LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., July 10, 1943.

SIR: I have the honor to submit herewith for publication the sixty-fourth issue of the Statistical Abstract of the United States. This annual volume is a compilation of authoritative statistics relating to the social and economic condition of the population and to the industrial, commercial, and governmental activities of the Nation. It is designed to serve as a convenient reference work for businessmen, legislators, administrators, economists, statisticians, students, and others who may have need of a statistical compendium covering a wide range of subjects.

The present volume was prepared by Kathleen H. Dugan, editor, under the administrative direction of Morris H. Hansen, Statistical Assistant to the Director. Technical assistance, especially in the preparation of the Bibliography of Sources of Statistical Data, was given by Morris B. Ullman, Social Science Analyst.

The first 34 issues of the Abstract were prepared and published by the Bureau of Statistics, originally a bureau of the Treasury Department and later of the Department of Commerce and Labor; the next 25 by the Bureau of Foreign and Domestic Commerce, Department of Commerce; and subsequent issues by the Bureau of the Census.

The statistical tables contained in the Abstract are compilations of data collected by the various statistical agencies of the Federal Government, by several State agencies, and by a considerable number of nongovernmental organizations. Many of these agencies have rendered valuable assistance not only in supplying advance data but also in the actual preparation of tables for inclusion in the Abstract. Special mention on this account is due the following-named agencies of the Federal Government: The Bureau of Foreign and Domestic Commerce and the Weather Bureau, of the Department of Commerce; the Bureau of Agricultural Economics, the Agricultural Marketing Administration, the Office of Foreign Agricultural Relations, the Farm Credit Administration, and the Forest Service, of the Department of Agriculture; the Office of Education and the Social Security Board, of the Federal Security Agency; the Fish and Wildlife Service, the General Land Office, the Bureau of Mines, and the National Park Service, of the Department of the Interior; the Immigration and Naturalization Service, of the Department of Justice; the Bureau of Labor Statistics, of the Department of Labor; the Bureau of Customs and the Bureau of Internal Revenue, of the Treasury Department; the Federal Communications Commission; the Board of Governors of the Federal Reserve System; the Interstate Commerce Commission; the Railroad Retirement Board; the United States Maritime Commission; and the Veterans' Administration.

Respectfully,

J. C. CAPT,
Director of the Census.

TO HON. JESSE H. JONES,
Secretary of Commerce.

INTRODUCTORY NOTE

The Statistical Abstract of the United States summarizes the large mass of statistical information published by various governmental agencies and certain nongovernmental organizations, and also includes some information not published elsewhere. Important data on the industrial, social, and economic organization of the Nation are brought together in one volume to serve as a convenient reference manual.

Not only does the Abstract provide a summary of statistical information but it also serves as a guide to various sources of statistical data. To this end every table in the Abstract is annotated as to its source. In addition, a bibliography of sources of data, including references to sources not represented in the Abstract, is also included in this volume.

If the information on a particular subject presented in the Abstract is not sufficiently detailed, the user can refer to the publications of the agency responsible for the data. Frequently the original source discusses the definitions and concepts used and presents information for smaller areas or with additional cross classifications. Occasionally, the agency has still more detailed information that can be made available from unpublished records.

The Bureau of the Census seeks to improve both the form and content of this volume continuously, and any suggestions, remarks, or criticisms from those who use this book will be appreciated.

[1] Revised.
[2] In comparing this percentage of increase with that shown for the decade 1910–20, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 percent for 123 months (the time between Jan. 1,1920, and Apr. 1, 1930) is equivalent to 15.7 percent for exactly 10 years; and the 1920 increase for 116½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 15.4 percent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.
[3] Areas and population density are based on new measurements and differ slightly from figures previously published.

No. 5.—Population Per Square Mile, by States: 1800 to 1940

Note.—The population of continental United States has been divided by the total land area in order to obtain the density figures here presented. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The 1930 data, however, are based on the revised land areas used for computing the 1940 density figures and, therefore, differ from the 1930 density data previously published. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and cannot be considered in figuring density of population prior to 1890.

No. 7.—Population for Urban Size Groups and for Rural Territory: 1910 to 1940

Note.—Prior to 1930 all incorporated places and all towns (townships) in Massachusetts, Rhode Island, and New Hampshire, having 2,500 or more inhabitants, were classed as urban areas. For 1930 and 1940, urban areas also include unincorporated political subdivisions with a total population of 10,000 or more and a population density of 1,000 per square mile, and include, for the three New England States named above, only those towns which contain a village of more than 2,500 inhabitants comprising, either by itself or when combined with other villages within the same town, more than 50 percent of the population of the town. The total urban and rural population for 1880, 1890, and 1900 is as follows: Urban—1880, 14,129,735; 1890, 22,106,265; 1900, 30,159,921. Rural—1880, 36,026,048; 1890, 40,841,449; 1900, 45,834,654. Percent urban—1880, 28.2; 1890, 35.1; 1900, 39.7.

No. 10.—Population, 1940, and Estimated Future Population, 1945 to 1980, by Age and Sex

Note.—Figures for 1940 are those reported in the census for that year. Estimates of future population are reproduced with the cooperation of the National Resources Planning Board and of Warren S. Thompson and P. K. Whelpton of the Scripps Foundation for Population Research, who prepared them for the National Resources Committee. For details on method of constructing estimates, etc., see report of National Resources Committee, Population Statistics, 1, National Data, Washington, G. P. O., 1937, or article by P. K. Whelpton, "An Empirical Method of Calculating Future Population," Journal of American Statistical Association, Sept. 1936, pp. 457–473.

No. 11.—Population, Estimated as of July 1, by States: 1930 to 1939

Note.—Estimates of population for each State are based on Federal Census figures for 1930 and 1940 and on available local data indicative of population changes, such as school enrollment and school census figures, using the method most appropriate to each State. Six States made local population censuses for one or more years between the Federal censuses, and data for these censuses were used as additional base points for intercensal interpolations. The difference between the sum of all the State estimates for any given year and the estimate for continental United States was prorated among those States which had no special census. For actual enumerations, 1790 to 1940, see table 6, p. 4.

No. 12.—Population, Estimated as of July 1, for Continental United States, 1850 to 1941, and for Alaska, Hawaii, Puerto Rico, and Philippine Islands, 1914 to 1941

Note.—Estimates, except for continental United States, 1900 to 1940, Hawaii, 1930 to 1940, Alaska, 1940, Puerto Rico, 1940 and 1941, and Philippine Islands, 1939 and 1940, are based on the assumption that the increase each year between two successive censuses is equal to the average annual increase between the 2 enumerations. Estimates for the United States, 1900 to 1909, are the sums of State estimates based on available local data indicative of population change. Those for 1910 to 1941 are based on birth and death statistics, both corrected for under registration, and on statistics of immigration and emigration. Estimates for Hawaii, 1930 to 1940, are based on available data regarding births, deaths, immigration, and emigration, allowance being made each year for unregistered births and deaths. Estimates for Puerto Rico, 1930 to 1939, are based partly on a census taken as of Dec. 1, 1935.

No. 18.—Population, White, by Nativity and Parentage, Continental United States: 1880 to 1940

Note.—1940 data are based on a tabulation of a 5 percent cross-section of the population, multiplied uniformly by 20. Figures thus derived differ somewhat from those which would have resulted from a 100 percent tabulation of the population. For items that were obtained for the total population, an analysis of statistics based on tabulations of the 5 percent cross-section of the population indicates that in 95 percent of the cases the sample statistics differ from the complete census statistics by less than 5 percent for all numbers of 10,000 or more. White population includes Mexicans for all years.

No. 20.—Population, by Race, Nativity, and Parentage—Percent Distribution, by States: 1920, 1930, and 1940

Note.—The percent figures showing the white population by nativity are based on the entire enumerated white population, but those showing the native white population by parentage are computed from results of a 5 percent sample of the population enumerated in the 1940 Census. In most cases these sample percentages are identical with those that would have been obtained from a 100 percent enumeration.

No. 28.—Population, Foreign-Born White, 1910 to 1940, and Total Foreign-Born, 1900, by Country of Birth, Continental United States

Note.—All classifications of 1940 population according to country of birth are based on political boundaries of Jan. 1, 1937. Classification of population at earlier censuses is based for the most part on political boundaries of those years. Figures for white population for 1930 have been revised to include Mexicans who were classified with "Other races" in 1930 Census reports. For most countries of Europe the total foreign-born population given for 1900 is almost entirely white.

Country of birth	Total foreign-born, 1900	Foreign-born white 1910	1920	1930	1940	Percent distribution 1930	1940	Percent change 1930–1940 [1]

No. 30.—Population, White, by Mother Tongue, Continental United States: 1930 and 1940

Note.—1940 data are based on a tabulation of a 5 percent cross-section of the population, multiplied uniformly by 20. Analysis of statistics based on tabulations of the 5 percent cross-section of the population indicates that in 95 percent of the cases the sample statistics differ from the complete census statistics by less than 5 percent for all numbers of 10,000 or more, by less than 10 percent for numbers between 5,000 and 10,000, and by less than 20 percent for numbers between 2,000 and 5,000. Somewhat larger variations may be expected in numbers below 2,000. White population includes Mexicans.

No. 33.—Marital Status of the White Population, 1930 and 1940, and of the Nonwhite Population, 1930, by Sex, Nativity, and Parentage, Continental United States

Note.—1940 data are based on a tabulation of a 5 percent cross-section of the population, multiplied uniformly by 20. Analysis of statistics based on tabulations of the 5 percent cross-section of the population indicates that in 95 percent of the cases the sample statistics differ from the complete census statistics by less than 5 percent for all numbers of 10,000 or more, by less than 10 percent for numbers between 5,000 and 10,000, and by less than 20 percent for numbers between 2,000 and 5,000. Somewhat larger variations may be expected in numbers below 2,000. White population includes Mexicans. The 1930 classification includes only persons of known marital status. Persons whose marital status could not be determined from the population schedule in 1940 were classified as single.

No. 36.—Families, by Average Size and by Home Tenure, Continental United States: 1890 to 1940

Note.—Figures for 1940 are based on occupied dwelling units and are not strictly comparable with data for private families, but it is believed that differences are so small as to be negligible. Figures for 1900 and 1930 represent private families only; those for 1890, 1910, and 1920, include a small number of quasi-family groups.

[1] Figures do not strictly represent the average size of private families because they were obtained by dividing the number of occupied units (or families) into the total population, which includes an appreciable number of persons who are not members of private families. Persons in private families represent so large a fraction of the total, however, that the trend of the figures from one census to another, as indicated by the population per unit or family, is practically the same as for the average size of family.

[2] Estimated data for those of unknown tenure are included.

No. 43.—Institutional Population 14 Years Old and Over—Summary for the United States: 1940

Note.—Figures cover persons who were reported as inmates of public or private institutions of specified types. Officials and attendants were excluded, as were patients in general hospitals and tuberculosis sanitariums. Persons in religious institutions and Veterans' Administration Facilities were included only if the establishment had a majority of delinquents, mental patients, aged, or incurables.

[1] Persons who worked for pay or profit at any time during week of Mar. 24–30, 1940, in private or nonemergency Federal, State, or local government work, or assisted without pay on a family farm or in a family business, and those who had jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date.

[2] Persons who, during week of Mar. 24–30, 1940, were at work on or assigned to, public emergency work projects conducted by Work Projects Administration, National Youth Administration, Civilian Conservation Corps, or State and local work relief agencies. Number of persons reported in census as on public emergency work in the U. S. was 2,529,606, whereas number recorded on pay rolls of Federal emergency work agencies at about time of census was 2,906,196, excluding NYA Student Work Program, and 3,377,978 including that program. Available evidence indicates that a majority of emergency workers who were improperly classified were returned as on private or nonemergency government work; persons on NYA Student Work Program were frequently returned as in school; and a number of emergency workers were classified as "seeking work," rather than as emergency workers.

[3] Persons without work of any sort in week of Mar. 24–30, 1940, who were actively seeking work during that week. This category includes both experienced and new workers, the latter being persons who had not previously worked full time for 1 month or more.

[4] Persons reported as engaged in own home housework, in school, unable to work, all inmates of penal and mental institutions, and homes for the aged, infirm, and needy, regardless of their activity during the census week; others not at work and not having a job, not on public emergency work, and not seeking work; and persons for whom employment status was not reported.

[1] Figures for 1900 to 1930 represent gainful workers, that is, persons reported as having a gainful occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. Figures are, therefore, not strictly comparable with those in the labor force for 1940.

3. VITAL STATISTICS

[Statistics in this section relate to continental United States except those in table 105]

GENERAL NOTE.—Births and deaths are registered by the States, and transcripts of the original certificates are received and tabulated by the Bureau of the Census. Because of the gradual expansion of the "registration" systems up to 1933 (see tables 87, 88, and 95), the numbers of births and deaths recorded for earlier years for the systems as a whole are not strictly comparable, but, in most cases, the expansion of the systems had only a negligible effect on the comparability of the rates. Beginning with 1933, all States have been included in both the birth- and death-registration systems.

All birth and death statistics in this section, except as noted in tables 89 and 93, have been compiled according to the places in which the births or the deaths occurred. The alternative is to allocate each birth and each death to the State, city, and county of residence or usual place of abode. (For comparison of births and deaths by place of occurrence and by place of residence, for selected cities, see table 89. For State totals the difference in most cases would be negligible.) Inasmuch as the population census is compiled according to the usual place of abode, the tabulation of vital statistics according to place of occurrence has seriously restricted, for certain purposes, the use of these data. The factors to be considered depend upon the specific purpose for which the data are to be used. If crude death rates—and especially the rates for individual causes of death—are used as indexes of the health conditions of a community, comparisons of rates for different States or cities are not strictly valid unless the age, sex, and racial composition of the population of each area is considered. It is obvious that, if the population in 1 State is generally older than that in another, the crude death rate will be higher, even though there are no essential differences between the rates for identical age groups. Moreover, in a few States the rates for certain causes, notably tuberculosis, are abnormally high because the deaths represented by these rates include those of considerable numbers of persons who have gone to the States in question in the hope of recovering their health. Similar considerations apply also to crude birth rates. For example, comparison of the birth rate of 1 area having a certain proportion of women of childbearing age with the rate of another community of a different population composition is erroneous if the rates are used as a measure of intrinsic biological fertility.

Rates, except as noted, are based on revised midyear estimates of population.

Data for stillbirths (see table 94) are excluded from the figures for both births and deaths. In all tables giving statistics by race, data for Mexicans have been included with those for the white population.

No. 87.—BIRTH- AND DEATH-REGISTRATION AREAS—STATES INCLUDED AND YEAR WHEN ADMITTED: 1880 TO 1933

NOTE.—In each year prior to 1933, the death-registration area included besides the registration States, as given below, a number of cities in nonregistration States. Beginning with 1933, all States have been included in both the birth- and death-registration areas.

No. 89.—Births and Deaths, by Place of Occurrence and by Place of Residence, for Cities of 100,000 or More Inhabitants: 1940

Note.—The first and second columns compare the numbers of births occurring in the specified cities (regardless of the places of residence of the mothers) with the numbers of births to mothers whose permanent homes were in the specified cities (regardless of the places of occurrence of such births). Similarly, the third and fourth columns compare the numbers of deaths occurring in the specified cities (regardless of the places of residence of the decedents) with the numbers of deaths of residents of the specified cities (regardless of the places of occurrence of such deaths). For example: The total number of births occurring in Akron (including births to mothers having their permanent homes elsewhere) was 4,318; whereas the total number of births to mothers having their permanent homes in Akron (including births occurring elsewhere) was 3,727.

4. IMMIGRATION, EMIGRATION, AND NATURALIZATION

GENERAL NOTE.—In compiling immigration and emigration statistics, Alaska, Hawaii, and Puerto Rico, beginning with 1904, 1901, and 1902, respectively, have been treated as integral parts of the United States. In prior years the transfer of population between these areas and the United States was treated as immigration and emigration. The movement of population between the Philippine Islands and the United States was treated as immigration and emigration prior to July 1, 1898, and has been so treated since May 1, 1934, but was not accounted for in the statistics for the period between those dates.

No. 109.—IMMIGRATION: 1821 TO 1941

NOTE.—For 1821 to 1867 the figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted; for periods they are totals, not annual averages.

No. 113.—Immigration, by Country of Origin, by Decades: 1851 to 1940

Note.—For 1851 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Data prior to 1906 cover countries whence aliens came; thereafter, countries of last permanent residence. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Countries added to the list since the beginning of the World War were theretofore included with the countries to which they belonged. Data are *totals* (not annual averages) for periods ended June 30 since 1870, Dec. 31 theretofore, except as noted.

No. 117.—Immigration Quotas Allotted and Quota Aliens Admitted, by Country of Birth: Years Ended June 30, 1925 to 1941

Note.—The Immigration Act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 percent of the number of foreign-born persons of such nationality resident in continental United States as determined by the census of 1910; the population plan of the act of 1924, to 2 percent according to the census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under the act of 1924, the minimum quota is 100. Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all.

[1] Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, are as follows: 1922, 243,953; 1923, 335,480; 1924, 357,643. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

[2] Quota for 1934 to 1941. The total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific islands.

[3] Austria included with Germany beginning with 1938.

[4] All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

[5] Annual quotas for colonies, dependencies, or protectorates in "Other Europe," Asia, Africa, Pacific islands, and America are included in the annual quotas of the European countries to which they belong.

[6] Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

[1] Includes superintendents, principals, and supervisors for States not reporting them separately, but not for all States. These numbers are, therefore, somewhat smaller than those on which average annual salaries are based.

[2] Includes 231 part-time teachers. [3] Estimated. [4] For 1919. [5] For 1938. [6] White schools. [7] For 1936.

No. 147.—Vocational Courses, Federally Aided—Students Enrolled, by Class, by States and Territories and for Puerto Rico: Year Ended June 30, 1941

Note.—Institutions Federally aided are reimbursed from Federal funds provided under the act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending the benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for the further development of vocational education. These acts, administered by the Office of Education provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education.

No. 148.—Vocational Rehabilitation of Disabled Persons, by Number and by Cases on Roll, by States and for Hawaii and Puerto Rico: 1930 to 1941

Note.—In accordance with the Civilian Vocational Rehabilitation Act of June 2, 1920, Congress set up a program of cooperation with the States for the vocational rehabilitation of persons disabled in industry or otherwise. By the end of the fiscal year 1940, 48 States, the District of Columbia, Hawaii, and Puerto Rico had accepted the provisions and begun cooperation with the Federal Government. The figures given relate only to cases aided by Federal funds. The total expenditure in 1941 (fiscal year) comprised: Federal funds, $2,281,941; State and private funds, $2,429,197.

7. CLIMATE

No. 162.—Climatic Conditions of Selected Cities, by Months

NOTE.—The table presented herewith shows the more important facts concerning the weather at a number of points in continental United States and outlying areas selected with a view to covering all the important climatic sections. The temperature extremes include the entire period of observations to Dec. 31, 1941. Other data are standard normals or long-time averages covering periods ranging up to 50 years or more. Average hourly wind velocity data are reduced to true velocities. Temperatures are Fahrenheit.

8. MILITARY AND CIVIL SERVICES, ELECTIONS, AND CONGRESSIONAL REPRESENTATION

No. 163.—Army of the United States—Strength of Component Parts: 1890 to 1941

NOTE.—For period prior to 1914, table covers quinquennial years and years in which considerable changes occurred in Regular Army. Figures for Reserve officers include data for Regular Army enlisted men, and also, for years prior to 1924, for National Guard officers holding commissions in the Reserve. There is, therefore, some duplication in the grand totals, but the amount of this duplication is relatively small.

[1] Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency officer was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included. (On June 30, 1941, 495 retired officers and 13 retired enlisted men had returned to active duty.) Beginning with 1919, data for warrant officers are included; these numbered 731 on June 30, 1941.

[2] State militia prior to act of June 3, 1916. Beginning with 1924, data for warrant officers are included; these numbered 200 on June 30, 1941. [3] U. S. Volunteers. [4] Not available. [5] Regular Army Reserve.

[6] Includes data for National Guard personnel in Federal service. [7] Estimated.

[8] Officers' Reserve Corps. Beginning with 1924, figures do not include data for persons holding commissions also in National Guard. Figure for 1941 includes 57,309 officers on extended active duty.

[9] Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimated).

[10] Officers' Reserve Corps, 86,262; National Army, 49,118 (estimated).

[11] Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

[12] Estimates only. Under orders of the Secretary of War all components had been merged into one army known as "The United States Army." [13] Enlisted Reserve Corps.

[14] Enlisted Reserve Corps, 1939, 3,054; 1940, 3,233; Regular Army Reserve, 1939, 19,301; 1940, 28,020. All enlistments in Regular Army Reserve suspended as of Dec. 31, 1940, and members called to active duty on or before Feb. 15, 1941, except those who were deferred until July 1, 1941, in order to complete college or university courses. [15] Includes 74,602 unassigned selectees.

[16] Enlisted men, 491,777 (including 10,919 Regular Army Reserve and 1,470 Army of United States with the Regular Army); selectees, 363,459.

[17] Enlisted men, 262,722 (including 20,590 Army of United States with the National Guard); selectees, 168,854. [18] Enlisted Reserve Corps. Includes 35 enlisted Reserve Corps men on active duty.

[1] The reduction in this item from the prior fiscal year was due essentially to discontinuance of disability allowance (nonservice) except for veterans permanently and totally disabled.
[2] For disbursements by wars, see table 168.
[3] Includes veterans of the War of 1812 whose dependents were receiving pensions (1 for 1941), not shown separately.
[4] Includes special-act cases. [5] Includes provisional, probationary, or temporary officers.
[6] Included under "Compensation."

No. 183.—Civil Service and Canal Zone Retirement: 1921 to 1941

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act and its amendments, employees of the classified service and certain other groups, including unclassified laborers subject to labor regulations, are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The amendment of May 29, 1930 (effective July 1, 1930), permits the optional retirement of employees 2 years before reaching the retirement age when they have rendered at least 30 years of service and also permits retirement on account of permanent and total disability after 5 years of service. From the basic compensation of each employee within the scope of the acts there is deducted 3½ percent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less $1 per month are credited to the employee's individual account. Under the amendment of May 29, 1930, annuities are composed of (1) a sum equal to $30 for each year of service not exceeding 30, provided it does not exceed three-fourths of average salary for any five consecutive years (amendment of Aug. 4, 1939, effective Jan. 1, 1940, which applies only to high-salaried employees with considerable service, provides that amount shall not be less than employee's purchasable annuity); and (2) the amount of annuity purchasable with the sum credited to the individual's account, together with interest at 4 percent per annum, with the provision that the annuity shall in no case be less than an amount equal to the average salary, not to exceed $1,600 per annum, received during any five consecutive years, multiplied by the number of years of service, not exceeding 30, and divided by 40. By act of Mar. 2, 1931 (effective July 1, 1931), special provision was made for employees of the Panama Canal and Panama Canal Railroad, who theretofore had been eligible for retirement under the civil service retirement and disability act.

No. 194.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1940

Note.—The population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of the number of slaves. In 1940, it was held that all Indians are subject to Federal taxation. The apportionment ratios were arbitrarily chosen until 1850. From 1850 to 1900, these ratios were the apportionment population of the U. S. divided by the number of Representatives. From 1910 on, the apportionments were computed from priority lists rather than from ratios. There was no apportionment in 1920. For a discussion of methods of apportionment, see Senate Document No. 304, 76th Congress, 3d session, "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington.

9. NATIONAL GOVERNMENT FINANCES

General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first 3 of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. The figures for actual transactions during a month or year which are calculated to take into account these delayed reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (see table 194, 1941 Statistical Abstract) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

Government transactions are classified according to the accounts through which they are effected. The three classes of accounts are: General fund accounts, which include the general revenues and from which the operating expenses of the Government, including capital outlays and fixed charges, are paid under appropriations by Congress; special fund accounts, or funds received under special authorizations of law which are earmarked for some specific purpose; and trust fund accounts, representing money received and held in trust for the benefit of individuals or classes of individuals. The latter are not strictly Government moneys and are shown separately in all tables except No. 196. (See headnote of that table.)

All figures for receipts and expenditures include postal surpluses or deficiencies only; postal revenues other than surplus receipts and postal expenditures payable from postal revenues are shown in table 196.

No. 195.—Receipts and Expenditures of the National Government, by Class of Accounts: 1941 and 1942

Note.—All figures in millions and tenths of millions of dollars. Figures are on the "current cash" basis shown by daily Treasury statements, unrevised; see general note above.

No. 196.—Receipts and Expenditures of the National Government: 1789 to 1942

NOTE.—**In thousands of dollars.** Figures prior to 1916 are on the basis of warrants issued (net); thereafter on the basis of daily Treasury statements (unrevised) except as noted. General, special, and trust accounts are included for 1789 to 1930; trust and related accounts (increment on gold, etc.) are excluded beginning with 1931. For explanation of bases used and of accounts, see general note, p. 194. Expenditures from trust funds, etc., are shown for 1937 to 1941 in table 197.

[1] Surplus or deficit takes into account public debt retirements chargeable against ordinary receipts beginning 1918. See p. 196 for expenditures chargeable against ordinary receipts.

[2] Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years 1921 to 1926; in 1927 to 1941 the 3½ percent salary deductions are included.

[3] Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in miscellaneous receipts.

[4] On basis of warrants issued 1789 to 1930; thereafter, on basis of checks issued.

[5] Average for period Mar. 4, 1789, to Dec. 31, 1800.

[6] Averages are for entire period though there were no amounts under these items for certain years.

[7] Years ended Dec. 31, 1801 to 1842; average for 1841–1850 is for the period Jan. 1, 1841, to June 30, 1850.

[8] Less than $500. [9] Average for 1863 to 1865. [10] Average for 1881 and 1884. [11] One year only, 1895.

[12] After deduction of net appropriations to Federal old-age and survivors insurance trust fund.

[13] Sales of public lands included with miscellaneous receipts; postal revenues and expenditures not available.

[14] Civil expenditures under War and Navy Departments at Washington are included in "Civil and miscellaneous" prior to 1916, thereafter under the War and Navy Departments, respectively. War Department includes expenditures for rivers and harbors and Panama Canal.

[15] On basis of warrants issued from 1789 to 1930; on basis of checks issued 1931 and subsequent years.

[16] Includes only Army and Navy pensions for service prior to World War, and fees of examining surgeons in Pension Bureau, and is exclusive of payments made by the War Risk Insurance Bureau and Veterans' Bureau to veterans of the World War, and salaries under Bureau of Pensions, which are included in civil and miscellaneous expenditures.

[17] On basis of warrants issued prior to 1922. Exclusive of amounts transferred to civil-service retirement and disability fund.

[18] See notes on corresponding periods, p. 195.

[19] See note 6, p. 195.

[20] Excludes interest accounts which are included in trust fund expenditures.

[21] Reflects adjustments by reason of transfer of Coast Guard and other accounts to war activities.

[22] Included in miscellaneous.

No. 198.—Internal Revenue Receipts, by Chief Tax Sources: 1863 to 1942

NOTE.—**All figures in thousands of dollars.** The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 195 to 197 which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thu an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table.

No. 201.—Income Tax Returns, Individual, Estate, and Trust—Summary: 1913 to 1940

Note.—**All money figures in thousands of dollars.** Statistics are based on the taxpayers' returns as filed unaudited except to insure proper execution of the return. Under the revenue laws, individuals are required to file returns as follows: (1) Single or married, for 1913 through 1916, those with net income of $3,000 or over; (2) single, or married and not living with husband or wife, for 1917 through 1924, $1,000 or over; 1925 through 1931, $1,500 or over; 1932 through 1939, $1,000 or over; and for 1940, those with gross income of $800 or over regardless of amount of net income; (3) married and living with husband or wife, filing a joint return, for 1917 through 1923, those with net income of $2,000 or over; 1924, $2,500 or over; 1925 through 1931, $3,500 or over; 1932 through 1939, $2,500 or over; and for 1940, those with gross income of $2,000 or over, regardless of the amount of net income; (4) every individual with gross income of $5,000 or over for 1921 through 1939, and as stated above for 1940. Data for returns showing no net income, filed in accordance with the latter provision, are not included in statistics shown. Fiduciaries are required to file returns on the same basis as single individuals, except that for 1936 and prior years a return is required for every estate or trust of which any beneficiary is a nonresident alien, and for 1938 through 1940 a return is required for every trust having a net income of $100 or over. Partnership net profit or net loss is reported on the individual returns of copartners according to their shares. All income tax data include Alaska, District of Columbia, and Hawaii.

[1] Consists of: (1) for 1923, amount of the 25 percent reduction provided by Revenue Act of 1924, (2) for 1924 through 1931, 25 percent of tax on earned net income, and (3) for 1924 through 1933, 12½ percent on capital net loss from sales of assets held more than 2 years.

[2] Includes war excess-profits taxes of $101,250,000 on individuals and of $103,888,000 on partnerships.

[3] Preliminary figures for 1939 returns filed through June 1940, and for 1940 returns filed through June 1941. Complete figures include additional returns filed to December 31.

[4] Includes alternative tax: 1938, $278,907,000; 1939, $328,532,000; 1939 (prel.) $319,602,000; 1940 (prel.) $536,802,000. The alternative tax is imposed on returns with net long-term capital gain when such alternative tax is less than the sum of the normal tax and surtax computed on net income including net long-term capital gain; and the alternative tax is imposed on returns with net long-term capital loss when such alternative tax is greater than the sum of the normal tax and surtax computed on net income after deducting net long-term capital loss. For 1940 (prel.), includes also $128,418,000 defense tax.

[1] Excludes salaries and wages of the individual, his wife, or dependent minors derived from business conducted by the individual.

[2] Dividends on stock of domestic corporations prior to 1936 and taxable interest on obligations of the United States for all years, received through partnerships and fiduciaries, were reported under their respective source of income. For 1934 through 1937, income of partnerships and fiduciaries includes proportion of net capital gains and losses resulting from sales or exchanges of capital assets through these entities required to be reported under Revenue Acts of 1934 and 1936. For 1938 and 1939 partnership income excludes capital gains; fiduciary income includes capital gains except amounts received through "common trust fund."

[3] Net capital gain or loss on sale of capital assets (regardless of time held) by individuals, estates, and trusts, after certain limitations are applied. For 1934 through 1937, excludes net capital gain or loss on sale of capital assets by partnerships or fiduciaries, which amounts are included in profit (or loss) from partnerships or income from fiduciary. For 1938 and 1939, short-term net capital gain consists of gain on capital assets held 18 months or less, and long-term net capital gain or loss consists of gain or loss on capital assets held over 18 months (short-term net capital loss is not deductible in current year). For 1939, short-term net capital gain is after deduction of prior year net short-term capital loss.

[4] Consists of net gain or loss from sale or exchange of property, used in trade or business of a character which is subject to the allowance for depreciation, which is excluded from capital assets.

[5] On stocks of domestic corporations prior to 1936; includes dividends on stocks of both domestic and foreign corporations for 1936 through 1939, subject to normal tax and surtax.

[6] Excludes amounts reported in business deductions.

[1] For 1934 includes returns of husbands whose wives though living with them file separate returns.
[2] Included in "Joint returns of husbands and wives."
[3] An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income under $5,000, as the net income of one spouse may be $5,000 or over and that of the other spouse under $5,000.
[4] For 1934 returns of estates were distributed according to sex and family relationship of testator or grantor, and returns of property held in trust, according to sex and family relationship of beneficiary or of testator or grantor if status of beneficiary could not be determined.

[1] Includes net capital gain and net capital loss as explained in note 3, table 202.
[2] If not wholly exempt from tax.
[3] Specific exemptions equal or exceed net income.
[4] Consists of (1) returns with no net long-term capital gain or loss and (2) returns with net long-term capital gain or loss, which are subject to normal tax and surtax instead of alternative tax.
[5] The alternative tax is imposed on returns with net long-term capital gain if such alternative tax is less than the sum of the normal tax and surtax computed on net income including net long-term capital gain. The alternative tax is imposed on returns with net long-term capital loss if such alternative tax is greater than the sum of the normal tax and surtax computed on net income after deducting net long-term capital loss.
[6] Less than five-thousandths of 1 percent.

No. 209.—Income Tax Returns, Corporation—Summary: 1911 to 1940

Note.—**All money figures in thousands of dollars.** Statistics are based on taxpayers' returns as filed, unaudited except to insure proper execution of the returns. They include data for Alaska and Hawaii. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, charitable, etc., not operating for profit. Under the Revenue Act of 1934, the privilege of filing consolidated returns, which had formerly been permitted for groups of affiliated corporations, was limited to steam and electric railroad corporations. The Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railway corporations. These changes resulted in marked differences between the industrial and the net-income or deficit classifications of returns for 1934 and subsequent years, and those for 1933 and prior years, and also in the distribution of returns by size-of-assets classes. Tables showing the effect, on the tabulated data, of the discontinuance of the privilege of filing consolidated returns except by railroad corporations, will be found in Statistics of Income for 1934, Part 2. In general, corporations are classified industrially on the one business activity which accounts for the greatest percentage of "Total receipts." Therefore, the industrial groups contain corporations not engaged exclusively in the industries in which they are classified. As a result of the application of the Standard Industrial Classification, the number of major and minor industrial groups for 1938 and subsequent years has been increased over that for 1937, and certain changes have been made in the contents of the groups.

[1] Returns of inactive corporations prior to 1927 are included in those reporting no net income.

[2] For 1935 and prior years, net income or deficit is the amount reported for income tax computation. For 1936 and later years, net income or deficit is the amount reported for (declared value) excess-profits tax computation and includes dividends received on stock of domestic corporations subject to taxation under title 1 of the effective revenue acts, and interest received on certain Government obligations subject to excess-profits tax; and excludes contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts). For 1940, this amount is adjusted by excluding net operating loss deduction.

[3] There was no war-profits or excess-profits tax in effect 1911 through 1916, or 1923 through 1932. The (declared value) excess-profits tax became effective June 30, 1933, under provision of the National Industrial Recovery Act.

[4] Returns showing net income in excess of $5,000 exemption.

[5] Returns showing net income not in excess of $5,000 exemption, or deficit.

[6] Not available.

[7] Receipts for fiscal year ending June 30 of the following year, as reported by Commissioner of Internal Revenue. Figures shown for 1911 and 1912 and $10,671,000 of the amount shown for 1913 are excise tax receipts.

[8] Figures for 1915 contain approximately 32,000 returns which properly belong in 1914.

[9] Includes surtax on undistributed profits according to provision of Revenue Act of 1936.

[10] Includes defense tax.

[1] No income data reported.

[2] For 1929 to 1931 gross income corresponds to total income as reported on face of return, plus "cost of goods sold," and for 1932 to 1939 gross income corresponds to total income as reported on face of return, plus "cost of goods sold" and "cost of operations." For 1934 and 1935 interest on Liberty bonds, etc., has been deducted from gross income as this item was not included in gross income for prior years. Beginning 1936, gross income includes interest received on certain Government obligations which is subject to the excess-profits tax.

[2] See note 2, table 209.

[4] Includes excess-profits tax of $37,540 for 1934 and $19,584 for 1935 on returns with no net income, since credit for interest received on certain obligations of the United States and its instrumentalities is not allowed against net income in the computation of the excess-profits tax.

[5] Includes surtax on undistributed profits.

[1] For definition of net income and deficit, see note 2, table 209.

[2] For historical comparison the 1938 and 1939 data are adjusted by transferring certain minor groups from the classification in which they are tabulated in tables 213 and 215 to the classification in which they were tabulated for 1937 in this table.

[3] For historical comparison there are inserted additional data for 1937 adjusted by transferring certain minor groups from the classification in which they were tabulated for 1937 in this table to the classification in which they would have been tabulated had the classification for 1938 been used.

[4] "Food products" includes "Liquors and beverages," for 1932.

[5] "Textile-mill products" includes "Clothing and apparel," for years prior to 1936.

[1] See note 2, table 209.

[2] "Total compiled receipts" is shown in place of "Gross income" (used in 1938 and earlier years). "Total compiled receipts" corresponds to "Total income" as reported on the face of the return, after transferring to deductions the negative items of income reported under sources of income, and adding "Cost of goods sold," "Cost of operations," and "Wholly tax-exempt interest on Government obligations." "Total compiled receipts" is greater than "Gross income" only by the amount of wholly tax-exempt interest on Government obligations.

[3] Includes income tax and (declared value) excess-profits tax.

[4] Less than $500.

[5] Consists of corporations which at any time during the taxable year owned 50 percent or more of the voting stock of another corporation and whose income from such stock was 50 percent or more of the amount of dividends received.

[6] Consists of corporations (other than investment trusts and investment companies) which (a) at no time during the taxable year owned 50 percent or more of the voting stock of another corporation or (b) at any time during the taxable year owned 50 percent or more of the voting stock of another corporation but whose income from such stock was less than 50 percent of the amount of dividends received.

[1] Excludes nontaxable income, other than interest on wholly tax-exempt obligations for all years and dividends on stock of domestic corporations prior to 1936. (See note 6 below.)

[2] Where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

[3] Where inventories are not an income-determining factor. Figures for years prior to 1932 represent gross profits from operations other than trade and manufacturing. For 1926, 1927, and 1928, such profits for corporations classified under "Transportation and other public utilities," "Service," "Finance," and "Nature of business not given" were included in "Other receipts."

[4] Includes interest on obligations of States and Territories and minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States and its possessions, and beginning 1936 certain obligations subject to excess-profits tax.

[5] Included in "Other deductions" prior to 1933.

[6] Beginning 1936 "Dividends from domestic corporations" are taxable income tabulated with "Other receipts."

[7] These figures are affected by the inclusion in deductions of contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

[8] Other than income and excess-profits taxes and taxes reported under "Cost of goods sold" and "Cost of operations."

[9] Compiled receipts less compiled deductions.

[10] See note 2, table 209.

[11] Deducted by corporations reporting net income.

[12] Includes (declared value) excess-profits tax for 1933 through 1939, and for 1936, 1937, and 1938, surtax on undistributed profits.

[13] Excludes dividends of life-insurance companies prior to 1928.

[14] Deficit.

[1] Includes corporations not reporting nature of business, but excludes inactive corporations.
[2] Excludes nontaxable income other than interest on tax-exempt obligations.
[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Deductions."
[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations," see "Deductions."
[5] Less than $50,000.
[6] Net capital gain or loss is the amount from the sales or exchanges of capital assets (excluding property used in trade or business of a character which is subject to the allowance for depreciation). The deduction for "Net capital loss" (excess of capital losses over capital gains) cannot exceed $2,000. This limitation does not apply to certain losses of banks and trust companies.
[7] Consists of net gain or loss from property used in trade or business of a character subject to the allowance for depreciation.
[8] Consists of interest on United States savings bonds and Treasury bonds owned in principal amount over $5,000.

[9] Consists of interest on obligations of States, Territories, or political subdivisions thereof, the District of Columbia, and United States possessions; obligations of the United States issued on or before Sept. 1, 1917, Treasury notes, Treasury bills, and Treasury certificates of indebtedness; United States savings bonds and Treasury bonds owned in principal amount of $5,000 or less; and obligations of instrumentalities of the United States.

[10] Includes taxes which are reported in "Cost of goods sold."

[11] Includes taxes which are reported in "Cost of operations."

[12] Excludes (1) Federal income and excess-profits taxes, (2) taxes reported in "Cost of goods sold" and "Cost of operations," and (3) income and profits taxes paid to foreign countries and United States possessions if any portion thereof is claimed as a credit against income tax.

[13] Limited to 5 percent of net income before deduction of contributions or gifts.

[14] Deficit.

[15] "Net income" or "Deficit" is the amount reported for (declared value) excess-profits tax computation. (See note 2, table 209.)

[10] Includes taxes which are reported in "Cost of goods sold."
[11] Includes taxes which are reported in "Cost of operations."
[12] Excludes (1) Federal income and excess-profits taxes, (2) taxes reported in "Cost of goods sold" and "Cost of operations," and (3) income and profits taxes paid to foreign countries and United States possessions if any portion thereof is claimed as a credit against income tax.
[13] Limited to 5 percent of net income before deduction of contributions or gifts.
[14] Deficit.
[15] "Net income" or "Deficit" is the amount reported for (declared value) excess-profits tax computation. (See note 2, table 209.)
[16] Consists of corporations which at any time during the taxable year owned 50 percent or more of the voting stock of another corporation and whose income from such stock was 50 percent or more of the amount of dividends received.
[17] Consists of corporations (other than investment trusts and investment companies) which (a) at no time during the taxable year owned 50 percent or more of the voting stock of another corporation or (b) at any time during the taxable year owned 50 percent or more of the voting stock of another corporation but whose income from such stock was less than 50 percent of the amount of dividends received.

No. 216.—Gross Income of Corporations, by Industrial Groups: 1932 to 1939

NOTE.—In millions of dollars. For 1932 to 1935 gross income excludes nontaxable income, except dividends on capital stock of domestic corporations, but includes receipts from all other sources. For 1936 to 1939 gross income includes interest on certain Government obligations subject to excess-profits tax, and dividends, which, unlike former years, are taxable. Sales are included on gross basis, but only net profits from the sale of capital assets are included. See also headnote, table 209.

[1] Excludes inactive corporations.
[2] Cash in till and deposits in banks.
[3] Less reserve for bad debts. Includes loans and discounts of banks.
[4] Includes obligations of States and Territories and minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States and its possessions, and beginning 1936, certain obligations subject to excess-profits tax.
[5] For balance sheets in which common and preferred stock are not reported separately, the combined amount is tabulated as "Common stock." For balance sheets with no par stock and not reporting capital stock value, the net worth is tabulated under "Surplus and undivided profits."
[6] Beginning 1937, excludes "Surplus reserves."
[7] Includes "Surplus reserves," "Paid-in or capital surplus," and "Earned surplus and undivided profits." If one or more of these amounts are negative, they are tabulated as "Deficit" and the remaining positive items are tabulated as "Surplus and undivided profits." Prior to 1937 the net amount of "Surplus and undivided profits" or "Deficit" was tabulated from each return.
[8] Consists of negative amounts for "Paid-in or capital surplus" and "Earned surplus and undivided profits."

No. 221.—Estate Tax Returns, Federal—Summary: 1916 to 1940

NOTE.—**All money figures in thousands of dollars.** Under the various revenue acts, returns are required for the estate of: (1) every citizen or resident alien who died (a) prior to February 26, 1926, or in the period June 6, 1932 through August 30, 1935, if gross estate exceeds $50,000; (b) in the period February 26, 1926 through June 5, 1932, if gross estate exceeds $100,000; and (c) on or after August 31, 1935, if gross estate exceeds $40,000; (2) every nonresident alien any part of whose estate is situated in the United States at date of death. Estates of individuals dying on or after June 6, 1932, are subject to two taxes, a basic tax levied under the Revenue Act of 1926 or the Internal Revenue Code or either as amended and an additional tax levied under the Act of 1932 or that Act as amended, or the Internal Revenue Code.

[1] Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.
[2] Includes returns for estates of nonresident citizens who died prior to May 11, 1934.
[3] The net taxable estate for individuals who died after 5 p. m. June 6, 1932, is net estate subject to the additional tax under the Revenue Act of 1932 or that Act as amended, or the Internal Revenue Code. The tax is the net basic tax under the Revenue Act of 1926, or the Internal Revenue Code, or either, as amended, plus the net additional tax under the Revenue Act of 1932 or that Act as amended, or the Internal Revenue Code, and, for 1940, includes the defense tax.

[1] See note 1, table 221. [2] Basis for net estate classes is amount of net estate used in computing additional tax before deducting specific exemption of $40,000.

[3] Specific exemption allowed under act of 1924 and prior acts is $50,000; act of 1926, $100,000. Specific exemption allowed for computing additional tax under act of 1932 and act of 1932 as amended by 1934, $50,000; and act of 1932 as amended by 1935 and subsequent acts, $40,000.

[4] For 1937 the deduction tabulated is that computed under 1926 act; for subsequent years the deduction tabulated is that used for computing additional tax, except in the case of individuals who died prior to June 6, 1932.

[5] Less than $500.

[6] Credits for (1) estate, inheritance, legacy, or succession taxes paid to States, Territories, or District of Columbia, or if death occurred on or after June 30, 1939, U. S. possessions, and (2) gift taxes paid to the Federal Government.

[1] Excludes payments from funds received from other public units; includes payments to other public units.

[2] Includes grants, shared revenues, loans, and payment of debt services; excludes W. P. A. and similar indirect aids.

[3] To observe a common basis for reporting all governmental levels, the U. S. Treasury statistics for expenditures were adjusted by the following three additions: (1) $287,000,000 for the Agriculture and Treasury Departments resulting from the showing of total costs instead of net expenditures, (2) $61,000,000 for railroad unemployment insurance, and (3) $711,000,000 for old-age and survivors insurance.

[4] Total amounts are decreased by $203,000,000, the amount of unspecified Federal and State aid to local governments.

[5] Excludes payments to other public units; includes payments from funds received from other public units.

[6] State $3,000,000 and local $9,000,000.

[7] State $2,000,000 and local $22,000,000.

[5] It is estimated that of the total, $245 million was collected from individual incomes and the balance from corporation net incomes.

[6] Includes general and selective property taxes.

[7] Amounts deposited with the Federal Treasury in State clearing accounts during the fiscal year, as reported by State agencies to the Social Security Board.

[8] Includes alcoholic beverage business-license taxes.

[9] The following taxes are reported on a 12 months basis other than New Jersey's fiscal year which closes June 30: motor fuels, motor-vehicle licenses, motor-vehicle operators' licenses, general property tax, and selective property (railroad) tax.

No. 239.—Assessed Valuation of Property Subject to General and Selective Property Taxes, by States: 1932 and 1940

Note.—In millions of dollars. Valuation reported is the total that was subject to general and selective property taxes for the State and local units within the State. The proportion of the total valuation that was taxed by local government units, and the rates of taxation thereon, varied widely according to State and local legislation. Figures do not show the relative wealth of the several States, owing to differences in the bases of assessment and practices thereunder.

[1] Includes only property given a separate classification by the States and not included with real or personal; in a small number of States, however, property of the same character as that included under this heading is classified as either real or personal.
[2] Exclusive of valuation of motor vehicles which is not available.
[3] Valuation of personal property included with that of real property.
[4] Taxable valuation which represents varying percentages of assessed valuation.
[5] Taxable valuation which represents 50 percent of assessed valuation.
[6] Valuation of "intangibles" upon which a selective tax is levied is not available.
[7] Includes valuation of foreign nonpublic utility, and public utility corporations assessed for State purposes on a basis of 100 percent of valuation.

[1] The grand total revenue and the total State and local revenue for each State are in each case less than the sum of State and local revenues by the amount of State aid to local units and local aid to States. These internal aids are excluded to avoid the inflation of total revenues.

[2] The grand total of fiscal aid consists of Federal aid to State and local governments and is not the sum of Federal, State, and local aids. Similarly, the aggregate aid to State and local governments in each State consists of Federal aid to State and local governments, and is exclusive of the internal aids among governments within a State.

[3] Less than $50,000.

No. 251.—Employees and Pay Rolls of State and Local Governments, by Type of Governmental Unit, by States: January 1942

Note.—Figures in this table include employees of public-service enterprises but exclude persons on work relief and employees of contractors and schools (except administrative employees of State departments of education). Both permanent and temporary employees are included. Numbers of part-time employees are not reduced to a full-time equivalent. Figures are estimates based on reports received from officials of State and local governmental units. For indexes of trends in State and local government employment and pay rolls, see table 250.

No. 258.—Tax Levies—Total Levies of General Property Taxes of State and Local Governments, by States: 1880 to 1932

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, boroughs, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1860, 1870, and 1890, by States, see table 437, Statistical Abstract of 1922.

No. 261.—Money—Stock, by Kind: 1860 to 1942

Note.—Amounts in thousands of dollars. Figures prior to 1890 were revised in 1925 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver for those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude gold earmarked for foreign account.

[1] The totals involve a duplication to the extent that United States notes, Federal Reserve notes, Federal Reserve bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

[2] By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. The value of gold is therefore based on $35 per fine ounce beginning June 1934; theretofore, it is based on $20.67 per fine ounce.

[3] There has been no fractional currency in actual circulation to any extent since 1878.

[4] Silver bullion in Treasury.

[5] Includes silver bullion as follows: June 30, 1934, $1,560,000; June 30, 1935, $313,309,000; June 30, 1936, $708,211,000; June 30, 1937, $835,196,000; June 30, 1938, $1,037,163,000; June 30, 1939, $1,230,586,000; June 30, 1940, $1,353,162,000; Dec. 31, 1940, $1,398,091,000; June 30, 1941, $1,435,909,000; Dec. 31, 1941, $1,476,106,000; June 30, 1942, $1,505,844,000.

[1] Gold and silver certificates and Treasury notes of 1890 are excluded before combining money outside of the Treasury with money in the Treasury in order to avoid duplication, since the gold and silver held in Treasury as security against these currencies is included. See also notes 1 and 2, table 261.

[2] Both of these items include also reserve against Treasury notes of 1890.

[3] See note 1, table 260.

[4] Includes total stock of silver dollars and subsidiary silver.

[5] Gold certificates. This amount is not included in the total since the gold held as security against the gold certificates is included in the column, "In trust against gold and silver certificates."

[1] Prior to Dec. 31, 1935, excludes balances with private banks to the extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which, on that date, amounted to $62,000,000 and which, prior to that time, were reported in "Other assets."

[2] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

[3] Aggregate book value of capital stock, capital notes and debentures, surplus, undivided profits, reserves for contingencies, etc.

[4] Postal savings included in time deposits.

[5] Beginning 1933, figures relate to licensed banks only.

[6] Includes United States Treasurer's time deposits, open account.

[7] Central reserve city banks only.

[1] Figures for loans and investments beginning Dec. 31, 1938, are not entirely comparable with prior call dates because investments and other assets (principally loans) indirectly representing bank premises and other real estate are no longer included in loans and investments but are now reported separately. Such investments and other assets amounted to $94,569,000 and $49,939,000, respectively, on Dec. 31, 1938.
[2] Not reported separately where no figures are shown.
[3] Figures prior to Dec. 31, 1938, represent all loans on securities, except loans to banks and to brokers and dealers.
[4] This is a residual item and, because of revised loan classification beginning Dec. 31, 1938, the residual amounts are not comparable.
[5] Corporate stocks of foreign corporations were reported in combination with bonds, notes, and debentures prior to Dec 31, 1938.

[1] Date of reports of member banks; figures for nonmember banks as of nearest available date.
[2] Exclusive of interbank deposits, with following exceptions: For dates prior to Dec. 30, 1933, member-bank figures include interbank deposits not subject to immediate withdrawal, which aggregated $103,000,000 on that date; nonmember-bank figures prior to June 1940 include interbank deposits to the extent (estimated at $150,000,000 for June 30, 1937, but since reduced to probably a small amount) that they were not reported separately in a few State bank abstracts.
[3] Beginning June 30, 1933, all figures, except for mutual savings banks, relate to licensed banks only, with some exceptions as to nonmember banks.

No. 282.—All Active Banks—Principal Assets and Liabilities, by Class of Banks: 1840 to 1941

Note.—Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands, and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam, and American Samoa. Data are as of June 30 or about June 30 except data for the earlier years for banks other than national, for which reports were of various dates. Figures for banks other than national for the earlier years, especially through 1885, are incomplete. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years; since 1926 only one is included. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935, they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933.

[1] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.

[2] Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.

[3] Includes lawful reserve, exchanges for clearing house, and all cash items except for 1936 to 1941, for which years, cash items not in process of collection are excluded.

[4] Includes reserve accounts, and for banks other than national for 1934 to 1941, capital notes and debentures. Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.

[5] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.

[6] Includes postal savings. [7] Capital only. [8] Includes capital only for banks other than national.

[9] Figures for State banks, except number of banks and capital, estimated. [10] Licensed banks only.

[11] U. S. Government securities only. [12] Includes State bank circulation outstanding.

[13] Includes loan and trust companies and, with some exceptions (see headnote), stock savings banks.

[14] Figures given under capital, surplus, etc., represent surplus and undivided profits, including reserves, except that they include capital for any stock savings banks included (see headnote).

No. 291.—Savings Banks—Number of Depositors and Amount of Savings Deposits, Continental United States: 1820 to 1910

Note.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 292.

[1] Includes deposits evidenced by savings passbooks, time certificates of deposit payable in 30 days or over-time deposits, open account, postal savings redeposited in banks, and, for some States, Christmas savings and similar accounts.

[2] Includes State, stock savings, and private banks and trust companies.

[3] Combined data for other than national banks included in total.

[4] For data for 1910 and earlier years from reports of the Comptroller of Currency, see table 291.

[5] Not available.

[6] Figures include depositors for State-chartered banks in States which did not previously report depositors as follows (figures in parentheses are the number of depositors for the first year the given States reported): Beginning 1928, Ohio and Idaho (2,376,000 depositors); beginning 1931, Missouri (623,000 depositors); beginning 1932, Colorado (50,000 depositors); and beginning 1934, Indiana (286,000 depositors).

[7] Represents the number of savings passbook accounts.

[1] Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of $1,942,574,000, and 225 State bank members with deposits of $925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of $1,818,541,000, 152 unlicensed State member banks with deposits of $842,982,000, and 2,938 unlicensed nonmember banks with deposits of $1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 985 unlicensed national banks with deposits of $1,028,347,000, 114 State member banks with deposits of $239,268,000, and 1,983 nonmember banks with deposits of $1,063,984,000 to be rehabilitated and reopened or to be placed in liquidation or receivership. All such banks are treated as suspensions.

[2] Includes 8 insured nonmember banks in 1934, 22 in 1935, 40 in 1936, 47 in 1937, 47 in 1938, 25 in 1939, 18 in 1940, and 3 in 1941, with deposits of $1,912,000, $3,763,000, $10,207,000, $10,156,000, $11,721,000, $6,589,000, $5,341,000, and $503,000, respectively. Federal deposit insurance became operative Jan. 1, 1934.

[1] The number of borrowers receiving original loans from the HOLC was 1,017,822. The larger number of accounts noted here results chiefly from the division of properties on which loans were made. Figures on original applications and loans granted can be found in the Statistical Abstract for 1940 and previous years.

[1] Negligible proportion of liquidating associations included in years 1922 to 1936.
[2] Pledged shares estimated and deducted from reported assets.
[3] Years 1922 to 1924 estimated at 90 percent of reported assets. Years 1933 to 1941 include accrued receivables consisting principally of interest on mortgage loans.
[4] Estimated; figures prior to 1936, by projection of sample data with 1 percent of reported assets deducted for office building.
[5] For years 1922 to 1935 estimated by projection of sample reported by State supervisors; and for 1936 to 1941 estimated from a large sample of monthly reports.

No. 317.—Federal Housing Administration—Yearly Volume of Business Transacted: 1934–1941

NOTE.—**Amounts in thousands of dollars.** The program of providing insurance for long-term mortgages on individual homes and on large-scale rental projects and for short-term character loans for property improvement is carried on by FHA under provisions of National Housing Act and its amendments. FHA lends no money but provides insurance for loans made by banks and other private lending institutions. Title VI, sec. 603, amendment of Mar. 28, 1941, authorized FHA to insure mortgages on small homes constructed to meet urgent needs of workers in defense areas. A separate Defense Housing Insurance Fund was established under Title VI in order that holders of these mortgages might enjoy benefits of FHA mortgage insurance without affecting interest of mortgagors in Mutual Mortgage Insurance Fund provided under Title II.

[1] In obtaining totals in this column adjustments were made to avoid duplication arising from the fact that production credit associations and banks for cooperatives borrow from and rediscount loans with the Federal intermediate credit banks.

[2] Includes outstanding loans of associations which have been placed in liquidation.

[1] Less payments on principal and principal of delinquent and extended installments.
[2] Less amounts sold under repurchase agreements.
[3] Unmatured. Figures for 1933 include $142,118,000 of bonds issued to the Reconstruction Finance Corporation.
[4] Owned by national farm loan associations and individual borrowers.
[5] Not including special reserves set up against particular assets.
[6] Less impairment or deficit. The decrease in reserves and undivided profits for 1934 resulted largely from a change in accounting procedures. Includes earned surplus beginning with 1937.
[7] Includes claims not yet paid: $3,054,000 for 1934, $2,719,000 for 1935, $6,094,000 for 1936, $3,621,000 for 1937, $881,000 for 1938, $186,000 for 1939, $428,000 for 1940, and $154,000 for 1941.

No. 335.—Bank Clearings for Leading Cities: 1924 to 1941

NOTE.—**In millions of dollars.** Cities are listed in order of importance according to clearings in 1941. No figures are given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by the tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (tables 336 and 337) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1882 to 1920, and for figures for 146 identical cities, 1920 to 1936, see table 293, Statistical Abstract, 1937.

No. 343.—Fire Losses, Total and Per Capita, Continental United States: 1876 to 1941

NOTE.—Amounts, except per capita, in thousands of dollars. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter.

No. 348.—Life Insurance Written and in Force, by States: 1939 and 1940

Note.—Figures cover business transacted in continental United States, including United States business of Canadian companies. They include data for some small companies which confine their business to the State in which they domicile, and usually to several small cities, which are not included in tables 344 to 347. Further differences between totals in this table and in the preceding tables are due to duplications from reinsurance.

No. 349.—Life Insurance of Fraternal Orders in the United States

Note.—Although the number of orders reporting varies considerably, most of the larger orders report regularly, so that the figures are fairly comparable from year to year. Prior to 1920 the figures for the number of orders as given below include all known to be in existence whether reporting or not.

[All money figures in millions and tenths of millions of dollars]

Calendar year	Number of orders	Assets	Income		Disbursements			Amount of insurance written during year	In force at end of year

[1] Total premium receipts prior to 1910.

[2] Figures for 1895 to 1930 (also 1932 figures in italics) include adjustment expenses excluded thereafter.

[3] Including taxes.

[4] Figures through 1930, and 1932 figures in italics, include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1932 to 1940, except 1932 italic figures, relate to casualty, surety, and miscellaneous insurance companies only.

[5] Number of companies reporting.

[6] See note 4.

[7] Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocals, and Lloyd's; number of companies and income and disbursement items also include accident and health departments of life insurance companies.

No. 354.—Insurance Carriers and Insurance Agencies and Brokerage Offices—Number of Offices, Personnel, and Pay Roll, by Type of Insurance, for the United States: 1935

Note.—Carriers include all types of insurance coverage except title insurance and the guarantee of mortgages. Each carrier is considered as having only one home office. Insurance agencies and brokerage offices include insurance agencies, subagencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyds Associations and for reciprocal exchanges; and underwriter agencies. Classifications by kind of insurance in the case of multiple line companies submitting a consolidated report are based on the kind of insurance from which the major portion of the business is derived.

No. 366.—Profits and Dividends of Industrial Corporations: 1929 to 1942

Note.—Data for the group of 629 companies, compiled quarterly, are available only beginning 1939; earlier data shown for 488 of these companies and for the group of 152 companies are available only on an annual basis. Annual data include reports for fiscal years ended between July 1 of specified year through June 30 of the following year. To a considerable extent, total profits of the 629 corporations represent very large concerns, as no data are included for companies with assets under $250,000, and there is a very limited representation of companies with assets between $250,000 and $5,000,000. No data are included for some important nondurable goods industries, such as meat packing, sugar refining, and rubber. Net profits are before dividends and after all charges, including depreciation, interest, special reserves charged as expenses, and all taxes. Aggregate dollar dividends are reported quarterly by only a few companies and for most of the companies for which these data are shown, dividends were computed for each class of stock on the basis of dividends per share and number of shares outstanding. (These data have been substituted for data on quarterly profits of 167 industrial companies compiled by the Federal Reserve Bank of New York, which have been formerly included in the Abstract. For net profits of all corporations as compiled from income-tax returns, see tables 214 and 215, pages 223 and 224.)

No. 367.—Capital Issues—Summary, by Classes: 1923 to 1941

NOTE.—**In millions and tenths of millions of dollars.** Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1917 and 1918 all stocks are included at their market value. Corporate issues for 1917 and 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than $100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies.

No. 371.—Industrial and Commercial Failures—Number and Liabilities, by Months: 1938 to 1942

Note.—**Liabilities in thousands of dollars.** Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public.

12. INCOME, EXPENDITURES, AND DEBT

[Data in this section relate to continental United States]

No. 375.—National Income and Shares Transferred by Enterprises: 1929 to 1941

NOTE.—National income is the measure of the value of net output of commodities and services produced by private and public enterprises of the economy. It includes economic activities carried on by all producing entities—corporations, partnerships, individual enterprises, and governmental agencies. Value of materials and supplies and of plant and equipment consumed in process of production is deducted from gross value of goods and services produced in order to obtain value of net production. The net product is represented by returns in the form of salaries and wages, net income of business enterprises, interest, and rents and royalties. Corporate savings (positive and negative) represent net profits after deduction of cash dividends and taxes.

No. 377.—National Income by Industrial Divisions: 1929 to 1941

Note.—Data on dividends, interest, and corporate savings by industrial divisions for 1934 (omitted here) and for subsequent years are based on a different industrial classification than are the estimates of these items for earlier years because of a change in the Revenue Act of 1934. Special tabulations of the Bureau of Internal Revenue permitted the making of estimates for 1934 on the earlier basis. For specific items in certain industries the variations are substantial, but for total income the changes were small. The 2 estimates were averaged in compiling this table.

No. 379.—Income Payments to Individuals, by States: 1929 to 1941

Note.—Income payments to individuals comprise (1) salaries and wages net of pay-roll deductions for social insurance, (2) other labor income such as pensions, compensation for injuries, direct and work relief and social insurance benefits, (3) net earnings, before owner's withdrawals, of unincorporated businesses (including farmers), and (4) dividends, interest, and net rents and royalties received by individuals. The total of income payments differs from national income in tables 375 to 377, principally by the exclusion of retained earnings of corporations from the former aggregate and their inclusion in the latter. Other differences relate to the handling of social insurance pay-roll deductions and benefits and such transfer items as direct relief and adjusted-service certificates (the Soldiers' Bonus).

No. 380.—Wage or Salary Income and Receipt of Other Income in 1939, for Wage or Salary Workers in March 1940 (Except Those on Public Emergency Work), by Sex, for the United States

Note.—Wage or salary income includes all money received in 1939 in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, etc., as well as receipts commonly referred to as wages or salaries. The value of income received in kind, such as living quarters, meals, clothing, etc., is not included. Persons were classified as with or without other income on the basis of their answers to an inquiry as to whether $50 or more of income was received from sources other than money wages or salaries in 1939. Statistics in this table and tables 381 to 383 are based on a tabulation of a 5 percent cross section of the population enumerated in the 1940 Census. Analysis of the statistics based on the sample tabulation indicates that in 95 percent of the cases the sample statistics differ from the complete census statistics by less than 5 per cent for all numbers of 10,000 or more, by less than 10 percent for numbers between 5,000 and 10,000, and by less than 20 percent for numbers between 2,000 and 5,000. Somewhat larger variations may be expected in numbers below 2,000.

[1] Includes number not reporting on wage or salary income, not shown separately.

[2] The median wage or salary income is based on the number of persons with one dollar or more of wage or salary income in 1939. The median was calculated on the basis of the detailed wage or salary intervals shown in table 380. For definition of median, see note 1, table 22, p. 22.

No. 384.—Consumer Incomes—Distribution of Families and Single Individuals and of Aggregate Income Received, by Income Level:[1] 1935–36

Note.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases, a Works Progress Administration project conducted by the Bureau of Home Economics and the Bureau of Labor Statistics in cooperation with the National Resources Committee and the Central Statistical Board. Findings of that study were supplemented by income tax statistics and by other sample data on family and individual incomes.

[1] The estimates cover all consumers with the exception of 2,000,000 persons living in institutions or quasi-institutional groups. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families. Income includes the total net money income received during the year by all members of the economic family plus the value of certain items of nonmoney income, such as the occupancy of an owned home and food produced by rural families for their own use. The estimates apply to the 12-month period from July 1935 through June 1936.

No. 385.—Consumer Expenditures—Aggregate and Average Outlay of Families and Single Individuals for Consumption, Gifts and Personal Taxes, and Savings, by Income Level: 1935–36

Note.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases (see headnote, table 384), supplemented by data from various other sources. The estimates apply to the 12-month period from July 1935 through June 1936, and cover all families and single individuals in the United States. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families.

[1] Excludes residents in institutional groups.

[2] Includes the total net money income received during the year by all members of the economic family and by single individuals, plus the imputed value of the following nonmoney items: Occupancy of owned homes, rented farm homes, and rent-free homes; food produced by rural families for their own use; fuel and ice obtained free by farm families.

[3] Includes, in addition to goods and services purchased during the year, the imputed value of the nonmoney items mentioned in note 2. All purchases of durable consumer goods, except payments on homes and improvements to homes, are considered current expenditures for the year. Automobile expenditures cover purchase and operating costs for family and personal use only, excluding costs chargeable to business use.

[4] Gifts include gifts made to persons outside the economic family, to churches and other religious organizations, and to welfare agencies. Taxes cover only personal income taxes, poll taxes, and certain minor personal property taxes. Taxes on automobiles and on owned homes, and sales and excise taxes are included in consumption expenditures. Business taxes and taxes on income-producing property were deducted in calculating net income.

[5] These estimates represent net changes in family and personal assets or liabilities, exclusive of gains or losses from revaluation of assets. At the lower income levels they appear as average net deficits for the year, the surpluses of some families in the income group being more than offset by the deficits of other families.

No. 388.—Net Debt in the United States: 1929 to 1941

Note.—Net public and private debt is a comprehensive estimate of the outstanding indebtedness of final borrowers in the United States rather than a measure of total debt. To obtain the net debt figures estimates of gross or total debt are corrected for debts issued by but held within units having economic coalescense. Four such units are distinguished (a) the Federal Government and its corporations and agencies, (b) combined State and local governments, (c) individual corporate systems, and (d) individual business establishments or persons. This selection of units means that the gross debt estimates are adjusted for (1) debts outstanding against a unit but held within that same unit in sinking, trust, or investment funds, (2) debts of intermediary financial institutions such as banks, insurance companies, and Federal agencies, and (3) for intercorporate debts internal to corporate systems under a single management. Under correction (2) bank deposits and liabilities of life insurance companies to policyholders were excluded and the intergovernmental debts of the United States Government and its corporations and agencies were eliminated by consolidating the Federal accounts. Loans receivable by Federal agencies were also deducted from the gross Federal debt since this debt is intermediary and duplicates private debts arising from these same advances by Federal agencies. The net debt figures give a more significant picture of trends in the debt structure than the crude gross debt estimates. The figures represent, in the main, balances of loans outstanding at the end of calendar years, corrections having been made wherever figures are reported by fiscal years not corresponding to calendar years.

No. 391.—Estimated National Wealth of the United States—Total, 1850 to 1922, and by Classes of Property, 1900 to 1922

Note.—Estimates of national wealth for the earlier censuses were not made by precisely the same methods used more recently and are not closely comparable. Changes in buying power of money, as indicated by levels of prices and wages, materially affect the comparisons. For distribution of principal classes of property by States for 1912 and 1922, see Statistical Abstract, 1932, table 275. There have been no official estimates of wealth since 1922

No. 392.—Wealth—Estimated Value of All Tangible Property Situated in Each Geographic Division and State: 1890 to 1922

NOTE.—See headnote, table 391. This table shows, not the value of property owned by the citizens of each State, but that of the physical property lying in each State wherever the securities or other evidences of title representing it may be found or owned. The per capita figures thus do not represent the average wealth of the citizens of each State

[1] Total differs from estimate as published in 1912 because of revision of estimate for taxed real property in Oklahoma. Includes $402,000,000 value of ships belonging to the United States Navy and $290,000,000 value of privately owned water-supply systems not distributed by States. Items for geographic divisions and States differ from estimate as published in 1912 because of redistribution of railroad values in accordance with the method employed in 1922.

[2] Total includes $1,446,000,000 value of ships belonging to the United States Navy, $361,000,000 privately owned water-supply systems, and $4,278,000,000 gold and silver coin and bullion not distributed by States.

[3] Includes Indian Territory.

13. PRICES

GENERAL NOTE.—The wholesale-price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926, 813 beginning January 1938, 863 beginning March 1940, 887 beginning October 1940, and 889 beginning January 1941; a smaller number of commodities was covered in earlier years. The price of each article is weighted by the approximate quantity marketed during a period approximating that covered by the index. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The retail-food-cost indexes presented in this section for periods beginning January 1935 are revised indexes based on the distribution of expenditures as shown by the 1934–36 study made by the Bureau of Labor Statistics of expenditures of wage earners' and lower salaried workers' families. Differences in changes in retail-food costs as shown by the revised, as compared with the unrevised, data are due largely to the relatively greater importance of citrus fruits and green vegetables and the lesser importance of cereals, potatoes, and apples in the revised index. The revised indexes are computed from prices of 54 foods. Aggregate costs of 54 foods in each of 51 cities, weighted to represent total purchases, have been combined for the United States with the use of population weights. In accordance with a recommendation of the Central Statistical Board, Bureau of the Budget, an average of the years 1935–39 is being used as a base in presenting these revised indexes of food costs. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

The farm-price index is based on prices paid to producers for 34 major crops and 13 commercial truck crops. Average quotations for the period August 1909–July 1914 are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1924 to 1929.

No. 398.—Prices, Wholesale—Indexes, All Commodities and by Economic Classes: 1916 to 1942

Note.—Figures in boxes indicate number of quotations. Indexes of the National Bureau of Economic Research for 1916 to 1928 are unweighted geometric means for approximately 490 commodities (converted from a 1913 base to a 1929 base by the Bureau of Foreign and Domestic Commerce); for subsequent years they are weighted arithmetic means for 680 price series, the weights being based upon the average value of production in 1927 and 1931. For method of computing the Department of Labor index, see general note, p. 371. For Department of Labor publications in which data appear, see source note, table 396.

[1] Formerly "Finished products."
[2] Perishable and semidurable.
[3] Effective January 1941. In earlier years a smaller number of commodities was included.
[4] Number of quotations used beginning 1929; see headnote regarding earlier years. The sum of the number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 399.—Cost of Goods Purchased by Wage Earners and Lower-Salaried Workers in 34 Large Cities Combined—Indexes: 1913 to 1942

Note.—1935–39=100. Figures for food represent 51 cities since June 1920 and a smaller number in earlier years; other figures, 19 cities from 1913 to 1917, 32 cities from 1918 to 1934, 33 cities from 1935 through September 15, 1940, and 34 cities thereafter. Totals from 1913 to 1924 are weighted by relative importance of items as ascertained by country-wide study of family expenditures in 1917–19. Totals from 1930 to date are weighted by relative importance of items as ascertained by a study of family expenditures in 1934–36. Totals for the intervening years, 1925 through 1929, are weighted by an average of the 1917–19 and the 1934–36 expenditure data. Except for 1913, the annual average indexes for items other than food are estimates based on indexes compiled as of particular dates at irregular intervals shown in previous issues of this publication. They represent weighted averages of indexes for each pricing period affecting the year. For example, where goods were priced in June and December, the indexes for December of the previous year were considered in arriving at the average of the year. The annual average food index is based on monthly indexes.

No. 404.—Unit Values, Annual Average, of Important Articles Imported: 1910 to 1940

Note.—The values are required by law to represent the values of the goods *in the foreign markets* whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly. Data for 1940 are the latest available for publication.

14. WAGES, HOURS OF LABOR, AND EMPLOYMENT

[Data in this section relate to continental United States, except as noted. For data relating to hours of labor, wages, and employment shown in other sections, consult the index]

No. 406.—Hours and Earnings, Average, in Selected Manufacturing Industries: 1937 to 1941

Note.—The averages in this table are based on monthly data supplied by representative establishments in the respective industries. As the number of such establishments varies slightly from month to month, the averages for different years are not in all cases strictly comparable; but the reporting "samples" are, in general, large enough to be representative of the industries. The average weekly earnings do not represent full-time earnings, inasmuch as the data from which they are computed cover both full-time and part-time workers. The average weekly hours and average hourly earnings are derived from somewhat smaller samples than the average weekly earnings, and therefore the product obtained by multiplying the hours by the hourly earnings is not identical with the average weekly earnings.

No. 407.—Earnings, Average Weekly, in Manufacturing Industries; Cost of Living; Weekly Earnings Adjusted to Cost of Living—Indexes: 1924 to 1941

Note.—1923–25 average=100.0. The index numbers of average weekly earnings in this table are derived from the employment and pay-roll indexes shown in table 411. The index numbers of cost of living are those shown in table 399, p. 377, converted to the 1923–25 base. The significance of changes in average earnings is affected by such considerations as labor productivity, labor cost per unit of output, labor turnover, and wholesale prices. Such qualifying data are embodied in detailed reports of the Bureau of Labor Statistics.

[1] Figures for 1937 include corporation officers, executives, and other strictly supervisory personnel. Hours and earnings for retail trade—total and general merchandising—from January 1939 weighted by lines of trade and therefore not comparable with figures for prior years.

[2] Not available.

[3] Cash payments only; the additional value of board, room, and tips cannot be computed.

[4] Excludes projects financed by P. W. A., or R. F. C. funds, or regular governmental appropriations.

No. 411.—Employment and Pay Rolls in Manufacturing Industries—Indexes, by Months: 1924 to 1942

NOTE.—**Monthly average, 1923-25=100.** Indexes are based on monthly reports from representative establishments in 90 manufacturing industries. These industries and industry groups are shown in tables 413–415. The base used in computing these indexes is the 3-year average, 1923–25, taken as 100. Indexes are not adjusted for seasonal variation. Indexes in this table and tables 412 and 413 have been adjusted to preliminary 1939 Census of Manufactures figures. Indexes in tables 414 and 415 have been adjusted to 1937 census figures, except as noted. It was not found practicable to follow some of the modifications made by the 1937 census in industry classifications because comparable data were not available from the census for the base-period years 1923 and 1925. In such cases the indexes of employment and pay rolls between 1935 and 1937, as in earlier revisions, were adjusted to movements of selected census data on the assumption that such movements would agree closely with those of the former census series. For indexes of employment adjusted for seasonal variations, see table 412.

No. 416.—Employment and Pay Rolls in Manufacturing Industries—Indexes, for Specified States: 1927 to 1942

NOTE.—Monthly average, 1923–25=100, for New Jersey, Pennsylvania, and Delaware; monthly average, 1925–27=100, for Masschusetts and Wisconsin; monthly average, 1935–39=100, for New York and Illinois. Reports cover the week ending nearest the 15th of the month, except for New York prior to 1935 which covered the week including the 15th of month. The indexes are not adjusted for seasonal variation and are unweighted, except for Pennsylvania and Wisconsin as stated in footnotes.

[1] Compiled by Massachusetts Department of Labor and Industries, based upon monthly returns from approximately 2,050 manufacturing establishments employing about 75 percent of the factory wage earners in the State. Office workers assigned to productive departments are included, but not executives, salaried officers, etc. The employment indexes are adjusted to the annual State census of manufactures through 1938.

[2] Compiled by the New York State Department of Labor, based upon monthly reports from a representative list of manufacturing firms who employ about half of all the factory workers in the State. Reports cover employees in the shop, including foremen. Office workers, executives, and salesmen are omitted, and administrative and sales offices located away from the plants are not covered.

[3] Compiled by the Federal Reserve Bank of Philadelphia. For New Jersey, indexes are based upon monthly reports to the bank for 1925 and 1926 and since then, to the New Jersey Bureau of Statistics and Records of the Department of Labor. Current reports are from about 830 manufacturing plants which account for approximately 60 percent of all wage earners engaged in manufacturing industries of the State and 68 percent of the total wage payments. For Pennsylvania, indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics and the Pennsylvania Department of Labor and Industry. Current reports are from over 2,800 manufacturing plants and represent about 71 percent of the wage earners and 79 percent of the wage payments in the manufacturing industries of the State. Indexes are weighted according to the relative importance of each industry in the State totals. For Delaware indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics. Current reports are from about 90 manufacturing plants and represent approximately 60 percent of all workers engaged in manufacturing industries of the State and 66 percent of the total wage payments. The indexes for the 3 States have been adjusted to conform with the Federal Census of Manufactures data through 1937 and will be similarly adjusted to subsequent censuses.

[4] Compiled by the Illinois Department of Labor based on monthly reports from about 2,500 manufacturing plants which employ about half of the wage earners in manufacturing industries. Indexes have been adjusted to census data through 1935, except weekly earnings, for which comparable indexes are not available prior to 1935.

[5] Compiled by the Industrial Commission of Wisconsin, based on monthly reports (on wage earners) from representative manufacturers who employ about 80 percent of the total wage earners and whose pay rolls are about 83 percent of the total factory pay rolls in the State. Data for the canning and preserving industry and for railroad repair shops have been excluded. Indexes have been adjusted by using unemployment compensation data on covered workers, Commission statistics on employment and pay rolls, and census data. Indexes for employment and pay rolls from January 1929 through July 1937 are weighted relatives.

No. 418.—Earnings, Average Weekly and Hourly, in 25 Manufacturing Industries, by Labor Groups: 1927 to 1941

Note.—**Index numbers based on 1923 as 100.** Data cover a representative number of plants which employed 2,412,000 workers during 1941. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry as revealed by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year period 1927–29. The pay-roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week.

No. 421.—Wage Rates per Hour and Hours per Week—Indexes of Union Scales in Building and Printing Trades, by Occupations: 1911 to 1941

NOTE.—Data for the earlier years cover 39 cities. The coverage was gradually extended until, beginning with 1938, 72 cities were included. Prior to 1938 the figures were based upon the scale prevailing May 15 each year. For 1938 and subsequent years the study was made as of June 1. The relative wages are percentages which indicate the change in wages per hour. The relative hours are percentages showing the change in the regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work.

No. 423.—Strikes—Number, Workers Involved, and Man-Days Idle, by Major Issues Involved: 1927 to 1941

Note.—The term "strike" is here used in the generic sense to include all stoppages of work due to labor disputes, whether initiated by the employers (lock-outs) or by the workers. Strikes involving fewer than 6 workers or lasting less than 1 day are not included. Information regarding strikes is obtained principally from the public press, union publications, and trade journals. Reports are also received from the various Government labor boards and conciliation services. Information is also obtained from one of the clothing unions, which began in 1938 to keep a complete record of all strikes conducted by the union.

[1] Less than sum of figures below. Machinists' general strike in St. Louis area has been counted as a separate strike in each industry affected with proper allocation of number of workers involved and man-days idle.

[2] Exceeds number employed in industry as several thousand coal miners were involved in more than one strike during year.

15. SOCIAL SECURITY

[Data in this section relate to continental United States, Alaska, and Hawaii, except as noted]

GENERAL NOTE

Old-age and survivors insurance.—Federal old-age and survivors insurance, administered by the Social Security Board under the Social Security Act as amended in August 1939, covers employment in industry and commerce. Specified employments are excepted, notably agricultural labor, domestic service in private homes, services for government and for certain types of nonprofit organizations, services for railroads and certain of their subsidiaries and affiliates, and self-employment. In January 1940, monthly benefits became payable to qualified workers at age 65 and also to certain dependents of beneficiaries and certain survivors of insured workers. Benefits are based on the legally defined average wage of the insured and are paid from the Federal Old-Age and Survivors Insurance Trust Fund, to which is appropriated annually an amount equal to the total taxes paid by employers and employees under the Federal Insurance Contributions Act.

Employment security.—The Federal-State unemployment compensation program provides for payments to insured industrial and commercial workers who are able to work but unable to find jobs. Contributions, based on wages, are paid by employers, and in some States also by employees, to provide funds to be used solely for the payment of benefits, which are based on prior employment and wages. Under the Social Security Act the Social Security Board has two statutory responsibilities in administering the unemployment compensation program. It certifies each year to the Secretary of the Treasury, for purposes of normal and additional credits under the provisions of the Federal Unemployment Tax Act, the State unemployment compensation laws which conform to the standards prescribed by the Social Security Act; it also certifies grants to defray necessary costs of administering State unemployment compensation laws for those States which, in law and administration, conform to the standards prescribed in title III of the act. Funds are certified in the amounts determined by the Board to be necessary for the proper administration of State laws, including administration of employment services in connection with payment of benefits. Until January 1, 1942, when personnel and facilities of State employment offices were transferred to the Federal Government for administration by the Social Security Board, grants to States for their employment services were also made by the Board under the provisions of the Wagner-Peyser Act.

Public assistance.—Under the Social Security Act, the Federal Government shares with the States the costs of administration and money payments for special types of public assistance (aid to needy persons aged 65 and over, needy blind, and dependent children under the age of 16 who have been deprived of parental support, or under the age of 18 if regularly attending school). To receive a Federal grant under any one of these programs, a State must have a plan approved by the Social Security Board as meeting the basic requirements of the act.

Social insurance and public aid.—For analysis of general problems of social security and comparison of social insurance and public assistance under the Social Security Act with other public provision for insurance payments and public aid, the Social Security Board issues data obtained from Federal and State agencies on benefits and beneficiaries under selected social insurance systems (including programs for retirement and unemployment insurance administered by the Railroad Retirement Board), on earnings and persons employed on Federal work programs, and on payments and recipients under special types of assistance, general relief, and the subsistence program for needy farmers administered by the Farm Security Administration.

[1] Old-age retirement benefits under all acts and disability retirement benefits under Railroad Retirement and Civil Service Retirement Acts; pensions, compensations, and disability allowances under veterans' laws.
[2] Amounts, including retroactive payments, certified to Secretary of Treasury for payment; represent primary benefits, wife's benefits and benefits to children of primary beneficiaries.
[3] Amounts, including retroactive payments, certified to Secretary of Treasury for payment minus cancelations, during month ended on 20th calendar day for 1941 and prior years; for 1942 on a calendar month basis.
[4] Payments to veterans, excluding cancelations, for pensions, compensation, and disability allowances.
[5] Principally payments under civil service retirement and disability fund but includes also payments under Canal Zone retirement and disability fund and Alaska Railroad retirement and disability fund administered by Civil Service Commission. Monthly retirement and disability payments include accrued annuities to date of death paid to survivors. Figures for 1936–39 estimated on basis of figures for fiscal year.
[6] Represents payments with respect to deaths of workers covered by programs.
[7] Amounts, including retroactive payments, certified to Secretary of Treasury for payment; represent widows' benefits, widows' current benefits, parents' benefits, and orphans' benefits.
[8] Payments, minus cancelations, to dependents of deceased veterans.
[9] Amounts certified to Secretary of Treasury for payment; 1937 to August 1939, payments at age 65; for entire period, payments with respect to deaths of insured workers prior to Jan. 1, 1940, and beginning January 1940, payments with respect to deaths of insured workers after Dec. 31, 1939. Payments at age 65, amounting to $651,000 for 1937, $4,700,000 for 1938, and $4,600,000 for 1939, are not survivor payments.
[10] Payments, minus cancelations, for burial expenses of deceased veterans.
[11] Estimated by Department of Commerce, Bureau of Foreign and Domestic Commerce. [12] Estimated.
[13] Amount of checks issued, reported by State agencies to Bureau of Employment Security. Figures for 1936–41 adjusted for voided benefit checks.
[14] Amounts certified by regional offices of Railroad Retirement Board to disbursing officers of United States Treasury in same city.

No. 435.—Old-Age and Survivors Insurance—Number of Workers With Taxable Wages, Their Percentage Distribution, Amount of Such Wages, and Average Taxable Wage, by Sex and Race: 1937 to 1940

Note.—Based on estimated total workers and taxable wages in covered employment, excluding data for workers with sex and/or race unknown and, in 1937, 1938, and 1939, data for workers with railroad retirement account numbers; 1940 data differ, therefore, from those in tables 437, 438, and 439, which represent only 97.6 percent of estimated total workers and 95.3 percent of estimated total taxable wages. Provisions of the Social Security Act of 1935, in operation in 1937 and 1938, excluded wages of workers 65 and over; under 1939 amendments, such wages for 1939 and thereafter are included. In 1937, 1938, and 1939, wages in excess of first $3,000 a year from any 1 employer excluded; in 1940, all wages in excess of first $3,000 a year excluded.

[1] Workers in multi-industry employing organizations allocated to industry (a) in State in which largest number of workers are engaged and (b) which is carried on in productive or operating units of employing organization.

[2] Allocation by industry of workers and taxable wages of multi-industry employing organizations made on basis of State of employment estimated from second-quarter tabulation since first-quarter data were tabulated by State of headquarters of employing organizations (see footnote 1).

[3] Partly estimated. Data represent all workers employed some time during quarter; hence are not comparable with data in 1938 and 1939 quarterly tables which represent workers on last day or last pay roll of quarter. [4] Includes uncodable industries.

No. 437.—Old-Age and Survivors Insurance—Percentage Distribution of Workers With Taxable Wages, by Amount of Such Wages, by Age Group and Race: 1940

Note.—Compiled from sample which includes wage records of 1,372,618 workers and $1,245,983,984 in wages identified for posting to individual accounts by May 16, 1941, or approximately 4 percent of total 1940 wages and workers thus identified. Wage items identified for posting by May 16, 1941, represent 95.3 percent of estimated total taxable wages for 1940 and 97.6 percent of estimated total number of workers receiving taxable wages in 1940. Taxable wages exclude remuneration from employment not covered by old-age and survivors insurance program and wages in excess of first $3,000 a year earned by any 1 worker. Figures exclude 4,528 workers of sample whose sex and/or race was unreported and their taxable wages of $4,270,936, representing 0.3 percent of their respective totals.

[1] Excludes data for railroad and other groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act; figures for 1941 are estimates based on 1940 coverage provisions of State laws.

[2] Number of States and Territories paying benefits as follows: 1936 and 1937, 1. 1938—January–March, 23; April–June, 25; July–August, 28; September–November, 29; December, 31. 1939—January–June, 49; July and thereafter, 51.

[3] Workers in covered employment on last pay roll of each type (weekly, semimonthly, etc.) in month.

[4] Total wages in covered employment for all pay periods ended in period. Average wages cannot be computed from these figures because data on number of workers relate to last pay roll in month. Wages for 1938 and 1939 adjusted to include, for New York, estimated nontaxable wages (wages in excess of $3,000 to an individual from 1 employer).

[5] Data for 1936–39 not available; for years 1940–41 estimated; for months of 1941, average number of weeks of unemployment compensated during weeks ended within the month.

[6] Data for 1936–39 represent number of benefit payments.

[7] Unadjusted for voided benefit checks. Net (adjusted) payments were: 1938, $393,786,000; 1939, $429,298,000; 1940, $518,700,000; 1941, $344,321,000.

[8] Average monthly employment.

[9] Includes 4,262 weeks compensated amounting to $44,000, delayed as result of labor dispute in 1939.

[1] Represents number of workers employer must have for specified period to be subject to State law.
[2] Represents number of workers in covered employment on last pay roll of each type (weekly, semimonthly, etc.) in month.
[3] Estimated number of different workers in each State who have earned wages in covered employment during some period in 1940. After reduction of 7 percent to adjust for duplication caused by employment of individual workers in more than 1 State during same year, total for 51 States becomes 31,947,000.
