[1] Represents sum of balances at end of month in State clearing account and benefit-payment account, and in State unemployment trust fund account maintained in U. S. Treasury. State unemployment trust fund accounts reflect transfers to railroad unemployment insurance account and include interest credited to date.

[2] Represents contributions from employers, plus such penalties and interest as are available for benefits, and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks. Current contribution rates are as follows: For employers, 2.7 percent of taxable wages in all States except Michigan, where rate is 3.0 percent; for employees, 1.5 percent of taxable wages in Rhode Island, and 1.0 percent in Alabama, California, Kentucky, and New Jersey, and, prior to July 1, 1940, 0.5 percent in Louisiana. Experience rating, resulting in modified contribution rates, became effective Jan. 1, 1938, in Wisconsin; Jan. 1, 1940, in Indiana, Nebraska, and South Dakota; Jan. 1, 1941, in California, Kansas, Kentucky, Minnesota, New Hampshire, Texas, Vermont, Virginia, and West Virginia; Apr. 1, 1941, in Alabama, Connecticut, and Hawaii; and July 1, 1941, in Oregon. All States collect contributions on quarterly basis, either wholly or in part, except West Virginia and Wisconsin, which collect on a monthly basis.

[3] Adjusted for voided benefit checks.

[4] Includes $599,000 transferred by Connecticut to railroad unemployment insurance account prior to Jan. 1, 1940.

[1] Figures for 1933–January 1936 represent payments from State and local funds only and number of recipients of such payments; for subsequent years, payments from Federal, State, and local funds for programs administered under State plans approved by Social Security Board and from State and local funds for programs administered under State laws without Federal participation, and number of recipients of such payments. Figures exclude cost of hospitalization and burial and, beginning September 1940, of medical care, and number of recipients of such assistance.

[2] Figures through March 1937 from the WPA; those for 1933–35 represent direct relief payments and number of cases aided, and number of relief and nonrelief persons (other than administrative employees) employed under general relief program of the Federal Emergency Relief Administration, and include an estimated amount of relief extended and number of cases aided by local authorities from public funds under poor laws. Figures exclude cost of hospitalization and burial and, beginning September 1940, of medical care, and number of recipients of such assistance.

[3] Figures from the WPA; represent relief extended to cases and number of cases receiving relief during month under emergency education, student aid, rural rehabilitation, and transient programs of emergency relief administration, largely financed from Federal Emergency Relief Administration funds.

[4] Figures from the FSA; represent net number and net amount of emergency grant vouchers certified to cases and number of cases receiving commodities and value of such commodities, purchased by the FSA and distributed during period. Ordinarily only 1 grant voucher per case is certified per month.

[5] Figures represent earnings and number of persons certified as in need, and earnings and number of all other persons, exclusive of administrative employees, on projects operated under Federal work programs.

[6] Figures from the CCC; represent earnings of enrolled persons only. Earnings estimated by multiplying average monthly number of persons enrolled by average of $70 for each month through June 1939, $67 for July–October 1939, $66.25 for November 1939–July 1941, and $67.20 subsequently for enrollees other than Indians, and $60.50 for Indians. Average amount is based on amount of obligations incurred for cash allowances, clothing, shelter, subsistence, and medical care of persons enrolled, and for certain other items. Figures for persons employed estimated for 1933 and 1934; for subsequent time, represent averages computed from reports on number of persons enrolled on 10th, 20th, and last day of each month, except for the Indian Division, for which averages are computed from daily reports.

[7] Figures from September 1935–June 1939 from the WPA; subsequently, from the NYA. Represent earnings during all pay-roll periods ended during year and number of persons employed during month except, beginning July 1941, data for persons employed on out-of-school work program based on average of weekly employment counts during month.

[8] Figures from the WPA; represent earnings during year and average weekly number of persons employed during month on projects operated by the WPA. Beginning July 1938 for earnings and September 1938 for persons employed, figures represent employment on Federal agency projects financed by transfer of WPA funds; earnings cover all pay-roll periods ended during year.

[9] Figures from the WPA; represent estimated total earnings and aggregate of maximum weekly number of persons employed during month under Civil Works Program.

[10] Figures from the Bureau of Labor Statistics; represent earnings and number of persons employed on projects financed in whole or in part from emergency Federal funds other than those of the CWA, CCC, NYA, and WPA; cover all pay-roll periods ended during year, and average weekly number of persons employed during monthly period ended on 15th. Beginning October 1941, represent employment and earnings on projects financed from PWA funds only; figures not available for other Federal agency projects financed under Emergency Relief Appropriation acts, but latest available reports show monthly employment of approximately 1,000 and monthly earnings of approximately $100,000.

[11] Figures estimated by the WPA and the Social Security Board.

[1] Excludes earnings of Indian enrollees, for which data are not available; latest available reports showed total earnings of approximately $363,000.

[2] Partly estimated; does not represent sum of State figures, because total payments for medical care, hospitalization, and burial in 3 States are excluded.

[3] Total includes data for South Carolina; amount of cash grant payments canceled during month exceeded by $12,000 amount of cash grant payments issued.

[4] State program only; excludes program administered by local officials.

[5] Includes total payments for medical care, hospitalization, and/or burial.

[6] Less than $500.

[7] Data represent approximately 70 percent of total expenditures; exclude assistance in kind and, for a few counties, cash payments.

[8] Partly estimated.

[9] Estimated.

[10] Decrease in payments in June 1942 resulted from shortage of funds.

[1] Excludes Indian enrollees, for which data are not available; latest available reports showed total employment of approximately 6,000.

[2] Partly estimated; does not represent sum of State figures, because estimated number of cases receiving medical care, hospitalization, and/or burial only in 3 States are excluded, and data on cases aided in Oklahoma are estimated to exclude duplication.

[3] Total includes data for South Carolina; number of cash grant payments canceled during month exceeded by 285 number of cash grant payments issued.

[4] State program only; excludes program administered by local officials.

[5] Includes unknown number of cases receiving medical care, hospitalization, and/or burial only.

[6] Excludes cases receiving assistance in kind only and, for a few counties, cash payments.

[7] Partly estimated. [8] Estimated.

[9] Includes cases receiving medical care only; number believed by State agency to be insignificant.

[10] Represents 3,499 cases aided under program administered by State board of public welfare, and 6,431 cases aided by county commissioners; amount of duplication believed to be large.

[1] Figures not comparable with those on amount of obligations incurred for payments to recipients.

[2] Up to Jan. 1, 1942, operations of the U. S. Employment Service were financed from 3 sources: State funds, matching Federal grants to States under the Wagner-Peyser Act, and Federal grants under title III of the Social Security Act. Beginning Jan. 1, 1942, the USES has been administered by the Social Security Board and financed solely from title III funds.

[3] Does not include $1,012,000 expended for postage.

[4] No plan approved by the Social Security Board.

[5] Since July 20, 1941, the Arizona employment service has been maintained by the Social Security Board as a division of its Bureau of Employment Security.

[6] Not available, because funds for the District of Columbia employment service were included in funds of the Federal Bureau of Employment Security.

No. 455.—Railroad Retirement—Benefit Payments Certified to the Secretary of the Treasury, by Class of Benefit: 1936 to 1941

Note.—The Railroad Retirement Act, as passed in 1935 and amended in 1937, established a Federal retirement system for railroad employees. Employers under the act include carriers—railroads, express companies, and sleeping car companies, subject to Part I of the Interstate Commerce Act; carrier affiliates which perform a service in connection with transportation by railroad—refrigerator-car loan companies, for example; organizations such as railroad or traffic associations maintained by 2 or more employers; and standard railway-labor organizations, national in scope. The act provides for 5 classes of retirement benefits:

(1) Employee annuities, both disability and old age, based on an employee's years of service and average monthly compensation, exclusive of earnings above $300, with employers under the act.

(2) Survivor annuities, paid to the surviving spouse of a deceased employee annuitant who had elected a reduced annuity during his or her lifetime in order to provide a lifetime annuity for his or her surviving spouse.

(3) Death-benefit annuities, paid under the 1935 act to the surviving spouse or dependent next of kin of a deceased annuitant or of a deceased employee who at the time of his or her death was entitled to receive an annuity. These annuities are equal to half the annuities paid or payable to the employee annuitants before their death, and are payable for 12 months.

(4) Lump-sum death benefits, paid under the 1937 act to 1 or more designated beneficiaries or to 1 or more of the deceased employee's surviving relatives, as prescribed in the amendment of Apr. 8, 1942. These benefits are equal to 4 percent of the compensation earned as an employee after Dec. 31, 1936 (excluding compensation in excess of $300 in any 1 month), less the aggregate amount of any employee or survivor annuities that may have been paid. If an employee annuitant had elected a joint-and-survivor annuity and his or her spouse was alive at the time of his or her death, the death benefit is not payable until after the death of the spouse.

(5) Pensions paid under the 1937 act to individuals who were, on both March 1 and July 1, 1937, on the pension or gratuity rolls of employers under the act and who were not eligible on July 1, 1937, for annuities based in whole or in part on service prior to Jan. 1, 1937. The pensions are equal in amount to the individual pensions or gratuities granted by employers, but cannot exceed $120 per month.

The funds of the retirement system come from an equal tax on employers and employees, based on the amount of compensation, not in excess of $300 in any 1 calendar month, earned by each employee. The changes in the tax rate are as follows: Calendar years 1937, 1938, 1939, rate 2¾ percent; 1940, 1941, 1942, rate 3 percent; 1943, 1944, 1945, rate 3¼ percent; 1946, 1947, 1948, rate 3½ percent; 1949 and subsequent years, rate 3¾ percent. Thus the total amount of the tax available for the first 3 years of the system is 5½ percent of total employee compensation (as defined above), and for the year 1949 and thereafter it will be 7½ percent.

Figures for annuities and pensions include amounts payable for a given month on all claims certified to the end of the month and still in force, and retroactive monthly payments on claims initially certified or recertified during the month. Cancelations and repayments of amounts certified in previous months are deducted.

[Amounts will not add exactly to totals because cents dropped]

No. 456.—Railroad Retirement—Annuities and Pensions by Class—Number of Payments Initially Certified, Terminated by Death, and in Force: 1936 to 1941

Note.—Figures for initial certifications are for period during which payment was first certified and not for period during which annuity began to accrue. Figures for terminations by death are for period during which notice of death was received and not for period during which beneficiary died. Cumulative figures exclude claims declared ineligible, erroneous certifications, and erroneous reports of death. In-force figures as of any date include only certifications made up to that date, less terminations by death reported by that date; they are also adjusted for recertifications, reinstatements, and terminations other than by death (suspension, return to service, recovery from disability, and commutation to lump-sum payment), items which are not shown in this table. See headnote, table 455.

[1] In a few cases payments are made to more than 1 survivor on account of the death of a single individual. Such payments are here counted as single items. Terminations include those by death and by expiration of 12-month period for which death-benefit annuities are payable. Practically all terminations are of the latter type.

[1] State of residence at time first check was mailed.

[2] Figures do not represent number of individuals receiving annuities. In 1 case death-benefit annuity payment was divided between 2 beneficiaries, and in 101 cases 1 individual received both a survivor and a death-benefit annuity.

[3] Number of individuals with respect to whose deaths the benefits were certified rather than the number of individuals certified to receive benefits. Less than 10 percent of the benefits are divided among 2 or more individuals.

[4] Includes 17 employee annuities with a monthly amount payable of $984 for Alaska; 28 employee annuities at $1,561 for Hawaii; and 1 survivor annuity at $17 for Hawaii. Also, 3 lump-sum death benefits amounting to $477 for Alaska, and 7 amounting to $1,202 for Hawaii.

No. 460.—Railroad Retirement—Number of Employees, by Number of Months of Service, and by Interval of Earnings, for the United States: 1940

Note.—Includes employees covered under Railroad Retirement and Railroad Unemployment Insurance Acts for whom wages were reported by subject employers. Some of these employees also had wages taxable under Federal Insurance Contributions Act and are therefore included in preceding tables on old-age and survivors insurance. The earnings in this table include wages and salaries, commissions, back pay and payments for time lost as an employee, reported by subject employers; however, the excess over $300 in any one calendar month for an employee is excluded. A month of service is a calendar month in which service for compensation was rendered to subject employers or with respect to which payment was made for time lost as an employee.

No. 461.—Railroad Unemployment Insurance—Number of Applications for Certificates of Benefit Rights Received, Certificates of Benefit Rights Issued, Claims Received, Number and Amount of Benefit Payments Certified, Average Benefit Payment, and Number of Accounts Opened and Exhausted: June 16, 1939, Through June 1942

Note.—The Railroad Unemployment Insurance Act, as passed in 1938 and amended in 1939 and 1940, established a Federal unemployment insurance system for the same employees who are covered by the Railroad Retirement Act. Under the Railroad Unemployment Insurance Act contributions first began to accrue and benefits first became payable as of July 1, 1939. Contributions amounting to 3 percent of pay rolls are collected from the employers. Unemployed employees may draw benefits if they have earned at least $150 of creditable earnings in the base year and have served a waiting period for the benefit year. Under the act prior to the 1940 amendment, as well as under the amended act, the daily benefit amount is related to the amount of base-year earnings.

[1] An application for a certificate of benefit rights is submitted when an unemployed worker applies for unemployment insurance benefits for the first time in a benefit year.

[2] A certificate of benefit rights is issued to each employee who has filed an application for a certificate of benefit rights and who has had sufficient earnings from a railroad employer in the base year to qualify for unemployment insurance benefits.

[3] A claim is prepared for each period beginning with a day of unemployment. The period prior to Nov. 1, 1940, comprised 15 consecutive days, and 14 consecutive days after Nov. 1, 1940. It contains registrations for each day of unemployment in the period and is submitted at the end of the period. Claims are received even where there are insufficient days of unemployment for the payment of benefits.

[4] Adjusted for overpayments and recovery of underpayments. On claims applying to 15-day periods begun prior to Nov. 1, 1940, benefit payments were certified for qualified claimants who had served their waiting period if the claimant registered for at least 8 days of unemployment. The amount of the certification is the product of the daily benefit amount and the number of days of unemployment in excess of 7. On claims applying to 14-day periods begun on or after Nov. 1, 1940, a benefit payment is certified for qualified claimants who had served their waiting period if the claimant registered for at least 5 days of unemployment, the amount certified being the product of the daily benefit amount and the number of days of unemployment in excess of 4. In addition, benefits are certified on waiting-period claims, if the number of days of unemployment in such period is 8 or more; on such claims the benefit is calculated as the product of the daily benefit amount and the number of days of unemployment in excess of 7. The maximum number of days of unemployment for which benefits were paid was 80 before Nov. 1, 1940, and 100 since then.

[5] An account is opened with the first benefit payment in a benefit year.

[6] An account is exhausted when an employee has been certified for the maximum number of days of benefits to which he is entitled in a benefit year.

[7] The sharp rise in the average benefit in 1940-41 and 1941-42 reflects the effect of the change in the act.

[1] Excluding rural free delivery routes, ocean mail routes, and air mail routes to foreign countries.
[2] Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.
[3] International includes foreign countries on domestic basis. For explanation, see headnote, table 465.
[4] Data are for continental United States and are estimates except in 1923 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.
[5] Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.
[6] From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.
[7] From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.
[8] Gross revenues of department for 1918 and 1919 include $44,500,000 and $71,292,000, respectively, war-tax revenue accruing from increased postage.

No. 465.—Postal Money-Order Business—Summary: Years Ended June 30, 1910 to 1941

NOTE.—For revenues from money orders, see table 464. For value of orders issued for other years, see table 463. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic."

No. 467.—Transportation of Domestic Mails, by Class of Service: 1915 to 1941

Note.—Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system; formerly, payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, about 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are based on "regular authorizations."

[1] Includes 10,550 connecting lines for which separate reports were not secured; data for such lines, however, were included in reports of operating companies supplying switchboard service.
[2] Includes data for connecting lines having fewer than 5 telephones per line, as follows: 11,759 lines; 29,000 telephones; and estimated figures for other items as follows: 44,000 miles of single wire; and $1,600,000 investment in equipment.
[3] Not reported for systems and lines having less than $5,000 annual income in 1912. For 1917 and 1922, figures represent number of systems and lines reporting central offices; actual number of central offices was probably slightly larger.
[4] Not reported except for systems and lines with income of $5,000 or more.
[5] Including assessments of mutual companies, and miscellaneous operating revenues.
[6] 83,378,000 miles of wire in cable and 6,193,000 not in cable.
[7] No data.
[8] No comparable data available.

No. 475.—Telephone Systems—Summary, Class A Carriers: 1926 to 1941

NOTE.—Figures cover Class A telephone carriers which reported for 1941. Class A carriers are those carriers whose average annual operating revenues exceeded $100,000. The gross operating revenues of Class A carriers (excluding intercorporate duplications of the Bell System) reporting in 1937 represented approximately 94 percent of the revenues of all telephone carriers as reported for the Census of Electrical Industries for that year. (See table 471.) The figures include data for carriers consolidated and merged prior to 1941, so far as annual data are available. Intercorporate duplications have not been excluded.

[1] Ratio of operating expenses to operating revenues.
[2] The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on, only the respondents' portion of jointly owned wire was included.
[3] Data for 1926 through 1932 include estimates.
[4] In comparing figures in this table, consideration should be given to the minor effect of the revisions of the Uniform System of Accounts, effective Jan. 1, 1933, and Jan. 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and the income statement.

No. 476.—Radiotelephones—Summary: 1937

NOTE.—Figures cover all companies and systems licensed by the United States to engage in the reception and transmission of commercial radiotelephone communications. No data are included for radiotelephone stations such as amateur, experimental, Federal, police, fire, etc., which were not licensed to charge fees for receiving or sending calls. The survey covered U. S. licensees in the United States, Alaska, Hawaii, and Puerto Rico, as well as those operating ship stations.

Number of companies or systems	27
Number of stations (as of Dec. 31)	132
Operating revenues applicable to the radio link (dollars)	1,212,073
Revenue calls, total number	147,596
Foreign traffic of the U. S. (calls subject to overseas regulations)	[1] 52,507
Ship traffic of the U. S. (calls subject to overseas, coastal, and harbor regulations)	[1] 26,409
Other traffic—Within the United States;[2] within Alaska;[2] within Hawaii;[2] within Puerto Rico;[2] Hawaii and Puerto Rico with other countries except continental U. S.; and Alaska with ships	68,680

[1] Calls originating, terminating, or relayed in the United States.
[2] Originating calls only.

[1] The Western Union Telegraph Co., which operates both land and ocean-cable systems, is counted as 2 companies.
[2] Exclusive of pole line owned and operated wholly by railway companies.
[3] Exclusive of wire owned and operated wholly by railway companies, as follows: Reported by all railway companies, 1912, 314,329 miles; reported by railway companies having annual operating revenues of $1,000,000 or more, 1917, 344,110 miles; 1922, 285,002 miles; 1927, 333,898 miles; 1932, 337,059 miles; 1937, 318,116 miles.
[4] Not available.
[5] Data are for land systems only.
[6] Excluding 31,102,577 lettergrams not distributed according to rate.
[7] Number of employees includes 7,516 messengers whose wages are not included in amount given for salaries and wages.
[8] In addition, telegraph revenues amounting to $25,899,000 were reported by companies primarily engaged in supplying telephone service.
[9] Data for ocean-cable business of Western Union Telegraph Co. included with those for land systems.

[1] Fuel equivalent is calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise fuel equivalent is calculated from reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in total.
[2] Calculated at 26,200,000 British thermal units per ton.
[3] Based on amount of coal displaced by gas, as estimated by gas companies.
[4] Figures not available for publication.
[5] Excludes data for imports of crude petroleum.

No. 484.—Electric Energy—Production, by Type of Prime Mover: 1920 to 1941

NOTE.—**In thousands of kilowatt-hours.** Figures for 1941 in this table and those in table 483 and in tables 485 to 489 are based on the operation of 4,070 power plants, owned by 1,694 concerns, generating electric energy for sale. The production and capacity of the following types of plants are included: Privately owned electric utilities, mining and manufacturing (exclusive of plants of those concerns whose sales were less than 10,000 kilowatt hours per month), railways and railroads, municipal electric utilities, Bureau of Reclamation, other Federal projects, cooperatives, power districts, State projects, and publicly owned noncentral stations.

No. 490.—Electric Light and Power Industry—Summary: 1902 to 1937

NOTE.—Figures cover all establishments engaged either in the generation and distribution of electric energy, or the distribution or transmission of electric energy, to public or private consumers. Statistics do not include establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in the nature of public utilities, unless a portion of their generated output is sold commercially. Plants operated by the Federal Government or by States were not included unless energy was sold commercially. For classification of reporting sources for 1937, see table 491.

[1] The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. [2] Not available.
[3] Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).
[4] Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."
[5] Includes "Estimated value of free service." [6] Number on June 30.
[7] Reported by commercial establishments only. No data for municipal establishments.
[8] Not comparable with figures for other years since amount includes only salaries and wages chargeable to electric operating service.
[9] Includes value of plant and equipment, $902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.
[10] In addition, hogged fuel, sawmill, and other waste were reported.

No. 491.—Electric Light and Power Industry—Generating Facilities, Energy Generated, and Fuel Consumed, by Reporting Sources: 1937

Note.—The system of classification by reporting sources, as shown in this table, is a new one recently adopted by the Bureau of the Census in collaboration with the Federal Power Commission. This classification differs slightly from that employed by the Federal Power Commission. (See headnote, table 484.) The differences in the figures are due mainly (1) to the inclusion in the census survey of data for certain small concerns not canvassed by the Federal Power Commission, and (2) to the inclusion in the Federal Power Commission survey of data for a larger proportion of the energy output of certain concerns grouped under "Other sources" than is accounted for in the census survey.

No. 498.—Water Power, Developed and Potential: 1921 to 1941

NOTE.—**In thousands of horsepower.** Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 horsepower or more. Potential power figures are 1936 revised estimates showing the 24-hour horsepower available 90 percent of the time and 50 percent of the time at an over-all efficiency of 70 percent at all developed and undeveloped sites. Data for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of installed water wheels or turbines, which may be several times the potential power available 90 percent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more.

19. PUBLIC ROADS AND MOTOR VEHICLES

No. 499.—Rural Roads—Mileage, Funds Available, and Disbursements, 1921 to 1941, and Construction Under Federal Aid, 1930 to 1941

Note.—Figures cover continental United States, except as noted, and refer to calendar years for most States. Mileage data included for 1921 and 1926 were obtained from county records; figures for 1929 and 1930 include some estimates. No data available for county and township roads after 1930, except for those under State control.

[1] Low-type includes soil-surfaced, gravel or stone, bituminous surface-treated, and mixed bituminous surfaces; high-type includes bituminous penetration, bituminous concrete and sheet asphalt, Portland cement concrete, brick, block, and dual-type surfaces, and unclassified surfacing on bridges.
[2] Includes 11,303 miles of unclassified roads. [3] Includes mileage partially graded and drained.
[4] Includes original and reconstructed surfacing. [5] Includes 368 miles of unclassified roads.
[6] Excludes funds transferred. [7] Excludes balance on hand at beginning of year; not reported in 1921.
[8] For road and bridge purposes under supervision of State highway department only.
[9] Includes an undetermined amount of municipal street mileage on State highway systems or connecting these systems. Beginning with 1935 such mileage is included, however, for only a few States. Figures prior to 1935 also include mileage of secondary road systems under State control for a number of States. [10] Primary systems only. See also note 9. [11] Not yet available.
[12] Includes funds transferred to or from local units. Data for the District of Columbia are not included prior to 1940.
[13] Not comparable with figures for prior years. Last 2 sentences of headnote, table 501, apply to these figures.
[14] Includes data for Hawaii and beginning 1937 for Puerto Rico. For 1941 figures for Federal-aid and emergency road construction and grade crossing projects, by States, see table 503.

[1] Includes secondary rural roads under State control with a total of 195,245 miles for the 17 States noted. Also includes 27,049 miles of urban extensions, 3,267 miles of which are not under State control.

[2] See note 1, table 499.

[3] Includes original and reconstructed surfacing. In addition to mileage here shown, surfacing on secondary rural roads under State control totaled 8,722 miles in 1939 and 6,789 miles in 1940, and surfacing on urban extensions of State systems totaled 938 miles in 1939 and 1,003 miles in 1940.

[4] Includes new location.

[5] Mileage for urban extensions under State control included with rural roads, as segregation by types was not available, except for 159 miles of urban extensions existing in Georgia at the end of 1940.

No. 501.—Disbursements of State-Highway Funds, by States: 1921 to 1941

Note.—Figures include disbursements, whether from current revenues or the proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Data beginning 1934 cover calendar years, while figures for earlier years for many States represent fiscal years. Figures for 1940 and 1941 are not comparable with those for prior years as they include data for certain State income applicable to highways, namely, proceeds of highway-user imposts allotted, without passing through the State highway departments, by the State treasurer, for (1) county and other local roads and streets and for (2) nonhighway purposes. These data were not included in prior years.

No. 508.—Motor-Vehicle Registrations (Combined Figures for Passenger Cars and Motor Trucks), by States: 1915 to 1941

Note.—Registration periods ending not earlier than Nov. 30 and not later than Jan. 31 are considered as calendar-year periods. Net numbers, excluding reregistrations and nonresident registrations, are given so far as possible. Totals in this table do not include, in most cases, those official cars which are exempt (or partially exempt) from paying regular registration fees to the States. Registrations for trailers are included in figures for some States. Tractor trucks and tractors for highway use are included beginning with 1925.

No. 510.—Motor-Vehicle Fatalities in Continental United States: 1915 to 1940

Note.—This table covers all deaths from automobile accidents, excluding deaths as a result of train and street car collisions with automobiles, and motorcycle accidents. Rates are based on revised estimates of population except for 1940 which is based on enumerated population. The term "rural area" includes all rural parts of the registration States excluding cities having populations of 10,000 or more; "urban area" includes all cities having population of 10,000 or more in the registration States; and "cities in nonregistration States" includes only a few cities in certain States not in the death registration area.

20. TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR BUSSES, AND CIVIL AERONAUTICS

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (*a*) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (*b*) switching and terminal railroads, also reporting to the Commission; and (*c*) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than $1,000,000 of such revenue; class II, from $100,000 to $1,000,000; and class III, less than $100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Class I companies make monthly reports from which data are compiled currently and published in a series of monthly statements. The yearly totals from these reports become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

No. 512.—STEAM RAILWAYS—MILEAGE OWNED AND MILEAGE OPERATED: 1890 TO 1941

NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,300 miles of main tracks). The first and second columns cover all railways, including "circular" and "unofficial" lines; the last 5 columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies.

No. 518.—Steam Railways (All Reporting Companies)—Equipment in Service: 1923 to 1940

Note.—"All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. The large number of cars owned by private car lines is not included.

[1] Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures. Information for 1915 is incomplete, as 20 of the larger railways did not report, and is not shown.

[2] Calculated for all classes of employees, including those not paid on an hourly basis.

[3] Data cover Federal reports, reports of companies not under Federal control, and corporate reports.

No. 523.—Steam Railways (All Reporting Companies)—Capitalization: 1890 to 1940

NOTE.—All amounts except "per mile of road" in millions of dollars. Switching and terminal companies excluded beginning with 1910; their total capitalization in 1940 was $798,121,687. Figures include both operating and nonoperating railways. The gross figures include considerable amounts of securities held by the companies issuing them as well as larger amounts held by other railway companies.

No. 524.—Steam Railways—Stock Outstanding, Dividends, and Interest: 1891 to 1940

NOTE.—Data relate to years ending June 30 prior to 1916 and to calendar years thereafter. Nonoperating as well as operating roads are included. Switching and terminal roads are excluded beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes the unimportant class III roads. The amount of stock shown in the first column is exclusive of stock held by the issuing company, but includes that held by other railway companies.

No. 535.—Steam Railways—Revenue Freight Originated and Carried, by Commodity Groups, All Roads, 1906 to 1915, Class I Roads, 1916 to 1941

NOTE.—**All figures in thousands of tons of 2,000 pounds.** Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects the comparability very slightly; those after 1916 exclude both class II and class III, thereby reducing the grand total about 6 percent. Non-revenue freight is excluded; this is a large item in the case of a few commodities, notably coal.

No. 538.—Steam-Railway Accidents—Number of Persons Killed and Injured, by Status: 1891 to 1941

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of $150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded $150 with or without a casualty. Where the damage is less than $150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911–1915 include industrial and other nontrain accidents to employees only, and for years 1908–1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody.

No. 543.—Electric Railways—Summary: 1890 to 1937

Note.—The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table and tables 544–546, 548, 550 do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see tables 551–553.)

[1] Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,009 car-miles; 1,042,866 car-hours; $2,388,295, operating revenue; and $2,412,010, operating expense.

[2] Includes certain companies in Pennsylvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

[3] Includes small mileage of track lying outside United States.

[4] Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were unable to report separately the values of plant and equipment assignable to their railway activities.

[5] Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept. 16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

[6] Includes 334 trolley-bus operators.

[7] Includes 29,721,000 trolley-bus passengers.

[8] Includes auxiliary operating revenues of $8,905,000 for 1927 and $91,242,000 for 1922; auxiliary expenses, $7,822,000 for 1927, and $49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations excluded so far as possible for earlier years.

[3] Domestic air carriers operate within the continental limits of the United States; international and territorial operations cover activities of American air carriers in foreign countries and territories of the United States. [4] Beginning with 1938, excludes data for companies cited in note 6.

[5] Includes operation and office personnel, and beginning with 1936, stewards and stewardesses.

[6] Beginning with 1936, excludes operations of the following affiliated companies of Pan American Airways System: Cía Mexicana de Aviacion, S. A., Cía Nacional Cubana de Aviacion, and Panair do Brasil, for which operations are included in prior years. [7] Estimated.

[8] Includes 1,719,919 airplane-miles flown by Army Air Corps.

[9] All data, except airplane-miles flown, are as of Dec. 31. [10] Long line teletypewriter equipped.

21. WATERWAYS, WATER TRAFFIC, AND SHIPPING

[Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army, Bureau of Customs, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico, and, from Jan. 1, 1935 through Dec. 31, 1939, Virgin Islands; from United States Maritime Commission, continental United States. Later figures than now shown in tables in this section will not be published during war period]

General note as to units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

No. 557.—Commerce of Principal United States Ocean Ports: 1940

NOTE.—**In thousands of short tons of 2,000 pounds.** In addition to the commerce here shown, many of the ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, in the case of New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although the aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic

[1] Sailing vessels, canal boats, and barges.
[2] The decrease of tonnage arises principally from the registered tonnage having been corrected in 1818, 1829, and 1830 by striking off all vessels the registers of which were granted prior to 1815, which were supposed by the collectors to have been lost at sea, captured, etc.
[3] Figures as of Dec. 31 are latest available for publication. Later data, compiled by Treasury Department, Bureau of Customs, will not be published during war period.
[4] Including Puerto Rico and Virgin Islands. [5] Including Hawaii and Alaska. [6] Not available.

[1] Taxes, fees, fines, etc.
[2] Principally from operation of shops and docks.
[3] After deduction of canal earnings repaid to appropriations.
[4] No interest charge against the Canal is actually made by the Treasury. In order to present the net results of the operation of the Canal, the interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1920, is included in capital investment account.
[5] Deficit.

No. 579.—Vessels Entered and Cleared in Foreign Trade—Net Tonnage: 1840 to 1940

Note.—Domestic trade is not included. For definition of net tonnage see general note, p. 511. Figures cover years ended June 30 to and including 1918, calendar years thereafter. Owing to the marked effect of the war on shipping a special average for the 6½ years July 1, 1914, to Dec. 31, 1920, is presented.

22. FOREIGN COMMERCE OF THE UNITED STATES

GENERAL NOTE.—All statistics in this section, except tables 588 and 617, were compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce through April 1941 and by the Bureau of the Census thereafter. Statistics of United States foreign trade were published annually in Foreign Commerce and Navigation of the United States through 1940 and were published currently in Monthly Summary of Foreign Commerce of the United States and in mimeographed statements through September 1941. After the issuance of the September 1941 figures, the publication of foreign trade statistics by countries and by commodities was discontinued for the duration of the war. Values of total exports and total imports are published in monthly press releases. Except as noted (as, for example, in table 615) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to $35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands (see headnote, table 587). Other explanations of the trade tables are given in the introduction to the annual report, Foreign Commerce and Navigation of the United States.

No. 587.—Merchandise Trade of Continental United States With Foreign Countries and Outlying Territories and Possessions: 1903 to 1941

Important Note.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "statistical customs area," which includes continental United States, Alaska, Hawaii, and Puerto Rico, with all foreign countries, including the Philippine and, prior to 1935, and for 1940, Virgin Islands. (The Virgin Islands were treated as part of the "Customs area" from January 1, 1935, through December 31, 1939.) The data do not cover trade between continental United States and the territories included in the customs area as given above. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States Territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 30 through 1918; thereafter, for years ended Dec. 31.

[1] Increase is the equivalent of net export and decrease the equivalent of net import. The reverse is true of changes in gold earmarked abroad for account of Federal Reserve banks, which were as follows: In 1932, an increase of $72,638,000, equivalent to a net import; and in 1933, a decrease of $72,638,000.
[2] Net release of gold from earmark during January at rate of $20.67 a fine ounce, $12,206,000; net release during remaining 11 months at rate of $35 a fine ounce, $70,347,000.

No. 593.—Exportable Goods, Production and Proportion Exported: 1909 to 1941

Note.—Agricultural production is gross income, excluding feed, seed, and waste. Value added by manufacture represents manufactures. Value of mine products in 1909 and 1919 are census figures, in 1929 census data plus petroleum products, while estimates for other years are based on data of the Bureau of Mines. As the figures are not adjusted for price changes, the increase or decrease in absolute values from period to period should be disregarded.

No. 599.—Exports and Imports of Merchandise, Per Capita: 1791 to 1941

NOTE.—Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only, shown in table 595. Import figures for 1791 to 1820 are based on general imports shown in table 595, for 1821 to 1870, total imports less reexports, and for 1871 to date, imports for consumption, shown in table 600.

No. 600.—Imports Entered for Consumption and Duties Thereon: 1821 to 1941

Note.—For basis of dollar values, see general note, p. 536. From 1821 to 1866, inclusive, the figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. The "ratio of duties to total" is based upon the values of imports shown in the table. Figures cover fiscal years ended Sept. 30, 1821 to 1842, and June 30, 1843 to 1915; calendar years thereafter.

No. 603.—Exports of United States Merchandise and Imports—Indexes of Quantity, Unit Value (Price), and Total Value: 1913 to 1940

Note.—The quantity and unit value indexes have been constructed by the so-called "ideal formula," the essential feature of which is the use of the quantities of the several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in the direct calculations for both exports and imports. It was then assumed that the prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by the computed price index, was included in the aggregative totals from which the quantity index for each class was calculated. The index of quantity and unit value of total exports and imports was based on the aggregate of the adjusted totals of the classes. In constructing the indexes the data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. The resulting year-to-year percentages were made into a series by the chain method.

No. 606.—Imports of Merchandise, Free and Dutiable,

NOTE.—**All figures in thousands of dollars.** For basis of dollar values, see general note, p. 536. Figures
Data are "general imports" through 1933; "imports for consumption" beginning 1934. The percentage
of the dutiable general imports are reported as reexported than of the free general imports. Moreover,
1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for
For adjusted figures see table 492 of the 1935 issue of the Statistical Abstract.

AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1940

cover years ended Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. free in general imports is normally slightly lower than in imports for consumption because relatively more in the period 1922–1933, there is an understatement of the free goods in general imports because, for 1922 to export were reported as dutiable when entered, although no duty was ultimately paid on these products.

No. 613.—Exports (Including Reexports) and General Imports of Mer

Note.—In the case of some countries, especially those having no seaports, there is considerable indirect imports from them; for such countries the apparent balance of trade may be far from the true to Europe and reported as exported to Canada. Such grain shipments were especially large in the and North America and included in exports to Europe are given in table 495 of the 1935 Statistical

CHANDISE, BY CONTINENTS, COMMERCIAL REGIONS, AND COUNTRIES: 1921 TO 1940

trade by way of other countries, this being usually larger in the case of our exports to them than of our balance. A marked case of indirect trade is that of grain exported through Canada (mostly via Montreal) period 1920–29 and in 1938. Adjusted figures in which this grain is deducted from exports to Canada Abstract and the Trade Promotion Bulletin Nos. 198 and 215. Figures are for calendar years.

[2] Treated as a customs district of the United States from Jan. 1, 1935, through Dec. 31, 1939. For trade of Virgin Islands with the United States and with foreign countries beginning 1935, see table 625.
[3] Average, 1931–34.
[4] Ireland is included in United Kingdom prior to 1925.
[5] 1925 only.
[6] For statistical purposes, trade with Germany includes (as far as ascertainable) trade with German-occupied areas from the following dates: Austria, May 6, 1938; Sudeten area of Czecho-Slovakia, Nov. 10, 1938; other Czecho-Slovak provinces (Protectorate of Bohemia-Moravia and part of Slovakia), Mar. 18, 1939; Memel territory of Lithuania, Mar. 25, 1939; and Danzig and the German-occupied parts of Poland, Nov. 16, 1939. Similarly, trade with the Czecho-Slovak area occupied by Poland is included with the Polish trade from Dec. 30, 1938, to Nov. 16, 1939, while trade with that area of Czecho-Slovakia occupied by Hungary is included with that country's trade after Dec. 30, 1938, and Mar. 19, 1939, for the respective portions of Ruthenia and part of Slovakia occupied by Hungary on those dates.

No. 615.—Exports (Including Reexports) and Imports of Merchandise, by Groups of Customs Districts: 1860 to 1940

NOTE.—**All figures in thousands of dollars.** For basis of dollar values, except export figures for 1865 and 1870–78, see general note, p. 536. Export figures for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Figures cover fiscal years to and including 1915, calendar years beginning 1916. Import data are "general imports" through 1933; "imports for consumption" thereafter. Exports and imports of the interior districts, a small percentage of the total, are not included in this table.

No. 616.—Exports (Including Reexports) and Imports of Merchandise, by Principal Customs Districts: 1860 to 1940

NOTE.—**All figures in thousands of dollars.** For basis of dollar values, except export figures for 1865 and 1870–78, see general note, p. 536. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively.

No. 618.—Exports of United States Merchandise, by Commodity Groups and Articles: 1931 to 1940

NOTE.—See general note, p. 536. Figures for 1931–35 are annual averages. For a number of items data are not shown separately for all years from 1931 to 1935, and averages for 2, 3, and 4 years are shown. In such cases the detail does not add to the group totals which always cover 5 years. Blanks indicate no data or data not shown separately.

No. 619.—Imports of Merchandise, by Commodity Groups and Articles: 1931 to 1940

NOTE.—See general note, p. 536. Figures represent "general imports" for 1931 and 1932, inclusive, and "imports for consumption" beginning 1933. Figures for 1931–35 are annual averages. For a number of items data are not shown separately for all years from 1931 to 1935, and for this reason many averages for 2, 3, and 4 years are shown in the table. However, averages shown for group totals always cover 5 years. In some cases the detail does not add to the total because of the different periods covered by the averages. Blanks indicate no data or data not shown separately. Relatively small items, "Articles, ordinarily dutiable, imported free for supplies of American vessels or for the United States Government, etc.," are included in the proper commodity classification for 1933 to 1940. For 1931 and 1932, those articles were included in the proper group totals but not shown separately except in group 9.

23. COMMERCE OF NONCONTIGUOUS TERRITORIES

GENERAL NOTE.—All statistics in this section, except as noted, were compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce. The Division of Foreign Trade Statistics which collects, tabulates, and publishes data on United States foreign trade and trade of the noncontiguous territories was transferred on May 1, 1941, to the Bureau of the Census from the Bureau of Foreign and Domestic Commerce. Trade statistics of the United States and noncontiguous areas were published in the Monthly Summary of Foreign Commerce of the United States, December issue. After the September 1941 issue, however, the publication of all foreign trade statistics by countries and by commodities was discontinued for the duration of the war. In the general foreign trade statistics of the United States presented in the preceding section, the Philippines and Virgin Islands, except 1935 through 1939 for the Virgin Islands, are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Puerto Rico, Hawaii, and Alaska, and for 1935–39, Virgin Islands, are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included; each of these territories appears as a separate customs district. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and United States are included in the general tables on foreign trade. See also table 587, p. 537.

The tables in this section present the total foreign trade of each of the United States Territories and possessions and show separately the trade with continental United States (unless otherwise indicated) and with foreign countries, including other United States Territories and possessions. For basis of dollar values, see general note, p. 536.

No. 620.—IMPORTS AND EXPORTS OF ALASKA: 1882 TO 1940

[1] The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

[2] Continental U. S. through 1938; includes outlying areas thereafter.

24. IRRIGATION AND DRAINAGE

[Data in this section relate to Continental Unite States]

No. 629.—Irrigation Enterprises—Summary: 1910 to 1940

Note.—Data are for the 17 Western States and Arkansas and Louisiana. Tables 629 to 638 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of the management of the enterprises. An enterprise is defined as "an independent irrigation establishment and includes the works for supplying water and the land for which water is supplied, except that the cost and value of the land is not included in the capital invested."

Estimated completed cost of existing enterprises, 1000 dollars	437,949	819,778	1,015,108	1,126,546
Average per acre based on irrigable area in enterprises, dollars	[3] 13.58	[3] 22.84	33.17	35.99
Average annual cost per acre irrigated for maintenance and operation of irrigation works, dollars	[4] 1.07	2.43	2.77	2.28

[1] Represents redeterminations and therefore differs from figures shown for earlier years.
[2] Not available.
[3] Relates to total area in enterprises; irrigable areas not reported.
[4] Does not include cost of operation and maintenance for rice growing districts in Gulf States; consequently figure is not comparable with those for later years.

No. 645.—Drainage on Farms and Drainage Enterprises—Summary: 1920, 1930, and 1940

NOTE.—The statistics for drainage on farms in the first part of this table were collected from the individual farmers, while those for drainage enterprises were obtained from a special canvass of organized drainage enterprises. A farm may have artificial drainage without being included in any organized enterprise; conversely, an organized enterprise may include a farm on which there is no artificial drainage, because the enterprise facilitates the removal of water from that farm. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. The enterprises may include timbered and other unimproved land not yet in farms. Data as to drainage on farms were not collected in the census of 1940. The canvass of drainage enterprises did not include the New England States, N. Y., N. J., or Pa.; Del. and Md. were included only in 1940; no enterprises were found in Ala. or W. Va. before 1940, and none in Va. in 1920.

25. FARMS—GENERAL STATISTICS

[Data in this section relate to continental United States except for table 685]

No. 648.—Population, Farms, and Farm Property—Summary: 1850 to 1940

Note.—Figures for 1850 relate to June 1, for 1910 to Apr. 15, for 1920, 1925, and 1935 to Jan. 1, and for 1930 and 1940 to Apr. 1, except that the classification of land according to use refers to the preceding year. Leaders indicate that data are not available.

[1] Estimates

[2] For definition of urban and rural, see headnote, table 7, p. 6.

[3] The 1930, 1935, and 1940 farm population comprises all persons living on farms without regard to occupation; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place. A further difference is due to the fact that the 1920 and 1935 censuses were taken in January, while the 1930 and 1940 censuses were taken in April, when the number of persons on farms is appreciably larger. For farm population by States see table 9, p. 8.

[4] Data collected for 1925 are not strictly comparable with figures for other years.

[5] Includes cropland harvested, crop failure, cropland lying idle or fallow, and plowable pasture.

[6] "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.

[7] Value is of specified farm property, not all farm property.

[8] Figures for land and for buildings are less satisfactory than figure for total real estate value; in other words, value of buildings should not be subtracted from total farm value and difference assumed to represent accurately market value of land alone. Figures for land include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

[9] Figures for 1910 exclude value of young animals when enumerated separately. For description of items for other years, see note 1 on "livestock," table 654, p. 702.

No. 668—Mortgaged Farms—Number and Amount of Mortgage Debt, by Tenure of Operator, by States: 1930 and 1935

NOTE.—Data in the following table are partly estimated and are not comparable with data in tables 663 to 667. A part of the sectional differences in changes in the proportion of farms mortgaged and the trend of mortgage debt from 1930 to 1935 is accounted for by variations among the States in the change in the number, acreage, and value of farms.

[1] All tax data for 1930 are for farms reporting both total taxes and real-estate taxes.
[2] Not available.
[3] Relates only to property owned by the operator.
[4] Differences between these totals and totals for farms regardless of additional land owned do not represent data for operating owners who owned additional land. Some operators did not make a report as to this item. For 1930, operators who did not report as to this item are included with those operators who reported that they owned no additional land.

No. 682.—Fertilizer Consumption, by States: 1934 to 1941

NOTE.—Figures are based on tag sales, records of Government officials, or estimates. Rock phosphate sales in Illinois are not included. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ended June 30. In addition to tonnage for consumption, shown in the table below, fertilizers and fertilizer materials produced in continental United States and exported to island possessions are as follows: To Hawaii, 1937, 57,200 tons; 1938, 35,250 tons; 1939, 49,600 tons; 1940, 63,450 tons. To Puerto Rico, 1937, 128,900 tons; 1938, 90,250 tons; 1939, 100,200 tons; 1940, 153,500 tons. Data for exports in 1941 are not available for publication.

No. 693.—Farm Production—Indexes of Volume, by Major Groups of Products: 1923 to 1941

NOTE.—1935–39=100. Indexes are based on estimates of production for sale and for consumption in the farm home. Products fed to livestock or used for seed are not included. Calendar-year production of livestock and livestock products is compared with crop production of the same year. Commodities included in the index contributed about 93 percent of the gross farm income during 1935–39.

[2] Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, teas, and spices.

27. FARM ANIMALS AND ANIMAL PRODUCTS

[Data in this section relate to continental United States, except for table 706]

No. 702.—Domestic Animals on Farms—Number and Value: 1880 to 1942

Note.—For census years prior to 1910 and for Jan. 1 estimates by the Dept. of Agriculture, animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. The difference in date of enumeration affects the comparability of the census figures for all classes and especially for swine.

No. 703.—Domestic Animals and Chickens on Farms—Number and Value, by Kind, and Farms Reporting: 1930, 1935, and 1940

Note.—Data for 1930 and 1940 are as of Apr. 1, and for 1935 as of Jan. 1. Owing to the difference in the date of enumeration, the figures for 1935 are not closely comparable with those for other years. The total value of all livestock for which data were collected at each census is shown in table 648, p. 694. Available data for certain classes not shown in the table below are as follows: Turkeys over 3 months old, 1935, 5,382,000, valued at $11,668,000; turkeys over 4 months old, 1940, 4,362,000, valued at $7,462,000. Hives of bees (on farms and elsewhere), 1930, 3,108,000, valued at $13,632,000; 1940, 2,277,000, valued at $7,326,000.

No. 717.—Meats and Lard—Production, Foreign Trade, and Consumption, by Kind: 1934 to 1941

NOTE.—**All amounts, except per capita, in millions of pounds.** Pork production represents total hog-carcass weight, less raw fat from carcass which was rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and non-federally inspected wholesale slaughter. Meat obtained from cattle, calves, and sheep purchased for slaughter by Federal Government in 1934 and 1935 in connection with drought-relief activities are not included. Exports and imports of meats comprise the several kinds of meat converted to a dressed-carcass-weight basis. Lard exports represent rendered lard, including neutral lard. Exports include shipments to Alaska, Hawaii, Puerto Rico, and Virgin Islands. Consumption represents production plus imports less exports, with allowance for changes in storage stocks. Figures for recent years are subject to revision.

No. 729.—Wool—Production, Imports, and Exports: 1839 to 1941

NOTE.—All figures in thousands of pounds. Production, except census data, is estimated and is for calendar years; figures for 1909 and later years have been revised because of revised estimates for numbers of sheep, based on 1935 census data. Pulled wool is included beginning 1900 and was probably included for 1870 to 1899, though the exact basis of the estimates for these years is not known. Figures for 1839, 1849, and 1859 include only fleece. Exports and imports for 1839 are for the fiscal year ended Sept. 30; for 1849 and 1859, fiscal years ended June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports for all years include hair of the Angora goat, alpaca, and other like animals.

[4] Owing to changes in tariff laws in 1922 much wool which was formerly brought in as "clothing" now comes in under "combing" classification.
[5] Not available for publication.
[6] Carpet excludes "not finer than 40s" beginning 1930.
[7] Incomplete.
[8] 9-month total; 1939 not available Oct.–Dec., and 1940 not available Jan.–Mar.
[9] Jan.–Nov.; not compiled later.

[1] "Scoured" wool plus "greasy" wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.

[2] Shorn wool reported "greasy" plus pulled wool reported "greasy" raised to a greasy shorn basis, and shorn and pulled wool reported "scoured" raised to a greasy shorn basis, conversion factors varying with class, origin, grade, and whether shorn or pulled.

[3] Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

[1] Includes, in addition to production in the dairy products industries, data for similar products made in establishments classified in other industries.

[2] Not including data for cheese blended or processed, amounting to 244,315,000 pounds for 1937 and 296,284,000 pounds for 1939, valued at $45,727,000 and $48,714,000, respectively. See census report on "Special dairy products." [3] Includes data for a small amount of Neufchatel cheese. [4] No data.

[5] Made for sale as such, unfrozen. [6] Production in the meat-packing industry only.

[7] Production in the meat packing industry only. Total production in all industries, as shown in census report on "Sausages, prepared meats, and other meat products—not made in meat-packing establishments," is as follows: Cooked hams—1937, 213,136,000 pounds valued at $69,488,000; 1939, 220,598,000 pounds valued at $63,297,000. Canned meats—1937, 240,767,000 pounds valued at $48,183,000, and canned meats valued at $3,913,000 (for which no quantity was reported) made in the "Food preparations not elsewhere classified" industry; 1939, 341,425,000 pounds valued at $65,770,000. Canned sausage—1937, 28,073,000 pounds valued at $5,999,000; 1939, 28,897,000 pounds valued at $5,664,000. Sausages and sausage products, other than canned—1937, 1,592,493,000 pounds valued at $285,133,000; 1939, 1,673,570,000 pounds valued at $273,806,000.

[8] Total production, as shown in Census report on "Sausage casings—not made in meat-packing establishments," is valued as follows: 1937, $27,215,000; 1939, $24,758,000.

[9] Wool detached from sheep pelts in meat-packing establishments.

[1] Relative production as indicated by multiplying the production of the crops of each year by the 1927–32 average prices and dividing the aggregate for each year by the average aggregate for the same crops during the 1923–32 (predrought) period.

[2] Corn, oats, barley, grain sorghums, wheat, rye, buckwheat, rice, flaxseed, cotton, tame hay, wild hay, sweet sorghums for forage and hay, dry edible beans, soybeans for beans, peanuts, potatoes, sweetpotatoes, tobacco, sorgo sirup, sugarcane, and sugar beets.

[3] Apples, peaches, pears, grapes, plums, prunes, oranges, grapefruit, lemons, apricots, strawberries, cranberries, and olives.

[4] Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

[5] Asparagus, snap beans, cabbage, cantaloups, carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, watermelons, beets, eggplant, and peppers. Production of farm gardens, home gardens, and most of market gardens excluded.

No. 735.—Acreage Losses—Estimated Acreages of Certain Crops Planted and Not Harvested: 1920 to 1941

NOTE.—**Acreage in thousands.** Figures do not show total crop losses chiefly because of large acreage of hay land which produced only pasturage in some dry seasons and because of incomplete estimates on losses of sorghums, rye, and other crops. Acreage excludes incidental abandonment resulting from hail, local overflow, poor soil, neglect, etc. Small grains harvested as hay, and corn which was salvaged as fodder or silage or by hogging or grazing, are included in harvested acreage.

[1] Acres sown the preceding fall and not harvested, thus including considerable land subsequently planted to other crops.

[2] Acreage omitted for some early spring abandonment.

[3] Acreage losses prior to June 25 excluded from 1920 to 1926 and prior to July 1 thereafter.

[4] Includes more than 10,000,000 acres plowed under.

[5] Preliminary.

[1] Acreage includes land in fruit orchards, vineyards, and planted nut trees (6,086,176 acres in 1929, 6,220,679 acres in 1934, and 5,044,952 acres in 1939) which was not reported in 1919; horticultural specialties (55,180 acres in 1919 and 157,494 acres in 1939); specified annual legumes (6,037,380 acres in 1939) grown alone. (Acreage shown for individual legumes is only that from which nuts, beans, or peas were harvested in 1939.) Values include horticultural specialties ($106,145,000 for 1919, $145,703,000 for 1929, and $129,575,000 for 1939). (Excludes acreage of annual legumes saved for hay (3,067,710 acres in 1929, 9,500,946 acres in 1934, and 7,187,327 acres in 1939.) [2] "Kafir and milo" prior to 1929; sorghum seed included 1919.

[3] Acreage grown alone. Not all harvested for grain or seed as acreage also includes that for hay and that which was grazed. Some grain or seed harvested from acreage grown with other crops. [4] Does not include sorghum for silage. [5] Exclusive of those grown in farm gardens. [6] Values represent farm gardens and vegetables harvested for sale, except for 1934; for that year, value represents farm gardens only. The acreage for all years represents vegetables harvested for sale only.

[7] Prior to 1929, nominally sugarcane either for sugar or sirup or both. Acreage includes sugarcane for seed and other purposes not specified where specific reports were available. [8] For all purposes. [9] Production for sugar or sale to mills was 2,992,000 tons in 1929 and 5,366,000 tons in 1939; production of sirup was 15,169,000 gallons in 1929 and 16,205,000 gallons in 1939. [10] Running bales. [11] Not comparable with earlier years. [12] Including tangerines in 1919 and tangerines, mandarins, etc., in 1929 and 1939. [13] Less than $500.

[1] Figures for 1800 to 1895 represent commercial movement, as given by Dan Talmage's Sons Co.
[2] Figures for the years 1810 to 1865 include linters; excluded in subsequent years.
[3] Louisiana and Texas, 1909 to 1923; Louisiana only, 1924 to 1927; Louisiana and Florida, beginning 1928.
[4] Beginning 1899, ginnings as reported by Bureau of the Census. Figures for some years include small amounts of Baja California, Mexico, cotton ginned in United States. Round bales counted as half bales.
[5] Gross weight. Figures prior to 1899 compiled by Bureau of the Census from data published by Department of Agriculture. See also note 10, table 738, p. 775.
[6] Exports.
[7] Census figures for the previous year.
[8] Figures shown for 1870, 1875, and 1880 represent the estimated average production for 1863–71, 1874–77, and 1880–82, respectively.
[9] Ginnings.
[10] All figures except cotton and sugar production are preliminary.

No. 738.—Principal Crops—Acreage, Production, and Value: 1866 to 1941

Note.—Tons are of 2,000 pounds. For weights of the units of measurement for principal products, see Appendix, p. 1032. The approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; grain sorghums, 56 and 50; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for the periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for the individual years. Acreage, production, and yield of all crops except cranberries have been revised to census data.

[1] Values are based on prices for crop-marketing season or Dec. 1 prices. See notes on "Price."

[2] Received by farmers. Beginning 1908, prices are weighted average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for 1937, 1938, 1939, 1940, and 1941 for corn, 1938, 1939, 1940, and 1941 for wheat, and 1940 and 1941 for rye, include an allowance for unredeemed loans at average loan value.

[1] Values are based on prices for crop-marketing season or Dec. 1 prices. See notes on "Price."

[2] Received by farmers. Prices are weighted average prices for the crop-marketing season as follows: Barley, buckwheat, and flaxseed, beginning 1908; rice, beginning 1924. Prices for prior years are as of Dec. 1. Prices for 1940 and 1941 for barley and 1941 for flaxseed include an allowance for unredeemed loans at average loan value.

[1] Values are based on prices for crop-marketing season or Dec. 1 prices. See notes on "Price."

[4] Received by farmers. Beginning with 1908 for potatoes and cotton, 1910 for sweetpotatoes, and 1909 for cottonseed, prices are weighted average prices for crop-marketing season. Figures for prior years are Dec. 1 prices. For 1933, 1934, 1937, 1938, and 1941, season average prices for cotton crops include unredeemed loan cotton at average loan value.

[5] Average for 8 years. [6] Average for 6 years. [7] Average for 7 years. [8] Average for 4 years.

[9] Includes 7,462,000 bushels in 1928 and 1,689,000 bushels in 1932 not harvested on account of market conditions. Price and value apply only to the harvested portion of the crop.

[10] State production figures, which conform with census annual ginning enumerations, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja California, ginned in California from 1913 to 1924, has been excluded.

[11] Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

[12] Data for 1909 and 1910.

[13] Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract. [14] Season average price to April 1.

[1] Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."

[15] Received by farmers. See also notes on prices for each crop.

[16] Nov. 15 prices, 1919 to 1924; Dec. 1 prices, 1925 and 1926; average prices for the crop-marketing season beginning 1927.

[17] Equivalent solid acreage.

[18] Prices are weighted average prices for the crop-marketing season, prices of beans being for cleaned beans.

[19] Average for 1919 and 1920.

[20] Bags of 100 pounds (uncleaned).

[21] Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production.

[22] Average for 1924 and 1925.

[23] Weighted average prices for the crop-marketing season.

[24] Dec. 1 prices, 1916 to 1931; beginning 1932, weighted average prices for the crop-marketing season.

[25] Includes 802,000 pounds in 1934, 5,436,000 pounds in 1935, 4,365,000 pounds in 1937, 5,625,000 pounds in 1938, 6,390,000 pounds in 1939, 5,066,000 in 1940, and 110,000 in 1941, not available for marketing because of economic conditions and the marketing agreement allotments. Prices and values are computed on the harvested crop.

[1] Values are based on prices for crop-marketing season or Dec. 1 prices. See notes on "Price."

[26] Received by farmers. Prices are as of Dec. 1 except as noted.

[27] Prices are weighted average prices for the crop-marketing season beginning 1919; Dec. 1 prices theretofore.

[28] Not included in tame hay.

[29] Prior to 1939, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on the trees but was destroyed prior to picking. Figures relate to the crop produced from the bloom of the year shown. In California the picking season usually extends from about Oct. 1 to Dec. 31 of the following year. In other States, the season begins about Sept. 1.

[30] Prices are averages for crop-marketing season.

[31] Net content of boxes varies. In California and Arizona, the approximate average is 70 lbs.; in other States, 90 lbs.

[32] Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 33.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. S. averages.

[33] Production includes the following quantities donated to charity, unharvested, and/or eliminated on account of market conditions (1,000 boxes): 1933, 977; 1934, 1,395; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,283. Price and value are computed on the remaining crop.

[34] Based on price reported.

No. 748.—Cotton and Cottonseed—Acreage, Production, and Value, by States: 1911 to 1941

NOTE.—Cotton production excludes linters. Figures for production in some States differ slightly from census figures on ginnings due to ginnings in 1 State of cotton grown in another. Where figures are not shown for the individual States, separate data are not available for the entire period but are included in the United States totals. Yields and prices for the periods are simple averages of figures for individual years. Tons are of 2,000 pounds.

No. 751.—Truck Crops, Commercial—Acreage, Production, and Value, by Kind, 1930 to 1941, and for Leading States, 1941

Note.—Only States with a crop of commercial importance are included. Approximate weights of the units of measurements are as follows: Number of pounds to the crate—asparagus, 24; cantaloupes, 60; cauliflower, 37; celery, 90 (⅔ size crates); strawberries, 36 (24-quart crates). Number of pounds to the bushel—carrots, 50; cucumbers, 48; eggplant, 33; kale, 18; peppers, 25; potatoes, 60. Number of pounds to a box of artichokes, 40. Lettuce is in western crates (mostly 4 to 6 dozen heads), 70 pounds; onions and garlic, 100-pound sacks. Tons are of 2,000 pounds. Values are based on average seasonal farm prices.

[1] Market and canning production estimated in different units which cannot properly be combined.
[2] Includes some quantities not harvested because of market conditions. Value computed on harvested crop.
[3] Mainly for canning, but includes also market crop for New Jersey.
[4] Short-time average.
[5] Pound of oil.
[6] Commercial early Irish.

[1] Season average prices, except citrus fruit prices, which are equivalent packing-house-door returns for all methods of sale. [2] Preliminary.
[3] In some years, production includes some quantities not harvested on account of market conditions or scarcity of harvest labor or donated to charity.
[4] Includes quantities sold and used on farm for household consumption. Figures for fresh include small quantities of canned and dried; figures for canned include small quantities for cold packing.
[5] Prior to 1939, data are for 7 States. See also table 738, p. 777.
[6] Net content of box varies. In California and Arizona, approximate average is 60 pounds net; in Florida and other States, 80 pounds net.
[7] About 76 pounds net.

[1] Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.
[2] Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)
[3] Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.
[4] Not including sirup production. See table 760. [5] Preliminary.

[1] Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.
[2] Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.
[3] For 1909 to 1906, shipments to the United States.
[4] Statistics for 1874 to 1880 represent exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.
[5] Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and panocha, low grades of sugar mostly for domestic consumption.
[6] Less than 500 tons. [7] One year only. [8] Not available.
[9] Louisiana and Texas 1909 to 1923; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

[1] Beginning 1910, stocks on hand are taken into account. Figures for 1910–20 are for cane sugar only; 1922–34 includes stocks of raw cane sugar in all ports and beet sugar held by factories, according to trade sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by beet sugar factories, as reported by the Sugar Division, U. S. Department of Agriculture.

[2] Beet sugar converted to raw at the rate of 1.075 through 1920.

[3] Includes Hawaii, Puerto Rico, and the Philippines; Virgin Islands included beginning July 1, 1917.

[4] No account taken of sugar imported in other forms. Imports from the Philippine Islands excluded beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932; imports for consumption beginning 1933.

[5] Includes shipments to Hawaii and Puerto Rico for all years, to Alaska beginning 1933, and the Virgin Islands beginning Jan. 1, 1935. Excludes direct exports to foreign countries through customs districts of noncontiguous territories.

[6] Sugar used in the manufacture of other commodities for export on which drawback was paid, taken into account beginning 1910.

[7] Not available for publication.

[8] Raw sugar converted to refined by multiplying by the following factors: For years prior to 1922, 0.9369; 1922–30, Cuba and Hawaii, 0.9358; Puerto Rico, 0.9393; Philippine Islands, 0.95; all others, 0.932; beginning 1931, Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.9418.

No. 770.—Cotton—Production, Consumption, Exports, Imports, Prices, and Carry-Over: 1905 to 1942

NOTE.—**All figures, except average net weight and price, in thousands of bales.** Production figures relate to crop of preceding year and are compiled from individual reports of ginners. Beginning 1911, price per pound represents average price received by growers, as computed by Department of Agriculture; for earlier years, it is average price of average grade marketed in New Orleans prior to April 1 of following year. Consumption figures relate to 12 months during which crop of specified year was chiefly marketed, and not to calendar year. Export and import figures (compiled by Bureau of Foreign and Domestic Commerce through April 1941, Bureau of Census thereafter) relate to 12 months beginning Sept. 1 for years prior to 1915, and to 12 months beginning Aug. 1, thereafter. Figures for linters are included in those for consumption prior to 1909, and in export figures prior to 1915. Separate figures for linters prior to those years not available. See 1937 Statistical Abstract, table 659, for figures for years prior to 1905.

No. 780.—Corn, Wheat, and Oats—Commercial Stocks, by Months: 1932–33 to 1941–42

Note.—**All figures in thousands of bushels.** Number of pounds to a bushel: Wheat, 60; corn, 56; oats, 32. Figures represent domestic grain in store in public and private elevators in 39 markets and afloat in vessels or barges in harbors of lake and seaboard ports; they do not include grain in transit, stocks in mills or elevators attached to mills, or private stocks intended for local use. Stocks are as reported on Saturday nearest the first of each month. Official statistics were not compiled prior to January 1927. Bradstreet's visible supply is given for earlier years in the 1935 and previous issues of the Statistical Abstract.

[1] No comparable data or not reported separately. [2] Number of cases of all sizes.
[3] See also figures for product bottled or in bulk, following.
[4] See also "Tomato pulp, in bulk"; figure for 1929 not strictly comparable, as tomato puree was not called for in 1929.
[5] Includes figures for canned soups. [6] Includes figures for an indeterminate amount of "Other fruit juices."
[7] Includes figures for "Other fruit juices" and "Figs."
[8] Not including clam broth, bouillon, juice, and chowder. [9] See note 5.
[10] In addition, chicken broth and soup and other soups valued at $2,239,000 were reported by establishments classified in the "Poultry dressing and packing, wholesale" industry and in the "Meat packing, wholesale" industry. [11] See also product reported above.
[12] Reported only by establishments classified in "Canned and dried fruits, etc." industry.
[13] Includes production on large fruit farms but not on other farms and ranches.
[14] 48 ½-pound cans. [15] 48 1-pound cans. [16] 100 ¼-pound cans.
[17] 48 5-ounce cans for dry pack; 48 5¾-ounce cans for wet pack.
[18] 48 No. 1 cans (containing 5 ounces drained weight). [19] 48 No. 1 cans (net weight per can 10 ounces).
[20] 48 1-pound cans (net weight per can 13 ounces).
[21] No data included for corn sirup made and consumed in same plants nor for mixtures made from purchased materials by plants classified in certain other industries, particularly "Food preparations, n. e. c."
[22] Part sold within the industry for use as a material in the manufacture of other products.
[23] Of 2,000 pounds. [24] Values include duplication in amount of value of molasses desugarized.
[25] Includes value of small quantity of pressed pulp.
[26] See also Census report "Cane sugar—except refineries" for production in that industry.
[27] Not including that used in manufacture of chocolate products reported above.

No. 793.—Forest Fires—Number, Area, and Damage: 1931 to 1941

NOTE.—Data were compiled from reports by National Forest Supervisors and from those of cooperating States, various Government bureaus, and similar sources. Data for unprotected areas are necessarily incomplete, as reliable data were not obtainable prior to organized protection. Figures for fires on Indian reservations were excluded in 1931.

[1] Includes both saw timber and cordwood trees. The cubic foot volumes include the tops and limbs, but not the bark. Detailed data for cordwood trees are omitted from this table.

[2] Includes only timber of saw timber size. Lumber items include allowances for logging waste which might have been utilized.

[3] Lumber tally measure.

[4] This item increased to account for the probable cut of mills failing to report to the census.

[5] A square is considered equivalent to 800 pieces.

[1] Figures for turpentine and rosin from crude gum, 1929–30 to 1941–42, and from wood, for 1933–34 to 1941–42, relate to crop year ended Mar. 31. All other figures relate to calendar years.
[2] Figures compiled from data reported by establishments in Turpentine and Rosin industry.
[3] Figures compiled from data reported by establishments in Wood-Distillation industry.
[4] Not reported.
[5] Includes, for 1909 and 1914, 18,310 gallons and 92,401 gallons, respectively, of turpentine and, for 1914, 4,495 barrels of rosin, reported by establishments engaged in manufacture of lumber and timber products.
[6] Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932–33, 33,400 barrels; 1933–34, 35,060; 1934–35, 34,000.
[7] Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.
[8] Includes data for rosin produced from reclaimed gum: For 1935–36, 54,187 barrels; 1936–37, 42,694; 1937–38, 26,271; 1938–39, 39,979; 1939–40, 39,268; 1940–41, 25,226, 1941–42, 24,706.
[9] Figures do not include data for rosin produced from reclaimed gum. See notes 6 and 8.

No. 819.—Mineral Industries—Summary for the United States: 1919, 1929, and 1939

Note.—Statistics cover producing operations only. In general, those for 1939 cover only those operations (or concerns producing crude petroleum, natural gas, and natural gasoline, and rendering oil- and gas-field services) for which total value of all products, reported principal expenses, cost of buildings, machinery, and equipment during the year, or cost of drilling and equipping wells during the year amounted to $2,500 or more. For bituminous coal and lignite an output criterion of 1,000 tons of coal was substituted for value of all products. Statistics for the common sand and gravel industry exclude data for operations that produced less than 15,000 tons of sand and gravel unless reported principal expenses or cost of buildings, machinery, and equipment during the year amounted to $15,000 or more. Statistics for 1929 cover, in general, only those "enterprises" for which total value of all products or cost of development work amounted to $2,500 or more. Bituminous coal and lignite mines that produced less than 1,000 tons of coal and common sand and gravel operations that produced less than 25,000 tons of sand and gravel, were excluded. Statistics for 1919 exclude data for "enterprises" for which value of all products was less than $500 or cost of development work was less than $5,000. Noncommercial production of stone and sand and gravel obtained from mines or quarries operated by governmental agencies, public utilities, or by construction companies or contractors producing wholly for their own use or on contract for governmental agencies is excluded for all years.

[1] Excludes statistics for the common clay and shale, crude petroleum and natural gas, greensand, natural gasoline, peat, potash, and rock salt industries, for comparability with 1929.

[2] Excludes the common clay and shale, greensand, natural sodium compounds, peat, potash, rock salt, and sand and gravel industries, for comparability with 1919.

[3] Includes value of crude minerals produced, value added during the year by preparation processes, receipts for services performed for other concerns, and value of electric energy generated and sold.

[4] Represents statistics for skilled and unskilled employees who perform manual labor, use tools, operate machines, handle materials, and care for property. The average numbers of wage earners were derived by adding the numbers reported for each month and dividing the sums by 12.

[5] Represents statistics for salaried employees at operations and at central and branch offices, including officers of corporations, managers, superintendents, and other supervisory personnel, responsible professional and technical employees, and clerical employees. The number of salaried employees represents the number receiving pay on a representative or normal day or pay-roll period—for 1939, during the normal pay-roll period ending nearest Oct. 14; for 1929, on Dec. 14 or on the nearest representative day; for 1919, on Dec. 15 or on the nearest representative day. Salaries represent the total amount paid to salaried employees during the calendar year.

[6] Represents statistics for proprietors and firm members at operations and at central and branch offices.

[7] Census statistics not available.

[8] For 1939, represents permanent additions and major alterations (including installation costs); minor additions and replacements and the cost of land are excluded. For 1929, installation costs are excluded.

[9] Statistics for 1939 and 1929 refer to equipment in use or available for use at the end of the year.

[10] Includes equipment, with rating of 8,865 horsepower, operated by purchased power other than electric energy.

[1] Companies with operations in more than 1 industry are counted only once in the totals.
[2] See note 3, table 819. [3] See note 4, table 819. [4] See note 5, table 819. [5] See note 6, table 819.
[6] See note 8, table 819. [7] See note 9, table 819. [8] Not shown because of dissimilar products.
[9] Includes amounts received by or due contractors for services performed during the year.
[10] Includes statistics for 334 salaried employees paid $1,091,000 at central offices that served more than 1 mineral industry.
[11] Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part the expenditures for "Contract work" reported by producing operations.
[12] Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to $150,000. These expenditures are not included in totals shown.
[13] Crude petroleum, 1,228,133,816 barrels (42 gallons); natural gas, 2,929,184,828 M cu. ft., of which 2,287,413,256 M cu. ft. were marketed.
[14] Thousands of gallons. [15] Includes data for 58 strip-pit and culm-bank contractors.
[16] Excludes, to avoid duplication, $10,618,000 paid strip-pit and culm-bank contractors by colliery companies. [17] Tons of 2,240 pounds.

[8] Not shown because of dissimilar products.
[11] Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part the expenditures for "Contract work" reported by producing operations.
[12] Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to $150,000. These expenditures are not included in totals shown.
[17] Tons of 2,240 pounds.

[24] Contractors engaged chiefly in development work for other concerns in the mineral industries; Pennsylvania anthracite strip-pit and culm-bank contractors are excluded. Statistics for contractors performing oil- and gas-field services exclude data for oil- and gas-field work performed on contract by concerns that also operated oil and gas wells for their own account unless separate reports were obtained for each of these two types of activities. Statistics are also excluded for concerns rendering oil- and gas-field services or producing crude petroleum, natural gas, or natural gasoline whose reports covering these activities indicated that neither the value of products and services rendered, nor reported principal expenses, nor cost of buildings, machinery, and equipment, nor cost of drilling and equipping wells amounted to as much as $2,500 during 1939. Statistics for contractors performing general services for mineral industries exclude data for contractors that received or were due less than $2,500 for work done during 1939.

[25] Represents amounts received or due for services performed during the year.

[26] Statistics cover, in general, only those operations that had reported principal expenses or cost of buildings, machinery, and equipment during the year of at least $2,500; for common sand and gravel the corresponding minimum was $15,000. Statistics include data for oil- and gas-field operations in States in which the reporting concerns had no products, provided the concerns were large enough to come within the scope of the census as defined in headnote of table 819.

No. 822.—Mineral Products of the United States—Quantities and Values: 1920 to 1941

NOTE.—Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mined, and some of the figures for 1941 are preliminary. Total values of metallic and nonmetallic products include figures which the Bureau of Mines is not at liberty to publish and estimated figures for certain products for which data are not available. In some cases, neither quantity nor value can be shown and those products are not listed here but data for them are included in totals. On the other hand, values for certain products, such as coke, are excluded from the totals to eliminate duplication, since the values of the products derived therefrom, or of raw materials used, are accounted for under other items. Short tons are 2,000 pounds; long tons, 2,240 pounds.

[1] Figures not available or Bureau of Mines not at liberty to publish them; value included in total value of metallic or nonmetallic products.
[2] From both domestic and foreign ores. Beginning 1935, data represent antimonial lead produced at primary refineries from both primary and secondary sources, and are not comparable with data for prior years; estimate of value of primary antimony and lead content of antimonial lead from domestic sources included in total value of metallic products.
[3] For 1920, largely content of antimonial lead; 1925 and 1930, content of antimonial lead. Value of the antimony in antimonial lead excluded from total value.
[4] Largely from foreign ore beginning 1935. Value not included in total value. Bureau of Mines not at liberty to publish value figures or quantity figures for 1940 and 1941.
[5] Value not included in total value; see headnote.
[6] Product from domestic ores only.
[7] According to Bureau of the Mint; valued at $20.67+ per ounce through 1930, at $35 per ounce in 1935 and subsequent years.
[8] Figures not available. Value of products derived therefrom, or of raw materials used, is included elsewhere.
[9] Value calculated at nominal price, 27 cents per pound.
[10] According to Bureau of the Mint.
[11] Less than $500.
[12] Figures obtained through cooperation with Bureau of the Census. For 1940, total is estimate based on figures issued by Bureau of the Census as somewhat incomplete. Data for 1941 not yet available; estimate included in total value of nonmetallic products. Beginning 1937, value of clay products excludes values of pottery and refractories.
[13] Includes brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania.
[14] Quantities as reported by Department of the Interior, National Bituminous Coal Division; values include selling expenses.
[15] No canvass. Estimate of value included in total value of nonmetallic products.
[16] Gypsum mined: After 1936, value of crude at mine; for earlier years, value as sold (crude and calcined).
[17] Figures cover fiscal year ended June 30 of year stated.
[18] Includes mica recovered by grinding mica schist; excluded in prior years shown.
[19] Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.
[20] Includes soapstone used as dimension stone.
[21] From copper and zinc smelters and zinc roasters and from roasting of high-sulfide gold and silver concentrates.
[22] Includes 23,728 tons of stronger acid, not converted to 60° Baumé.
[23] For 1925 and 1930, figures exclude soapstone. For 1935 and thereafter, figures cover talc, pyrophyllite, and ground soapstone. Dimension soapstone is included in stone. Value of soapstone in 1925 and 1930 is included in value of nonmetallic products; Bureau of Mines not at liberty to publish figures.

No. 823.—Mineral Production, by States and for Alaska: 1934 to 1940

Note.—The sum of the State totals in the table below does not agree with the total for the United States given in tables 817 and 822 chiefly because of the following reasons: (1) Figures for certain of the products included in the United States total are not available by States of origin; (2) the use of iron ore values in State totals and pig iron values in United States total; (3) the use of mine figures for gold, silver, copper, lead, and zinc in the State totals and mint and smelter figures in the United States total; and (4) the inclusion of estimates in the United States total for a few products for which no canvass has been conducted for many years and for which no estimate by States is made.

No. 829.—Steel, Wire and Wire Products, Tin Plate and Terneplate, and Cast-Iron Pipe and Fittings—Production: 1929, 1937, and 1939

Note.—The overlapping of the industries shown in this table results in considerable duplication in tonnages shown. The products chiefly used further in manufacture are wire rods, plates and sheets, black plates for tinning, and skelp. The figures under "Wire," "Tin and terneplate," and "Cast-iron pipe and fittings" include data for products of these departments of steel works and rolling mills and of all other industries producing these commodities.

[1] Figures include production of steel castings in "Steel castings" industry and a small amount produced in other industries, and for this reason exceed sum of items shown below. [2] Of 2,240 pounds.

[3] Made in departments of steel works and rolling mills. Total production of steel castings, as shown in census report "Steel castings," was as follows: 1929, 1,455,000 tons; 1937, 1,249,000 tons; 1939, 734,000 tons.

[4] Figures for 1937 and 1939 include minor duplications in the items carrying note 6, because certain products were transferred or sold to other plants within the industry and therefore are included under 2 items.

[5] Not including rails rerolled by makers of ingots from new seconds. Figure for 1939 combined with figure for rails to avoid disclosing data of a company or corporation. [6] See note 4.

[7] No data or not called for on schedule. [8] Includes data for small amounts of stainless steel rods.

[9] Included in "Merchant bars, etc., steel."

[10] Not reported separately; included in figures for other types of plates and sheets.

[11] All iron and steel wire, including that subsequently galvanized, otherwise coated, and cold rolled.

[12] Of 2,000 pounds. [13] Includes contract and custom work.

[14] Aluminum, nickel, and alloys. [15] See note 18.

[16] For cut production, see census report "Principal manufactures from rolling-mill products."

[17] Of 100 pounds.

[18] Represents the following values for which quantities were not reported: Other wire cloth, 1929, $1,559,000. Motor-vehicle skid chains, 1929, $2,504,000; 1937, $785,000; 1939, $181,000. Other nonferrous wire, 1937, $214,000; 1939, $526,000. Concrete reinforcement wire, 1937, $161,000; 1939, $74,000. Wire cloth of copper and bronze, 1937, $224,000; 1939, $289,000. Wire cloth of other metals, 1937, $275,000; 1939, $255,000. Staples, 1939, $123,000.

No. 832.—Iron and Steel—Aggregate Exports: 1890 to 1940

NOTE.—This table covers products listed in table 833 and therefore does not include data for highly elaborated products of iron and steel. Value figures for 1921 and prior years exclude, and those for 1922 and subsequent years include, data for small items for which quantity figures are not available. Data for ferromanganese are included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, have been excluded for 1922 and subsequent years.

No. 837.—Copper—Production, Exports, Imports, and Consumption: 1910 to 1941

Note.—All quantities except ore produced in millions and tenths of millions of pounds. Production figures include continental United States and Alaska. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks.

[1] Tons of 2,000 pounds. Old tailings are included beginning with 1930. [2] Not available.
[3] For immediate consumption plus copper entering under bond.
[4] Ore from the Philippine Islands included under concentrates.
[5] Figures cover January to September inclusive; figures for last quarter not available for publication.
[6] Imports of refined copper in ingots, bars, or other forms included in imports of unrefined.
[7] Some copper from Michigan was electrolytically refined and is included with electrolytic.
[8] Includes pig. [9] Includes 3,200 tons in chemicals in 1939, 9,431 in 1940, and 9,804 in 1941.
[10] Includes small exports of unrefined black blister and converter copper (bars, pigs, etc.).

No. 839.—Copper—Smelter and Refinery Output: 1850 to 1941

Note.—Smelter output as here given represents the production of unrefined copper from domestic (including Alaskan) ores. Some copper ore is imported and smelted in this country, but this appears only in the figures of refined copper from imported material in table 837.

No. 840.—Copper—Exports and Imports: 1891 to 1940

Note.—Exports are those classed as "domestic" in the foreign trade statistics but include copper smelted or refined in the United States from imported ore or unrefined metal. Values include all forms of copper. Quantities represent all copper except the small item, "Other manufactures." Copper content of exports of ore for years 1891–1915 and of imports for years 1894–1903 was estimated.

[1] Not available for publication. [2] Data under supply are as of Jan. 1; under deductions, as of Dec. 31.
[3] Stocks of pigs, bars, etc., in bonded warehouse not separately reported after April 1930; included with base bullion. For purpose of calculating apparent deliveries in 1930 and subsequent years, stocks in warehouse are estimated to have remained unchanged from beginning of the year.
[4] Includes some old, reclaimed, and scrap lead. [5] Figures cover Jan. to Sept. inclusive.
[6] Includes small quantities of foreign lead reexported for all years shown except 1939 and 1941.

No. 844.—Nonferrous Metals and Alloys, and Finished Products Thereof—Production, by Kind: 1935, 1937, and 1939

NOTE.—Table shows products made for sale and interplant transfer, excluding those made for consumption in same works. Data represent production of commodities specified, whether made as primary or as secondary products by industries reporting them. The census designations of industries in which these commodities are made are as follows: "Alloying; and rolling and drawing of nonferrous metals, except aluminum;" "Secondary smelting and refining of nonferrous metals, not elsewhere classified;" "Nonferrous metal foundries (except aluminum);" and "Nonferrous metal products not elsewhere classified." No data are included for production of copper, lead, zinc, and other nonferrous metals from the ore nor of secondary metals by establishments engaged in primary smelting and refining of nonferrous metals.

No. 847.—Gold and Silver—Production in Continental United States, Alaska, Puerto Rico, and Philippine Islands: 1792 to 1941

Note.—The value of gold, in terms of money, being at a fixed rate, is not shown in the table. Gold is valued at $20.67+ per fine troy ounce from 1837 through 1933. In 1933, however, varying higher prices prevailed subsequent to the Executive order of Aug. 29. The value of gold production for 1933, as computed by the Bureau of Mines, was $65,338,000, including $52,842,000 calculated at legal coinage value ($20.67+ per ounce) plus $12,485,000 premium calculated at average weighted price ($25.56 per ounce). On Jan. 31, 1934, the legal value of gold was fixed at $35 per fine ounce. The value of silver given is commercial value, except for 1921 to June 1923 and beginning 1934 (see footnotes 1 and 2), which has differed materially from coinage value.

No. 849.—Silver—Prices, London and New York, and Value in the Dollar: 1835 to 1941

Note.—The London price is converted to the basis of the ounce 1,000 fine and converted to American money at par of exchange through 1930; thereafter, at the current rate of exchange. London quotations are in depreciated currency after Sept. 21, 1931, also in some prior year periods, including 1918 to 1924. New York quotations are in depreciated currency after early March 1933. The commercial ratio is computed on the basis of London quotations through 1914; thereafter, on the basis of the New York average price. Beginning with 1934 the monetary value of gold is $35.00 per fine ounce as compared with $20.67 in previous years. The value of fine silver (371¼ grains) in the dollar is computed on the basis of London quotations through 1917; thereafter, on the basis of the New York average price.

No. 852.—Coal—Production, 1821 to 1941, and by States, 1916 to 1941

Note.—**Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars.** Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only; those for bituminous relate to continental United States and Alaska. Bituminous coal includes lignite and small amounts of anthracite outside Pennsylvania. Comparatively little coal is held in stock at the mines.

[1] Exclusive of product of mines producing less than 1,000 tons. [2] Estimated from various sources; includes selling expenses, except for 1939, when such expenses were excluded except in a few cases.
[3] Preliminary. [4] Includes Oklahoma. [5] Includes Missouri.
[6] Included with Kansas. [7] Includes South Dakota. [8] Included with Arkansas.

[1] Figures for bituminous coal represent average value per ton less selling expense (Bur. of Mines series) prior to 1937; thereafter, average gross realization including selling expense (Bit. Coal Div. series).
[1a] Based on total production as shown in table 852.
[2] Calculated at 303.5 working days in the anthracite field and 308 working days in the bituminous field.
[3] Of 2,000 pounds. [4] Not available. [5] 1891. [6] 1896. [7] Figures for disposition do not include 202,000 tons, representing net changes in stocks at mines, Jan. 1, 1939, to Jan. 1, 1940

[1] Not available. [2] All steam roads.
[3] In 1940, total railway consumption was 91,047,281 net tons; data are not yet available for 1941.
[4] Includes electric central stations and street railways through 1919. Figures include a small amount of anthracite consumed.
[5] Obtained by subtracting known items from total consumption. Includes general manufacturing, domestic, and miscellaneous uses.

No. 860.—Manufactured-Gas Industry—Fuel Consumed, by Kind and by Use: 1934 to 1941

Note.—**Coal and coke in thousands of tons of 2,000 pounds; oil in thousands of gallons.** Companies formerly distributing manufactured gas but which were distributing natural gas at the beginning of 1941 have been excluded from the figures for all years. The figures do not include fuels used in production of coke oven gas which is purchased by gas companies from coke and steel companies for public distribution.

[3] Oil used. For 1941, for carburetting water gas, 605,209,000 gallons; for making oil gas, 61,469,000 gallons; for boiler fuel, 25,760,000 gallons.

No. 861.—Manufactured-Gas and Natural-Gas Industries—Summary: 1934 to 1941

Note.—**Population served and number of customers in thousands, gas produced, purchased, and sold in millions of cubic feet; revenue in thousands of dollars.** Companies formerly distributing manufactured gas but which were distributing natural gas at the beginning of 1941 have been excluded from the figures for manufactured gas and included with those for natural gas for all years shown in this table. Companies selling mixed manufactured and natural gas are included with data for manufactured gas. Figures for natural gas do not include natural gas used in field operations or in the manufacture of carbon black, or gas used by distributing companies in the conduct of their gas operations.

[1] Equivalent to standard brick size.
[2] Not available.
[3] Of 2,000 pounds.
[4] Includes data for quarry tile.
[5] 9-inch equivalent.
[6] High-alumina brick, plastic fire brick, and ladle brick.
[7] Because of incomplete coverage for 1940, comparable statistics for 1939 are presented. These differ in most instances from those shown in upper portion of table.

32. MANUFACTURES

[Statistics in this section relate to continental United States except as noted. For additional statistics on manufactured food products, mineral products, and forest products, see sections 27, 28, 29, 30, and 31]

GENERAL NOTE.—The Census of Manufactures was taken decennially prior to 1899 and for each fifth year thereafter through 1919, and has been taken every second year from 1921 to 1939. However, the Census of Manufactures for 1941 has been abandoned as directed by Executive Order No. 9152, in the interests of more important work related to the Nation's war effort. The censuses for 1904, 1909, 1914, and 1919 covered all factories or plants whose products were valued at $500 or more, but, beginning with 1921, the minimum limit has been $5,000. As a rule, the term "establishment" signifies a single plant or factory, but in some cases an establishment operates two or more factories and in a few cases two or more departments of a single plant or factory are treated as separate establishments. At the censuses for 1937 and 1939, however, an establishment operating two or more factories was counted as two or more establishments. The total number of establishments was increased approximately 2,000 by this change.

"Value of products" represents selling value at the plant or factory. Because of the use of the products of some establishments as materials for others, the total cost of materials and the total value of products for all industries in a given group, and for all groups in the aggregate, include much duplication, estimated at roughly one-third of the gross value of products. Such duplication is not, however, found to any great extent within individual industries.

The 1939 Census of Manufactures questionnaire, for the first time, called for personnel employed in distribution, construction, etc., separately from the manufacturing employees of the plants, and therefore the data for earlier years probably are not strictly comparable with those for 1939. It is not known how many of the wage earners and the salaried employees reported at previous censuses were engaged in distribution and construction and how many were engaged in manufacturing.

It is sometimes necessary, for various reasons but chiefly because of changes in census classification, to make adjustments in the figures for earlier census years. Adjustments have been made in the figures beginning with 1899 as a result of the exclusion from the Census of Manufactures since 1929 of the industries "Coffee and spice, roasting and grinding," "Flax and hemp, dressed," "Gas, illuminating and heating," "Grindstones," "Motion pictures, not including projection in theaters," "Peanuts, walnuts, and other nuts, processed or shelled," and "Railroad repair shops" (both steam and electric).

Detailed quantity and value figures for products of selected manufacturing industries are presented in certain of the census tables in this section and in sections 27, 28, 29, and 31. The "total value" figures for the respective industries, as given in those tables, differ from the values of products of the corresponding industries, as given in table 893, because of the inclusion in the product-value totals in those tables, but not in the values of products for the corresponding industries in table 893, of data for the respective classes of commodities made as minor or secondary products by establishments engaged primarily in other lines of manufacture.

[1] Value of products less cost of materials, containers, fuel, and purchased electric energy.
[2] For all establishments having products valued at $500 or more.
[3] Reduced to gold basis.
[4] For all establishments having products valued at $5,000 or more.
[5] Includes cost of contract work.
[6] Calculated by subtracting sum of cost of materials, containers, fuel, purchased electric energy, and cost of contract work from value of products. Not strictly comparable with years prior to 1935.

[1] Because of the change from $500 to $5,000 in the minimum-value-of-products limit, the "Number of establishments reporting power equipment" figures for 1919 and earlier years are not comparable with those for 1929 and 1939. This change did not, however, materially impair the comparableness of the figures for the other items in this table.
[2] Returns for "Logging camps and logging contractors (not operating mills)," numbering 967, were excluded from power tabulations.
[3] Includes 47,192 horsepower reported as other owned power, not distributed by type of prime mover.
[4] Includes 28,213 horsepower reported as other owned power, not distributed by type of prime mover.
[5] Figures for "Steam engines" include data for "Steam turbines," not reported separately.
[6] Figures for "Other internal-combustion engines" include data for "Diesel and semi-Diesel engines," not reported separately.
[7] Includes data for water motors.

No. 893.—Manufactures—Summary for Industry Groups, 1929 to 1939, and for Subgroups and Industries, 1937 and 1939

Note.—The figures given in this table do not represent exactly the numbers of wage earners, values of products, etc., assignable to the classes of commodities from which the industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to its product of chief value, although in many cases a single establishment manufactures two or more classes of commodities. See also general note, p. 885.

No. 896.—Textile Manufactures—Production, by Kind: 1937 and 1939

Note.—In general, most of the articles are finished products, but large quantities of partly finished products, especially yarn, made for sale to other establishments of the same or other branches of the textile industry, are included. This involves considerable duplication in total value of products.

[1] In the gray, except for blankets.
[3] Print-cloth yarn fabrics include data for heavy-warp sateens, 40 inches and narrower which in 1939 are included in narrow sheetings, etc.
[3] See "Woolen and Worsted Manufactures," p. 923.
[4] Data for 1937 to some extent incomplete and not strictly comparable with 1939.
[5] In addition, 3,079,000 pounds were produced in the "Rubber products not elsewhere classified" industry. Not called for separately for 1937.
[6] No comparable data. [7] See "Cotton Manufactures," p. 922. [8] Excludes data for crib blankets.
[9] Excludes a small quantity of tops made for sale, value included in "Other products."
[10] Includes data on dyed and finished woolen and worsted fabrics, yarns, and raw stock for which there is no comparable data for 1937.
[11] Represents total value instead of total net sales as in 1939. Figures not available by classes.
[12] Total net sales. Figures by classes represent gross sales and include a total of $12,615,000 allowances and discounts charged to sales.
[13] Includes "Other cordage" valued at $771,000, for which no quantity was reported.
[14] Includes a small amount of flax and hemp yarns and roves.

[1] Figures beginning with 1927 are not strictly comparable with earlier years owing to the fact that large quantities of heavy footwear now included with men's shoes were included with "Athletic" prior to 1927.
[2] Figures exclude footwear with fabric uppers and rubber soles; data for this class, for certain census years, are shown in table 903, p. 932.
[3] Figures include satin, canvas, etc.
[4] Includes slippers and moccasins (all leather and part leather, felt, etc.) for house wear.
[5] Not reported separately; included with "all other."
[6] Not reported separately; included with the various classes of boots and shoes.
[7] Includes 15,285,000 pairs of Government shoes (not shown separately in this table), of which 3,409,000 pairs are of dress-type and 11,876,000 pairs are of work-type. The latter includes 112,000 pairs of Government shoes such as nurses', athletic, etc.

No. 900.—Chemicals—Production, by Kind: 1937 and 1939

Note.—Data shown in this table represent products made for sale and for interplant transfer. In addition, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishments. There is considerable duplication in the total value of products due to the use of products sold by one establishment as materials for other establishments making chemicals. Tons are of 2,000 pounds, except as noted.

[1] Value includes data for items not shown separately.
[3] In addition 2,959,000 gallons of refined natural methanol, valued at $797,000 were produced for sale in the "Hardwood distillation and charcoal manufacture" industry.
[3] The production of ethyl alcohol as reported to the Bureau of Internal Revenue, Treasury Department, was 215,438,000 proof gallons in 1937 and 217,485,000 proof gallons in 1939.
[4] Includes production from ammonia liquor. The primary production of ammonia was 493,000 tons (NH_3); this figure represents production by synthetic processes as reported in the Biennial Census of Manufactures and the production from byproduct coke ovens as reported to the Bureau of Mines, Department of Interior, and published by them.
[5] Figures for 1937 but not for 1939 include data for ammonia produced in the manufacture of gas. For production in the "Coke-oven" industry, see Bureau of Mines report, Minerals Yearbook.
[6] Does not include calcium chloride from establishments engaged primarily in the production of salt. Such production for 1937 amounted to 7,000 tons, and for 1939, 3,000 tons.
[7] Not including chlorine produced in establishments classified in the pulp and paper industries; these establishments reported a production of 24,000 tons in 1939.
[8] Included in value of "Other chemicals." [9] Data not available.
[10] Does not include the production of chromates which are considered chrome dry colors.
[11] Not including byproduct crudes made in coke plants and gas works.
[13] Does not include data for color lakes, figures for which are given in the "Colors and pigments" industry. See also Tariff Commission Report No. 140, Second Series, entitled, "Synthetic Organic Chemicals, United States Production and Sales, 1939."
[18] Tons are of 2,240 pounds. [14] Value for carbon fluorides included for 1937 but not for 1939.
[15] Does not include sodium hydroxide produced in the pulp and paper industries.
[16] Value of sodium nitrate included in value of "Other chemicals" to avoid disclosing data reported by individual establishments.
[17] Does not include figures for abrasive or refractory aluminum oxide which is included in the "Abrasive wheels, stones, paper, cloth, and related products" industry, or of titanium dioxide or zinc oxide which are included in the "Colors and pigments" industry.
[18] Includes data for an indeterminable amount of materials used as fillers, such as wood flour, etc. See last sentence of note 12.
[19] Does not include barium sulfate (blanc fixé) which is included in the "Colors and pigments" industry, and sodium hyposulfite (thiosulfate), which is reported above. Value of satin white included for 1937 but not for 1939. [20] Includes data for sodium sulfate made from brine.
[21] Includes data for "Glauber's salt" refined from the natural product.
[22] Includes data for natural salt cake made from brine.
[23] Includes sulfur which has been ground or further processed.

[1] Includes data for carbon dioxide piped to plants for making "dry ice." Quantities thus piped in 1937 (estimated) and 1939 were 17,000,000 pounds and 15,000,000 pounds, respectively. [2] No data.
[3] Does not include production in the "Meat packing, wholesale" industry.
[4] Because of the different breakdown of yarn by sizes obtained in 1937 and 1939, the 1929 figures are not exactly comparable. The grouping of yarns by sizes in 1929 was as follows: Finer than 125 denier, 125 to 150 denier, and heavier than 150 denier.
[5] Includes shaving cream with soap base. Shaving cream containing no soap is classified as a product of the "Perfumes, cosmetics, and other toilet preparations" industry, above.
[6] Basis 80 percent. The total production of crude glycerin as reported to the Division of Cotton and Oils, Bureau of the Census, for 1939 was 184,476,000 pounds. Most of this was further refined and sold or used as glycerin, dynamite grade, or glycerin, chemically pure.
[7] Pounds for 1937 and 1939, basis 25 percent tannin; for 1929 not reported according to strength.
[8] No solid sumac extract reported. [9] Includes $1,286,000 for which no pounds were reported.
[10] Includes value of rosin sizes. [11] Not including "drug grinding."
[12] United States Pharmacopoeia and National Formulary. [13] Not including "foundry supplies."
[14] Shaving cream with soap base is classified as a product of the "Soap and glycerin" industry. The total production of shaving cream, with and without soap, in 1937 and 1939, was valued at $9,629,000 and $10,344,000, respectively.
[15] Includes data for considerable amount of hand lotions.

[1] The inclusion of "Books and pamphlets printed for publication by others," "Maps, atlases and globe covers made for others," "Greeting cards printed for others," "Newspapers and periodicals printed for publication by others," etc. results in duplication in the aggregate value and receipts, as follows: 1937, $158,466,000; 1939, $201,627,000. (No separate data available for greeting cards for 1937.) These amounts represent receipts by commercial printers for work done by them for other printers or for publishers, and consequently enter twice into the aggregate value and receipts.

[2] Includes "Pamphlets printed for publication by others."

[3] No data.

[4] Included with "Other commercial printing."

[5] Included with "Greeting cards."

[6] In addition, labels, tags, and seals were produced by methods other than letterpress, as follows: 1937, $25,693,000; 1939, $29,944,000. 1929 figures are not available.

No. 905.—Machinery—Value of the Principal Classes Manufactured

Note.—**In thousands of dollars.** The various classes of machinery listed are products of a number of industries, such as "Industrial machinery, not elsewhere classified," "Motor vehicles, motor-vehicle bodies, parts and accessories," "Agricultural machinery (except tractors)," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this Abstract, such as tables 906 to 909, 911, and 912.

CLASS	1929	1933	1935	1937	1939
Agricultural machinery	167,673	17,109	68,916	114,340	96,207
Aircraft (begun and completed within year)	52,157	15,860	17,454	38,664	75,873
Bakers' machinery and equipment	21,730	7,332	11,869	18,120	17,583
Blowers and fans	25,243	6,955	15,830	26,282	[1] 24,561
Bottlers' machinery, except for dairies	11,082	9,157	8,264	21,135	11,959
Canning machinery	8,535	3,139	8,271	11,840	4,103
Cash registers, adding, calculating, and card-tabulating machines, and typewriters	151,583	46,577	[2] 83,217	118,552	95,712
Cement and concrete machinery (not including cement-making, etc.)	4,132	224	1,809	4,053	1,739

Textile machinery and parts	115,525	57,892	64,899	[1] 100,696	85,601
Tobacco-manufacturers' machinery	5,018	1,106	1,693	3,679	3,337
Vacuum cleaners (electric)	35,108	14,411	24,191	36,029	44,160
Washing machines, clothes wringers, driers, and ironing machines for domestic use	79,011	42,422	59,513	73,291	[10] 66,282
Well-drilling machinery (excluding oil-well)	[5]	[5]	[5]	3,334	1,519
Windmills	4,063	1,400	1,833	2,613	1,929
Woodworking machinery	35,151	6,100	12,542	23,118	23,413

[1] Not strictly comparable with figures for earlier years.
[2] Includes postal meters.
[3] Excludes dry-cleaning machinery.
[4] Not including mining dredges.
[5] No comparable data.
[6] Not including motor-vehicle or aircraft engines.
[7] Includes dredging.
[8] Includes mine conveying and elevating machinery.
[9] Not strictly comparable with figures for 1939.
[10] Includes parts and attachments.

[1] No data.
[2] Includes porcelain and trolley-line insulators for 1937 and earlier years; for 1939, data are included in "Porcelain electrical supplies" industry, see table 881, p. 882.
[3] Includes automotive generators for battery charging; for 1937 and 1939, data are included in "Automotive electrical equipment" industry.
[4] Includes radio transformers; for 1935, 1937, and 1939, data are included in radio apparatus in "Communication equipment" industry.
[5] Includes motors which in later years are included in other motors and parts and supplies.
[6] Includes motors not reported by kind. See note 5 also.
[7] Other motors only; parts and supplies included with automotive starter motors in "Automotive electrical equipment" industry.
[8] See note 3. [9] Automotive starter motors only.
[10] Automotive starter motors and parts and supplies for other motors, see note 7.
[11] Includes X-ray tubes; for later years data are included in nonradio electronic tubes and X-ray tubes in "X-ray and therapeutic apparatus and electronic tubes" industry.
[12] Includes phonographs for electrical reproduction of records, included in prior years in "Other."
[13] No data for radio parts. See note 4 also.
[14] Includes parts and supplies. [15] See note 11.

No. 914.—Cotton Spindles, Cotton Consumption, and Stocks

NOTE.—The statistics for 1915 to 1942 relate to the 12 months ended July 31 and those for prior years to the 12 months ended Aug. 31. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. The number of active cotton spindles represents spindles operated at some time during the year, and is not as satisfactory a measure of activity of the industry as active spindle hours.

No. 919.—Tobacco, Leaf—Amounts Consumed in the Manufacture of Cigars, Cigarettes, Chewing and Smoking Tobacco, and Snuff

NOTE.—**All figures in thousands of pounds.** Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses (see table 918).

[1] In computing taxable gallons all fractional parts of a proof gallon less than one-tenth are excluded.
[2] Production represents the amount removed from fermenters including wine that is removed for use as distilling material in the production of brandy.
[3] Includes artificially carbonated wine. Tax is payable "on each one-half pint (for artificially carbonated wine, 'on each pint' beginning June 26, 1936) or fraction thereof" of "each bottle or other container."
[4] Barrels of not more than 31 gallons. [5] Containing less than one-half of 1 percent alcohol by volume.
[6] Includes data for Alaska, Hawaii, and Puerto Rico.
[7] No data compiled by Bureau of Internal Revenue. [8] No legal production.
[9] Includes 1,588,788 barrels produced prior to Apr. 7 (effective date of the Act of Mar. 22, 1933).
[10] Alcoholic content limited to 3.2 percent by weight from Apr. 7 to Dec. 5, 1933.
[11] Excludes data for domestic alcohol which is not available for publication. Comparable figures for 1941 are: total, 155,008,000 tax gallons; exclusive of fruit brandy, 129,644,000 tax gallons.
[12] Does not include brandy withdrawn for the fortification of wine.
[13] Total withdrawals; tax law repealed, effective May 10, 1934. [14] In thousands of proof gallons.
[15] In thousands of wine gallons. [16] Comparable data for 1942 are not available for publication.

No. 923.—Motion-Picture Production—Summary: 1921 to 1939

Note.—All money figures are in thousands of dollars. Data represent the activities of the motion-picture studios and laboratories. They do not include the distribution of films and their projection in theaters. No data are included for establishments which reported less than $5,000 as the cost of work done. The motion-picture industry has been canvassed, since 1921, in connection with the Biennial Census of Manufactures. It is not, however, a manufacturing industry, but was treated as such prior to 1931.

[1] Includes cost of studio supplies, containers for films, fuel, and purchased electric energy.
[2] Data cover "productive employees" only. These include all wage earners and a part, but not all, of the salaried employees. Figures are not, therefore, comparable with either the wage-earner figures or with the total number of persons engaged. Data for other years cover all classes of employees.
[3] Does not include data for salaried officers of corporations.
[4] Data incomplete.
[5] "News reels" included with "advertising."
[6] Figure for "industrial" included in that for "other films."
[7] Combined to avoid disclosing approximations of data for individual establishments.

No. 924.—Alaska—Manufactures, by Industries: 1899 to 1939

NOTE.—The figures for 1939 do not include data for plants reporting products valued at less than $2,000; those for earlier years cover all plants having products valued at $500 or more. This increase in the minimum value-of-products limit resulted in some reduction in the "Number of establishments" reported as compared with what it would have been had the minimum of $500 been retained, but did not seriously impair the comparableness of the figures for 1939 with those for earlier years. Comparable figures for earlier years are given for all industries for which such figures are available.

[1] Value of products less cost of materials, supplies, containers, fuel, purchased electric energy, and contract work.

[2] Figures include data for coffee cleaning and polishing, which is now treated as an agricultural activity and therefore was not covered by the 1939 Census of Manufactures.

[3] Except "Liquors, malt," and "Foods, miscellaneous." See footnote 16.

[4] The figures for this industry do not include data for sugar-cane plantations.

[5] Household furniture, 40 establishments; mattresses, 2; office furniture, 1; show cases, 2.

[6] Footwear, except rubber, 9 establishments; leather, tan, 1; saddlery, 1; other goods, 1.

[7] Aluminum products, 1 establishment; ornamental ironwork, 3; sheet-metal work, 3; tin cans, 3; watch parts, 1.

[8] Reported as "Foundry and machine-shop products."

[9] Estimated in part by use of ratios derived from reports made for corresponding classes of establishments operated in the United States.

[10] As part of the establishments engaged in contract work reported receipts for work done on materials owned by others, and part reported actual values of goods made, all returns have been converted to estimated value of products.

[11] This figure is inflated to the extent to which it includes amounts paid for outside work.

[12] Products of planing mills not reported in conjunction with sawmills.

[13] Books, 1 establishment; job printing, 40; photoengraving, 1.

[14] Brick and hollow structural tile, 2 establishments; sewer pipe, 1; other concrete and stone products, 3.

[1] Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees.
[2] Caveat law repealed June 25, 1910.
[3] Data are for period from July 28, 1836, to Dec. 31, 1850, except as otherwise specified.
[4] Data are for 11 years beginning 1840; records prior to this date are not available.
[5] Data are for 8 years beginning 1843.
[6] Data are for 13 years beginning 1838.
[7] Data are for the year 1870.
[8] Data are for 7 years beginning 1874.
[9] Registration of labels suspended from May 27, 1891, to June 9, 1896.
[10] Data are for 8 years; first print registered Mar. 7, 1893.
[11] Data are for the year 1925.
[12] Figures include plant patents issued since the law passed May 23, 1930, as follows: 5 in 1931; 46 in 1932; 33 in 1933; 32 in 1934; 45 in 1935; 49 in 1936; 55 in 1937; 41 in 1938; 45 in 1939; 85 in 1940; 62 in 1941.
[13] Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization.

33. DISTRIBUTION, SERVICES, AND HOTELS

[Data in this section relate to continental United States]

No. 928.—Manufacturers' Sales—Distribution, by Primary Channels, by Industry Groups: 1929, 1935, and 1939

Note.—No data are included for the following classes of industries: (1) Those in which no sales were made, the plants being maintained for the purpose of making repairs; (2) those in which plants were engaged primarily in performing labor on materials owned by others so that their sales represented sales of services rather than commodities. This table is limited to industries for which the 1929, 1935, and 1939 figures are directly comparable, whereas table 929 covers all industries for which 1939 figures are available. For comparative purposes, data covering direct export are excluded.

[1] In 1929, sales to or through wholesale branches and sales to retailers for resale were combined for the most part with sales to wholesalers and jobbers.
[2] Includes sales to export intermediaries.
[3] Less than one-tenth of 1 percent.
[4] Includes 16.5 percent "sales to converters."
[5] Combined with wholesalers and jobbers.
[6] Combined with retailers.
[7] Combined with industrial, etc., users.

[1] Includes sales of certain milk dealers in the amount of $130,000,000, not included in tables 937, 940, and 942. Data for these concerns were received too late for inclusion in summary tables for 1929.
[2] Much of the increase in sales of filling stations from 1929 to 1939 is offset by the decrease in commodity sales of garages which are included in the census of service establishments, 1939.

[1] Figures for 1935 revised to exclude service garages; data to adjust 1929 figures not available.

[2] Represents, in addition to chain data shown in tables 940 and 941, data for multiunit organizations with 4 or more retail units, such as public utility stores, State liquor stores, direct selling (house-to-house), and other lesser types.

[3] Not strictly comparable with previous years; a schedule form provided for reporting warehouse operations for 1939 resulted in the receipt of a greater number of separate reports.

[4] Data not available.

[5] Includes estimates for a small number of warehouses for which billings were not reported.

No. 944.—Sales by Chain Stores—Indexes of Values, 1937 to 1941, and by Months, 1940, 1941, and 1942

Note.—The combined index for all groups includes the apparel chains shown separately in the table, 5 grocery chains, 6 variety chains, 2 drug chains, and 3 shoe chains. Indexes are based on daily average sales. Each monthly index is expressed as a percentage of the average for the same month of the base period. Allowance for the fluctuating date of Easter is made in the case of apparel, variety, and shoe chains. No allowance has been made for changes in the number of stores operated.

No. 945.—Sales by Selected Groups of Retail Outlets—Indexes of Dollar Values, 1934 to 1941, and by Months, 1940, 1941, and 1942

Note.—Indexes of automobile sales are based on unit sales figures reported monthly to the Automobile Manufacturers' Association, which represent over 95 percent of all dealers' sales. The unit sales figures are converted to dollar volume by the use of a computed "average realized price." Indexes of sales in small towns and rural areas are based on figures furnished by three mail-order companies for sales by mail only and by a large group of chain units operating in small towns and cities which serve the rural population. Sales of reporting concerns represent about one-fourth of all general merchandise sales in places of less than 30,000 inhabitants. Indexes of both variety store sales and grocery chain store sales are based on figures furnished by chain organizations doing more than 70 percent of the business in the respective fields. For the variety store index adjustment has been made for changes in the number of stores operated by the companies so that the index reflects sales changes for a constant number of stores. All indexes are computed from dollar sales reduced to a daily average basis. In computing the index of automobile sales, equal weight is given to all days of the month and for the shifting date of new model introduction, while in computing the other three indexes, allowance is made for the varying number of business days in the months and the varying sales importance of the different days of the week. The monthly indexes of all four series are adjusted for seasonal changes and, in addition, the variety-store index is adjusted for the changing date of Easter.

No. 947.—Sales by Department Stores—Indexes of Values, by Federal Reserve Districts, 1923 to 1941, and by Months, 1939 to 1942

Note.—1935–1939 average=100, except as indicated. Compiled from reports of about 240 to 560 firms prior to 1941; in 1941, the sample was expanded to cover about 1,300 stores. Indexes for the United States have been adjusted for variations in number of firms reporting and monthly indexes for the varying number of business days in the different months, for seasonal changes, and for the effect of the shifting date of Easter. These adjustments do not apply uniformly to the indexes by districts.

[1] Employees and pay roll include paid executives of corporations but not number and compensation of proprietors of unincorporated businesses.

[2] Statistics for 1935, adjusted for comparison, are as follows: Number of establishments, 631,309; receipts, $3,000,699,000. The adjustment was made by revising the original 1935 figures to include certain kinds of business that were not included in the Service Census but were published in other census reports and by excluding others which were within the scope of the 1935 census but were omitted from the 1939 census. For a comparison of the two items by industries, see source.

[3] For figures for earlier years, see table 950, p. 981.

[4] Includes manufacturing plants with products valued at less than $5,000 and therefore not covered by the Census of Manufactures.

No. 949.—Service Establishments—Summary, by States: 1939

NOTE.—The census of service establishments covers a heterogeneous group of establishments (see table 948) engaged primarily in the sale of service, as distinguished from establishments dealing in merchandise. The professional field, the financial, educational, transportation, construction, and diverse other fields of business activity, many of which are covered elsewhere, are not included. Owing to differences in the scope of the 1935 and 1939 censuses of service establishments, the aggregates for 1939 are not comparable with those for 1935 as published in the 1937–40 issues of the Abstract.

No. 950.—Power Laundries, Cleaning and Dyeing Establishments, and Rug Cleaning Establishments—Summary: 1919 to 1939

NOTE.—**All money figures in thousands of dollars.** Statistics cover establishments reporting receipts of $5,000 or more, except for 1939 figures in italics, which represent establishments reporting receipts of $100 or more. The Census of Business for 1939 classified the establishments shown in this table as service establishments and covered those reporting receipts of $100 or more. See also table 948 for statistics for 1939. Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in general, as an activity of the power laundry industry for 1929 and earlier years.

No. 951.—Hotels—Summary, 1929 to 1939, and by Size, 1939

NOTE.—The census coverage of hotels is restricted, in the main, to establishments which are designated as hotels and which provide hotel accommodations as their major business activity. For 1935 and 1939, the canvass was limited to hotels having at least 6 guest rooms or having receipts from room rentals amounting to at least $500 for a full year's operations. Because of differences in coverage for 1929, 1933, 1935, and 1939, comparable data are available only for year-round hotels having 25 or more guest rooms.

YEAR	Number of hotels	Number of guest rooms	Receipts (thousands of dollars)	Employees, full-time and part-time (average for year) [1]	Total pay roll (thousands of dollars) [1]
All hotels:					
1935	28,822	1,428,646	720,145	291,165	191,845

34. CONSTRUCTION AND HOUSING

[Date in this section relate to continental United States]

No. 954.—Construction Contracts Awarded in 37 States—Value of Construction and Floor Space of Buildings, by Class of Construction: 1925 to 1941

Note.—For State figures, see table 955. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the Statistical Abstract. Figures for the individual States and districts in table 955 represent the value of construction contracts awarded in the States and districts where the work was actually done.

[Values in millions and tenths of millions of dollars; floor space in thousands of square feet]

[1] Owing to change in classification, data for airports have been excluded from "Commercial" class and included with "Public utilities" for 1930 and subsequent years. Separate figures for airports are not available for years prior to 1930.

[2] Owing to change in classification, figures for "Industrial" class exclude data for pipe lines for 1929 and subsequent years (separate figures not available for years prior to 1929), which data are included with those for "Public utilities."

[3] Figures exclude data for 23 projects, valued at $29,551,900, for which data by class of construction are not available. These projects were under Civil Works Program, which was not in existence after March 1934.

No. 957.—Construction Contracts Awarded—Indexes of Value: 1919 to 1942

Note.—1923–25 average=100. Indexes are derived from monthly figures of construction contracts awarded reported by the F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, the total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments were computed separately for "residential" and "all other" types of construction and the two series combined. The indexes are based on a 3-month moving average, centered at the middle month. For a more detailed description of the indexes, see the Federal Reserve Bulletin for July 1931.

No. 958.—Building Permits Issued—Number and Permit Valuation of Buildings, for Principal Cities: 1937 to 1941

Note.—Figures cover new buildings and repairs to old buildings, but exclude data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. Although installation permits are rather numerous, they represent a small dollar value. The quantity figures represent the number of buildings covered by permits issued (new construction and repairs, etc.) rather than the number of permits. Buildings authorized by permit are not always constructed, and the actual cost of those constructed may differ considerably from the value reported on the permit. The cities shown had a population of 50,000 or over in 1940.

No. 962.—Construction in the United States—Estimated Expenditures for Public and Private Construction: 1918 to 1941

Note.—The estimates represent the value of work performed during the year, as measured by expenditures for labor, material, and other items. They consequently differ from building permit and construction contract data which measure the value of work started. In addition, they have a generally broader coverage than permit and contract data. Figures include value and cost of installation of equipment which is an integral part of a structure, but not that of machinery, shipbuilding, or land costs.

No. 963.—Construction—Summary, by Kind of Contractor, by Size Groups: 1939

Note.—The 1939 Census of Construction covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes, on projects located within the limits of continental United States. It included erection and installation departments of manufacturers and merchandisers, when it was an important but not necessarily major portion of their business enterprise. Force-account work, ship and boat building, and installation and servicing of domestic appliances were not included. "Work performed" represents contract or order value of work done by the contractor's or builder's own forces. Work sublet to others was not included as work performed in the report of the builder or general contractor, but was reported as part of the business of the special trade contractor who received the subcontract. "Construction work" includes alterations and repairs, as well as new construction and additions. Data for establishments reporting less than $500 of work performed in 1939 are not included. The canvass is known to have been incomplete in coverage of small contractors who operated from their homes. Most of this shortage occurred in metropolitan districts. It is believed that this undercoverage affects materially only number of establishments and number of proprietors.

No. 968.—Construction—Summary for Establishments Reporting Business of $25,000 or More, by States: 1929 and 1939

Note.—1929 and 1939 comparisons must be limited to establishments reporting business of $25,000 or more as the 1929 census covered only that size group. That size group in 1939 accounted for 77 percent of total value of work performed by all contractors and builders regardless of size. Geographic distribution is based on office address of reporting establishment, not location of construction project.

No. 971.—Building Costs, Small-House, for Representative Cities: 1939 to 1942

Note.—Costs are shown in this table for April of each year for the cities in the New York, Indianapolis, Des Moines, and Portland Districts; for May of each year for the cities in the Pittsburgh, Cincinnati, Little Rock, and Los Angeles Districts; and for June of each year for the cities in the Boston, Winston-Salem, Chicago, and Topeka Districts. In figuring costs, current prices and wage rates are obtained every 3 months from identical sources in each of approximately 80 cities. These data are the basic material for the computation of the small-house building cost index given in table 970. The various units of material and labor are selected to conform with their contribution to the total cost of the completed dwelling. The standard 6-room frame house for which costs are given is not one completed and ready for occupancy, but only with all fundamental structural elements included. It does not include wallpaper, lighting fixtures, screens, etc., nor do costs reported include land, landscaping, or fees. These figures can be used to study the trend of costs within an individual community or for a comparison of trends in different cities. However, the total cost in one city cannot be compared directly with the total cost in another city nor is the estimated total cost figure for a given city comparable with the actual cost of constructing a 6-room house in that city.

No. 973.—Residential Structures—Summary for 64 Cities: 1934

Note.—The cities included in the real-property inventory were selected from every State in the Union as a representative sample of urban housing in the United States. The cities chosen vary in size from a population of 11,000 to more than 1,000,000. The total population of the areas canvassed constituted about one-seventh of the total urban population of the United States. The survey covered all buildings with residential units except hotels, clubs, rooming houses, and summer cottages. Data for the individual cities included in this summary are shown in table 815 of the 1935 issue of the Statistical Abstract.

No. 975.—Dwelling Units, Urban and Rural, by Occupancy and Tenure, by Average and Median Monthly Rent: 1940

Note.—For urban and rural-nonfarm units, monthly rent includes land; for farm units, land is excluded. Monthly rental data include contract rent of tenant-occupied nonfarm units and estimated rent of other units. Monthly rent of owner-occupied rural-farm units is an estimate based on 1 percent of reported value.

No. 977.—Dwelling Units, Urban and Rural-Nonfarm—Median Contract or Estimated Monthly Rent and Median Value, by Tenure: 1940

Note.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median rent is the rent which divides the total number of dwelling units into two equal groups, one having rents higher than the median and one having rents lower than the median. Monthly rental data include contract rent of tenant-occupied units and estimated rent of owner-occupied and vacant units. Figures for "All dwelling units" include vacant units.

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilograms	Pounds	Kilograms
Crude petroleum	7.3	3.311	306.6	139.07
Lubricating oils	7.0	3.175	294.0	133.36
Illuminating oils (kerosene)	6.6	2.994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.)	6.1	2.767	256.2	116.21
Fuel and gas oils	7.7	3.493	323.4	146.69

BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

GENERAL NOTE

This bibliography contains under the various subject headings references to the important sources of primary data for the United States. Sources of secondary data have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. One-time studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right hand side of each page indicate that data from the report cited appear in the Statistical Abstract. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the Abstract.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major inquiries, such as the Census of Population, are referred to by name rather than by specific volume references.
