BUREAU OF THE CENSUS

PHILIP M. HAUSER, *Acting Director*

A. Ross Eckler, *Deputy Director*
Howard C. Grieves, *Assistant Director*
Morris H. Hansen, *Assistant Director for Statistical Standards*
Robert Y. Phillips, *Executive Assistant to the Director*
Calvert L. Dedrick, *Coordinator, International Statistics*
Frank R. Wilson, *Information Assistant to the Director*

ACKNOWLEDGMENTS

The Statistical Abstract of the United States has been published annually for the past 70 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date. The present volume was prepared in the office of Morris H. Hansen, Assistant Director for Statistical Standards. The compilation was under the supervision of Morris B. Ullman, Chief, Statistical Reports Section, and was the immediate charge of Bruce L. Jenkinson, Chief, Statistical Abstract Unit, assisted by William Lerner, Kathleen H. Dugan (Editor), and Elma D. Beynon.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pages XII–XV), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the Statistical Abstract.

SEPTEMBER 1949.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1949.* (Seventieth edition.) Washington, D. C., 1949.

PREFACE

Use of the Statistical Abstract.—The Statistical Abstract of the United States presents in a single annual volume important summary statistics on the industrial, social, political, and economic organization of the United States, and includes a representative selection from most of the important statistical publications. It is, of necessity, limited primarily to national data and to limited summaries by States. It does not attempt to present the great wealth of local data available from many sources.

This book is designed to serve a twofold purpose: *First*, to serve as a convenient reference volume for quantitative summary information; and *second*, to serve as a guide to various important sources of statistical data. If the user finds that the information given here on a particular subject is not sufficiently detailed for his purpose, it is suggested that he refer to the publication or the agency from which the statistics were obtained for publication in the Statistical Abstract. The source of each table is given at the foot of the table. The original source usually contains additional statistical detail, and a more complete discussion of the definitions and concepts involved, than can be presented in the Statistical Abstract; also, it may supply data for small areas. Further, the agency initially responsible for the statistics occasionally can supply still more detailed information on the basis of their unpublished tabulations or records.

1949 edition.—This edition, the 70th annual issue of the Statistical Abstract of the United States, is designated by the year of publication. The statistics shown are the latest available in the early part of the calendar year. The time periods or dates covered by the information in the tables vary according to the practices followed by the various agencies responsible for their preparation.

This edition includes 1,102 tables in comparison with 1,070 tables in the previous edition. A general note has been added for Section 11, Income and Expenditures. The general note on Banking and Finance (Section 16) has been expanded to include information on insurance statistics. The tables on insurance have been revised to incorporate the results of a review of this material. A general note has also been added for Section 29, Foreign Commerce (including international transactions), which now includes statistics on foreign investments and grants and credits to foreign countries. Also included are statistics showing the major activities of the Economic Cooperation Administration. The section on manufactures has been placed near the end of this volume in order to facilitate inclusion of statistics on the 1947 Census of Manufactures.

Integration with historical supplement.—This issue was prepared concurrently with the final work on preparation of the historical supplement (see p. v) for the press. The completion of the historical work makes possible a revision of the annual volume which has been started in this issue on an experimental basis. In general, each section of the annual Statistical Abstract will be reviewed intensively to bring about an increased emphasis on statistics of current interest and, at the same time, to reduce the amount of historical detail presented. This will not mean an elimination of historical statistics from the Statistical Abstract, since it is believed that the annual volume should retain summary data of this type, if only to place current data in perspective.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

However, the historical tables retained will be for the more important summary measures, will carry data for every fifth or tenth year historically (or 5-year or 10-year averages or totals, as appropriate) and will be made more uniform as to time-period coverage between, as well as within, subject sections. In particular, single-year figures running far back in time will be eliminated, since the historical supplement will provide statistics of this type.

In all sections containing related data, cross-references to the historical supplement have been included in the tabular headnotes. Finally, a historical appendix has been added which brings to date the statistical series which are shown to 1945 in Historical Statistics of the United States, 1789–1945. This appendix has been arranged to serve a two-fold purpose. The user of the annual Statistical Abstract will find there the earliest date to which the given statistics are carried in the historical supplement. The user ofthe supplement will find each series brought to date, where possible, and the table number in the current Statistical Abstract in which the same or related data may be found. Where figures for 1945 and earlier years are known to have been revised from these shown in the supplement, the revisions have been listed in table 1102 in the appendix. It is believed that the list of revisions shown here is incomplete; a more comprehensive list will be carried in the next issue (1950 edition) of the Statistical Abstract. In the appendix, because of space problems, no attempt has been made to list specific sources of data. In general, the source agencies are the same as for the same series specified in the supplement or noted at the bottom of the current Statistical Abstract table.

Sections which have been revised by comparison with the historical supplement include Section 1 (Area and Population), Section 2 (Vital Statistics), Section 3 (Immigration), Section 7 (Public Lands), Section 20 (Transportation), and Section 29 (Foreign Commerce). The type and extent of revision varies considerably, section to section. Perhaps the section whose revision more typically represents present plans for future issues is that on Transportation. In the section on Vital Statistics, the review has resulted in adding data on nutrition; in the section on Foreign Commerce, new subject materials have been added relating to foreign grants and credits, international investment position of the United States, and the Marshall Plan. Other sections will be revised each year until the comparison of the entire volume with the historical supplement is complete. Comments and criticisms of these changes will be appreciated.

Supplements to the Abstract.—The Statistical Abstract, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the Abstract has been initiated.

The first of these supplements, *Cities Supplement—Statistical Abstract of the United States*, provides 79 different items of information concerning the population, education, housing, labor force, business establishments, government finance, and climate of each of the 397 cities of the United States with 25,000 or more inhabitants in 1940. This supplement is available on request to the Director, Bureau of the Census.

The *County Data Book*, a supplement to the Statistical Abstract of the United States, is the second in this series. This publication brings together 91 different items of information for each of the 3,099 counties of the United States, with summaries for 138 metropolitan areas defined along county lines. Broad subject headings covered are population, labor force, housing, agriculture, industry,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

trade, and other economic data (including bank deposits, E Bond sales, war supply contracts, and wartime facilities projects). This publication is out of print. It may be consulted at most large public and university libraries.

Historical Statistics of the United States, a third supplement, was published in July 1949. This volume brings together 3,000 statistical series which extend back through time. Data are shown for each year back to 1789 or to the earliest data available for the series. In the preparation of this supplement the Bureau had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Washington 25, D. C. for $2.50. These statistics will be brought to date each year in the appendix of the annual Statistical Abstract, beginning with the current (1949) edition.

These supplements to the Statistical Abstract have been prepared to extend the usefulness of the basic annual volume by assembling specialized material in separate books. As these supplements develop it will be possible to edit the material shown in the basic volume to emphasize recent data, while supplements will serve the more specialized needs.

Responsibility.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages XII–XV.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material for the general user and for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given unselfishly of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of the users must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

SUGGESTIONS AND COMMENTS

should be sent to:

STATISTICAL ABSTRACT SUPPLEMENTS

Historical Statistics of the United States, 1789–1945. Contains 3,000 statistical time series, largely annual, extending back through time—to 1789 where possible. Prepared with cooperation of the Social Science Research Council. Washington, D. C., 1949. 363 p. Price $2.50 (Buckram).

County Data Book. Contains 91 items of statistical data for each county and metropolitan area in the United States. Washington, D. C., 1947. 431 p., maps. Out of print. May be consulted in many local and university libraries.

Cities Supplement—Statistical Abstract of the United States. Selected data (79 items) for 397 cities having 25,000 inhabitants or more in 1940. Washington, D. C., 1944. 47 p. Limited number of copies available on request at Bureau of Census.

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

TABLES BY SOURCE		XII
1. AREA AND POPULATION		1
	Area—Number and geographic distribution of inhabitants—Annual and future estimates—Urban and rural population—Sex—Race—Age—Nativity and parentage—Mother tongue—Citizenship—Internal migration—Marital status—Households—Fertility—Institutional population—Population characteristics in the Territories and possessions—Religious bodies.	
2. VITAL STATISTICS, HEALTH, AND NUTRITION		59
	Registration area—Births—Completeness of birth registration—Deaths—Life table values—Morbidity—Hospitals—Mental patients under institutional care—Marriage and divorce—Nutrition.	
3. IMMIGRATION, EMIGRATION, AND NATURALIZATION		91
	Immigration—Emigration—Immigration quotas—Movement and characteristics of aliens—Arrivals and departures, aliens and citizens—Naturalization.	
4. EDUCATION		104
	School attendance—Years of school completed—Illiteracy—Elementary and secondary schools—Institutions of higher education—Special schools—Vocational schools—Vocational rehabilitation.	
5. CRIME AND CRIMINALS		133
	Crime rates—Arrests—Criminal proceedings—Prisoners in State and Federal prisons.	
6. CLIMATE		144
	Elevation of stations—Temperature—Precipitation—Snowfall—Sunshine—Wind velocity—Relative humidity—Degree days.	
7. PUBLIC LANDS AND NATIONAL PARK SYSTEM		157
	Lands in Federal ownership—Public and Indian land—Land grants—National Park System—Visitors to National Parks—Lands under jurisdiction of Office of Indian Affairs.	
8. LABOR FORCE, EMPLOYMENT, AND PAY ROLLS		166
	Employment status—Persons not in the labor force—Class of worker—Industry—Government employment—Occupation—Family employment—Farm employment and wage rates—Production workers and pay rolls—Average hours and earnings—Labor turn-over—Industrial injuries—Work stoppages.	
9. MILITARY SERVICES AND VETERANS' AFFAIRS		224
	Army—Air Force—Navy—Marine Corps—Airplanes—Ships—Veterans' Administration including Government insurance—Red Cross.

10. SOCIAL SECURITY AND RELATED PROGRAMS 236
Public expenditures for social security and related purposes—Public assistance and Federal Work Programs—Old-age and survivors insurance—Unemployment insurance—Placements by public employment offices—Railroad retirement—Railroad unemployment and sickness benefits—Workmen's compensation payments—Maternal and child health and welfare services—Government employee retirement systems.

11. INCOME AND EXPENDITURES 279
National income and product—Individual and family income—Civilian spending and savings—Consumer income and expenditures.

12. PRICES 298
Wholesale prices—Retail prices—Indexes of consumers' prices and prices paid by farmers—Unit values of commodities exported and imported.

13. ELECTIONS 317
Electoral and popular vote for President—Votes for U. S. Senators and Representatives—Congressional representation.

14. NATIONAL GOVERNMENT FINANCES 323
Receipts and expenditures—Appropriations—Internal revenue collections—Individual and corporation income tax returns—Public and private debt—Government securities—Assets and liabilities of Government corporations and credit agencies.

15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT 389
Governmental units—General revenues and general expenditures—Public-service enterprises—State tax collections—State unemployment-compensation funds—Debt—Employees and pay rolls—Finances of retirement systems.

16. BANKING AND FINANCE 417
Money—Banks; principal assets, liabilities and other information for all banks, Federal Reserve banks, National banks, savings banks, mutual savings banks—Savings—Liquid assets—Government corporations and credit agencies—Savings and loan associations—Credit unions—Bank clearings—Consumer credit—Insurance—Commodity and stock exchanges—Assets, liabilities, profits, and dividends of corporations—Capital issues—Industrial and commercial failures—Business population and turn-over.

17. COMMUNICATION SYSTEMS (INCLUDING POSTAL SERVICE) .. 494
Telephone systems—Telegraph systems—Networks and broadcast stations—Postal service.

18. POWER 509
Supply of energy—Electric energy; capacity of generating plants and production—Financial and operating statistics of electric utility companies—Typical electric bills—Water power.

19. PUBLIC ROADS AND MOTOR VEHICLES 521
Rural roads—State highway systems—Federal highway projects—Motor vehicles—State motor-vehicle registrations and revenues—Motor fuel consumption—Nation-wide truck and bus inventory—Motor-vehicle accident fatalities.

20. TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR BUSSES, AND CIVIL AERONAUTICS 537

Steam railways: Mileage; equipment; employees; receiverships; capitalization, investment, income, dividends, revenue, expenses; freight and passenger service; accidents—Express companies—Pullman company—Electric railways—Motor carriers of property and passengers—Motorbus lines—Civil aeronautics.

21. WATERWAYS, WATER TRAFFIC, AND SHIPPING 568

Water-borne commerce, foreign and domestic—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Merchant marine—Panama Canal traffic—Net tonnage of vessels entered and cleared in foreign trade.

22. IRRIGATION AND DRAINAGE 592

Irrigation enterprises—Irrigation of agricultural lands—Federal reclamation projects—Drainage on farms—Drainage enterprises.

23. AGRICULTURE—GENERAL STATISTICS 610

Number and acreage of farms—Land utilization—Land transfers—Value of farm property—Value of farm products—Type of farm—Color and tenure of farm operators—Farm mortgage status and indebtedness—Farm labor—Farm income and expenditures—Farm facilities, roads, etc.—Farmers' marketing and purchasing associations—Farms and farm property in Territories and possessions.

24. AGRICULTURE—PRODUCTION AND RELATED SUBJECTS 658

Indexes of volume of farm production and farm prices—Agricultural products exported and imported—Acreage, production, and value of crops—Acreage losses—Grain—Hay—Tobacco—Sugar—Cotton—Cottonseed and products—Vegetables—Fruits—Animal and vegetable fats and oils—Foreign trade in foodstuffs and silk—Canned fruits and vegetables—Domestic animals and chickens on farms—Livestock or livestock production, receipts, and shipments—Meats, lard, and animal products—Dairy products—Oleomargarine—Poultry—Eggs—Cold storage holdings—Wool—Farm animals and farm crops in Territories and possessions.

25. FORESTS AND FOREST PRODUCTS 730

Commercial forest land—Stand and growth of saw timber—Annual drain—National forests—Forest fires—Forest trees planted—Lumber and lumber products.

26. FISHERIES 749

Fisheries—Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products—Fish propagation.

27. MINING AND MINERAL PRODUCTS 757

Mineral industries—Mineral products—Ferrous and nonferrous metals—Coke—Coal—Work stoppages in coal mining industries—Natural and manufactured gas—Gas utility industry—Crude and refined petroleum—Oil wells—Asphalt and gypsum—Cement—Stone—Salt—Employment and injuries in mineral industries.

1. Area and Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years beginning with 1790. The data shown here were selected chiefly from the Sixteenth Census (1940), and from special census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included.

Related materials are presented in other sections of this volume. Data on household composition are included in this section, but statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Pay Rolls. Data on the population in institutions as enumerated in 1940 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Crime and Criminals. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

Population samples.—The use of sampling methods in the Sixteenth Census permitted the collection of statistics on a larger number of inquiries than has heretofore been possible, the release of preliminary population statistics at an early date, and the tabulation of a great many social and economic characteristics of the population at a relatively low cost.

Certain tables in this section and in the related sections mentioned above are based on tabulations of samples of the population. Several samples were drawn and the figures shown were obtained by multiplying the sample results by a factor dependent on the sample size in each case. Sample B is a sample of all individuals from the 1940 Population Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively; Sample D, a sample of households from the 1940 Population Schedule; and Sample F, a sample of households based for some subjects on 1940 Population Schedule entries, and for other subjects on 1940 Housing Schedule entries. For Sample B, the sample size is 5 percent. Samples C, D, and F are 5 percent in most areas, but they include 2½ percent samples in the most populous areas. Sample W is an 8-percent sample for the North and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Specifically, any number of the size of a million or over may be assumed to agree with a complete count within 1½ percent, though most numbers of this size will agree within ¾ of 1 percent. Any number of the size of 100,000 may be assumed to agree with a complete count within 4 percent, though most numbers of this size will agree within 2 percent. Most numbers as small as 10,000 will agree within 10 percent. The sampling errors in subtotals formed by addition of classes are covered by the same statements. More detailed statements regarding the sampling errors are given in the original sources.

For years since 1940, several of the tables present statistics that are based on the Current Population Survey, conducted monthly by the Bureau of the Census. This survey covers a representative sample of about 25,000 households taken in selected

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 175.

Population estimates.—Population estimates for dates after April 1940, which are not the result of sample surveys, are based on data from the 1940 census; statistics of births and deaths provided by the National Office of Vital Statistics, United States Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the strength and distribution of the armed forces provided by the National Military Establishment. Postcensal estimates of State population are based on the same fundamental series of data and in addition make use of school statistics for both public and private schools, in connection with accounting for interstate migration.

Urban and rural areas.—In the course of its history the Census has employed several definitions of urban population. The current definition was adopted in substantially its present form at the time of the 1910 census and was slightly modified at later censuses. In this edition, the urban-rural classification for all years is in accordance with the 1940 definition, as follows:

> The *urban area* is made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it includes unincorporated political subdivisions with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in the States of Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town.
>
> The remainder of the population is classified as *rural* and is subdivided into the *rural-farm population*, which comprises all rural residents living on farms, without regard to occupation, and the *rural-nonfarm population*, which comprises the remaining rural population.

For the years after 1940, the urban-rural population figures reflect the classification of areas as urban and rural in 1940. Thus, the urban total for 1946 represents the population living, in 1946, in areas which were classified as urban in 1940; it does not represent the total which would have been classified as urban in 1946 if all areas had then been reclassified as urban or rural on the basis of their 1946 population.

Households.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers, servants, or hired hands, if any, who regularly live in the house. The number of "households," thus defined, is the same as the number of "private households" or "families" as the latter two terms were used in the 1940 census reports. A person living alone or a group of unrelated persons sharing the same living accommodations as partners is counted as a household.

The term "household," as used here, excludes the small number (about 80,000 in 1940) of institutions, hotels, large lodging houses, and other quasi households which are included as households in the census reports (and in figures shown in this edition) for 1920, 1910, 1890, and earlier years. The figures for 1900 and for 1930 and subsequent years, shown in this edition, are in conformance with the present usage of the term "household" as defined above.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series *B24–25*) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

No. 1.—Territorial Expansion of Continental United States and Acquisitions of Territories and Possessions

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Adjustments have been made in the areas as remeasured in 1940.] See also *Historical Statistics*, Series B24–25.

Accession	Date	Gross area (land and water) sq. mi.
Total (excludes P. I.)		**3,619,644**
Continental United States		3,022,387
Territory in 1790 [1]		888,811
Louisiana Purchase	1803	827,192
By treaty with Spain:		
Florida	1819	58,560
Other areas	1819	13,443
Texas	1845	390,144
Oregon	1846	285,580
Mexican Cession	1848	529,017
Gadsden Purchase	1853	29,640
Territories and possessions [2]		597,257
Alaska	1867	586,400
Hawaii [2]	1898	6,454
Puerto Rico	1899	3,435
Guam	1899	206
American Samoa	1900	76
Panama Canal Zone	1904	553
Virgin Islands of the U. S.	1917	133

[1] Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

[2] The Philippine Islands (area 115,600 square miles), ceded by Spain in 1898, constituted a territorial possession of United States from 1898 to 1946; granted independence as of July 4, 1946 when they became "Republic of the Philippines."

[3] Includes Howland, Baker, Jarvis, Midway, Kure or Ocean, Wake, Canton and Enderbury (in Phoenix group), and certain other small islands. Canton and Enderbury are under joint use and control of United States and Great Britain.

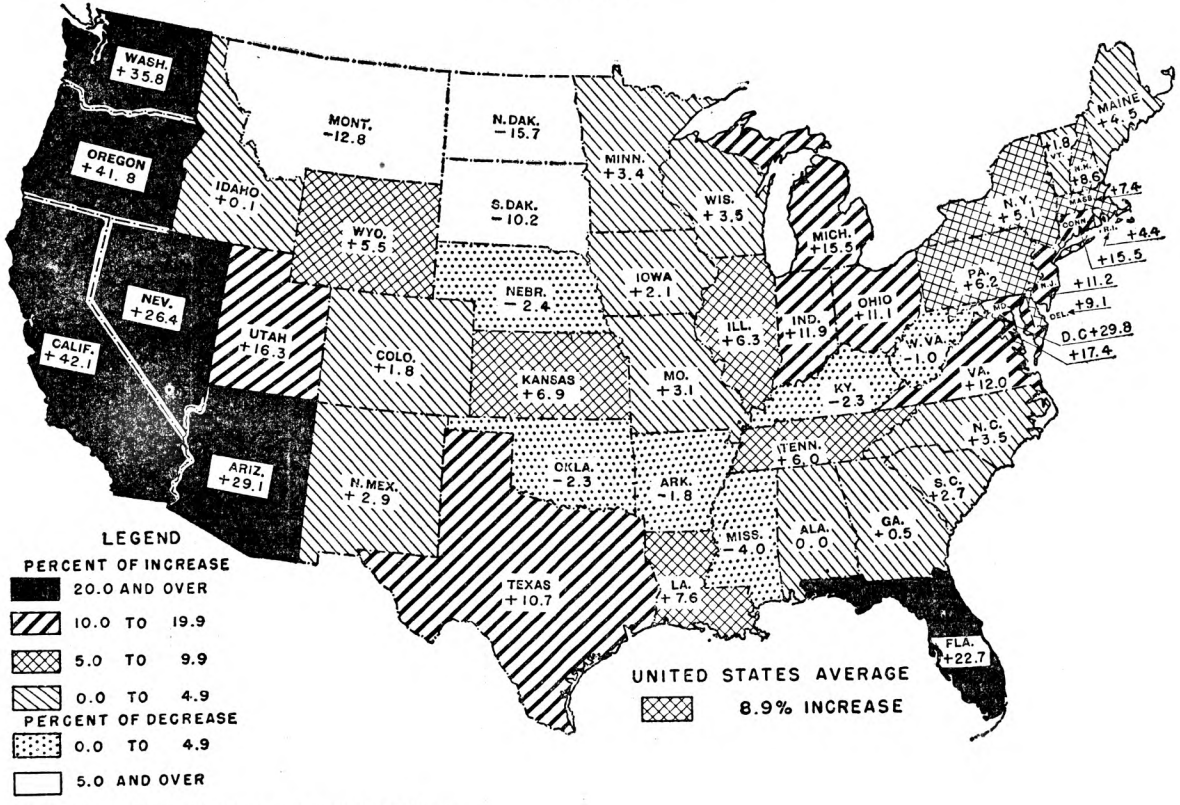
[1] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.



[2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the oceans, bays, the Gulf of Mexico, the Great Lakes, Long Island Sound, Puget Sound, and the Straits of Juan de Fuca and Georgia, lying within the jurisdiction of the United States but not defined as inland water.

No. 7.—Estimated Population on July 1, for Continental United States, 1920 to 1948, Hawaii and Puerto Rico, 1920 to 1947, and for Alaska, 1920 to 1939

[Estimates for continental U. S. (all years), for Hawaii, 1930 to 1947, and for Puerto Rico, 1940 to 1947, based on statistics of births, deaths, immigration and emigration. Estimates for Alaska and Puerto Rico, 1920 to 1939, and for Hawaii, 1920 to 1929, based on interpolation of census figures. Figures for continental U. S., 1940 to 1948, include residents serving in armed forces overseas; figures for Hawaii and Puerto Rico exclude residents serving elsewhere in armed forces. See also *Historical Statistics*, series B 5-10, B 31-39]

No. 8.—Enumerated Population, 1940, and Forecasts, 1950 to 1960, by Age and Sex

[Figures supersede forecasts for same dates published in Forecasts of the Population of the United States, 1945–1975 (G. P. O., 1947), but are approximately consistent with forecasts for later dates given in that report for all age groups comprising persons born before July 1, 1945. Forecasts given here are based on evidence of actual population changes through July 1, 1947, and assume medium mortality, 1½ million net immigration between 1947 and 1960, and somewhat higher fertility during this period than had been assumed in preparing superseded forecasts]

No. 14.—Median Age of Urban and Rural Population, by Race and Sex: 1930 and 1940

[Definition of Median.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2. See also *Historical Statistics*, series B 72-80]

[1] Less than one-tenth of 1 percent.
[2] Listed as Holland prior to 1910.
[3] Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.
[4] Turkey in Asia included with Turkey in Europe prior to 1910.
[5] Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1918.
[6] Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."
[7] Newfoundland included with Canada in 1900.

No. 22.—Migration Status of the Population and Type of Migration, by Sex, for Selected Periods: 1935 to 1948

[Migrants defined: In 1940—Persons 5 years old and over who lived in different counties (or quasi counties) in 1940 and 1935. A city of 100,000 inhabitants or more is treated as one quasi county and remainder of county as another. In 1947—Persons who lived in different counties in 1947 and 1940. For children under 7 years of age, residence of mother when child was born was used in determining migration status. In 1948—Persons who lived in different counties in 1948 and 1947. For children under one year of age residence of mother when child was born was used in determining migration status. 1947 and 1948 figures based on Current Population Survey, see Sampling Note, p. 175]

No. 23.—Migration Status of the Civilian Population Born on or Before April 1, 1940, and Type of Migration, by Social and Economic Characteristics: 1947

[In thousands. See headnote, table 22]

Characteristic	Total civilian population, April 1947	Nonmigrants	Migrants by type of migration					Persons abroad on April 1, 1940
			Total	Percent of total population	Within the State	Between contiguous States	Between noncontiguous States	
Relationship to head of household								
Total, 7 years and over	**122,633**	**96,565**	**25,469**	**20.8**	**13,081**	**4,974**	**7,414**	**599**
In households	119,762	94,982	24,257	20.3	12,375	4,784	7,098	523
Head of household	38,980	31,354	7,471	19.2	3,775	1,497	2,199	155
Relative of head	76,408	61,173	14,923	19.5	7,769	2,901	4,253	312
Nonrelative of head	4,374	2,455	1,863	42.6	831	386	646	56
Not in households	2,871	1,583	1,212	42.2	706	190	316	76
Years of school completed								
Total, 25 to 34 years old	**22,627**	**15,724**	**6,693**	**29.6**	**3,025**	**1,415**	**2,253**	**210**
Grade school:								
Less than 7 years [1]	2,312	1,658	630	27.2	310	115	205	24
7 and 8 years	4,402	3,397	961	21.8	486	201	274	44
High school:								
1 to 3 years	4,997	3,610	1,342	26.9	685	266	391	45
4 years	7,630	5,313	2,263	29.7	956	536	771	54
College: 1 year or more	3,286	1,746	1,497	45.6	588	297	612	43
Employment status								
Total, 14 years and over	**107,156**	**84,474**	**22,114**	**20.6**	**11,267**	**4,281**	**6,566**	**568**
In labor force	59,385	46,533	12,550	21.1	6,255	2,423	3,872	302
Employed	56,713	44,709	11,751	20.7	5,973	2,291	3,487	253
Unemployed	2,418	1,754	624	25.8	256	110	258	40
In armed forces [2]	254	70	175	68.9	26	22	127	9
Not in labor force	47,771	37,941	9,564	20.0	5,012	1,858	2,694	266
Major occupation group								
Males employed	**40,911**	**32,330**	**8,400**	**20.5**	**4,284**	**1,660**	**2,456**	**181**

No. 26.—Movement of Farm Population: 1910 to 1948

[**In thousands.** Based on benchmark data from Censuses of Population and Agriculture, current enumerative sample surveys, and mailed questionnaires. See also *Historical Statistics*, series B 231-236].

Year	Farm population on Jan. 1	Change through natural increase	Change through migration			Change through change in classification of residence [3]
			Net farm-nonfarm migration	Arrivals from nonfarm areas [1]	Departures for nonfarm areas [2]	
1910	[4] 32,077	([5])	([5])	([5])	([5])	
1920	[6] 31,614	485	−336	560	896	
1925	30,830	491	−702	1,336	2,038	
1930	30,169	377	−325	1,740	2,065	+264
1935	[6] 31,801	375	−642	825	1,467	−157
1936	31,377	363	−690	719	1,409	−144
1937	30,906	375	−529	872	1,401	−132
1938	30,620	405	−420	823	1,243	−125
1939	30,480	410	−491	805	1,296	−130
1940	30,269	400	−681	690	1,371	
1941	29,988	417	−1,357	814	2,171	
1942	29,048	390	−2,779	819	3,598	
1943	26,659	355	−1,493	1,094	2,587	
1944	25,521	345	−676	917	1,593	
1945	25,190	354	+1,306	2,578	1,272	
1946	26,850	419	+281	1,783	1,502	
1947	27,550	483	−593	1,030	1,623	
1948 (prel.)	27,440					

[1] For 1940 and subsequent years, includes persons returning from armed forces.
[2] For 1940 and subsequent years, includes (*a*) inductions and enlistments into armed forces, and (*b*) persons who have not moved but who are no longer in farm population because agricultural operations have ceased on place where they are living.
[3] Positive entry indicates net gain in farm population due to beginning of farming operations on units previously not classified as farms; negative entries represent net loss due to cessation of farming operations on such units.
[4] Estimated by Bureau of Census.
[5] Not available.
[6] Census enumeration.

No. 30.—Households, By Color of Head, With Population Per Household: 1890 to 1960

[Figures for 1890 to 1940 based on complete census. Figures for 1941 to 1945 estimated on basis of number of marriages and divorces and allowances for wartime effects on household formation. Figures for 1946 and 1947 based on Current Population Survey, see Sampling Note, p. 175. Figures for 1955 and 1960 based on "medium" projections of previous trends. Statistics for 1900, 1930, and subsequent years represent (private) households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of households, see p. 2. See also *Historical Statistics*, series B 171–181]

Date	Households				Color of head			
		Annual increase over preceding date			White		Nonwhite [2]	
	Number	Number	Percent	Population per household [1]	Number	Percent	Number	Percent
1890 (June 1)	12,690,152			4.93	11,255,169	88.7	1,434,983	11.3
1900 (June 1)	15,963,965	327,381	2.32	4.76	14,063,791	88.1	1,900,174	11.9
1910 (Apr. 15)	20,255,555	434,371	2.44	4.54				
1920 (Jan. 1)	24,351,676	418,398	1.90	4.34	21,825,654	89.6	2,526,022	10.4
1930 (Apr. 1)	29,904,663	541,755	2.02	4.11	26,982,994	90.2	2,921,669	9.8
1940 (Apr. 1)	34,948,666	504,400	1.56	3.77	31,679,766	90.6	3,268,900	9.4
1941 (July 1)	35,850,000	721,000	2.06	3.67				
1942 (July 1)	36,450,000	600,000	1.67	3.59				
1943 (July 1)	36,875,000	425,000	1.17	3.46				
1944 (July 1)	37,100,000	225,000	.67	3.41				
1945 (July 1)	37,500,000	400,000	1.08	3.40				
1946 (June 15)	38,183,000	711,000	1.90	3.61				
1947 (Apr. 15)	39,138,000	1,151,000	3.02	3.63	35,593,000	90.9	3,545,000	9.1
1955 (July 1)	42,925,000	461,000	1.13	3.49				
1960 (July 1)	44,775,000	370,000	.85	3.43				

[1] Obtained by dividing total population by number of households (members of armed forces excluded 1941 to 1947); hence not strictly average size of household because about 2.5 percent of total population are members of quasi households.

[2] The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,828 in 1920; 2,803,756 in 1930; and 3,141,883 in 1940.

No. 34.—Gross and Net Reproduction Rates, by Color, Urban and Rural Residence, and Regions: 1905 to 1910, 1930 to 1935, 1935 to 1940, and 1942 to 1947

[Statistics for 1905 to 1910 based on Sample W, and those for 1930 to 1935 and 1935 to 1940 based on Sample C (see p. 1); statistics for 1942 to 1947 based on Current Population Survey made in April 1947, see Sampling Note, p. 175. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent a potential decline in population]

No. 39.—Institutional Population 14 Years Old and Over—Summary for the United States: 1940

[Figures cover persons who were reported in the 1940 census as inmates of public or private institutions of specified types. Officials and attendants were excluded, as were patients in general hospitals and tuberculosis sanitariums. Persons in religious institutions and Veterans' Administration facilities were included only if the establishment had a majority of delinquents, mental patients, aged, or incurables]

Subject	Number of inmates

[1] Includes persons (5,318 in 1830 and 6,100 in 1840) on public ships in service of the United States, not credited to any division or State.

[2] Revised; unrevised figure is 38,558,371. Census of Southern States considered incomplete but there has been no revision of State figures, hence State figures do not add to total shown here.

[3] Includes 325,464, population of Indian Territory and Indian reservations, specially enumerated.

[4] Figure for 1860 for South Dakota represents entire Dakota Territory. Figures for 1870 and 1880 for North Dakota and South Dakota are for the parts of Dakota Territory which later constituted the respective States.
[5] Area now constituting West Virginia formed part of Virginia in 1860 and prior years.
[6] Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,060.

No. 43.—Population per Square Mile, by States: 1800 to 1940

]For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890]

[1] Based on 1940 land-area measurement.
[2] Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.
[3] Less than one-tenth of 1 person per square mile.
[4] Dakota Territory: Less than one-tenth of 1 person per square mile in 1860, 0.1 in 1870, and 0.9 in 1880.
[5] Oklahoma and Indian Territory combined. Separate data are as follows: Indian Territory 5.9 in 1890 and 12.7 in 1900; Oklahoma, 2.0 in 1890 and 10.3 in 1900.

No. 52.—In-Migrants and Out-Migrants, and Net Migration by Sex, by States: 1940

[In-migrants are classified by division or State of residence in 1940; out-migrants by division or State of residence in 1935. In-migrants shown here represent "migrants between States" in table 22. See headnote, table 22. Minus sign (−) denotes net out-migration]

Division and State	Number					Percent of 1940 population

[1] Obtained by dividing total population by number of households; hence not strictly average size of household because about 2.5 per cent of total population are members of quasi households.

[2] Less than 0.1 percent.

No. 61.—Population and Households for Specified Metropolitan Districts: April 1940 and 1947

[1940 figures based on 1940 census including small number then in armed forces. 1947 figures based on Census Bureau's Survey of Population, Labor Force and Housing, consisting of about 30,000 households located in 148 sample areas and including small number in armed forces living off post or with their families on post. See Sampling Note on p. 175. For definition of households see p. 2. Derived figures are based on unrounded absolute numbers]

2. Vital Statistics, Health, and Nutrition

Vital statistics.—Vital statistics, including statistics of births, deaths, marriages, and divorces, are compiled on a national basis by the National Office of Vital Statistics, Public Health Service. Prior to July 16, 1946, this activity was carried on in the Bureau of the Census.

Births and deaths.—The national collection of mortality statistics on an annual basis was begun in 1900. For that year, the national death-registration area consisted of 10 States, the District of Columbia, and a number of cities in nonregistration States. The national collection of birth statistics was begun in 1915 with 10 States and the District of Columbia. Since 1933, the birth and death registration areas have comprised the entire United States.

In the following tables, births and deaths for 1940 and subsequent years are shown by place of residence [1] of the mother or of the decedent; those for earlier years by place of occurrence of the birth or death.

Death statistics include only deaths occurring in the continental United States and exclude deaths of military personnel overseas. Stillbirths are excluded from both birth and death statistics.

Birth and death rates.—Birth and death rates are based upon Bureau of the Census estimates of the midyear population. Several types of population bases are used because of the special situation created by the changes in size and disposition of the armed forces. Briefly, birth rates for 1940–46 for the United States are based on estimates of the total population including members of the armed forces overseas; those for States on estimates of the *civilian* population in the States. Birth rates for 1947 and death rates for 1940–47 are based on *total* population present in the area (excluding armed forces overseas).

For 1940–46, changes in the birth and death rates should be interpreted with care.[2] Part of the increase or decrease in the rates may be accounted for by the changes in the age, race, and sex composition of the population in the area. Of particular significance were the concentration of military forces in certain areas, the movement to overseas duty of a large number of men in the armed forces, and their subsequent return.

In addition to the birth and death statistics, published by the National Office of Vital Statistics, the individual State bureaus of vital statistics issue reports in this field. Ordinarily these publications contain more details relating to the geographic and political subdivisions of the States.

Marriages and divorces.—Collections of statistics on the numbers of marriages and divorces in the United States were made for the years 1867–1906, 1916, 1922–32, and 1937–47, except that no national collections on statistics of marriage were made in 1941–43. Estimates have been made for the intervening years as well as for years in which returns were not complete. Marriage statistics for 1922–32 are based on reports for all counties. For the remaining years in which marriage statistics were collected, more than 90 percent of all counties were covered. Returns on divorces were considered practically complete for all collection years prior to 1941. At the present time, records

Federal Reserve Bank of St. Louis

of marriage are collected centrally in almost three-fourths of the States, and records of divorces, in about one-half of the States. Marriage and divorce rates are based upon Bureau of the Census estimates of the midyear population.

Morbidity.—Statistics on morbidity are compiled and published by the Public Health Service. Each State health officer reports all diseases that are required by law or regulation to be reported in his State. The lists of diseases required to be reported are not the same for each State, although the most common communicable diseases are reportable in all the States. Tables 102 and 103 show data on these reportable diseases.

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935–36. Reprint No. 2384 from the Public Health Reports for May 29, 1942, gives a rather complete list of publications based on the National Health Survey.

Medical care.—Annual statistics of medical care on a Nation-wide basis are limited to data on hospital facilities obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilites are usually included.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. Beginning with the report for 1947, these statistics have been carried on by the Mental Hygiene Division, Public Health Service, Federal Security Agency; from 1926–46, the data were collected annually by the Bureau of the Census.

Nutrition.—Statistics on the apparent consumption of food per capita by civilians are estimated by the Bureau of Agricultural Economics of the Department of Agriculture. On the basis of these estimates, statistics on the nutritive value of the per capita food supply are computed by the Bureau of Human Nutrition and Home Economics. These statistics are published quarterly by the Bureau of Agricultural Economics in the National Food Situation.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 1 and C 1–5") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

No. 102.—Reportable Diseases—Number of Cases Reported, by Selected Causes, by Months: 1947

[Figures on number of reported cases of communicable diseases in this and following table should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities in giving early warnings of epidemic conditions. They should not be interpreted as measures of total amount of illness caused by the diseases concerned]

Disease	Total	January	February	March	April	May	June	July	August	September	October	November	December
Chickenpox	317,565	44,740	43,786	54,524	46,874	39,703	24,388	8,966	2,755	1,700	6,401	15,060	28,668

No. 104.—Nutrition—Nutrients Available for Civilian Consumption per Capita per Day: 1935 to 1948

Computed by Bureau of Human Nutrition and Home Economics on basis of estimates of apparent civilian consumption (retail basis) including estimates of consumption from urban gardens, supplied by Bureau of Agricultural Economics. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to white bread and flour under enrichment program. 1947 and 1948 estimates assume that voluntary enrichment continues at rate required under War Food Order, No. 1. For revised data, 1909 to 1948, see Dept. of Agriculture Misc. Pub. 691. See also *Historical Statistics*, series C 122-127]

3. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the Annual Report of the Attorney General contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 106) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 107). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 113), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 107). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 304") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. Also a detailed text statement indicates dates for which statistics of immigration from specific countries were first recorded. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

No. 109.—Annual Quotas Allotted and Quota Immigrants Admitted, by Quota Country or Region: Years Ending June 30, 1930 to 1948

[Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1921 to 3 percent of number of foreign-born of such nationality resident in continental United States as determined by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National origins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 150,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their origin to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under 1924 act, minimum quota is 100; for nonquota classes, see general note, p. 91]

[1] Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota of country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain visas during later part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigration Act of 1924).

[2] Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific islands.

[3] For 1938 to 1945, Austrian quota included with German.

No. 110.—Immigration, by Country of Origin: 1891 to 1948

[Data are totals, not annual averages, and are for periods ending June 30, except as noted. From 1851 to 1867 figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and for 1898 to the present time, immigrant aliens admitted. Data prior to 1906 refer to country whence aliens came; thereafter, country of last permanent residence. Because of boundary changes and changes in list of countries separately reported, data for certain countries not comparable throughout. See also *Historical Statistics*, series B 304-330]

[1] Includes Serbia and Montenegro prior to 1920.
[2] Known as Irish Free State, 1922-1927.
[3] Austria included with Germany 1938-40.
[4] From 1899 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.
[5] Included in "All other countries" in 1892.
[6] Included in "All other countries" in 1892; in "Other Asia" in 1893 and 1894.
[7] Immigrants from Canada, Newfoundland, and Mexico not reported from 1886 to 1893, inclusive.
[8] Included in "All other countries" in 1892 and 1893.
[9] Includes 32,897 persons returning to their homes in the United States. After 1906 such aliens have been included in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whence they came (see headnote).

4. Education

Data on school attendance and on highest grade of school completed were obtained for each person in the United States as part of the 1940 Census of Population (see tables 123–131). Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 on educational attainment) of the population, based on sample data obtained in the Current Population Survey (see tables 124, 126, 129, and 132). The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools (see tables 133–154). Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school attendance statistics compiled from the 1940 Population Census are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college between March 1 and April 1, 1940. Night schools, extension schools, or vocational schools are not included unless they are a part of the regular school system; and no correspondence schools are included.

The same census, for the first time, included a question on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The *median* year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the last year of college by 16, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the Abstract from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education (see tables 155–157). Data on vocational rehabilitation are compiled by the Office of Vocational Rehabilitation (see table 158).

Data in this section relate to continental United States except as noted.

No. 123.—Persons Attending School by Single Years of Age From 5 to 20, by Sex: 1910 to 1940

[Statistics for 1940 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 3 prior censuses, school attendance question not restricted as to type of school or college. In 1940, question referred to period between Mar. 1, and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920 and 1910, to period between preceding Sept. 1 and census date (Jan. 1)]

No. 147.—Institutions of Higher Education—Income and Expenditures: 1936 to 1946

[**All money figures in thousands of dollars.** Data cover universities, colleges, professional schools, junior colleges, teachers' colleges, and normal schools, both publicly and privately controlled, regular session. For total expenditures for earlier years, see table 142]

ITEM	1936	1938	1940	1942	1944	1946 [1]
INCOME						
Number of institutions reporting	1,541	1,586	1,609	1,628	1,563	1,768
Income for educational and general and for plant extension purposes	**491,106**	**580,372**	**637,497**	**656,392**	**886,241**	**1,046,795**
Student fees	158,134	178,996	200,897	201,365	154,485	214,344
Endowment earnings	60,090	70,654	71,304	74,075	75,196	89,763
Federal Government	43,234	29,345	38,860	58,232	308,163	197,250
State governments	119,585	140,959	151,222	166,532	175,169	225,161
County, city, and district governments	21,050	22,091	24,392	27,057	26,449	31,005
Private gifts and grants	37,115	36,908	40,453	45,916	50,449	77,572
Sales and service of organized activities	24,943	27,947	32,777	40,308	53,576	67,084
Other (including that for increase of physical plant)	26,955	73,472	77,592	42,907	42,754	144,616
Auxiliary enterprises and activities	106,479	130,523	143,923	157,424	183,644	244,436
Income for increase of permanent funds	47,039	49,583	44,518	38,510	69,688	[2]
EXPENDITURES						
Number of institutions reporting	1,540	1,586	1,609	1,628	1,563	1,768
Expenditures for educational and general purposes, total	**419,883**	**475,192**	**521,990**	**572,465**	**[3] 753,846**	**820,326**
Administration and general expense	48,069	56,406	62,827	66,968	69,668	104,808
Resident instruction	225,144	253,006	280,248	298,558	334,189	375,122
Organized research	22,091	25,213	27,266	34,287	58,456	86,812
Libraries	15,531	17,588	19,487	19,763	20,452	26,560
Physical plant operation and maintenance	56,802	62,738	69,612	72,594	81,201	110,947
Organized activities related to instruction	20,241	24,031	27,225	37,771	48,415	60,604
Extension	29,427	34,189	35,325	42,525	44,421	55,473
Federal contract courses	2,580	2,020	----------	----------	97,044	----------
Other	----------	----------	----------	----------	----------	----------
Auxiliary enterprises and activities [4]	121,508	139,194	152,699	165,703	220,272	268,096
Capital outlay, total	**47,369**	**70,466**	**83,765**	**50,202**	**27,427**	**71,403**
Building and grounds	39,606	58,523	[2]	[2]	[2]	55,756
Equipment	7,764	11,943	[2]	[2]	[2]	15,647

[1] Includes estimates for institutions not reporting.
[2] Not available.
[3] Includes "Federal contract courses" not included in tables 142 and 149.
[4] Includes "Other noneducational expenditures."

No. 155.—Vocational Schools and Vocational Teacher-Training Courses, Federally Aided—Number of Teachers and Students, by Class of School or Course and by Sex: Years Ending June 30, 1920 to 1947

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for further development of vocational education. These acts, administered by Office of Education provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico beginning 1936, and for Alaska beginning 1937]

No. 158.—Vocational Rehabilitation of Disabled Persons, by Number Rehabilitated and in Process of Rehabilitation, by States, and for District of Columbia, Hawaii, and Puerto Rico: 1945 to 1948

[The Vocational Rehabilitation Amendments of 1943 (Public Law 113) expanded Federal-State program for vocational rehabilitation of civilians injured in industry or by accident or illness, or impaired by congenital defect. Scope of services now includes any services necessary to render disabled persons employable or to become more advantageously employable. Program is in operation in the 48 States, the District of Columbia, Hawaii, and Puerto Rico. Figures given relate to cases aided by Federal and State funds. Total expenditures in 1948 (fiscal year) comprised: Federal funds $17,701,113; State funds $6,861,970 (subject to final audit)]

5. Crime and Criminals

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft assault, and rape are violations of State laws. There are fifty separate and distinct, criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecut ing court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi annual bulletin, Uniform Crime Reports. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover about three quarters of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense Tables 159–163 are taken from Uniform Crime Reports. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

published statistical data on criminal cases disposed of in the general trial courts of from sixteen to thirty States including the District of Columbia. No national collection is now made. Comprehensive information is collected on the work of the Federal courts by the Administrative Office of the United States Courts. Tables 164 and 166 are prepared from the data published by that office.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Nearly every State publishes annual data either for the whole prison system or for each separate State institution. A national compilation of data on prisoners in Federal and State prisons and reformatories is made annually by the Bureau of the Census. Statistical information covering persons received and discharged from State prisons and reformatories in forty-six of the forty-eight States and from the District of Columbia and Federal prison systems is published annually in a comprehensive report. Tables 168–172 present data from these reports. The Federal Bureau of Prisons, in its annual report, Federal Prisons, provides as complete statistical information on prisoners as has been issued in this country. Tables 165 and 167 are from this source.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the Children's Bureau, Social Security Administration, Federal Security Agency.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

No. 159.—Offenses Known to the Police in 220 Cities of 25,000 and Over: 1931 to 1944

[Total population of cities covered was 27,806,547 based on 1940 census]

No. 163.—Arrests, by Age Groups: 1947

[Data from arrest records, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of State laws and municipal ordinances. Excludes fingerprint cards representing arrests for violations of Federal laws or representing commitments to any type of penal institution. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders]

Offense charged	Total, all ages	Age																	
		Under 15	15	16	17	18	19	20	21	22	23	24	25–29	30–34	35–39	40–44	45–49	50 and over	Not known

6. Climate

Climatological data are gathered by the United States Weather Bureau at about 10,000 stations. Of this number nearly 3,000 stations have autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. Data shown in these tables include long-time averages and extremes of the several elements for the vicinities indicated. Where the station has moved, but not out of the general vicinity, the data represent combined values for both the previous and the new locations.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The averages represent the arithmetic means of the period of record at the station. Relative humidity averages are based on 3 to 4 daily observations. The number of degree days as used in table 185 is the average monthly sum of the differences between 65° and the daily mean temperatures below 65°, i. e. (65°–T°). Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls below 65°. The degree-day value is based on this assumption.

7. Public Lands and National Park System

Acquisition of original public domain.—Recognition of its sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States and, with the exception of lands in the District of Columbia, is known as the *original public domain.* Any of such lands which the Government has not disposed of under the public-land laws, are generally referred to as *public-domain lands* or *public lands.*

In addition to the public domain, the United States Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for various public purposes. Such lands are often referred to as *acquired lands,* to distinguish them from public-domain lands. Complete statistics are not available as to the extent of such acquisitions.

Public-domain lands.—*Public-domain lands* or *public lands,* as used here, refers to those Federally owned lands to which the general body of public land laws apply. (See title 43, Code of Federal Regulations.) In general, it includes that portion of the *original public domain* not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be *public lands.* As a general rule, it excludes *acquired lands,* as defined above. The term *Indian lands* refers to that portion of the public domain lands that was ceded to the United States by Indian tribes on condition that part or all of the proceeds from their sale or other disposition would be covered into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public-land laws (including the homestead laws) of Federal public lands to non-Federal owners. In general, *original entries* and *selections* are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued.

Applications become *final entries* (perfected entries) upon issuance of a *final certificate* which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. These requirements may include, in particular cases, settlement upon and improvement of the lands entered, or payment of statutory fees or purchase money. A *final certificate* passes equitable title to the land to the applicant. *Patents* are instruments which pass legal title to the lands to the applicant. *Certifications* are issued in lieu of patents in connection with certain State selections.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics,* series F 1–7") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

1802, estimate of public domain				*200,000,000*
1781–1802 (State Cessions)	236,825,600	233,415,680	3,409,920	

[1] Estimated from imperfect data available for indicated years.
[2] Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.
[3] Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.
[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

[1] Includes receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals.
[2] As of June 30, 1948, process of legal adjudication had not yet been completed for all grants and small changes in data shown for certain years may occur. For period 1802–60, total land granted to States was 98,669 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, etc., or acreage of swamplands lost to States, for which States received indemnity in cash.
[3] Includes homesteads.
[4] Includes some classes of final entries and patents prior to 1911.
[5] Excludes commuted homesteads.

8. Labor Force, Employment, and Pay Rolls

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Current Population Survey of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture, and the Bureau of Labor Statistics of the Department of Labor. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours, labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. The methods usually used in the collection of statistics from establishments do not provide for adequate representation of new establishments coming into business and thus may yield estimates of employment that are subject to a cumulative downward bias. It has been the practice to correct for this bias by periodic adjustment to "benchmark" data from industrial censuses, tabulations of employer reports obtained in connection with Social Security programs, and other sources. These "benchmark" data are available only after considerable time lag. Therefore, for selected industry divisions, this bias is anticipated by correcting the current figures on the basis of past experience.

Labor force.—The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. (For detailed definitions of various work status classes, see footnotes to table 200.) Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation.[1] The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reporting themselves in each occupation and in each industry, and other items. The Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the Nation, provides current data published in Current Population Reports—Monthly Report on the Labor Force. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers.

[1] See Estimates of Labor Force, Employment, and Unemployment in the United States, 1940 and 1930, Sixteenth Census of Population. Table 201 in the Abstract presents 1940 and 1930 data adjusted insofar as possible to a comparable basis.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Also provided are data on hours of work and major occupational group of those employed and duration of unemployment of those unemployed.

Agricultural employment.—The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates, obtained by means of monthly mail returns from crop reporters, have been issued since 1909 by the Department of Agriculture.

Nonagricultural employment.—The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 34,000 establishments in manufacturing industries and from about 76,000 establishments in selected nonmanufacturing industries, supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Social Security programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, and unpaid family workers, most of whom cannot be covered easily by the establishment approach. Persons in the armed forces are also excluded. Estimates are available for *total* employment for 8 major industry divisions, for 20 manufacturing groups, and for selected nonmanufacturing industries. Employment data as well as indexes of employment and pay rolls, average weekly hours, and average weekly and hourly earnings are available for *production and related* workers in more than 130 manufacturing industries; in mining, power laundries, and cleaning and dyeing industries, and for non-supervisory employees and working supervisors in other selected nonmanufacturing industries.

The employment data are for all full and part-time employees who worked or received pay for any part of the period reported.

The pay roll and earnings data are gross, before pay-roll deductions and including overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Maritime Commission, the Civil Service Commission, the Bureau of the Census and other agencies.

Labor turn-over.—Labor turn-over estimates are published monthly by the Bureau of Labor Statistics for 64 industries in 19 major divisions in manufacturing and for selected nonmanufacturing industries, on the basis of 7,300 voluntary reports. There are a number of significant differences between the turn-over data and the Bureau of Labor Statistics employment hours and earnings data. The turn-over series relate to all employees; the employment and pay-roll estimates are available for all employees in major industry groups but for detailed industries refer generally to production and related workers only. The turn-over data are for the entire month rather than the pay-roll period ending nearest the middle of the month. Further, in the turn-over series the establishments are classified according to the current industry, while the prewar industrial classification has been maintained in the employment and pay-rolls statistics.

Work stoppages.—Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures of strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of workers involved, and the number of man-days of idleness. Basic statistical data are obtained from the employers and unions involved, as well as from third parties, such as State and Federal mediation services, where possible. From the data given on the schedules, the Bureau prepares annual reports (published in the May Monthly Labor Review and later in bulletin form) which gives not only the complete and verified total figures for each month of

the year but also analyses on strikes by industry, State, city, and by causes, results, labor organizations involved, and other pertinent classifications.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series D 11–31") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

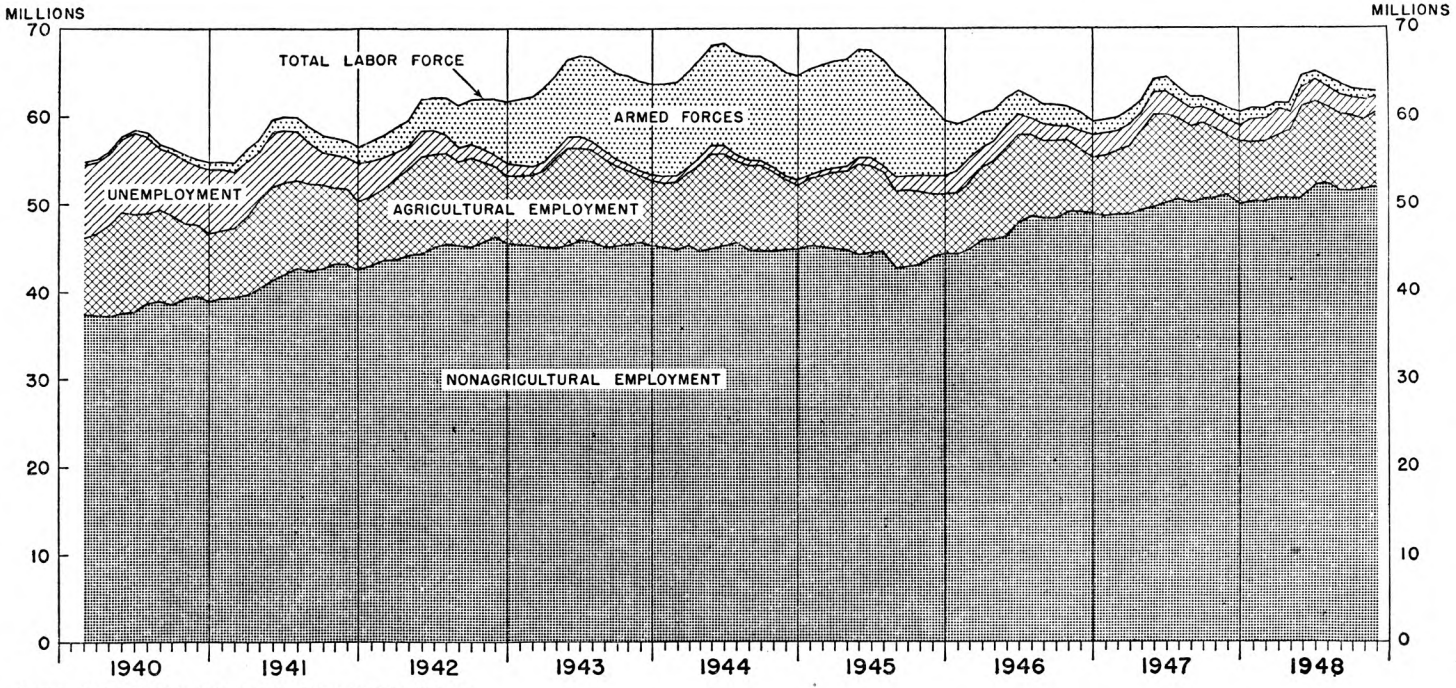
75 and over	1,404,060	29,782	2.1	28,525	355	866	36

[1] Includes (*a*) persons *at work*—persons who worked for pay or profit at any time during the week of Mar. 24–30, 1940, in private work or nonemergency Federal, State, or local government work, or assisted without pay on a family farm or in a family business; and (*b*) persons *with a job but not at work*—persons not actually at work and not seeking work during the week of Mar. 24–30, 1940, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date. The category *Employed (except on public emergency work)* includes not only employees but also proprietors, farmers, other self-employed persons, and unpaid family workers.

[2] Includes persons who, during the week of Mar. 24–30, 1940, were at work on, or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration (NYA), the Civilian Conservation Corps (CCC), or State or local work relief agencies. In the interpretation of the data for persons on public emergency work, allowance must be made for the misclassification in the census returns of considerable numbers of public emergency workers. The number of persons reported in the census as on public emergency work in the United States was 2,529,606, whereas the number recorded on the pay rolls of the Federal emergency work agencies at about the time of the census was 2,906,196 excluding the NYA Student Work Program, and 3,377,978 including that program. The most common type of misclassification was the reporting of the emergency workers as *At work*. Persons on the NYA Student Work Program were very frequently returned as in school and not in the labor force. There is also evidence that a considerable number of emergency workers were classified as *Seeking work*.



[3] Includes persons without work of any sort in the week of Mar. 24–30, 1940, who were seeking work during that week. This category is composed of both experienced and new workers, the latter being persons who had not previously worked full time for 1 month or more.

No. 201.—Estimated Number of Persons in the Labor Force, 1930, and Adjusted Number in the Labor Force, 1940, by Employment Status, by Age and Sex

[**Figures in thousands.** Figures for 1930 in this table are estimates according to the 1940 employment status classification. An allowance was made in each age group for persons whose age was not reported in the 1930 census. Figures for 1940 in this table show data adjusted to take account of the misclassification of public emergency workers in the census returns (see note 2, table 200) and of persons whose employment status was not reported in the census. Since the data in this table are not available by occupation, industry, race, or other characteristics, or for areas other than the United States as a whole, it is necessary to use unadjusted figures for the labor force in 1940 and for gainful workers in 1930 and earlier years, as shown in tables 200, 202–204, 208–214]

AGE AND SEX	1930					1940

[1] Figures for 1900 to 1930 represent gainful workers, that is, persons reported as having a gainful occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. Figures are, therefore, not strictly comparable with those in the labor force for 1940, shown in table 200 and in following tables.

[2] Including data for age unknown.

No. 205.—Employment Status of the Noninstitutional Population, by Sex: 1940 to 1948

[**Thousands of persons 14 years old and over.** Figures exclude inmates of specified institutions (see footnote, table 204). Unemployed persons include persons looking for work and persons on public emergency work projects. Data in tables 205–207, based on Current Population Survey (see Sampling Note p. 175), are not entirely comparable with those presented in tables 200–202, 204 and 208–214, which are based on reports of the 1940 census For an explanation of differences, see Department of Commerce, Bureau of the Census; Current Population Reports—Labor Force Bulletin (Series P–50, No. 2). See also *Historical Statistics*, series D 11–31]

Sampling Note

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

Sex	Civilian labor force			Not in the labor force
	Total	Employed	Unemployed	
	Percent	*Percent*	*Percent*	*Percent*
Both sexes	2	2	18	4
Male	2	2	18	4
Female	5	5	20	2

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitudes being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects, such as urban-rural distributions, migration, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

No. 210.—Detailed Occupation of Persons in the Experienced Labor Force and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

["N. e. c." means not elsewhere classified. Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 200. Occupation figures shown below for employed (except on public emergency work) refer to the occupation in which engaged during census week, and are based on complete census returns. Occupation figures for remaining experienced labor force groups, not shown separately in this table, refer to the occupation which the person regarded as his usual occupation and at which he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current and usual occupation based on complete census returns and Sample B, respectively]

OCCUPATION	EXPERIENCED LABOR FORCE			EMPLOYED (EXCEPT ON PUBLIC EMERGENCY WORK)		
	Total	Male	Female	Total	Male	Female

[1] Comprises a summation of the complete count of present occupations for employed persons (except on emergency work) and of the tabulations from Sample B (see p. 1) of usual occupations for persons on emergency work and for experienced workers seeking work as shown in table 210. For definitions of these labor force groups, see footnotes on table 200.

[2] Comparable figures not available.

No. 213.—Detailed Industry of Persons in the Experienced Labor Force, and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more; see footnotes on table 200. Industry figures shown below for employed (except on public emergency work) refer to the industry in which engaged during census week, and are based on complete census returns. Industry figures for remaining experienced labor force groups, not shown separately in this table, refer to the industry in which the person was engaged when employed at his usual occupation and at which occupation he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current industry and usual industry which in turn are based on complete census returns and Sample B, respectively]

No. 222.—Indexes of Production-Worker Employment and Weekly Pay Rolls in Manufacturing, by Industry Group and Industry: 1944 to 1947—Con.

[Average 1939=100]

Industry group and industry	Production-worker employment				Production-worker pay rolls			
	1944	1945	1946	1947	1944	1945	1946	1947
Textile-mill products and other fiber manufactures [1]	98.8	93.7	105.1	108.8	174.7	173.6	225.2	265.0
Cotton manufactures, except smallwares	114.4	108.1	117.8	121.9	210.3	204.6	269.4	327.0
Cotton smallwares	105.6	102.1	110.4	102.2	187.4	192.3	221.4	222.3
Silk and rayon goods	78.2	75.2	83.5	88.6	141.5	145.5	189.4	234.7
Woolens and worsted manufactures, except dyeing and finishing	102.5	97.8	110.5	108.0	194.1	190.6	245.7	264.9
Hosiery	69.4	65.9	79.7	84.6	109.9	107.6	153.5	178.5
Knitted cloth	102.1	98.5	109.5	97.4	174.9	180.1	225.2	211.0
Knitted outerwear and knitted gloves	109.7	104.3	121.7	111.2	196.4	196.7	257.1	244.1
Knitted underwear	97.3	92.4	101.4	117.6	174.7	173.2	213.6	281.2
Dyeing and finishing textiles, including woolen and worsted	105.6	100.7	119.0	128.0	173.9	173.4	233.1	285.1
Carpets and rugs, wool	82.6	78.3	101.3	127.8	140.2	134.6	188.1	276.6
Hats, fur-felt	70.4	69.1	81.7	86.5	131.1	135.0	180.4	182.1
Jute goods, except felts	96.7	96.9	110.7	98.2	184.3	191.3	236.0	221.9
Cordage and twine	134.4	124.8	129.6	123.8	245.9	237.3	258.0	279.6
Apparel and other finished textile products [1]	118.2	115.8	125.5	134.3	203.4	209.0	255.6	291.9
Men's clothing, not elsewhere classified	110.5	105.2	108.2	116.5	187.1	185.7	219.0	257.3
Shirts, collars, and nightwear	82.6	76.6	86.5	96.7	144.1	140.1	184.3	226.6
Underwear and neckwear, men's	96.7	93.3	100.3	103.2	188.0	190.9	236.0	265.5
Work shirts	112.0	105.0	105.5	103.4	204.7	200.9	226.1	243.5
Women's clothing, not elsewhere classified	122.6	122.5	139.4	150.4	213.3	224.7	288.2	314.6
Corsets and allied garments	80.7	75.9	84.9	95.3	137.7	133.6	165.7	202.6
Millinery	88.5	85.8	85.6	80.0	133.1	139.9	147.2	141.4
Handkerchiefs	96.0	83.6	83.2	94.8	171.6	156.0	178.2	225.2
Curtains, draperies, and bedspreads	120.8	108.5	126.0	113.5	229.6	218.6	264.9	249.8
Housefurnishings, other than curtains, etc	212.1	224.2	214.0	206.7	387.1	408.9	419.6	442.5
Textile bags	177.3	205.6	182.6	176.0	290.4	350.7	326.1	360.0
Leather and leather products [1]	91.9	91.6	106.1	110.8	159.4	168.6	208.8	238.4
Leather	83.0	83.3	94.0	98.4	141.8	148.6	168.8	202.5
Boot and shoe cut stock and findings	90.5	91.3	101.6	97.3	149.4	155.9	183.2	186.7
Boots and shoes	84.1	83.6	98.5	105.7	148.1	157.8	201.8	234.1
Leather gloves and mittens	133.0	131.5	140.3	126.5	227.2	231.5	266.6	243.1
Trunks and suitcases	147.4	147.3	170.4	160.3	235.9	248.0	316.5	328.2
Food [1]	127.6	126.4	132.5	146.7	203.9	209.4	237.3	300.4
Slaughtering and meat packing	126.4	114.1	118.4	141.6	209.2	187.0	198.3	286.3
Butter	168.1	165.2	174.6	176.2	257.7	266.4	309.8	352.7
Condensed and evaporated milk	194.1	191.1	185.7	193.7	312.0	323.0	342.9	409.3
Ice cream	131.1	127.2	146.1	161.2	183.6	188.4	239.3	289.2
Flour	128.5	134.7	134.8	145.3	212.1	235.1	257.8	324.9
Feeds, prepared	146.8	160.5	160.7	166.0	247.3	280.0	293.7	350.0
Cereal preparations	135.4	138.1	158.5	153.9	234.8	250.6	280.7	308.1
Baking	112.3	112.7	114.6	123.3	167.0	177.7	199.3	233.9
Sugar refining, cane	112.1	105.6	111.2	144.7	180.0	168.1	178.7	292.2
Sugar, beet	85.2	91.9	98.8	110.9	118.7	141.2	180.6	226.7
Confectionery	114.5	110.6	109.6	130.1	187.3	189.8	205.6	277.6
Beverages, nonalcoholic	139.1	125.8	122.5	148.6	182.7	170.1	179.5	248.8
Malt liquors	147.1	151.9	159.6	185.9	213.5	228.3	245.8	333.1
Canning and preserving	130.2	137.7	155.7	146.3	246.4	273.2	362.0	368.6
Tobacco manufactures [1]	89.9	87.4	92.0	92.5	158.8	164.7	187.1	201.8
Cigarettes	126.6	125.7	121.6	121.3	192.3	203.5	219.5	241.7
Cigars	72.0	67.2	78.7	80.6	140.9	139.7	174.5	184.0
Tobacco (chewing and smoking) and snuff	89.7	95.4	85.0	79.3	137.7	157.6	146.9	160.2
Paper and allied products [1]	120.3	120.8	139.3	147.2	195.3	204.3	252.8	306.8
Paper and pulp	114.9	115.5	134.6	144.1	192.7	200.0	246.1	306.5
Paper goods, other	133.3	133.5	151.8	163.5	211.0	219.7	270.8	328.4
Envelopes	115.9	116.0	128.7	138.0	177.0	183.2	222.5	266.0
Paper bags	129.1	133.9	160.7	167.3	214.3	235.9	297.1	347.7
Paper boxes	123.3	122.8	140.0	142.6	192.7	202.4	254.5	293.1

[1] Includes certain Government corporations. Based, for the most part, on reports of respective agencies to Civil Service Commission adjusted to improve comparability throughout period. Differs from data in tables 226–228 in following respects: (1) Excludes seamen and trainees on ships contracted by U. S. Maritime Commission and substitute rural mail carriers; (2) excludes Panama R. R. Co. (included under Government corporations); (3) includes temporary employees of Post Office Department hired to handle Christmas mail each year.

[2] Current data cover Panama R. R. Co., Federal Reserve banks, and mixed-ownership banks of Farm Credit Administration. Data for earlier years include additional corporations not reported with data for executive branch.

Source: Department of Labor, Bureau of Labor Statistics. Data for executive branch based on reports of Civil Service Commission. Current data published in Monthly Labor Review and in mineographed releases.

No. 226.—Paid Civilian Employment in the Executive Branch of the Federal Government: 1816 to 1948

[Prior to 1937, represents number on roll with or without pay on last day of month; from 1937 through 1942, number on pay roll with pay on last regular pay period of month; 1943 and after, number in active-duty status as of last day of month. As reported to Civil Service Commission by all executive agencies without adjustment for comparability. Data to 1943 exclude Panama Railroad Co. and Inland Waterways Corp. Prior to 1947, excludes seamen and trainees of U. S. Maritime Commission, and beginning 1948 excludes Central Intelligence Agency. See also *Historical Statistics*, series P 62–64]

50 years and over	140	137	3	97.9	(2)	(2)	(2)	4,312	4,356	2,303

[1] Average age is 40.6 years for all employees, 41.6 years for men, and 37.7 years for women. Age is determined by subtracting birth year from year 1947.

[2] Less than 0.1 percent.

[3] Pay rates represent base pay before any deductions for retirement, taxes, or bonds, but exclude overtime, bonuses, night differentials, etc. Pay rates other than annual rates are converted to annual full-time equivalent.

[4] Average length of service is 10.2 years for all employees, 11.3 years for men, and 7.2 years for women. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.

No. 239.—Average Hours and Earnings in 25 Manufacturing Industries: 1925 to 1946

[Data cover a representative number of plants which employed 2,100,000 workers during 1946. Earnings computed by weighting average earnings in each industry according to relative importance of the industry as shown by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to its relative importance in each industry during the 3-year period 1927-29, as indicated by the Conference Board's studies. Pay roll data are based upon the week ending nearest the 15th of each month, or, if a generally recognized holiday falls in that week, upon the preceding week. Hourly earnings are not wage rates, because they include overtime and other monetary compensation]

No. 242.—Percent of Increase in Urban Wage Rates, By Industry Group: January 1941 to October 1948

[Intended to measure changes in basic rates of pay. Based on changes in occupational hourly wage rates (average hourly earnings in case of incentive workers) exclusive of all premium payments for overtime and for work on second or third shifts, except April 1947 to April 1948 data which represent changes in plant-wide average straight-time hourly earnings, and other periods noted as estimated. Occupational information collected through semiannual field visits, and plant-wide straight-time earnings data through mail questionnaires to about 6,600 representative establishments, located in 69 wage areas centering in cities of 25,000 or more population. Data refer to important manufacturing industries in each area and to a standard group of nonmanufacturing industries in all areas]

Industry group	Percent of increase from—								
	Jan. 1941 to Apr. 1943 [1]	Apr. 1943 to Apr. 1945	Apr. 1945 to Oct. 1945	Oct. 1945 to Apr. 1946	Apr. 1946 to Oct. 1946	Oct. 1946 to Apr. 1947	Apr. 1947 to Oct. 1947	Oct. 1947 to Apr. 1948	Apr. 1948 to Oct. 1948 [1]

No. 243.—Average Hours and Earnings of Production Workers in Selected Nonmanufacturing Industries: 1939, 1946 and 1947

[Based on monthly data supplied by cooperating establishments covering both full-time and part-time employees. As not all reporting firms furnish man-hour data, average hours and average hourly earnings for individual industries are based on slightly smaller sample than weekly earnings. See also *Historical Statistics*, series D 145-147, for earlier data on bituminous-coal mining]

Industry	Average weekly earnings			Average weekly hours			Average hourly earnings		
	1939	1946	1947	1939	1946	1947	1939	1946	1947
Anthracite mining	$25.67	$57.15	$62.70	27.7	38.3	37.4	$0.923	$1.494	$1.670
Bituminous-coal mining	23.88	58.03	66.86	27.1	41.6	40.6	.886	1.401	1.633
Metal mining	28.93	46.86	54.74	40.9	40.5	41.9	.708	1.156	1.307
Quarrying and nonmetallic mining	21.61	45.06	50.44	39.2	45.4	44.8	.550	.993	1.124
Crude petroleum and natural gas production	34.09	52.96	59.19	38.3	40.5	40.5	.873	1.307	1.468

No. 245.—Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1915 to 1948

[Data for earlier years cover 39 cities. Coverage gradually extended until 77 cities were included. Prior to 1938 figures based upon scale prevailing May 15 each year. From 1938 to 1942 study made as of June 1, except for building trades in 1942, made as of July 1. Since 1943 data collected as of July 1 for all trades except streetcar and bus operators for whom data are shown since 1947 as of Oct. 1, and printing data for 1948 as of Jan. 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. See also *Historical Statistics*, series D 152-163]

[Rates and hours for 1939=100]

Year	Building trades						Printing trades					
	All building trades		Journeymen		Helpers and laborers		All printing trades		Book and job		Newspaper	
	Rate	Hours	Rate	Hours	Rate	Hours	Rate	Hours	Rate	Hours	Rate	Hours
1915	37.2	117.6	38.0	117.6	32.4	117.5	38.2	126.8	36.9	128.7	43.0	118.6

[1] Data on hours and earnings on Federal projects reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average hours and earnings cannot be accurately computed by weeks and figures for average monthly hours and earnings tend to show certain irregularities reflecting this method of reporting.

[2] Preliminary.

No. 247.—Monthly Labor Turn-Over Rates (per 100 Employees) in Manufacturing Industries: 1939 to 1948

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in tables 220–222, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. In addition, labor turn-over data, beginning in Jan. 1943, refer to wage and salary workers, whereas employment and pay-roll data relate only to production workers. The turn-over sample is not so extensive as that of the employment and pay-roll survey—proportionately fewer small plants are included; printing and publishing, and certain seasonal industries, such as canning and preserving, are not covered]

Class of turn-over and year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Accession:												
1939	4.1	3.1	3.3	2.9	3.3	3.9	4.2	5.1	6.2	5.9	4.1	2.8

1947	3,693	25.6	2,170	6.5	34,600	.41	15.9	129	193	204

[1] Number of workers involved in some work stoppages which occurred between 1916 and 1926 is not known. Missing information is for smaller disputes and totals here given are fairly accurate.

[2] "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or do not strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

[3] Obtained by multiplying average number of employed workers each year by number of days worked by most employees during year.

[4] Not available.

9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, other branches of the military service and on the various aspects of government programs for veterans.

Military services.—Data are compiled from the various branches as indicated in the source notes. A summary table prepared by the Bureau of Labor Statistics, similar to their tables on employment in the section on Labor Force, is also included.

Veterans' Administration.—The Veterans' Administration was created under authorization of the act of Congress approved July 3, 1930 (46 Stat. 1016: 38 U. S. C. 11), to consolidate and coordinate under a single control all Federal agencies dealing with veterans' affairs.

The Veterans' Administration administers laws relating to the relief of, and other benefits provided by law for, former members of the military and naval forces. It is responsible for extending relief to veterans who served in the national defense establishment in time of war or peace, and dependents of living and deceased veterans, as provided for by various acts of Congress. These benefits include, in addition to compensation, pensions, vocational rehabilitation, and education, the guarantee or insurance of loans for purchase or construction of homes, farms, and business property, readjustment allowance for unemployed or self-employed veterans, Government life insurance, death benefits, adjusted compensation, emergency and other officers' retirement pay, physical examinations, hospital and out-patient treatment, and domiciliary care. The Veterans' Administration also administers the insurance section of the Soldiers' and Sailors' Civil Relief Act for persons in the active military service.

No. 252.—Personnel and Pay of the Military Branch of the Federal Government: 1934 to 1948

[In thousands]

[1] Excludes pay of retired and inactive reserve personnel.

[2] Prior to March 1944, includes persons on induction furlough; prior to June 1942 and after April 1945, includes Philippine Scouts.

[3] Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.

[4] Covers Navy, Marine Corps, and Coast Guard. For Navy proper and Coast Guard, includes cash payments for clothing allowance balances.

[5] Includes men's share of family allowances but excludes Government's contribution. Represents actual expenditures for Army through April 1947 and for Coast Guard for all periods. Other data represent estimated obligations based on average monthly personnel count.

[6] Represents Government's contribution. Excludes men's share.

[7] Includes leave payments of $716,313,000 in 1946, $1,528,227,000 in 1947, and $37,127,000 in 1948 (representing face value of bonds and cash payments) to enlisted personnel discharged prior to Sept. 1, 1946, for accrued and unused leave, and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days.

[1] Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War I emergency personnel still in service. Demobilization of World War I Army completed Nov. 11, 1926 with discharge of last emergency officer; last emergency enlisted man discharged on July 2, 1921. Excludes retired personnel on active duty; on June 30, 1941, 495 retired officers and 13 retired enlisted men had returned to active duty. Includes warrant officers, beginning with 1919; these numbered 731 on June 30, 1941.

[2] State militia prior to act of June 3, 1916. Includes warrant officers beginning with 1924, numbering 200 on June 30, 1941.

[3] U. S. Volunteers.

[4] Not available.

[5] Regular Army Reserve.

[6] Includes National Guard personnel in Federal service.

[7] Estimated.

[8] Officers' Reserve Corps. Beginning with 1924, excludes persons holding commissions also in National Guard. Figure for 1941 includes 57,309 officers on extended active duty.

[9] Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimated).

[10] Officers' Reserve Corps, 86,262; National Army, 49,118 (estimated).

[11] Estimated enlisted strength of National Army. Practically all members of Regular Army Reserve and Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

[12] Estimates only. Under orders of Secretary of War all components had been merged into one army known as "The United States Army."

[13] Enlisted Reserve Corps.

[14] Enlisted Reserve Corps, 1939, 3,054; 1940, 3,233; Regular Army Reserve, 1939, 19,301; 1940, 28,020. All enlistments in Regular Army Reserve suspended as of Dec. 31, 1940, and members called to active duty on or before Feb. 15, 1941, except those deferred until July 1, 1941, to complete college or university courses.

[15] Includes 74,602 unassigned selectees.

[16] Enlisted men, 491,777 (including 10,919 Regular Army Reserve and 1,470 Army of United States with Regular Army); selectees, 363,459.

[17] Enlisted men, 262,722 (including 20,590, Army of United States with National Guard); selectees, 168,854.

[18] Enlisted Reserve Corps. Includes 35 enlisted Reserve Corps men on active duty.

No. 258.—U. S. Air Force—Strength on Active Duty, June 30, 1948

TYPE OF PERSONNEL	NUMBER	TYPE OF PERSONNEL	NUMBER
Total	[1] 387,730		
Male commissioned officers	46,986	Women's Medical Specialist Corps	23
U. S. Air Force Regular	17,726	Women's Army Corps	153
U. S. Air Force Reserve	27,247		
Air National Guard	19	Warrant officers	1,248
Air Force of the United States	1,994	Male	1,238
		Female	10
Female commissioned officers	723		
Women's Air Force	5	Enlisted personnel	338,773
Army Nurse Corps	542	Men	337,340
		Women's Army Corps	1,433

[1] Excludes 5,419 Department of Air Force personnel assigned to Army Commands, and includes 27,903 Department of Army personnel and 3 Department of Navy personnel assigned to Air Force Commands. Such Army Command personnel are included in Air Force categories equivalent to those in Army; for example, in U. S. Air Force Regular are included Regular Army male commissioned officers, and in U. S. Air Force Reserve are included male commissioned officers of Organized Reserve Corps of Army.

No. 273.—Veterans Receiving Hospital or Domiciliary Care Authorized by Veterans' Administration: 1932 to 1948

[During fiscal year 1948, 5,233,680 out-patient treatments were given and 6,194,225 out-patient examinations were made. On June 30, 1948, 6,151 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of $120 per year through August 1939, $240 per year through December 17, 1943, $300 per year through May 31, 1948, and $500 per year thereafter]

10. Social Security and Related Programs

(Data in this section relate to continental United States, Alaska, and Hawaii, except as noted)

Broadly considered, "social security" includes (1) all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the wage loss resulting from old age, sickness, disability, unemployment, or death (social insurance and related programs); (2) assistance, or payments on a needs basis, to persons with inadequate income (public aid); and (3) medical and hospital care and services to individuals to improve their health, earning power, and welfare (health and medical services and other welfare services). The aggregate expenditures for these purposes from Federal, State, and local funds are shown in table 274; a comparison of these expenditures with total receipts and expenditures of Federal, State, and local governments may be made by reference to tables 359, 360, 362, 404, 409, 414, and 415. Other data for social security and related programs are given in tables 275–279.

More detailed information follows for certain of the insurance programs—old-age and survivors insurance (tables 280–287), State unemployment insurance (tables 288–292), railroad retirement and unemployment insurance (tables 297–304), retirement systems for Government employees (tables 312–319) and workmen's compensation (table 305); for public assistance (tables 306 and 307); and for maternal and child health and welfare services (tables 308–311).

The Social Security Bulletin carries current data on all these programs for which monthly figures are available, and its supplement, the Social Security Yearbook, summarizes annual data for all. See also source notes to the tables in this volume for publications giving more detailed data and analyses of the figures and information on administrative factors that may affect them.

SOCIAL INSURANCE FOR INDUSTRIAL AND COMMERCIAL WORKERS

The two social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age or death (Federal old-age and survivors insurance) or unemployment (Federal-State unemployment insurance). In addition, three States—Rhode Island, California, and New Jersey—administer cash benefits for workers covered by the State unemployment insurance law who suffer a wage loss because of temporary sickness; payments under the New Jersey program did not begin until January 1, 1949. These insurance programs cover employment in industry and commerce. Some State unemployment insurance laws, however, limit coverage to workers in firms with a specified minimum number of employees in a specified number of weeks in a year. The Social Security Act excludes from coverage certain types of work, such as farm and domestic labor, employment by government and railroads, and self-employment.

Old-age and survivors insurance (tables 280–287) provides monthly retirement benefits to fully insured workers, as defined below, at age 65 or over and supplementary monthly benefits to their wives aged 65 or over and dependent children under age 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers—children under age 18, and widows who have in their care a child beneficiary of the deceased insured worker. If the deceased worker was fully insured, survivor benefits are payable to his widow at age 65 or, if he leaves no widow or un-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

married child immediately or potentially eligible for benefits, to parents aged 65 or over who were chiefly dependent on him. If no monthly benefits are payable for the month in which the wage earner dies, a lump sum is paid to the spouse who was living with the worker at the time of death or, if there is no such spouse, as reimbursement for burial expenses to a person or persons equitably entitled to such payment. Survivor benefits were also established in 1946 for survivors of World War II veterans who die within 3 years of their discharge from military service, if pension or compensation is not payable by the Veterans' Administration with respect to the death of the veteran.

A worker is fully insured if he has received at least $50 in wages from covered employment in a minimum of 6 quarters and in 1 quarter of every 2 that have elapsed since the end of 1936—or since attainment of age 21 if later—and his attainment of age 65 or death, or if he has had at least 40 quarters of coverage. A worker is currently insured if he has had wages of $50 or more from covered employment in at least 6 of the last 13 quarters, including the quarter in which he dies.

Monthly benefits and lump-sum payments are based on the worker's average wage as legally defined. Benefits are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, earned more than $14.99 in covered employment. Covered workers and their employers each pay contributions of 1 percent on the worker's wages, not counting amounts above the first $3,000 in a year. The rate is scheduled to rise to 1.5 percent in 1950 and to 2 percent in 1952. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. The wage credits of a worker—the amounts of wages up to a maximum of $3,000 a year—are recorded in individual employee accounts maintained by the Bureau of Old-Age and Survivors Insurance.

State unemployment insurance laws (tables 288–292) pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In general, a waiting period of 1 or 2 weeks must be served before payments begin. Benefits are payable for a maximum number of weeks, amounting to 20 in 22 States at the end of 1948 but ranging from 12 to 26 weeks among the others. In theory, weekly benefit amounts represent about 50 percent of wages, but the maximum limits on individual payments, which range from $15 to $26 under the several State laws, cut down the proportion for many workers in many States. Five States take account of the unemployed worker's dependents in determining the amount of benefits payable to him. Three States now pay benefits to workers whose unemployment is caused by sickness.

The standard rate of contributions payable by employers for unemployment insurance is 2.7 percent of wages paid, not counting amounts above the first $3,000 a year paid to an employee. In two States, employees also contribute for unemployment insurance. All States adjusted employer contribution rates in 1948 in accordance with "experience rating," which is based in general on the extent to which their employees have drawn benefits. The Federal Government imposes a Federal unemployment tax on employers of eight or more in industry or commerce; against this Federal tax, employers credit, up to 90 percent of their Federal liability, contributions they have paid under the State law or would have paid if they had been assessed at the standard rate. Contributions collected by States are deposited to State accounts in the Federal unemployment trust fund, from which States withdraw amounts needed for benefit payments. The Federal Government makes grants to States to cover the necessary administrative costs of State systems that meet statutory Federal requirements.

In the three States which have temporary disability programs, employees pay contributions for these benefits. Other States which now collect or in the past have

Federal Reserve Bank of St. Louis

collected employee contributions for unemployment insurance may use that money to finance cash sickness benefits.

SOCIAL INSURANCE FOR RAILROAD WORKERS

The programs established under the Railroad Retirement Act and the Railroad Unemployment Insurance Act cover social insurance for employees of railroads (including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan companies which perform services in connection with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations which are national in scope. Both programs are administered by the Railroad Retirement Board, which publishes detailed data on operations in its Monthly Review and Annual Report.

Railroad retirement and survivor benefits (tables 297–301).—The Railroad Retirement Act provides retirement annuities for aged or disabled workers and monthly and lump-sum survivor benefits for the families of deceased railroad workers. Old-age annuities are payable at age 65 or over, or at reduced rates (full rates for women employees) at ages 60 to 64 after 30 years of service. Disability annuities are payable (1) at age 60 or after 10 years of service, in case of total and permanent disability, and (2) at age 60 or after 20 years of service, in case of permanent disability for employment in the worker's regular occupation, provided he is currently connected with the railroad industry.

Retirement annuity payments are made monthly and are equal to 2.4 percent of the first $50 of the worker's average monthly earnings, 1.8 percent of the next $100, and 1.2 percent of the next $150, the sum multiplied by the number of his years of service (up to a maximum of 30, if service before 1937 is included). Under certain conditions, military service is also creditable toward an annuity. Retirement is not compulsory at any age.

At present, the maximum annuity is $144 a month. Workers who have at least 5 years of service and are connected with the railroad industry receive a minimum monthly benefit which is equal to $60, $3.60 times the years of service, or the average monthly compensation, whichever is the least.

Pensions are paid to retired workers who were on the private pension rolls of the carriers on July 1, 1937, and who were not eligible for annuities.

Survivor benefits consist of four types of monthly annuities and a lump-sum death benefit to certain dependents of "completely insured" workers who die either before or after retirement as follows: (1) widows at age 65, if they do not remarry; (2) dependent, unmarried children under 16 (18, if attending school); (3) widows with dependent, unmarried children under 18 in their care; and (4) dependent parents aged 65, when the worker is not survived by a widow or eligible children. If the deceased worker leaves no survivor entitled to immediate monthly benefits, a lump-sum death benefit is payable to the widow, widower, children (including persons entitled to share with children under State intestacy laws), parents, or persons who paid the funeral expenses (in that order of precedence). If a worker dies "partially insured," all of the benefits listed above except those to widows at age 65 and to parents are payable.

If no benefits, or no further benefits, are payable with respect to an employee's death, a final residual payment may be made to the person designated by the employee or, in the absence of a designation to the widow (or widower), the children (or persons entitled to share with children under State intestacy laws), or the parents. If no person is alive to receive the payment, it is payable to the worker's estate. A widow (or parent) entitled to monthly benefits on reaching age 65 may elect, some time before attaining that age, to waive all rights to future monthly benefits and thereby make the residual payment available immediately.

Federal Reserve Bank of St. Louis

A worker is "completely insured" at death if he has a specified amount of service after 1936 or if he has been receiving a retirement annuity or a pension under the Railroad Retirement Act (if receiving an annuity, it must have begun before 1948 and have been based on at least 10 years of service). In the former case, he must, in general, have worked under the Railroad Retirement Act or the Social Security Act, or both, for a period equal to approximately one-half the time from 1937 (or age 21, if later) until he dies, retires, or becomes 65. A worker is "partially insured" if he worked in the railroad industry approximately 1½ years in the period beginning with the third year before his death.

The funds for the retirement system come from a tax on compensation (exclusive of earnings over $300 a month) and are collected under the Railroad Retirement Tax Act. The total tax rate, divided equally between the employer and the employee, is 12 percent and is scheduled to rise to 12½ percent in 1952. Appropriations for benefit payments and administration and for establishing a reserve in the railroad retirement account are made by Congress annually on the basis of anticipated tax collections.

Railroad unemployment and sickness benefits (tables 302–304).—The Railroad Unemployment Insurance Act provides unemployment and sickness benefits (including maternity benefits) payable during a "benefit year" to "qualified" railroad workers. An employee is "qualified" if he earned at least $150 in compensation from a covered employer in the "base year," which is the calendar year preceding the beginning of the benefit year. A benefit year begins on July 1 of each year and ends on June 30 of the following year. Benefits, ranging from $1.75 to $5.00, are payable for each day of unemployment or sickness (other than maternity) over 7 in the first 14-day registration period and for each day over 4 in subsequent registration periods up to a maximum of 130 days in the benefit year. Days of unemployment and days of sickness cannot be combined in the same registration period.

Maternity benefits are payable to women workers for a maximum period of 116 days beginning 57 days before the date of childbirth at the same daily benefit rate as for unemployment and sickness. Benefits, however, are paid for every day in a maternity period; in addition, the first 14 days of the maternity period and the first 14 days following childbirth are compensated at 50 percent above the regular daily rate.

The railroad unemployment insurance program is financed entirely by contributions paid directly to the Railroad Retirement Board by covered employers; the contribution rate (exclusive of individual earnings in excess of $300 a month) is one-half percent of pay rolls but, depending on the size of the account, may vary up to 3 percent.

The Board also operates a free employment service for railroad employees under this act.

RETIREMENT SYSTEMS FOR GOVERNMENT EMPLOYEES

Federal systems.—Three contributory retirement systems for Federal civilian employees (tables 312–314) and one noncontributory system are administered by the Civil Service Commission. In addition, there are other systems for Federal employees not otherwise covered (table 315).

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides for age, optional, disability and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also covers those employees in the municipal government of the District of Columbia not subject to special retirement systems for teachers, firemen, and policemen. The amendment of Feb. 28, 1948, provided annuities for the widows and minor children of deceased employees, and, under certain conditions, to the survivors of deceased annuitants. Approximately 1,700,000 employees were subject to this act

Digitized for FRASER

Federal Reserve Bank of St. Louis

as of June 30, 1948. The employee contribution rate, computed on base pay, has been 6 percent since July 1948. The rate had been 5 percent from July 1942–June 1948, 3½ percent from July 1926–June 1942, and 2½ percent from August 1920–June 1926.

The Panama Canal Zone Retirement Act, passed in 1931, pertains to employees of the Panama Canal and Panama Railroad Company who work on the Isthmus of Panama and are citizens of the United States. Four thousand four hundred and seventy-four employees were covered by this act in June 1948. Employee contributions are 5 percent. Employees of the Alaska Railroad in Alaska who are citizens of the United States come under the Alaska Railroad Retirement Act, enacted in 1936. The coverage under this system was 2,443 persons in June 1948. The contribution rate is 5 percent.

These three acts do not require specific payments from the Government as employer, but each implies that the Government will furnish the amounts necessary to finance the fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to each fund after a short period of operation.

A special act was passed in 1944 to provide noncontributory annuities for citizens of the United States employed during the Panama Canal construction period and not receiving benefits under other Federal retirement acts. Separate retirement systems, some contributory and others noncontributory, are in operation for the armed forces and special classes of Federal employees.

State and local systems (tables 316–319).—Retirement systems administered by State or local governmental units are in effect for about three-fifths of the persons employed by State and local governments. The great majority of the systems are contributory. The benefits provided and conditions for receipt of benefits vary widely. The retirement benefit is usually weighted heavily by years of coverage. Most of the systems include provisions for retirement from disability as well as from age. In general, survivor protection under State and local systems is afforded only for survivors of annuitants who have elected a reduced benefit, or consists of a refund of contributions only.

WORKMEN'S COMPENSATION

As a result of the recent enactment of a Mississippi workmen's compensation law, all States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In general, compensation is based on a proportion of wages; for total disability the proportion is commonly between three-fifths and two-thirds. However, all States but one place a maximum amount on the weekly benefit payment—between $18 to $25 in most laws, although several are as high as $30 or more. In most States, total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in almost half the States, there are either duration or cost limitations—or both—on the amount of medical benefits provided.

To ensure that compensation will be paid when due, workmen's compensation laws require that a covered employer obtain insurance or give proof of his qualifications to carry his own risk (self-insurance). In most of the States the employer is permitted to insure with private insurance companies, but in 7 of the 18 States which

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

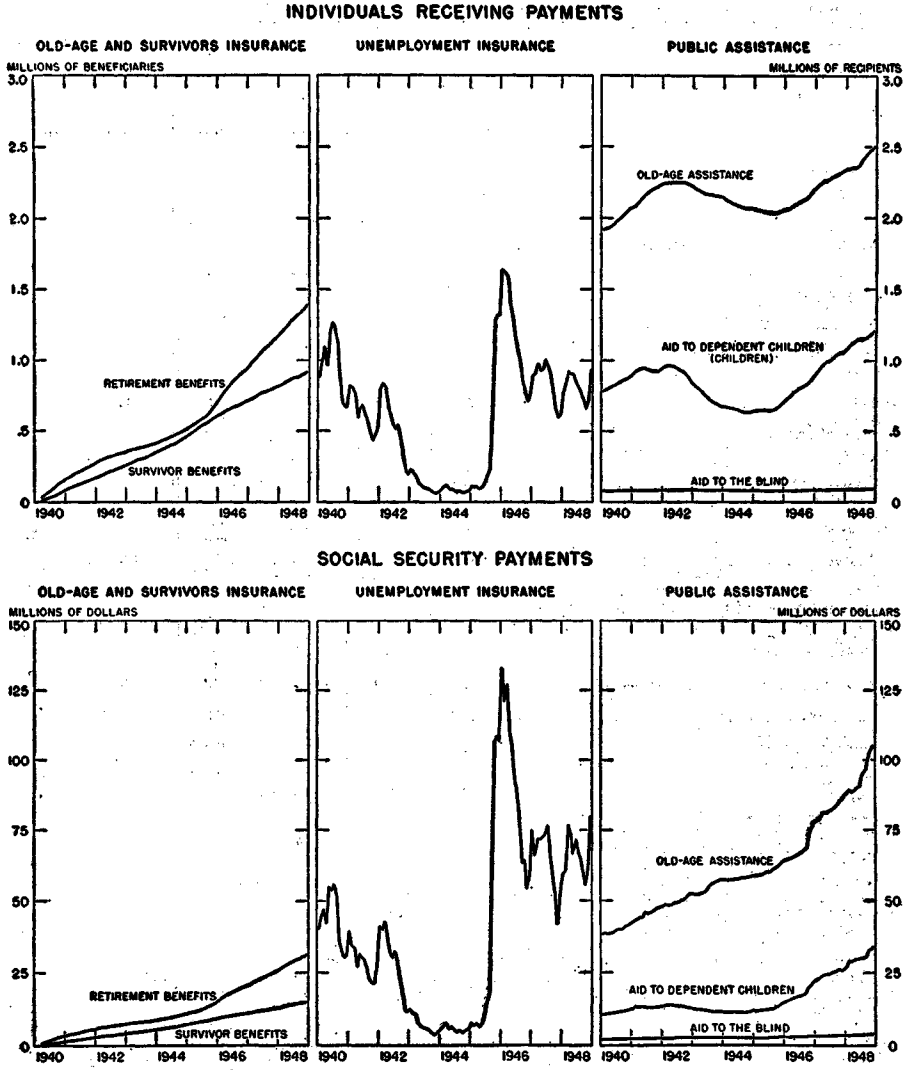
have State insurance funds, employers are required to insure their risks in the State fund.

Total payments of all types of insurers for compensation and medical benefits, by States and for the years 1939 to 1947, appear in table 305. Of the 1947 total of $485 million, an estimated $135 million was in the form of medical aid, about $290 million in cash benefits to injured workmen, and the remaining $60 million in periodic or lump-sum payments to survivor families.

PUBLIC ASSISTANCE

Public assistance (tables 306 and 307) is provided through four major programs, all administered by the States and localities. Payments to three groups of needy persons—the aged, the blind, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution. In addition, one State aids dependent children, and three aid blind persons, without Federal funds.

To receive a Federal grant for assistance payments and administrative expenses under any of the three programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall get. Beginning in October 1948, the maximum amount in which the Federal Government will share is $50 for old-age assistance and aid to the blind and, for aid to dependent children, $27 for the first child and $18 for each additional child in a family. The Federal Government pays three-fourths of the first $20 of the average monthly assistance payment for aged and blind recipients and three-fourths of the first $12 per dependent child, plus one-half the remainder of matchable expenditures. For all three programs the Federal share of the cost of State administration is one-half the sums expended.



HEALTH AND WELFARE SERVICE

Health and welfare services (tables 276, 277, 308–311) are provided through grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health. The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs (tables 308–311); the other two are administered, respectively, by the Office of Vocational Rehabilitation (table 158) and the Public Health Service, both units of the Federal Security Agency.

[1] Estimated by Social Security Administration.
[2] Includes noncontributory programs.
[3] Excludes administrative expenditures.
[4] State unemployment insurance and U. S. Employment Service.
[5] Includes administration of employment services by Railroad Retirement Board.
[6] Includes estimated administrative expenditures for nonmedical services, pensions, annuities, and readjustment allowances; excludes expenditures from Government life-insurance fund.
[7] State programs in Rhode Island and California; benefits became payable under California program Dec. 1, 1946. Excludes benefits under voluntary plans in California.
[8] Includes old-age assistance, aid to the blind, and aid to dependent children.
[9] Excludes expenditures for medical services included under public-aid programs above, and expenditures for health primarily incidental to performance of other functions, such as those in connection with Army, Navy, and education.
[10] Includes medical services to veterans, operation of Marine and other Federal hospitals and hospital construction.
[11] Estimate for care based on 1946 bed capacity in tax-supported institutions; estimated construction, unlike in prior years, obtained from Department of Commerce and represents amount of contracts allotted for hospital construction.
[12] Includes administrative expenses for services for crippled children and child welfare.
[13] Includes only required matching of Federal grants.
[14] Medical care and service expenditures under Vocational Rehabilitation Act.
[15] Not available.
[16] Includes expenditures by Food and Drug Administration, Bureau of Indian Affairs, Department of Justice for penal care, and by Government in the Territories for custody and care of insane.
[17] Expenditures under Vocational Rehabilitation Act for 1946; for 1947, excludes expenditures for medical services.
[18] Veterans' Administration programs for vocational rehabilitation, automobiles and other conveyances for disabled veterans' and burial awards.
[19] American Printing House for the Blind, Columbia Institution for the Deaf, Naval Home, veterans' homes, and U. S. Soldiers' Home.
[20] Not available; 1941 figure used for comparability.
[21] Federal Works Agency programsf or child care.

Other Federal agency projects financed from emergency funds [10]	498,415	324,639	186,505	247,285	92,604	12,904	730						

[1] For 1933–35 data see Statistical Abstract, 1944–45, table 205, p. 196.

[2] Represents recipients of payments from Federal, State, and local funds for programs administered under State plans approved by Social Security Administration and from State and local funds for programs administered under State laws without Federal participation, and amount of such payments. Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical care.

[3] Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical care. Data for 1936–March 1937 from WPA.

[4] Cases receiving relief under emergency education, student aid, rural rehabilitation, and transient programs of emergency relief administration, largely financed from FERA funds, and amount of such relief.

[5] Net number and net amount of emergency grant vouchers certified to cases and cases receiving only commodities purchased by FSA and distributed during period and value of such commodities. Dropped from series after June 1942 because appropriation was drastically reduced and payments limited to need occasioned by natural disasters. Data from FSA.

[6] Excludes administrative employees and their earnings.

[7] Enrolled persons only; represents averages computed from reports on number of persons enrolled on 10th, 20th, and last day of the month, except for Indian Division, for which averages were computed from daily reports. Earnings estimated by multiplying average monthly number enrolled by average of $70 through June 1939, $67 for July–October 1939, $66.25 for November 1939–June 1941, and $67.20 subsequently for enrollees other than Indians, and $60.50 for Indians. Average amount based on obligations incurred for cash allowances, clothing, shelter, subsistence, and medical care for persons enrolled, and for certain other items. Data from CCC.

[8] Persons employed during month, except for out-of-school program after June 1941, which represents average of weekly employment counts. Data until July 1939 from WPA; subsequently, from NYA.

[9] Average weekly number of persons employed on projects operated by WPA, and earnings covering all pay-roll periods ended during year. Beginning September 1938, for persons employed, and July 1938 for earnings, represents employment on Federal agency projects financed by transfer of WPA funds. Data from WPA.

[10] Average weekly number of persons employed during monthly period ended on 15th on projects financed in whole or in part from emergency Federal funds other than those of CWA, CCC, NYA, and WPA; earnings covering all pay-roll periods ending during year. Beginning October 1941, employment and earnings on projects financed from PWA funds only; figures not available for other Federal agency projects financed under Emergency Relief Appropriation Acts. Data from Bureau of Labor Statistics.

State sickness insurance [10]		2,857	5,035	4,669	4,761	22,024
Railroad sickness insurance [13]						11,368
Refunds under Civil Service Commission	6,357	10,809	42,156	80,992	[15] 238,594	179,301
Veterans' self-employment allowances [11]			102	11,675	252,424	198,174

[1] See table 315 for data relating to systems covering Federal employees other than systems administered by Civil Service Commission.

[2] Old-age retirement benefits under all acts, disability retirement benefits under Railroad Retirement and Civil Service Retirement Acts, and disability payments to veterans.

[3] Number of primary and supplementary (wife's and child's) benefits in current-payment status, and amounts certified, minus cancellations. Partly estimated.

[4] Age and disability annuitants and pensioners. Payments represent amounts certified, minus cancellations.

[5] Includes survivor benefits under joint and survivor elections; not adjusted for suspension of annuities of persons reemployed under National Defense Acts of June 28, 1940, and January 24, 1942.

[6] Widow's, widow's current, parent's, and child's benefits in current-payment status and amounts certified, minus cancellations. Partly estimated.

[7] Number of widows, parents, and children of deceased veterans, and amount of payments.

[8] Number of decedents on whose account lump-sum payments were certified, and amount of payments.

[9] Payments for burial of deceased veterans.

[10] Average weekly number. Amounts adjusted for voided benefit checks. State sickness insurance in Rhode Island and California. Excludes benefits under voluntary plans in California.

[11] Under Servicemen's Readjustment Act, effective September 1944. Beneficiaries of unemployment allowances represent average weekly number; of self-employment allowances, number during month.

[12] Average number of persons receiving benefits in a 14-day registration period. Amounts adjusted for underpayments and recoveries of overpayments.

[13] Beneficiaries as of June. Payments include lump-sum survivor benefits and refunds. Data estimated; for 1947, preliminary.

[14] Not available.

[15] Includes refunds to civilian employees of War Department during July–December 1945; number and amount not available.

[16] Data represent payments to individuals and exclude cost of administration.

[17] Data estimated. Includes payments for medical care.

January–March	473	40,000	23,300	583	40,000	24,200	605
April–June	759	40,800	23,000	564	41,100	24,900	606
July–September	858	41,000	21,300	520	42,400	25,400	599

[1] Exclude numbers under railroad-retirement program.
[2] Partly estimated; adjusted for workers having more than 1 account. Quarterly data unadjusted for workers employed during quarter but not reported after quarter in which they received their first $3,000 in year.
[3] Unadjusted for nontaxable wages erroneously reported and wages excluded in benefit computations. Wages in excess of $3,000 a year paid to worker by any 1 employer are not taxable. Beginning 1940, all wages in excess of $3,000 a year received by a worker are excluded in benefit computations.
[4] Partly estimated; adjusted for workers having more than 1 account. Quarterly data adjusted for workers employed during quarter but not reported after quarter in which they received their first $3,000 in year.
[5] Includes all wages in covered industries of workers earning over $3,000 a year.
[6] Includes 17,202,000 accounts established in 1936.
[7] Preliminary estimate, except employee accounts established.

[1] Total benefits awarded after adjustment for terminations and subsequent changes in number and amount of benefits, cumulative beginning January 1940. Not adjusted for deductions.

[2] Benefit is subject to no deduction or only to deduction of fixed amount which is less than current month's benefit.

[3] Including net adjustments. Benefit is terminated when a beneficiary dies or loses entitlement to a benefit for some other reason. Adjustments result from operation of maximum and minimum provisions, recomputations, and from other administrative actions.

[1] As measured by number of persons employed during specified pay period, namely last pay period in March 1938 and September 1939–42, and mid-March pay period in 1945–47.

[2] Preliminary.

[3] An employer is a legal entity, such as a corporation, partnership or single ownership, for which a single tax return is filed. Data cover those employers paying taxable wages for covered employment during specified period.

[4] Data not available.

[5] Persons employed during pay period specified in footnote 1.

[6] Wages paid by employers for covered employment during specified period, excluding wages over $3,000 paid by any one employer to any one worker in a calendar year.

[1] Includes $6,000 certified in lump-sum payments under 1935 act; distribution by State not available.

[2] Distribution by type estimated. Supplementary benefits are paid to entitled wives and children of retired (primary) beneficiaries. Survivor benefits are paid to the following survivors of deceased insured workers: Aged widows, children, younger widows with child beneficiaries in their care, or dependent aged parents.

[3] Payable with respect to workers who died after December 1939, if no survivor could be entitled to monthly benefits for month in which worker died. For lump-sum payments under 1935 act, see footnote 1.

[4] Exceeds number of deceased workers with respect to whose wage records payments were certified.

No. 287.—Old-Age and Survivors Insurance—Sample (1 Percent) of Workers With Wage Credits at Some Time in 1937–46, by Cumulative Wage Credits in 1937–46, Insurance Status January 1, 1947, and Age Group

[1-percent sample of all workers with wage credits identified for posting by July 1947; only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during period 1937–46 and workers who became entitled to primary insurance benefits before January 1, 1947. Age represents age at birthday in 1946. Since data are derived from a sample they are subject to a sampling variation which may be large where figures shown are small. Because of mechanical processes and extent of adjustments for delayed wage records, data may differ slightly from corresponding data in other published tables. Data corrected to February 1, 1949]

[1] A worker who is fully insured as of a given date (in this table, Jan. 1, 1947) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after quarter in which he attained age 21, whichever is later, and up to but excluding quarter in which he died, attained age 65, or given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had at least 6 quarters of coverage during the period consisting of the quarter of the date, or the quarter in which he died, and the 12 quarters immediately preceding such quarter. Uninsured workers are those who have some wage credits but are neither fully nor currently insured as of given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than $50 in taxable wages.

[2] Total includes 6,699 workers of unreported age not shown separately, of whom 283 were fully insured, 157 currently insured only, and 6,259 uninsured. Total excludes 24 workers for whom information was incomplete with respect to the characteristics reported in this table.

[3] No workers in sample cell. [4] Inapplicable under provisions of Social Security Act.

[1] Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are in effect for 1946 and 1947.

[2] Estimated number of different workers in each State who have earned wages in covered employment sometime during calendar year. Totals adjusted to eliminate duplication due to shifting of workers between States during year.

[3] Average of 12 monthly figures each of which is total of number of workers in covered employment in pay period of each type (weekly, semimonthly, etc.) ending nearest 15th of month.

[4] Total wages in covered employment for all pay periods ending in year.

[5] And wages of $100 in a calendar quarter.

[6] Or wages of $5,000 in a calendar quarter of the current or preceding calendar year.

[7] And wages of $78 in a calendar quarter. [8] Or 25 in 1 week.

[9] Wages of at least $50 to each of at least 4 workers during each of 3 calendar quarters.

[10] But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population. [11] Or wages of $500 in a calendar year. [12] Or wages of $10,000 in a calendar year.

[13] And wages of $225 in a calendar quarter. [14] Or wages of $450 in a calendar quarter.

[15] And wages of $500 in same calendar quarter.

[16] And wages of $140 in a calendar quarter.

[17] Or wages of $6,000 in preceding calendar year. Includes employers with wages of $10,000 in a calendar quarter toward which not more than $1,000 per employee need be counted.

[18] And wages of $500 in a calendar year.

[1] Benefits for other than total unemployment are not provided by State law in Montana.

[2] Unadjusted for voided benefit checks.

[3] Advances for unemployment insurance administration certified to State agencies during fiscal year, including amounts reimbursed to War Manpower Commission and Department of Labor for services and facilities provided to State agencies by U. S. Employment Service. Excludes amounts for services and facilities furnished to USES by State agencies, as well as unencumbered balances reallotted to State agencies. Totals include, but State figures exclude, expenses for postage.

[4] Includes estimates for New York for August-October; data not available.

[5] Due to the return of employment service to the States on November 16, 1946, includes amounts reimbursed to the Department of Labor for services and facilities provided to State agencies by USES for period July 1-November 15, 1946.

[6] Claims filed for biweekly instead of weekly periods.

[1] Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

[2] Contributions, penalties, and interest from employers and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks. Current contribution rates (percent of taxable wages) are: For employers, 2.7 percent except in Michigan, where rate is 3.0 percent; for employees, 1.0 percent in Alabama and New Jersey. Experience rating, operative in 45 States in 1945 and 1946 and 50 States in 1947, modifies above rates.

[3] Adjusted for voided benefit checks.

[4] Excludes benefits paid to seamen for 1947.

[1] Excludes railroads and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.
[2] Until January 1945, represents covered employment on last pay roll of each type (weekly, semimonthly, etc.) ending in month; thereafter, employment on pay roll of each type ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.
[3] Total wages in covered employment for all pay periods ending within period.
[4] Annual figures represent first payments to beneficiaries; monthly figures represent average weekly number of weeks of unemployment compensated during month.
[5] For 1939, represent number of benefit payments.
[6] Annual amounts adjusted, but monthly figures not adjusted, for voided benefit checks.
[7] Data not available.
[8] Excludes New York for January–March 1939; data not available.

Source: Federal Security Agency, Social Security Administration, Bureau of Employment Security. Some of these data appear periodically in Social Security Bulletin.

No. 293.—Placements Made by Public Employment Offices: 1937 to 1948

No. 298.—Railroad Retirement and Survivor Benefits—Number of Monthly Benefits by Class: 1940 to 1948

[Awards are reported on basis of an accounting month ending on approximately the 24th, and terminations are reported through dates staggered from the 3d to the 27th. Benefits in current-payment status include benefits awarded through that date less benefits terminated or withheld. Terminations are by death, commutation or completion of payments, or by loss of entitlement for any of the reasons described in the act. Benefits withheld are not directly shown in table. Benefits are withheld for investigation or adjustment, or for such reasons as return to service or recovery from disability of retirement annuitant, employment of widow, child, or parent, or failure of child 16 or over to attend school where feasible, etc. Withheld benefits, but not terminated benefits, are eventually reinstated to current-payment rolls]

No. 300.—Number of Railroad Employees, by Amount of Taxable Compensation: 1946

[Includes employees covered under Railroad Retirement and Railroad Unemployment Insurance Acts for whom compensation was reported by subject employers. Some of these employees also had wages taxable under Federal Insurance Contributions Act and are therefore included in preceding tables on old-age and survivors insurance. Earnings in this table include wages and salaries, commissions, back pay, and payments for time lost as an employee, reported by subject employers; however, the excess over $300 in any one calendar month for an employee is excluded]

No. 305.—Workmen's Compensation Payments, by State: 1939 to 1947

[Estimated by Social Security Administration. Payments include net cash and medical benefits paid by private insurance carriers (compiled from the Spectator, Premiums and Losses by States of Casualty, Surety, and Miscellaneous Lines), net cash and medical benefits paid by State funds (from the Spectator and State reports; estimated for some States), and cash and medical benefits paid by self-insurers plus the value of medical benefits paid by employers carrying workmen's compensation policies that do not include the standard medical coverage (estimated from available State data). Data are for calendar years, except for Montana, Nevada, North Dakota, Oregon, West Virginia, and Federal employees, for which fiscal year data were used. Benefit payments made under Longshoremen's and Harbor Workers' Compensation Act and under Defense Bases Compensation Act are included in data for States in which payments are made]

[1] Partly estimated; total not as large as sum of State figures because of adjustment for 2 States. See footnote 5.
[2] Excludes some cases and local funds not administered by State agency.
[3] Estimated.
[4] Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.
[5] Includes unknown number of cases receiving medical care, hospitalization, or burial only.
[6] Represents program administered without Federal participation.
[7] Excludes estimated duplication between programs; 2,976 cases were aided by county commissioners and an estimated 4,607 cases under program administered by State Board of Public Welfare.

[1] The States classified as having substantially complete coverage reported 90 percent or more of the children served. Those classified as incomplete reported less than 90 percent of the children served.

[2] The children reported as in institutions represent only those children served by workers attached to State or local public welfare agencies and not all children receiving institutional care.

[3] Includes a number of children for whom whereabouts are unknown.

[4] Not computed because of incomplete report.

[5] Less than 0.5 percent.

[1] Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 935 in 1948. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62; such annuitants increased from 5 as of June 30, 1942, to 18,805 as of June 30, 1948.

[2] Through Jan. 23, 1942, data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or, if eligible, elected to take a refund. Beginning Jan. 24, 1942, data relate to refunds for service prior to Jan. 24, 1942, for employees separated on or after that date with at least 5 years service and refunds to employees separated on or after that date with less than 5 years service.

[3] Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

[4] Data relate to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants whose entitlement to an annuity was terminated.

[5] Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

[1] Excludes refunds to members withdrawing from systems. Inclusion of lump-sum or nonrecurring payments makes annual benefit payments more than 12 times monthly benefit payments from which lump-sum payments are excluded. Moreover, annual benefits reflect additions to and withdrawals from old systems as well as creation of new systems during year.
[2] Includes townships, not shown separately.
[3] Includes 37 school districts and 6 special-purpose districts.
[4] Includes 2 school districts.

11. Income and Expenditures

The income statistics in this section are of two fundamental types: First, those which provide data on aggregate amounts (national income and national product data) and second, those which provide data on the distribution of families or persons by size of their income (size distribution data). The former are represented by tables 320–324. These statistics are compiled by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. The statistics representing the latter type of income data (tables 325–337) are derived from sample surveys of income conducted by several different agencies. Since these surveys were taken at different times and for different purposes, they differ somewhat in the definitions of income and the income-receiving unit. In addition to the income data, two tables (325 and 329) showing the types and amount of expenditures and the savings of families and single person, have been included in this section. Another table (No. 454) in the Banking and Finance section presents data on the distribution of family liquid assets and savings by income groups. These data are based on the Survey of Consumer Finances conducted by the Board of Governors of the Federal Reserve System.

Aggregate income.—The aggregate income statistics presented in tables 320–324 are of three general types: gross national product or expenditure (including a separate table showing personal consumption expenditures), national income (by distributive shares and by industrial origin), and income payments to individuals by States. **Gross national product** is the market value of the output of goods and services produced by the Nation's economy, before deduction of depreciation charges and other allowances for business and institutional consumption of durable capital goods. Other business products used up by business in the accounting period are excluded. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Gross national product comprises the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment.

National income is the aggregate earnings of labor and property which arise from the current production of goods and services by the Nation's economy. Thus, it measures the total factor costs of the goods and services produced by the economy. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Earnings are recorded in the forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings.

National income originating by industry is the sum of factor costs incurred by the industry in production. Hence, it is the net value added to production by the industry, measured at factor costs.

Income payments to individuals is a measure of income received by residents of each State from business establishments and governmental agencies. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief; labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's

Federal Reserve Bank of St. Louis

cash terminal leave payments; and State government bonuses to veterans of World War II. For discussion of distribution by State, see headnote, table 322.

Size distribution of income.—The statistics on the size distribution of income presented in tables 325 to 337 are based on data collected in various field surveys of income which have been conducted since 1936. The primary purpose of these field surveys was to show the distribution of families or persons by income levels rather than the aggregate amounts of income received by these families. Whereas the aggregate income data provide an indication of the level of total purchasing power, the field survey size distribution data, by showing the numbers and kinds of families and persons in each income bracket, provide an indication of the distribution of purchasing power in the population. In each of these field surveys trained enumerators interviewed representative samples of the civilian noninstitutional population with respect to the income received by the respondents or their families during the previous year.

The income represented in tables 326 to 337 is consumer money income, defined as the sum of civilian money wages and salaries; net farm entrepreneurial income; net nonfarm entrepreneurial income from business or profession; interest, dividends, and cash income from estates and trusts; rents and royalties; armed forces pay of persons living in private households at the time of the survey; dependency allotments and contributions from members of the armed forces; veterans payments; social security payments, unemployment and workmen's compensation, pensions and assistance; and miscellaneous items such as periodic contributions for support from persons not in the household, periodic payments from insurance policies or annuities, and alimony. The income is for the calendar year (except in the case of the 1935 data) and is before deduction of income taxes (except for 1944 Bureau of Labor Statistics data in table 325) or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is comparable with consumer money income. The nearest approximation is personal income.

Expenditures and savings.—The Bureau of Labor Statistics most recent survey of family income, expenditures, and savings on a Nation-wide basis is for the year 1944. The Survey of Prices Paid by Consumers in 1944 was based on a sample of 1,700 families and single persons in 28 metropolitan districts and 20 cities with populations under 50,000 outside of metropolitan districts. These places were selected to represent (with respect to region, State and city size) all cities in the United States with a population of 2,500 or more.

For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. A single person is one who lives in a private home, lodging house, or hotel. Since 1945, the Bureau has made similar surveys of family expenditure in three cities each year to obtain data necessary to check the prices and weighting patterns used in the consumers' price index; 1945 expenditure data were obtained for Birmingham, Ala.; Indianapolis, Ind.; and Portland, Oreg. (see Monthly Labor Review, June 1948); 1946 data for Milwaukee, Wis.; Scranton, Pa., and Savannah, Ga. (available upon request to the Bureau of Labor Statistics); 1947 data for Washington, D. C.; Manchester, N. H.; and Richmond, Va. (see Monthly Labor Review, April 1949); and 1948 data for Denver, Colo.; Detroit, Mich.; and Houston, Tex. (available in 1950).

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series A 117–133") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

No. 322.—Income Payments to Individuals, by States: 1929 to 1947

[Income payments are distributed among States on a where-received basis (with exception of wages and salaries, as noted below). Only payments made to residents are included in estimates for continental United States and individual States. Per capita income payments are derived by division of total income payments by total population excluding Federal civilian and military personnel stationed outside continental United States. In five instances, however, income was transferred from place of recipients' employment to place of residence before computation of per capita income. These are New York, New Jersey, District of Columbia, Maryland, and Virginia. In this connection, it should be noted that the wage-and-salary component of total income payments is allocated by States on basis of State of employment, rather than of residence. For all States, except the five listed above, it is assumed that State of employment is identical with State of residence. For definition of income payments to individuals, see text, p. 279]

No. 323.—Gross National Product or Expenditure: 1929 to 1948

[Gross national product represents total value of currently produced goods and services flowing to Government, to consumers, and for purposes of gross capital formation to business. Differs from national income by including business taxes, charges to depreciation, and certain other business reserves. These are elements of value of total production, but do not constitute income accruing to individuals. See also *Historical Statistics*, series A 101–116]

[Millions of dollars]

[1] Includes construction expenditures for crude petroleum and natural gas drilling.
[2] Classification of purchases of goods and services into war and nonwar conforms, in general, to Daily Treasury Statement classification of general and special account expenditures. War purchases include also that part of capital formation of government enterprises which is attributable to their war activities. Government contributions to National Service Life Insurance Fund are classified as war; all other government contributions for social insurance, as nonwar.
[3] Consists of sales abroad and domestic sales of surplus consumption goods and materials.
[4] Preliminary estimates, rounded to nearest 100 million.

No. 324.—Personal Consumption Expenditures: 1939 to 1948

[Represents market value of purchases of goods and services by individuals and nonprofit institutions and value of food, clothing, housing, and financial services received by them as income in kind. Includes rental value of owner-occupied houses, but not purchases of dwellings which are classified as capital goods. Includes expenditures by Federal civilian and military personnel temporarily abroad]

[Millions of dollars]

[1] Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

[2] Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

[3] Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

[4] Includes expenditures for alcoholic beverages.

[5] Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

[6] Value of bonds purchased less those cashed.

[7] Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

No. 328.—Distribution of Families and Single Consumers by Money Income Level: 1942

[Covers all civilian consumers except those living in institutions. Families defined as economic units of two or more persons sharing common or pooled income and living under common roof. Single consumers defined as men or women maintaining independent living quarters or living as lodgers or servants in private homes, rooming houses, or hotels. Term spending unit used to cover both groups. Civilian money income includes net money income of all civilians except those living in institutions; excludes all imputed (nonmoney) items, and all income paid to members of armed forces. Estimates on calendar year basis]

No. 330.—Distribution of Families and Individuals in Households, by Total Money Income Level, Urban and Rural: 1944 to 1947

[Based on samples of population residing in households only. Excludes small number of families and individual residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Individual" is used to refer to a person living alone or with persons not related to him]

No. 331.—Distribution of Primary Families and Individuals With Wage or Salary Income, by Wage or Salary Level and Receipt of Nonwage Income, Urban and Rural: 1939 to 1947

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Primary family" refers to head of a household and all persons related to him. A "primary individual" refers to a household head who has no relatives living with him. These terms not used in 1940 census. Wage or salary income includes all money received in compensation for work or services performed, as employees, including commissions, tips, piece-rate payments, bonuses, armed forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. A primary family was considered to have other income if any person 14 years of age and over in the family had $50 or more of income from sources other than money wages or salaries]

No. 337.—Median Wage or Salary Income of Persons 14 Years of Age and Over with Wage or Salary Income, by Color and Major Industry Group, by Sex: 1939 and 1947

[Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, armed forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. In 1940 census persons were classified as with or without other income on basis of answers to inquiry as to whether $50 or more of income was received from sources other than money wages or salaries. A similar classification was made in 1947 data by comparing amounts of money wage or salary income and total money income. In addition, farmers were classified as with nonwage income on the assumption that they had at least $50 of income in kind. Median wage or salary income based on number of persons reporting $1 or more of wage or salary income. For definition of median, see headnote, table 14, p. 12]

Color and major industry group	Both sexes		Male		Female

12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 28 commodities; indexes of food prices at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

The **wholesale price index** measures average changes in commodity prices of about 850 commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible the prices are f. o. b. point of production or sale. In the case of some commodities, prices quoted in organized commodity markets are used.

Commodities are priced in terms of a given specification at stated terms of trade. Most of the commodities are represented by a single quotation. In computing the index the price of each article is weighted by the quantities marketed during a representative period—since 1934, the period 1929–1931. Indexes are computed for 10 major commodity groups, 49 subgroups and 5 economic groups.

Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one group are included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, are included among both farm products and foods. Duplication also occurs between the metals and metal products and building materials groups. However, in computing the index for all commodities, such articles are counted only once.

The **consumers' price index** measures average changes in retail prices of goods, rents and services, weighted by quantities bought in 1934–36 by families of wage-earners and lower-salaried clerical workers in large cities, whose annual incomes averaged $1,524 in 1934–36. It does not measure changes in the total amount families spend for living or relative differences in prices or living costs between cities. The list of items priced for the index includes approximately 192 goods and services. For many goods a number of different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. Indexes for the major groups other than food have been compiled since September 1940, from price data collected in 34 cities. Since July 1947, the following schedule has been in effect:

Food prices and indexes, for 56 cities each month;
Fuel prices and indexes for 34 cities each month;
Commodities (other than food and fuel) and services indexes for 10 cities monthly and for 24 additional cities quarterly on a rotating cycle;
Rents quarterly for 34 cities, on a rotating cycle;
All items and group indexes for 10 cities monthly, and for 24 additional cities quarterly on a rotating cycle;
National indexes (average of large cities) for all items and groups, monthly, based upon prices in the cities surveyed and estimated changes in the unpriced cities.

The weights used in calculating the index are based on studies of actual expenditures by families of wage-earners and lower-salaried workers. A study conducted in 1917–19 provided the weights used from 1913 to 1935. Since 1935 the index has been based on 1934–36 expenditure patterns.

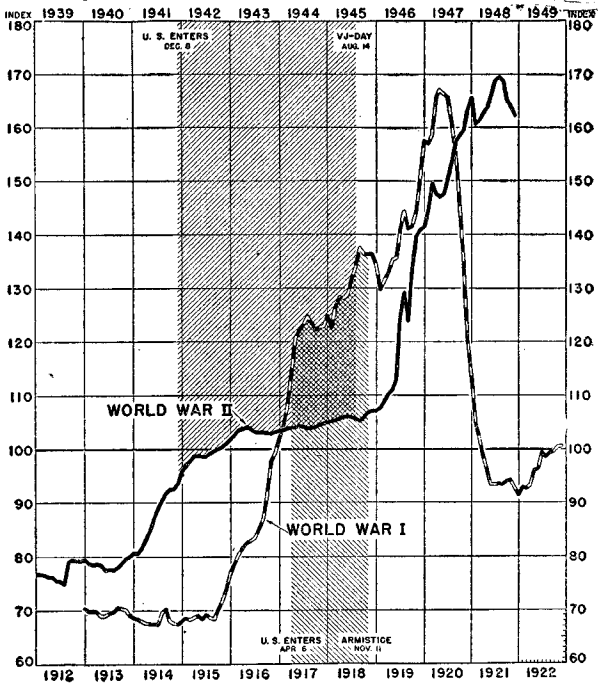
The **retail food price indexes** presented in this section for periods from January 1935 to March 1943 are based on the distribution of expenditures as shown by the 1934–36 study of expenditures of wage earners' and lower-salaried clerical workers' families. In March 1943, the weights for this index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, and 50 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

The Bureau of Agricultural Economics prepares currently **indexes of prices received for farm products and of prices paid by farmers.** (In addition to table 338 in this section, see tables 718 and 719.) The index of prices received for farm products included in this section is a revised series replacing the earlier series which has been in use for the past decade. Data cover prices paid to producers for 45 major farm products. Quantity weights applied to the individual commodities have been adjusted to marketings of the most recent prewar years, 1935–39. For other significant changes in the revised index, see source.

In comparing the **movement of the indexes of consumers' prices and of the prices paid by farmers** for commodities bought for family living (table 719), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

A number of **privately compiled indexes of wholesale and retail prices** provide some groupings not found in the official indexes. For example, the National Industrial Conference Board prepared current indexes for both a prewar and a wartime budget Special purpose indexes have not been included in this section.

The user of price indexes is reminded that the margin of error in price statistics due to unrecorded changes in quality, in discounts, and in undercover charges is greater in war than in peacetime.



Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series L 15–25") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

No. 341.—Wholesale Prices—Indexes, All Commodities and by Economic Classes: 1930 to 1948

[**Figures in column heads indicate current number of quotations.** Indexes of National Bureau of Economic Research are weighted arithmetic means for 680 price series, weights being based upon average value of production in 1927 and 1931. For method of computing Department of Labor index, see general note, p. 298. For Department of Labor publications in which data appear, see source note, table 340]

YEAR	DEPARTMENT OF LABOR 1929=100				NATIONAL BUREAU OF ECONOMIC RESEARCH 1929=100				
	All commodities 877	Raw materials 106	Semi manufactures 94	Manufactured products 677	All commodities 680 [2]	Producers' goods 418 [2]	Consumers' goods 292 [2]	Durable goods 222 [2]	Nondurable goods [1] 469 [2]
1930	90.7	86.5	87.1	93.1	90.5	88.4	93.2	93.0	89.1
1931	76.6	67.3	73.5	81.5	76.5	73.1	80.7	84.7	72.7

1941	91.6	85.6	92.5	94.3	92.1	94.3	89.6	104.2	87.2
1942	103.7	103.2	98.6	104.3	104.5	105.8	103.2	110.3	102.9
1943	108.2	115.0	98.9	105.9	109.4	110.3	108.4	110.6	109.5
1944	109.1	116.1	100.2	106.7	110.4	112.5	108.0	112.2	110.2
1945	111.0	119.8	102.1	107.7	112.6	115.4	109.1	113.8	112.6
1946	127.1	138.2	118.0	122.9	129.1	131.2	126.5	124.6	131.8
1947	159.6	169.8	158.1	154.5	162.3	168.0	155.3	157.8	165.8
1948	173.1	183.0	166.8	168.7	175.5	182.7	166.6	176.5	174.8

[1] Perishable and semidurable.
[2] Sum of number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 342.—Indexes of Spot Market Prices of 28 Commodities: 1939 to 1948

[**August 1939=100.** Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 28 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

PERIOD	General Index (28)	IMPORT AND DOMESTIC		Domestic agricultural (7)	FOODSTUFFS AND INDUSTRIAL	
		Import commodities (11)	Domestic commodities (17)		Foodstuffs (11)	Raw industrial (16)
1939—Average	109.2	110.1	108.6	109.4	111.2	107.7
1940—Average	114.3	117.2	112.4	119.7	110.6	116.9
1941—Average	143.9	147.8	141.5	147.8	150.5	139.1
1942—Average	167.6	162.4	171.0	183.8	186.9	154.2
1943—Average	176.7	167.2	183.2	210.0	201.7	159.9

No. 350.—Average Retail Prices of Selected Foods: 1913 to 1948

[Prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per dozen), and tomatoes (cents per No. 2 can). Data are averages of prices as reported by retail dealers in 51 large cities prior to 1943 and in 56 cities thereafter. Prices for individual cities combined with use of population weights]

No. 351.—Annual Average Unit Values of Important Articles Imported: 1921 to 1947

[Values required by law to represent values *in foreign markets* whence exported to United States. "Ton" signifies long ton of 2,240 pounds. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

YEAR	Cheese, per pound	FISH, CURED, PER BARREL (200 POUNDS)		HIDES AND SKINS, PER POUND		Wheat, per bushel	Bananas, per bunch	Cocoa, per pound	Coffee, per pound	Tea, per pound

13. Elections

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 155 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Federal offices. The number of registered voters in 1942 in each city of 25,000 inhabitants or more is given in the Cities Supplement to the Statistical Abstract.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 27–31) provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

No. 353.—Vote for Presidential Electors, by Major Political Parties: 1888 to 1948

No. 356.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1940

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 6 below)]

[1] Number of Representatives not to exceed 1 for each 30,000 inhabitants.
[2] See headnote.
[3] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 6.
[4] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 6.
[5] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.
[6] Assigned after apportionment.
[7] Included in apportionment act in anticipation of Statehood.
[8] Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 358.—Vote for United States Representatives, by Major Political Parties, by States: 1946 and 1948

[In each State, totals represent the sum of votes cast in each Congressional District, except as follows. In New Mexico and North Dakota (and in Arizona in 1946), no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, and Vermont only one representative is elected. In Connecticut and Ohio, representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidates in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

STATE	1946				1948			
	Total	Democratic	Republican	Other parties	Total	Democratic	Republican	Other parties

[1] In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

[2] Democratic-Farmer-Labor party.

[3] Included in "Other" are endorsing votes cast for major party candidates, as follows: in 1946, for Democrats 288,239 and for Republicans 17,599; in 1948, for Democrats 263,339 and for Republicans 31,735. Democratic total for 1946 includes 27,341 votes cast in endorsement of American Labor nominee. Republican total for 1948 includes 115,824 endorsing votes cast for Democrats.

14. National Government Finances

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for appropriations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from The Budget of the United States Government for the fiscal year ending June 30, 1950, are presented in tables 360–363. The Treasury Department publishes a "Digest of Appropriations" each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the "Combined Statement of Receipts, Expenditures and Balances," which is an abstract of the books of the Treasury relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the "Daily Statement of the United States Treasury," which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a "Statement of the Public Debt," as of the end of the month, on the first working day of the next month, and certain other special statements on the 15th day of each month. The "Treasury Bulletin," a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The "Annual Report of the Secretary of the Treasury" is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The "Annual Report of the Commissioner of Internal Revenue" gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are dealt with in the "Circulation Statement of United States Money" (monthly) and "Prices and Yields of Public Marketable Securities . . ." (monthly), both issued by the Treasury Department. See tables 431–433 and 516, pp. 423–425 and 483.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department in accordance with Section 63 of the Internal Revenue Code, which requires the preparation and publication annually of statistics reasonably available with respect to the operation of the income tax laws. The annual report, Statistics of Income, Part 1, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. Statistics of Income, Part 2, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. Data from these reports appear on pages 337–378.

ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the General Fund of the Treasury, from which all expenditures are made. No money may be drawn from the Treasury except in accordance with appropriations made by law.

Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. General accounts.—The principal categories of general account receipts are income taxes, miscellaneous internal revenue, employment taxes, customs, and miscellaneous receipts, such as proceeds from the sale of surplus property.

There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) annual appropriations, which are available for incurring obligations only during a specified fiscal year; (b) multiple-year appropriations, which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year) appropriations, which are available for incurring obligations until the appropriation is exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific appropriations, which are fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite appropriations, which are indefinite amounts (so much as may be necessary) provided by permanent legislation without annual action of Congress, such as the indefinite appropriation to cover interest on the public debt.

2. Special accounts.—Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items are those receipts for the reclamation fund, Alaska Railroad fund, and receipts under the Mineral Leasing Act, under the Department of the Interior, and the national forest funds, under the Department of Agriculture.

3. Trust accounts.—Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal old-age and survivors insurance trust fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as explained below, and the basis used is noted at the head of each table.

Daily Treasury Statement.—Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the Daily Treasury Statement. This statement is compiled from the latest daily financial reports received from Government depositaries and Treasury offices holding Government funds, and, because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Effective with the beginning of the fiscal year 1947 expenditures of several departments and establishments serviced by the Division of Disbursement, Treasury Department, are reported in the Daily Treasury Statement on the basis of checks issued. A clearing account is provided to take care of outstanding checks. Beginning July 1, 1948, such expenditures are reported as of the day on which checks are issued in payment of obligations, through the use of teletype facilities.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

Public debt accounts.—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

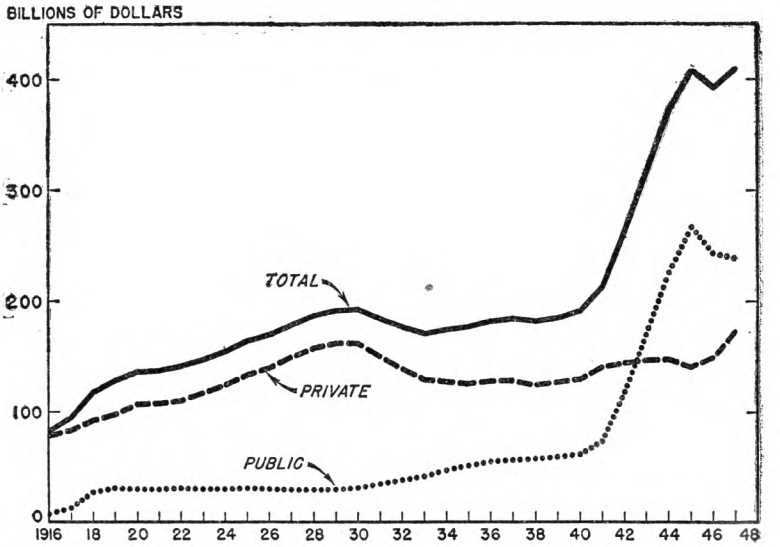
Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Warrants issued.—By law, warrants evidence the formal covering of receipts into the Treasury. The term when relating to expenditures may represent payments to claimants, but the greater number are merely advances of funds to disbursing officers for expenditure. Tables when compiled on this basis show expenditures considerably in advance of actual disbursement by disbursing officers.

Checks issued.—This term relates to expenditure statements made up on the basis of checks drawn by disbursing officers.

Collection basis.—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer.

Further details with respect to Treasury accounting bases and procedures are shown on pages 393–395 of the Annual Report of the Secretary of the Treasury for the fiscal year 1948.



Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 109) provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

[1] Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in other receipts.
[2] On basis of warrants issued 1789 through 1930; thereafter, on basis of checks issued.
[3] Average for period Mar. 4, 1789, through Dec. 31, 1800.
[4] Averages are for entire period though there were no amounts under these items for certain years.
[5] Years ended Dec. 31, 1801 to 1842; average for 1841–50 is for period Jan. 1, 1841, through June 30, 1850.
[6] Less than $500.
[7] Average for 1863–65.
[8] Average for 1881 and 1884.
[9] One year only, 1895.
[10] One year only, 1910.
[11] Average for 1914 and 1915.
[12] Average for 1917–20.
[13] One year only, 1922.
[14] Beginning 1937 consists of total receipts less deduction for appropriation to Federal old-age and survivors insurance trust fund.
[15] Average for 1944 and 1945.

[16] Beginning 1932 includes Government corporations (wholly owned), etc.
[17] "Civil and Miscellaneous" includes civil expenditures under War and Navy Departments at Washington prior to 1916; also includes expenditures for Office of Secretary of Defense for 1948. Army Department includes expenditures for rivers and harbors and Panama Canal; also includes expenditures of Air Force Department from funds made available prior to fiscal year 1949.
[18] On basis of warrants issued from 1789 through 1930; thereafter on basis of checks issued.
[19] Includes only Army and Navy pensions for service prior to World War I, and fees for examining surgeons in Pension Bureau. Excludes payments made by War Risk Insurance Bureau and Veterans' Bureau to veterans of World War I and salaries under Bureau of Pensions, which are included in civil and miscellaneous expenditures.
[20] On basis of warrants issued prior to 1922. Excludes amounts transferred to civil service retirement and disability fund.
[21] See notes on corresponding periods, p. 327.
[22] See note 4, p. 327.
[23] Average for 1912, 1913, 1915.
[24] Average for 1916, 1918–20.
[25] Average for 1918–20.
[26] Excludes interest accounts which are included in trust fund expenditures, beginning 1940.
[27] Excess of credits (deduct).
[28] Includes $3,000,000,000 transferred to trust fund entitled "Foreign Economic Cooperation Trust Fund." This amount charged to 1948 budget for expenditures to be made in fiscal year 1949.

No. 360.—National Government Expenditures by Organization Unit: 1941 to 1948

[**In millions of dollars.** For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in total to daily Treasury statement basis (which is partly checks issued and partly checks paid). This table includes budget expenditures and trust account expenditures and investments. "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts, except for the following items, which are excluded: Appropriation from general fund to Federal old-age-and-survivors-insurance trust fund and refunds of receipts, which are treated as deductions from receipts. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned government corporations and enterprises, excluding corporate debt transactions and "capital transfers" (omitted from both expenditures and receipts). Budget accounts do not include trust accounts, or public debt transactions. For further explanation see general note on p. 323; also Budget, 1950, p. A2]

No. 361.—Receipts From and Payments to the Public by the National Government: 1929 to 1948

[**In billions.** For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1950 Budget, pp. 1375–1376, headnote to table 360, and general note, p. 323]

No. 363.—Budget Appropriations and Other Authorizations for Federal Agencies, by Organization Unit: 1948

[**In millions.** For year ending June 30. The Budget total of "appropriations and other authorizations" represents total of new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total includes "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend from public debt receipts." "Net new appropriations" represent total of all appropriations less appropriations enacted to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeeding fiscal year the unused balance of an appropriation which would otherwise expire for obligation purposes. "Contract authorizations" permit placement of specific obligations or contracts but require subsequent appropriations to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). "Authorizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance certain types of Government programs. See also general note, p. 323, and headnote to table 360]

ORGANIZATION UNIT	Appropriations	Deduct: appropriations to liquidate contract authorizations	Net appropriations	New contract authorizations	Authorizations to expend from public debt receipts	Reappropriations	Total appropriations and other authorizations

No. 368.—Individual and Taxable Fiduciary Income Tax Returns—Summary: 1913 to 1946

Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, individuals are required to file returns as follows: (1) Single or married, for 1913–16, those with net income of $3,000 or over; (2) single, or married and not living with husband or wife, for 1917–24, $1,000 or over; 1925–31, $1,500 or over; 1932–39, $1,000 or over; for 1940, those with gross income of $800 or over, for 1941, $750 or over; and for 1942 and 1943, $500 or over regardless of amount of net income; (3) married and living with husband or wife, filing a *joint return*, for 1917–23, those with net income of $2,000 or over; 1924, $2,500 or over; 1925–31, $3,500 or over; 1932–39, $2,500 or over; for 1940, those with gross income of $2,000 or over; for 1941, $1,500 or over; for 1942, $1,200 or over; and for 1943, if gross income exceeds $624, regardless of amount of net income; also for 1943, a return is required of any person liable for tax for 1942, regardless of amount of gross income for 1943; (4) every individual with gross income of $5,000 or over for 1921–39, and as stated above for 1940–43. For 1944–46, every citizen or resident having gross income of $500 or more is required to file a return. For refund purposes, returns are also required with respect to gross income under $500 from which taxes have been withheld. *Data for returns showing no net income or no adjusted gross income filed in accordance with these latter provisions are not included in statistics shown.* Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien, and for 1938–46 a return is required for every trust having a net income of $100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144–147]

[All money figures in thousands of dollars]

1942	36,537,593	27,718,534	8,819,059	78,889,362	[6] 8,926,712			
1943	43,602,456	40,318,602	3,283,854	99,585,627	[6] 14,589,324			
	Individual returns with adjusted gross income [1]							
1944	46,919,590	42,354,468	4,565,122	116,714,736	[6] 16,216,401	92,369	655,623	131,078
1945	49,750,991	42,650,502	7,100,489	120,301,131	[6] 17,050,378	113,560	856,594	175,605
1946 (prel.)	52,600,470	37,915,696	14,684,774	134,330,006	[6] 16,075,913	121,725	1,065,765	205,457

[1] Net income for 1913–43 is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. For 1944–46, *adjusted gross income* (defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property) is shown instead of net income.

[2] Includes war excess-profits tax of $101,250,000 on individuals and $103,888,000 on partnerships.

[3] Tax after 25 percent reduction provided by Revenue Act of 1924.

[4] Excludes amount of alternative tax on returns reporting deficit due to net long-term capital loss, which tax amounted to $615,000 for 1938; $300,000 for 1939; $473,000 for 1940; and $2,326,000 for 1941.

[5] Includes defense tax 1940, $128,350,000; 1941, $1,150,000, not shown separately. Defense tax, applicable only to taxable years beginning in 1940, is 10 percent of total income tax before deducting any credit, but not in excess of 10 percent of amount by which net income exceeds such income tax.

[6] Tax for 1942 and 1943 computed on net income for respective year without regard to adjustments provided by Current Tax Payment Act of 1943. Tax for 1942 (as in prior years) is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while amount of tax for 1943–46 is after deduction of such credits. Total income and victory tax resulting from merging of 1942 and 1943 tax liabilities, as provided by Current Tax Payment Act of 1943, reported on 1943 returns with net income, is $17,114,112,000. This amount excludes $31,800,000 tax reported on returns with no net income.

Average tax per return	$244	$335	$348	$345	$309	$306	$1,688

[1] Adjusted gross income shown for 1942–43 is total income less net losses from rents and royalties, from business and profession, from partnerships, and from sales or exchanges of property; for 1944–46, see note 1, table 368.

[2] Salaries and wages include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but for 1944–46 exclude wages of less than $100 per annum from which no tax is withheld, reported on Form W–2. (See note 12.)

[3] Dividends received exclude those received through partnerships and fiduciaries; for 1942–43 exclude those reported on Form 1040A, and for 1944–46 exclude those reported on Form W–2. (See note 12.)

[4] Interest received excludes that reported on Form 1040A for 1942–43 and on Form W–2 for 1944–46. (See note 12.) Partially tax-exempt interest consists of amounts received directly, or through partnerships and fiduciaries, on certain Government obligations issued prior to Mar. 1, 1941, and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Taxable interest, Government and other, excludes that received through partnerships and fiduciaries, except that on fiduciary returns taxable interest on Government obligations includes that received through partnerships and fiduciaries.

[5] Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

[6] Net profit from business is excess of gross receipts over business expenses and, for 1944–46, net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and, for 1944–46, net operating loss deduction over gross receipts from business.

[7] Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

[8] Capital assets consist of all property held by taxpayer *other than* (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and capital loss carry-over, except that for 1942–46 allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T in 1944–46) computed without regard to gains and losses from sales of capital assets, or to $1,000, whichever is smaller. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see Statistics of Income, Part 1.

[9] Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) for 1942–46 also includes real property used in trade or business.

[10] Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. For 1942–43, excludes annuities reported on Form 1040A (see note 12); for 1944–46, annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

[11] Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

[12] Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes for 1942–43, dividends, interest, and annuities reported on Form 1040A, and for 1944–46 wages not subject to withholding, dividends, and interest, not exceeding in total $100 per return reported on Form W–2.

No. 375.—Corporation Income Tax Returns—Summary: 1916 to 1946

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments and, for 1940–46, prior to changes resulting from carry-backs, relief granted under section 722 of Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts, after returns were filed. (Changes in profits and taxes due to renegotiation of war contracts after returns were filed are shown in Statistics of Income, Part 2, for 1942–46.) All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. Under Revenue Act of 1934, privilege of filing a consolidated return for a group of affiliated corporations was limited to common carriers by railroad and their related leasing and holding companies. Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railway corporations. These changes result in marked differences between returns for 1934 through 1941, and those for 1933 and prior years, in net-income or deficit classification and in size of total assets, as well as in distribution by industries. Beginning 1942, consolidated-return privilege again extended, in general, to all corporations. Corporations are classified industrially on one business activity which accounts for largest percentage of total receipts. Therefore, industrial groups do not reflect pure industry classifications. As a result of application of Standard Industrial Classification, number of major and minor industrial groups for 1938 and subsequent years has been increased over that for 1937 and prior years. Changes in contents of groups are listed in Statistics of Income for 1938, Part 2, subsequent changes appear in later volumes. See also *Historical Statistics*, series P 152–164]

[All money figures in thousands of dollars]

1946 [7] (prel.)	526,363	359,310	131,842	35,211	27,184,592	1,991,702	8,874,840	8,606,695	268,145

[1] Returns of inactive corporations prior to 1927 are included in those reporting no net income.

[2] Net income in general represents taxable income less allowable deductions, except that for 1922–32 and for 1940–46 net income shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 380, p. 363.) For 1916–35 and for 1946, net income or deficit shown is amount reported for income tax computation. For 1936–45, net income or deficit shown is amount reported for declared value excess-profits tax computation, except that for 1944 and 1945, amount shown includes Government interest subject to surtax only and continues to include excess of net long-term capital gain over net short-term capital loss, even though such excess was made exempt from declared value excess-profits tax beginning 1944. Beginning 1936, net income or deficit includes dividends received on stock of domestic corporations. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

[3] Credit for tax paid to foreign countries, 1918–46, has *not* been deducted from amounts of income tax shown.

[4] War-profits and/or excess-profits taxes were in effect 1917–21, amount shown for 1922 having been reported on returns for fiscal years beginning in 1921; declared value excess-profits tax was in effect 1933–45; and the excess profits tax under the Second Revenue Act of 1940 (shown separately in table 376) was in effect 1940–45, amounts shown for 1946 having been reported on returns for fiscal years beginning in 1945. The amount of the last-mentioned tax included for 1940–46 is *after* credit for debt retirement and net postwar refund (1942–44), 10 percent credit (1945–46), and relief adjustments claimed on returns when filed.

[5] Includes surtax on undistributed profits.

[6] Includes defense taxes.

[7] Beginning 1942, instead of deductions for reserve earnings, deferred dividends, and interest paid, which were previously allowable to life insurance companies in arriving at net income, there is allowable a "reserve and other policy liability credit" against net income. As a consequence, there is an increase in both number of returns reporting net income and in amount of net income reported.

Taxable excess profits tax returns: [5]											
Number of returns					13,440	42,412	54,002	68,202	55,912	52,097	11,053
Excess profits net income					2,997,937	12,072,516	17,084,370	22,306,883	20,471,652	14,165,367	2,191,222
Adjusted excess profits net income					911,603	6,334,864	10,494,667	14,552,878	12,935,510	8,367,927	1,474,490

[1] Preliminary.
[2] For items included, see table 381.
[3] Includes income and declared value excess-profits defense taxes. Amount included for 1941 is reported on returns with fiscal years beginning in 1940.
[4] Declared value excess-profits tax repealed, effective with respect to income tax taxable years ending after June 30, 1946.
[5] For tax reported on these returns, see "Excess profits tax" above. See also note 4, table 375.

1944	5,965	5,643	36,249	26,547	26,304	149	14,884	11,663	6,057	247
1945	5,585	6,620	39,546	21,346	21,139	114	10,795	10,551	6,081	334

[1] For items included in "Total compiled receipts," see table 381.
[2] Gross sales, less returns and allowances, where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."
[3] Where inventories are not an income-determining factor.
[4] Beginning 1936, "Dividends from domestic corporations" are taxable income tabulated with "Other receipts."
[5] For 1932–33 consists of wholly tax-exempt interest on obligations of States, Territories, or political subdivisions thereof, or the District of Columbia; securities issued under the Federal Farm Loan Act or such act as amended; and obligations of the United States or its possessions; for 1934 through 1945, includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941–45.
[6] Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).
[7] See note 13, table 381.
[8] Includes amortization of emergency facilities for 1940 and later years.
[9] Compiled receipts less compiled deductions.
[10] See note 2, table 375; and note 4, table 385.
[11] Deducted by corporations reporting net income.
[12] In addition to income tax, includes: Declared value excess profits tax for 1933–45; surtax on undistributed profits, 1936–38, the amount for 1938 being that reported on returns with fiscal year beginning in 1937; excess profits tax under provisions of Second Revenue Act of 1940, for 1940–45; and defense tax 1940–41. Defense tax for 1941 is that reported on returns with fiscal years beginning in 1940.
[13] Deficit.

[10] Capital gain or loss is amount of gain or loss arising from sale or exchange of capital assets, defined to consist of property *other than* (1) stock in trade, (2) other property held primarily for sale to customers, (3) depreciable and real property used in taxpayer's trade or business, and (4) certain short-term Government obligations issued on a discount basis. Such gain or loss is classed as "short-term" if assets were held six months or less, "long-term" if period held was over six months. A net loss from this source is not deductible for current year but may be carried over and applied against capital gains in five succeeding taxable years. (See Statistics of Income, Part 2, for special treatment accorded gain or loss arising from sale or exchange of business property held for more than six months.)

[11] Net gain or loss, sales other than capital assets, consists generally of gain or loss arising from sale or exchange of depreciable and real property used in trade or business and certain short-term Government obligations issued on a discount basis. Exceptions to this rule result from special treatment of certain gains and losses mentioned in note 10.

[12] Includes taxes which are reported in "Cost."

[13] Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of U. S. if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[14] Limited to 5 percent of net income as computed without benefit of this deduction.

[15] Deduction due to net operating loss carry-over from two preceding taxable years.

[16] Compiled net loss or deficit.

[10] Capital gain or loss is amount of gain or loss arising from sale or exchange of capital assets, defined to consist of property *other than* (1) stock in trade, (2) other property held primarily for sale to customers; (3) depreciable and real property used in tax payer's trade or business, and (4) certain short-term Government obligations issued on a discount basis. Such gain or loss is classed as "short-term" if assets were held six months or less, "long-term" if the period held was over six months. A net loss from this source is not deductible for current year but may be carried over and applied against capital gains in the five succeeding taxable years. (See Statistics of Income, Part 2, for special treatment accorded gain or loss arising from sale or exchange of business property held for more than six months.)

[11] Net gain or loss, sales other than capital assets, consists generally of gain or loss arising from sale or exchange of depreciable and real property used in trade or business and certain short-term Government obligations issued on a discount basis. Exceptions to this rule result from special treatment of certain gains and losses, mentioned in note 10.

[12] Includes taxes which are reported in "Cost."

[13] Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession and gift taxes; (3) income taxes paid to a foreign country or possession of U. S. if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[14] Limited to 5 percent of net income as computed without benefit of this deduction.

[15] Deduction due to net operating loss carry-over from two preceding taxable years.

[16] Compiled net loss or deficit.

[17] See note 3, table 379.

[18] See notes 4 and 5, table 379.

No. 382.—Total Compiled Receipts of Corporations, by Industrial Groups: 1938 to 1945—Continued

[In millions of dollars]

INDUSTRIAL GROUP	1938	1939	1940	1941	1942	1943	1944	1945
Finance, insurance, real estate, and lessors of real property, total [3]	9,042	9,215	9,913	10,706	9,237	9,200	9,827	10,827
Finance, total [1]			4,390	4,675	3,340	3,299	3,636	4,236
Banks and trust companies	1,844	1,897	1,934	2,030	1,963	2,164	2,455	2,861
Long-term credit agencies, mortgage companies, except banks	59	60	57	53	41	34	31	34
Short-term credit agencies, except banks [2]	352	351	409	464	432	212	207	226
Investment trusts and investment companies [1]			287	279	216	228	266	328
Other investment companies, including holding companies [1]			1,459	1,509	490	426	435	452
Security and commodity-exchange brokers and dealers	151	153	137	213	95	141	138	214
Other finance companies	62	63	67	81	69	58	63	66
Finance not allocable [1]			40	45	34	36	41	55
Insurance carriers, agents, etc., total	3,086	3,162	3,394	3,731	3,754	3,672	3,774	4,029
Insurance carriers [2]	2,900	2,976	3,189	3,498	3,522	3,446	3,536	3,779
Insurance agents, brokers, etc	186	186	205	233	231	226	238	250
Real estate, including lessors of buildings	1,801	1,857	1,901	2,044	1,903	1,983	2,151	2,323
Lessors of real property, except buildings	200	187	229	256	241	246	265	238
Construction	1,964	2,250	2,528	3,530	4,787	4,343	3,182	2,948
Agriculture, forestry, and fishery, total	604	611	643	753	805	868	930	993
Agriculture and services	553	558	596	698	759	823	887	942
Forestry	19	21	17	20	25	20	20	19
Fishery	32	32	30	34	21	25	23	33
Nature of business not allocable	206	110	124	193	219	227	161	166

[1] Data for 1938 and 1939 are not available or are omitted on account of poor comparability. However, omitted data are included in totals, where the comparability is affected to a lesser degree.
[2] Data for 1938 and 1939 have been adjusted to improve comparability with 1940 and subsequent years.
[3] For 1938 and 1939 includes "Finance, insurance, real estate, and lessors of real property not allocable," not shown separately.

[1] Excludes returns with fragmentary balance sheet data.
[2] Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts; when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.
[3] Cash in till and deposits in banks.
[4] Less reserve for bad debts. Includes loans and discounts of banks.
[5] Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.
[6] For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."
[7] Beginning 1937, excludes "Surplus reserves."
[8] Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."
[9] Consists of negative amounts for "Earned surplus and undivided profits."

[1] For 1941–42, return is required of every citizen or resident of U. S. who transferred by gift during calendar year to any one donee, property exceeding $4,000 in value or who, regardless of value, made a gift of future interest in property or a gift in trust; for 1943–44, return is required for transfer of property by gift, including gifts in trust, exceeding $3,000, or for gift of future interest in property, regardless of value. A nonresident alien is similarly required to file return if gift consists of property situated in the United States.

[2] There is allowed exclusion of first $4,000 of gifts made to any one donee during any calendar year 1941–42, except gifts in trust or of future interest in property; for 1943–44, there is allowed exclusion of first $3,000 of gifts made to any one donee during calendar year, except gifts of future interest in property.

[3] Specific exemption of $40,000 for 1941–42 or of $30,000 for 1943–44 may be taken in 1 year or spread over a period of years at option of donor. The specific exemption allowed each year is $40,000 (for 1941–42) or $30,000 (for 1943–44) less the sum of amounts claimed and allowed in prior years.

[4] Includes defense tax.

No. 387.—Federal Estate Tax Returns—Summary: 1930 to 1945

[**All money figures in thousands of dollars.** An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (*a*) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds $50,000; (*b*) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds $100,000; (*c*) in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds $40,000; and (*d*) on or after Oct. 22, 1942, the value of whose gross estate exceeds $60,000; and (2) for estate of every nonresident alien who died (*a*) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (*b*) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds $2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

[1] Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940 through Sept. 20, 1941.

[2] Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

[3] Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

[1] See note 2, table 387.

[2] Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 3.)

[3] The specific exemption tabulated (a) for estates subject to additional tax is $60,000 under 1942 act; $40,000 under 1941, 1940, and 1935 acts: $50,000 under 1934 and 1932 acts; and (b) for estates subject to earlier acts is $100,000 under 1926 act; and $50,000 under 1924 and prior acts.

[4] Represents excess of total amount of funeral and administrative expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.

[5] Excess of gross estate over allowable deductions, exclusive of specific exemption.

[6] Net estate after deducting specific exemption of $100,000, except for returns filed under 1924 or prior acts for which specific exemption is $50,000.

[7] Applies only to estates of individuals who died subsequent to June 6, 1932.

[8] Credits for (a) estate, inheritance, legacy, or succession taxes paid to States, etc., and (b) gift taxes paid to the Federal Government.

[9] Less than $500.

[1] Figures for 1800–50 are as of Jan. 1.
[2] Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.
[3] Excludes bonds issued to Pacific railways and Navy pension fund.
[4] Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.
[5] Less than $500,000. [6] Includes old Treasury (war) saving securities for 1920 and 1925.

No. 391.—Net Public and Private Debt: 1916 to 1947

[Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications. Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired. The net debt concept for each of the four sectors can be summarized as follows: Federal Government net debt is that owed to all other sectors of the economy except the Federal Government proper and its corporations and agencies; State and local government net debt is that owed to all other economic entities except State and local governments; corporate net debt is that owed to all other entities (including corporations) except to corporate members of an affiliated system; and private noncorporate net (or gross) debt is summation of all forms of legal indebtedness except that among individuals and unincorporated nonfinancial business firms. Data represent balances of debts outstanding at end of calendar years, except data for State and local governments which are for June 30 of each year]

No. 397.—Interest-Bearing Governmental Securities—Estimated Ownership Outstanding, by Issuer: 1940 to 1948

[Figures represent par values with following exceptions: (1) Holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by U. S. and of State and local governments, Territories, and possessions are book values, (2) holdings of these securities by individuals are residuals, and so deviate from par values in those cases where figures for commercial and mutual savings banks are book values, (3) in the case of data which include U. S. savings bonds, Series A–D, E, and F, figures for these bonds represent current redemption values]

[Par value. In billions of dollars]

[1] Includes partnerships, personal trust accounts.
[2] Includes savings and loan associations, dealers and brokers, and investments of foreign balances in this country.
[3] Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.
[4] Data on daily Treasury statement basis. Since data exclude noninterest bearing debt, they differ slightly from those in table 396. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury and transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in statement published in Daily Treasury Statement for fiscal year.
[5] Less than $50 million. [6] Excludes obligations of the Philippine Islands after June 30, 1946.

No. 398.—Interest-Bearing Securities Issued by All Governmental Units in the United States—Estimated Amounts Outstanding, by Tax Status and Issuer: 1913 to 1948

[1] U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exceptions to par value, see table 397]

[Par value. In millions of dollars]

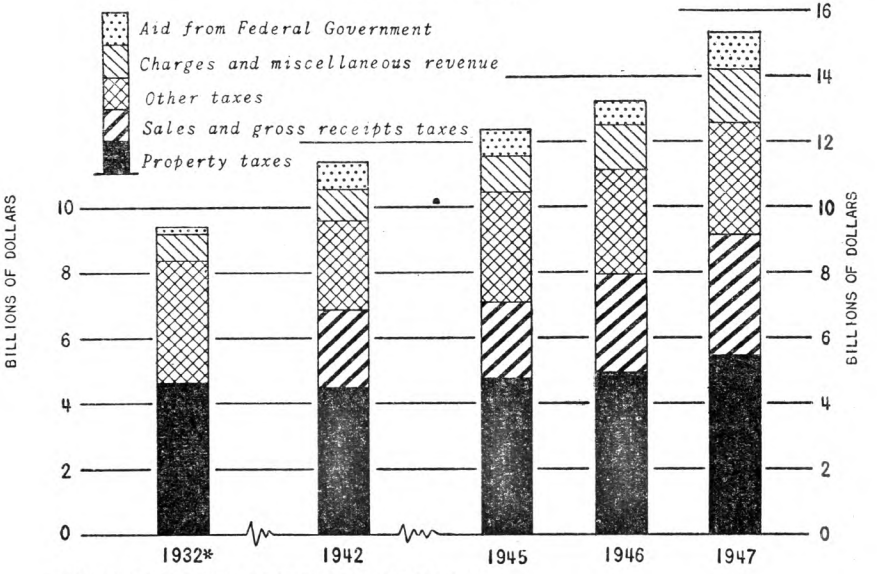
15. State and Local Government Finances and Employment

Sources.—Statistics in this section are from the Bureau of the Census, Department of Commerce. Most of the tables are based upon recent reports in the regular Census series on State Finances, City Finances, Governmental Finances in the United States, and Government Employment. Some of the statistics here are from the most recent decennial Census of Governments, which related to the year 1942 and was designed to obtain and report basic data concerning all governmental units in the United States. A descriptive leaflet, Census Bureau Publications on Governments, is issued annually by the Bureau. Summary series of data based on annual and decennial Census reporting for years up to 1946 are available in the publication, Historical Review of State and Local Government Finances.

Compilation of data.—Financial statistics of States and large cities (those over 250,000 population) which appear in this section were mainly compiled by representatives of the Bureau of the Census directly from official accounts and records of these governments, with the advice and assistance of local officers and employees. Financial data for other local governments were compiled from audits, reports or tabulations available in State offices or obtained from the individual units by mail canvass. State and local employment data were also obtained by mail canvass. The Federal Government amounts which appear in certain tables relating to all levels of government are based upon data supplied to the Census Bureau by other Federal agencies.

Relation to State and local records.—Nation-wide statistics on governmental finances and employment must be compiled and presented in accordance with uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear in this section for particular States and large cities, although based upon their official records and reports, will not agree directly with specific amounts in such original sources except where particular segments of the government's accounts conform explicitly with standard Census reporting categories.

Terminology.—Financial statistics in this section relate primarily to "general government," as distinct from operation of enterprises and the finances of governmental trust and sinking funds. The terms "general revenue," "general expenditure" and "general debt" are applied accordingly. All tax amounts, however, are reported as general revenue; any tax collections deposited directly into trust or sinking funds are therefore included in general revenue and, as contributions to trust funds or provision for debt retirement, respectively, in general expenditure. As reported here, revenue excludes receipts from borrowings, and expenditure includes provision for debt retirement. The Census reports from which the various tables are drawn include detailed definitions of concepts and terminology.



Fiscal years.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governmental units, as summarized in table 402. Federal and State government amounts are for fiscal years ending on June 30 of the year specified, except for 7 States with earlier closing dates—3 in the same calendar year and 4 in the latter part of the preceding calendar year. Local government figures are for fiscal years ending in the specified calendar year except for the few units which close their fiscal years in the succeeding January.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 188–201") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

[1] Includes Federal Government and 48 State governments.
[2] Incorporated places having more than 2,500 inhabitants.
[3] The City and County of San Francisco in California and the City and County of Denver in Colorado are counted as cities and not as counties.
[4] Following counties are counted only as cities because they are wholly or very largely consolidated with cities indicated: Orleans Parish with New Orleans City; Suffolk County with Boston City; Bronx, Kings, New York, Queens, and Richmond Counties, with New York City; Philadelphia County with Philadelphia City.
[5] Counties not organized as local governments.
[6] County areas of Armstrong, Shannon, Todd, Washabaugh, and Washington are unorganized as counties and are attached for administrative purposes to neighboring counties.

[1] Sources: Revenue, U. S. Treasury Department, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942, pp. 25–31; other data, special compilation by Bureau of Accounts, U. S. Treasury Department. Adjustments made in Federal data to conform to Bureau of Census classifications for reporting State and local government finances.

[2] Represents only those school districts classified by Census Bureau as independent units of government. School figures for other local governments are included with figures for those governments.

[3] Each of these Federal-State-local totals and State-and-local totals is less than the sum of amounts shown separately for the several components, because totals exclude duplicating intergovernmental fiscal aid.

[4] Included in "Earnings and miscellaneous."

[5] Omits $94 million for debt retirement reported by U. S. Treasury because payment is only nominally an expenditure and is not a charge against revenue.

[6] Included in "Other" public safety.

[7] Includes $21,111 million for war activities.

[8] Less than $0.5 million.

[9] For cities having populations over 100,000 only. Data for other local governments not available.

[10] Total is less than sum of "State" and "Local" because of exclusion of debts incurred by States for loans to local governments, which duplicate local government obligations held by States.

Source: Department of Commerce, Bureau of the Census; (Federal data) Governmental Finances in the U. S., 1942, and (State and local data) Revised Summary of State and Local Government Finances in 1942. Revisions published in 1948 reports on government finances.

[1] Public debt of the United States Government; includes general treasury obligations incurred on behalf of Federal agencies and excludes Federal agency debt incurred outside of general treasury.
[2] Comprises debt both for general purposes and for government enterprises.
[3] Beginning 1932, total is less than sum of amounts shown in "State" and "Local" columns because of exclusion of State debts incurred for loans to local governments, which duplicate local obligations held by State governments.
[4] Estimates included in total; not shown separately.

No. 409.—Summary of State and Local Government Finances, by State Area and Level of Government: 1942

[State-and-local aggregates of general revenue and general expenditure are less than the sum of "State" and "Local", because they exclude duplicating intergovernmental aid, i. e., that between State and local levels of government. Thus, both national and State-area aggregates for "Aid received" represent aid from only the Federal Government. See also *Historical Statistics*, series P 188–200, for total general revenue and total general expenditure of all State and local governments]

[In thousands of dollars]

No. 410.—General and Enterprise Debt of State and Local Governments: 1947

[In millions of dollars. Data are for ends of fiscal years: (a) closed during 12-month period ending on June 30, 1947, for States, for cities having populations less than 25,000, and for townships, school districts, and special districts; and (b) closed during calendar year 1946 for counties and for cities having populations over 25,000]

PURPOSE AND TERM	Total [1]	State	LOCAL					
			Total	County	City	Township	School district	Special district
TOTAL								
Total gross debt	16,740	2,956	13,814	1,463	8,093	178	1,355	2,725
Long-term debt	16,180	2,872	13,338	1,426	7,965	166	1,294	2,487
Short-term debt	559	84	476	37	128	12	61	238
Sinking-fund assets	2,182	609	1,603	148	1,281	9	76	89
Net long-term debt	13,997	2,263	11,734	1,277	6,684	157	1,218	2,398
GENERAL GOVERNMENT								
Total gross debt	10,737	2,720	8,047	1,448	4,281	157	1,355	806
Long-term debt	10,402	2,641	7,795	1,410	4,153	146	1,294	792
Short-term debt	336	80	252	38	128	11	61	14
Sinking-fund assets	1,408	592	850	148	585	9	76	32
Net long-term debt	8,993	2,048	6,945	1,262	3,568	137	1,218	760
ENTERPRISES								
Total gross debt	6,003	236	5,767	15	3,812	21	----	1,919
Long-term debt	5,779	231	5,543	15	3,812	21	----	1,695
Short-term debt	224	5	224	----	----	----	----	224
Sinking-fund assets	777	17	755	----	695	----	----	59
Net long-term debt	5,002	214	4,788	15	3,117	20	----	1,636

[1] Totals are less than sums of State and local figures because of exclusion of State debts incurred for reloan to local governments, which duplicate local obligations held by State governments, and similar netting out of State sinking-fund assets in equivalent amounts.

[1] New borrowings are for general-government purposes only, consisting of long-term debt incurred during fiscal year other than by funding or refunding, plus any excess of issuance over redemption (i. e., excluding funding) of short-term debt.

[2] Includes direct redemption and payments into sinking funds for retirement of general debt, not debt incurred for enterprise purposes.

[1] Includes amounts for types of taxes not shown separately. [2] Includes unincorporated businesses.
[3] Includes estimated amounts (totaling $11,003,000) for missing or incomplete items.
[4] Combined corporation and individual income tax amounts, as reported by 6 States (Arkansas, Georgia, Missouri, New Mexico, Oklahoma, and South Carolina) are tabulated with reported individual income taxes. Estimates of corporation income taxes in 5 States are deducted from total reported income taxes on individuals and added to those on corporations. No estimate of Missouri taxes was made.
[5] Not entirely complete. Apparently only relatively small amounts are omitted.
[6] Effective July 1, 1947. [7] Back taxes. [8] Contains licenses for same business.
[9] Comprises tax on banks and finance companies, soldiers' bonus excise and additional surtax and excise tax on corporations.
[10] Motor vehicle excise tax. [11] Includes $4,600,000 from first collections of intangible property tax.
[12] On financial institutions only. [13] Not complete. [14] Data not available.

[1] Totals are rounded to include estimates of missing items.
[2] Includes health, public welfare, correction, and other general government functions.
[3] Principally alcoholic-beverage monopoly systems (operated by 16 States); also includes airports, harbors, ferries, and other State-operated enterprises.
[4] Data for State police included with highways.
[5] Data for public safety, except State police, included with other general government.
[6] Nonschool employee and pay-roll data from separate sources; not strictly comparable.
[7] Not available.
[8] Nonschool data for a previous month.
[9] Data for correctional institutions included with hospitals and institutions for handicapped.
[10] Data for public safety, except State police and alcoholic-beverage control, and for natural resources, except agriculture experiment stations and extension services, included with other general government.
[11] Data for public welfare included with unemployment compensation and employment services.
[12] Data for hospitals and institutions for handicapped included with other general government.

[1] Totals are rounded to include estimates of missing items.
[2] Includes health, public welfare, correction, and other general-government functions.
[3] Principally alcoholic-beverage monopoly systems (operated by 16 States); also includes airports, harbors, ferries, and other State-operated enterprises.
[4] Data for State police included with highways.
[5] Data for public safety, except State police, included with other general government.
[6] Not available.
[7] Non-school employee and pay roll data from separate sources; not strictly comparable.
[8] Non-school data are for a previous month.
[9] Data for correctional institutions included with hospitals and institutions for handicapped.
[10] Data for public safety, except State police and alcoholic-beverage control, and for natural resources, except agriculture experiment stations and extension services, included with other general government.
[11] Data for public welfare included with unemployment compensation and employment services.
[12] Data for hospitals and institutions for handicapped included with other general government.

16. Banking and Finance

MONEY AND BANKING

Banking and monetary system.—Collection of banking and monetary statistics in the United States has been conditioned by the development of our banking and monetary system. Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to $5,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—Statistics showing the condition of banks are collected by the various agencies responsible for the supervision of banks. Subdivision of the field among these agencies and the increasing adoption of practically uniform report schedules has made it possible for these agencies to compile the data with little duplication.

The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1864 from these banks from three to six times annually and has tabulated and published summaries of these reports, showing the principal assets and liabilities, that is, total loans, United States Government securities, other securities, reserves, bankers' balances, interbank deposits, other demand deposits, and time deposits. National bank statistics are published in detail in the Abstract of Reports of National Banks (usually three times a year). The call report data are also published in the annual reports of the Comptroller although the detailed breakdown of assets and liabilities is slightly different than in the abstracts.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit to the Federal Reserve banks their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in detail by the Board of Governors of the Federal Reserve System in the Member Bank Call Report (usually three times a year) and in summary form in the Federal Reserve Bulletin. Banking and Monetary Statistics, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which cover all but a small part of the commercial banking in the country. Beginning with June 30, 1947, a revised all-bank series is being tabulated twice a year by the Federal Deposit Insurance Corporation, replacing the three series previously compiled by the three Federal banking supervisory agencies. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based

Digitized for FRASER

Federal Reserve Bank of St. Louis

on the new all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Statistics of the Postal Savings System, which is under the management of the Post Office Department and which performs certain banking functions, are available monthly in the Federal Reserve Bulletin and annually in the Report of Operations of the Postal Savings System.

Currency.—Currency includes coin and paper money issued by the Government and by banks. It represents a relatively small part of the total media of exchange in the United States, for most of it is held in the form of bank deposits and most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official Treasury Circulation Statement) refers to all coin and paper money outside the Treasury and Federal Reserve banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers and not appearing in the official gold and silver export figures. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the Annual Report of the Secretary of the Treasury.

Government credit agencies.—Except for the Federal land banks, Federal intermediate credit banks, and a few other agencies, including the war emergency organizations, most of the credit agencies of the United States Government were created in 1932–34 to meet specific financial problems precipitated by the depression. At the present time, there are over 35 active agencies, including the Reconstruction Finance Corporation, various agricultural lending institutions, insurance agencies, and home mortgage and housing agencies.

Statistics on the principal items of assets and liabilities of Government credit agencies are published quarterly in the Daily Statement of the United States Treasury. Quarterly statements showing the assets and liabilities of Government corporations and sources and uses of funds for these agencies are published in the monthly Treasury Bulletin. Series of yearly, quarterly, and monthly statistics relating to operations of Government credit agencies are available also in the annual and other reports of individual agencies and the annual reports of the Secretary of the Treasury.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Federal Deposit Insurance Corporation and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the Monthly Labor Review. (See tables 476 and 477.) Consumer credit statistics are published currently in the Federal Reserve Bulletin.

SECURITIES MARKETS AND CORPORATIONS

New issues and retirement of securities.—Current statistical information on new issues of securities has been provided for many years by the Journal of Commerce (since 1906), the Commercial and Financial Chronicle (since 1919) (see table 522), and the Standard and Poor's Corporation (since 1924). The statistics of the Commercial and Financial Chronicle, the most detailed and most widely used of these series, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and the issues of foreign governments and their subdivisions. The series is deficient in information on the uses of the proceeds of new issues, showing totals only for refunding and all other purposes.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. (See table 523.) This series is published monthly in the Statistical Bulletin of the Securities and Exchange Commission, the Federal Reserve Bulletin, and the Survey of Current Business.

In addition, the Commission has been compiling statistics since 1933 on the volume of retirements of corporate securities and changes in security holdings of institutional groups and the public by type of issue. It is planned to make these data public in the next year.

Individuals' saving.—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in their assets less the increase in their liabilities, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's Statistical Bulletin. (See table 453.) Revised annual estimates prior to 1940 are currently being prepared together with a write-up of the sources and methods. The Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 455.)

Distribution of family liquid assets and saving by income groups.—The Board of Governors of the Federal Reserve System releases annual data covering the distribution of liquid assets and positive, negative, and net saving of families, by income groups. These estimates are based on the Board's Survey of Consumer Finances, a nation-wide interview survey of private households. The components of liquid assets are checking accounts, savings accounts, and all U. S. Government securities. Currency is excluded. The survey measures saving by obtaining detailed information on changes in the various asset and liability items that make up each family's balance sheet. (See footnote 2 to table 454 for details.)

Trading in securities.—(See tables 510–512.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures, reported in connection with the fees paid under Section 31 of the Securities Exchange Act of 1934, include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily volume of trading in stocks on the New York Stock Exchange and the New York Curb Exchange.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings cross transactions, and errors of omission which ordinarily amount to from five to ten percent of total round-lot sales on the Exchange.

Federal Reserve Bank of St. Louis

Security price averages.—(See tables 514 and 515.) A number of indices of security prices are published regularly. Among the most widely known are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Probably the most comprehensive and detailed are the indices of the Standard and Poor's Corporation available since 1918, which are based on the Wednesday closing price of approximately 400 stocks divided into about 70 industrial groups. Standard and Poor's Corporation also publishes a daily average of 90 stocks. Another stock price index available on a daily basis is the New York Herald Tribune average of 100 stocks.

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, and U. S. Government securities held by individuals and businesses. Separate estimates are shown for financial and nonfinancial corporations, unincorporated businesses, other individuals, and trust fund holdings. The series, published in the Federal Reserve Bulletin, gives semi-annual figures from December 1939 to December 1946 and annual figures thereafter. (See table 521.)

Current assets and liabilities of United States corporations.—The Securities and Exchange Commission publishes a quarterly series on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and current liabilities. (See table 520.)

Abbreviated balance sheet as well as income account data for all United States corporations are available in Statistics of Income, Part 2, an annual report of the Bureau of Internal Revenue (see tables 375–385, pp. 345–376). The Securities and Exchange Commission quarterly estimates, based on sample data, supply this information currently whereas about three years elapse before the final data are available from Statistics of Income.

Among other reports of the Securities and Exchange Commission are the quarterly series on Plant and Equipment Expenditures of United States Business, prepared jointly with the Department of Commerce; Industrial Financial Reports, prepared jointly with the Federal Trade Commission; the Survey of American Listed Corporations; and an annual series, Resources and Liabilities of Brokers and Dealers, started in 1946.

INSURANCE

Insurance statistics.—There are no complete statistics of insurance for the United States as a whole. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers gather the only statistics approaching comprehensiveness. This situation arises primarily from the fact that the regulation of insurance and the collection of primary information on insurance are in the hands of the various States, Territories, and the District of Columbia. While insurance is now largely subject to Federal regulation, the Federal Government has not exercised its power nor has it taken any steps to collect comprehensive statistics of insurance on a national basis. Basic theory and practice are parallel throughout insurance, but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling in one of these three classes, though there is now a tendency in the direction of permitting insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses con-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

nected with transportation. *Fire insurance,* as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Security.) Casualty insurers also write several unrelated kinds of insurance, including fidelity and surety bonds.

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance either as exclusive insurers or in competition with private insurers; *savings banks* write life insurance in three States.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics,* series N 172–178") provide cross-references, where applicable, to Historical Statistics of the United States, 1789–1945. In that historical supplement to the Statistical Abstract, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the Abstract for specific titles of series and the earliest year shown in the supplement.

[1] Under orders of Secretary of Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to Treasurer of U. S., and under Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. Gold coin ($287,000,000) shown on Treasury records as then outstanding was dropped from statement as of Jan. 31, 1934.

[1] Totals involve duplication to extent that United States notes, Federal Reserve notes, Federal Reserve Bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

[2] By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. Hence, value of gold based on $35 per fine ounce beginning June 1934; theretofore, based on $20.67 per fine ounce.

[3] Includes fractional paper currency in circulation prior to 1878.

[4] Silver bullion in Treasury.

[5] Includes silver bullion as follows: As of June 30: 1934, $1,560,000; 1935, $313,309,000; 1936, $708,211,000; 1937, $835,196,000; 1938, $1,037,163,000; 1939, $1,230,586,000; 1940, $1,353,162,000; 1941, $1,435,909,000; 1942, $1,505,844,000; 1943, $1,519,746,000; 1944, $1,520,134,000; 1945, $1,520,295,000; 1946, $1,909,099,000; 1947, $1,923,913,000; 1948, $1,955,072,000. As of Dec. 31: 1947, $1,937,618,000; 1948, $1,971,493,000.

No. 433.—Money in Circulation, Money Held in Treasury and in Federal Reserve System, and Total Stock: 1800 to 1948

[All figures except per capita in thousands of dollars. In conformity with revisions in form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in holdings of Federal Reserve Banks and agents, and, hence, in stock of money, gold bullion and foreign gold coin held by Federal Reserve Banks and agents. Figures were also revised to include in holdings of Federal Reserve Banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as reserve against Federal Reserve notes or otherwise. See also headnote, table 432. Per capita figures for 1800–40 based on Bureau of Census population figures for continental U. S. on census dates. Per capita figures for 1850–1948 revised in accordance with Bureau of Census estimated population for continental U. S. as of July 1 and Dec. 31. See also *Historical Statistics*, series N 148–151]

[1] Gold and silver certificates and Treasury notes of 1890 excluded before combining money outside Treasury with money in Treasury in order to avoid duplication, since gold and silver held in Treasury as security against these currencies are included. See also notes 1 and 2, table 432.

[2] Both items include also reserve against Treasury notes of 1890.

[3] See note 1, table 431.

[4] Includes total stock of silver dollars and subsidiary silver.

[5] Gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column "In trust against gold and silver certificates."

Federal Reserve Bank of St. Louis

No. 434.—All Active Banks—Principal Assets and Liabilities, by Class of Banks: 1840 to 1947

[Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942–44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1890; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 19–34, and series N 43–48]

[1] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.
[2] Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.
[3] Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.
[4] Reciprocal interbank demand balances with banks in the U. S. are reported net, beginning 1942.
[5] Beginning 1934, includes capital notes and debentures for banks other than national.
[6] Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.
[7] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.
[8] Capital only.
[9] Figures for State banks, except number of banks and capital, estimated.
[10] Includes capital only for banks other than national.
[11] U. S. Government securities only.
[12] Includes State bank circulation outstanding.
[13] Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.
[14] Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).

[1] Both direct and guaranteed obligations.

[2] Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to $62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which then aggregated $600,000,000.

[3] Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

[4] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

[5] Postal savings of State member banks included in time deposits.

[6] Central reserve city banks only.

[1] For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933 table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

[2] Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

[3] 1 percent on advances secured by Government obligations.

[4] ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

[5] Advances secured to satisfaction of Federal Reserve Bank.

[6] Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

[7] Separate rate to banks eliminated.

No. 450.—Savings Banks—Number of Depositors and Amount of Savings Deposits, Continental United States: 1820 to 1910

[Data for later years as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 451. See also *Historical Statistics*, series N 107–108]

[Depositors in thousands, deposits in millions of dollars]

YEAR	Depositors	Savings deposits	YEAR	Depositors	Savings deposits	YEAR	Depositors	Savings deposits
1820	9	1.1	1890	4,259	1,524.8	1901	5,612	2,260.3

[1] Includes deposits evidenced by savings passbooks, time certificates of deposit payable in 30 days or overtime deposits, open account, postal savings redeposited in banks, and, for some States, Christmas savings and similar accounts.

[2] Includes State, stock savings, and private banks and trust companies.

[3] Combined data for other than national banks included in total.

[4] For data for 1910 and earlier years from reports of the Comptroller of Currency, see table 450.

[5] Not available.

[6] Figures include depositors for State-chartered banks in States which did not previously report depositors as follows (figures in parentheses are the number of depositors for the first year the given States reported): Beginning 1928, Ohio and Idaho (2,376,000 depositors); beginning 1931, Missouri (623,000 depositors); beginning 1932, Colorado (50,000 depositors); and beginning 1934, Indiana (286,000 depositors).

[7] Represents the number of savings passbook accounts.

Other durable consumers' goods [7]	+9.7	+6.8	+6.5	+6.9	+8.3	+16.2	+21.0	+22.7

[1] Does not include net purchases by brokers and dealers or other individuals financed by bank loans.
[2] Includes Armed Forces Leave bonds.
[3] Less than $50 million.
[4] Mortgage debt to institutions on one-to-four family nonfarm dwellings.
[5] Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, viz., saving in savings and loan associations, insurance and securities.
[6] Construction of one-to-four family nonfarm dwellings less net acquisition of properties by nonindividuals. Also includes small amount of construction by nonprofit institutions.
[7] Consumer expenditures on durable goods as estimated by Department of Commerce.

Source: Securities and Exchange Commission; data are published quarterly in a special release and in the Statistical Bulletin.

No. 454.—Percent Distribution of Family Liquid Assets and Saving, by Income Groups: 1947

[National estimate based on sample interview survey of 3,162 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1948. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps]

ANNUAL 1947 MONEY INCOME BEFORE TAXES	Liquid assets [1]	Positive saving [2]	Negative saving [2]	Net saving [2]
All income groups	100	100	100	100
Under $1,000	5	1	22	−15
$1,000–$1,999	8	4	10	−2
$2,000–$2,999	9	8	13	5
$3,000–$3,999	10	11	15	8
$4,000–$4,999	9	11	13	9
$5,000–$7,499	19	20	11	27
$7,500 and over	40	45	16	68

[1] Liquid assets include all U. S. Government securities, checking accounts, and savings accounts held at time of survey in early 1948. Currency is excluded.
[2] Positive saving comprises the saving of all family units with money incomes in excess of expenditures, negative saving comprises the dissaving of all family units with expenditures in excess of money incomes, and net saving (plus or minus) is positive saving less negative saving for all family units combined. The survey does not undertake to measure directly consumer expenditures and taxes but measures the saving of each family by obtaining detailed information on the changes in the various asset and liability items that make up each unit's balance sheet of saving. The saving of each unit during the year is computed by subtracting algebraically the total change in its liabilities (plus or minus) from the total change in its assets (plus or minus). Positive saving results from a larger increase in assets than in liabilities or a larger decrease in liabilities than in assets. The reverse is true for negative saving. The more important asset and liability items for which information is obtained are changes in liquid asset holdings, changes in consumer indebtedness, net sales or purchases of stocks and bonds, payments of life insurance premiums, payments to retirement funds, net sales and purchases of houses, payments on house mortgages, house improvements, and investment or withdrawal of investment in unincorporated businesses. Capital gains or losses are excluded from saving.

[1] Federal deposit insurance became operative Jan. 1, 1934.

[2] Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of $1,942,574,000, and 225 State member banks with deposits of $925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of $1,818,541,000, 152 unlicensed State member banks with deposits of $842,982,000, and 2,938 unlicensed nonmember banks with deposits of $1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 985 unlicensed national banks with deposits of $1,028,347,000, 114 State member banks with deposits of $239,268,000, and 1,983 nonmember banks with deposits of $1,063,984,000 to be rehabilitated and reopened or to be placed in liquidation of receivership. All such banks are treated as suspensions.

[1] In general, difference between total number of associations and number reporting accounted for by associations chartered but not in operation by end of year and associations in liquidation which had not relinquished their charters.

[2] Data are for years ending June 30.

[3] Federal associations only; no State-chartered credit unions in this State.

[4] Data are for years ending September 30.

[1] Exclusive of interbank loans.
[2] Until 1948, carried at amortized cost or par, whichever was lower; beginning 1948, carried at par less unamortized discount, plus unamortized premium.
[3] Adjusted for debentures held by banks of issue and by other Federal intermediate credit banks.
[4] Total is less than sum of figures for individual banks because of interbank transactions.

No. 494.—Federal Intermediate Credit Banks—Loans and Discounts Made, by Type of Institution: 1940 to 1948

[In thousands of dollars]

Year and bank	Total	Loans to and discounts for financing institutions			Discounts for banks for cooperatives	Direct loans to cooperative associations

No. 497.—Bank Clearings for Leading Cities: 1931 to 1948

[**In millions of dollars.** Cities listed in order of importance according to clearings in 1948. No figures given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 498) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1882 to 1920, and for figures for 146 identical cities, 1920 to 1936, see table 293, Statistical Abstract, 1937. See also *Historical Statistics*, series N 86-89]

[1] This series, together with New York City, constitutes national series for which bank debits figures available beginning with 1919.

[2] Annual figures for 1928 to 1935 include from 121 to 131 centers and for 1936 to 1941 and 1942 (old series) include 133 centers. Figures for 1942 (new series) to November 1947 include 193 centers, and thereafter 192 centers, one city having been dropped when the reporting bank was absorbed by a reporting bank in another city.

[3] No figures available for March.

No. 505.—Fire Losses, Total and Per Capita, Continental United States: 1876 to 1947

[Amounts, except per capita, in thousands of dollars. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses]

YEARLY AVERAGE OR YEAR	LOSS		YEAR	LOSS		YEAR	LOSS		
	Amount	Index [1] 1926=100		Amount	Index [1] 1926=100		Amount	Index [1] 1926=100	Per [2] capita
