unlicensed State member banks with deposits of $842,982,000, and 2,938 unlicensed nonmember banks with deposits of $1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 985 unlicensed national banks with deposits of $1,028,347,000, 114 State member banks with deposits of $239,268,000, and 1,983 nonmember banks with deposits of $1,063,984,000 to be rehabilitated and reopened or to be placed in liquidation or receivership. All such banks are treated as suspensions.

[2] Includes 8 insured nonmember banks in 1934, 22 in 1935, 40 in 1936, 47 in 1937, 47 in 1938, 25 in 1939, and 18 in 1940, with deposits of $1,912,000, $3,763,000, $10,207,000, $10,156,000, $11,721,000, $6,589,000, and $5,341,000, respectively. Federal deposit insurance became operative Jan. 1, 1934.

[1] The number of borrowers receiving original loans from the HOLC was 1,017,824. The larger number of accounts noted here results chiefly from the division of properties on which loans were made. Figures on original applications and loans granted can be found in the Statistical Abstract for 1940 and previous years.

[1] Negligible proportion of liquidating associations included in years 1922 to 1936.
[2] Pledged shares estimated and deducted from reported assets.
[3] Years 1922 to 1924 estimated at 90 percent of reported assets. Years 1933 to 1939 include accrued receivables consisting principally of interest on mortgage loans.
[4] Estimated; figures prior to 1936, by projection of sample data with 1 percent of reported assets deducted for office building.
[5] Estimated by adding real estate loans made during the period to the mortgage balance at the end of the preceding period and subtracting the mortgage balance at the end of the current period. Inasmuch as pledged shares have been deducted from the mortgage balances used, amounts paid on pledged shares are in effect applied toward the liquidation of loans.
[6] For years 1922 to 1935 estimated by projection of sample reported by State supervisors; and for 1936 to 1939 estimated from a large sample of monthly reports.

[1] Includes first and second mortgages, loans in process of foreclosure, advances for insurance and taxes, and accrued interest receivable. In those instances where interest on mortgage loans was not segregated from accrued interest on other items, the entire amount was included with mortgages. For Delaware, arrearages on stock were also included.

[2] Principally share loans.

[3] Includes real estate held for redemption and judgments.

[4] Includes accounts receivable, deferred charges, stock arrearages, and other assets.

[5] Estimated or adjusted insofar as State-chartered element is concerned. In certain instances, items known to exist (State-chartered members) but not segregated in supervisors' reports have been inserted. There is no State report for Maryland, hence, State-chartered element for that State was estimated from information for members and a very limited number of nonmembers.

[6] Includes 4 restricted associations in process of reorganization.

[7] Number of State associations reported as of June 30, 1940.

[1] Includes all shares (free and pledged) and dividends credited.

[2] Includes advance payments on shares, advances by borrowers for insurance and taxes; delinquent dues; accrued taxes and interest payable; accounts, dividends, and mortgages payable, and specific reserves.

[3] Estimated or adjusted insofar as State-chartered element is concerned. In certain instances, items known to exist (State-chartered members) but not segregated in supervisors' reports have been inserted. There is no State report for Maryland, hence, State-chartered element for that State was estimated from information for members and a very limited number of nonmembers.

No. 312.—Federal Housing Adminstration—Volume of Business Transacted—Trend and Status of Property Improvement, Home Mortgage, and Rental Housing Insuring Operations: 1934 to 1940

Note.—**Amounts in thousands of dollars.** The program of providing insurance for long-term mortgages on individual homes and on large-scale rental projects and for short-term character loans for property improvement is carried on by the Federal Housing Administration under the provisions of the National Housing Act and its amendments. The Federal Housing Administration lends no money but provides insurance for loans made by banks and other private lending institutions.

[1] In obtaining totals in this column adjustments were made to avoid duplication arising from the fact that production credit associations and banks for cooperatives borrow from and rediscount loans with the Federal intermediate credit banks.

[2] Includes outstanding loans of associations which have been placed in liquidation.

[1] Less payments on principal and principal of delinquent and extended installments.
[2] Less amounts sold under repurchase agreements.
[3] Unmatured. Figures for 1932 include $18,500,000 of bonds issued to the Reconstruction Finance Corporation and for 1933, $142,118,000.
[4] Owned by national farm loan associations and individual borrowers.
[5] Not including special reserves set up against particular assets.
[6] Less impairment or deficit. The decrease in reserves and undivided profits for 1934 resulted largely from a change in accounting procedures. Includes earned surplus beginning with 1937.
[7] Includes claims not yet paid: $3,054,000 for 1934, $2,719,000 for 1935, $6,094,000 for 1936, $3,621,000 for 1937, $881,000 for 1938, $186,000 for 1939, and $428,000 for 1940.

No. 330.—Bank Clearings for Leading Cities: 1923 to 1940

Note.—In millions of dollars. Cities are listed in order of importance according to clearings in 1940. No figures are given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by the tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (tables 331 and 332) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1882 to 1920, and for figures for 146 identical cities, 1920 to 1936, see table 293, Statistical Abstract, 1937.

No. 338.—Fire Losses, Total and Per Capita, Continental United States: 1876 to 1940

Note.—**Amounts, except per capita, in thousands of dollars.** Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter.

No. 343.—Life Insurance Written and in Force, by States: 1938 and 1939

Note.—Figures cover business transacted in continental United States, including United States business of Canadian companies. They include data for some small companies which confine their business to the State in which they domicile, and usually to several small cities, which are not included in tables 339 to 342. Further differences between totals in this table and in the preceding tables are due to duplications from reinsurance.

No. 344.—Life Insurance of Fraternal Orders in the United States

Note.—Although the number of orders reporting varies considerably, most of the larger orders report regularly, so that the figures are fairly comparable from year to year. Prior to 1920 the figures for the number of orders as given below include all known to be in existence whether reporting or not.

[All money figures in millions and tenths of millions of dollars]

[1] Total premium receipts prior to 1910.

[2] Figures for 1895 to 1930 (also 1932 figures in italics) include adjustment expenses excluded thereafter.

[3] Including taxes.

[4] Figures through 1930, and 1932 figures in italics, include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1932 to 1939, except 1932 italic figures, relate to casualty, surety, and miscellaneous insurance companies only.

[5] Number of companies reporting. [6] See note 4.

No. 349.—Insurance Carriers and Insurance Agencies and Brokerage Offices—Number of Offices, Personnel, and Pay Roll, by Type of Insurance, for the United States: 1935

Note.—Carriers include all types of insurance coverage except title insurance and the guarantee of mortgages. Each carrier is considered as having only one home office. Insurance agencies and brokerage offices include insurance agencies, subagencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyds Associations and for reciprocal exchanges; and underwriter agencies. Classifications by kind of insurance in the case of multiple line companies submitting a consolidated report are based on the kind of insurance from which the major portion of the business is derived.

No. 351.—Commodity Exchange Transactions—Volume of Trading in Principal Grain Futures and Amount of Federal Taxes Collected on Sales of All Commodities for Future Delivery: 1923 to 1941

Note.—Trading in wheat and corn futures usually accounts for around 90 percent of the total volume of trading in grain futures. Statistics of the volume of future trading are not collected for commodities other than grains. The value of all futures sales is roughly indicated, however, by the amount of taxes collected on such sales. Since Oct. 3, 1917, stamp taxes upon sales of products or merchandise on exchanges, boards of trade, or similar places, for future delivery, have been in effect as follows: On each $100 of such sales or a fractional part thereof in excess of $100, 2 cents prior to July 2, 1924; 1 cent July 2, 1924, to June 21, 1932; 5 cents June 21, 1932, to May 11, 1934; 3 cents May 12, 1934, to June 30, 1938; repealed, effective July 1, 1938.

No. 362.—Capital Issues—Summary, by Classes: 1923 to 1940

Note.—**In millions and tenths of millions of dollars.** Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1917 and 1918 all stocks are included at their market value. Corporate issues for 1917 and 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than $100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies.

No. 366.—Industrial and Commercial Failures—Number and Liabilities, by Months: 1937 to 1941

Note.—**Liabilities in thousands of dollars.** Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public.

12. INCOME, EXPENDITURES, AND DEBT

[Data in this section relate to continental United States]

No. 370.—National Income and Shares Transferred by Enterprises: 1929 to 1940

Note.—National income is the measure of the value of net output of commodities and services produced by private and public enterprises of the economy. It includes economic activities carried on by all producing entities—corporations, partnerships, individual enterprises, and governmental agencies. Value of materials and supplies and of plant and equipment consumed in process of production is deducted from gross value of goods and services produced in order to obtain value of net production. The net product is represented by returns in the form of salaries and wages, net income of business enterprises, interest, and rents and royalties. Business savings (positive and negative) represent the difference between net income of business enterprises and disbursements in the form of dividends or withdrawals of owners of unincorporated businesses.

[1] Data on dividends, interest, and corporate savings by industrial divisions for 1934 and for subsequent years are based on a different industrial classification than are the estimates of these items for earlier years because of a change in the Revenue Act of 1934. Special tabulations of the Bureau of Internal Revenue permitted the making of estimates for 1934 on the earlier basis. For specific items in certain industries the variations are substantial, but for total income the changes were small. The 2 estimates were averaged in compiling this table.

No. 374.—Consumer Incomes—Distribution of Families and Single Individuals and of Aggregate Income Received, by Income Level:[1] 1935–36

Note.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases, a Works Progress Administration project conducted by the Bureau of Home Economics and the Bureau of Labor Statistics in cooperation with the National Resources Committee and the Central Statistical Board. Findings of that study were supplemented by income tax statistics and by other sample data on family and individual incomes.

[1] The estimates cover all consumers with the exception of 2,000,000 persons living in institutions or quasi-institutional groups. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families. Income includes the total net money income received during the year by all members of the economic family plus the value of certain items of nonmoney income, such as the occupancy of an owned home and food produced by rural families for their own use. The estimates apply to the 12-month period from July 1935 through June 1936.

No. 375.—Consumer Expenditures—Aggregate and Average Outlay of Families and Single Individuals for Consumption, Gifts and Personal Taxes, and Savings, by Income Level: 1935–36

Note.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases (see headnote, table 374), supplemented by data from various other sources. The estimates apply to the 12-month period from July 1935 through June 1936, and cover all families and single individuals in the United States. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families

[1] Excludes residents in institutional groups.

[2] Includes the total net money income received during the year by all members of the economic family and by single individuals, plus the imputed value of the following nonmoney items: Occupancy of owned homes, rented farm homes, and rent-free homes; food produced by rural families for their own use; fuel and ice obtained free by farm families.

[3] Includes, in addition to goods and services purchased during the year, the imputed value of the nonmoney items mentioned in note 2. All purchases of durable consumer goods, except payments on homes and improvements to homes, are considered current expenditures for the year. Automobile expenditures cover purchase and operating costs for family and personal use only, excluding costs chargeable to business use.

[4] Gifts include gifts made to persons outside the economic family, to churches and other religious organizations, and to welfare agencies. Taxes cover only personal income taxes, poll taxes, and certain minor personal property taxes. Taxes on automobiles and on owned homes, and sales and excise taxes are included in consumption expenditures. Business taxes and taxes on income-producing property were deducted in calculating net income.

[5] These estimates represent net changes in family and personal assets or liabilities, exclusive of gains or losses from revaluation of assets. At the lower income levels they appear as average net deficits for the year, the surpluses of some families in the income group being more than offset by the deficits of other families.

No. 378.—Net Debt in the United States: 1929 to 1940

NOTE.—Net public and private debt is a comprehensive estimate of the outstanding indebtedness of final borrowers in the United States rather than a measure of total debt. To obtain the net debt figures estimates of gross or total debt are corrected for debts issued by but held within units having economic coalescense. Four such units are distinguished (a) the Federal Government and its corporations and agencies, (b) combined State and local governments, (c) individual corporate systems, and (d) individual business establishments or persons. This selection of units means that the gross debt estimates are adjusted for (1) debts outstanding against a unit but held within that same unit in sinking, trust, or investment funds, (2) debts of intermediary financial institutions such as banks, insurance companies, and Federal agencies, and (3) for intercorporate debts internal to corporate systems under a single management. Under correction (2) bank deposits and liabilities of life insurance companies to policyholders were excluded and the intergovernmental debts of the United States Government and its corporations and agencies were eliminated by consolidating the Federal accounts. Loans receivable by Federal agencies were also deducted from the gross Federal debt since this debt is intermediary and duplicates private debts arising from these same advances by Federal agencies. The net debt figures give a more significant picture of trends in the debt structure than the crude gross debt estimates. The figures represent, in the main, balances of loans outstanding at the end of calendar years, corrections having been made wherever figures are reported by fiscal years not corresponding to calendar years.

13. PRICES

GENERAL NOTE.—The wholesale-price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926, 813 beginning January 1938, 863 beginning March 1940, 887 beginning October 1940, and 889 beginning January 1941; a smaller number of commodities was covered in earlier years. The price of each article is weighted by the approximate quantity marketed during a period approximating that covered by the index. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The retail-food-cost indexes presented in this section for periods beginning January 1935 are revised indexes based on the distribution of expenditures as shown by the 1934–36 study made by the Bureau of Labor Statistics of expenditures of wage earners' and lower salaried workers' families. Differences in changes in retail-food costs as shown by the revised, as compared with the unrevised, data are due largely to the relatively greater importance of citrus fruits and green vegetables and the lesser importance of cereals, potatoes, and apples in the revised index. The revised indexes are computed from prices of 54 foods. Aggregate costs of 54 foods in each of 51 cities, weighted to represent total purchases, have been combined for the United States with the use of population weights. In accordance with a recommendation of the Central Statistical Board, Bureau of the Budget, an average of the years 1935–39 is being used as a base in presenting these revised indexes of food costs. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

The farm-price index is based on prices paid to producers for 34 major crops and 13 commercial truck crops. Average quotations for the period August 1909–July 1914 are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1924 to 1929.

No. 386.—Prices, Wholesale—Indexes, All Commodities and by Economic Classes: 1916 to 1941

Note.—Figures in boxes indicate number of quotations. As originally published, Bradstreet's "Index" is the sum of the prices per pound of 96 commodities; Dun's represents the aggregate cost per capita of a year's supply of the approximately 300 commodities included. In the following table, both series have been expressed as a percentage of 1926 by the Bureau of Foreign and Domestic Commerce. Indexes of the National Bureau of Economic Research for 1916 to 1928 are unweighted geometric means for approximately 490 commodities (converted from a 1913 base to a 1929 base by the Bureau of Foreign and Domestic Commerce); for subsequent years they are weighted arithmetic means for 680 price series, the weights being based upon the average value of production in 1927 and 1931. For method of computing the Department of Labor index, see general note, p. 354.

[1] Formerly "Finished products." [2] Perishable and semidurable.
[3] Effective January 1941. In earlier years a smaller number of commodities was included.
[4] Number of quotations used beginning 1929; see headnote regarding earlier years. The sum of the number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.
[5] Average, 1929 and 1930. [6] Beginning December 1937, discontinued by reporting source.

No. 387.—Cost of Goods Purchased by Wage Earners and Lower-Salaried Workers in 34 Large Cities Combined—Indexes: 1913 to 1941

Note.—1935-39=100. Figures for food represent 51 cities since June 1920 and a smaller number in earlier years; other figures, 19 cities from 1913 to 1917, 32 cities from 1918 to 1934, 33 cities from 1935 through September 15, 1940, and 34 cities thereafter. Totals from 1913 to 1924 are weighted by relative importance of items as ascertained by country-wide study of family expenditures in 1917-19. Totals from 1930 to date are weighted by relative importance of items as ascertained by a study of family expenditures in 1934-36. Totals for the intervening years, 1925 through 1929, are weighted by an average of the 1917-19 and the 1934-36 expenditure data. Except for 1913, the annual average indexes for items other than food are estimates based on indexes compiled as of particular dates at irregular intervals shown in previous issues of this publication. They represent weighted averages of indexes for each pricing period affecting the year. For example, where goods were priced in June and December, the indexes for December of the previous year were considered in arriving at the average of the year. The annual average food index is based on monthly indexes.

No. 393.—Unit Values, Annual Average, of Important Articles Imported: 1910 to 1940

NOTE.—The values are required by law to represent the values of the goods *in the foreign markets* whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly.

14. WAGES, HOURS OF LABOR, AND EMPLOYMENT

[Data in this section relate to continental United States, except as noted. For data relating to hours of labor, wages, and employment shown in other sections, consult the index]

No. 394.—Hours and Earnings, Average, in Selected Manufacturing Industries: 1936 to 1940

Note.—The averages in this table are based on monthly data supplied by representative establishments in the respective industries. As the number of such establishments varies slightly from month to month, the averages for different years are not in all cases strictly comparable; but the reporting "samples" are, in general, large enough to be representative of the industries. The average weekly earnings do not represent full-time earnings, inasmuch as the data from which they are computed cover both full-time and part-time workers. The average weekly hours and average hourly earnings are derived from somewhat smaller samples than the average weekly earnings, and therefore the product obtained by multiplying the hours by the hourly earnings is not identical with the average weekly earnings.

No. 395.—Earnings, Average Weekly, in Manufacturing Industries; Cost of Living; Weekly Earnings Adjusted to Cost of Living—Indexes: 1923 to 1940

Note.—1923-25 average = 100.0. The index numbers of average weekly earnings in this table for the years 1923-31 are derived from the employment and pay-roll indexes shown in table 399; the index numbers for the years 1932-40 are computed from data on weekly earnings published by the Bureau of Labor Statistics, the figures for 1936-40 being shown in table 394; and the two series are linked by the 1932 ratio. The index numbers of cost of living are those shown in table 387, p. 360, converted to the 1923-25 base. The significance of changes in average earnings is affected by such considerations as labor productivity, labor cost per unit of output, labor turnover, and wholesale prices. Such qualifying data are embodied in detailed reports of the Bureau of Labor Statistics.

[1] Figures for 1936 and 1937 include corporation officers, executives, and other strictly supervisory personnel. Hours and earnings for retail trade—total and general merchandising—from January 1939 weighted by lines of trade and therefore not comparable with figures for prior years.

[2] Not available.

[3] Cash payments only; the additional value of board, room, and tips cannot be computed.

[4] Excludes projects financed by P. W. A., or R. F. C. funds, or regular governmental appropriations.

[1] Changes in United States wage rates are affected by the relative number of men employed in areas with higher or lower wage rates.
[2] Beginning with March 1932 through December 1935, data from State projects also are included.
[3] Average for 10 months. [4] Average for 11 months.
[5] Federal-aid projects were at a low level for 1933 to 1935 and wage rates are not representative; see data for emergency, etc., projects. [6] Works Program as such abandoned July 1939.
[7] Data are based upon the type of project that employed the greatest number of men for the given year

No. 399.—Employment and Pay Rolls in Manufacturing Industries—Indexes, by Months: 1923 to 1941

NOTE.—**Monthly average, 1923-25=100.** Indexes are based on monthly reports from representative establishments in 90 manufacturing industries. These industries and industry groups are shown in tables 401-403. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. Indexes are not adjusted for seasonal variation. Indexes in this table and tables 400 and 401 have been adjusted to preliminary 1939 Census of Manufactures figures. Indexes in tables 402 and 403 have been adjusted to 1937 census figures, except as noted. It was not found practicable to follow some of the modifications made by the 1937 census in industry classifications because comparable data were not available from the census for the base-period years 1923 and 1925. In such cases the indexes of employment and pay rolls between 1935 and 1937, as in earlier revisions, were adjusted to movements of selected census data on the assumption that such movements would agree closely with those of the former census series. For indexes of employment adjusted for seasonal variations, see table 400.

[1] Adjusted to preliminary 1939 census figures.
[2] Adjusted beginning with 1939 on basis of a complete employment survey of the aircraft industry made for August 1940.
[3] Adjusted to 1933 census figures, but not to later census figures because of problems involving integrated industries.

[1] Compiled by Massachusetts Department of Labor and Industries, based upon monthly returns from approximately 1,800 manufacturing establishments employing about 60 percent of the factory wage earners in the State. Office workers assigned to productive departments are included, but not executives, salaried officers, etc. The employment indexes are adjusted to the annual State census of manufactures through 1936. Pay-roll indexes are based upon a computation of employment times average weekly earnings.

[2] Compiled by the New York State Department of Labor, based upon monthly reports from approximately 2,412 manufacturing firms who employ about 38 percent of all the factory workers in the State. Reports cover employees in both office and shop, including foremen. Executives and salesmen are omitted, and administrative and sales offices located away from the plants are not covered.

[3] Compiled by the Federal Reserve Bank of Philadelphia. For New Jersey, indexes are based upon monthly reports to the bank for 1925 and 1926 and since then, to the New Jersey Bureau of Statistics and Records of the Department of Labor. Current reports are from about 830 manufacturing plants which account for approximately 60 percent of all wage earners engaged in manufacturing industries of the State and 67 percent of the total wage payments. For Pennsylvania, indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics and the Pennsylvania Department of Labor and Industry. Current reports are from over 2,300 manufacturing plants and represent about 59 percent of the wage earners and 64 percent of the wage payments in the manufacturing industries of the State. Indexes are weighted according to the relative importance of each industry in the State totals. For Delaware indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics. Current reports are from about 82 manufacturing plants and represent approximately 60 percent of all workers engaged in manufacturing industries of the State and 70 percent of the total wage payments. The indexes for the 3 States have been adjusted to conform with the Federal Census of Manufactures data through 1937 and will be similarly adjusted to subsequent censuses.

[4] Compiled by the Illinois Department of Labor based on monthly reports from about 2,400 manufacturing plants which employ about ⅔ of the wage earners in manufacturing industries. Indexes have been adjusted to census data through 1935, except weekly earnings, for which comparable indexes are not available prior to 1935.

[5] Compiled by the Industrial Commission of Wisconsin, based on monthly reports (on wage earners) from representative manufacturers who employ about 80 percent of the total wage earners and whose pay rolls are about 83 percent of the total factory pay rolls in the State. Data for the canning and preserving industry and for railroad repair shops have been excluded. Indexes have been adjusted by using unemployment compensation data on covered workers, Commission statistics on employment and pay rolls, and census data. Indexes for employment and pay rolls from January 1929 through July 1937 are weighted relatives.

No. 406.—Earnings, Average Weekly and Hourly, in 25 Manufacturing Industries, by Labor Groups: 1926 to 1940

Note.—Index numbers based on 1923 as 100. Data cover a representative number of plants which employed 1,972,000 workers during 1940. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry as revealed by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year period 1927–29. The pay-roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week.

No. 409.—Wage Rates per Hour and Hours per Week—Indexes of Union Scales in Building and Printing Trades, by Occupations: 1910 to 1940

NOTE.—Data for the earlier years cover 39 cities. The coverage was gradually extended until, beginning with 1938, 72 cities were included. Prior to 1938 the figures were based upon the scale prevailing May 15 each year. For 1938 and subsequent years the study was made as of June 1. The relative wages are percentages which indicate the change in wages per hour. The relative hours are percentages showing the change in the regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work.

No. 411.—Strikes—Number, Workers Involved, and Man-Days Idle, by Major Issues Involved: 1927 to 1940

Note.—The term "strike" is here used in the generic sense to include all stoppages of work due to labor disputes, whether initiated by the employers (lock-outs) or by the workers. Strikes involving fewer than 6 workers or lasting less than 1 day are not included. Information regarding strikes is obtained principally from the public press, union publications, and trade journals. Reports are also received from the various Government labor boards and conciliation services. Information is also obtained from one of the clothing unions, which began in 1938 to keep a complete record of all strikes conducted by the union.

No. 415.—Employment and Pay Rolls on Projects Financed From Public Works Administration Funds: July 1933 to June 1941

Note.—**Pay-roll disbursements in thousands of dollars.** Construction projects financed by the Public Works Administration are those projects authorized by the National Industrial Recovery Act of June 1933. This program of public works was extended to June 30, 1937, by the Emergency Relief Appropriation Acts of 1935 and 1936. The Public Works Administration was continued until July 1, 1939, by the P. W. A. Extension Act of 1937, and to June 30, 1941, by the P. W. A. Appropriation Act of 1938. Data for employees engaged on force-account projects (projects for which contracts are not let) are duplicated in employment figures given elsewhere for Federal executive service and railroads. Monthly figures cover periods ended on the 15th. Figures for July 1935 and subsequent months include data for employees working on P. W. A. projects financed from funds provided by the Emergency Relief Appropriation Acts of 1935, 1936, and 1937, and P. W. A. Appropriation Act of 1938. See table 416.

No. 416.—Employment and Pay Rolls on Projects Financed from Emergency Relief Appropriation Acts Funds: July 1935 to June 1941

NOTE.—**Pay-roll disbursements in thousands of dollars.** The figures cover those projects originally financed by the Works Program which was inaugurated by the President by the authority of the Emergency Relief Appropriation Act of 1935, continued by subsequent acts, and abandoned as such in July 1939. Included are those projects conducted under the supervision of the Work Projects Administration (prior to July 1939, the Works Progress Administration), those conducted by the Public Works Administration, those of the National Youth Administration (formerly under Works Progress Administration, now in Federal Works Agency), and other Federal agency projects financed from the Emergency Relief Appropriation Acts. The activities of the Civilian Conservation Corps financed from the Emergency Relief Appropriation Act of 1935 are not included in these figures. Unless otherwise stated, figures refer to calendar months.

15. SOCIAL SECURITY

[Data in this section relate to continental United States, Alaska, and Hawaii, except as noted]

GENERAL NOTE

Old-age and Survivors Insurance.—Federal old-age and survivors insurance, administered by the Social Security Board under the Social Security Act as amended in August 1939, covers employment in industry and commerce. Specified employments are excepted, notably agricultural labor, domestic service, services for government and for certain types of nonprofit organizations, and self-employment. In January 1940, monthly benefits became payable to qualified workers at age 65 and also to certain dependents of beneficiaries and certain survivors of insured workers. Benefits are based on the legally defined average wage of the insured and are paid from the Federal Old-Age and Survivors Insurance Trust Fund, to which is appropriated annually an amount equal to the total taxes paid by employers and employees under the Federal Insurance Contributions Act. (A separate system, administered by the Railroad Retirement Board, covers employees of railroads and certain of their subsidiaries and affiliates. See pp. 416 to 422.)

Employment Security.—The Federal-State unemployment compensation program provides for payments to persons who are able and willing to work but are unable to find jobs. The contributions collected under State laws are designed to provide a fund to be used solely for this purpose. Employers, and in some States employees also, contribute definite proportions of pay rolls and wages to a special fund, from which qualified unemployed workers may draw benefits, limited as a rule by the amount of their prior employment and the wage rate. Under the Social Security Act the Social Security Board has two statutory responsibilities in the administration of the unemployment-compensation program. It certifies each year to the Secretary of the Treasury, for normal and additional tax-credit purposes, the State laws which conform to the standards prescribed; it also certifies grants to defray necessary costs of administering the State program for those States which, in law and administration, conform to the standards prescribed in title III of the act. Funds are certified in the amounts determined by the Board to be necessary for the proper administration of State laws, including administration of employment services in connection with payment of benefits. Funds for State employment services are also allocated by the Board under the provisions of the Wagner-Peyser Act.

Public Assistance.—Under the Social Security Act, the Federal Government shares with the States the costs of assistance given to needy persons and families. The assistance in which the Federal and State governments are thus collaborating is of three types: (1) Aid to needy persons aged 65 and over, (2) aid to the needy blind, and (3) aid to dependent children under the age of 16 who have been deprived of parental support, or under the age of 18 if regularly attending school. To receive a Federal grant under any one of these programs, a State must submit a plan which can be approved by the Social Security Board as meeting the basic requirements of the act, and, after approval of its plan, must supply with its requests for Federal funds the data required by the Board.

Public assistance under the Social Security Act obviously is related to other forms of public aid maintained by Federal, State, and local governments. The Social Security Board has therefore undertaken, at the request of other governmental agencies and with their cooperation, to report on all public aid to persons in need.

[1] Excludes data for railroads and other groups, subject, as of July 1, 1939, to Railroad Unemployment Insurance Act; figures for 1940 are estimates based on coverage provisions of State laws in 1939.

[2] Number of States and Territories paying benefits as follows: 1936 and 1937, 1. 1938—Jan.-Mar., 23; Apr.-June, 25; July-Aug., 28; Sept.-Nov., 29; Dec., 31. 1939—Jan.-June, 49; July 1939 to Dec. 1940, 51.

[3] Workers on last pay roll of each type (weekly, semimonthly, etc.) in month.

[4] Total wages in covered employment for all States except New York, which in 1938 and 1939 excluded wages in excess of first $3,000 a year to a worker from 1 employer. Wages are for all workers in quarter, hence average wages cannot be computed from these figures.

[5] Data for 1939 represent number of individuals receiving benefits during week ended nearest middle of month; for 1940, average number of weeks of unemployment compensated during weeks ended within month.

[6] Data for 1936–39 represent number of benefit payments. [7] Average monthly employment.

[8] Includes 43,082 payments amounting to $1,177,000, resulting from recalculation of weekly benefit amounts in Ohio, not allocated by month.

[9] Includes following payments made in Ohio and not allocated by month: $118,000 resulting from recalculation of weekly benefit amounts; 4,262 weeks compensated amounting to $44,000, delayed as result of labor dispute in 1939.

[1] Number of different workers an employer must have in covered employment in a specified number of weeks in current or preceding calendar year to be subject to State law.

[2] Employment of covered workers as of last pay-roll periods ended in month. Includes workers receiving in excess of $3,000 a year in all periods in which they were on pay roll. Excludes data for railroads and other groups subject to Railroad Unemployment Insurance Act.

[3] Number of different workers in each State who have earned wages in covered employment during some period in 1939. Includes approximately 745,000 workers with wage credits in more than 1 State.

[4] Represents wages paid or payable according to State law. Except in New York, includes wages in excess of $3,000 a year for a worker in covered employment. See also note 9. Excludes data for railroad and other groups subject to Railroad Unemployment Insurance Act.

[5] And total wages of $78 or more in a quarter.

[6] Coverage changed from 8 or more to 6 or more, effective Jan. 1, 1940.

[7] And wages of at least $50 to each of 4 workers in each of 3 quarters; or 8 or more workers within 20 weeks of calendar year. [8] Or 12 or more in 10 different weeks as an alternative to 4 or more in 20 weeks.

[9] Wages in excess of $3,000 a year for a worker from any 1 employer were not taxable in 4 States. Taxable wages amounted to $1,484,754,000 in Michigan and $158,053,000 in South Carolina, the latter under State amendment effective July 1, 1939. In the case of New York, the whole amount shown represents taxable wages and includes $30,473,000 for domestic service in private homes. For Rhode Island, figure represents total wages on which employers were taxable under State law; for employee contributions taxable wages were $216,744,000.

[10] Services for employers not subject to Federal unemployment tax and located outside of the corporate limits of a city, village, or borough of 10,000 population are excluded after Dec. 31, 1939, if the employer has paid all past contributions.

[11] And total annual wages of $500 or more. [12] And total wages of $225 or more in a quarter.

[13] For Jan.–June, 1939, 4 or more workers in each of 20 weeks of calendar year; since July 1, 1939, 2 or more workers during 13 weeks of calendar year, or total wages of $450 or more in a quarter.

[14] Includes domestic service in private homes (approximately 23,000 workers in 1939). Such service is excluded under laws of other States. See also note 9.

[15] And total wages of $500 or more in a quarter.

[16] For Jan.–June, 1939, 4 or more workers; since July 1, 1939, total wages of $140 or more in a quarter.

[17] Includes data for non-Federal Government employees covered by State law (13,500 workers in first half and 5,000 in last half of 1939 with taxable wages of $8,886,000 for 1939). State amendment, effective July 1, 1939, excluded certain Government employees. Such service is excluded under laws of other States.

[18] Or total annual wages of $6,000 or more, if employer's records do not permit accurate count of workers.

[19] And total wages of $150 or more in a quarter.

[1] Unadjusted for voided benefit checks.
[2] Represents number of benefit payments issued; data on weeks compensated not available prior to 1940.
[3] Includes data for partial, part-total, etc., types of unemployment not shown separately.
[4] Incomplete; data for New York not reported for period January–March.
[5] Effective Apr. 1, 1940, taken on a biweekly basis.
[6] Includes 43,000 payments amounting to $1,177,000, which resulted from a recalculation of weekly benefit amounts. Breakdown by type of unemployment not available.
[7] Includes 4,000 weeks compensated, amounting to $44,000, for payment of miners' claims resulting from a labor dispute in 1939. Of this amount, $43,000 was paid for total unemployment. In addition, figure for all types of unemployment includes $118,000 from recalculations (see note 6).
[8] All claims for partial unemployment are included with data for continued claims.
