BUREAU OF THE CENSUS

J. C. CAPT, *Director*

PHILIP M. HAUSER, *Assistant Director*
MORRIS H. HANSEN, *Statistical Assistant to the Director*
A. ROSS ECKLER, *Chief Social Science Analyst*
HOWARD C. GRIEVES, *Chief Economist*
RALPH E. GALLOWAY, *Executive Assistant to the Director*

ACKNOWLEDGMENTS

The Statistical Abstract of the United States has been published annually for the past 67 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date. The present volume has been prepared under the supervision of the Statistical Assistant to the Director by Morris B. Ullman, Statistician, and Kathleen H. Dugan, Editor.

The cooperation of many persons, acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. Cooperating agencies are credited under each of the tables for which they furnished information. In addition to furnishing information, the Federal agencies listed below contributed to the planning and preparation of the material in excess of routine requirements.

Administrative Office of the United States Courts.
Treasury Department—Bureau of Internal Revenue.
Division of Research and Statistics.
Department of Justice—Immigration and Naturalization Service.
Department of the Interior—General Land Office.
Fish and Wildlife Service.
Department of Agriculture—Bureau of Agricultural Economics.
Forest Service.
Department of Commerce—Bureau of Foreign & Domestic Commerce.
Department of Labor—Bureau of Labor Statistics.
Board of Governors, Federal Reserve System.
Civil Service Commission.
Federal Security Agency—Social Security Board.
Office of Education.
Interstate Commerce Commission.
Maritime Commission.
Railroad Retirement Board.

June 1946.

TABLES BY SOURCE VII

INTRODUCTION XI

1. AREA AND POPULATION 1

Area—Number and Geographic Distribution of Inhabitants—Annual and Future Estimates—Urban and Rural Population—Sex—Race—Age—Nativity and Parentage—Mother Tongue—Citizenship—Internal Migration—Marital Status—Families—Fertility—Institutional Population—Population Characteristics in the Territories and Possessions—Religious Bodies.

2. VITAL STATISTICS (INCLUDING HEALTH AND MEDICAL CARE) .. 66

Registration Area—Births—Completeness of Birth Registration—Deaths—Life Table Values—Morbidity—Hospitals—Mental Patients Under Institutional Care—Marriage and Divorce.

3. CRIME AND CRIMINALS 95

Crime Rates—Arrests—Criminal Proceedings—Prisoners in State and Federal Prisons.

4. IMMIGRATION, EMIGRATION, AND CITIZENSHIP 105

Immigration—Emigration—Immigration Quotas—Movement and Characteristics of Aliens—Naturalization.

5. EDUCATION 119

School Attendance—Years of School Completed—Elementary and Secondary Schools—Institutions of Higher Education—Special Schools—Vocational Schools—Vocational Rehabilitation.

6. CLIMATE 146

Elevation of Stations—Temperature—Precipitation—Snowfall—Sunshine—Wind Velocity—Relative Humidity—Degree Days.

7. PUBLIC LANDS 159

Lands in Federal Ownership—Public and Indian Land—Land Grants—National Park System—Visitors to National Parks—Lands Under Jurisdiction of Office of Indian Affairs.

8. LABOR FORCE (INCLUDING EMPLOYMENT, HOURS, AND EARNINGS) 167

Employment Status—Persons not in the Labor Force—Class of Worker—Industry—Occupation—Family Employment—Farm Employment and Wage Rates—Wage Earners and Pay Rolls—Average Hours and Earnings—Labor Turn-over—Industrial Injuries—Strikes and Lockouts.

9. MILITARY SERVICES AND VETERANS' AFFAIRS 220
Army—Navy—Marine Corps—Coast Guard—Red Cross—Ships and Aircraft of the U. S. Navy—Veterans' Administration including Government Insurance.

10. SOCIAL SECURITY AND RELATED PROGRAMS 230
Public Expenditures for Social Security and Related Purposes—Retirement, Disability, and Survivor Programs—Old-Age and Survivors Insurance—Unemployment Insurance—Railroad Retirement Insurance—Railroad Unemployment Insurance—Employment Service—Government Employee Retirement Systems—Public Assistance.

11. INCOME AND EXPENDITURES 270
National Income—Individual and Family Wage or Salary Income—Civilian Spending and Savings—Consumer Income and Expenditures.

12. PRICES 282
Wholesale Prices—Retail Prices—Cost of Living—Unit Values of Commodities Exported and Imported.

13. ELECTIONS 299
Electoral and Popular Vote for President—Army and Navy Voting—Congressional Representation—Number of Elections—Votes Cast in State-Wide Elections—State and City Proposals Voted Upon—Registered Voters.

14. NATIONAL GOVERNMENT FINANCES 310
Receipts and Expenditures—Appropriations—Internal Revenue Receipts—Individual and Corporation Income Tax Returns—Public Debt—Government Securities.

15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT 362
Governmental Units—General Revenues and General Expenditures—Public-Service Enterprises—State Tax Collections—State Aid to Local Governments—Debt—Employees and Pay Rolls.

16. BANKING AND FINANCE 386
Money—Banks; Principal Assets, Liabilities and Other Information for all Banks, Federal Reserve Banks, National Banks, Savings Banks, Mutual Savings Banks—Savings—Government Corporation and Credit Agencies—Savings and Loan Associations—Bank Clearings—Consumer Credit—Insurance—Commodity and Stock Exchanges—Capital Issues—Industrial and Commercial Failures—Public and Private Debt.

17. COMMUNICATION SYSTEMS (INCLUDING POSTAL SERVICE) 459
Telephone Systems—Telegraph Systems—Radio Broadcast Stations—Postal Service.

18. POWER 473
Supply of Energy—Electric Energy; Capacity of Generating Plants and Production—Financial and Operating Statistics of Electric Utility Companies—Typical Electric Bills—Water Power.

19. PUBLIC ROADS AND MOTOR VEHICLES..... 483

Rural Roads—State Highway Systems—Federal Highway Projects—Motor Vehicles—State Motor-Vehicle Registrations and Revenues—Nation-Wide Truck and Bus Inventory—Motor-Vehicle Accidents.

20. TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR BUSSES, AND CIVIL AERONAUTICS..... 498

Steam Railways: Mileage; Equipment; Employees; Receiverships; Capitalization; Dividends; Freight Service; Operating Revenues and Operating Expenses; Accidents—Express Companies—Pullman Company—Electric Railways—Motor Carriers of Property and Passengers—Motor Bus Lines—Civil Aeronautics.

21. WATERWAYS, WATER TRAFFIC, AND SHIPPING..... 530

Water-Borne Commerce, Foreign and Domestic—Ocean Ports—Great Lakes Ports—Rivers, Canals, and Connecting Channels—Merchant Marine—Wrecks and Casualties—Cargo Tonnage—Net Tonnage of Vessels Entered and Cleared in Foreign Trade.

22. IRRIGATION AND DRAINAGE..... 553

Irrigation Enterprises—Irrigation of Agricultural Lands—Federal Reclamation Projects—Drainage on Farms—Drainage Enterprises.

23. FARMS—GENERAL STATISTICS..... 571

Number and Acreage of Farms—Value of Farm Property—Color and Tenure of Operators—Mortgage Status and Indebtedness—Taxes—Farm Labor—Work Off Farms—Expenditures—Facilities and Machinery—Cooperatives and Business Associations—Farms and Farm Property in Territories and Possessions.

24. FARM PRODUCTION AND RELATED STATISTICS..... 623

Cash and Gross Farm Income—Expenditures—Volume of Farm Production—Farm Prices—Agricultural Products Exported and Imported.

25. FARM ANIMALS AND ANIMAL PRODUCTS..... 632

Domestic Animals and Chickens on Farms—Livestock or Livestock Production, Receipts and Shipments—Meats, Lard, and Animal Products—Dairy Products—Poultry—Eggs—Cold Storage Holdings—Wool.

26. FARM CROPS AND FOODSTUFFS..... 657

Acreage, Production, and Value of Crops—Acreage Losses—Field Crops—Grain—Tobacco—Orchard Crops—Sugar—Cotton—Cottonseed and Products—Foreign Trade in Foodstuffs and Silk—Canned Fruits and Vegetables.

27. FORESTS AND FOREST PRODUCTS..... 702

Forests—Stand of Saw Timber—National Forests—Forest Fires—Timber Cut—Lumber and Lumber Products.

28. FISHERIES..... 719

Fisheries—Quantity and Value of Fishery Products—Fish Propagation—Canned and Frozen Fishery Products.

INTRODUCTION

Use of the Statistical Abstract.—The Statistical Abstract of the United States presents in one convenient volume important summary statistics on the industrial, social, political, and economic organization of the United States, and includes a representative selection from most of the important statistical publications. It is, of necessity, limited primarily to national data or to State data nation-wide in scope and does not attempt to present the great wealth of local data available from many sources.

This book is planned as a convenient reference volume for quantitative information and also serves as a guide to the various sources of statistical data. If the information on a particular subject presented in the Statistical Abstract is not sufficiently detailed, it is suggested that the user refer to the publication or to the agency responsible for the data, as indicated in the source note of the table, to obtain further information. The original source from which the table has been taken usually contains more complete discussions of the definitions and concepts used, and presents information for small areas, and often with additional classifications. Occasionally the agency responsible for the data has still more detailed information that can be made available from unpublished records.

1946 Edition.—This edition is the 67th annual issue of the Statistical Abstract and is designated by the year of publication. The data shown are the latest available in the early part of the calendar year and the dates vary according to the practices followed by the various agencies responsible for their preparation.

Some change has been made in the order of the sections to facilitate preparation of the volume, and the section in the 1944–45 edition entitled Military and Civil Services, has been changed to Military Services and Veterans Affairs in this edition, with corresponding changes in content. Civil service employment data will now be found in the Labor Force section and data on retirement systems are brought together in the Social Security section. Tables in the Vital Statistics and Fisheries sections have undergone considerable revision and a number of tables on metal products have been transferred from the Mining and Mineral Products section to that on Manufactures. These changes, along with others involving only one or two tables each, have resulted in the omission of 65 tables carried in the 1945 edition and the addition of 92 new tables.

Supplements to the Abstract.—The Statistical Abstract as an annual, one-volume publication is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the Abstract has been initiated.

The first of these supplements, Cities Supplement—Statistical Abstract of the United States, provides 79 different items of information concerning the population, education, housing, labor force, business establishments, government finance, and climate of each of the 397 cities of the United States with 25,000 or more inhabitants in 1940. This supplement is on sale by the Superintendent of Documents, Washington 25, D. C., for 15 cents.

A second supplement will be ready in the fall of 1946. The Counties Supplement—Statistical Abstract of the United States, will bring together 91 different items of information for each of the 3,099 counties of the United States, with summaries for 138 metropolitan areas defined along county lines. Broad subject headings covered are population, labor force, housing, agriculture, industry, trade, and other economic data (including bank deposits, E Bond sales, war supply contracts and war-time facilities projects).

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

A third supplement, which is now being contemplated, will be designed to remove the burden of carrying long historical series from the annual volume and place such series in a separate boo:. This supplement, which will be integrated with the annual volume, will present time series of social and economic data of historical significance along with statements on the sources and limitations of the data. A committee of the Social Science Research Council has been formed to advise with the Bureau of the Census on the preparation of this volume and preliminary exploratory work has already started. It is planned to consult many producers and users of data in government, private research, universities, and business in order to plan the best possible volume meeting these specifications.

The formulation of this volume will furnish an opportunity for a rather extensive review of available statistical material and a comprehensive review of the present content of the Abstract. It is contemplated that the supplement will follow the general organization of the annual volume so that the historical tables shown in the supplement can be continued in current issues of the Statistical Abstract.

Responsibility.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material on pages VII–X. The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for that which it collects. The responsibility for selection of the material for the general user and for proper presentation does, however, rest with the Bureau even though carried out with the cooperation of many technicians who have given unselfishly of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of the users must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

FOR ADDITIONAL INFORMATION
write to the agency indicated in the source note to the table which covers the desired subject.

SUGGESTIONS AND COMMENTS
should be sent to:
The Director
Bureau of the Census
Washington 25, D. C.

1. Area and Population

GENERAL NOTE

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population a house-to-house enumeration made once every ten years beginning with 1790. The data shown here were selected chiefly from the Sixteenth Census (1940), and from special census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included.

Related materials are presented in other sections of this volume. Data on families are included in this section, but statistics of marriage and divorce are presented in section 2, Vital Statistics; statistics on family wage or salary income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force. Data on the population in institutions as enumerated in 1940 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 3, Crime and Criminals. Tables on nativity and citizenship are included in this section, but related data are included in section 4, Immigration, Emigration, and Naturalization.

Population Samples.—The use of sampling methods in the Sixteenth Census permitted the collection of statistics on a larger number of inquiries than has heretofore been possible, the release of preliminary population statistics at an early date, and the tabulation of a great many social and economic characteristics of the population at a relatively low cost.

Certain tables in this section and in the related sections mentioned above are based on tabulations of samples of the population. Several samples were drawn and the figures shown were obtained by multiplying the sample results by a factor dependent on the sample size in each case. Sample B is a sample of all individuals from the 1940 Population Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively; Sample D, a sample of families from the 1940 Population Schedule; and Sample F, a sample of families based for some subjects on 1940 Population Schedule entries, and for other subjects on 1940 Housing Schedule entries. For Sample B, the sample size is 5 percent. Samples C, D, and F are 5 percent in most areas, but they include 2½ percent samples in the most populous areas. Sample W is an 8 percent sample for the North and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Specifically, any number of the size of a million or over may be assumed to agree with a complete count within 1½ percent, though most numbers of this size will agree within ¾ of 1 percent. Any number of the size of 100,000 may be assumed to agree with a complete count within 4 percent, though most numbers of this size will agree within 2 percent. Most numbers as small as 10,000 will agree within 10 percent. The sampling errors in subtotals formed by addition of classes are

Federal Reserve Bank of St. Louis

covered by the same statements. More detailed statements regarding the sampling errors are given in the original sources.

For years since 1940, several of the tables present statistics that are based on surveys conducted in connection with the Census Bureau's Monthly Report on the Labor Force. These surveys covered a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in table 196, p. 173.

Urban and Rural Areas.—In the course of its history the census has employed several definitions of urban population. The current definition was adopted in substantially its present form at the time of the 1910 census and was slightly modified in 1920 and again in 1930. In this edition, the urban-rural classification for all years is in accordance with 1940 definitions.

The urban area is made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it includes unincorporated political subdivisions with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in the States of Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town.

The remainder of the population is classified as rural and is subdivided into the rural-farm population, which comprises all rural residents living on farms, without regard to occupation, and the rural-nonfarm population, which comprises the remaining rural population.

Families.—The term "family" as defined by the Census since 1930 is limited to private families and excludes the small number (about 80,000 in 1940) of institutions and other quasi households which were included as "families" in 1920 and earlier. A private family comprises a family head and all other persons in the house who are related to the head by blood, marriage, or adoption, and who live together and share common housekeeping arrangements. The term "private household" is used to include the related family members (who constitute the private family) and the lodgers, servants, or hired hands, if any, who regularly live in the home. Thus, the number of private households is, by definition, the same as the number of private families, but the total number of persons in private households includes some individuals who are not members of private families. The term "occupied dwelling unit" is defined as the living quarters occupied by one household.

[1] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

[2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

No. 5.—Population Per Square Mile, by States: 1800 to 1940

Note.—The population of continental United States has been divided by the total land area in order to obtain the density figures here presented. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The 1930 data, however, are based on the revised land areas used for computing the 1940 density figures and, therefore, differ from the 1930 density data previously published. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and cannot be considered in figuring density of population prior to 1890.

[1] See headnote.
[2] Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.
[3] Less than one-tenth of 1.
[4] Dakota Territory: Less than one-tenth of 1 in 1860, 0.1 in 1870, and 0.9 in 1880.
[5] Oklahoma and Indian Territory combined. Separate data are as follows: Indian Territory 5.9 in 1890 and 12.7 in 1900; Oklahoma, 2.0 in 1890 and 10.3 in 1900.

[4] Figure for South Dakota represents entire Dakota Territory for 1860. Figures for 1870 and 1880 for North Dakota and South Dakota are for the parts of Dakota Territory which later constituted the respective States.

[5] Area now constituting West Virginia formed part of Virginia in 1860 and prior years.

[6] Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,060.

No. 7.—Estimated Population on July 1, for Continental United States, 1850 to 1945, for Hawaii, 1916 to 1942, for Puerto Rico, 1916 to 1945, and for Alaska and the Philippine Islands, 1916 to 1941

[Estimates, except those for continental United States, 1900 to 1945, and for Hawaii, 1930 to 1942, are based on linear interpolation or extrapolation of census figures. Estimates for continental United States, 1900 to 1910, are the sums of State estimates based on available local data indicative of population change. Estimates for continental United States, 1910 to 1945, and for Hawaii, 1930 to 1942, are based on birth and death statistics and on statistics of civilian emigration and immigration. Figures for continental United States, 1917 to 1919 and 1940 to 1945, include armed forces outside continental United States.]

No. 9.—Estimated Population on July 1, by States: 1936 to 1945

[Estimates exclude members of the armed forces overseas. They are based on data from the 1930 and 1940 Federal censuses, State censuses, school statistics, vital statistics, registrations for war ration books, immigration statistics, and data on the armed forces. For enumerated population, 1790 to 1940, see table 6, p. 6]

[In thousands]

No. 22.—Median Age of Urban and Rural Population, by Race and Sex: 1930 and 1940

[Definition of Median.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2.]

No. 26.—Enumerated Population, 1940, and Estimated Future Population, 1945 to 2000, by Age and Sex

[Estimates in this table are based on the assumption of medium fertility, medium mortality, no immigration, and no war losses, without correction for underenumeration of infants. They are 1 of 12 series of estimates, each based on a set of assumptions with respect to the course of fertility, mortality, and immigration, appearing in the report, Estimates of Future Population of the United States, 1940–2000, by Warren S. Thompson and P. K. Whelpton, of the Scripps Foundation for Population Research.]

[1] Enumerated population, 1940 census.

[2] Total population for 1945 in this table differs by about 2,000,000 from recent estimates for 1945 shown in tables 7 and 25. This difference is the result, chiefly, of the wartime increase in births, unknown when estimates in this table were made.

No. 30.—Migration Status of the Population and Type of Migration, by States: 1940

[Migrants defined: Persons 5 years old and over who lived in different counties (or quasi counties) in 1940 and 1935. A city of 100,000 inhabitants or more is treated as one quasi county and the remainder of the county as another.]

Place of residence in 1940	Total population	Non-migrants	Migrants by type of migration					Immigrants (from possessions or foreign countries)	Migration status not reported
			Total	Percent of total population	Within the State	Between States			
						From contiguous States	From noncontiguous States

No. 31.—In-Migrants and Out-Migrants, and Net Migration, by Sex, by States: 1940

[In-migrants are classified by division or State of residence in 1940; out-migrants by division or State of residence in 1935. In-migrants shown here represent "migrants between States" in table 30. See headnote, table 30. A minus sign (−) denotes net out-migration]

Division and State	Number					Percent of 1940 population				
	In-migrants	Out-migrants	Net migration			In-migrants	Out-migrants	Net migration		
			Total	Male	Female			Total	Male[1]	Female[2]

No. 37.—Foreign-Born White Population, 1910 to 1940, and Total Foreign-Born, 1900, by Country of Birth

[All classifications of 1940 population according to country of birth are based on political boundaries of Jan. 1, 1937. Classification of population at earlier censuses is based for the most part on political boundaries of those years. For most countries of Europe the total foreign-born population given for 1900 is almost entirely white.]

Country of birth	Total foreign-born, 1900	Foreign-born white				Percent distribution		Percent urban, 1940

[1] Less than one-tenth of 1 percent.
[2] Listed as Holland prior to 1910.
[3] Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.
[4] Turkey in Asia included with Turkey in Europe prior to 1910.
[5] Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1918.
[6] Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."
[7] Newfoundland included with Canada in 1900.

No. 45.—Families, by Race of Head, with Population per Family, Urban and Rural: 1890 to 1940

[All figures based on complete census. Statistics for 1900, 1930, and 1940 represent private families (or private households) only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of families, see p. 2.]

Area and year	Families		Population per family[1]	Race of head					
				White		Negro		Other races	
	Number	Percent increase over preceding census		Number	Percent	Number	Percent	Number	Percent
TOTAL									
1890	12,690,152		4.9	11,255,169	88.7	1,410,769	11.1	24,214	0.2
1900	15,963,965	25.8	4.8	14,063,791	88.1	1,833,759	11.5	66,415	.4
1910	20,255,555	26.9	4.5			2,173,018	10.7		
1920	24,351,676	20.2	4.3	21,825,654	89.6	2,430,828	10.0	95,194	.4
1930	29,904,663	22.8	4.1	26,982,994	90.2	2,803,756	9.4	117,913	.4
1940	34,948,666	16.9	3.8	31,679,766	90.6	3,141,883	9.0	127,017	.4
URBAN									
1930	17,372,524	35.7	4.0	16,001,999	92.1	1,328,170	7.6	42,355	.2
1940	20,648,432	18.9	3.6	18,942,227	91.7	1,657,008	8.0	49,197	.2
RURAL-NONFARM									
1930	5,927,502		4.0	5,400,993	91.1	496,933	8.4	29,576	.5
1940	7,225,889	21.9	3.7	6,667,315	92.3	528,513	7.3	30,061	.4
RURAL-FARM									
1930	6,604,637		4.6	5,580,002	84.5	978,653	14.8	45,982	.7
1940	7,074,345	7.1	4.3	6,070,224	85.8	956,362	13.5	47,759	.7

[1] Obtained by dividing total population by number of families (or private households); hence not strictly average size of private families because total population includes an appreciable number of persons who are members of quasi households. Trend from one census to another, however, is practically the same as that for average size of private families.

[1] Obtained by dividing total population by number of families; hence not strictly average size of private families because total population includes an appreciable number of persons who are members of quasi households.

[2] Less than 0.1 percent.

No. 57.—Gross and Net Reproduction Rates, by Color, by Regions, Urban and Rural: 1935 to 1940, 1930 to 1935, and 1905 to 1910

[Statistics for 1935 to 1940 and 1930 to 1935 based on Sample C, and those for 1905 to 1910 based on Sample W; see p. 1. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at beginning of generation were to live through their reproductive period and continue birth rates existing at time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent potential decline in population. Rates not shown for nonwhite in areas having, in 1940, less than 25,000 nonwhite women 15 to 49 years old]

No. 58.—Institutional Population 14 Years Old and Over—Summary for the United States: 1940

Note.—Figures cover persons who were reported in the 1940 Census as inmates of public or private institutions of specified types. Officials and attendants were excluded, as were patients in general hospitals and tuberculosis sanitariums. Persons in religious institutions and Veterans' Administration Facilities were included only if the establishment had a majority of delinquents, mental patients, aged, or incurables.

Subject	Number of inmates						
	Total	Percent distribution	Prison or reformatory [1]	Local jail or workhouse	Mental institution	Home for aged, infirm, or needy	Other and not reported
Total, 14 years old and over	**1,176,993**	**100.0**	**217,919**	**99,249**	**591,365**	**245,026**	**23,434**

2. Vital Statistics

(Including health and medical care)

GENERAL NOTE

Births and Deaths.—Births and deaths are registered by the State in which the event occurs, and transcripts of the original certificates are received and tabulated by the Bureau of the Census. Although the system for the collection of death statistics was formed in 1880, it was not until 1900 that mortality data were collected on an annual basis. The Bureau of the Census established a national "registration area" consisting of those areas meeting certain standards which warranted their inclusion in national tabulations of vital statistics. Ten States, the District of Columbia, and a number of cities were included in the original death-registration area in 1900. During the period from 1900 to 1933, the death-registration area gradually expanded until it included the entire United States. The national collection of birth statistics was begun in 1915, with 10 States and the District of Columbia, and by 1933 all of the States were included in the United States birth-registration area. The registration of births was estimated to be 92.5 percent complete in the United States in 1940.

Births and deaths for 1940 and subsequent years are shown by place of residence[1] of the mother or of the decedent; those for earlier years by place of occurrence of the birth or death. Statistics by place of occurrence for the entire United States do not differ from those tabulated by place of residence. Those for geographic subdivisions differ largely because of the movement of patients or prospective mothers from their homes to areas where hospital facilities are available. See table 67 for a comparison of the numbers of births and deaths tabulated by place of occurrence and by place of residence for States and table 68 for a similar comparison for cities.

Death statistics include only deaths occurring in the continental United States and exclude deaths of military personnel overseas. Stillbirths are excluded from both birth and death statistics.

Birth and death rates are based upon estimates of the midyear population. For 1940 and subsequent years, use is made of several types of population bases. Thus, birth rates for the United States are based on estimates of the total population including members of the armed forces overseas; those for States on estimates of the civilian population in the States. Death rates for the United States for these years are based on estimates of the population excluding members of the armed forces overseas; those for States on estimates of the total population, both civilian and military in the State.

Because of the unprecedented movement of the population during the war, the changes in the birth and death rates for the war years need to be interpreted with care.[2] Part of the increase or decrease in the rates may be accounted for by the changes in the age, race, and sex composition of the area. Of particular significance in this connection are: (1) the withdrawal of a large number of physically fit males of military age from the civilian population, (2) the concentration of such a population in military establishments in certain areas, and (3) the movement to overseas duty of a large number of men in the armed forces. All of these factors make rates for the war years less comparable with those for previous years.

[1] For a discussion of methods of residence reallocation and of significance of residence figures, see Vital Statistics of the United States, 1943, Part II, pp. 1–6, Washington, D. C., 1945.

[2] For a discussion of the interpretation of crude birth and death rates during wartime, see Bureau of the Census, Summary of Natality and Mortality Statistics, United States, 1943, Vital Statistics—Special Reports, Vol. 21, No. 1, 1945.

Federal Reserve Bank of St. Louis

In addition to the birth and death statistics, published by the Bureau of the Census, there are reports for the States issued by the individual State bureaus of vital statistics. Ordinarily these publications contain more details relating to the geographic and political subdivisions of the States.

Marriage and Divorce.—The Bureau of the Census has collected annual statistics on the number of marriages and divorces in the United States for the following years: 1867 to 1906, 1916, 1922 to 1932, and 1937 to 1940. The intervening years have been estimated. The completeness of the collection of statistics on these subjects varies considerably. Statistics for years prior to 1887 covered only about two-thirds of the counties in the United States, whereas those for the years 1922 to 1932 are based on reports for all counties. For the remaining years in which statistics were collected, more than 90 percent of all counties were covered. These statistics are difficult to obtain because, even at the present time, records of marriages are collected centrally in only slightly more than one-half of the States, and records of divorces, in about one-fourth of the States.

In addition to statistics on the number of marriages and divorces, more extensive and detailed information on both marriage and divorce was collected for 1939 and 1940 from those States that have central systems of registration.

Morbidity.—Statistics on morbidity are compiled and published by the U. S. Public Health Service. Each State health officer reports all diseases that are required by law or regulation to be reported in his State. The lists of diseases required to be reported are not the same for each State, although the most common communicable diseases are notifiable in all the States. Tables 90 and 91 show data on these notifiable diseases. Although it is recognized that morbidity reports vary in degree of completeness of reporting of cases, these data indicate a trend by providing a comparison with similar figures for prior time periods.

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935–36. A number of reports based on this survey have been published by the U. S. Public Health Service and a few by other agencies. Reprint No. 2384 from the Public Health Reports for May 29, 1942, gives a rather complete list of publications based on the National Health Survey.

Medical Care.—Annual statistics of medical care on a Nation-wide basis are limited to data on hospital facilities obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilities are usually included. During this period of war, the results of the survey are less complete because figures on recently established Federal hospital facilities are lacking.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the Bureau of the Census publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. The Bureau of the Census collects each year data on the admissions, discharges, and deaths in these institutions, as well as those on the characteristics of the patient population.

No. 76.—Percent Completeness of Birth Registration, by Race and Population Groups, by States: Dec. 1, 1939, to Mar. 31, 1940

[Data obtained by matching special infant cards for all infants stated in the 1940 Census to have been born during period Dec. 1, 1939, to Mar. 31, 1940, with birth certificates for children born during this period. For further details see Studies in Completeness of Birth Registration, Part I. Vital Statistics—Special Reports, Vol. 17, No. 18, p. 223. Data are by place of occurrence.]

No. 92.—Hospitals—Summary of Growth: 1909 to 1944

Data cover hospitals and related institutions registered by the American Medical Association. Registration is a basic recognition extended to all hospitals and related institutions concerning which the A. M. A. has no evidence of irregular or unsafe practices. Data for 1944 do not include 500 hospitals, etc. (capacity, 16,444), found unsatisfactory for registration by the A. M. A., and 116 hospitals recently opened for which registrations are pending. Certain other facilities, such as clinics, emergency stations and offices where bed care may occasionally be available as an auxiliary service are also excluded]

[1] Based on estimated population as of Jan. 1, 1923 to 1941; July 1, 1942 and 1943.
[2] Covers veterans', county, and city hospitals.
[3] The Neurological Institution, New York, N. Y., was included as a city institution from 1923 to 1936, and as a State institution thereafter.
[4] Not computed.
[5] Data not available.
[6] 3 State hospitals and 1 veterans' hospital did not report.
[7] 9 institutions did not report.
[8] 8 institutions did not report.
[9] Includes estimates for 2 hospitals.
[10] 4 institutions did not report.
[11] 7 institutions did not report.

No. 95.—Movement of Patient Population in Hospitals for Mental Disease and in Institutions for Mental Defectives and Epileptics: 1941, 1942, and 1943

No. 101.—Marriages, Divorces, and Annulments: 1887 to 1945

[Estimates for 1944 and 1945 are preliminary; those for 1941–43, subject to revision. Rates per 1,000 population based on estimates of midyear population which, for war years, exclude members of armed forces serving abroad. Statistics prior to 1907 exclude data for counties for which returns were lacking or incomplete; those for 1916 and 1944 include estimate for such counties. Figures for 1912–15, 1917–45, are estimates. Statistics for annulments collected for first time in 1926]

Year	Marriages		Divorces		Number of annulments

3. Crime and Criminals

GENERAL NOTE

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. They also provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi-annual bulletin, ***Uniform Crime Reports.*** The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover more than half of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. Tables 103–105 and 109 are taken from ***Uniform Crime Reports.*** No centralized information is available on the police activities of the federal agencies. Some information concerning the work of each federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information is made by the Bureau of the Census which annually publishes statistical

Federal Reserve Bank of St. Louis

data on criminal cases disposed of in the general trial courts of twenty-five States including the District of Columbia. (See table 107.) Comprehensive information is collected on the work of the federal courts by the Administrative Office of the United States Courts. Table 106 is prepared from the data published by that office.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Nearly every State publishes annual data either for the whole prison system or for each separate State institution. A national compilation of data on prisoners in Federal and State prisons and reformatories is made annually by the Bureau of the Census. Statistical information covering persons received and discharged from State prisons and reformatories in forty-six of the forty-eight States and from the District of Columbia and federal prison systems is published annually in a comprehensive report. Tables 111–115 present data from these reports. The Federal Bureau of Prisons, in its annual report, ***Federal Prisons***, provides as complete statistical information on prisoners as has been issued in this country. Tables 108 and 110 are from this source.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the United States Children's Bureau, Department of Labor.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

No. 103.—Offenses Known to the Police in 220 Cities of 25,000 and Over: 1931 to 1944

[Total population of cities covered was 27,806,541 based on the 1940 Census]

Year	Criminal homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—theft	Auto theft

No. 109.—Arrests by Age Groups: 1944

Data are from arrest records, evidenced by fingerprint cards received at the F. B. I. during year, and are limited to instances of arrests for violations of State laws and municipal ordinances. Fingerprint cards representing arrests for violations of Federal laws or representing commitments to any type of penal institution are excluded. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Numbers of arrest records in lower age groups are probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders]

4. Immigration, Emigration, and Citizenship

GENERAL NOTE

Aliens or citizens arriving or departing by vessel or airplane at seaports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the Annual Report of the Attorney General contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 117) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 118). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 126), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba,

Federal Reserve Bank of St. Louis

Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 118). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of citizenship issued. Naturalization statistics were originally compiled by the Division of Naturalization of the Department of Commerce and Labor, now by the Immigration and Naturalization Service.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival. Aliens having their first or second naturalization papers were not exempt from the registration requirement, but those whose petitions for naturalization were pending and who expected to be naturalized prior to December 26, 1940, were instructed not to register. Registration was not required of officials of foreign governments and members of their families. Persons whose citizenship status was not clearly defined were advised to register.

The reported total of alien registrations includes registrations during the period August 27 to December 26, 1940, together with subsequent registrations of aliens who entered the United States prior to January 1, 1941. The total does not include seaman registrations.

No. 116.—Estimated Resident Aliens in Continental United States, for Selected Dates: 1941 to 1945

Date	Number of aliens [1]	Change in preceding period					
		Net decrease	Decrease through naturalization	Decrease through mortality	Decrease through emigration	Decrease through other causes [2]	Increase through immigration
Jan. 1, 1941	4,889,770						
July 1, 1941	4,693,623	196,147	156,794	50,341	7,464	7,215	25,667
July 1, 1942	4,349,269	344,354	269,419	84,864	7,212	11,422	28,563
July 1, 1943	3,949,399	399,870	317,675	83,139	5,088	17,615	23,647
July 1, 1944	3,410,175	539,224	440,174	80,041	5,652	41,796	28,439
July 1, 1945	3,050,803	359,372	237,221	75,800	7,417	76,819	37,885

[1] This estimate does not take into account the considerable temporary movement of aliens into and out of the United States.

[2] Deportations, voluntary departures, expatriations, denaturalizations, etc.

No. 121.—Immigration, by Country of Origin, by Decades: 1851 to 1940

[Data are totals, not annual averages, and are for periods ending June 30, except as noted. From 1851 to 1867 the figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and for 1898 to the present time, immigrant aliens admitted. Data prior to 1906 refer to country whence aliens came; thereafter, country of last permanent residence. Because of boundary changes and changes in the list of countries separately reported, the data for certain countries are not comparable throughout.]

[1] Jan. 1, 1851 to Dec. 31, 1860; and Jan. 1, 1861 to June 30, 1870.
[2] Includes Serbia and Montenegro prior to 1920.
[3] Austria included with Germany after 1937.
[4] Known as Irish Free State, 1922-1927.
[5] From 1899 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.
[6] Included in "All other countries" in 1892.
[7] Included in "All other countries" in 1892; in "Other Asia" in 1893 and 1894.
[8] Immigrants from Canada, Newfoundland, and Mexico not reported from 1886 to 1893, inclusive
[9] Included in "All other countries" in 1892 and 1893.
[10] Includes 32,897 persons returning to their homes in the United States. After 1906 such aliens have been included in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whence they came (see headnote).

No. 125.—Immigration Quotas Allotted and Quota Aliens Admitted, by Country of Birth: Years Ended June 30, 1925 to 1945

Note.—The Immigration Act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 percent of the number of foreign-born persons of such nationality resident in continental United States as determined by the census of 1910; the population plan of the act of 1924, to 2 percent according to the census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under the act of 1924, the minimum quota is 100. For nonquota classes, see General Note, p. 105.

[1] Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, are as follows: 1922, 243,953; 1923, 335,480; 1924, 357,643. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

[2] Quota 1934 to Feb. 8, 1944, was 153,774. The Act of December 17, 1943, repealing the Chinese Exclusion Laws authorized a quota for Chinese. This quota of 105 was allotted on Feb. 8, 1944, increasing the maximum quota from 153,774 to 153,879. The total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific islands.

[3] Austria included with Germany beginning with 1938.

[4] All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

[5] Annual quotas for colonies, dependencies, or protectorates in "Other Europe," Asia, Africa, Pacific islands, and America are included in the annual quotas of the European countries to which they belong.

[6] Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

No. 128.—Aliens and Citizens: Total Arrivals and Departures and Arrivals at Principal Ports, Years Ended June 30, 1925 to 1945

[Data exclude travelers between continental U. S. and outlying possessions, persons habitually crossing and recrossing international land boundaries, and agricultural and railway track workers admitted from Mexico. Figures for alien arrivals cover admissions only. In addition, there are aliens among the arrivals who are found inadmissible and debarred from entering.]

5. Education

GENERAL NOTE

Data on school attendance and on highest grade of school completed were obtained for each person in the United States as part of the 1940 Census of Population (see tables 135-141). The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools (see tables 142-160). Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational Statistics for Individuals.—The school attendance statistics compiled from the 1940 Population Census are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college between March 1 and April 1, 1940. Night schools, extension schools, or vocational schools are not included unless they are a part of the regular school system; and no correspondence schools are included.

In the same census, for the first time, a question on the formal educational attainment of each person was included. For each person the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses. For persons 25 years old and over, the highest grade of school completed is given by 5-year age periods, but not cross-classified by school attendance as most of these persons are assumed to have completed their schooling. Several tables are included summarizing the educational statistics in terms of the median year of school completed. The median year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. The completion of the first year of high school is indicated by 9 and of the last year of college by 16. For the sake of comparability, the first year of high school is uniformly represented by 9, although there are some areas with only 7 years of elementary school.

Statistics for Schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics and a similar movement has been in progress with institutions of higher education since about 1930, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the Abstract from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. National totals from these reports are summarized in the chapter, "Statistical Summary of Education."

Information presented in the Abstract on vocational education, including War Production Training, is obtained from the "Digest of Annual Reports of State Boards for Voca-

tional Education to the U. S. Office of Education, Vocational Division (See tables 161–164). The data on vocational rehabilitation are compiled by the Office of Vocational Rehabilitation (see table 165).

Data in this section relate to continental United States except as noted.

No. 135.—Persons Attending School by Single Years of Age From 5 to 20, by Sex: 1910 to 1940

[Statistics for 1940 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if they were part of the regular school system. No correspondence schools were included. In the 3 prior censuses, the school attendance question was not restricted as to type of school or college. In 1940, the question referred to the period between Mar. 1, and Apr. 1, 1940; in 1930, to the period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920 and 1910, to the period between the preceding Sept. 1 and the census date (Jan. 1)]

Per capita of population 5–17, inclusive	$37.37	$73.38	$72.53	$78.65	$79.59
Per pupil enrolled [7]	$48.02	$89.84	$85.58	$91.64	$94.56
Per pupil in average attendance [7]	$64.16	$108.49	$99.70	$105.74	$110.03

[1] Census enumeration as of June 1, 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920; Apr. 1, 1930 and 1940.
[2] Excluding population of Indian Territory which is not covered by public-school statistics, and also, for 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.
[3] Current expense, capital outlays, and interest.
[4] Census estimates for July 1.
[5] Estimated by Scripps Foundation.
[6] Based on total number of teachers, supervisors, and principals.
[7] Beginning with 1920 this item excludes data for night, summer, part-time, and continuation schools separately reported.

[1] Excludes supervisors and principals except when not reported separately. These numbers are, therefore, somewhat smaller than those on which average annual salaries are based.
[2] Number in average daily attendance. [3] For 1940. [4] Not available. [5] For 1938.
[6] Data do not include Federal schools for natives.

No. 161.—Vocational Schools and Vocational Teacher-Training Courses, Federally Aided—Number of Teachers and Students, by Class of School or Course and by Sex: Years Ended June 30, 1920 to 1945

[Institutions Federally aided are reimbursed from Federal funds provided under the act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending the benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for the further development of vocational education. These acts, administered by the Office of Education provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Data for Hawaii are included beginning 1930, for Puerto Rico beginning 1936, and for Alaska beginning 1937]

[1] In the program of Vocational Training for War Production Workers: (*a*) Supplementary courses provide training for persons already employed in occupations essential to the war; (*b*) Preemployment courses provide training for persons preparing for employment in occupations essential to the war.

[2] In the Food Production War Training Program courses are provided to give training in food production and conservation, mechanics, farm machinery repair, and farm labor training.

[3] In the Engineering, Science, and Management War Training Program courses are provided to meet the shortage of engineers, chemists, physicists, and production supervisors in fields essential to the war.

No. 165.—Vocational Rehabilitation of Disabled Persons, by Number Rehabilitated and in Process of Rehabilitation, by States, and for District of Columbia, Hawaii, and Puerto Rico: 1930 to 1945

[The Vocational Rehabilitation Amendments of 1943 (Public Law 113) expanded the Federal-State program for the vocational rehabilitation of civilians injured in industry or by accident or illness, or impaired by congenital defect. The scope of services now includes any services necessary to render disabled persons employable or to become more advantageously employable. The program is in operation in the 48 States, the District of Columbia, Hawaii, and Puerto Rico. Figures given relate to cases aided by Federal and State funds. Total expenditures in 1945 (fiscal year) comprised: Federal funds $7,135,441; State funds $2,720,103 (subject to final audit)]

6. Climate

Climatic Data of Selected Cities, by Months

Climatic data are gathered by the United States Weather Bureau at 5,500 stations, about 500 having automatic or hourly readings and the remaining 5,000 taking 1 observation a day. Observations have been taken at varying lengths of time at each station. The earliest year of record is 1871 at many stations, although some earlier, less detailed records began in the eighteenth century.

The following tables contain data from a carefully selected list of cities, chosen to give as general representation of climatic factors as is possible in the limited space available. The "Normals" are standard data selected by the Weather Bureau as representative of conditions in the local area. These data are adjusted to other long-record stations in the vicinity when the period of record is not the same as for the standard normals. In all other tables the averages represent the customary arithmetic average of the period of record. All temperature data are in degrees Fahrenheit, precipitation in inches and hundredths, and snowfall in inches and tenths. Wind data are corrected to true velocities.

The number of degree days as used in these tables is the sum of the positive differences between 65° and the daily mean temperatures. Experience has shown that, for buildings requiring an inside temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of days the average outside temperature falls below about 65°. The degree day is based on this principle.

Relative humidity data represent averages based on three to four daily observations.

7. Public Lands

GENERAL NOTE

The term "public lands," as used here, includes only those Federally owned lands to which the general body of public land laws apply. (See title 43 of the Code of Federal Regulations.) In general, it includes the lands acquired by the United States through cession and treaty and certain other lands declared by the Congress specifically to be "public lands," that is, subject to the public land laws. As a general rule, it excludes lands acquired by the United States from private owners and from State and local governments by purchase, donation, condemnation, etc. The term "Indian lands," used here to differentiate such lands from other public lands, refers to lands ceded to the United States by Indian tribes and held in trust for the Indians by the Government.

An entry or selection is a claim to a given tract of public land. An original entry or selection is a claim allowed under the law but subject to certain conditions before title can pass. A perfected entry is a claim finally approved after required lapse of time and compliance with other conditions. A patent or certification is an instrument of conveyance or grant to a claimant whose entry or selection has been finally approved.

For table on trend in land utilization, see p. 580.

No. 179.—Public and Indian Land, Entries Under All Acts—Acreage, by States: Years Ended June 30, 1931 to 1945

[Offices are not maintained in States where only small areas of public lands remain undisposed of; entries in these States, if any, are made directly in the General Land Office (Washington, D. C.) and figures are grouped under that heading in the following table. See also general note above]

Item and State	Original entries						Perfected entries, 1945	Patented, 1945
	1931–35, total	1936–40, total	1941–45, total	1943	1944	1945

No. 187.—Public Lands, Unappropriated and Unreserved—Acreage, by States: June 30, 1900 to 1945

Note.—Public lands outside Alaska were withdrawn from all disposition with certain exceptions by Executive orders issued in 1934 and 1935, in furtherance of the Taylor Grazing Act and for conservation and development of natural resources. Figures exclude unappropriated and unreserved public lands in Alaska estimated at 230,000,000 acres on June 30, 1945.

8. Labor Force

(Including employment, hours, and earnings)

GENERAL NOTE

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Monthly Report on the Labor Force of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture and of the Bureau of Labor Statistics. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours, labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. Because the coverage of all employees of an establishment in a single report provides information on a large number of workers in a specific industry, the establishment approach is particularly adapted to the measurement of short-term changes in employment for many important industries. However, the methods usually used in the collection of statistics from establishments do not provide for adequate representation of new establishments coming into business and thus may yield estimates of employment that are subject to a cumulative bias which becomes more serious in the measurement of long term changes. It has been the practice to correct for this bias by periodic adjustment to "benchmark" data from industrial censuses, tabulations of employer reports obtained in connection with Social Security programs, and other sources.

The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. (For detailed definitions of various work status classes, see footnotes to table 191.) Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation.[1] The Decennial Census of Population provides detailed data for the United States as a whole and for

[1] See Estimates of Labor Force, Employment, and Unemployment in the United States, 1940 and 1930, Sixteenth Census of Population. Table 192 in the Abstract presents 1940 and 1930 data adjusted insofar as possible to a comparable basis.

each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reporting themselves in each occupation and in each industry, and other items. The data presented from the Monthly Report on the Labor Force include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers. Data on hours of work are also provided. The report is based on a monthly enumeration of approximately 25,000 households throughout the United States.

The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates have been issued since 1909 by the Department of Agriculture. These estimates are obtained by means of monthly mail returns from crop reporters.

The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 110,000 establishments in 154 manufacturing industries and in selected nonmanufacturing industries, supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under Social Security programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, and unpaid family workers, most of whom cannot be easily covered by the establishment approach. Persons in the armed forces are also excluded. The estimates are available in considerable detail, especially for manufacturing industries. They are paralleled in most instances by estimates of wage-earners separate from salaried employees, and for the former group there are estimates of wages, hours, and weekly and hourly earnings. The industry classifications are generally based on the major prewar activity of each employer, and have not been changed to reflect wartime conversion.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Martime Commission, the Civil Service Commission, the Bureau of the Census, and other agencies.

Labor turn-over estimates are published monthly by the Bureau of Labor Statistics for 76 industries in 20 major divisions in manufacturing, and for selected nonmanufacturing industries, on the basis of voluntary reports from 9,000 firms. There are a number of significant differences between the turn-over data and the Bureau of Labor Statistics employment and pay-roll reports. The turn-over data now relate to all employees whereas the employment and pay-roll estimates for detailed industry groups refer generally to wage earners only. The turn-over series are based on data covering the entire month rather than the pay-roll period ending nearest the middle of the month. Further, in the turn-over series the establishments are now classified according to current industry, while the prewar industrial classification has been maintained in the employment and pay-rolls statistics.

Statistical data on strikes and lockouts cannot be collected in the same fashion as other labor information since strikes and lockouts are sporadic and cannot be covered by a routine periodic reporting service. The basic measures in strike statistics as now compiled by the Bureau of Labor Statistics are the number of strikes, the number of persons on strike, and the number of man-days of idleness involved. Questionnaires are sent to all parties concerned in each strike (employers, unions, and any interested outside agent, such as a conciliator) to obtain detailed and authentic information. From the data given on the schedules, the Bureau prepares annual reports (published in the May Monthly Labor Review and later in bulletin form) which give not only the complete and verified total figures for each month of the year but also analyses on strikes by industry, State, city, and by causes, results, labor organizations involved, and other pertinent classifications.

65 to 74	3,209,134	241,393	7.5	224,703	5,089	11,410	191
75 and over	1,404,060	29,782	2.1	28,525	355	866	36

[1] Includes (*a*) persons *at work*—persons who worked for pay or profit at any time during the week of Mar. 24–30, 1940, in private work or nonemergency Federal, State, or local government work, or assisted without pay on a family farm or in a family business; and (*b*) persons *with a job but not at work*—persons not actually at work and not seeking work during the week of Mar. 24–30, 1940, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date. The category *Employed (except on public emergency work)* includes not only employees but also proprietors, farmers, other self-employed persons, and unpaid family workers.

[2] Includes persons who, during the week of Mar. 24–30, 1940, were at work on, or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration (NYA), the Civilian Conservation Corps (CCC), or State or local work relief agencies. In the interpretation of the data for persons on public emergency work, allowance must be made for the misclassification in the census returns of considerable numbers of public emergency workers. The number of persons reported in the census as on public emergency work in the United States was 2,529,606, whereas the number recorded on the pay rolls of the Federal emergency work agencies at about the time of the census was 2,906,196 excluding the NYA Student Work Program, and 3,377,978 including that program. The most common type of misclassification was the reporting of the emergency workers as *At work*. Persons on the NYA Student Work Program were very frequently returned as in school and not in the labor force. There is also evidence that a considerable number of emergency workers were classified as *Seeking work*.

[3] Includes persons without work of any sort in the week of Mar. 24–30, 1940, who were actively seeking work during that week. This category is composed of both experienced and new workers, the latter being persons who had not previously worked full time for 1 month or more.

No. 192.—Estimated Number of Persons in the Labor Force, 1930, and Adjusted Number in the Labor Force, 1940, by Employment Status, by Age and Sex

[**Figures in thousands.** Figures for 1930 in this table are estimates according to the 1940 employment status classification. An allowance was made in each age group for persons whose age was not reported in the 1930 census. Figures for 1940 in this table show revised data adjusted to take account of the misclassification of public emergency workers in the census returns (see note 2, table 191) and of persons whose employment status was not reported in the census. Since the revised and estimated data in this table are not available by occupation, industry, class of worker, race, or other characteristics, for more detailed age groups, or for areas other than the United States as a whole, it is necessary to use unrevised figures for the labor force in 1940 and for gainful workers in 1930 and earlier years, as shown in tables 191, 193–195, 199–206]

Age and sex	1930					1940

[1] Figures for 1900 to 1930 represent gainful workers, that is, persons reported as having a gainful occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. Figures are, therefore, not strictly comparable with those in the labor force for 1940, shown in table 191 and in following tables.

[2] Including data for age unknown.

Sampling Note: In the fall of 1945, the sample used for the Monthly Report on the Labor Force consisted of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas and located in 42 States and the District of Columbia. The chances are about 2 in 3 that relative errors of the estimated totals presented from the labor force survey are less than the following:

Sex	Civilian labor force			Not in the labor force
	Total	Employed	Unemployed	
Both sexes	1.3	1.3	8.0	1.5
Male	1.7	1.7	11.2	3.8
Female	2.3	2.4	13.8	1.7

The relative errors presented represent the differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same precedures. The sampling errors themselves are subject to variation in different time periods, and particularly as the magnitudes being estimated change in level.

[1] Includes persons who had a job but who did not work during the census week because of vacation, temporary illness, bad weather conditions, or temporary lay-off with definite instructions to return to work by a specific date. Also includes farmers who did not work during the census week. Does not include any unpaid family workers.

[2] Average of monthly averages. The monthly average is a mean computed from a distribution of single hours of work. Persons who had a job but did not work during the census week were classified in a separate group, "0 hours", in computing the mean.

No. 202.—Detailed Occupation of Persons in the Experienced Labor Force and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

[Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 191. Occupation figures shown below for employed (except on public emergency work) refer to the occupation in which engaged during census week, and are based on complete census returns. Occupation figures for remaining experienced labor force groups, not shown separately in this table, refer to the occupation which the person regarded as his usual occupation and at which he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force", therefore, represent a summation of figures for current and usual occupation based on complete census returns and Sample B, respectively]

[1] Comprises a summation of the complete count of present occupations for employed persons (except on emergency work) and of the tabulations from Sample B (see p. 1) of usual occupations for persons on emergency work and for experienced workers seeking work. For definitions of these labor force groups, see footnotes on table 191. Figures include the distribution of 402,270 workers deducted from the semiskilled group; for detailed explanation, see source.

[2] Comparable figures not available.

No. 205.—Detailed Industry of Persons in the Experienced Labor Force, and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

[Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 191. Industry figures shown below for employed (except on public emergency work) refer to the industry in which engaged during census week, and are based on complete census returns. Industry figures for remaining experienced labor force groups, not shown separately in this table, refer to the industry in which the person was engaged when employed at his usual occupation and at which occupation he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current industry and usual industry which in turn are based on complete census returns and Sample B, respectively]

No. 211.—Estimated Number (Annual Average) of Wage Earners in Manufacturing Industries, by Major Industry Groups: 1939 to 1945

[In thousands. Estimates have been adjusted to levels indicated by final 1943 data made available by Bureau of Employment Security, Federal Security Agency]

Industry	1939	1940	1941	1942	1943	1944	1945
All manufacturing	8,192	8,811	10,825	12,617	14,560	13,850	12,250
Durable goods	3,611	4,172	5,554	6,997	8,727	8,357	6,809
Iron and steel and their products	991	1,134	1,430	1,592	1,761	1,705	1,525
Electrical machinery	259	305	446	560	741	752	622
Machinery, except electrical	529	630	869	1,096	1,293	1,225	1,080
Transportation equipment, except automobiles	159	275	598	1,539	2,508	2,355	1,454
Automobiles	402	465	570	510	714	720	590
Nonferrous metals and their products	229	267	345	389	449	428	377
Lumber and timber basic products	420	442	535	560	535	490	509
Furniture and finished lumber product	328	343	391	380	366	346	333
Stone, clay, and glass products	294	309	371	371	360	336	318
Nondurable goods	4,581	4,639	5,270	5,621	5,834	5,493	5,441
Textile-mill products and other fiber manufactures	1,144	1,124	1,283	1,285	1,237	1,125	1,075
Apparel and other finished textile products	790	796	907	939	958	885	921
Leather and leather products	347	335	375	372	340	317	316
Food	855	864	940	1,025	1,056	1,077	1,067
Tobacco manufactures	93	92	94	95	91	84	82
Paper and allied products	265	278	314	315	324	318	317
Printing, publishing, and allied industries	328	329	341	331	331	326	327
Chemicals and allied products	288	319	416	605	734	610	611
Products of petroleum and coal	106	112	120	125	125	131	135
Rubber products	121	127	156	155	194	198	197
Miscellaneous industries	244	265	324	373	445	423	394

No. 221.—Injuries to Civil Employees of the United States and Claims Received Under U. S. Employees' Act: Sept. 7, 1916, to Dec. 31, 1945

Note.—The U. S. Employees' Compensation Commission, created by act of Sept. 7, 1916, is charged with the duty of administering the law providing compensation for civil employees of the United States who suffer personal injury while in the performance of official duties. This table does not include data for Civilian Conservation Corps enrollees or for persons employed as civil employees of the United States on work relief projects financed through funds provided by the several Federal emergency relief appropriations, excepting those administrative employees who are eligible for benefits under the act of 1916.

Source: Department of Labor, Bureau of Labor Statistics. Monthly figures are published currently in Monthly Labor Review.

No. 224.—Average Hours and Earnings in 25 Manufacturing Industries: 1925 to 1944

[Data cover a representative number of plants which employed 2,487,000 workers during 1944. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry as revealed by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year period 1927–29. The pay-roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week. Hourly earnings are not wage rates, because they include overtime and other monetary compensation]

No. 226.—Average Hourly Wage Rates (Straight-Time Hourly Earnings) for Men in Selected Occupations in Selected Industries, by Wage Area, January 1945

[Hourly wage rates represent straight-time average hourly earnings exclusive of premium pay for overtime and night work. Incentive (piece rate or production bonus) earnings and cost of living bonuses were included, but non-incentive bonus earnings, such as Christmas or profit-sharing were excluded. The limited number of occupations included were selected to represent workers in these industries at different levels of pay]

No. 227.—Average Earnings of Wage Earners in Manufacturing in Selected Months: 1939 to 1945

Month and year	Average weekly earnings			Average hourly earnings			Estimated straight-time average hourly earnings weighted by January 1941 employment [1]		
	All manufacturing	Durable goods	Nondurable goods	All manufacturing	Durable goods	Nondurable goods	All manufacturing	Durable goods	Nondurable goods
1939: January	$23.19	$25.33	$21.57	$0.632	$0.696	$0.583	$0.641	$0.702	$0.575
1940: January	24.56	27.39	22.01	.655	.717	.598	.652	.708	.589
1941: January	26.64	30.48	22.75	.683	.749	.610	.664	.722	.601
1942: January	33.40	38.98	26.97	.801	.890	.688	.751	.826	.668
1943: January	40.62	46.68	32.10	.919	1.017	.768	.819	.905	.726
1944: January	45.29	51.21	36.03	1.002	1.099	.838	.877	.965	.780
1945: January	47.50	53.54	38.66	1.046	1.144	.891	.920	1.005	.827
April	47.12	52.90	38.80	1.044	1.138	.899	.925	1.007	.836
July	45.12	50.60	38.59	1.032	1.126	.902	.933	1.017	.842
August	41.72	45.72	36.63	1.024	1.113	.909	(1)	(1)	(1)
September	40.87	43.95	37.80	.987	1.072	.903	.944	1.024	.856
October	40.97	44.23	37.76	.985	1.063	.909	.942	1.014	.863
December	41.21	44.08	38.52	.994	1.066	.927	.957	1.028	.880

[1] The method of estimating straight-time average hourly earnings makes no allowance for special rates of pay for work done on major holidays. Estimates for the months of Jan., July, Sept., and Nov., therefore, may not be precisely comparable with those for the other months in which important holidays are seldom included in the pay periods for which manufacturing establishments report to the Bureau. This characteristic of the data does not appear to invalidate the comparability of the figure for Jan. 1941 with those for the preceding and following months. Inapplicability of the formula to Aug. 1945 with its double holiday, in celebration of the Japanese surrender, prevents release of that month's estimates.

No. 228.—Percent of Increase in Urban Wage Rates, by Industry Group: April 1943 to October 1945

[The index of urban wage rates is intended to measure changes in basic rates of pay. It is based on changes in hourly wage rates (average hourly earnings in the case of incentive workers) exclusive of all premium payments for overtime and for work on second or third shifts. The information is collected through semiannual field visits to about 6,600 representative establishments, located in 69 wage areas centering in cities of 25,000 or more population. Data refer to the important manufacturing industries in each area and to a standard group of nonmanufacturing industries in all areas]

Industry group	Percent of increase from—					
	April 1943 to October 1943	October 1943 to April 1944	April 1944 to October 1944	October 1944 to April 1945	April 1945 to October 1945 [1]	April 1943 to October 1945 [2]

No. 229.—Average Hours and Earnings of Wage Earners in Selected Nonmanufacturing Industries: 1939, 1943, and 1944

[The averages presented in this table are based on monthly data supplied by cooperating establishments covering both full-time and part-time employees. As not all reporting firms furnish man-hour data, average hours, and average hourly earnings for individual industries are based on a slightly smaller sample than are weekly earnings]

Industry	Average weekly earnings			Average weekly hours			Average hourly earnings		
	1939	1943	1944	1939	1943	1944	1939	1943	1944

No. 231.—Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1915 to 1945

[Data for the earlier years cover 39 cities. The coverage was gradually extended until 75 cities were included. Prior to 1938 the figures were based upon the scale prevailing May 15 each year. From 1938 to 1942 the study was made as of June 1, except for building trades rates in 1942, which was made as of July 1. Since 1943 the data were collected as of July 1 for all trades. The relative wages are percentages which indicate the change in basic wage rates per hour. The relative hours are percentages showing the change in the regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work]

[Rates and hours for 1939=100]

[1] Data on hours and earnings on Federal projects are reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average hours and earnings cannot be accurately computed by weeks and figures for average monthly hours and earnings tend to show certain irregularities reflecting this method of reporting.

No. 233.—Monthly Labor Turn-Over Rates (per 100 Employees) in Manufacturing Industries: 1939 to 1945

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in tables 211–214, as the former are based on data for the entire month while the latter refer to a one-week period ending nearest the middle of the month. In addition, labor turn-over data, beginning in Jan. 1943, refer to all employees, whereas the employment and pay-roll data relate only to wage earners. The turn-over sample is not so extensive as that of the employment and pay-roll survey—proportionately fewer small plants are included: printing and publishing, and certain seasonal industries, such as canning and preserving, are not covered]

CLASS OF TURN-OVER AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Total separation:												
1939	3.2	2.6	3.1	3.5	3.5	3.3	3.3	3.0	2.8	2.9	3.0	3.5

1944	4,956	2,115,637	7.0	8,721,079	.09	173	188	51

[1] The number of workers involved in some strikes and lockouts which occurred between 1916 and 1926 is not known. However, the missing information is for the smaller disputes and it is believed that the totals here given are fairly accurate.

[2] "Total employed workers" as used here includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, the term "total employed workers" includes all employees except the following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of the nature of their work cannot or do not strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are, of course, excluded.

[3] "Available working time" was estimated for purposes of this table by multiplying the average number of employed workers each year by the number of days worked by most employees during the year.

[4] Not available.

[1] Less than sum of figures below, because one or more strikes each affecting more than 1 industry, have been counted as separate strikes in each industry affected, with the proper allocation of workers and man-days idle to each industry.

[2] Exceeds number employed in industry as several thousand coal miners were involved in more than 1 strike during year.

[3] Included in other nonmanufacturing industries.

9. Military Services and Veterans Affairs

GENERAL NOTE

This section includes data on the Army, the Navy, other branches of the military service and on the various aspects of government programs for veterans.

Military Services.—Data are compiled from the various branches as indicated in the source notes. A summary table prepared by the Bureau of Labor Statistics, similar to their tables on employment in the section on Labor Force, is also included.

Veterans Administration.—This agency was created by Executive Order 5398, dated July 21, 1930, under authorization of the act of Congress approved July 3, 1930 (46 Stat. 1016: 38 U. S. C. 11). This Act authorized the President to consolidate and coordinate under a single control all Federal agencies dealing with veterans' affairs. The order consolidated in the Veterans Administration, the Bureau of Pensions (formerly under the Secretary of the Interior), the United States Veterans Bureau, and the National Home for Disabled Volunteer Soldiers (now known as the National Homes Service).

The Veterans Administration administers laws relating to the relief of, and other benefits provided by law for, former members of the military and naval forces. It is responsible for extending relief to veterans and to dependents of deceased veterans of all wars, and to veterans and to dependents of deceased veterans who served in the Government military and naval establishments during time of peace, as provided for by various acts of Congress. These laws include, in addition to compensation, pensions, vocational rehabilitation, and education, the guarantee of loans for purchase or construction of homes, farms, and business property, readjustment allowance for veterans who are unemployed, Government life insurance, death benefits, adjusted compensation, emergency and other officers' retirement pay, and physical examinations, hospital and outpatient treatment, or domiciliary care. The Veterans Administration also administers the insurance section of the Soldiers' and Sailors' Civil Relief Act for persons in the active military service.

No. 238.—Personnel and Pay of the Military Branch of the Federal Government: 1934 to 1945

[1] Prior to Mar. 1944, data include persons on induction furlough. Prior to June 1942 and after Apr. 1945, Philippine Scouts are included.

[2] Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.

[3] For war period, data represent obligations for pay of Army personnel.

[4] Covers Navy, Marine Corps, and Coast Guard. For Navy proper, data include cash payments for clothing allowances. For Navy proper and Marine Corps, data include pay rolls for retired and inactive personnel.

[5] Data include men's share of family allowances but exclude Government's contribution.

[6] Represents Government's contribution. Excludes men's share.

No. 241.—Army of the United States—Strength of Component Parts: 1890 to 1941

Note.—For period prior to 1914, table covers quinquennial years and years in which considerable changes occurred in Regular Army. Figures for Reserve officers include data for Regular Army enlisted men, and also, for years prior to 1924, for National Guard officers holding commissions in the Reserve. There is, therefore, some duplication in the grand totals, but the amount of this duplication is relatively small.

JUNE 30—	Grand total	REGULAR ARMY [1]			NATIONAL GUARD [2]			RESERVE FORCES		
		Total	Officers	Enlisted men	Total	Officers	Enlisted men	Total	Officers	Enlisted men

[1] Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency officer was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included. (On June 30, 1941, 495 retired officers and 13 retired enlisted men had returned to active duty.) Beginning with 1919, data for warrant officers are included; these numbered 731 on June 30, 1941.

[2] State militia prior to act of June 3, 1916. Beginning with 1924, data for warrant officers are included; these numbered 200 on June 30, 1941. [3] U. S. Volunteers. [4] Not available. [5] Regular Army Reserve.

[6] Includes data for National Guard personnel in Federal service. [7] Estimated.

[8] Officers' Reserve Corps. Beginning with 1924, figures do not include data for persons holding commissions also in National Guard. Figure for 1941 includes 57,309 officers on extended active duty.

[9] Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimated).

[10] Officers' Reserve Corps, 86,262; National Army, 49,118 (estimated).

[11] Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

[12] Estimates only. Under orders of the Secretary of War all components had been merged into one army known as "The United States Army." [13] Enlisted Reserve Corps.

[14] Enlisted Reserve Corps, 1939, 3,054; 1940, 3,233; Regular Army Reserve, 1939, 19,301; 1940, 28,020. All enlistments in Regular Army Reserve suspended as of Dec. 31, 1940, and members called to active duty on or before Feb. 15, 1941, except those who were deferred until July 1, 1941, in order to complete college or university courses. [15] Includes 74,602 unassigned selectees.

[16] Enlisted men, 491,777 (including 10,919 Regular Army Reserve and 1,470 Army of United States with the Regular Army); selectees, 363,459.

[17] Enlisted men, 262,722 (including 20,590 Army of United States with the National Guard); selectees, 168,854. [18] Enlisted Reserve Corps. Includes 35 enlisted Reserve Corps men on active duty.

No. 253.—United States Veterans Receiving Hospital or Domiciliary Care Authorized by Veterans Administration: 1931 to 1945

[During the fiscal year 1945, a total of 828,620 out-patient treatments were given and 1,771,760 out-patient examinations were made. On June 30, 1945, there were 4,159 veterans domiciled in State and Territorial homes who were eligible for care in facilities controlled by the Veterans Administration. The Federal Government reimbursed these homes at the rate of $120 per year for each person through August 1939, $240 per year for each person through Dec. 17, 1943, and $300 per year thereafter.]

[1] Veterans homes were not under the jurisdiction of the Veterans Administration prior to July 1930.
[2] Includes Veterans Admin. beneficiaries cared for in Army, Navy, Marine, and State and civil (contract) hospitals, St. Elizabeths, and hospitals operated in connection with National Veterans' homes.
[3] Beginning 1933, figures include hospitals operated in connection with Veterans' Admin. homes.
[4] Excludes hospitals which operated for only part of the year under unnatural conditions.
[5] Includes domiciliary members receiving hospital treatment.
[6] Includes emergency, observation, and unclassified cases.

10. Social Security and Related Programs

(Data in this section relate to continental United States, Alaska, and Hawaii, except as noted)

GENERAL NOTE

Broadly considered, the term "social security" may encompass all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the loss in earnings resulting from old age, sickness, disability, unemployment, or death; assistance, or payments on a needs basis, to persons with inadequate income; public aid through employment on work projects; and insurance against the costs of medical and hospital care and services rendered to individuals to improve their health, earning power, and welfare. The aggregate expenditures for these purposes from Federal and State and local funds are shown in table 255; these expenditures may be compared with total receipts and expenditures of Federal, State, and local governments by reference to tables 340, 341 and 377–381.

***Social Insurance and Related Programs* (tables 255-258, 260).**—This category comprises a group of programs under which recurring or other payments are made on the basis of past earnings or service, including the two insurance programs established by the Social Security Act for industrial and commercial workers—Federal old-age and survivors insurance and Federal-State unemployment insurance; the two similar programs administered by the Railroad Retirement Board for employees of railroads and certain of their affiliates; retirement, disability and survivor programs for veterans, other military personnel, and employees of Federal, State, and local governments; and workmen's compensation. Information on benefits and beneficiaries under these programs, by risk met, is shown in table 260. The Social Security Bulletin carries current data on all these programs for which monthly figures are available, and its supplement, the Social Security Yearbook, summarizes annual data for all. More detailed information for programs appears in this section in tables on old-age and survivors insurance, State unemployment insurance, railroad retirement, railroad unemployment insurance, and Federal, State, and local government employee retirement systems.

The extent to which wages and salaries in the United States are earned in employments covered under selected social insurance and related programs is shown in table 256. Coverage, eligibility, disqualifications, and levels of benefits differ for the various programs. Notes to the detailed tables indicate the major limitations to be considered in interpreting the data; source notes indicate the publications which should be consulted for more detailed data and analyses of the figures, and of administrative factors which may affect the data.

Public Aid.—Since 1936 the Social Security Board has collected or compiled data from States on payments to needy persons from public funds and has issued this information in summary tables for the continental United States, including data furnished by other Federal agencies on subsistence payments to farmers, and on persons employed on Federal work programs and their earnings from such employment (table 259). The amounts shown as assistance exclude administrative costs and represent total payments to recipients from Federal, State, and local funds, including sums made available to the States as Federal grants under the Social Security Act for old-age assistance, aid to dependent children, and aid to the blind. The Social Security Bulletin and Yearbook give these data also in terms of source of funds and operations under State public assistance plans approved by the Social Security Board as distinct from other similar programs in the United States.

Health and Welfare Services.—The Social Security Act of 1935 included grants to States for maternal and child health services, services for crippled children, child welfare

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

services, vocational rehabilitation, and public health. The Children's Bureau administers the first three of the programs listed, with funds appropriated under that act. Subsequent legislation has set up separate authorizations of funds for vocational rehabilitation (table 165) to be administered by the Office of Vocational Rehabilitation (Public Law No. 113, 78th Cong., approved July 6, 1943). The Public Health Service also now makes grants to States through a separate law (Public Law No. 410, 78th Cong., approved July 1, 1944). In tables 257 and 258 are shown the Federal funds granted for these health and welfare programs and for other purposes under the Social Security Act and other Federal laws.

SOCIAL INSURANCE FOR INDUSTRIAL AND COMMERCIAL WORKERS

The social insurance programs established under the Social Security Act cover employment in industry and commerce, specifically excluding such types of service as agricultural labor, domestic service in private homes, employment by governmental agencies and certain types of nonprofit organizations, and by railroads and certain of their affiliates, casual employment not in the course of the employer's business, employment by certain close relatives, and self-employment. Workers are insured against wage loss resulting from old age and death under the federally administered old-age and survivors insurance program, and against unemployment under State unemployment insurance programs. In addition, the Rhode Island Unemployment Compensation Board administers cash benefits for workers who suffer a wage loss because of temporary sickness, covering workers included under the State unemployment compensation law.

***Old-age and Survivors Insurance* (tables 261–269).**—As amended in 1939, this program provides monthly retirement benefits to fully insured workers at age 65 or over, supplemented by payments to their wives aged 65 or over and children under age 16, or 18 if still at school. Survivor benefits comprise monthly payments to certain dependents of fully or currently insured workers—children under age 16, or school children under 18, and widows if they have in their care a child beneficiary of the deceased insured worker. If the deceased worker was fully insured, survivor benefits are payable to his widow aged 65 or over, or if he leaves no widow or unmarried child under 18, to wholly dependent parents aged 65 or over. If no monthly benefits are payable for the month in which the insured worker dies, a lump sum is paid to the widow, child, or parent, or as reimbursement for funeral expenses to a person or persons equitably entitled to such payment.

A worker is fully insured if, when he files his claim for retirement benefits, he has received at least $50 in wages from covered employment in a minimum of 6 quarters and in 1 quarter of every 2 which have elapsed since the end of 1936—or since attainment of age 21 if later—and his attainment of age 65 or death, or if he has had at least 40 quarters of coverage. A worker is currently insured if he has had wages of $50 or more from covered employment in at least 6 of the 12 quarters immediately preceding the current quarter.

Monthly benefits and lump-sum payments are based on the worker's average wage as legally defined. The minimum payable on the basis of an insured worker's wage record is $10 a month, and the maximum is the least of the following three amounts: $85 a month, 80 percent of the legally defined average monthly wage of the insured worker, or twice the amount he would receive as a monthly retirement benefit on the basis of his wage credits. Benefits—which have been payable since January 1940—are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, earned more than $14.99 in covered employment.

Workers in employments covered by the program and their employers each pay contributions on the worker's wages, not counting amounts above the first $3,000 in a year. The rate has been 1 percent for workers and 1 percent for employers since 1937, as a result of laws successively postponing scheduled increases. An amount equal to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund from which benefits and administrative costs are paid. The wage credits of a worker—i. e., the amounts of his wages subject to contribution—are recorded in individual employee accounts maintained by the Social Security Board.

***Unemployment Insurance* (tables 270–274).**—State unemployment insurance laws, in general, cover the same types of employment as old-age and survivors insurance, but some States limit their coverage to workers in firms with 8, 6, 4, or 3 or more workers in a specified number of weeks in a year.

State reports on employment and wages under their unemployment insurance systems (tables 270 and 271) include total pay rolls of subject employers. In all States but one the standard rate of contributions payable by employers is 2.7 percent of wages paid, not counting amounts above the first $3,000 a year paid to an employee; in Michigan the standard rate is 3.0 percent. In a very few States employees also contribute. In all but six States employer contribution rates in 1945 were adjusted in accordance with "experience rating" based, in general, on the extent to which their workers have drawn benefits. The Federal Government imposes a Federal unemployment tax on substantially all employers of 8 or more in industry or commerce; against this Federal tax employers credit, up to 90 percent of their Federal liability, contributions they have paid under State unemployment insurance laws or would have paid if they had been assessed at the standard rate.

Contributions collected by States are deposited to State accounts in the Federal employment trust fund from which States withdraw amounts needed for benefit payments. The Federal Government, through grants to States certified by the Social Security Board, meets the necessary administrative costs of State unemployment insurance systems which the Social Security Board finds in conformity, in law and administration, with statutory Federal requirements.

Benefits are paid only to unemployed covered workers who meet qualifying conditions of the State laws. In general a waiting period of 1 or 2 weeks must be served. Benefits are payable for a maximum number of weeks, 20 in 22 States but ranging from 14 to 26 among others. Weekly benefit amounts represent about 50 percent of wages but may not exceed maximums ranging from $15 to $28 depending on the State law. Four States take account of the unemployed worker's dependents in determining the amount of benefits payable to him.

Data on operations of the United States Employment Service appear in tables 275–279; that Service was transferred on September 19, 1945, to the U. S. Department of Labor.

SOCIAL INSURANCE FOR RAILROAD WORKERS

The programs established under the Railroad Retirement Act and the Railroad Unemployment Insurance Act cover social insurance for employees of railroads (including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan companies which perform services in connection with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations which are national in scope. Both programs are administered by the Railroad Retirement Board, which publishes detailed data on operations in its Monthly Review and Annual Report.

***Railroad Retirement Insurance* (tables 280–285).**—The Railroad Retirement Act, as passed in 1935 and amended in 1937, provides for five classes of retirement and survivor benefits: (1) Employee annuities, based on years of service (up to a maximum of 30 if service before 1937 is included) and on the average monthly compensation (exclusive of earnings over $300 a month). Age annuities are payable at age 65 or, on a reduced basis, at age 60 after 30 years of service. Annuities for total and permanent disability are payable after 30 years of service or, if after less than 30 years, on a reduced basis at age 60. At present, the maximum annuity is $120 a month. (2) Survivor annuities,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

paid to the spouse of a deceased annuitant who had elected to take a reduction in his own benefit. (3) Death-benefit annuities, paid under the 1935 Act, and for a 12-month period only, to the spouse or dependent next of kin of a deceased annuitant. (4) Lump-sum death benefits, paid under the 1937 Act to the designated beneficiary or to surviving relatives in a prescribed order of precedence. The benefit is roughly equal to a return of contributions less retirement benefits received. (5) Pensions, paid under the 1937 Act to individuals who were on the carrier pension rolls on July 1, 1937, and who were not eligible for annuities on that date.

The funds of the retirement system come from a tax on compensation (exclusive of earnings over $300 a month). The total tax rate, divided equally between employer and employee, started at 5½ percent in 1937, and is scheduled to rise by ½ percent at 3-year intervals until 7½ percent is reached in 1949. Appropriations for benefit payments and administration and for establishing a reserve under the Railroad Retirement Act are made by Congress annually on the basis of anticipated tax collections.

***Railroad Unemployment Insurance* (tables 286 and 287).**—The Railroad Unemployment Insurance Act was passed in 1938 and amended in 1939 and 1940. It became effective on July 1, 1939. Benefits are payable during a benefit year to unemployed workers who earned at least $150 in compensation with a covered employer in the base year, which is the calendar year preceding the beginning of the benefit year. A benefit year begins on July 1 and ends on June 30 of the following year. Benefits are payable for each day of unemployment in excess of 7 in the first 14-day registration period and for each day in excess of 4 in subsequent registration periods, up to a maximum of 100 days in the benefit year.

The Railroad Unemployment Insurance Act also provides that the Board may operate an employment service for the railroad industry. In 1944, the Board's employment service performed the functions of manpower recruitment and employment stabilization for the railroad industry as a coordinated agency of the War Manpower Commission.

The railroad unemployment insurance program is financed entirely by contributions paid directly to the Railroad Retirement Board by covered employers, amounting to 3 percent of pay rolls (exclusive of individual earnings in excess of $300 a month).

PUBLIC ASSISTANCE
(*Tables 289 and 290*)

Under the Social Security Act, the Federal Government shares with the States the costs of administration and money payments for special types of public assistance (aid to needy persons aged 65 and over, needy blind, and dependent children under age 16—or 18 if regularly attending school—who have been deprived of parental support for specified reasons). To receive a Federal grant under any one of these programs, a State must have a plan approved by the Social Security Board as meeting the requirements of the act.

The basis for Federal matching is one-half the amount (up to $40 a month) determined by the State as the total assistance payment to a needy aged or blind person, and, for aid to dependent children, one-half the amount given by the State up to $18 a month for the first child and $12 for each additional child aided in the same home. In addition, the Federal Government pays half the administrative costs of approved State programs for aid to the blind and aid to dependent children and increases its grants to States for old-age assistance by 5 percent as a contribution toward such costs.

Payments to recipients under all these programs do not necessarily represent the sole resources of the persons receiving payments; in making payments, States take account of the resources as well as the requirements of recipients and may use general assistance to supplement inadequate payments under the three special types of assistance.

Some States administer plans for aid to dependent children and aid to the blind without Federal funds, and in all States general assistance is administered without Federal financial participation.

RETIREMENT SYSTEMS FOR GOVERNMENT EMPLOYEES

Three contributory retirement systems for Federal civilian employees and one noncontributory are administered by the Civil Service Commission. In addition, there are other systems for Federal employees not otherwise covered.

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides old-age and disability annuities for employees in the executive, judicial, and legislative branch of the United States Government and in the municipal government of the District of Columbia not subject to other Federal retirement systems. Approximately 2,853,291 employees or 89.7 percent of Federal civilian personnel were subject to this Act as of June 30, 1945. Under the 1942 amendments, retirement is compulsory at age 70 for employees with at least 15 years of service; optional retirement at age 60–61 for employees with at least 30 years of service and at age 62–69 for employees with at least 15 years of service may be exercised by either the employee or the head of the department. The benefit formulas are weighted in favor of employees with greater length of service and lower salaries. For a description of other types of payments see the footnotes to table 291. The employee contribution rate, computed on base pay, was raised to 5 percent beginning July 1942. Previously the rate had been 3½ percent for July 1926—June 1942 and 2½ percent for August 1920—June 1926.

The two other contributory systems administered by the Civil Service Commission make special provision for certain Federal employees, most of whom had been covered formerly by the Civil Service Retirement Act. The Panama Canal Zone Retirement Act, passed in 1931, pertains to employees of the Panama Canal and the Panama Railroad Company who work in the Isthmus of Panama and are citizens of the United States. About 6,200 employees were covered by this Act at the end of 1945. Employee contributions have been 5 percent, beginning July 1931. Employees of the Alaska Railroad in Alaska who are citizens of the United States come under the Alaska Railroad Retirement Act, enacted in 1936. The coverage under this system was about 1,750 persons at the end of 1945. The contribution rate has been 5 percent, beginning July 1935. These acts contain more liberal retirement provisions than the Civil Service Retirement Act by setting lower age and length of service requirements but differ only slightly with regard to the other types of payments.

No one of the 3 acts requires specific payments from the Government as employer but each implies the Government will furnish the necessary amounts to finance its retirement and disability fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to each fund but not until after it had been in operation for a while.

A special act was passed in 1944 to provide noncontributory annuities for citizens of the United States employed during the Panama Canal construction period and not receiving benefits under other Federal retirement acts. In the fiscal year 1945, the Civil Service Commission awarded annuities to 1,910 former employees or their widows with an annual value of $1,811,379.

Separate retirement systems for the military services and special classes of Federal employees are presented in table 294. These data on Federal contributory and noncontributory retirement systems were assembled by the Social Security Board in connection with their social insurance series. Data on retirement of Army, Navy, Marine Corps, Coast Guard, and a few other special classes of employees making no direct contribution to their retirement pay have been presented in the Statistical Abstract beginning with the 1936 edition. Table 294 presents more comprehensive data than that shown in the 1944–45 edition, table 189, p. 181.

Statistics on retirement systems for State and local government employees were prepared by the Bureau of the Census with the cooperation of the Social Security Board. Both agencies issued special reports on the subject. Tables 295–298 are from this source.

[1] Includes administrative expenditures unless otherwise indicated; represents expenditures from general, special, and trust accounts; excludes transfers to such accounts and loans.

[2] Fiscal years of Federal Government, most States, and some localities ended June 30; fiscal years of other States and localities cover various 12-month periods ended within year.

[3] Includes noncontributory programs.

[4] Revised data.

[5] Excludes administrative expenses.

[6] State unemployment compensation and U.S. Employment Service.

[7] Includes administration of employment services by Railroad Retirement Board

[8] Excludes expenditures from Government life insurance fund.

[9] Benefits first payable Apr. 1, 1943.

[10] For 1943, total Civilian Conservation Corps and Work Projects Administration expenditures and National Youth Administration expenditures exclusive of national defense training program and of administrative expenses and State and local expenditures, data for which are not available. For 1944, liquidation expenses of WPA and NYA and expenditures for work relief in Puerto Rico and Virgin Islands.

[11] Excludes expenditures for medical services included under public aid programs above, and expenditures for health primarily incidental to performance of other functions, such as those in connection with Army, Navy, and education.

[12] Only amounts expended for programs under Social Security Act.

[13] Expenditures by Food and Drug Administration and medical service to Indians and to natives of Alaska.

[14] Not available.

[15] Includes expenditures for migratory labor camps and American Printing House for the Blind.

[16] Data not available; 1940-41 figure used.

[17] Includes obligations of Federal Works Agency for child care programs.

[1] Old-age assistance, aid to dependent children, and aid to the blind under Social Security Act.

[2] Unemployment compensation administration and employment service under the Social Security Act and under Wagner-Peyser Act for 1937–Dec. 1941, and unemployment compensation administration for Jan. 1942–June 1944. Excludes expenditures for postage and for employment services administered by Social Security Board, Jan. to Nov. 1942.

[3] Maternal and child welfare services and public health under Social Security Act; vocational rehabilitation under Social Security Act and under Federal Vocational Rehabilitation Act of 1920, as amended; venereal disease control; State and Territorial homes for disabled soldiers and sailors; emergency maternal and infant care.

[4] Agricultural and mechanic arts colleges, vocational education, State marine schools, training defense workers, and improving supply and distribution of farm labor.

[5] Forestry, wildlife restoration, agricultural experiment stations, and agricultural extension work.

[6] Includes $559,000 for Canal Zone for public roads.

Total earnings of persons employed under Federal work programs [9]	2,438,063	1,813,612	2,229,034	2,117,558	1,670,142	1,225,024	581,152	50,531		
Civilian Conservation Corps [7]	292,397	245,756	230,318	230,513	215,846	155,604	34,030			
National Youth Administration: [8]										
Student work program	26,329	24,287	19,598	22,707	26,864	25,118	11,328	3,794		
Out-of-school work program	28,883	32,664	41,560	51,538	65,211	94,032	32,009			
Work Projects Administration [9]	1,592,039	1,186,266	1,751,053	1,565,515	1,269,617	937,366	503,055	46,737		
Other Federal agency projects financed from emergency funds [10]	498,415	324,639	186,505	247,285	92,604	12,904	730			

[1] For 1933-35 data see the Statistical Abstract, 1944-45, table 205, p. 196.

[2] Represents recipients of payments from Federal, State, and local funds for programs administered under State plans approved by Social Security Board and from State and local funds for programs administered under State laws without Federal participation, and amount of such payments. Excludes cost of hospitalization and burial and, beginning Sept. 1940, recipients and cost of medical care.

[3] Excludes cost of hospitalization and burial and, beginning Sept. 1940, recipients and cost of medical care. Data for 1936-Mar. 1937 from WPA.

[4] Cases receiving relief under emergency education, student aid, rural rehabilitation, and transient programs of emergency relief administration, largely financed from FERA funds, and amount of such relief.

[5] Net number and net amount of emergency grant vouchers certified to cases and cases receiving only commodities purchased by FSA and distributed during period and value of such commodities. Dropped from series after June 1942 because appropriation was drastically reduced and payments limited to need occasioned by natural disasters. Data from FSA.

[6] Excludes administrative employees and their earnings.

[7] Enrolled persons only; represents averages computed from reports on number of persons enrolled on 10th, 20th, and last day of the month, except for Indian Division, for which averages were computed from daily reports. Earnings estimated by multiplying average monthly number enrolled by average of $70 through June 1939, $67 for July-Oct. 1939, $66.25 for Nov. 1939-June 1941, and $67.20 subsequently for enrollees other than Indians, and $60.50 for Indians. Average amount based on obligations incurred for cash allowances, clothing, shelter, subsistence, and medical care for persons enrolled, and for certain other items. Data from CCC.

[8] Persons employed during month, except for out-of-school program after June 1941, which represents average of weekly employment counts. Data until July 1939 from WPA; subsequently, from NYA.

[9] Average weekly number of persons employed on projects operated by WPA, and earnings covering all pay-roll periods ended during year. Beginning Sept. 1938, for persons employed, and July 1938 for earnings, represents employment on Federal agency projects financed by transfer of WPA funds. Data from WPA.

[10] Average weekly number of persons employed during monthly period ended on 15th on projects financed in whole or in part from emergency Federal funds other than those of CWA, CCC, NYA, and WPA; earnings covering all pay-roll periods ended during year. Beginning Oct. 1941, employment and earnings on projects financed from PWA funds only; figures not available for other Federal agency projects financed under Emergency Relief Appropriation acts. Data from Bureau of Labor Statistics.

Workmen's compensation [14]	235,000	234,900	256,100	291,200	330,900	357,100	389,600
R. I. sickness compensation						2,857	5,035
Refunds under Civil Service Comm.[5]	3,326	2,846	3,277	4,615	6,357	10,809	42,156

[1] Old-age retirement benefits under all acts, disability retirement benefits under Railroad Retirement and Civil Service Retirement Acts, and disability payments to veterans.

[2] Primary and wife's benefits and benefits to children of primary beneficiaries. Partly estimated.

[3] Age and disability annuitants and pensioners as of 20th of month. Payments represent amounts certified, minus cancellations.

[4] Veterans receiving pensions and compensation and amount of payments.

[5] Includes survivor benefits under joint and survivor elections; not adjusted for suspension of annuities of persons reemployed under National Defense Acts of June 28, 1940, and Jan. 24, 1942.

[6] Number and amount of widow's, widow's current, parent's, and child's benefits. Partly estimated.

[7] Widows, parents, and children of deceased veterans and amount of payments.

[8] Number of decedents on whose account lump-sum payments were made and amount of payments.

[9] Data through Aug. 1939 include payments of $9.3 million under the 1935 Act to workers at age 65.

[10] Payments for burial of deceased veterans. Number estimated for 1938 and 1939.

[11] Average weekly number. Amounts adjusted for voided benefit checks.

[12] Readjustment allowances to unemployed veterans only; excludes payments to self-employed veterans.

[13] Average number of persons receiving benefits for unemployment in a 14-day registration period. Amounts for 1941–44 adjusted for underpayments and recoveries of overpayments. Benefit payments began July 1939.

[14] Data estimated; for 1944, preliminary.

[15] Not available.

[16] Data represent payments to individuals and exclude cost of administration. Payments under Social Security and R. R. Retirement Acts (including retroactive payments) and payments under R. R. Unemployment Insurance Act are amounts certified; payments under Civil Service Comm. and Veterans Admin. are disbursements minus cancellations; R. I. sickness compensation and State unemployment insurance payments are adjusted for voided benefit checks.

[17] Includes lump-sum survivor benefits and refunds. Data estimated; for 1944, preliminary.

No. 262.—Old-Age and Survivors Insurance—Employee Accounts Established, Workers With Wage Credits, and Amount of Taxable Wages: 1937 to 1944

[Data corrected to Feb. 1, 1946]

PERIOD	Employee accounts established (thousands) [1]	Workers with wage credits during period (thousands) [2]	TAXABLE WAGES [3]	
			Total (millions)	Average per worker
Calendar year:				
1937	[4] 37,139	32,904	$29,615	$900
1938	6,304	31,822	26,502	833
1939	5,555	33,751	29,745	881
1940	5,227	35,393	32,974	932
1941	6,678	40,976	41,763	1,019
1942	7,638	46,928	52,939	1,128
1943	[5] 7,426	48,579	62,839	1,294
1944	4,537	[6] 47,518	[6] 65,533	[6] 1,379
1943				
January-March	1,705	36,951	15,608	422
April-June	2,118	37,927	16,644	439
July-September	2,099	38,181	15,924	417
October-December	1,385	36,503	14,663	402
1944				
January-March	921	[6] 36,044	[6] 17,649	[6] 490
April-June	1,373	[6] 37,023	[6] 17,610	[6] 476
July-September	1,305	[6] 37,019	[6] 16,494	[6] 446
October-December	938	[6] 34,791	[6] 13,780	[6] 396

[1] Cumulative total for 1936–39 excludes 114,000 voided account numbers for which no accounts were established. Excludes numbers under railroad-retirement program.

[2] Partly estimated; adjusted for workers having more than 1 account. Quarterly data unadjusted for workers employed during quarter but not reported after quarter in which they received their first $3,000 in year.

[3] Not adjusted for nontaxable wages erroneously reported and wages excluded in benefit computations. Wages in excess of $3,000 a year paid to worker by any 1 employer are not taxable. Beginning 1940, all wages in excess of $3,000 a year received by a worker are excluded in benefit computations.

[4] Includes 17,202,000 accounts established in 1936.

[5] Annual figure includes 114,076 accounts established for civilian employees of the War Department and 4,571 additional accounts not included in quarterly data.

[6] Preliminary estimate.

[1] Total benefits awarded after adjustment for terminations and subsequent changes in number and amount of benefits, cumulative beginning Jan. 1940. Not adjusted for deductions.

[2] Benefit is subject to no deduction or only to deduction of fixed amount which is less than current month's benefit.

[3] Including net adjustments. Benefits are terminated when a beneficiary dies or loses entitlement to benefits for the reasons specified in 1939 amendments, sec. 202. Adjustments result from operation of maximum and minimum provisions of 1939 amendments, sec. 203 (a) and (b), and from other administrative actions.

[4] Less than $500.

No. 267.—Old-Age and Survivors Insurance—Sample (1 Percent) of Workers With Wage Credits at Some Time in 1937–43, by Cumulative Wage Credits in 1937–43, Insurance Status Jan. 1, 1944, and Age Group

[1-percent sample of all workers with wage credits identified for posting by July 31, 1944; only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during the period 1937–43 and workers who became entitled to primary insurance benefits before Jan. 1, 1944. Age represents age at birthday in 1943. Figures in italics represent data for less than 100 workers and may be unreliable because of the large probable sampling error]

[1] A worker who is fully insured as of a given date (in this table, Jan. 1, 1944) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after the quarter in which he attained age 21, whichever is later, and up to but excluding the quarter in which he died, attained age 65, or the given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had 6 quarters of coverage in the 12 quarters immediately preceding that date or the quarter in which he died. Uninsured workers are those who have some wage credits but are neither fully nor currently insured as of the given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than $50 in taxable wages.

[2] Total includes 6,617 of unknown age not shown separately, of whom 312 were fully insured, 182 currently insured only, and 6,123 uninsured.

[3] Inapplicable under provisions of the Social Security Act.

No. 268.—Old-Age and Survivors Insurance—Percentage Distribution of Workers with Wage Credits, by Race, Sex, Age Group, and Amount of Wage Credits, for Industry Groups: 1943

[Data based on 3-percent sample of all workers with wage credits in 1943 whose wage credits were identified for posting by July 31, 1944; not adjusted for duplication of workers with more than 1 account or for data reported too late for inclusion. Wage credits exclude wages in excess of first $3,000 a year earned in covered employment by any 1 worker. Data classified by industry in which worker was last employed. White workers include all races other than Negro. Workers of unknown race included with white; of unknown sex, included with male. Age represents age at birthday in 1943. Workers of unknown age allocated arbitrarily among larger age groups. Figures in italics represent data for less than 100 workers and may be unreliable because of large sampling error]

[1] Worker and total wage credits in year assigned to State in which last employed in 1943. Last State of employment determined from last quarterly employer report in file for worker. Because of workers employed in more than 1 State during year, this allocation understates number of workers with wage credits during year and overstates actual average annual wage credits per worker in each State. However, it yields unduplicated count of workers and actual average wage credits per individual classified by his *last* State of employment.

[2] For single-State workers, State of employment during year same as last State of employment. Multistate workers counted individually in each State in which employed at some time during year on basis of individual quarterly employer reports. Wage credits of multistate workers in each State included as wages earned in that State. United States total adjusted to exclude duplication in count of workers because multistate workers counted in more than one State. Data for multistate workers based on 1-percent sample combined with 3-percent sample data for both single and multistate workers.

[1] Minimum number of employees for period specified which makes employer subject to State law.

[2] Average of 12 monthly figures, each of which is a total of the number of workers in covered employment on the last pay roll of each type (weekly, semimonthly, etc.) ending in month.

[3] Estimated number of different workers who have earned some wages in covered employment in the State during the year.

[4] Total wages in covered employment for all pay periods ending in the year.

[5] Estimated totals adjusted for duplication of individuals employed in more than 1 State during the year. Unadjusted totals are 49,652,000 and 47,543,000 for 1943 and 1944, respectively.

[6] Or total wages of $5,000 or more in a calendar quarter of the current or preceding calendar year, effective July 1, 1943.

[7] Coverage changed from 1 or more workers in 20 weeks to 1 or more at any time, effective May 11, 1943.

[8] And total wages of $78 or more in a calendar quarter.

[9] Wages of at least $50 to each of at least 4 workers during each of 3 calendar quarters; or 8 or more workers in 20 weeks.

[10] But services for employers not subject to the Federal unemployment tax and located outside the corporate limits of a city, village, or borough of 10,000 or more population are excluded.

[11] Or total wages of $500 or more in a calendar year.

[12] And total wages of $225 or more in a calendar quarter.

[13] Or total wages of $450 or more in a calendar quarter.

[14] And total wages of $500 or more in a calendar quarter.

[15] And total wages of $140 or more in a calendar quarter.

[16] 8 or more workers in current calendar year or 6 or more in preceding calendar year, or, if employer's records do not permit accurate count of workers, total wages of $6,000 or more in preceding calendar year; and effective July 1, 1943, or total wages of more than $10,000 in any calendar quarter of the current year.

[17] And total wages of $150 or more in a calendar quarter.

Miscellaneous [7]	59,249	.2	100.0	95,709	.1	100.0

[1] Total wages in covered employment for all pay periods ending in year.
[2] Average of 12 monthly figures, each of which is a total of the number of workers in covered employment on the last pay roll of each type (weekly, semimonthly, etc.) ended in the month.
[3] Excludes railroads and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.
[4] Less than 0.05 percent.
[5] New York accounts for all but 0.1 percent of average employment and all but 0.2 percent of total wages.
[6] Wisconsin accounts for all but 4.7 percent of average employment and all but 6.2 percent of total wages.
[7] Includes agriculture, forestry, and fishing, and establishments not elsewhere classified.

[1] Advances for unemployment insurance administration certified to State agencies during fiscal year, including amounts reimbursed to War Manpower Commission for services and facilities provided to State agencies by U. S. Employment Service. Excludes amounts for services and facilities furnished to USES by State agencies as well as unencumbered balances reallocated to State agencies. Total includes, but State figures exclude, expenses for postage.

[2] Benefits for partial and part-total unemployment are not provided by State law in Montana and Pennsylvania.

[3] Unadjusted for voided benefit checks.

[4] Liable State is one to which a claim has been forwarded by agent State for disposition.

[5] Excludes October–December data for California.

[6] Less than 500.

[7] Claims filed for biweekly instead of weekly periods.

[1] Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

[2] Contributions, penalties, and interest from employers and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks. Current contribution rates (percent of taxable wages) are: For employers, 2.7 percent except in Michigan, where rate was 3.0 percent; for employees, 1.0 percent in Alabama, California, and New Jersey, and 0.5 percent in Rhode Island. Experience rating, operative in 42 States in 1944 and in 45 States in 1945, modifies above rates.

[3] Adjusted for voided benefit checks.

[4] Includes the following amounts transferred to the railroad unemployment insurance account: during 1944, Colorado $14,997, Georgia $66,163, and Kentucky $178,202; during 1945, Kentucky $441,316.

[1] Excludes railroads and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act. Data for 1945 estimated.

[2] Until Jan. 1945, represents covered employment on last pay roll of each type (weekly, semimonthly, etc.) ended in the month; thereafter, employment on pay roll of each type ended nearest the fifteenth of the month. Annual figures represent averages of 12 monthly figures.

[3] Total wages in covered employment for all pay periods ended within the period. Average wages cannot be computed from these figures because data on workers relate only to the number working in a single pay period, which is substantially less than the number of different workers to whom these wages were paid.

[4] Annual figures represent first payments to beneficiaries; monthly figures represent average weekly number of weeks of unemployment compensated during the month. Annual figures partly estimated.

[5] For 1936–39, represent number of benefit payments.

[6] Annual amounts, adjusted, but monthly figures not adjusted, for voided benefit checks. Adjusted data for 1936 and 1937 not available.

[7] Data not available.

[8] Excludes: California, Maine, and Oregon for January; Massachusetts and Virginia for Jan.–Mar.; Indiana for May–June; and New York for entire year; data not available. For Feb. and Mar., Maine reported continued claims for total unemployment only.

[9] Excludes New York for Jan.–Mar. 1939; data not available.

Source: Federal Security Agency, Social Security Board, Bureau of Employment Security. Some of these data appear periodically in Social Security Bulletin.

No. 281.—Railroad Retirement—Annuities and Pensions by Class—Number of Payments Initially Certified, Terminated by Death, and in Force: 1937 to 1945

[Figures for initial certifications are for period during which payment was first certified and not for period during which annuity began to accrue. Figures for terminations by death are for period during which notice of death was received and not for period during which beneficiary died. Cumulative figures exclude claims declared ineligible, erroneous certifications, and erroneous reports of death. In force figures as of any date include only certifications made up to that date, less terminations by death reported by that date; they are also adjusted for recertifications, reinstatements, and terminations other than by death (suspension, return to service, recovery from disability, and commutation to lump-sum payment), items which are not shown in this table]

CLASS	1937	1938	1939	1940	1941	1942	1943	1944	1945
Initial certifications, total	**39,501**	**49,883**	**28,267**	**23,817**	**20,940**	**16,219**	**19,029**	**19,678**	**24,213**

Survivor annuities	351	1,043	741	542	468	396	429	387	334
Death-benefit annuities [1]	837	1,764	1,417	1,095	983	856	860	725	637
Terminations by death, total	**3,424**	**11,746**	**12,970**	**13,217**	**13,509**	**13,645**	**14,345**	**14,980**	**14,521**
Employee annuities	1,044	5,423	7,034	7,835	8,514	9,168	10,142	10,790	11,153
Pensions	2,116	4,659	4,450	4,253	3,873	3,454	3,217	3,240	2,514
Survivor annuities	3	23	48	71	81	83	111	135	152
Death-benefit annuities [1]	261	1,641	1,438	1,058	1,041	940	875	815	702
In force at end of period, total	**86,632**	**123,630**	**138,820**	**149,241**	**156,513**	**158,758**	**163,161**	**167,752**	**177,289**
Employee annuities	39,375	79,624	98,551	112,710	123,498	128,921	136,245	143,908	155,828
Pensions	46,326	41,931	37,514	33,268	29,424	26,015	22,788	19,553	17,047
Survivor annuities	353	1,372	2,064	2,535	2,919	3,230	3,545	3,797	3,981
Death-benefit annuities [1]	578	703	691	728	672	592	583	494	433

[1] In a few cases payments are made to more than 1 survivor on account of the death of a single individual. Such payments are here counted as single items. Terminations include those by death and by expiration of 12-month period for which death-benefit annuities are payable. Practically all terminations are of the latter type.

No. 284.—Number of Employees, by Amount of Credited Compensation: 1942

[Includes employees covered under Railroad Retirement and Railroad Unemployment Insurance Acts for whom wages were reported by subject employers. Some of these employees also had wages taxable under Federal Insurance Contributions Act and are therefore included in preceding tables on old-age and survivors insurance. The earnings in this table include wages and salaries, commissions, back pay, and payments for time lost as an employee, reported by subject employers; however, the excess over $300 in any one calendar month for an employee is excluded.]

[1] An application for a certificate of benefit rights is submitted when an unemployed worker applies for unemployment insurance benefits for the first time with respect to a benefit year. A certificate of benefit rights is issued to each employee who has filed an application for such a certificate and who has had sufficient earnings from a railroad employer in the base year to qualify for unemployment insurance benefits. Data apply to unemployment in the current year in 1939–40, 1940–41, and 1941–42, and unemployment in the current or prior year beginning with 1942–43.

[2] A claim is prepared for each period beginning with a day of unemployment. The period prior to Nov. 1, 1940, comprised 15 consecutive days, and 14 consecutive days after Nov. 1, 1940. It contains registrations for each day of unemployment in the period and is submitted at the end of the period. Claims are received even where there are insufficient days of unemployment for the payment of benefits.

[3] Adjusted for payment of underpayments, recovery of overpayments and erroneous payments. On claims applying to 15-day periods begun prior to Nov. 1, 1940, benefit payments were certified for qualified claimants who had served their waiting period if the claimant registered for at least 8 days of unemployment; the amount of the certification is the product of the daily benefit amount and the number of days of unemployment in excess of 7. On claims applying to 14-day periods begun on or after Nov. 1, 1940, a benefit payment is certified for qualified claimants who had served their waiting period if the claimant registered for at least 5 days of unemployment, the amount certified being the product of the daily benefit amount and the number of days of unemployment in excess of 4. In addition, benefits are certified on waiting-period claims, if the number of days of unemployment in such period is 8 or more; on such claims the benefit is calculated as the product of the daily benefit amount and the number of days of unemployment in excess of 7. Benefit rates and the total number of days for which benefits may be paid were also increased by the 1940 amendments.

[4] An account is opened with the first benefit payment in a benefit year. A benefit account was exhausted, prior to Nov. 1, 1940, upon payment of benefits for 80 compensable days of unemployment, since then, for 100 compensable days of unemployment. Data cover all operations for the year, regardless of the time at which unemployment occurred. Data for 1940–41 adjusted for comparability to include all beneficiaries receiving benefits for unemployment in the current year by June 30.

[1] Partly estimated; total not as large as sum of State figures because of adjustment for 3 States. See footnotes 6 and 8. [2] Excludes some cases and local funds not administered by State agency.

[3] Excludes program administered without Federal participation. [4] Less than $500. [5] Estimated.

[6] Excludes assistance in kind and cases receiving assistance in kind only and, for a few counties, cash payments and cases receiving cash payments. Amount of payments shown represents approximately 60 percent of total.

[7] Includes unknown number of cases receiving medical care, hospitalization, and burial only, and total payments for these services.

[8] Represents statutory monthly pension of $30 per recipient; excludes payments for other than a month.

[9] Represents 1,793 cases aided by county commissioners, and 3,255 cases aided under program administered by State Board of Welfare; amount of duplication believed to be large.

[1] Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity; the number of survivor annuities in force as of June 30 increased from 26 in 1941 to 214 in 1945. Beginning Jan. 24, 1942, employees with at least 5 years of service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain a deferred annuity at age 62; such annuitants increased from 5 as of June 30, 1942, to 2,104 as of June 30, 1945.

[2] Through Jan. 23, 1942, data relate to refunds of amounts to employees' credit in the fund paid to employees who were not eligible for an annuity or, if eligible, elected to take a refund. Beginning Jan. 24, 1942, data relate to refunds for service prior to Jan. 24, 1942, for employees separated on or after that date with at least 5 years of service and refunds to employees separated on or after that date with less than 5 years of service.

[3] Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

[4] Beginning Sept. 1, 1934, data relate primarily to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Included also are refunds to disability annuitants whose entitlement to an annuity was terminated.

[5] Not available.

Townships	15	81	23	124	30	814	294

[1] Refunds to members withdrawing from systems are excluded. The inclusion of lump-sum or nonrecurring payments makes annual benefit payments more than 12 times monthly benefit payments from which lump-sum payments are excluded. Moreover, annual benefits reflect additions to and withdrawals from old systems, as well as creation of new systems, during year.
[2] Included with municipalities are 37 school districts and 6 special-purpose districts.
[3] Included with counties are 2 school districts.

11. Income and Expenditures

[Data in this section relate to continental United States]

No. 299.—National Income by Distributive Shares: 1929 to 1945

[National income measures the earnings of the labor and capital employed in the productive process. It includes economic activities carried on by all producing entities—corporations, partnerships, individual enterprises, and governmental agencies. It is obtained by summating all wages, salaries, net dividends, net rents, net interest, net income of proprietors, and corporate savings. Corporate savings (positive and negative) represent net profits after deduction of cash dividends and taxes]

[Millions of dollars]

[1] Excludes subsistence to members of the armed forces. Includes cash pay and allowances of Federal military and civilian personnel stationed outside the continental United States.

[2] Includes pay rolls and maintenance of Civilian Conservation Corps enrollees and pay rolls of Civil Works Administration, Federal Emergency Relief Administration, and Federal Works Program projects plus administrative pay rolls outside of Washington, D. C., for all except the Federal Works Program. Area office employees and their pay rolls under Federal Works Program are included with regular Federal Government employment and pay-roll figures.

[3] Includes contributions to Railroad Retirement and Railroad Unemployment Compensation Funds.

[4] Employer contributions to pension funds under private plans and under systems for government employees, compensation for industrial injuries, etc.

[5] Includes owners' remuneration for personal services and capital.

No. 300.—National Income by Industrial Divisions: 1929 to 1943

[Data on dividends, interest, and corporate savings by industrial divisions for 1934 and subsequent years are based on a different industrial classification than are the estimates of these items for earlier years because of a change in the Revenue Act of 1934. Special tabulations of the Bureau of Internal Revenue permitted the making of estimates for 1934 on the earlier basis. For specific items in certain industries the variations are substantial, but for total income the changes were small]

[Millions of dollars]

No. 301.—Income Payments to Individuals, by States: 1929 to 1944

[Income payments to individuals comprise (1) wages and salaries after deduction of employees' contributions to social insurance funds; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, including dividends, interest, and net rents and royalties; and (4) "other" income payments, which include direct relief, labor income items such as work relief, pensions, compensation for injuries, and social insurance benefits; mustering-out payments to veterans (in 1944); and (in 1942–44) family-allowance payments and voluntary allotments to dependents of military personnel. Income payments are distributed among the States on a where-received basis (with exceptions noted below): only payments made to residents of continental U. S. are included. Income payments differ from national income (tables 299 and 300) by the inclusion only in income payments of items—termed "transfer payments"—which do not represent returns for labor or capital services rendered currently and by the inclusion only in national income of certain items which are not actual payments to individuals. Income payments not included in national income are direct relief, veterans' pensions, adjusted service benefits (the Soldiers' Bonus), retirement payments by government, social insurance benefits, the Government's contribution to allowances paid to dependents of enlisted military personnel, and mustering-out payments. Items covered in national income but not in income payments include retained earnings of corporations and contributions by both employees and employers under social insurance legislation. Additionally, national income includes pay of Federal military and civilian personnel stationed outside continental U. S., whereas the State income series excludes such pay with the exception of that part flowing into this country in the form of voluntary allotments to individuals and contributions to family-allowance payments to dependents of military personnel. Per capita income payments are derived by division of total income payments by total population excluding Federal civilian and military personnel stationed outside continental U. S. In five States however, income was transferred from the State of recipient's employment to State of residence before computation of per capita income. These States are N. Y., N. J., D. C., Md., and Va. In this connection, it should be noted that the wage-and-salary component of total income payments is allocated by States, on the basis of State of employment, rather than of residence. For all States except the five noted above, it is assumed that State of employment is identical with State of residence.]

No. 302.—Gross National Product or Expenditure: 1939 to 1945

[Gross national product represents the total value of currently produced goods and services flowing to Government, to consumers, and for purposes of gross capital formation to business. It differs from the national income by including business taxes, charges to depreciation, and certain other business reserves. These are elements of the value of total production, but do not constitute income accruing to individuals]

[In billions of dollars]

ITEM	1939	1940	1941	1942	1943	1944	1945

No. 303.—Distribution of American Families and Single Consumers in Urban and Rural Areas, by Money Income: 1941

[Figures relate to all civilian consumers except inmates of institutions. Families are defined as economic units of two or more persons contributing to or mainly dependent on a common or pooled income. Single consumers are persons who live alone or as lodgers or servants in private homes, rooming houses, or hotels]

[1] Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining the amounts shown on line 2 with personal taxes.

Inheritances and large gifts are not considered current income; inheritances and gift taxes are excluded from personal taxes.

[2] Includes expenditures for alcoholic beverages.

[3] Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

[4] Value of bonds purchased less those cashed.

[5] Figures represent differences between income and expenditures plus net war bond purchases and insurance premium payments. Included as savings are amounts deducted for social security, retirement plans, etc., not available separately.

[6] Family size is based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

[7] A family member that worked for pay (as wage or salary worker or on his own account) at any time during the year was considered an earner.

No. 305.—Distribution of Families and Single Consumers by Money Income Level: 1942

[Estimates cover all civilian consumers except those living in institutions. Families are defined as economic units of two or more persons sharing a common or pooled income and living under a common roof. Single consumers are defined as men or women maintaining independent living quarters or living as lodgers or servants in private homes, rooming houses, or hotels. The term spending unit is used to cover both groups. Civilian money income includes net money income of all civilians except those living in institutions. It therefore excludes all imputed (nonmoney) items, and all income paid to members of the armed forces. Estimates are on a calendar year basis]

Income level	All families and single consumers		Families		Single consumers	
	Number (thousands)	Percent	Number (thousands)	Percent	Number (thousands)	Percent

Education	800	770	30	19	23	4	6	6
Other items	500	390	110	12	12	14	4	3

[1] The estimated population used for all spending units was 129,100,000, of which 121,250,000 were in family units and 7,850,000 were single consumers.

[2] Personal taxes shown here include only individual income taxes, poll taxes, and certain minor personal property taxes. It should be noted that sales taxes, excise taxes, and all indirect taxes on consumption are included under expenditures for goods and services.

[3] Savings are defined as the net change in assets and liabilities of the spending unit during the year, exclusive of gains or losses from revaluation of assets.

[4] Gifts consist only of money contributions to the church, the Red Cross, and other institutions and funds.

[5] Consumption consists of money expenditures only.

No. 307.—Wage or Salary Workers (Except Those on Public Emergency Work) in March 1940, by Wage or Salary Income and Receipt of Other Income in 1939, by Color and Sex

[Wage or salary income includes all money received in 1939 in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, etc., as well as receipts commonly referred to as wages or salaries. The value of income in kind, such as living quarters, meals, clothing, etc., is not included. Persons were classified as with or without other income on the basis of their answers to an inquiry as to whether $50 or more of income was received from sources other than money wages or salaries in 1939. Statistics include persons who were employed as wage or salary workers (except on public emergency work) during the census week, and persons seeking work who were last employed as wage or salary workers. Statistics are based on sample B, see p. 1. Percent not shown where less than 0.1.]

[1] Includes number not reporting on wage or salary income, not shown separately.

[2] The median wage or salary income is based on the number of persons with 1 dollar or more of wage or salary income in 1939. The median was calculated on the basis of the detailed wage or salary intervals shown in table 307. For definition of median, see headnote, table 22, p. 23.

[1] Includes number not reporting on wage or salary income, not shown separately.

[2] The median wage or salary income is based on the number of persons with 1 dollar or more of wage or salary income in 1939. The median was calculated on the basis of the detailed wage or salary intervals shown in table 307. For definition of median, see headnote, table 22, p. 23.

No. 310.—Families by Family Wage or Salary Income and Receipt of Other Income in 1939, by Urban and Rural Areas

[Statistics are based on Sample F, see p. 1. For definitions of wage or salary income and other income, see table 307. Family wage or salary income was obtained by combining the wages and salaries reported by all persons 14 years old and over in the family. Families were classified as "without other income" if all members 14 years old and over reported that they had received no other income.]

12. Prices

GENERAL NOTE

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares a comprehensive weekly and monthly index of wholesale prices, a daily index based on spot market prices of 28 basic commodities; an index of prices of waste and scrap materials; indexes of the cost of food at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities. In addition during the war period the Bureau has prepared a number of special purpose price indexes for the use of the war agencies.

The wholesale-price index is based on primary market quotations of 890 commodities. Prior to April 1944, fewer commodities were covered. In computing the index the price of each article is weighted by the approximate quantity marketed during a period approximating that covered by the index. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The consumers' price index is described in the note to table 320. Prior to September 1945, this index was called the cost-of-living index.

The retail-food-cost indexes presented in this section for periods from January 1935 to March 1943 are based on the distribution of expenditures as shown by the 1934–36 study made by the Bureau of Labor Statistics of expenditures of wage earners' and lower-salaried workers' families. In March 1943, the weights for this index were again revised to take account of changes in food purchases due to wartime shortages and rationing. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, and from 61 thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

The Bureau of Agricultural Economics prepares currently indexes of prices received for farm products and of prices paid by farmers. (In addition to table 313 in this section, see tables 700 and 701.) The index of prices received for farm products included in this section is a revised series replacing the earlier series which has been in use for the past decade. Data cover prices paid to producers for 45 major farm products. Quantity weights applied to the individual commodities have been adjusted to marketings of the most recent prewar years, 1935–39. For other significant changes in the revised index, see source.

In comparing the movement of the indexes of consumers' prices and of the prices paid by farmers for commodities bought for family living (table 701), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

A number of privately compiled indexes of wholesale and retail prices provide some groupings not found in the official indexes. For example, the National Industrial Conference Board prepares current indexes for both a prewar and a wartime budget (table 322). Special purpose indexes have not been included in this section.

The user of price indexes is reminded that the margin of error in price statistics due to unrecorded changes in quality, in discounts, and in undercover charges is greater in war than in peacetime.

No. 317.—Prices, Wholesale—Indexes, All Commodities and by Economic Classes: 1930 to 1945

[**Figures in boxes indicate number of quotations.** Indexes of the National Bureau of Economic Research are weighted arithmetic means for 680 price series, the weights being based upon the average value of production in 1927 and 1931. For method of computing the Department of Labor index, see general note, p. 282. For Department of Labor publications in which data appear, see source note, table 316.]

Year	Department of Labor 1929=100				National Bureau of Economic Research 1929=100				
	All commodities 890 [3]	Raw materials 111 [3]	Semi-manufactures 99 [3]	Manufactured products [1] 680 [3]	All commodities 680 [4]	Producers' goods 418 [4]	Consumers' goods 292 [4]	Durable goods 222 [4]	Nondurable goods [2] 469 [4]
1930	90.7	86.5	87.1	93.1	90.5	88.4	93.2	93.0	89.1
1931	76.6	67.3	73.5	81.5	76.5	73.1	80.7	84.7	72.7
1932	68.0	56.5	63.2	74.4	67.4	64.9	70.6	78.5	61.5
1933	69.2	57.9	69.6	74.6	69.4	68.3	70.9	80.2	64.1
1935	83.9	79.1	78.4	87.0	83.4	83.1	83.9	86.5	81.2
1937	90.6	87.0	90.8	92.3	90.8	93.1	88.0	98.7	87.2
1939	80.9	72.0	82.0	85.1	80.6	82.1	78.6	95.4	74.0
1940	82.5	73.7	84.2	86.3	82.8	84.5	80.8	98.7	76.3
1941	91.6	85.6	92.5	94.3	92.1	94.3	89.6	104.2	87.2
1942	103.7	103.2	98.6	104.3	104.5	105.8	103.2	110.3	102.9
1943	108.2	115.0	98.9	105.9	109.4	110.3	108.4	110.6	109.5
1944	109.1	116.1	100.2	106.7	110.4	112.5	108.0	112.2	110.2
1945	111.0	119.8	102.1	107.7	112.6	115.4	109.1	113.8	112.6

[1] Formerly "Finished products." [2] Perishable and semidurable. [3] Effective Apr. 1944. In earlier years a smaller number of commodities was included. [4] The sum of the number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 318.—Indexes of Spot Market Prices of 28 Basic Commodities and of Waste and Scrap Materials: 1939 to 1945

[**August 1939=100.** The index of 28 basic commodities is calculated daily and is available since August 1939. Most of the 28 commodities used in the daily index are basic raw materials and many of them are quoted on organized exchanges or "future" markets. This index is, therefore, much more sensitive to changes in market conditions than is the monthly wholesale price index. The index is calculated as an unweighted geometric average of the daily price quotations. The index numbers of waste and scrap materials are calculated weekly and are available since January 1939. The quotations for the 44 commodities in the waste and scrap index are those published in standard trade journals. The index is calculated as an unweighted geometric average of the weekly price quotations.]

Period	Waste and scrap materials					28 basic commodities
	All waste and scrap	Metals	Textiles	Waste paper	Scrap rubber	
December 1939	134.9	120.1	140.9	149.6	125.1	123.3
December 1940	133.7	136.3	135.8	107.8	149.1	117.6
December 1941	165.7	131.7	171.2	237.6	209.9	158.4
December 1942	155.4	119.7	171.7	138.0	257.1	171.7
December 1943	159.1	110.4	173.4	269.2	162.6	178.7
December 1944	157.8	99.8	173.1	339.5	159.8	182.6
March 1945	159.5	102.6	173.6	339.5	165.9	183.6
June 1945	160.5	103.9	174.0	339.5	171.7	183.7
September 1945	161.2	103.9	175.2	339.5	170.1	184.4
December 1945	163.6	101.2	182.8	339.5	160.1	187.1

No. 320.—Consumers' Price Index for Moderate-Income Families in Large Cities: 1913 to 1945

[1935–1939=100. The consumers' price index measures average changes in retail prices of selected goods, rent, and services, weighted by quantities bought by families of wage earners and moderate-income workers in large cities in 1934–36. Indexes for commodity groups other than food are compiled from price data collected in 34 cities since Sept. 15, 1940, and a smaller number in earlier years; food indexes have been based upon changes in food prices in 56 cities since Mar. 1943. The list of items priced for the indexes includes approximately 180 goods and services. For many goods a number of different grades and qualities are priced so that as of the fall of 1944, 340 different articles or qualities of articles were included in the index. Sales taxes are included wherever applicable, but income taxes, social security deductions, and bond deductions are not included. The weights used from 1913 to 1924 are based on a study of the family expenditures of this group in 1917–19. From 1924 to 1935 the weights of the individual goods and services priced are based on the 1917–19 study, and the group indexes are based on the estimated distribution of family expenditures in the period. From 1935 on the weights are based on a study of family expenditures in 1934–36. The items covered since 1935 represent about 70 percent of the expenditures of families whose incomes ranged from $1,250 to $2,000 in 1934–36. Changes were made in the weights for the food cost indexes to take account of wartime food shortages and rationing in Mar. 1943. As certain goods disappeared from retail stores in various cities covered, because of wartime shortages of materials, they were deleted from the index for the given city without allowing the index to decline on that account. An effort was made to obtain prices of goods of comparable quality from one pricing period to the next. When goods of the quality usually priced disappear from the market and it is possible to purchase only a higher quality, the resulting increase in cost to the consumer is reflected in the index. The indexes do not show, however, the full wartime effect of such factors as lowered quality and the disappearance of low-priced goods. The President's Committee on the Cost of Living estimated that such factors together with certain others not fully measured by the index would add a maximum of 3 to 4 points to the index for large cities between Jan. 1941 and Sept. 1944. If small cities were included in the national average, one-half point would be added. If account is also taken of continued deterioration of quality and disappearance of low-priced merchandise between Sept. 1944 and Sept. 1945, the over-all adjustment for the period Jan. 1941 to Sept. 1945 would total approximately 5 points. As merchandise of prewar quality and specifications comes back into the market and the Bureau is able regularly to price it again, this adjustment factor will gradually decrease and finally disappear.]

No. 322.—Cost of Living of Wage Earners and Lower-Salaried Clerical Workers in 60 Cities—Indexes: 1939 to 1944

[January 1939=100. Data cover the prices of important commodities and services entering into family living expense, i. e., food, housing, clothing, fuel, light, housefurnishings, medical fees, automobile purchase and operation, carfare, etc. The wartime indexes included in the 1944-45 Statistical Abstract have been discontinued because the variation over a period of 3 years (1942-44) was insufficient to warrant the maintenance of 2 series]

No. 325.—Prices, Average Retail, of Principal Articles of Food: 1913 to 1945

[Prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per dozen), and tomatoes (cents per No. 2 can). Data are averages of prices as reported by retail dealers in 51 large cities prior to 1943 and in 56 cities thereafter. Prices for individual cities are combined with the use of population weights.]

YEAR AND MONTH	Wheat flour	Corn meal	Bread, white	Round steak	Chuck roast	Pork chops	Bacon, sliced	Ham, whole	Lamb, leg	Chickens, roasting	Butter	Cheese

No. 326.—Unit Values, Annual Average, of Important Articles Imported: 1914 to 1944

NOTE.—The values are required by law to represent the values of the goods *in the foreign markets* whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly.

YEAR ENDED—	Cheese, per pound	FISH, CURED, PER BARREL (200 POUNDS)		HIDES AND SKINS, PER POUND		Rice, per pound	Wheat, per bushel	Copra, per pound	Flaxseed, per bushel	Cocoa, per pound	Coffee, per pound	Tea, per pound	Cane sugar, per pound	Rubber, crude, per pound	Shellac, per pound	TOBACCO, LEAF, PER POUND		Cotton, unmanufactured, per pound	Jute and jute butts, per ton	Flax, per ton
		Herring	Mackerel	Goat	Cattle											Cigar wrappers	Other leaf

13. Elections

GENERAL NOTE

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 155 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial or longer—for different types of offices and other purposes (see table 333). No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data on elections to Federal offices, Army and Navy voting in the 1944 elections, State-wide elections, and approximately the number of elections held in specified years by each type of local government in the United States. State and city proposals voted upon are summarized. City bond-issue proposals voted upon are also presented in more detail in Section 15, State and Local Government Finances and Employment, table 398, p. 381. The numbers of registered voters in 1942 in each city of 25,000 inhabitants or more are given in the Cities Supplement to the Statistical Abstract.

[1] Totals for years prior to 1928 do not include numbers of votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928 and subsequent years include numbers of miscellaneous and scattering ballots, so far as reported.

[2] For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912 and 1916, Progressive; 1920, 1928, and 1932, Farmer-Labor; 1936, Union; 1940, and 1944, miscellaneous. For 1924, votes for La Follette-Wheeler electors, variously designated under party names as Independent Progressive, Progressive, Socialist, Socialist and Independent, Farmer-Labor, etc.

[3] Democrat-Populist.

[4] Socialist-Labor only. In 1924 practically all the Socialist vote was cast for La Follette and Wheeler, official candidates of both the Socialist and the Independent Progressive parties. (See note 2.)

[5] Workers.

[6] Not available.

No. 332.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1940

Note.—The population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of the number of slaves. In 1940, it was held that all Indians are subject to Federal taxation. The apportionment ratios were arbitrarily chosen until 1850. From 1850 to 1900, these ratios were the apportionment population of the U. S. divided by the number of Representatives. From 1910 on, the apportionments were computed from priority lists rather than from ratios. There was no apportionment in 1920. For a discussion of methods of apportionment, see Senate Document No. 304, 76th Congress, 3d session, "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington.

No. 333.—Number of Final (General), Special, and Primary Elections Held in 1944, by State, and Total Number Scheduled for 1945

[As used here, an "election" is the casting of votes on a single day for candidacies for office or on initiative and referendum proposals of a governmental unit—State, county, city or village, township, school district, or other special-purpose district. See table 376, p. 363, for numbers of governmental units of each type. Primary elections include those held for selection of party officers and convention delegates. Special elections are those held only to fill vacancies in office or to submit proposals to popular vote at times other than regularly scheduled elections]

[1] No candidate for the office.
[2] The Farmer-Labor gubernatorial candidate in Minnesota received 299,917 votes.
[3] There were 2 Independent candidates for the office of U. S. Senator in Nebraska. 1 received 108,851 votes.
[4] Except for the office of U. S. Representative, for which there were 2 choices, the single office receiving the highest State-wide vote was the office of Governor. The total vote cast in North Dakota was 181,900.
[5] No vote reported for Chesterfield County, Va.
[6] There were 4 gubernatorial candidates in Wisconsin. The Progressive Party candidate received 397,664 votes.

No. 336.—Votes for Single Office Receiving Highest State-Wide Vote in 1942 Primary Elections

[In a number of States nomination at the primary is tantamount to election; hence the extent of participation by voters at the primary is sometimes greater than at the general election. With few exceptions, the statistics are those reported to the Bureau of the Census by the respective Secretaries of State.]

STATE	Single office receiving highest State-wide vote	VOTE, BY PARTY			
		Total	Democratic	Republican	Other
Total		**15,943,631**	**9,438,294**	**6,321,013**	**184,324**

Wyoming	Governor	50,702	21,883	28,819	[1]

[1] No candidate for any Federal or State office.
[2] Nomination of candidates for public office is by the convention method in Connecticut and Rhode Island.
[3] No data.
[4] Democratic primary elections were held only for U. S. Congressmen (in the 3d, 6th, 7th, 8th, and 9th congressional districts).
[5] The Republican Party in Nevada did not enter candidates in the primary election except for State senator, and State assembly, 3d district, in Washoe County, and member of the assembly in Mineral County.
[6] Based on the returns from only 18 congressional districts in New York.
[7] There was no Republican candidate for the office of judge of the Utah supreme court. However, the Republican Party polled 13,720 votes of the 35,054 votes cast for U. S. Congressmen elected from the 2 districts into which Utah is divided.
[8] Primary elections were held only for U. S. Congressmen (in the 6th and 8th congressional districts).

14. National Government Finances

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for appropriations for the maintenance of the various departments and establishments. The Treasury Department publishes a "Digest of Appropriations" each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the "Combined Statement of Receipts, Expenditures and Balances," which is an abstract of the books of the Treasury relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the "Daily Statement of the United States Treasury," which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a statement of the Public Debt as of the end of the month, on the first working day of the next month, and certain other special statements on the 15th day of each month. The "Treasury Bulletin," a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The "Annual Report of the Secretary of the Treasury" is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The "Annual Report of the Commissioner of Internal Revenue" gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are dealt with in the "Circulation Statement of United States Money" (monthly) and "Prices and Yields of Public Marketable Securities . . ." (monthly), both issued by the Treasury Department. See tables 403–405 and 488, pp. 386–388, and 447.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department in accordance with Section 63 of the Internal Revenue Code, which requires the preparation and publication annually of statistics reasonaly available with respect to the operation of the income tax laws. The annual report, Statistics of Income, Part 1, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. Statistics of Income, Part 2, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. Data from these reports appear on pages 321–354.

ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the General Fund of the Treasury, from which all expenditures are made. No money may be drawn from the Treasury except in accordance with appropriations made by law.

Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. ***General accounts.*** The principal categories of general account receipts are income taxes, miscellaneous internal revenue, employment taxes, customs, and miscellaneous receipts, such as proceeds from the sale of surplus property.

There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) annual appropriations, which are available for incurring obligations only during a specified fiscal year; (b) multiple-year appropriations, which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year) appropriations, which are available for incurring obligations

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

until the appropriation is exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific appropriations, which are fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite appropriations, which are indefinite amounts (so much as may be necessary) provided by permanent legislation without annual action of Congress, such as the indefinite appropriation to cover interest on the public debt.

2. Special accounts. Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items have been those receipts for the reclamation fund and receipts under the Mineral Leasing Act, the National Forest Funds, War Contributions, and deposits for defense aid under lend-lease legislation.

3. Trust accounts. Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal Old-Age and Survivors Insurance Trust Fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as expained below, and the basis used is noted at the head of each table.

Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the Daily Treasury Statement. This statement is compiled from the latest daily financial reports received from Government depositories and Treasury offices holding Government funds, and because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Statements for a given period compiled from the records of the agents handling Government funds may differ from the Daily Treasury Statement because of the timing difference. The Daily Treasury Statement for a given period includes items for a previous period received too late for inclusion in the Statement for that period, and does not include, of course, items not received in time for publication in the current period.

Other tables will be noted as on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

Public Debt accounts. Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

Warrants issued. By law, warrants evidence the formal covering of receipts into the Treasury. The term when relating to expenditures merely refers to the advance of funds to disbursing officers for expenditure, and tables when compiled on this basis show expenditures considerably in advance of actual disbursement by disbursing officers.

Checks issued. This term relates to expenditure statements made up on the basis of checks drawn by disbursing officers.

Collections basis. Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer.

Further details with respect to Treasury accounting bases and procedures are shown on pages 437–439 of the Annual Report of the Secretary of the Treasury for the fiscal year 1945.

No. 340.—Receipts, Expenditures, and Surplus or Deficit of the National Government: 1789 to 1945

NOTE.—**In thousands of dollars.** Figures prior to 1916 are on the basis of warrants issued (net); thereafter on the basis of daily Treasury statements except as noted. General, special, and trust accounts are included for 1789 to 1930; trust and related accounts (increment on gold, etc.) are excluded beginning with 1931. For explanation of bases used and of accounts, see general note, pp. 310 and 311. Expenditures from trust funds, etc., are shown for 1943–45 in table 341.

[1] Surplus or deficit takes into account public debt retirements chargeable against ordinary receipts beginning 1918. See p. 313 for expenditures chargeable against ordinary receipts.

[2] Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to close of fiscal year 1922, and amounts transferred to civil-service retirement and disability fund, fiscal years 1921 to 1926 inclusive. For 1927 and subsequent years salary deductions are included in "postal expenditures," deductions having been paid to and deposited by disbursing clerks for credit of retirement fund.

[3] Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in miscellaneous receipts.

[4] On basis of warrants issued 1789 to 1930; thereafter, on basis of checks issued.

[5] Average for period Mar. 4, 1789, to Dec. 31, 1800.

[6] Averages are for entire period though there were no amounts under these items for certain years.

[7] Years ended Dec. 31, 1801 to 1842; average for 1841–1850 is for the period Jan. 1, 1841, to June 30, 1850.

[8] Less than $500. [9] Average for 1863 to 1865. [10] Average for 1881 and 1884. [11] One year only, 1895.

[12] One year only, 1910.

[13] After deduction of net appropriations to Federal old-age and survivors insurance trust fund.

[14] Civil expenditures under War and Navy Departments at Washington are included in "Civil and miscellaneous" prior to 1916, thereafter under the War and Navy Departments, respectively. War Department includes expenditures for rivers and harbors and Panama Canal.

[15] On basis of warrants issued from 1789 to 1930; on basis of checks issued 1931 and subsequent years.

[16] Includes only Army and Navy pensions for service prior to World War, and fees of examining surgeons in Pension Bureau, and is exclusive of payments made by the War Risk Insurance Bureau and Veterans' Bureau to veterans of the World War, and salaries under Bureau of Pensions, which are included in civil and miscellaneous expenditures.

[17] On basis of warrants issued prior to 1922. Exclusive of amounts transferred to civil-service retirement and disability fund.

[18] See notes on corresponding periods, p. 312.

[19] See note 6, p. 312. [20] Excludes interest accounts which are included in trust fund expenditures.

[21] Revised to reflect expenditures under current classifications. [22] Excess of credits; deduct.

No. 343.—Internal Revenue Receipts, by Chief Tax Sources: 1863 to 1945

Note.—**All figures in thousands of dollars.** The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 340 and 341 which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table.

YEARLY AVERAGE OR YEAR ENDED JUNE 30—	Total	Spirits and wines [1]	Fermented malt liquors [1]	Tobacco manufactures [1]	Income, excess profits, incl. unjust enrichment [2]	Estate and gift	Manufacturers', etc. excise [3]	Documentary stamps [4]	Other [5]
1863–1865	122,942	18,079	2,551	7,697	28,005	305	43,444	6,915	15,945

No. 346.—Income Tax Returns, Individual, Estate, and Trust—Summary: 1913 to 1942

[All tabulations from Statistics of Income include data for Alaska, District of Columbia, and Hawaii. Statistics are based on returns as filed, unaudited except to insure proper execution. Under the revenue laws, individuals are required to file returns as follows: (1) Single or married, for 1913 through 1916, those with net income of $3,000 or over; (2) single, or married and not living with husband or wife, for 1917 through 1924, $1,000 or over; 1925 through 1931, $1,500 or over; 1932 through 1939, $1,000 or over; for 1940, those with gross income of $800 or over, for 1941, $750 or over, and for 1942, $500 or over regardless of the amount of net income; (3) married and living with husband or wife, filing a joint return, for 1917 through 1923, those with net income of $2,000 or over; 1924, $2,500 or over; 1925 through 1931, $3,500 or over; 1932 through 1939, $2,500 or over; for 1940, those with gross income of $2,000 or over, for 1941, $1,500 or over, and for 1942, $1,200 or over regardless of the amount of net income; (4) every individual with gross income of $5,000 or over for 1921 through 1939, and as stated above for 1940–42. *Data for returns showing no net income, filed in accordance with the latter provision, are not included in statistics shown.* Fiduciaries are required to file returns on the same basis as single individuals, except that a return is required for every estate or trust of which any beneficiary is a nonresident alien, and for 1938 through 1942, a return is required for every trust having a net income of $100 or over. Partnership net profit or net loss is reported on the individual returns of copartners according to their shares]

[All money figures in millions of dollars]

[1] Net income is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax.

[2] Optional tax is that paid in lieu of normal tax and surtax by individuals electing to file Form 1040A, for gross income of not more than $3,000 entirely from salary, wages, dividends, interest, and annuities. (Rents and royalties are included for 1941 only.)

[3] For 1938 through 1942, the alternative tax is imposed on returns with net long-term capital *gain* when such alternative tax is less than the sum of the normal tax and surtax computed on net income including net long-term capital gain; for 1938 through 1941, the alternative tax is imposed on returns with net long-term capital *loss* when such alternative tax is greater than the sum of the normal tax and surtax computed on net income after deducting net long-term capital loss. Alternative tax on returns reporting deficit due to net long-term capital loss, which tax amounted to $615,000 for 1938; $300,000 for 1939; $473,000 for 1940; and $2,326,000 for 1941, is excluded.

[4] Credits against tax consist of: (1) for 1923, amount of 25 percent reduction provided by Revenue Act of 1924, (2) for 1924–31, 25 percent of tax on earned net income, and (3) for 1924–33, 12½ percent of capital net loss from sales of assets held more than 2 years where such loss has not been deducted in arriving at net income. For all years, credits for (1) tax paid at source and (2) taxes paid to foreign countries or possessions of the U. S. are not included in credits against tax as shown and are not deducted from total tax as shown.

[5] Includes war excess-profits tax of $101,250,000 on individuals and $103,888,000 on partnerships.

[6] Includes defense tax 1940, $128,350,000; 1941, $1,150,000; not shown separately in table. The defense tax, applicable only to taxable years beginning in 1940, is 10 percent of total income tax before deducting any credit, but not in excess of 10 percent of amount by which net income exceeds such income tax.

Average tax per return	$123	$122	$102	$151	$244	$242	$1,272

[1] Current year business profit or loss. (Net operating loss deduction is reported in "Other deductions.")

[2] Partnership profit or loss, as reported on the income tax return of the partner, excludes (*a*) partially tax-exempt interest on Government obligations issued prior to Mar. 1, 1941, (*b*) dividends on share accounts in Federal savings and loan associations issued prior to Mar. 28, 1942, and (*c*) net gain or loss from sales or exchanges of capital assets.

[3] For 1938–41, net short-term capital gain consists of net gain on sale of capital assets held 18 months or less, and net long-term capital gain or loss consists of net gain or loss on sales of capital assets held over 18 months. (Net short-term capital loss is not deductible in current year.) For 1939–41, net short-term capital gain is after deduction due to the carry-over from a prior year net short-term capital loss. For 1942, net gain or loss from sales of capital assets is the net result of combining short-term (6 months or less) and long-term (more than 6 months) gains and losses except that the short-term gain is first reduced by the carry-over. The deduction allowable for such a loss is limited to net income computed without regard to capital gains and losses or $1,000 whichever is smaller. Such gains (or losses) from partnerships and common trust funds are included.

[4] For 1938–40, net gain or loss from sale or exchange of property, used in trade or business, of a character which is subject to the allowance for depreciation; for 1941–42, includes certain Government bonds, and for 1942 also includes real property used in trade or business.

[5] Includes all foreign and domestic dividends *except* those received through partnerships and fiduciaries, and for 1941–42, dividends reported on Form 1040A. For 1942, dividends on share accounts in Federal savings and loan associations, issued on or after Mar. 28, 1942, are included. (See note 9.)

[6] Income from fiduciaries, as reported on the return of the beneficiary, excludes (*a*) partially tax-exempt interest on Government obligations issued prior to Mar. 1, 1941, (*b*) dividends on share accounts in Federal savings and loan associations, issued prior to Mar. 28, 1942, and (*c*) net gain or loss from sales or exchanges of capital assets received from common trust funds.

[7] Partially tax-exempt interest is that received on certain Government obligations issued prior to Mar. 1, 1941, namely, United States Savings bonds and Treasury bonds, owned in excess of $5,000, and obligations of instrumentalities of the United States other than those issued under the Federal Farm Loan Act or that act as amended. Such interest received through partnerships and fiduciaries is included. Dividends on share accounts in Federal savings and loan associations, issued prior to Mar. 28, 1942, are included for 1941–42. For 1941, the taxable interest on Government bonds reported on non-taxable returns is also included.

[8] Taxable interest on Government obligations is that received on Treasury notes issued on or after Dec. 1, 1940, and on obligations of the United States or any agency or instrumentality thereof, issued on or after Mar. 1, 1941; the amounts reported exclude such interest received through partnerships and fiduciaries. For 1941, only the taxable interest reported on taxable returns, Forms 1040 and 1041, is included.

[9] Other income includes for 1938–40, dividends on share accounts in Federal savings and loan associations; for 1941–42, dividends, interest, annuities, and (for 1941 only) rents and royalties, reported on Form 1040A.

[10] Medical and dental expenses in excess of an amount equal to 5 percent of the net income computed without the deduction. Maximum deduction is $2,500 in the case of a head of a family or a joint return of husband and wife, and $1,250 for all other individuals.

[11] The amount distributable to beneficiaries reported on the taxable fiduciary returns, is a deduction allowed in computing the taxable net income of an estate or trust.

[12] See note 1, table 346. [13] Includes defense tax. See note 6, table 346.

No. 354.—Income Tax Returns, Corporation—Summary: 1916 to 1943

[All tabulations from Statistics of Income include data for Alaska, District of Columbia, and Hawaii. Statistics are based on returns as filed, unaudited except to insure proper execution. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Under the Revenue Act of 1934, the privilege of filing a consolidated return for a group of affiliated corporations was limited to common carriers by railroad and their related leasing and holding companies. The Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railway corporations. These changes result in marked differences between returns for 1934 through 1941, and those for 1933 and prior years, in net-income or deficit classification and in size of total assets, as well as in distribution by industries. Tables showing effect on tabulated data of discontinuance of consolidated returns except by railroad corporations appear in Statistics of Income for 1934, Part 2. Beginning 1942, the consolidated return privilege is again extended, in general, to all corporations. Corporations are classified industrially on the one business activity which accounts for the largest percentage of total receipts. Therefore, the industrial groups do not reflect pure industry classifications. As a result of the application of the Standard Industrial Classification, the number of major and minor industrial groups for 1938 and subsequent years has been increased over that for 1937 and prior years. Changes in the contents of the groups are listed in Statistics of Income for 1938, Part 2]

[All money figures in thousands of dollars]

Calendar year	Number of returns				Net income [2]	Deficit [2]	Tax

1942 [7]	479,677	269,942	172,723	37,012	24,052,358	1,000,746	12,256,396	4,337,728	7,918,668
1943 (prel.) [7]	455,753	283,698	136,787	35,268	28,689,371	898,720	15,898,312	4,476,487	11,421,825

[1] Returns of inactive corporations prior to 1927 are included in those reporting no net income.

[2] For 1922–32, and for 1940–43 net income tabulated is amount before deduction due to net operating loss of prior year. (For amount of such loss allowed as a deduction from net income in computing taxable income for 1929–32, and for 1940–42, see table 359, p. 341.) For 1935 and prior years, net income or deficit is amount reported for income tax computation. For 1936 and later years, net income or deficit is amount reported for (declared value) excess-profits tax computation and includes dividends received on stock of domestic corporations subject to taxation under the effective Federal tax law, and interest received on certain Government obligations subject to excess-profits tax. Beginning 1936, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before such deduction.

[3] The tax credit for taxes paid to foreign countries, allowable for 1918 and subsequent years, has *not* been deducted from the amounts of income tax as tabulated.

[4] War-profits and excess-profits taxes provided by the Revenue Acts of 1917, 1918, and 1921 were in effect 1917–21; the amount shown for 1922 was reported on returns with fiscal years beginning in 1921; and (declared value) excess-profits tax under the NIRA was in effect for 1933 and subsequent years. Figures for 1940–43 include, in addition to the declared value excess-profits tax, the following amounts of excess-profits tax under the Second Revenue Act of 1940: For 1940, $373,511,000; for 1941, $3,359,186,000; for 1942, $7,851,814,000; and for 1943 (prel.) $11,268,477,000, the amounts for 1942 and 1943 being *after* (1) the credit for debt retirement, (2) the net post-war refund, and (3) the amount deferred under sec. 710 (a) (5) (relating to abnormalities under sec. 722) as well as adjustments under other relief provisions; and *before* any changes resulting from renegotiation of war contracts after the returns were filed.

[5] For 1936–38, includes surtax on undistributed profits according to provision of Revenue Act of 1936. Amount included for 1938 is that reported on fiscal year returns with taxable year beginning in 1937.

[6] Includes defense tax. Amount included for 1941 is from returns with fiscal years beginning in 1940.

[7] (a) For 1942 and 1943, income and taxes as shown do not reflect the effect of changes resulting from the renegotiation of war contracts after the returns were filed. Amounts representing the reduction in profits and taxes due to renegotiation after the returns were filed are shown in Statistics of Income for 1942, Part 2. (b) Beginning 1942, instead of the special deduction for reserves which was previously allowable to life insurance companies in arriving at net income, there is allowable a credit against net income. As a consequence, there is an increase in both the number of returns reporting net income and in the amount of net income reported.

[1] To improve historical comparability, figures for 1938 through 1942 are adjusted by transferring certain minor groups from the classification in which they are tabulated in tables 358 and 360 to the classification in which they were tabulated for 1937 (figures in roman) in this table. Figures for 1937 in italics show adjusted amounts which would have resulted if the industrial classification of 1938 and subsequent years had been in effect.

[2] Total tax for 1942 includes $15,723,000 excess profits tax not distributed by industrial groups. See also note 7(a), table 354.

[3] "Textile-mill products" include "Clothing and apparel," for years prior to 1936.

1942 [8]	5,194	[15] 4,904	32,623	23,389	23,052	378	12,256	11,132	5,607	73

[1] For items included in "Total compiled receipts" see table 360.

[2] Gross sales, less returns and allowances, where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

[3] Where inventories are not an income-determining factor. Figures for years prior to 1932 represent gross profits from operations other than trade and manufacturing.

[4] For 1929–33 consists of wholly tax-exempt interest on obligations of States, Territories, or political subdivisions thereof, or the District of Columbia; securities issued under the Federal Farm Loan Act or such act as amended; and obligations of the United States or its possessions; for 1934 through 1942 includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941–42.

[5] Included in "Other deductions" prior to 1933.

[6] Beginning 1936 "Dividends from domestic corporations" are taxable income tabulated with "Other receipts."

[7] These deductions include contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

[8] See note 7, table 354.

[9] See note 13, table 360.

[10] Compiled receipts less compiled deductions.

[11] See note 2, table 354; and note 5, table 364.

[12] Deducted by corporations reporting net income.

[13] In addition to income tax, includes: declared value excess-profits tax for 1933 and subsequent years; surtax on undistributed profits, 1936 through 1938, the amount for 1938 being that reported on returns with fiscal year beginning in 1937; for 1940–42, excess-profits tax under provisions of Second Revenue Act of 1940; and also for 1940 and 1941, the defense tax. The defense tax for 1941 is that reported on returns with fiscal years beginning in 1940.

[14] Deficit.

[15] Includes amortization of emergency facilities for 1940 and later years.

[1] Excludes returns of inactive corporations.

[2] Excludes nontaxable income other than tax-exempt interest on Government obligations.

[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations" see "Compiled deductions."

[5] Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the U. S. or any agency or instrumentality thereof.

[6] Less than $50,000.

[7] Interest on U. S. savings bonds and Treasury bonds owned in principal amount of over $5,000 issued prior to Mar. 1, 1941.

[8] Interest on obligations of instrumentalities of the U. S. (other than obligations of Federal land banks, Joint-stock land banks, and Federal intermediate credit banks) issued prior to Mar. 1, 1941.

[9] Interest on obligations of States, Territories, or political subdivisions thereof, the District of Columbia and U. S. possessions; obligations of the U. S. issued on or before Sept. 1, 1917; all postal savings bonds; Treasury notes issued prior to Dec. 1, 1940, and Treasury bills issued prior to Mar. 1, 1941; obligations issued prior to Mar. 1, 1941, by Federal land banks, joint-stock land banks, and Federal intermediate credit banks

and U. S. savings bonds and Treasury bonds owned in principal amount of $5,000 or less, issued prior to Mar. 1, 1941.

[10] "Net capital gain" is the net amount of gain arising from the sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductible for the current year, but may be carried over and applied against capital gains in the five succeeding taxable years.)

[11] Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to the allowance for depreciation.

[12] Includes taxes which are reported in "Cost."

[13] Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of the U. S. if any portion is claimed as a tax credit; (4) taxes assessed against local benefits;(5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[14] Limited to 5 percent of net income as computed without the benefit of this deduction.

[15] Interest exempt from declared value excess-profits tax, items 7 and 8 above.

[16] Deduction due to net operating loss carry-over from the two preceding taxable years.

[17] Compiled net loss or deficit.

[1] Excludes returns of inactive corporations.

[2] Excludes nontaxable income other than tax-exempt interest on Government obligations.

[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations," see "Compiled deductions."

[5] Interest on Treasury notes issued on or after Dec. 1, 1940 and obligations issued on or after Mar. 1, 1941, by the U. S. or any agency or instrumentality thereof. [6] Less than $50,000.

[7] Interest on U. S. savings bonds and Treasury bonds owned in principal amount of over $5,000 issued prior to Mar. 1, 1941.

[8] Interest on obligations of instrumentalities of the U. S. (other than obligations of Federal land banks, joint-stock land banks, and Federal intermediate credit banks) issued prior to Mar. 1, 1941.

[9] Interest on obligations of States, Territories, or political subdivisions thereof, the District of Columbia, and U. S. possessions; obligations of the U. S. issued on or before Sept. 1, 1917; all postal savings bonds; Treasury notes issued prior to Dec. 1, 1940 and Treasury bills, issued prior to Mar. 1, 1941; obligations

issued prior to Mar. 1, 1941 by Federal land banks, joint-stock land banks, and Federal intermediate credit banks; and U. S. savings bonds and Treasury bonds owned in principal amount of $5,000 or less, issued prior to Mar. 1, 1941.

[10] "Net capital gain" is the net amount of gain arising from the sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductible for the current year, but may be carried over and applied against capital gains in the five succeeding taxable years.)

[11] Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to the allowance for depreciation. [12] Includes taxes which are reported in "Cost."

[13] Excludes (1) Federal income tax and Federal excess-profits taxes, (2) estate, inheritance, legacy, succession and gift taxes, (3) income taxes paid to a foreign country or possession of the U. S. if any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[14] Limited to 5 percent of net income as computed without benefit of this deduction.

[15] Interest exempt from declared value excess-profits tax, items 7 and 8 above.

[16] Deduction due to net operating loss carry-over from the two preceding taxable years.

[1] Excludes returns of inactive corporations.
[2] Excludes nontaxable income other than tax-exempt interest on Government obligations.
[3] Gross sales less returns and allowances where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."
[4] Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations," see "Compiled deductions."
[5] Interest on Treasury notes issued on or after Dec. 1, 1940 and obligations issued on or after Mar. 1, 1941, by the U. S. or any agency or instrumentality thereof. [6] Less than $50,000.
[7] Interest on U. S. savings bonds and Treasury bonds owned in principal amount of over $5,000 issued prior to Mar. 1, 1941.
[8] Interest on obligations of instrumentalities of the U. S. (other than obligations of Federal land banks, joint-stock land banks, and Federal intermediate credit banks) issued prior to Mar. 1, 1941.
[9] Interest on obligations of States, Territories, or political subdivisions thereof, the District of Columbia, and U. S. possessions; obligations of the U. S. issued on or before Sept. 1, 1917; all postal savings bonds; Treasury notes issued prior to Dec. 1, 1940, and Treasury bills, issued prior to Mar. 1, 1941; obligations issued prior to Mar. 1, 1941 by Federal land banks, joint-stock land banks, and Federal intermediate credit

banks; and U. S. savings bonds and Treasury bonds owned in principal amount of $5,000 or less, issued prior to Mar. 1, 1941.

[10] "Net capital gain" is the net amount of gain arising from the sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductible for the current year, but may be carried over and applied against capital gains in the 5 succeeding taxable years.)

[11] Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to the allowance for depreciation.

[12] Includes taxes which are reported in "Cost."

[13] Excludes (1) Federal income tax and Federal excess-profits taxes, (2) estate, inheritance, legacy, succession, and gift taxes, (3) income taxes paid to a foreign country or possession of the U. S. if any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[14] Limited to 5 percent of net income as computed without the benefit of this deduction.

[15] Interest exempt from declared value excess-profits tax, items 7 and 8 above.

[16] Deduction due to net operating loss carry-over from the 2 preceding taxable years.

[10] "Net capital gain" is the net amount of gain arising from the sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductible for the current year, but may be carried over and applied against capital gains in the 5 succeeding taxable years.)

[11] Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to the allowance for depreciation. [12] Includes taxes which are reported in "Cost."

[13] Excludes (1) Federal income tax and Federal excess-profits taxes, (2) estate, inheritance, legacy, succession, and gift taxes, (3) income taxes paid to a foreign country or possession of the U. S. if any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[14] Limited to 5 percent of net income as computed without the benefit of this deduction.

[15] Interest exempt from declared value excess-profits tax, items 7 and 8 above.

[16] Deduction due to net operating loss carry-over from the two preceding taxable years.

[17] Compiled net loss or deficit.

[18] See note 4, table 358.

[19] See notes 5 and 6, table 358.

No. 361.—Gross Income of Corporations, by Industrial Groups: 1935 to 1942

[In millions of dollars. Gross income is less than total compiled receipts by amount of wholly tax-exempt interest on Government obligations for 1940 and prior years, and by the sum of wholly tax-exempt interest and interest subject to surtax only, for 1941 and 1942. For items comprising "total compiled receipts," see table 360. See also headnote and footnote 7 (a), table 354]

1941	6,911	25,592	49,542	[7] 122,728	16,214	71,577	[8] 66,658	[9] 11,858	54,800
1942	8,706	24,260	45,040	[7] 151,088	15,473	65,828	[8] 68,782	[9] 10,454	58,328

[1] Excludes inactive corporations.
[2] Adjustments are made in tabulating the data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce the corresponding asset account, and "Total assets" and "Total liabilities" are decreased by the amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by the amount of the deficit.
[3] Cash in till and deposits in banks.
[4] Less reserve for bad debts. Includes loans and discounts of banks.
[5] Consists of obligations of the United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, the District of Columbia, and United States possessions.
[6] For balance sheets in which common and preferred stock are not reported separately, the combined amount is tabulated as "Common stock." For balance sheets with no par stock and for those not reporting capital stock value, the net worth is included in the figure for "Surplus and undivided profits."
[7] Beginning 1937, excludes "Surplus reserves."
[8] Consists of the sum of the positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."
[9] Consists of negative amounts for "Earned surplus and undivided profits."

[1] A gift tax return is required of every citizen or resident of the United States who transferred to any one donee gifts totaling more than $4,000 in any one calendar year 1939 through 1942, or regardless of value, made a gift in trust or of a future interest in property. A nonresident alien is similarly required to file a return if the gift consists of property situated in the United States.

[2] Exclusions: For 1939-42, not exceeding $4,000 for each donee, except with respect to gifts in trust or of future interest in property.

[3] Specific exemption of $40,000 may be taken in 1 year or spread over a period of years at option of donor. The specific exemption allowed each year is $40,000 less the sum of amounts claimed and allowed in prior years.

[4] Includes defense tax.

No. 366.—Estate Tax Returns, Federal—Summary: 1928 to 1943

[**All money figures in thousands of dollars.** An estate tax return is required to be filed (1) for the estate of every citizen and resident alien who died (*a*) in the period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in the period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds $50,000; (*b*) in the period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds $100,000; (*c*) in the period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds $40,000; and (*d*) on or after Oct. 22, 1942, the value of whose gross estate exceeds $60,000; and (2) for the estate of every nonresident alien who died (*a*) prior to Oct. 22, 1942, any part of whose estate is situated in the U. S., at date of death; and (*b*) on or after Oct. 22, 1942, only if the gross estate situated in the U. S., at date of death exceeds $2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—a basic tax and an additional tax. The basic tax is computed at the rates provided by the Revenue Act of 1926, which rates are embodied in the Internal Revenue Code as the basic estate tax. The additional tax is the excess of the tentative tax computed at the rates provided by the act in force at date of death, over the basic tax]

[1] Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

[2] Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

[3] The net taxable estate for individuals who died on or after 5 p. m., June 6, 1932, is the net estate for the purpose of the additional tax under the statute in force at date of death. The tax shown is the total net estate tax liability—the sum of the net basic tax and the net additional tax—and includes the defense tax (10 percent of net tax) effective only for estates of individuals who died in the period June 26, 1940, through Sept. 20, 1941.

[1] See note 1, table 366.

[2] Net estate classes are based on the amount of net estate for additional tax plus the specific exemption. (See note 4.)

[3] Federal Government obligations and State and municipal bonds are classified on the basis of the taxability of the interest thereon for Federal income tax purposes; however, the entire principal amount is taxable for Federal estate tax.

[4] The specific exemption tabulated for estates of (*a*) individuals subject to the additional tax is $60,000 under the 1942 act; $40,000 under the 1941, 1940, and 1935 acts; $50,000 under the 1934 and 1932 acts; and (*b*) individuals subject to earlier acts is $100,000 under the 1926 act; and $50,000 under the 1924 and prior acts.

[5] Represents excess of total amount of funeral and administrative expenses, debts of decedents, mortgages and liens, and support of dependents, over the value of property includible in gross estate subject to claims.

[6] Excess of gross estate over allowable deductions, exclusive of specific exemption.

[7] Net estate after deducting the specific exemption of $100,000, except for returns filed under the 1924 or prior acts for which the specific exemption is $50,000.

[8] Applies only to estates of individuals who died subsequent to June 6, 1932.

[9] Less than $500.

[10] Credits for (1) estate, inheritance, legacy, or succession taxes paid to States, etc., and (2) gift taxes paid to the Federal Government.

[1] Figures for 1800–50 are as of Jan. 1.
[2] Exclusive of bonds issued to Pacific railways and Navy pension fund.
[3] Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Does not include gold, silver, or currency certificates, or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.
[4] Less than $500,000. [5] Includes old Treasury (war) savings securities for 1919–29.

No. 372.—Interest-Bearing Governmental Securities—Estimated Ownership Outstanding, by Issuer: 1937 to 1945

[Figures represent par values with following exceptions: (1) Holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by U. S. and of State and local governments, territories, and possessions are book values, (2) holdings of these securities by individuals are residuals, and so deviate from par values in those cases where figures for commercial and mutual savings banks are book values, (3) in the case of data which include U. S. savings bonds, Series A–D, E, and F, figures for these bonds represent current redemption values]

[Par value. In billions of dollars]

Federal Reserve Bank of St. Louis

No. 373.—Interest-Bearing Securities Issued by All Governmental Units in the United States—Estimated Amounts Outstanding, by Tax Status and Issuer: 1913 to 1945

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. The "total amount outstanding" of securities of the several issuers differs from the gross indebtedness of these issuers in that the former excludes noninterest-bearing debt. The "total privately held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve banks, and by public sinking, trust, and investment funds. Net indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.]

[Par value. In millions of dollars]

[1] Payments of governments which have funded their debts were made prior to date of funding agreements.
[2] Includes balances of amounts postponed under provisions of joint resolution of Dec. 23, 1931.
[3] Differences between principal of funded indebtedness and amounts here stated represent deferred payments provided for in funding agreements, for which "bonds" of respective debtor governments have been or will be delivered to Treasury.
[4] Increase over amount funded due to exercise of options with respect to payment of interest due on original issue of bonds of debtor governments.
[5] German Government has been notified that Govt. of U. S. will look to German Govt. for discharge of this indebtedness of Govt. of Austria to Govt. of U. S.
[6] Includes additional bonds aggregating $3,489,000 received July 23, 1937, in exchange for bonds aggregating $1,208,000 and annuities aggregating $70,000, payable on Jan. 1, 1933, 1934, and 1935, but postponed as provided by agreements of May 8, 1930, and Sept. 14, 1932.
[7] United States held obligations in principal amount of $290,000, which, together with accrued interest thereon, were canceled on Oct. 6, 1939, pursuant to agreement of Apr. 14, 1938, between United States and Republic of Nicaragua, ratified by U. S. Senate on June 13, 1938.
[8] Does not include payment of $100,000 by Rumanian Government on June 15, 1940, which was made as "a token of its good faith and of its real desire to reach a new agreement covering" Rumania's indebtedness to United States.
[9] Represents proceeds of liquidation of financial affairs of Russian Government in this country.

15. State and Local Government Finances and Employment

GENERAL NOTE

Statistics on finances of States and the larger cities presented in this section were procured largely by trained representatives of the Bureau of the Census and by local agents directly from information available in the fiscal offices of the States and the cities, with the assistance and cooperation of public officials. Statistics on finances of other units were obtained from State sources of central collection and by mail canvass.

In order to obtain maximum uniformity and comparability in reporting data for various units, statistics were examined and classified in accordance with standard classifications employed by the Bureau of the Census in presenting governmental statistics. Consequently, statistics as presented in Bureau of the Census reports sometimes appear in a manner different from that shown in the records of the governmental unit itself. Full definitions of the concepts used by the Bureau of the Census in reporting financial information on government and a description of the methods used in presenting the data are given in the source volumes.

Data on employees and pay rolls are from the quarterly reports, "Government Employment," formerly "State and Local Government Quarterly Employment Survey." These are based on a mail canvass of governments selected to show trends by type of unit and by population size group. Special studies, such as those on governors' messages, debt limits, or retirement systems (see tables 295-298, pp. 267-269) are prepared either from the financial and other data collected for the annual reports or from special surveys.

The Census of Governments, formerly known as Wealth, Debt, and Taxation, is conducted decennially for years ending in "2" and is designed to obtain and report the principal financial data concerning all governmental units of every type in the United States. Data from the 1942 Census are shown in this edition of the Abstract. Although some of the smaller governmental units did not report in the Census, State and national totals for the various types of units were estimated from the relatively large number of units for which data were obtained. In addition to the summary report on Governmental Finances in the United States, separate reports were published on the finances of States, cities having populations over 25,000, counties, cities having populations less than 25,000, townships and New England towns, and school districts.

The term "general government," as used in this section, covers all governmental transactions other than those of public-service enterprises. The data on general government are shown with general funds and with sinking and trust funds presented separately. Taxes collected for trust or sinking funds, however, are reported as general-fund revenues, and then as contributions from the general funds to trust or sinking funds. Revenue excludes borrowings; expenditure includes debt service—both interest payments and provision for debt retirement. The data in this section relate to the fiscal years of the respective governmental units unless otherwise specified.

Wyoming	531	23	----	83	12	71	377	47

[1] Includes the Federal Government and the 48 State governments.
[2] Incorporated places having more than 2,500 inhabitants.
[3] The City and County of San Francisco in California and the City and County of Denver in Colorado are counted as cities and not as counties.
[4] The following counties are counted only as cities because they are wholly or very largely consolidated with the cities indicated: Orleans Parish with New Orleans City; Suffolk County with Boston City; Bronx, Kings, New York, Queens, and Richmond Counties, with New York City; Philadelphia County with Philadelphia city.
[5] Counties not organized as local governments.
[6] The county areas of Armstrong, Shannon, Todd, Washabaugh, and Washington are unorganized as counties and are attached for administrative purposes to neighboring counties.

[1] Sources are (*a*) as to revenue, U. S. Treasury Department, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942, pp. 25-31, and (*b*) as to other data, special compilation by courtesy of Bureau of Accounts, U. S. Treasury Department. Other footnotes specify adjustments in data to conform to Bureau of Census classifications so as to assure uniform and comparable reporting of Federal, State, and local Governments.

[2] Includes 76 million dollars for 90 percent of total collections of railroad unemployment insurance contributions, which were credited to the R. R. Retirement Board and not reported by U. S. Treasury.

[3] Included in "Earnings and miscellaneous."

[4] Includes veterans' aid.

[5] Excludes capital outlays in the form of fiscal aid payments and contributions to enterprises.

[6] Includes 12 million dollars for which a detailed classification is not available.

[7] Not segregable in detail; included in totals.

[8] Omits 94 million dollars for debt retirement reported by the U. S. Treasury because the payment is only nominally an expenditure and is not a charge against revenue.

[9] In addition, local governments are indebted for 482 million dollars of unguaranteed special assessment obligations payable exclusively by benefited property owners.

Wyoming	Net balance	1,167	96	Net balance	3,210	236			

[1] According to preliminary data for 1945, computed for a total of 25 States, the following increases between 1944 and 1945 occurred. In general funds 3.3 percent, in highway funds 13.2 percent, in war and postwar-reserve funds 215.0 percent, in all three funds together 34.4 percent.

[2] The "general fund" of a State, as used in this table, refers to what the State itself calls its general fund; composition of funds differs widely.

[3] "Net balance" is cash or its equivalent available at end of fiscal year less outstanding warrants; "surplus" is assets less liabilities and reserves at end of fiscal year.

[4] Includes $25 million in war emergency fund.

[5] $3 million of highway fund are earmarked for postwar purposes.

[6] Highway accounts are part of general fund.

[7] In Del., N. Mex., S. C., and Vt. part of general fund is set aside for war emergency or postwar purposes. It is possible that other States had made provision for similar reserves; the distinction between general fund or highway-fund balances and postwar reserves is not always clear-cut in State financial reports.

[8] After close of fiscal year total general-fund surplus was transferred into postwar-reconstruction fund.

[9] Part of the fund was set aside for veterans rehabilitation.

[1] Taxes on unincorporated business, when measured by net income, are classified with "corporation income."

[2] Includes poll tax collections. In only the following 7 States is the poll tax imposed as a franchise prerequisite: Ala., Ark., Ga. (abolished Feb. 1945), Miss., S. C., Texas, and Va.

[3] Estimated amount of $54,983,000 for corporation income tax (tabulated with individual income tax for 10 States) is shown deducted from total individual income tax, except for allowance of estimated data for N. H.

[4] Not complete.

[5] Corporation income tax is tabulated with individual income tax; segregation not available.

[6] Not entirely complete, but except for Del., Mont., N. C., and S. C., apparently only small amounts are missing.

[7] Collected under the War Emergency Gross Income Tax Law, which expired December 31, 1944.

[8] On banks and finance companies only.

[9] Not available.

[10] Includes refunds of $1,988,000.

No. 388.—Long-Term and Net Long-Term Debt of State and Local Governments: 1922 to 1945

[In millions of dollars. Data cover debt for both general government and enterprises]

GOVERNMENTAL UNIT	1922	1932	1940	1944	1945
Long-term debt, total [1]	9,578	17,897	19,314	17,285	16,298
State	1,106	2,594	3,280	2,784	2,471
County	1,282	2,306	2,036	1,759	1,604
City	5,477	9,157	9,511	8,732	8,361
Township	101	343	280	200	180
School district	985	1,993	1,699	1,380	1,273
Special district	627	1,518	2,531	2,469	2,446
Net long-term debt, total [2]	8,012	15,911	17,182	15,097	14,150
State	879	2,059	2,611	2,100	1,839
County	1,168	2,165	1,892	1,615	1,461
City	4,346	8,011	8,350	7,487	7,099
Township	94	333	264	192	172
School district	911	1,857	1,591	1,281	1,191
Special district	614	1,486	2,474	2,422	2,388

[1] Except for 1922, totals are less than the sums of State and local government debt because of the exclusion of duplicating State debts for reloan to local governments. The amounts of excluded State long-term loans are $14 million for 1932, $23 million for 1940, $39 million for 1944, and $37 million for 1945.
[2] Long-term debt less sinking fund assets.

[1] The sample design for nonschool employment provides for a complete canvass of all counties having 50,000 or more population in 1940, all cities, towns, and townships having 10,000 or more population in 1940, and all special districts having 100 or more employees in Oct. 1942. The smaller units are sampled so as to obtain a specified precision in State estimates of total employment. Figures marked with an asterisk indicate a relative sampling error of over 5 percent. The relative sampling error for the other figures is 5 percent or less.

[2] Estimates of school employment are based on information furnished by the Office of Education.

[3] Estimates of Federal employment, based on returns to U. S. Civil Service Commission for executive service, and to Bureau of Labor Statistics for legislative and judicial services, are from Bureau of Labor Statistics. This total differs from that shown in table 391 because of exclusion of civilian employees working outside of continental U. S. [4] Less than 500 employees.

[5] Information for National Capital Housing Authority, classified as a special district by Bureau of Census, is included with that shown for Federal Government. Federal figure includes data for Metropolitan District of Washington, D. C., as defined by Bureau of Census.

[6] Data for Detroit Housing Authority, classified as a special district by Bureau of Census, included with information for Detroit. [7] No estimate made.

[1] Under orders of the Secretary of the Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to the Treasurer of the United States, and under the Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. Gold coin ($287,000,000) shown on Treasury records as then outstanding was dropped from statements.

Federal Reserve Bank of St. Louis

No. 404.—Money—Stock, by Kind: 1860 to 1945

NOTE.—**Amounts in thousands of dollars.** Figures prior to 1890 were revised in 1925 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver for those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude gold earmarked for foreign account.

JUNE 30 (EXCEPT AS INDICATED)	Total [1]	Gold coin and bullion [2]	Silver dollars and bullion	Subsidiary silver	United States notes	Minor coin [3]	Other United States currency	State-bank notes	National-bank notes	Percentage of gold to total money

[1] The totals involve a duplication to the extent that United States notes, Federal Reserve notes, Federal Reserve bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

[2] By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. The value of gold is therefore based on $35 per fine ounce beginning June 1934; theretofore, it is based on $20.67 per fine ounce.

[3] Includes fractional paper currency in circulation prior to 1878.

[4] Silver bullion in Treasury.

[5] Includes silver bullion as follows: As of June 30: 1934, $1,560,000; 1935, $313,309,000; 1936, $708,211,000; 1937, $835,196,000; 1938, $1,037,163,000; 1939, $1,230,586,000; 1940, $1,353,162,000; 1941, $1,435,909,000; 1942, $1,505,844,000; 1943, $1,519,746,000; 1944, $1,520,134,000; 1945, $1,520,295,000. As of Dec. 31: 1944, $1,520,134,000; 1945, $1,703,891,000.

No. 405.—Money in Circulation, Money Held in Treasury and in Federal Reserve System, and Total Stock: 1800 to 1945

NOTE.—**All figures except per capita in thousands of dollars.** In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal Reserve banks and agents, and, hence, in stock of money, gold bullion and foreign gold coin held by the Federal Reserve Banks and agents. The figures were also revised to include in the holdings of Federal Reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as Reserve against Federal Reserve notes or otherwise. See also headnote, table 404. Per capita figures based on population estimates of the Treasury Department.

JUNE 30 (EXCEPT AS INDICATED)	Stock of money in the United States [1]	MONEY HELD IN THE TREASURY					MONEY OUTSIDE OF THE TREASURY [1]		
		Total	In trust against gold and silver certificates [2]	Gold reserve against United States notes [2]	Held for Federal Reserve banks and agents	All other money	Held by Federal Reserve banks and agents	In circulation

[1] Gold and silver certificates and Treasury notes of 1890 are excluded before combining money outside of the Treasury with money in the Treasury in order to avoid duplication, since the gold and silver held in Treasury as security against these currencies are included. See also notes 1 and 2, table 404.

[2] Both of these items include also reserve against Treasury notes of 1890.

[3] See note 1, table 403.

[4] Includes total stock of silver dollars and subsidiary silver.

[5] Gold certificates. This amount is not included in the total since the gold held as security against the gold certificates is included in the column, "In trust against gold and silver certificates."

Federal Reserve Bank of St. Louis

No. 406.—All Active Banks—Principal Assets and Liabilities, by Class of Banks: 1840 to 1944

Note.—Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (except 1942-44), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samoa. Because of the war, data are excluded for banks in Guam and the Philippine Islands for 1942-44. Data for banks other than national for the earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years; since 1926 only one is included. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935, they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933.

[All figures, except number of banks, in millions and tenths of millions of dollars]

On or about June 30, except as indicated (see headnote)—	Number of banks	Loans and discounts [1]	Investments [2]	Cash and balances with other banks [3] [4]	Total assets or liabilities [4]	Capital, surplus, and undivided profits [5]	Circulation [6]	Deposits

[1] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.
[2] Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.
[3] Includes lawful reserve, exchanges for clearing house, and all cash items except for 1936 to 1944, for which years, cash items not in process of collection are excluded.
[4] Excludes reciprocal interbank demand balances with banks in the U. S. beginning with 1942.
[5] Includes reserve accounts, and for banks other than national for 1934 to 1944, capital notes and debentures. Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.
[6] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.
[7] Excludes interbank and U. S. deposits. Demand deposits excludes certified and cashiers checks. Time deposits includes postal savings. [8] Capital only.
[9] Figures for State banks, except number of banks and capital, estimated.
[10] Includes capital only for banks other than national. [11] Licensed banks only.
[12] Excludes deposits of State and political subdivisions.
[13] Excludes deposits of State and political subdivisions and postal savings.
[14] U. S. Government securities only. [15] Includes State bank circulation outstanding.
[16] Includes loan and trust companies and, with some exceptions (see headnote), stock savings banks.
[17] Figures given under capital, surplus, etc., represent surplus and undivided profits, including reserves except that they include capital for any stock savings banks included (see headnote).

Federal Reserve Bank of St. Louis

No. 409.—All Reporting Banks in the United States—Number, Loans, Investments, and Deposits: 1931 to 1945

[**Money figures in millions of dollars.** In general, this table covers all banks in continental United States, comprising national banks, State commercial banks, trust companies, mutual and stock saving banks, and such private, Morris Plan, and industrial banks as were under the supervision of, or reported to State banking departments. Banks are classified as members of the Federal Reserve System and nonmembers. For further details see Banking and Monetary Statistics published by the Board of Governors of the Federal Reserve System]

[1] Both direct and guaranteed obligations.

[2] Prior to Dec. 31, 1935, excludes balances with private banks to the extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which, on that date, amounted to $62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on that date aggregated $600,000,000. [3] Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

[4] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection. [5] Postal savings included in time deposits. [6] Central reserve city banks only.

[1] For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of the Federal Reserve Act, which are not shown in this table, see source.

[2] Rediscounts of notes, drafts, and bills eligible for discount under the Federal Reserve Act, and advances secured by such paper, by direct obligations of the U. S., by certain obligations guaranteed as to principal and interest by the U. S., and by obligations of Federal intermediate credit banks maturing within six months.

[3] 1 percent on advances secured by Government obligations.

[4] ½ percent on advances secured by Government obligations maturing or callable in 1 year or less.

[5] Advances secured to the satisfaction of the Federal Reserve Bank.

[6] Rate of 2½ percent to other lenders (than banks) in effect until April 11, 1942.

No. 422.—Savings Banks—Number of Depositors and Amount of Savings Deposits, Continental United States: 1820 to 1910

Note.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 423.

[Depositors in thousands, deposits in millions and tenths of millions of dollars]

Year	Depositors	Savings deposits	Year	Depositors	Savings deposits	Year	Depositors	Savings deposits
1820	9	1.1	1890	4,259	1,524.8	1901	5,612	2,260.3
1830	38	7.0	1892	4,782	1,712.8	1902	5,871	2,280.2
1840	79	14.1	1893	4,831	1,785.2	1903	6,117	2,512.5
1850	251	43.4	1894	4,778	1,748.0	1904	6,286	2,602.0
1860	694	149.3	1895	4,876	1,810.6	1905	6,464	2,736.5
1865	981	242.6	1896	5,065	1,907.2	1906	6,753	2,908.7
1870	1,631	549.9	1897	5,201	1,939.4	1907	7,071	3,055.3
1875	2,360	924.0	1898	5,239	2,027.2	1908	7,137	3,065.7
1880	2,336	819.1	1899	5,524	2,179.5	1909	7,205	3,144.6
1885	3,071	1,095.2	1900	5,370	2,134.5	1910	7,482	3,360.6

No. 423.—Savings and Other Time Deposits and Depositors in Banks, Continental United States: 1910 to 1942

Note.—Savings and other time depositors in State banks and trust companies, stock savings and private banks, are not shown for earlier years, as data are very incomplete. Figures for this class of banks and totals exclude 6 States in 1926 and 1927, 4 in 1928 to 1930, 3 in 1931, 2 in 1932 and 1933, and 1 in 1934 to 1937, and include for a number of others incomplete or estimated data or data for an earlier year.

[1] Includes deposits evidenced by savings passbooks, time certificates of deposit payable in 30 days or over-time deposits, open account, postal savings redeposited in banks, and, for some States, Christmas savings and similar accounts.

[2] Includes State, stock savings, and private banks and trust companies.

[3] Combined data for other than national banks included in total.

[4] For data for 1910 and earlier years from reports of the Comptroller of Currency, see table 422.

[5] Not available.

[6] Figures include depositors for State-chartered banks in States which did not previously report depositors as follows (figures in parentheses are the number of depositors for the first year the given States reported): Beginning 1928, Ohio and Idaho (2,376,000 depositors); beginning 1931, Missouri (623,000 depositors); beginning 1932, Colorado (50,000 depositors); and beginning 1934, Indiana (286,000 depositors).

[7] Represents the number of savings passbook accounts.

Government insurance	1.2	1.8	2.4	3.8	4.7	5.1
Securities, total [2]	−.2	2.9	10.1	13.8	14.9	9.6
U. S. Govt. bonds	.5	3.6	9.9	13.8	15.4	10.6
State, local govt., and corporate	−.7	−.7	.2	-------	−.5	−1.0
Nonfarm dwellings:						
Purchases [3]	2.5	3.0	1.6	1.0	.8	1.0
Change in debt	.9	.9	.1	−.3	-------	.4
Saving [4]	1.7	2.1	1.5	1.3	.8	.6
Automobiles and other durable consumers' goods [5]	8.8	10.8	7.6	6.6	7.2	8.0
Liquidation of debt, n. e. c. [6]	−1.1	−.6	2.9	1.0	−.3	−.7

[1] Gross saving excluding purchases of homes as well as of automobiles and other durable consumers' goods.

[2] Does not include purchases by brokers and dealers or by other individuals financed by bank loans.

[3] New construction of 1- to 4-family nonfarm homes less net acquisition of properties by nonindividuals.

[4] Purchases minus change in debt.

[5] Purchases. Based on Department of Commerce data. The figures shown above include all new passenger cars sold in the United States.

[6] Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, viz, saving in savings and loan associations, insurance, securities, and homes. Changes in commercial indebtedness of unincorporated business and in consumers' indebtedness to unincorporated business are not included in these figures.

[1] Federal deposit insurance became operative Jan. 1, 1934.

[2] Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of $1,942,574,000, and 225 State bank members with deposits of $925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of $1,818,541,000, 152 unlicensed State member banks with deposits of $842,982,000, and 2,938 unlicensed nonmember banks with deposits of $1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 985 unlicensed national banks with deposits of $1,028,347,000, 114 State member banks with deposits of $239,268,000, and 1,983 nonmember banks with deposits of $1,063,984,000 to be rehabilitated and reopened or to be placed in liquidation or receivership. All such banks are treated as suspensions.

No. 452.—Federal Housing Administration—Yearly Volume of Mortgages Insured: 1935 to 1945

[**Amounts in thousands of dollars.** The program of providing insurance for long-term mortgages on individual homes and on large-scale rental projects and for short-term character loans for property improvement is carried on by FHA under provisions of National Housing Act and its amendments. FHA lends no money but provides insurance for loans made by banks and other private lending institutions]

Year and status	Title II				Title VI [2]

[1] For loans by joint stock land banks, see table 462.
[2] Includes renewals.
[3] Includes data for associations placed in liquidation.
[4] Does not include advances in connection with the Commodity Credit Corporation programs.
[5] Amounts in this column are duplicated by the amount discounted by the Federal intermediate credit banks for the 3 agencies concerned.
[6] Amounts outstanding as of June 30.

Unallocated				17,481		

[1] In obtaining totals in this column adjustments were made to avoid duplications arising from the fact that production credit associations and banks for cooperatives borrow from and rediscount loans with the Federal intermediate credit banks.

[2] Includes outstanding loans of associations which have been placed in liquidation.

[3] Does not include advances in connection with the CCC programs.

[1] Less payments on principal and principal of delinquent and extended installments. [2] Unmatured.
[3] Owned by national farm loan associations and individual borrowers.
[4] Not including special reserves set up against particular assets. Includes earned surplus.

No. 460.—Federal Farm Mortgage Corporation—Principal Assets and Liabilities as of Dec. 31, 1945

[In thousands of dollars]

Assets	Amount	Liabilities	Amount
Assets, total	191,776	**Liabilities, total**	191,776
Mortgage loans [1]	[1] 226,686	Federal Farm Mortgage Corporation bonds outstanding	76,000
Purchase money mortgages, etc.	12,746	Matured principal and interest on Federal Farm Mortgage Corporation bonds	5,543
Unmatured extensions	438		
Delinquent installments, advances, etc.	3,070		
Accrued interest receivable (not due)	3,252	Accrued interest on Federal Farm Mortgage Corporation bonds (not due)	
Total	246,192		
Less reserve	68,998		
Net	177,194	Other liabilities	5,108
Cash with the Treasurer of the U. S.	11,780		
U. S. Govt. obligations direct and fully guaranteed (par)		Capital stock, U. S. Government	50,000
Consolidated Federal farm loan bonds (par)		Earned surplus	55,125
Other assets	2,802		

[1] First-mortgage loans, $82,472,000; second-mortgage loans, $144,214,000.

No. 461.—Joint-Stock Land Banks—Principal Assets and Liabilities as of Dec. 31: 1940 to 1945

Note.—Banks in receivership are not included after date of receivership. The Farm Mortgage Act of 1933, approved May 12, prohibited the joint-stock banks from making new farm-mortgage loans, except in connection with refinancing of existing loans, and provided for the orderly liquidation of the banks.

[1] Exclusive of interbank loans.
[2] Carried at cost or par, whichever is lower, beginning in 1935.
[3] Net amount after deducting impairment or deficit.
[4] Adjusted for debentures held by banks of issue and by other Federal intermediate credit banks.
[5] Total is less than sum of figures for individual banks because of interbank transactions.

No. 470.—Bank Clearings for Leading Cities: 1928 to 1945

NOTE.—In millions of dollars. Cities are listed in order of importance according to clearings in 1945. No figures are given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by the tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 471) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1882 to 1920, and for figures for 146 identical cities, 1920 to 1936, see table 293, Statistical Abstract, 1937.

CITY	1928	1929	1930	1931	1932	1933	1934	1935	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945

No. 471.—Bank Debits to Deposit Accounts (Except Interbank)—Volume Reported by Banks in Leading Centers, 1928 to 1945, and by Months, 1943, 1944, and 1945

[**All figures in millions of dollars.** Figures represent debits or charges on books of reporting member and nonmember banks to deposit accounts of individuals, firms, and corporations, and of United States, State, county, and municipal governments, including debits to savings accounts, payments from trust accounts, and certificates of deposit paid. Debits to accounts of other banks or in settlement of clearing-house balances, payment of cashiers' checks, charges to expense and miscellaneous accounts, corrections, and similar charges are not included.]

YEAR	Total, all reporting centers	New York City	140 other centers [1]	Other reporting centers [2]

[1] This series, together with New York City, constitutes the national series for which bank debits figures are available beginning with 1919.

[2] Annual figures for 1928 to 1935 include from 121 to 131 centers and for 1936 to 1941 and 1942 (old series) include 133 centers. Figures for 1942 (new series) and subsequent annual and monthly figures include 193 centers.

[3] No figures available for March.

No. 474.—Fire Losses, Total and Per Capita, Continental United States: 1876 to 1945

[**Amounts, except per capita, in thousands of dollars.** Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter.]

No. 477.—Life Insurance of Fraternal Orders in the United States

NOTE.—Although the number of orders reporting varies considerably, most of the larger orders report regularly, so that the figures are fairly comparable from year to year. Prior to 1920 the figures for the number of orders as given below include all known to be in existence whether reporting or not.

[All money figures in millions and tenths of millions of dollars]

CALENDAR YEAR	Number reporting [1]	Assets	INCOME		DISBURSEMENTS			Amount of insurance written during year	IN FORCE AT END OF YEAR	
			Total	Net received from members	Total	Paid for claims	To agents and for management		Amount	Number of certificates (thousands)
1901	489	29.4	81.6	72.2	77.3	64.1	8.9	799.6	5,656.5	4,519
1905	570	64.5	95.7	91.4	85.2	72.6	11.3	1,026.3	8,150.4	6,119
1910	497	129.4	128.6	114.3	110.2	92.3	16.9	1,331.6	9,562.5	8,558
1915	472	212.8	133.3	122.3	123.6	98.7	16.1	922.9	8,694.4	7,696

1943	[5] 531	184,457	2,854,701	673,083	1,703,797	1,816,634	659,365	603,153	1,538,988

[1] Total premium receipts prior to 1910.

[2] Figures for 1895 to 1930 include adjustment expenses excluded thereafter.

[3] Including taxes.

[4] Figures through 1930 include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1935 to 1944 relate to casualty, surety and miscellaneous insurance companies only.

[5] Number of companies reporting.

[6] See note 4.

[7] Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocals, and Lloyds; number of companies and income and disbursement items also include accident and health departments of life insurance companies. Comparable data for 1944 are not available.

[1] Long-term partially tax-exempt. Average yields on taxable bonds due or callable in 15 years and over are as follows: 1942, 2.46; 1943, 2.47; 1944, 2.48; 1945, 2.37.

[2] High-grade non-callable, including public utility and industrial.

[3] Average of monthly figures computed by dividing the aggregate annual dividends being paid as of the end of each month by the market value of all outstanding shares of the companies as of the same date.

[4] Includes 15 banks and 10 insurance stocks.

[5] Average of figures for June to December.

No. 492.—Profits and Dividends of Industrial Corporations: 1939 to 1945

[Data are available only beginning 1939. To a considerable extent, total profits of the 629 corporations represent very large concerns, as no data are included for companies with assets under $250,000, and there is a very limited representation of companies with assets between $250,000 and $5,000,000. No data are included for some important nondurable goods industries, such as meat packing, sugar refining, and rubber. Net profits are before dividends and after all charges, including depreciation, interest, special reserves charged as expenses, and all taxes. Aggregate dollar dividends are reported quarterly by only a few companies and for most of the companies for which these data are shown, dividends were computed for each class of stock on the basis of dividends per share and number of shares outstanding. For net profits of all corporations as compiled from income-tax returns, see tables 359 and 360, pages 341 and 342.]

No. 495.—Capital Issues—Summary, by Classes: 1923 to 1945

Note.—**In millions and tenths of millions of dollars.** Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1917 and 1918 all stocks are included at their market value. Corporate issues for 1917 and 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than $100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies.

Year	Total issues	New capital	Refunding	TOTAL ISSUES, BY KINDS						
				Corporate				Farm-loan and Gov't agencies	State and municipal	Foreign government

No. 498.—Industrial and Commercial Failures—Number and Liabilities: 1857 to 1945

[Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring the failure record more nearly in accordance with the type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1939, the new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series]

No. 499.—Industrial and Commercial Failures—Number and Liabilities, by Months: 1940 to 1945

[Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public]

No. 503.—Net Debt in the United States: 1916 to 1944

[Net public and private debt outstanding is a comprehensive estimate of the indebtedness of borrowers after the deduction of duplicating corporate and government debt from the gross totals. Gross debt is defined to include all types of debt, irrespective of form, origin, duration, or ownership, except (1) the debts of banks to depositors and the amount of bank notes in circulation; (2) the value of outstanding policies and annuities of life insurance companies as well as borrowed money owed by life insurance companies; and (3) the short-term debts outstanding between individuals or unincorporated non-financial business firms. With the further modification that nominal debt such as that which is authorized but not issued is also excluded, the gross figures are at the most inclusive level. To obtain the net debt figures, gross or total debt estimates are corrected for corporate and government duplications within the following sectors of the economy: (1) the Federal Government and its corporations and agencies, (2) the combined State and local governments, (3) the corporate system, consisting of individual corporations and of related but legally separate corporations operating under a single management and treated as a unit, and (4) separate unincorporated business establishments and individual persons. In the sphere of public debt two types of adjustments are made. Public debt is reduced to a net basis by consolidating the accounts of the Federal Government with those of its corporations and agencies and by eliminating the indebtedness of Federal, State and local governments held by the issuing governmental units. In other words, the debts issued by the governmental units but held in trust, investment, or sinking funds are eliminated within the Federal and the State and local categories in order to reach the net debt estimates. Loans receivable from the public by government agencies are offset against the public debt, since these loans represent an intermediary function analogous to that of the banking system and are already counted in private indebtedness. In the sphere of corporate indebtedness, obligations held by the issuer and debts of corporations to other corporate members of the same affiliated system are eliminated. In the noncorporate and individual sphere, figures are gross throughout with no adjustments. The net debt figures give a more significant picture of trends in the debt structure than the crude gross debt estimates, since the effects of changing financial organization are in large part removed. With the exception of State and local governments, where figures are for June 30 of each year, estimates represent balances of debts outstanding at the end of calendar years, corrections having been made wherever fiscal and calendar years differ.]

17. Communication Systems

(Including postal service)

GENERAL NOTE

Financial and operating data for telephone, wire-telegraph, ocean-cable and radio-telegraph carriers which render domestic and foreign service are shown in this section. Also included are data relating to radio broadcast stations and networks, which operate in the continental United States and its possessions.

The Bureau of the Census in the Census of Electrical Industries (not taken for 1942) compiled at 5-year intervals beginning in 1902 a report on telephones and telegraphs, covering all systems and lines. Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been centralized and expanded in that agency.

Reports filed with the Federal Communications Commission cover substantially all of the radio broadcast stations and networks, wire-telegraph, ocean-cable and radiotelegraph carriers operating in the United States and its possessions. Gross operating revenues of the telephone carriers reporting to the Commission are estimated to include approximately 95 percent of the operating revenues of all telephone carriers in the United States and its possessions. Statistical data compiled from these reports are contained in a volume entitled, "Statistics of the Communications Industry in the United States," which is published annually by the Federal Communications Commission.

"Bell System," as referred to in this section, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries, which comprise all operating telephone carriers having assets in excess of $1,000,000 and in which the American Telephone & Telegraph Co. owns, directly or indirectly, more than 50 percent of the outstanding voting capital stock.

Data on the postal service, obtained principally from the annual reports of the Postmaster General, are also included in the section.

Investment in plant and equipment	1,081,433	1,435,912	2,129,774	3,475,202	4,734,706	4,941,286
BELL SYSTEM (INCLUDED ABOVE)						
Miles of wire (thousands)	15,133	23,134	30,614	56,819	80,586	81,578
Number of telephones (thousands)	5,087	7,327	9,515	13,726	13,793	15,332
Number of originating calls (millions)	9,133	14,598	16,567	23,693	25,061	27,667
SYSTEMS REPORTING ANNUAL INCOME OF LESS THAN $5,000, 1912 AND 1917, AND LESS THAN $10,000, 1922–37						
Number of systems and lines	30,317	51,034	55,930	58,780	43,910	[2] 49,714
Miles of wire (thousands)	1,229	1,529	1,763	1,559	1,193	[2] 1,260
Number of telephones (thousands)	1,403	1,763	2,052	1,810	1,140	[2] 1,162
Number of originating calls (millions)	([8])	2,037	2,746	2,418	948	686

[1] Includes 10,550 connecting lines for which separate reports were not secured; data for such lines, however, were included in reports of operating companies supplying switchboard service.

[2] Includes data for connecting lines having fewer than 5 telephones per line, as follows: 11,759 lines; 29,000 telephones; and estimated figures for other items as follows: 44,000 miles of single wire; and $1,600,000 investment in equipment.

[3] Not reported for systems and lines having less than $5,000 annual income in 1912. For 1917 and 1922, figures represent number of systems and lines reporting central offices; actual number of central offices was probably slightly larger.

[4] Not reported except for systems and lines with income of $5,000 or more.

[5] Including assessments of mutual companies, and miscellaneous operating revenues.

[6] 83,378,000 miles of wire in cable and 6,193,000 not in cable.

[7] No data.

[8] No comparable data available.

No. 511.—Telephone Systems—Summary, Class A Carriers: 1926 to 1944

[Figures cover Class A telephone carriers which reported for 1944. Class A carriers are those carriers whose average annual operating revenues exceeded $100,000. The gross operating revenues of Class A carriers (excluding intercompany duplications of the Bell System) reporting in 1937 represented approximately 94 percent of the revenues of all telephone carriers as reported for the Census of Electrical Industries for that year. (See table 506.) The figures include data for carriers consolidated and merged prior to 1944, so far as annual data are available. Intercompany duplications have not been excluded, but data for 1942, 1943 and 1944 excluding such duplications are shown in italics below.]

[All money figures in thousands of dollars]

YEAR	Investment in telephone plant	Operating revenues	Operating ratio (percent) [1]	Net operating income	Net income	Dividends declared	Miles of wire (thousands) [2]	Number of telephones (thousands)	EMPLOYEES	
									Number on Dec. 31	Total compensation [3]

[1] Ratio of operating expenses to operating revenues.
[2] The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on, only the respondents' portion of jointly owned wire was included.
[3] Data for 1926 through 1932 include estimates.
[4] In comparing figures in this table, consideration should be given to the minor effect of the revisions of the Uniform System of Accounts, effective Jan. 1, 1933, and Jan. 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and the income statement.
[5] Excluding intercompany duplications.
[6] Represents, except for a minor part, number of employees at end of October.

No. 512.—Radiotelephones—Summary: 1937

Note.—Figures cover all companies and systems licensed by the United States to engage in the reception and transmission of commercial radiotelephone communications. No data are included for radiotelephone stations such as amateur, experimental, Federal, police, fire, etc., which were not licensed to charge fees for receiving or sending calls. The survey covered U. S. licensees in the United States, Alaska, Hawaii, and Puerto Rico, as well as those operating ship stations.

Number of companies or systems	27
Number of stations (as of Dec. 31)	132
Operating revenues applicable to the radio link (dollars)	1,212,073
Revenue calls, total number	147,596
Foreign traffic of the U. S. (calls subject to overseas regulations)	[1] 52,507
Ship traffic of the U. S. (calls subject to overseas, coastal, and harbor regulations)	[1] 26,409
Other traffic—Within the United States; [2] within Alaska; [2] within Hawaii; [2] within Puerto Rico; [2] Hawaii and Puerto Rico with other countries except continental U. S. and Alaska with ships	68,680

[1] Calls originating, terminating, or relayed in the United States.
[2] Originating calls only.

[1] Ratio of operating expenses to operating revenue.
[2] Represents estimates by reporting carriers. Stock and commercial news traffic and telephone toll messages are excluded. Mobile and foreign messages, domestic haul, are excluded to avoid duplication.
[3] Data for 1926–33 include estimates by reporting carriers.
[4] Deficit or other reverse item.
[5] Includes net book cost of plant of Postal Telegraph, Inc., acquired by The Western Union Telegraph Co. in amount of $16,754,000 on basis of gross book cost of $69,320,000 less tentative allowance for depreciation of $52,566,000.
[6] Represents operating income before deduction of income taxes.
[7] Not comparable with amount reported for Dec. 31, 1943, because of accounting adjustment for Postal Telegraph plant purchased by the Western Union Telegraph Co. Oct. 7, 1943; comparable 1943 amount is $477,431,000.
[8] Includes $3,536,000 charged to capital surplus.
