Frank R. Wilson, *Information Assistant to the Director*

ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* has been published annually for the past 71 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date. The present volume was prepared in the office of Morris H. Hansen, Assistant Director for Statistical Standards. The compilation was under the supervision of Morris B. Ullman, Chief, Statistical Reports Section, and was the immediate charge of Bruce L. Jenkinson, Chief, Statistical Abstract Unit, assisted by William Lerner. Kathleen H. Dugan is editor and Elma D. Beynon is editorial supervisor.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pages XII–XV), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the *Statitical Abstract.*

AUGUST 1950.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1950.* (Seventy-first edition.) Washington, D. C., 1950.

PREFACE

Use of the Statistical Abstract.—The *Statistical Abstract of the United States* presents in a single annual volume important summary statistics on the industrial, social, political, and economic organization of the United States, and includes a representative selection from most of the important statistical publications. It is, of necessity, limited primarily to national data and to limited summaries by States. It does not attempt to present the great wealth of local data available from many sources.

This book is designed to serve a twofold purpose: *First*, to serve as a convenient reference volume for quantitative summary information; and *second*, to serve as a guide to various important sources of statistical data. If the user finds that the information given here on a particular subject is not sufficiently detailed for his purpose, it is suggested that he refer to the publication or the agency from which the statistics were obtained for publication in the *Statistical Abstract*. The source of each table is given at the foot of the table. The original source usually contains additional statistical detail, and a more complete discussion of the definitions and concepts involved, than can be presented in the *Statistical Abstract;* also, it may supply data for small areas. Further, the agencies initially responsible for the statistics occasionally can supply still more detailed information on the basis of their unpublished tabulations or records.

1950 edition.—This edition, the 71st annual issue of the *Statistical Abstract of the United States*, is designated by the year of publication. The statistics shown are the latest available in the early part of the calendar year. The time periods or dates covered by the information in the tables vary according to the practices followed by the various agencies responsible for their preparation.

This edition includes 1,064 tables in comparison with 1,102 tables in the previous edition. This reduction is the net result of an intensive review of a number of sections. New subject material has been introduced and data eliminated that were less timely or presented greater detail than seemed warranted in a summary publication.

A new section entitled "Business Enterprise" is intended to depict in general the place and the behavior of the business firm and business initiative in the American economy. Data are brought together on business population, on corporate assets and liabilities, on certain types of business income and expenditure, and on patents and copyrights. Most of these comprise materials transferred from other sections of the *Abstract*. Thus, the Bureau of Internal Revenue data on corporation assets and liabilities and corporation profits and dividends are from the section on Federal Government Finances; the Dun and Bradstreet data on industrial and commercial failures and the Federal Reserve Board data on profits and dividends of public utility and industrial corporations are from the Banking and Finance section; the data on patents and copyrights are from the Manufactures section. The other material in this new section is largely of more recent origin, both as to presence within the *Abstract* (data on business population appeared in the 1948 and 1949 editions) and as to appearance in original publications of other agencies.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Other significant changes in this edition include the addition to Section 5, Law Enforcement and Federal Courts (formerly Crime and Criminals), of several tables on Federal courts, stressing their civil activities; the addition of tables on output per man-hour and labor union membership to Section 8, Labor Force, Employment, and Earnings; the inclusion of a table on the "Nation's Economic Budget" from the Council of Economic Advisers in Section 11, Income and Expenditures; the addition of tables on activities of the Soil Conservation Service and the Commodity Credit Corporation; and other additions too numerous to mention.

Integration with historical supplement.—The completion of *Historical Statistics of the United States, 1789–1945* in July 1949 (See p. V) made possible a revision of the annual *Abstract* which was started in the 1949 issue on an experimental basis and continued in this edition. In general, each section of the annual *Statistical Abstract* will be reviewed intensively to bring about an increased emphasis on statistics of current interest and, at the same time, to reduce the amount of historical detail presented.

Sections of the annual volume which have now been revised by comparison with the historical supplement are as follows: 1–3, 7, 8, 11–16, 18–20, and 29 (see Contents, p. VII for section titles). The type and extent of revision varies considerably, section to section.

In all sections containing related data, cross references to the historical supplement have been included in the tabular headnotes. Finally, the historical appendix (see Appendix I, tables A and B) first introduced in the 1949 edition has been continued and brings to date the statistical series shown to 1945 in *Historical Statistics*. This appendix has been arranged to serve a twofold purpose. The user of the annual *Statistical Abstract* will find there the earliest date to which the given statistics are carried in the historical supplement. The user of the supplement will find each series brought to date, where possible, and the table number in the current *Statistical Abstract* in which the same or related data may be found. Where figures for 1945 and earlier years are known to have been revised from those shown in the supplement, the revisions have been listed in Appendix I, table B. No attempt has been made to list specific sources of data in Appendix I because of the space problem. In general, the source agencies are the same as for the same series specified in the supplement or noted at the bottom of the current *Statistical Abstract* table.

With respect to the data contained by Appendix I in this edition, the very serious problem of space has placed limitations on the amount of data which should be shown in order to achieve completely the objectives mentioned above. In order to make room for figures for the current year, 1949 (see Appendix I, table A), it was necessary to omit the column for 1946 which appeared in the 1949 edition. It was further necessary to limit the presentation of the revisions of figures (see Appendix I, table B) only to those which have occurred or been brought officially to the attention of the *Abstract* staff during the current year; revisions shown in the 1949 *Abstract* have not been repeated in this issue. Hence, in order to bring *Historical Statistics* to date, reference is necessary to both the 1949 and the 1950 issues of the *Statistical Abstract*.

Supplements to the Abstract.—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the *Abstract* has been initiated.

Federal Reserve Bank of St. Louis

The *County and City Data Book, 1949*, now in press, represents both a revision (bringing to date) and a consolidation of two earlier supplements, the *County Data Book*, issued 1947, and the *Cities Supplement*, issued 1944. The *County and City Data Book, 1949*, brings together 101 items of information for each State, each county, and each standard metropolitan area and 92 items for each of about 400 cities having 25,000 or more inhabitants in 1940. Broad subject fields covered include the 1948 Census of Business, 1947 Census of Manufactures, 1945 Census of Agriculture, 1948 vital statistics, 1949 bank deposits, 1948 city government employment and finances and other items of economic and social importance. This volume will be on sale by the Superintendent of Documents, Washington 25, D. C.

Historical Statistics of the United States, a third supplement, was published in July 1949. This volume brings together 3,000 statistical series which extend back through time. Data are shown for each year back to 1789 or to the earliest data available for the series. In the preparation of this supplement the Bureau had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Washington 25, D. C. for $2.50. These statistics are brought to date each year in the appendix of the annual *Statistical Abstract*, beginning with the 1949 edition.

Responsibility.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages XII–XV.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material for the general user and for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given unselfishly of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of the users must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

SUGGESTIONS AND COMMENTS

should be sent to

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1949. A compact presentation of 101 items of statistical data for each county and standard metropolitan area in the United States and 92 items of statistical data for each of about 400 cities having 25,000 inhabitants or more in 1940. Washington, D. C., 1950. About 500 pages. (In press.) Represents both a revision and a consolidation of two earlier small-area supplements, the *County Data Book* issued in 1947, and the *Cities Supplement—Statistical Abstract of the United States* issued in 1944.

Historical Statistics of the United States, 1789–1945. A supplement to the *Statistical Abstract,* prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Third printing. Price $2.50 (Buckram).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

CONTENTS

Section Page

TABLES BY SOURCE XII

1. AREA AND POPULATION 1

Area—Number and geographic distribution of inhabitants—Annual and future estimates—Urban and rural population—Sex—Race—Age—Nativity and parentage—Mother tongue—Citizenship—Internal migration—Marital status—Households—Fertility—Institutional population—Population characteristics in the Territories and possessions—Religious bodies.

2. VITAL STATISTICS, HEALTH, AND NUTRITION 60

Registration area—Births—Completeness of birth registration—Deaths—Life table values—Morbidity—Hospitals—Phsyicians and dentists—Medical and dental schools—Mental patients under institutional care—Marriage and divorce—Nutrition—Federal food distribution programs.

3. IMMIGRATION, EMIGRATION, AND NATURALIZATION 94

Immigration—Emigration—Immigration quotas—Movement and characteristics of aliens—Arrivals and departures, aliens and citizens—Displaced persons and war brides—Naturalization.

4. EDUCATION 107

School attendance—Years of school completed—Illiteracy—Elementary and secondary schools—Institutions of higher education—Special schools—Vocational schools—Public libraries.

5. LAW ENFORCEMENT AND FEDERAL COURTS 134

Crime rates—Arrests—Federal courts—Prisoners in State and Federal prisons.

6. CLIMATE 148

Elevation of stations—Temperature—Precipitation—Snowfall—Sunshine—Wind velocity—Relative humidity—Degree days.

7. PUBLIC LANDS AND NATIONAL PARK SYSTEM 161

Lands in Federal ownership—Public and Indian land—Land grants—National Park System—Visitors to National Parks—Lands under jurisdiction of Office of Indian Affairs.

8. LABOR FORCE, EMPLOYMENT, AND EARNINGS 170

Employment status—Persons not in the labor force—Industry—Government employment—Injuries to Federal Government employees—Occupation—Farm employment and wage rates—Production workers—Average hours and earnings—Output per man-hour—Labor turn-over—Industrial injuries—Labor union membership—Work stoppages.

Section Page

9. MILITARY SERVICES AND VETERANS' AFFAIRS 210

Army—Air Force—Navy—Marine Corps—Airplanes—Ships—Veterans' Administration including Government insurance—Red Cross.

10. SOCIAL SECURITY AND RELATED PROGRAMS 220

Public expenditures for social security and related purposes—Public assistance and Federal Work Programs—Old-age and survivors insurance—Unemployment insurance—Placements by public employment offices—Railroad retirement—Railroad unemployment and sickness benefits—Workmen's compensation payments—Maternal and child health and welfare services—Vocational rehabilitation—Government employee retirement systems.

11. INCOME AND EXPENDITURES 258

The Nation's economic budget—Gross national product or expenditure—National income—Income payments to individuals—Distribution of families by income levels and savings—Family income, expenditures, and saving.

12. PRICES 276

Wholesale prices—Retail prices—Indexes of consumers' prices—Electric energy bills and gas bills of residential consumers—Unit values of commodities exported and imported.

13. ELECTIONS 297

Electoral and popular vote for President—Votes for U. S. Senators and Representatives—Apportionment of congressional representation—Congressional activity and party affiliations.

14. FEDERAL GOVERNMENT FINANCES 304

Receipts and expenditures—Appropriations—Internal revenue collections—Individual and corporation income tax returns—Public and private debt—Government securities—Assets and liabilities of Government corporations and credit agencies.

15. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT 347

Governmental units—General revenues and general expenditures—Public-service enterprises—State tax collections—State unemployment-compensation funds—Debt—Employees and pay rolls—Finances of retirement systems.

16. BANKING AND FINANCE 376

Currency and gold—Bank clearings—Banks; principal assets, liabilities and other information for all banks, Federal Reserve banks, National banks, savings banks, mutual savings banks—Savings—Liquid assets—Savings and loan associations—Credit unions—Government corporations and credit agencies—Farm credit—Consumer credit—Commodity and stock exchanges—Money rates—Securities markets—Insurance.

17. BUSINESS ENTERPRISE 434

Business population and turn-over—Corporate assets and liabilities—Corporation income, profits, dividends, and taxes—Sources and uses of corporate funds—Income of unincorporated enterprise—Business expenditures for new plant and equipment—Business sales and inventories—Industrial and commercial failures—Patents—Registration of copyrights.

18. COMMUNICATIONS 453

Telephone systems—Telegraph systems—Holding companies—Radio and television networks and broadcast stations—Newspapers, periodicals and books—Postal service.

19. POWER 468

Supply of energy—Electric energy; capacity of generating plants and production—Financial and operating statistics of electric utility companies—Rural electrification—Income account of natural gas companies—Gas utility industry—Water power.

20. PUBLIC ROADS AND MOTOR VEHICLES 481

Rural roads—State highway systems—Federal highway projects—Public roads finances—Motor-vehicle production—Motor-vehicle travel—State motor-vehicle registrations and revenues—Motor fuel consumption—Motor-vehicle accident fatalities.

21. TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTORBUSSES, AND CIVIL AERONAUTICS 493

Steam railways: Mileage; equipment; employees; receiverships; capitalization, investment, income, dividends, revenue, expenses; freight and passenger service; accidents—Electric railways—Express companies—Pullman company—Motor carriers of property and passengers—Motorbus lines—Aircraft production—Civil aeronautics.

22. WATERWAYS, WATER TRAFFIC, AND SHIPPING 524

Water-borne commerce, foreign and domestic—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Merchant marine—Panama Canal traffic—Net tonnage of vessels entered and cleared in foreign trade.

23. IRRIGATION, DRAINAGE, AND SOIL CONSERVATION 548

Irrigation enterprises—Irrigation of agricultural lands—Federal reclamation projects—Drainage on farms—Drainage enterprises—Soil conservation.

24. AGRICULTURE—GENERAL STATISTICS 559

Balance sheet of agriculture—Number and acreage of farms—Land utilization—Land transfers—Value of farm property—Value of farm products—Type of farm—Color and tenure of farm operators—Farm mortgage status and indebtedness—Indexes of farm prices—Farm income and expenditures—Commodity Credit Corporation, inventories and acquisitions—Farm facilities, roads, etc.—Farmers' marketing and purchasing associations—Farms and farm property in Territories and possessions.

25. AGRICULTURE—PRODUCTION AND RELATED SUBJECTS 600

Indexes of volume of farm production—Agricultural products exported and imported—Acreage, production, and value of crops—Average prices of crops and livestock—Acreage losses—Grain—Hay—Tobacco—Sugar—Cotton—Cottonseed and products—Vegetables—Fruits—Animal and vegetable fats and oils—Foreign trade in foodstuffs and silk—Domestic animals and chickens on farms—Livestock or livestock production—Stockyard receipts and shipments—Meats, lard, and animal products—Dairy products—Oleomargarine—Poultry—Eggs—Cold storage holdings—Wool—Farm animals and farm crops in Territories and possessions.

26. FORESTS AND FOREST PRODUCTS 650

Commercial forest land—Stand and growth of saw timber—Annual drain—National forests—Forest fires—Forest trees planted on farm lands—Lumber and lumber products.

27. FISHERIES 679

Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products—Fish propagation.

28. MINING AND MINERAL PRODUCTS 687

Mineral industries—Mineral products—Ferrous and nonferrous metals—Coke—Coal—Work stoppages in coal mining industries—Natural gas and natural gasoline—Crude and refined petroleum—Oil wells—Asphalt and gypsum—Cement—Stone—Salt—Employment and injuries in mineral industries.

29. CONSTRUCTION AND HOUSING 718

Expenditures for private and public construction—Construction contracts—Construction industry—Construction and building costs—Materials consumption—Public housing—Characteristics and occupants of dwelling units—Rents and values—Facilities and equipment—Persons per room—Nonfarm mortgaged properties.

30. MANUFACTURES 751

Manufacturing establishments—Wage earners and production—Indexes of industrial production—Power requirements—Expenditures for plant and equipment—Inventories—Production and related information on selected products and groups of products—Printing and publishing—Motion picture industry—Manufactures in Alaska, Hawaii, and Puerto Rico.

31. FOREIGN COMMERCE (INCLUDING INTERNATIONAL TRANSACTIONS) 827

International transactions—Foreign grants and credits—Foreign assistance—Foreign trade—Gold and silver—In-transit and transshipment trade—Duties collected.

32. COMMERCE OF TERRITORIES AND POSSESSIONS 871

Alaska—Puerto Rico—Hawaii—American Samoa—Virgin Islands—Guam.

1. Area and Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years beginning with 1790. The data shown here were selected chiefly from the Sixteenth Census (1940), and from special census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included. It should be noted that all State tables (tables 41–57) have been assembled near the end of the section.

Related materials are presented in other sections of this volume. Data on household composition are included in this section, but statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Earnings. Data on the population in institutions as enumerated in 1940 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Crime and Criminals. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

Population samples.—The use of sampling methods in the Sixteenth Census permitted the collection of statistics on a larger number of inquiries than has heretofore been possible, the release of preliminary population statistics at an early date, and the tabulation of a great many social and economic characteristics of the population at a relatively low cost.

Certain tables in this section and in the related sections mentioned above are based on tabulations of samples of the population. Several samples were drawn and the figures shown were obtained by multiplying the sample results by a factor dependent on the sample size in each case. Sample B is a sample of all individuals from the 1940 Population Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively; Sample D, a sample of households from the 1940 Population Schedule; and Sample F, a sample of households based for some subjects on 1940 Population Schedule entries, and for other subjects on 1940 Housing Schedule entries. For Sample B, the sample size is 5 percent. Samples C, D, and F are 5 percent in most areas, but they include 2½ percent samples in the most populous areas. Sample W is an 8-percent sample for the North and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Specifically, any number of the size of a million or over may be assumed to agree with a complete count within 1½ percent, though most numbers of this size will agree within ¾ of 1 percent. Any number of the size of 100,000 may be assumed to agree with a complete count within 4 percent, though most numbers of this size will agree within 2 percent. Most numbers as small as 10,000 will agree within 10 percent. The sampling errors in subtotals formed by addition of classes are covered by the same statements. More detailed statements regarding the sampling errors are given in the original sources.

Federal Reserve Bank of St. Louis

For years since 1940, several of the tables present statistics that are based on the Current Population Survey, conducted monthly by the Bureau of the Census. This survey covers a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 183.

Population estimates.—Population estimates for dates after April 1940, which are not the result of sample surveys, are based on data from the 1940 census; statistics of births and deaths provided by the National Office of Vital Statistics, United States Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the strength and distribution of the armed forces provided by the National Military Establishment. Postcensal estimates of State population are based on the same fundamental series of data and in addition make use of school statistics for both public and private schools, in connection with accounting for interstate migration.

Urban and rural areas.—In the course of its history the Census has employed several definitions of urban population. The definition was adopted in substantially its present form at the time of the 1910 census and was slightly modified at later censuses. In this edition, the urban-rural classification for all years is in accordance with the 1940 definition, as follows:

> The *urban area* is made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it includes unincorporated political subdivisions with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in the States of Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town.
>
> The remainder of the population is classified as *rural* and is subdivided into the *rural-farm population*, which comprises all rural residents living on farms, without regard to occupation, and the *rural-nonfarm population*, which comprises the remaining rural population.

For the years after 1940, the urban-rural population figures reflect the classification of areas as urban and rural in 1940. Thus, the urban total for 1949 represents the population living, in 1949, in areas which were classified as urban in 1940; it does not represent the total which would have been classified as urban in 1949 if all areas had then been reclassified as urban or rural on the basis of their 1949 population.

Households.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers, servants, or hired hands, if any, who regularly live in the house. The number of "households," thus defined, is the same as the number of "private households" or "families" as the latter two terms were used in the 1940 census reports. A person living alone or a group of unrelated persons sharing the same living accommodations as partners is counted as a household.

The term "household," as used here, excludes the small number (about 80,000 in 1940) of institutions, hotels, large lodging houses, and other quasi households which are included as households in the census reports (and in figures shown in this edition) for 1920, 1910, 1890, and earlier years. The figures for 1900 and for 1930 and subsequent years, shown in this edition, are in conformance with the present usage of the term "household" as defined above.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 censuses. A primary family consists of the head of a household and all (one or more) other persons in the household

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

related to the head. A secondary family comprises two or more persons, such as lodgers or servants and their relatives, living in a household and related to each other but not related to the household head. A family in a quasi household is a group of two or more related persons living together in a quasi household (other than the negligible number of such groups among inmates of institutions).

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is a husband and his wife living together.

Individuals not in families.—The term "individuals not in families," as used here, refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to the head. A secondary individual is a person in a household, such as a lodger or servant, who is not related to the head or to any other person in the household. An individual in a quasi household is a person, such as a guest in a transient hotel, a roomer in a large lodging house, or a resident employee (but not an inmate) of an institution, who is living in a quasi household apart from any relatives.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 24–25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 1.—Territorial Expansion of Continental United States and Acquisitions of Territories and Possessions

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Adjustments have been made in the areas as remeasured in 1940. See also *Historical Statistics*, series B 24-25]

ACCESSION	Date	Gross area (land and water) sq. mi.	ACCESSION	Date	Gross area (land and water) sq. mi.
Total (excludes P. I.)		**3,619,644**	Territories and possessions [2]		597,257
Continental United States		3,022,387	Alaska	1867	586,400
Territory in 1790 [1]		888,811	Hawaii [3]	1898	6,454

No. 7.—Estimated Population on July 1, for Continental United States, 1920 to 1949, for Hawaii and Puerto Rico, 1920 to 1948, and for Alaska, 1920 to 1939

[Estimates for continental United States, all years, for Hawaii, 1930 to 1948, and for Puerto Rico, 1940 to 1948, based on statistics of births, deaths, immigration, emigration, and armed forces. Estimates for Alaska and Puerto Rico, 1920 to 1939, and for Hawaii, 1920 to 1929, based on interpolation of census figures. Figures for each area include armed forces stationed in area but exclude residents serving elsewhere in armed forces. All estimates subject to revision after 1950 census. See also table 10 and *Historical Statistics*, series B 5–10]

No. 8.—Enumerated Population, 1940, and Projections, 1951 to 1960, by Age and Sex

[Figures supersede medium projections for same dates published in *Forecasts of the Population of the United States, 1945–1975* (G. P. O., 1947), but are approximately consistent with medium projections for later dates given in that report for all age groups comprising persons born before July 1, 1945. Projections given here are based on evidence of actual population changes through July 1, 1947, and assume medium mortality, 1½ million net immigration between 1947 and 1960, and somewhat higher fertility during this period than had been assumed in preparing superseded projections. Estimates subject to revision after 1950 census.]

No. 14.—Median Age of Urban and Rural Population, by Race and Sex: 1930 and 1940

[Definition of Median.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2. See also *Historical Statistics*, series B 72-80]

[1] Less than one-tenth of 1 percent.
[2] Listed as Holland prior to 1910.
[3] Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.
[4] Turkey in Asia included with Turkey in Europe prior to 1910.
[5] Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1918.
[6] Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."
[7] Newfoundland included with Canada in 1900.

No. 22.—Migration Status of the Population and Type of Migration, by Sex, for Selected Periods: 1935 to 1949

[Migrants defined: In 1940—Persons 5 years old and over who lived in different counties (or quasi counties) in 1940 and 1935. A city of 100,000 inhabitants or more is treated as one quasi county and remainder of county as another. In 1947—Persons who lived in different counties in 1947 and 1940. For children under 7 years of age, residence of mother when child was born was used in determining migration status. In 1948—Persons who lived in different counties in 1948 and 1947. For children under 1 year of age residence of mother when child was born was used in determining migration status. In 1949—Persons who lived in different counties in 1949 and 1948. The residence of children under one year of age was not obtained. 1947, 1948, and 1949 figures based on Current Population Survey, see Sampling Note, p. 183]

No. 23.—Migration Status of the Civilian Population Born on or Before April 1, 1940, and Type of Migration, by Social and Economic Characteristics: 1947

[In thousands. See headnote, table 22]

Characteristic	Total civilian population, April 1947	Non-migrants	Migrants by type of migration					Persons abroad on April 1, 1940
			Total	Percent of total population	Within a State	Between contiguous States	Between noncontiguous States	
RELATIONSHIP TO HEAD OF HOUSEHOLD								
Total, 7 years and over	**122,633**	**96,565**	**25,469**	**20.8**	**13,081**	**4,974**	**7,414**	**599**
In households	119,762	94,982	24,257	20.3	12,375	4,784	7,098	523
Head of household	38,980	31,354	7,471	19.2	3,775	1,497	2,199	155
Relative of head	76,408	61,173	14,923	19.5	7,769	2,901	4,253	312
Nonrelative of head	4,374	2,455	1,863	42.6	831	386	646	56
Not in households	2,871	1,583	1,212	42.2	706	190	316	76
YEARS OF SCHOOL COMPLETED								
Total, 25 to 34 years old	**22,627**	**15,724**	**6,693**	**29.6**	**3,025**	**1,415**	**2,253**	**210**
Grade school:								
Less than 7 years [1]	2,312	1,658	630	27.2	310	115	205	24
7 and 8 years	4,402	3,397	961	21.8	486	201	274	44
High school:								
1 to 3 years	4,997	3,610	1,342	26.9	685	266	391	45
4 years	7,630	5,313	2,263	29.7	956	536	771	54
College: 1 year or more	3,286	1,746	1,497	45.6	588	297	612	43
EMPLOYMENT STATUS								
Total, 14 years and over	**107,156**	**84,474**	**22,114**	**20.6**	**11,267**	**4,281**	**6,566**	**568**
In labor force	59,385	46,533	12,550	21.1	6,255	2,423	3,872	302
Employed	56,713	44,709	11,751	20.7	5,973	2,291	3,487	253
Unemployed	2,418	1,754	624	25.8	256	110	258	40
In armed forces [2]	254	70	175	68.9	26	22	127	9
Not in labor force	47,771	37,941	9,564	20.0	5,012	1,858	2,694	266
MAJOR OCCUPATION GROUP								
Males employed	**40,911**	**32,330**	**8,400**	**20.5**	**4,284**	**1,660**	**2,456**	**181**
Professional and semiprofessional workers	2,325	1,555	753	32.4	332	170	251	17

No. 26.—Movement of Farm Population: 1910 to 1949

[**In thousands.** Based on benchmark data from Censuses of Population and Agriculture, current enumerative sample surveys, and mailed questionnaires. See also *Historical Statistics*, series B 231–236]

YEAR	Farm population on Jan. 1	Change through natural increase	CHANGE THROUGH MIGRATION			Change through change in classification of residence [3]
			Net farm-nonfarm migration	Arrivals from nonfarm areas [1]	Departures for nonfarm areas [2]	
1910	[4] 32,077	([5])	([5])	([5])	([5])	
1920	[6] 31,614	485	−336	560	896	
1925	30,830	491	−702	1,336	2,038	
1930	30,169	377	−325	1,740	2,065	+264
1935	[6] 31,801	375	−642	825	1,467	−157
1936	31,377	363	−690	719	1,409	−144
1937	30,906	375	−529	872	1,401	−132
1938	30,620	405	−420	823	1,243	−125
1939	30,480	410	−491	805	1,296	−130
1940	30,269	400	−681	690	1,371	
1941	29,988	417	−1,357	814	2,171	
1942	29,048	390	−2,779	819	3,598	
1943	26,659	355	−1,493	1,094	2,587	
1944	25,521	345	−676	917	1,593	
1945	25,190	354	+1,306	2,578	1,272	
1946	26,850	419	+281	1,783	1,502	
1947	27,550	483	−593	1,030	1,623	
1948	27,440	479	−143	1,237	1,380	
1949	27,776					

[1] For 1940 and subsequent years, includes persons returning from armed forces.
[2] For 1940 and subsequent years, includes (*a*) inductions and enlistments into armed forces, and (*b*) persons who have not moved but who are no longer in farm population because agricultural operations have ceased on place where they are living.
[3] Positive entry indicates net gain in farm population due to beginning of farming operations on units previously not classified as farms; negative entries represent net loss due to cessation of farming operations on such units.
[4] Estimated by Bureau of Census.
[5] Not available.
[6] Census enumeration.

No. 30.—Households, by Color of Head, With Population Per Household: 1890 to 1949

[Figures for 1890 to 1940 based on complete census. Figures for 1941 to 1945 estimated on basis of number of marriages and divorces and allowances for wartime effects on household formation. Figures for 1946 to 1949 based on Current Population Survey, see Sampling Note, p. 183. Statistics for 1900, 1930, and subsequent years represent (private) households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of households, see p. 2. See also *Historical Statistics*, series B 171–181]

DATE	HOUSEHOLDS				COLOR OF HEAD			
		Annual increase over preceding date			White		Nonwhite [3]	
	Number	Number	Percent [1]	Population per household [2]	Number	Percent	Number	Percent
1890 (June 1)	12,690,152			4.93	11,255,169	88.7	1,434,983	11.3
1900 (June 1)	15,963,965	327,381	2.32	4.76	14,063,791	88.1	1,900,174	11.9
1910 (Apr. 15)	20,255,555	434,371	2.44	4.54				
1920 (Jan. 1)	24,351,676	418,398	1.90	4.34	21,825,654	89.6	2,526,022	10.4
1930 (Apr. 1)	29,904,663	541,755	2.02	4.11	26,982,994	90.2	2,921,669	9.8
1940 (Apr. 1)	34,948,666	504,400	1.56	3.77	31,679,766	90.6	3,268,900	9.4
1941 (July 1)	35,850,000	721,000	2.06	3.67				
1942 (July 1)	36,450,000	600,000	1.67	3.59				
1943 (July 1)	36,875,000	425,000	1.17	3.46				
1944 (July 1)	37,100,000	225,000	.67	3.41				
1945 (July 1)	37,500,000	400,000	1.08	3.40				
1946 (June 15)	38,183,000	711,000	1.90	3.61				
1947 (Apr. 15)	39,138,000	1,151,000	3.02	3.63	35,593,000	90.9	3,545,000	9.1
1948 (Apr. 15)	40,720,000	1,582,000	4.04	3.56				
1949 (Apr. 15)	42,107,000	1,387,000	3.41	3.50				

[1] Computed by compound interest formula.
[2] Obtained by dividing total population by number of households (members of armed forces excluded 1941 to 1949); hence not strictly average size of household because about 2.5 percent of total population are members of quasi households.
[3] The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,828 in 1920; 2,803,756 in 1930; and 3,141,883 in 1940.

No. 34.—Gross and Net Reproduction Rates, by Color, Urban and Rural Residence, and Regions: 1905 to 1910, 1930 to 1935, 1935 to 1940, 1942 to 1947, and 1944 to 1949.

[Statistics for 1905 to 1910 based on Sample W, and those for 1930 to 1935 and 1935 to 1940 based on Sample C (see p. 1); statistics for 1942 to 1947 and for 1944 to 1949 based on Current Population Survey made in April 1947 and April 1949, see Sampling Note, p. 183. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent a potential decline in population]

No. 39.—Institutional Population 14 Years Old and Over—Summary for the United States: 1940

[Figures cover persons who were reported in the 1940 census as inmates of public or private institutions of specified types. Officials and attendants were excluded, as were patients in general hospitals and tuberculosis sanitariums. Persons in religious institutions and Veterans' Administration facilities were included only if the establishment had a majority of delinquents, mental patients, aged, or incurables]

No. 40.—Religious Bodies—Number of Churches and Membership

[Due to differing bases of computing membership, figures of different bodies are not always comparable. Roman Catholic, Eastern Orthodox, and Protestant Episcopal, for example, include all baptized persons. However, in most Protestant bodies there are very few if any members under 13 years of age]

RELIGIOUS BODY	Year	Number of churches reported	Church membership
Total		[1] 265,583	[1] 77,386,188
SUMMARY			
Roman Catholic Church		14,523	25,286,178
Eastern Orthodox Churches		586	600,000
Jewish Congregations		3,728	4,641,000
"Protestant" bodies over 50,000		224,479	44,571,486
Other bodies		22,267	2,287,524
INDIVIDUAL BODIES			
Seventh Day Adventists	1947	2,589	215,545
Assemblies of God	1947	5,548	243,515
Baptist bodies:			
Northern Baptist Convention	1947	7,180	1,541,991
Southern Baptist	1947	26,764	6,270,819
National Baptist Convention, U. S. A., Inc	1946	24,460	4,122,315
National Baptist Convention of America	1947	8,993	2,580,921

No. 41.—Estimated Population on July 1, by States: 1939 to 1948

[Includes members of armed services in United States, but excludes those overseas. Based on data from 1930 and 1940 Federal censuses, State censuses, school statistics, vital statistics, registrations for war ration books, immigration statistics, and data on armed forces. Subject to revision after 1950 census. For enumerated population, 1790 to 1940, see table 43]

[In thousands]

No. 42.—Population per Square Mile, by States: 1800 to 1940

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890]

[1] Based on 1940 land-area measurement.
[2] Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.
[3] Less than one-tenth of 1 person per square mile.
[4] Dakota Territory: Less than one-tenth of 1 person per square mile in 1860, 0.1 in 1870, and 0.9 in 1880.
[5] Oklahoma and Indian Territory combined. Separate data are as follows: Indian Territory 5.9 in 1890 and 12.7 in 1900; Oklahoma, 2.0 in 1890 and 10.3 in 1900.

[4] Figure for 1860 for South Dakota represents entire Dakota Territory. Figures for 1870 and 1880 for North Dakota and South Dakota are for the parts of Dakota Territory which later constituted the respective States.
[5] Area now constituting West Virginia formed part of Virginia in 1860 and prior years.
[6] Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,060.

No. 52.—In-Migrants, Out-Migrants, and Net Migration by Sex, by States: 1940

[In-migrants are classified by division or State of residence in 1940; out-migrants by division or State of residence in 1935. In-migrants shown here represent "migrants between States" in table 22. See headnote, table 22. Minus sign (−) denotes net out-migration]

Division and State	Number					Percent of 1940 population				
	In-migrants	Out-migrants	Net migration			In-migrants	Out-migrants	Net migration

[1] Obtained by dividing total population by number of households; hence not strictly average size of household because about 2.5 per cent of total population are members of quasi households.

[2] Less than 0.1 percent.

2. Vital Statistics, Health, and Nutrition

Vital statistics.—Vital statistics, including statistics of births, deaths, marriages, and divorces, are compiled on a national basis by the National Office of Vital Statistics, Public Health Service. Prior to July 16, 1946, this activity was carried on in the Bureau of the Census. In addition to the data published by the National Office of Vital Statistics, reports in this field are issued by the individual State bureaus of vital statistics. Ordinarily these publications contain more details relating to the geographic and political subdivisions of the States, and for several States, more detailed statistics on marriages and divorces.

Births and deaths.—The national collection of mortality statistics on an annual basis was begun in 1900. For that year, the national death-registration area consisted of 10 States, the District of Columbia, and a number of cities in nonregistration States. The national collection of birth statistics was begun in 1915 with 10 States and the District of Columbia. Since 1933, the birth and death registration areas have comprised the entire United States.

In the following tables, births and deaths for 1940 and subsequent years are shown by place of residence [1] of the mother or of the decedent; those for earlier years by place of occurrence of the birth or death.

Death statistics include only deaths occurring in the continental United States and exclude deaths of military personnel overseas. Stillbirths are excluded from both birth and death statistics.

Marriages and divorces.—Collections of statistics on the numbers of marriages and divorces in the United States were made for the years 1867–1906, 1916, 1922–32, and 1937–48, except that no national collections on statistics of marriages were made in 1941–43. Estimates have been made for the intervening years as well as for years in which returns were not complete. Returns on divorces were considered practically complete for all collection years prior to 1941. At the present time, records of marriage are collected centrally in three-fourths of the States, and records of divorces, in about one-half of the States.

Vital statistics rates.—Vital statistics rates are based upon Bureau of the Census estimates of the midyear population. The special situation created by the changes in size and disposition of the armed forces necessitated the use of several types of population bases during the war and postwar period.[2] Briefly, birth and divorce rates for 1940–46 for the United States are based on the total population including members of the armed forces overseas; those for States on the civilian population in the States. Birth and divorce rates for 1947–48 and death and marriage rates for 1940–48 for the United States and States are based on total population present in the area, excluding armed forces overseas. By 1947, the armed forces overseas formed only 0.43 percent of the United States population.

Morbidity.—Statistics on morbidity are compiled and published by the Public Health Service. Each State health officer reports all diseases that are required by law or regulation to be reported in his State. The lists of diseases required to be reported

[1] For a discussion of methods of residence allocation and of significance of residence figures, see Vital Statistics of the United States, 1946, Part II, pp. V–X.

[2] For a discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality Statistics, United States, 1943*, Vital Statistics—Special Reports, Vol. 21, No. 1, 1945; and *Marriage and Divorce in the United States, 1937 to 1945*, Vital Statistics—Special Reports, Vol. 23, No. 9, 1946.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

are not the same for each State, although the most common communicable diseases are reportable in all the States. Tables 102 and 103 show data on these reportable diseases.

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935–36. Reprint No. 2384 from the Public Health Reports for May 29, 1942, gives a rather complete list of publications based on the National Health Survey.

Medical care.—Annual statistics of medical care on a Nation-wide basis are limited to data on hospital facilities obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilites are usually included.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. Beginning with the report for 1947, these statistics have been carried on by the Mental Hygiene Division, Public Health Service, Federal Security Agency; from 1926–46, the data were collected annually by the Bureau of the Census.

Nutrition.—Statistics on the apparent consumption of food per capita by civilians are estimated by the Bureau of Agricultural Economics of the Department of Agriculture. On the basis of these estimates, statistics on the nutritive value of the per capita food supply are computed by the Bureau of Human Nutrition and Home Economics. These statistics are published quarterly by the Bureau of Agricultural Economics in the National Food Situation.

Statistics on Federal food distribution programs are compiled by the Production and Marketing Administration of the Department of Agriculture and published annually in *Agricultural Statistics*. Data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are available in this publication.

Under the provisions of Federal laws, food commodities are distributed for school lunches and to institutions and welfare cases. Statistics on direct distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, and Section 6, National School Lunch Act, approved in 1935 and 1946, respectively, are presented in tables 107–109. Distribution to ultimate recipients is accomplished through cooperating distributing agencies in States. Expenditures represent cost to the Government of the commodity as delivered to the State distributing agency and include cost of purchase, handling, warehousing, and transportation charges, but exclude cost of administrative expenses. Statistics on the indemnity plan, which is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs, are shown in tables 107 and 109. Sponsors of school-lunch programs are reimbursed by the Government for local purchases of food on a basis of quality and quantity of meals served. This program was started in 1943.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 1 and C 1–5") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 67.—Percent Completeness of Birth Registration, by Race and by States: Dec. 1, 1939, to Mar. 31, 1940

[Data obtained by matching special infant cards for all infants stated in the 1940 Census to have been born during period Dec. 1, 1939, to Mar. 31, 1940, with birth certificates for children born during this period. For further details, see *Studies in Completeness of Birth Registration, Part I*, Vital Statistics—Special Reports, Vol. 17, No. 18, p. 223. Data are by place of occurrence]

[1] For 1940, 1945–46, rates for the United States based on population including armed forces overseas; rates for States based on civilian population in area. United States rates on civilian population base were: 17.9 (1940); 21.5 (1945); 23.8 (1946). For 1947–48, rates for the United States and States based on total population present in area (excluding armed forces overseas).

[1] It is assumed that all births in hospitals or institutions are attended by physicians.
[2] Births classified as attended by "Other and not specified" persons form a somewhat greater proportion of the total births in 1948 than in former years because of special problems in coding the person-in-attendance item in Georgia, Kentucky, and Mississippi. The greater majority of the "Other and not specified" attendants in these States are believed to be midwives.
[3] Less than 0.05 percent.
[4] See footnote 2.

No. 83.—Maternal Deaths, Infant Deaths (Under 1 Year of Age) and Stillbirths, for Birth-Registration States: 1915 to 1948

[For coverage of registration area, see table 65, p. 63. See also *Historical Statistics*, series C 38-39 and C 42]

Year	Maternal deaths [1]		Deaths under 1 year		Stillbirths [2]	
	Number	Rate per 1,000 live births	Number	Rate per 1,000 live births	Number	Ratio per 1,000 live births
1915	4,719	6.1	77,572	99.9		
1920	12,058	8.0	129,531	85.8		
1925	12,158	6.5	134,652	71.7		
1930	14,836	6.7	142,413	64.6		
1935	12,544	5.8	120,138	55.7		
1940	8,876	3.8	110,984	47.0		
1945	5,668	2.1	104,684	38.3	65,513	23.9
1946	5,153	1.6	111,063	33.8	74,849	22.8
1947	4,978	1.3	119,173	32.2	77,917	21.1
1948	4,122	1.2	113,169	32.0	72,788	20.6

[1] Deaths from diseases of pregnancy, childbirth, and the puerperium.
[2] Includes only stillbirths for which period of gestation was stated to be 20 weeks (or 5 months) or more, or was not stated.

No. 102.—Reportable Diseases—Number of Cases Reported, by Selected Causes, by Months: 1948

[Figures on number of reported cases of communicable diseases in this and following table should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities in giving early warnings of epidemic conditions. They should not be interpreted as measures of total amount of illness caused by the diseases concerned]

DISEASE	Total	January	February	March	April	May	June	July	August	September	October	November	December
Chickenpox	331,431	41,091	40,715	56,566	45,787	38,637	28,915	7,746	2,615	2,001	7,119	22,007	38,232

No. 106.—Nutrition—Nutrients Available for Civilian Consumption Per Capita Per Day: 1935 to 1949

[Computed by Bureau of Human Nutrition and Home Economics on basis of estimates of apparent civilian consumption (retail basis) including estimates of consumption from urban gardens, supplied by Bureau of Agricultural Economics. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for 1943–1949 for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics*, series C 122–127]

3. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 110) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 111). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 117), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota

Federal Reserve Bank of St. Louis

immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 111). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 304") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. Also a detailed text statement indicates dates for which statistics of immigration from specific countries were first recorded. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 110.—Immigration: 1820 to 1949

[Data are for fiscal years ending June 30, except as noted; for periods they are totals, not annual averages. From 1819 to 1867 figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and from 1898 to the present time, immigrant aliens admitted. See also *Historical Statistics*, series B 304]

No. 113.—Annual Quotas Allotted and Quota Immigrants Admitted, by Quota Country or Region: Years Ending June 30, 1931 to 1949

[Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1921 to 3 percent of number of foreign-born of such nationality resident in continental United States as determined by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National origins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 150,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their origin to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under 1924 act, minimum quota is 100; for nonquota classes, see general note, p. 94]

[1] Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota of country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain visas during later part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigration Act of 1924).

[2] Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Total quota for 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific islands.

[3] For 1938 to 1945, Austrian quota included with German.

All other countries	[4] 33,523	1,147	228			73	27	10	25

[1] Includes Serbia and Montenegro prior to 1920.
[2] Austria included with Germany 1938–45.
[3] From 1899 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.
[4] Includes 32,897 persons returning to their homes in the United States. After 1906 such aliens have been included in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whence they came (see headnote).

4. Education

Data on school attendance and on highest grade of school completed were obtained for each person in the United States as part of the 1940 Census of Population (see tables 127, 128, 130–135). Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 on educational attainment) of the population, based on sample data obtained in the Current Population Survey (see tables 128–131, 134 and 136). The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools (see tables 137–157). Public library statistics are also collected and published by this office (see table 158). Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school attendance statistics compiled from the 1940 Population Census are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college between March 1 and April 1, 1940. Night schools, extension schools, or vocational schools are not included unless they are a part of the regular school system; and no correspondence schools are included.

The same census, for the first time, included a question on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The *median* year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the last year of college by 16, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the *Abstract* from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education (see tables 159–161).

Data in this section relate to continental United States except as noted.

No. 127.—Persons Attending School by Single Years of Age From 5 to 20, by Sex: 1910 to 1940

[Statistics for 1940 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 3 prior censuses, school attendance question not restricted as to type of school or college. In 1940, question referred to period between Mar. 1, and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920 and 1910, to period between preceding Sept. 1 and census date (Jan. 1)]

No. 149.—Institutions of Higher Education—Staff, Enrollment, and Recipients of Degrees, by Sex, and Income and Expenditures: 1938 to 1948

[**All money figures in thousands of dollars.** Data cover universities, colleges, professional schools, junior colleges, teachers' colleges, and normal schools, both publicly and privately controlled, regular session. For student enrollment and total expenditures for earlier years, see table 147]

ITEM	1938	1940	1942	1944	1946 [1]	1948 [1]
Number of institutions reporting staff, enrollment, and degrees conferred	1,690	1,708	1,720	1,650	1,768	1,788
Staff (reduced to full-time basis), total	**123,677**	**131,552**	**134,137**	**134,451**	**136,032**	**196,300**
Men	87,990	94,536	96,251	93,794	93,876	143,243
Women	35,687	37,016	37,886	40,657	42,156	53,057
Resident college enrollment, total	**1,350,905**	**1,494,203**	**1,403,990**	**[2] 1,155,272**	**1,676,851**	**2,616,262**
Men	803,893	893,250	818,559	578,948	927,662	1,836,339
Women	547,012	600,953	585,431	576,324	749,189	779,923
Degrees conferred:						
Baccalaureate and first professional, total	**164,943**	**186,500**	**185,346**	**125,875**	**136,174**	**271,019**
Men	97,678	109,829	103,889	55,876	58,664	175,456
Women	67,265	76,671	81,457	69,999	77,510	95,563
Masters, including advanced engineering (men and women)	21,628	26,731	24,648	13,414	19,209	42,400
Doctors (men and women)	2,932	3,290	3,497	2,305	1,966	4,188
Honorary (men and women)	1,500	1,452	1,619	1,292	[3]	[3]
Number of institutions reporting income and expenditures	1,586	1,609	1,628	1,563	1,768	1,788
Income for educational and general and for plant extension purposes	**580,372**	**637,497**	**656,392**	**886,241**	**1,046,795**	**1,936,971**
Student fees	178,996	200,897	201,365	154,485	214,344	305,632
Endowment earnings	70,654	71,304	74,075	75,196	89,763	86,708
Federal Government	29,345	38,860	58,232	308,163	197,250	528,047
State governments	140,959	151,222	166,532	175,169	225,161	357,900
County, city, and district governments	22,091	24,392	27,057	26,449	31,005	47,521
Private gifts and grants	36,908	40,453	45,916	50,449	77,572	91,568
Sales and service of organized activities	27,947	32,777	40,308	53,576	67,084	93,024
Other (including that for increase of physical plant)	73,472	77,592	42,907	42,754	144,616	426,571
Auxiliary enterprises and activities	130,523	143,923	157,424	183,644	244,436	466,667
Income for increase of permanent funds	49,583	44,518	38,510	69,688	[3]	75,889
Expenditures for educational and general purposes, total	**475,192**	**521,990**	**572,465**	**[4] 753,846**	**820,326**	**1,400,574**
Administration and general expense	56,406	62,827	66,968	69,668	104,808	172,882
Resident instruction	253,006	280,248	298,558	334,188	375,122	661,438
Organized research	25,213	27,266	34,287	58,456	86,812	160,822
Libraries	17,588	19,487	19,763	20,452	26,560	44,538
Physical plant operation and maintenance	62,738	69,612	72,594	81,201	110,947	202,908
Organized activities related to instruction	24,031	27,225	37,771	48,415	60,604	85,527
Extension	34,189	35,325	42,525	44,421	55,473	72,459
Other	2,020			[5] 97,044		
Auxiliary enterprises and activities [6]	139,194	152,699	165,703	220,272	268,096	493,891
Capital outlay, total	70,466	83,765	50,202	27,427	71,403	306,371

[1] Includes estimates for institutions not reporting. 1948 financial data preliminary.
[2] Includes 277,755 full time regular session military students.
[3] Not available.
[4] Includes "Federal contract courses" not included in table 147.
[5] Consists of "Federal contract courses" only.
[6] Includes "Other noneducational expenditures.."

No. 159.—Vocational Schools and Vocational Teacher-Training Courses, Federally Aided—Number of Teachers and Students, by Class of School or Course and by Sex: Years Ending June 30, 1920 to 1948

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for further development of vocational education. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico beginning 1936, and for Alaska beginning 1937]

5. Law Enforcement and Federal Courts

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi-annual bulletin, *Uniform Crime Reports*. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover about three quarters of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. Tables 162–165 are taken from *Uniform Crime Reports*. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

published statistical data on criminal cases disposed of in the general trial courts of from sixteen to thirty States including the District of Columbia. No national collection is now made.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the United States Courts, and is published annually in the Report of the Director. Tables 166–172 are from this source.

As mentioned previously, the criminal jurisdiction of the Federal courts is limited by reservations to the States contained in the United States Constitution. For the same reason the jurisdiction of the Federal courts to hear and decide civil litigation is likewise limited. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the United States Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the United States District Courts, and one or more of these courts is established in every State, Territory, or possession. Appeals from the district courts are taken to intermediate appellate courts of which there are eleven. They are known as United States Courts of Appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Nearly every State publishes annual data either for the whole prison system or for each separate State institution. A national compilation of data on prisoners in Federal and State prisons and reformatories was made annually by the Bureau of the Census until after the 1947 data were compiled when this work was transferred to the Bureau of Prisons. Statistical information covering persons received and discharged from State prisons and reformatories in 46 of the 48 States and from the District of Columbia and Federal prison systems was published annually in a comprehensive report, the latest of which covered the year 1946. A brief report for 1947 was included in the series, Current Population Reports, and will be the last report of this material by the Census Bureau. Tables 175–179 present data from these reports. The Federal Bureau of Prisons, in its annual report, *Federal Prisons*, provides as complete statistical information on prisoners as has been issued in this country. Tables 173 and 174 are from this source.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the Children's Bureau, Social Security Administration, Federal Security Agency.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

No. 165.—Arrests, by Age Groups: 1948

[Data from arrest records, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of State laws and municipal ordinances. Excludes fingerprint cards representing arrests for violations of Federal laws or representing commitments to any type of penal institution. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders]

6. Climate

Climatological data are gathered by the United States Weather Bureau at about 10,000 stations. Of this number nearly 3,000 stations have autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. Data shown in these tables include long-time averages and extremes of the several elements for the vicinities indicated. Where the station has moved, but not out of the general vicinity, the data represent combined values for both the previous and the new locations.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The averages represent the arithmetic means of the period of record at the station. Relative humidity averages are based on 3 to 4 daily observations. The number of degree days as used in table 185 is the average monthly sum of the differences between 65° and the daily mean temperatures below 65°, i. e. (65°–T°). Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls below 65°. The degree-day value is based on this assumption.

7. Public Lands and National Park System

Acquisition of original public domain.—Recognition of its sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States and, with the exception of lands in the District of Columbia, is known as the *original public domain.* Any of such lands which the Government has not disposed of under the public-land laws, are generally referred to as *public-domain lands* or *public lands.*

In addition to the public domain, the United States Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for various public purposes. Such lands are often referred to as *acquired lands,* to distinguish them from public-domain lands. Complete statistics are not available as to the extent of such acquisitions.

Public-domain lands.—*Public-domain lands* or *public lands,* as used here, refers to those Federally owned lands to which the general body of public land laws apply. (See title 43, Code of Federal Regulations.) In general, it includes that portion of the *original public domain* not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be *public lands.* As a general rule, it excludes *acquired lands,* as defined above. The term *Indian lands,* as used in tables 195–197, refers to that portion of the public domain lands that was ceded to the United States by Indian tribes on condition that part or all of the proceeds from their sale or other disposition would be covered into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public-land laws (including the homestead laws) of Federal public lands to non-Federal owners. In general, *original entries* and *selections* are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued.

Applications become *final entries* (perfected entries) upon issuance of a *final certificate* which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. These requirements may include, in particular cases, settlement upon and improvement of the lands entered, or payment of statutory fees or purchase money. A *final certificate* passes equitable title to the land to the applicant. *Patents* are instruments which pass legal title to the lands to the applicant. *Certifications* are issued in lieu of patents in connection with certain State selections.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics,* series F 1–7") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.* In that historical supplement to the *Statistical Abstract,* statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

1802, estimate of public domain				*200,000,000*
1781-1802 (State Cessions)	236,825,600	233,415,680	3,409,920	

[1] Estimated from imperfect data available for indicated years.
[2] Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.
[3] Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.
[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

Source: Department of Interior. Estimated area, Bureau of Land Management; all other data, Office of the Secretary, Areas of Acquisitions to the Territory of the U. S., 1922.

No. 195.—Disposal of Public Lands: 1861 to 1949

[For years ending June 30. Data include Alaska except where noted. Period figures are totals, not averages. See also *Historical Statistics*, series F 8-16]

[1] Includes receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were $177,230,000.
[2] As of June 30, 1949, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1802-60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres which is due to breakage and "less than" items.
[3] Includes homesteads. [4] Includes some classes of final entries and patents prior to 1911.
[5] Excludes commuted homesteads. [6] 1868-1870 only. [7] 1920 only.

8. Labor Force, Employment, and Earnings

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Current Population Survey of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture, and the Bureau of Labor Statistics of the Department of Labor. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together data from the reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours, labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. The sampling methods usually used in the collection of statistics from establishments yield estimates of employment that may be subject to some error as well as to a small downward bias arising from inadequate representation of new firms entering business. Accurate estimates are maintained, however, by annual adjustment to "benchmark" data from tabulations of employer reports obtained in connection with Social Security programs and other sources, and by correcting current figures for selected industries for bias on the basis of past experience.

Labor force.—The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. (For detailed definitions of various work status classes, see footnotes to table 221.) Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation. The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reporting themselves in each occupation and in each industry, and other items. The Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the Nation, provides current data published in *Current Population Reports—Monthly Report on the Labor Force.* Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupational group of those em-

Federal Reserve Bank of St. Louis

ployed and duration of unemployment of those unemployed. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 183.

Agricultural employment.—The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates, obtained by means of monthly mail returns from crop reporters, have been issued since 1909 by the Department of Agriculture.

Nonagricultural employment.—The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 35,200 establishments in manufacturing industries and from about 83,400 establishments in selected nonmanufacturing industries, supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Social Security programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, and unpaid family workers, most of whom cannot be covered easily by the establishment approach. Persons in the armed forces are also excluded. Estimates are available for *total* employment for 8 major industry divisions, for 21 manufacturing groups, for 108 manufacturing industries, and for selected nonmanufacturing industries. Employment data as well as average weekly hours, and average weekly and hourly earnings are available for *production and related* workers in 108 manufacturing industries; in mining, power laundries, and cleaning and dyeing industries, and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries.

The employment data are for all full and part-time employees who worked or received pay for any part of the period reported.

The earnings data are gross, before pay-roll deductions and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Maritime Commission, the Civil Service Commission, the Bureau of the Census and other agencies.

All BLS series reflect major revisions first published in September 1949. These revisions include: The reclassification of establishments according to current rather than prewar product or activity; the use of 1947 and 1948 benchmarks; and the adoption of the Standard Industrial Classification (1945) in manufacturing. Consequently, there is a lack of historical continuity, prior to 1947, for many industries and a substantial change in the list and definitions of the industries for which statistics are prepared. Continuous data for all currently published series begin with January 1947. Continuity with data prior to 1947 has been maintained for total nonagricultural employment, the major industry divisions, and all manufacturing production-worker employment, hours and earnings.

Output per man-hour.—The Bureau of Labor Statistics prepares annual statistics on output per man-hour. Data are published for 19 manufacturing industries, 5 mining industries, 3 public utilities, and agriculture. Output per man-hour refers to production, in physical units, per man-hour of work. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. The data do not measure the specific contribution of labor or capital nor do they reflect increased efficiency resulting from more economical use of fuel and materials, or more efficient integration of industries.

Labor turn-over.—Labor turn-over estimates are published monthly by the Bureau of Labor Statistics for 88 industries in 20 major divisions in manufacturing and for selected nonmanufacturing industries, on the basis of 7,500 reports from cooperating establishments. The turn-over data are for the entire month rather than the pay-roll

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

period ending nearest the middle of the month as in the case of employment, hours, and earnings data.

Work stoppages.—Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures of strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of workers involved, and the number of man-days of idleness. Basic statistical data are obtained from the employers and unions involved, as well as from third parties, such as State and Federal mediation services, where possible. From the data given on the schedules, the Bureau prepares annual reports (published in the May *Monthly Labor Review* and later in bulletin form) which give not only the complete and verified total figures for each month of the year but also analyses on strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classifications.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series D 11–31") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 207.—Labor Force—Persons Gainfully Occupied in Agricultural and in Nonagricultural Pursuits; and Women in Labor Force or Gainfully Occupied: 1820 to 1940

[Figures for 1940 relate to the labor force; those for earlier years relate to gainful workers. For differences in concepts, see text statement, p. 170. See also *Historical Statistics*, series D 1–10]

YEAR	ALL PERSONS 10 YEARS OLD AND OVER					WOMEN IN LABOR FORCE OR GAINFULLY OCCUPIED, 15 YEARS OLD AND OVER [1]		
	Population 10 years old and over	Number of persons engaged in—						
		All occupations		Nonagricultural pursuits	Agricultural pursuits	Total number	Married	
		Number	Percent of population 10 and over				Number	Percent

1910	71,580,270	37,370,794	52.2	25,779,027	11,591,767	7,639,828	1,890,661	24.7
1920	82,739,315	42,433,535	51.3	30,984,765	11,448,770	8,346,796	1,920,281	23.0
1930	98,723,047	48,829,920	49.5	38,357,922	10,471,998	10,632,227	3,071,302	28.9
1940	110,443,129	[6] 52,148,251	47.2	42,985,704	9,162,547	13,840,000	5,040,000	36.4

[1] Figures for 1940 are revised estimates of labor force 14 years old and over during the census week; see Bureau of the Census, *Current Population Reports*, Series P–50, No. 2. Figures for prior years are for gainfully occupied 15 years old and over.

[2] See U. S. Bureau of the Census, *Supplementary Analysis of Twelfth Census*, p. 408.

[3] Includes 9,419 out of 11,130 persons for whom age was not ascertained.

[4] Final figures, after re-enumeration of Montgomery County, Maryland, in 1841.

[5] Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available. Figures for the remaining area are corrected figures; for explanation, see analysis of occupation returns for 1890 in *Twelfth Census (1900) Special Reports*, "Occupations," pp. lxvi–lxxiii.

[6] May differ from 1940 data in other tables because of following adjustments to improve comparability: New workers have been excluded; children 10 to 13 (estimated) engaged in agricultural and nonagricultural pursuits have been included; persons on public emergency work previously in agricultural pursuits (estimated) have been included; number of persons classified in agricultural pursuits was revised as a result of occupation classification revision in 1940.

No. 209.—Employment Status of the Noninstitutional Population, by Sex: 1929 to 1949

[Thousands of persons 14 years old and over. Unemployed persons include persons looking for work and persons on public emergency work projects. Data in tables 209–211, based on Current Population Survey (see Sampling Note p. 183), are not entirely comparable with those presented in tables 207, 208, 221–226, which are based on reports of the 1940 census. For an explanation of differences, see Department of Commerce, Bureau of the Census; *Current Population Reports—Labor Force Bulletin* (Series P–50, No. 2). See also *Historical Statistics*, series D 11-31]

ANNUAL AVERAGE OR MONTHLY ESTIMATE	Total, noninstitutional population [1]	IN LABOR FORCE				NOT IN LABOR FORCE

[1] Persons who had a job or business, but who did not work at all during entire survey week because of illness, bad weather, vacation, labor dispute, or because of temporary lay-off with definite instructions to return to work within 30 days of lay-off. Also persons scheduled to report within 30 days to new job.

[2] Nonagricultural data affected by occurrence of legal holidays in three survey weeks and are not, therefore, directly comparable with 1947 annual averages.

[3] Survey week contains legal holiday.

No. 216.—Employees in Selected Nonmanufacturing Industries: 1947 to 1949

[**In thousands.** Includes all full- and part-time employees who worked during, or received pay for pay period ending nearest 15th of month. Data have been adjusted to levels indicated by Unemployment Insurance Agencies and Bureau of Old-Age and Survivors Insurance data through 1947 and have been carried forward from 1947 bench-mark levels, thereby providing consistent series. New series; based on *Industrial Classification Code*, Federal Security Agency, Social Security Board, 1942. Supersedes data published in previous editions of the *Statistical Abstract*]

1948[5]				101.00	122.00	4.50	4.45	445
1949[5]	10,756	8,326	2,430	99.00	121.00	4.45	4.45	429

[1] Data have been revised and are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.
[2] Weighted averages of wage rates as reported quarterly by crop reporters.
[3] Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.
[4] Includes all persons doing one or more hours of farm work for pay during survey week. Members of operator's families doing any farm work for cash wages are counted as hired workers.
[5] New series of wage rates begun in 1948; not entirely comparable with those of previous years.

Sampling Note

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

SEX	CIVILIAN LABOR FORCE			Not in the labor force
	Total	Employed	Unemployed	
	Percent	*Percent*	*Percent*	*Percent*
Both sexes	2	2	18	4
Male	2	2	18	4
Female	5	5	20	2

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitudes being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects, such as urban-rural distributions, migration, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

Persons 14 years old and over	**50,549,176**	**45,605,134**	**4,785,233**	**158,809**
In labor force	12,845,259	11,001,823	1,807,186	36,250
Employed (except public emergency work) [1]	11,138,178	9,563,583	1,542,273	32,322
On public emergency work [2]	457,512	395,689	60,168	1,655
Seeking work [3]	1,249,569	1,042,551	204,745	2,273
Not in labor force [4]	37,703,917	34,603,311	2,978,047	122,559

[1] Includes (*a*) persons *at work*—persons who worked for pay or profit at any time during the week of Mar. 24–30, 1940, in private work or nonemergency Federal, State, or local government work, or assisted without pay on a family farm or in a family business; and (*b*) persons *with a job but not at work*—persons not actually at work and not seeking work during the week of Mar. 24–30, 1940, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date. The category *Employed (except on public emergency work)* includes not only employees but also proprietors, farmers, other self-employed persons, and unpaid family workers.

[2] Includes persons who, during the week of Mar. 24–30, 1940, were at work on, or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration (NYA), the Civilian Conservation Corps (CCC), or State or local work relief agencies. In the interpretation of the data for persons on public emergency work, allowance must be made for the misclassification in the census returns of considerable numbers of public emergency workers. The number of persons reported in the census as on public emergency work in the United States was 2,529,606, whereas the number recorded on the pay rolls of the Federal emergency work agencies at about the time of the census was 2,906,196 excluding the NYA Student Work Program, and 3,377,978 including that program. The most common type of misclassification was the reporting of the emergency workers as *At work*. Persons on the NYA Student Work Program were very frequently returned as in school and not in the labor force. There is also evidence that a considerable number of emergency workers were classified as *Seeking work*.

[3] Includes persons without work of any sort in the week of Mar. 24–30, 1940, who were seeking work during that week. This category is composed of both experienced and new workers, the latter being persons who had not previously worked full time for 1 month or more.

[4] Includes inmates of penal and mental institutions and homes for the aged, infirm, and needy.

No. 223.—Occupation of Persons in the Experienced Labor Force and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

["N. e. c." means not elsewhere classified. Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 221. Occupation figures shown below for employed (except on public emergency work) refer to the occupation in which engaged during census week, and are based on complete census returns. Occupation figures for remaining experienced labor force groups, not shown separately in this table, refer to the occupation which the person regarded as his usual occupation and at which he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current and usual occupation based on complete census returns and Sample B, respectively]

OCCUPATION	EXPERIENCED LABOR FORCE			EMPLOYED (EXCEPT ON PUBLIC EMERGENCY WORK)		
	Total	Male	Female	Total	Male	Female

[1] Comprises a summation of the complete count of present occupations for employed persons (except on emergency work) and of the tabulations from Sample B (see p. 1) of usual occupations for persons on emergency work and for experienced workers seeking work as shown in table 223. For definitions of these labor force groups, see footnotes on table 221.

[2] Comparable figures not available.

[1] Includes Government corporations. Based, for the most part, on reports of respective agencies to Civil Service Commission adjusted to improve comparability throughout period. Differs from data in tables compiled by Civil Service Commission in following respects: (1) Excludes seamen and trainees on ships contracted by U. S. Maritime Commission and substitute rural mail carriers; (2) includes temporary employees of Post Office Department hired to handle Christmas mail each year, Federal Reserve banks, and mixed-ownership banks of Farm Credit Administration.

Source: Department of Labor, Bureau of Labor Statistics. Data for executive branch based mainly on reports of Civil Service Commission. Current data published in Monthly Labor Review and in mimeographed releases.

50 years and over	140	137	3	97.9	(2)	(2)	(2)	4,312	4,356	2,303

[1] Average age is 40.6 years for all employees, 41.6 years for men, and 37.7 years for women. Age is determined by subtracting birth year from year 1947.

[2] Less than 0.1 percent.

[3] Pay rates represent base pay before any deductions for retirement, taxes, or bonds, but exclude overtime, bonuses, night differentials, etc. Pay rates other than annual rates are converted to annual full-time equivalent.

[4] Average length is 10.2 years for all employees, 11.3 years for men, and 7.2 years for women. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.

No. 239.—Hours and Gross Earnings of Production Workers in Manufacturing and Selected Industries, 1947, 1948, and July 1949

[Data are based upon reports from cooperating establishments covering both full- and part-time production and related workers who worked during, or received pay for, the pay period ending nearest 15th of month. New series; based on *Standard Industrial Classification Manual*, Vol. I, Manufacturing Industries, Bureau of the Budget, November 1945. Supersedes data published in previous editions of the *Statistical Abstract*]

INDUSTRY	AVERAGE WEEKLY EARNINGS			AVERAGE WEEKLY HOURS			AVERAGE HOURLY EARNINGS		
	1947	1948	July 1949	1947	1948	July 1949	1947	1948	July 1949
Manufacturing	$49.97	$54.14	$54.63	40.4	40.1	38.8	$1.237	$1.350	$1.408
Durable	52.46	57.11	57.31	40.6	40.5	38.8	1.292	1.410	1.477

No. 240.—Hours and Earnings, Gross and Exclusive of Overtime, of Production Workers in Manufacturing Industries: 1939 to 1949

[Overtime is defined as work in excess of 40 hours per week and paid for at time and one-half. Computation of average hourly earnings exclusive of overtime makes no allowance for special rates of pay for work done on holidays. New series; supersedes data shown in previous editions of the *Statistical Abstract*. See also *Historical Statistics*, series D 117-120]

PERIOD	Average weekly earnings	Average weekly hours	AVERAGE HOURLY EARNINGS		
			Gross amount	Excluding overtime	
				Amount	Index 1939=100
1939	$23.86	37.7	$0.633	-------	-------

No. 243.—Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1940 to 1949

[Data for recent years cover 77 cities. From 1940 to 1942 study made as of June 1, except for building trades in 1942, made as of July 1. Since 1943 data collected as of July 1 for all trades except streetcar and bus operators for whom data are shown since 1947 as of Oct. 1, and printing data for 1948 as of Jan. 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year to year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. See also *Historical Statistics*, series D 152–163]

[Rates and hours for 1939=100]

YEAR	BUILDING TRADES						PRINTING TRADES					
	All building trades		Journeymen		Helpers and laborers		All printing trades		Book and job		Newspaper

No. 244.—Average Hours and Earnings on Construction Projects: 1935 to 1949

ITEM	1935	1937	1939	1941	1943	1945	1946	1947	1948	July 1949
FEDERALLY FINANCED PROJECTS [1]										
Average hours worked per month	96.7	126.1	124.7	160.3	168.1	168.8	160.0	158.2	165.8	159.7
Average monthly earnings	$63.96	$91.87	$99.39	$151.23	$193.96	$219.58	$204.73	$213.65	$245.33	$257.57
Average hourly earnings	$0.661	$0.729	$0.797	$0.943	$1.154	$1.301	$1.280	$1.351	$1.480	$1.613
PRIVATE BUILDING PROJECTS [2]										
Average hours worked per week	30.1	33.4	32.6	34.8	38.4	39.0	38.1	37.6	37.3	37.1
Average weekly earnings	$24.51	$30.14	$30.39	$35.14	$48.13	$53.73	$56.24	$63.30	$68.85	$71.28
Average hourly earnings	$0.815	$0.903	$0.932	$1.010	$1.252	$1.379	$1.478	$1.681	$1.848	$1.922

[1] Data on hours and earnings on Federal projects reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average hours and earnings cannot be accurately computed by weeks and figures for average monthly hours and earnings tend to show certain irregularities reflecting this method of reporting.

[2] Data shown after 1947 includes publicly financed projects and off-site construction workers.

Source: Department of Labor, Bureau of Labor Statistics; data on Federal projects published currently in monthly bulletin, Construction; private projects in Monthly Labor Review and in mimeographed releases.

No. 245.—Indexes of Output Per Man-Hour (Output Per Worker in Agriculture and Telegraph) for Selected Industries: 1929 to 1948

[1939=100. Productivity refers to output in physical units per man-hour of work (or per worker in agriculture and telegraph). Indexes of output per man-hour obtained by dividing indexes of production by indexes of man-hours. For explanation of various indexes used, see *Handbook of Labor Statistics*, 1947, p. 154. See also *Historical Statistics*, series D 213-217]

INDUSTRY	1929	1933	1937	1939	1941	1943	1945	1946	1947	1948
All manufacturing:										
Output per man-hour	78.1	81.9	90.0	100.0	------	------	------	------	------	------
Mining: [1]										
Output per man-hour	69.9	78.8	88.0	100.0	103.9	101.5	106.1	107.0	111.1	111.0
Agriculture:										
Output per worker	91.6	89.2	105.3	100.0	107.5	116.7	120.7	122.0	116.6	130.1
Steam railroad transportation: [2]										
Revenue traffic per man-hour	75.1	83.0	95.2	100.0	115.5	150.9	139.5	129.1	135.0	133.3
Electric light and power: [3]										
Output per man-hour	54.1	68.1	89.6	100.0	123.2	182.7	182.5	160.7	167.0	171.0
Telephone: [4]										
Output per man-hour	------	------	88.8	100.0	99.5	97.9	98.8	94.8	100.3	93.3
Telegraph: [5]										
Output per employee	------	------	93.0	100.0	92.9	107.9	116.4	109.6	121.0	117.0

[1] For 1929 and 1933, covers almost all industries; for 1937 to 1948, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas and natural gasoline; iron; copper; and lead and zinc).

[2] Refers to Class I steam line-haul railroads.

[3] Refers to privately owned utilities.

[4] Refers to Class A telephone carriers.

[5] For principal wire-telegraph and ocean-cable carriers. As satisfactory data on average weekly hours are not available before 1943, index of output per man-hour is not presented.

No. 248.—Monthly Labor Turn-Over Rates (Per 100 Employees) in Manufacturing Industries: 1939 to 1949

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in table 215, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. Labor turn-over data, beginning in Jan. 1943, refer to wage and salary workers. The turn-over sample is not so extensive as that of the employment survey—proportionately fewer small plants are included; printing and publishing, and certain seasonal industries, such as canning and preserving, are not covered]

CLASS OF TURN-OVER AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Accession:												
1939	4.1	3.1	3.3	2.9	3.3	3.9	4.2	5.1	6.2	5.9	4.1	2.8
1943	8.3	7.9	8.3	7.4	7.2	8.4	7.8	7.6	7.7	7.2	6.6	5.2
1948	4.6	3.9	4.0	4.0	4.1	5.7	4.7	5.0	5.1	4.5	3.9	2.7
1949	3.2	2.9	3.0	2.9	3.5	4.4	3.5	4.4	4.1	3.7	3.3	[1] 3.2
Total separation:												
1939	3.2	2.6	3.1	3.5	3.5	3.3	3.3	3.0	2.8	2.9	3.0	3.5
1943	7.1	7.1	7.7	7.5	6.7	7.1	7.6	8.3	8.1	7.0	6.4	6.6
1948	4.3	4.2	4.5	4.7	4.3	4.5	4.4	5.1	5.4	4.5	4.1	4.3
1949	4.6	4.1	4.8	4.8	5.2	4.3	3.8	4.0	4.2	4.1	4.0	[1] 3.0
Quit:

[1] "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or do not strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

[2] Obtained by multiplying average number of employed workers each year by number of days worked by most employees during year.

9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, other branches of the military service and on the various aspects of government programs for veterans.

Military services.—Data are compiled from the various branches as indicated in the source notes. A summary table prepared by the Bureau of Labor Statistics, similar to their tables on employment in the section on Labor Force, is also included. For expenditures of Federal government on military services, see tables 357, 358, and 360.

Veterans' Administration.—The Veterans' Administration was created under authorization of the act of Congress approved July 3, 1930 (46 Stat. 1016: 38 U. S. C. 11), to consolidate and coordinate under a single control all Federal agencies dealing with veterans' affairs.

The Veterans' Administration administers laws relating to the relief of, and other benefits provided by law for, former members of the military and naval forces. It is responsible for extending relief to veterans who served in the national defense establishment in time of war or peace, and dependents of living and deceased veterans, as provided for by various acts of Congress. These benefits include, in addition to compensation, pensions, vocational rehabilitation, and education, the guarantee or insurance of loans for purchase or construction of homes, farms, and business property, readjustment allowance for unemployed or self-employed veterans, Government life insurance, death benefits, adjusted compensation, emergency and other officers' retirement pay, physical examinations, hospital and out-patient treatment, and domiciliary care. The Veterans' Administration also administers the insurance section of the Soldiers' and Sailors' Civil Relief Act for persons in the active military service.

No. 253.—Personnel and Pay of the Military Branch of the Federal Government: 1935 to 1949

[1] Excludes pay of retired and inactive reserve personnel.
[2] Prior to March 1944, includes persons on induction furlough; prior to June 1942 and after April 1945, includes Philippine Scouts.
[3] Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.
[4] Covers Navy, Marine Corps, and Coast Guard. For Navy proper and Coast Guard, includes cash payments for clothing allowance balances.
[5] Includes men's share of family allowances but excludes Government's contribution. Represents actual expenditures for Army through April 1947 and for Coast Guard for all periods. Other data represent estimated obligations based on monthly personnel count.
[6] Represents Government's contribution. Excludes men's share.
[7] Includes leave payments of $716,313,000 in 1946, $1,528,227,000 in 1947, $37,127,000 in 1948, and $639,000 in 1949 (representing face value of bonds and cash payments) to enlisted personnel discharged prior to Sept. 1, 1946, for accrued and unused leave, and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days.

JUNE 30	AIR FORCE [5]						Army personnel assigned to Air Force Command [7]	Air Force personnel assigned to Army Command [8]
	Male and female			Female [6]				
	Total	Officers	Enlisted	Total	Officers	Enlisted		
1948	387,730	48,957	338,773	2,166	733	1,433	27,903	5,419
1949	419,347	57,851	361,496	3,320	973	2,347	22,495	119

[1] Includes Philippine Scouts; excludes contract surgeons. Data for 1921–47 include personnel in Army Air Forces and its predecessors (Air Service and Air Corps); 1948 and 1949 figures consist of total number of Army Department and Air Force Department military personnel assigned to organizations under command of United States Army (Army Command strength), and exclude Army Department and Air Force Department military personnel assigned to organizations under command of United States Air Force (Air Force Command strength). Includes personnel under Army commands in Army Nurse Corps, Women's Army Corps from 1943 on, Women's Medical Specialist Corps (dietitians, physical therapists, and occupational therapists) from 1943 on, and Women's Air Force 1948 and 1949.

[2] Nurse Corps included with officers.

[3] Includes field clerks in 1921–25.

[4] Number of women in services 1921 to 1939 relatively small.

[5] See note 1.

[6] Includes personnel under Air Force commands in Army Nurse Corps, Women's Medical Specialist Corps, Women's Air Force, and Women's Army Corps.

[7] Included in Air Force.

[8] Included in Army.

[1] Expenditures for 1948 overstated by $6,956,000, which was credited against 1949 and grand total but not against their horizontal components. Includes payments to participants in yellow-fever experiments for 1932-49.

[2] Expenditures incurred during 1944-46 for increased payments on account of vocational rehabilitation included under "Compensation and pensions—World War II"; thereafter, under "All other."

[3] War of the Revolution, $70,000,000; War of 1812; $46,218,000; Indian Wars, $103,465,000; Mexican War, $61,726,000; unclassified, $16,513,000.

[4] Figures for 1949 and grand total reflect recent change in reporting basis; change not carried to prior years.

[5] Represents payments made on adjusted service certificates and amounts reimbursed to U. S. Government life insurance fund on account of loans made from that fund.

[6] Includes expenditures from funds allotted under National Recovery Act of 1933 and P. W. A. Act of 1938.

[7] Expenditures for medical and hospital services, maintenance and expenses for pensions, Veterans' Adminis tration homes, State and Territorial homes, salaries, printing and binding, and all other administrative expenses, except expenditures for civil service and Canal Zone retirement funds.

[8] Includes readjustment benefits, 1945-49, and subsistence allowances, 1947-49. Also includes expenditures for vocational rehabilitation (World War I), personal funds of patients, marine and seamen's insurance, automobiles and other conveyances for disabled veterans, and expenditures for miscellaneous purposes.

[9] Credit. [10] Less than $500, credit.

[11] Amount transferred by voucher to NSLI fund for payment of claims traceable to extra hazards of military or naval service and certain direct payments.

No. 269.—Veterans Receiving Hospital or Domiciliary Care Authorized by Veterans' Administration: 1932 to 1949

[During fiscal year 1949, 4,973,328 out-patient treatments were given and 6,300,307 out-patient examinations were made. On June 30, 1949, 6,699 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of $120 per year through August 1939, $240 per year through December 17, 1943, $300 per year through May 31, 1948, and $500 per year thereafter]

10. Social Security and Related Programs

(Data in this section relate to continental United States, Alaska, and Hawaii, except as noted)

Broadly considered, "social security" includes (1) all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the wage loss resulting from old age, sickness, disability, unemployment, or death (social insurance and related programs); (2) assistance, or payments on a needs basis, to persons with inadequate income (public aid); and (3) medical and hospital care and services to individuals to improve their health, earning power, and welfare (health and medical services and other welfare services). The aggregate expenditures for these purposes from Federal, State, and local funds are shown in table 270; a comparison of these expenditures with total receipts and expenditures of Federal, State, and local governments may be made by reference to tables 356, 357, 360, 396, 397, 407, and 408. Other data for social security and related programs are given in tables 271–274.

More detailed information follows for certain of the insurance programs—old-age and survivors insurance (tables 275–282), State unemployment insurance (tables 283–287), railroad retirement and unemployment insurance (tables 292–296), retirement systems for Government employees (tables 307–310) and workmen's compensation (table 297); for employment service (tables 288–291); for public assistance (tables 298–300); for maternal and child health and welfare services (tables 301–304) and for vocational rehabilitation (tables 305 and 306).

The *Social Security Bulletin* carries current data on all these programs for which monthly figures are available, and its supplement, the *Social Security Yearbook*, summarizes annual data for all. See also source notes to the tables in this volume for publications giving more detailed data and analyses of the figures and information on administrative factors that may affect them.

SOCIAL INSURANCE FOR INDUSTRIAL AND COMMERCIAL WORKERS

The two social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age or death (Federal old-age and survivors insurance) or unemployment (Federal-State unemployment insurance). In addition, three States—Rhode Island, California, and New Jersey—administer cash benefits for workers covered by the State unemployment insurance law who suffer a wage loss because of temporary sickness; payments under a New York sickness benefits law on the workmen's compensation pattern, administered by the Workmen's Compensation Agency, will become payable on July 1, 1950. These insurance programs cover employment in industry and commerce. Some State unemployment insurance laws, however, limit coverage to workers in firms with a specified minimum number of employees in a specified number of weeks in a year. The Social Security Act excludes from coverage certain types of work, such as farm and domestic labor, employment by government and railroads, and self-employment.

Old-age and survivors insurance (tables 275–282) provides monthly retirement benefits to fully insured workers, as defined below, at age 65 or over and supplementary monthly benefits to their wives aged 65 or over and dependent children under age 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers—children under age 18, and widows who have in their care a child

Digitized for FRASER

Federal Reserve Bank of St. Louis

beneficiary of the deceased insured worker. If the deceased worker was fully insured, survivor benefits are payable to his widow at age 65 or, if he leaves no widow or unmarried child immediately or potentially eligible for benefits, to parents aged 65 or over who were chiefly dependent on him. If no monthly benefits are payable for the month in which the wage earner dies, a lump sum is paid to the spouse who was living with the worker at the time of death or, if there is no such spouse, as reimbursement for burial expenses to a person or persons equitably entitled to such payment. Survivor benefits were also established in 1946 for survivors of World War II veterans who die within 3 years of their discharge from military service, if pension or compensation is not payable by the Veterans' Administration with respect to the death of the veteran.

A worker is fully insured if he has received at least $50 in wages from covered employment in 1 calendar quarter for every 2 that have elapsed since the end of 1936—or since attainment of age 21 if later—and before the quarter in which he attains age 65 or dies (with a minimum of 6 such quarters of coverage), or if he has received such wages in at least 40 calendar quarters. A worker is currently insured if he has had wages of $50 or more from covered employment in at least 6 of the last 13 quarters, including the quarter in which he dies.

Monthly benefits and lump-sum payments are based on the worker's average wage as legally defined. Benefits are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, earned more than $14.99 in covered employment. Covered workers and their employers each pay contributions of 1.5 percent on the worker's wages, not counting amounts above the first $3,000 in a year. The rate is scheduled to rise to 2 percent in 1952. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. The wage credits of a worker—the amounts of wages up to a maximum of $3,000 a year—are recorded in individual employee accounts maintained by the Bureau of Old-Age and Survivors Insurance.

State unemployment insurance laws (tables 283–287) pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In general, a waiting period of 1 or 2 weeks must be served before payments begin. Benefits are payable for a maximum number of weeks, amounting to 20 in 20 States, 26 in 13 States at the end of 1949 but ranging from 12 to 25 weeks among the others. In theory, weekly benefit amounts represent about 50 percent of wages, but the maximum limits on individual payments, which range from $15 to $26 under the several State laws, cut down the proportion for many workers in many States. Eleven States take account of the unemployed worker's dependents in determining the amount of benefits payable to him. Three States now pay benefits to workers whose unemployment is caused by sickness.

The standard rate of contributions payable by employers for unemployment insurance is 2.7 percent of wages paid, not counting amounts above the first $3,000 a year paid to an employee. In two States, employees also contribute for unemployment insurance. All States adjusted employer contribution rates in 1949 in accordance with "experience rating," which is based in general on the extent to which their employees have drawn benefits. The Federal Government imposes a Federal unemployment tax on employers of eight or more in industry or commerce; against this Federal tax, employers credit, up to 90 percent of their Federal liability, contributions they have paid under the State law or would have paid if they had been assessed at the standard rate. Contributions collected by States are deposited to State accounts in the Federal unemployment trust fund, from which States withdraw amounts needed

for benefit payments. The Federal Government makes grants to States to cover the necessary administrative costs of State systems that meet statutory Federal requirements.

In the three States which have temporary disability programs, employees pay contributions for these benefits. Other States which now collect or in the past have collected employee contributions for unemployment insurance may use that money to finance cash sickness benefits.

SOCIAL INSURANCE FOR RAILROAD WORKERS

The social insurance programs under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads (including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan companies performing services connected with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations, national in scope. These programs are administered by the Railroad Retirement Board, which publishes operations data in its *Monthly Review* and *Annual Report.*

Retirement and survivor benefits (tables 292 and 296).—The Railroad Retirement Act provides retirement annuities for aged or disabled workers and monthly and lump-sum survivor benefits to survivors of deceased workers. Old-age annuities are payable at age 65 or over, or at reduced rates (full rates for women employees) at age 60 to 64 after 30 years of service. Total and permanent disability annuities are payable at age 60, or after 10 years of service; and occupational disability annuities at age 60, or after 20 years of service, provided the employee is connected with the industry.

Payable monthly, retirement annuities are equal to 2.4 percent of the first $50 of the worker's average monthly earnings, 1.8 percent of the next $100, and 1.2 percent of the last $150, the sum multiplied by the years of service (up to 30, if service before 1937 is included). Under certain conditions, military service is creditable toward an annuity. Retirement is not compulsory.

The present maximum annuity is $144 a month; the minimum, the least of the following: $60, $3.60 times the years of service, or the average monthly compensation, whichever is least, provided the employee has at least 5 years of service and a connection with the industry.

Four types of monthly survivor annuities and a lump-sum death benefit are payable to certain dependents of "completely insured" workers who die before or after retirement as follows: (1) widows at age 65, if they do not remarry; (2) dependent, unmarried children under 18; (3) widows with entitled children in their care; and (4) dependent parents at age 65 if the worker is not survived by a widow or eligible children. If no survivor is entitled to immediate monthly benefits, a lump-sum benefit is payable to the widow, children (including persons entitled to share with children under State intestacy laws), parents, or persons who paid the funeral expenses, in that order of precedence. If a worker dies "partially insured," all of the benefits listed above except those to widows at age 65 and to parents are payable.

A "completely insured" and a "partially insured" worker correspond to a "fully insured" and a "currently insured" worker, respectively, under the Social Security Act.

A residual payment is made when no other death benefits are payable with respect to an employee's death. The benefit is payable to the person designated by the employee, or, in the absence of a designation, to the widow (or widower), children, parents, an estate, except that if no person is alive to receive the payment, it is made to the employee's estate.

Funds for the retirement and survivor system come from a tax on compensation (exclusive of earnings over $300 a month) authorized under the Railroad Retirement Tax Act. The tax, divided equally between the employer and the employee, is 12 percent and is scheduled to rise to the maximum of 12½ percent in 1952.

Unemployment and sickness benefits (tables 295 and 296).—The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness (including maternity) payable in a benefit year (July 1–June 30) to any employee who earned at least $150 in covered employment in the "base year" (the calendar year preceding the beginning of the benefit year). Benefits, ranging from $1.75 to $5.00 per day, depending upon the employee's base year earnings, are payable for each day of unemployment or sickness over 7 in the first 14-day registration period, and for each day over 4 in subsequent registration periods, up to a maximum of 130 days in a benefit year for each type of benefit.

The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from ½ to 3 percent of payrolls (exclusive of individual earnings in excess of $300 a month). Since January 1, 1948, the minimum rate has been in effect.

RETIREMENT SYSTEMS FOR FEDERAL GOVERNMENT EMPLOYEES

Three contributory retirement systems for Federal civilian employees (tables 307–309) and one noncontributory system are administered by the Civil Service Commission. In addition, there are other systems for Federal employees not otherwise covered (table 310).

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides for age, optional, disability and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also covers those employees in the municipal government of the District of Columbia not subject to special retirement systems for teachers, firemen, and policemen. The amendment of Feb. 28, 1948, provided annuities for the widows and minor children of deceased employees, and, under certain conditions, to the survivors of deceased annuitants. Approximately 1,865,000 employees were subject to this act as of June 30, 1949. The employee contribution rate, computed on base pay, has been 6 percent since July 1948. The rate had been 5 percent from July 1942–June 1948, 3½ percent from July 1926–June 1942, and 2½ percent from August 1920–June 1926.

The Panama Canal Zone Retirement Act, passed in 1931, pertains to employees of the Panama Canal and Panama Railroad Company who work on the Isthmus of Panama and are citizens of the United States. Four thousand five hundred and forty-six employees were covered by this act in June 1949. Employee contributions are 5 percent. Employees of the Alaska Railroad in Alaska who are citizens of the United States come under the Alaska Railroad Retirement Act, enacted in 1936. The coverage under this system was 2,224 persons in March 1949. The contribution rate is 5 percent. These two systems were repealed by the act of July 21, 1949, and all employees and annuitants subject thereto were brought under the Civil Service Retirement Act.

These three acts do not require specific payments from the Government as employer, but each implies that the Government will furnish the amounts necessary to finance the fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to each fund after a short period of operation.

Federal Reserve Bank of St. Louis

A special act was passed in 1944 to provide noncontributory annuities for citizens of the United States employed during the Panama Canal construction period, and, under certain conditions, for their widows. On June 30, 1949, there were 2,941 annuitants under this act. Separate retirement systems, some contributory and others noncontributory, are in operation for the armed forces and special classes of Federal employees.

WORKMEN'S COMPENSATION

As a result of the enactment in 1948 of a Mississippi workmen's compensation law, all States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In general, compensation is based on a proportion of wages; for total disability the proportion is commonly between three-fifths and two-thirds. However, all laws place a maximum amount on the weekly benefit payment—including dependents allowances, the maximum is $25 or more in most laws, with 9 as high as $35 or more. In most States, total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-third of the laws, there are either duration or cost limitations—or both—on the amount of medical benefits provided.

To ensure that compensation will be paid when due, workmen's compensation laws require that a covered employer obtain insurance or give proof of his qualifications to carry his own risk (self-insurance). In most of the States the employer is permitted to insure with private insurance companies, but in 7 of the 18 States which have State insurance funds, employers are required to insure their risks in the State fund.

Total payments of all types of insurers for compensation and medical benefits, by States and for the years 1939 to 1948, appear in table 297. Of the 1948 total of $536 million, an estimated $175 million was in the form of medical aid, about $311 million in cash benefits to injured workmen, and the remaining $50 million in periodic or lump-sum payments to survivor families.

PUBLIC ASSISTANCE

Public assistance (tables 298–300) is provided through four major programs, all administered by the States and localities. Payments to three groups of needy persons—the aged, the blind, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution. In addition, one State aids dependent children, and three aid blind persons, without Federal funds.

To receive a Federal grant for assistance payments and administrative expenses under any of the three programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall get. Beginning in October 1948, the maximum amount in which the Federal Government will share is $50 for old-age assistance and aid to the blind and, for aid to dependent children, $27 for the first child and $18 for each

Federal Reserve Bank of St. Louis

additional child in a family. The Federal Government pays three-fourths of the first $20 of the average monthly assistance payment for aged and blind recipients and three-fourths of the first $12 per dependent child, plus one-half the remainder of matchable expenditures. For all three programs the Federal share of the cost of State administration is one-half the sums expended.

HEALTH AND WELFARE SERVICE

Programs providing health and welfare services (tables 272, 273, 301–306) are aided through grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health. The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs (tables 301–304); the other two are administered, respectively, by the Office of Vocational Rehabilitation (tables 305 and 306) and the Public Health Service, both units of the Federal Security Agency.

[1] Excludes refunds of employee contributions to employees leaving service.
[2] Excludes administrative expenditures.
[3] State unemployment insurance programs, Reconversion Unemployment Benefits for Seamen, U. S. Employment Service, and Bureau of Employment Security.
[4] Includes railroad unemployment benefits and administrative expenses of railroad employment services, unemployment insurance and temporary disability programs.
[5] Benefits first payable July 1, 1947; excludes administrative expenditures. See footnote 4.
[6] Benefits first payable in Rhode Island April 1943 and in California Dec. 1946; includes benefits paid by private plans under State law provisions in California.
[7] Includes Army and Navy pensions, annuities, burial awards, and readjustment allowances and estimated administrative expenditures for nonmedical services; excludes expenditures from Government life insurance fund.
[8] Includes expenditures for medical services, approximately $150 and $165 million in 1947 and 1948, respectively. Includes payments by employers and private insurance carriers of benefits payable under public law.
[9] Old-age assistance, aid to the blind, and aid to dependent children.
[10] Excludes: all medical expenditures (both health services and research) of the military establishment and Atomic Energy Commission; health services provided in connection with primary and secondary public education; medical services included under public aid programs above; medical care included under workmen's compensation program above; international health activities; professional training of nurses, physicians, etc.; and expenditures for medical services and research subordinate to performance of other functions such as those of Dept. of Agriculture, Tennessee Valley Authority, Civil Aeronautics Authority, etc.
[11] Excludes expenditures for domiciliary care by Veterans' Administration and expenditures in institutions for chronic care (other than mental and tubercular), both included under Institutional and other care below. Includes hospital and out-patient care in public institutions and expenditures for maintenance and improvement of existing facilities.
[12] Federal includes cost of hospital planning and surveys; State and local, new construction only.
[13] Includes expenditures of U. S. Public Health Service except: international activities, National Institutes of Health, medical and hospital care and hospital construction, professional training. Includes expenditures of Food and Drug Administration.
[14] Includes all community health and sanitation expenditures except those in connection with schools and public welfare and those classified elsewhere as health and medical services.
[15] Federal includes expenditures under Maternal and Child Health and Crippled Children's programs and wartime program, Emergency Maternity and Infant Care. State and local includes only required matching of Federal grants under Maternal and Child Health and Crippled Children's programs.
[16] Medical care and service expenditures under Vocational Rehabilitation Act.
[17] Includes all expenditures (except training) of U. S. Public Health Service National Institutes of Health and estimated amounts appropriated by State and local governments for medical research.
[18] Includes only in-service training under auspices of National Institutes of Health, other units of U. S. Public Health Service, Children's Bureau. Excludes professional training of nurses, physicians, etc., and expenditures in State-supported medical schools.
[19] Expenditures under Vocational Rehabilitation Act other than for medical services.
[20] Veterans' Administration programs for vocational rehabilitation, automobiles and other conveyances for disabled veterans, and housing for paraplegic veterans.
[21] American Printing House for the Blind, Columbia Institute for the Deaf, Naval Home, veterans' homes, U. S. Soldiers' Home, and domiciliary care of veterans.

[1] See table 310 for data on Federal retirement systems other than Civil Service.
[2] Old-age retirement benefits under all acts, disability retirement benefits under Railroad Retirement and Civil Service Retirement Acts, and disability payments to veterans.
[3] Primary and supplementary (wife's and child's) benefits in current-payment status, and amounts certified, minus cancellations. Partly estimated.
[4] Age and disability annuitants and pensioners. Payments represent amounts certified, minus cancellations.
[5] Veterans receiving pensions and compensation.
[6] Civil service, Canal Zone, and Alaska R. R. retirement and disability funds administered by C. S. C.
[7] Widow's, widow's current, parent's, and child's benefits in current-payment status and amounts certified, minus cancellations. Partly estimated.
[8] Widow's, widow's current, child's, parent's, and survivor option. Amounts certified, minus cancellations.
[9] Widows, parents, and children of deceased veterans, and amount of payments. [10] Last 6 months of 1948.
[11] For decedents on whose account lump-sum payments were certified. [12] For burial of deceased veterans.
[13] Average weekly number. Amounts adjusted for voided benefit checks. State sickness insurance in Rhode Island and California; excludes voluntary plans in California.
[14] Under Servicemen's Readjustment Act, effective September 1944. Beneficiaries are average weekly number.
[15] Average number of persons receiving benefits in a 14-day registration period. Amounts adjusted for underpayments and recoveries of overpayments.
[16] Beneficiaries as of June. Payments include lump-sum survivor benefits and refunds. Data estimated; for 1948, preliminary.
[17] Data represent payments to individuals and exclude cost of administration.
[18] Data estimated. Includes payments for medical care. Number of beneficiaries not available.

[1] Exclude numbers under railroad-retirement program.
[2] Partly estimated; adjusted for workers having more than 1 account. Quarterly data unadjusted for workers employed during quarter but not reported after quarter in which they received their first $3,000 in year.
[3] Unadjusted for nontaxable wages erroneously reported and wages excluded in benefit computations. Wages in excess of $3,000 a year paid to worker by any 1 employer are not taxable. Beginning 1940, all wages in excess of $3,000 a year received by a worker are excluded in benefit computations.
[4] Partly estimated; adjusted for workers having more than 1 account. Quarterly data adjusted for workers employed during quarter but not reported after quarter in which they received their first $3,000 in year.
[5] Includes all wages in covered industries of workers earning over $3,000 a year.
[6] Includes 17,202,000 accounts established in 1936.
[7] Preliminary estimate, except employee accounts established.

[1] Benefit is subject to no deduction or only to deduction of fixed amount which is less than current month's benefit.

[2] Including net adjustments. Benefit is terminated when a beneficiary dies or loses entitlement to a benefit for some other reason. Adjustments result from operation of maximum and minimum provisions, recomputations, and from other administrative actions.

[1] Measured by employer's pay period employment as defined in note 5.

[2] Preliminary.

[3] An employer is a legal entity, such as a corporation, partnership, or single ownership, for which a single tax return is filed.

[4] Data not available.

[5] Total number of persons employed during one specified pay period by employers reporting taxable wages for selected quarter, namely, last pay period in March 1938 and September 1939–42, and pay period ending nearest middle of March 1945–48, respectively.

[6] Wages paid by employers for covered employment during specified quarters, excluding wages over $3,000 paid by any one employer to any one employee in a calendar year.

[1] Distribution by type estimated. Supplementary benefits are paid to entitled wives and children of retired (primary) beneficiaries. Survivor benefits are paid to the following survivors of deceased insured workers: Aged widows, children, younger widows with child beneficiaries in their care, or dependent aged parents.

[2] Payable with respect to workers who died after December 1939, if no survivor could be entitled to monthly benefits for month in which worker died.

[3] Exceeds number of deceased workers with respect to whose wage records payments were certified.

No. 282.—Old-Age and Survivors Insurance—Sample (1 Percent) of Workers With Wage Credits at Some Time in 1937–47, by Cumulative Wage Credits in 1937–47, Insurance Status January 1, 1948, and Age Group

[1-percent sample of all workers with wage credits identified for posting by July 1948; only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during period 1937–47 and workers who became entitled to primary insurance benefits before January 1, 1948. Age represents age at birthday in 1947. Since data are derived from a sample they are subject to a sampling variation which may be large where figures shown are small. Because of mechanical processes and extent of adjustments for delayed wage records, data may differ slightly from corresponding data in other published tables. Data corrected to Feb. 1, 1950]

[1] A worker who is fully insured as of a given date (in this table, Jan. 1, 1948) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after quarter in which he attained age 21, whichever is later, and up to but excluding quarter in which he died, attained age 65, or given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had at least 6 quarters of coverage during the period consisting of the quarter of the date, or the quarter in which he died, and the 12 quarters immediately preceding such quarter. Uninsured workers are those who have some wage credits but are neither fully nor currently insured as of given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than $50 in taxable wages.

[2] Total includes 6,712 workers of unreported age not shown separately, of whom 302 were fully insured, 167 currently insured only, and 6,243 uninsured. Total excludes 41 workers for whom information was incomplete with respect to the characteristics reported in this table.

[3] No workers in sample cell. [4] Inapplicable under provisions of the Social Security Act.

[1] Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are in effect for 1947 and 1948.

[2] Estimated number of different workers in each State who have earned wages in covered employment sometime during calendar year. Totals adjusted to eliminate duplication due to shifting of workers between States.

[3] Average of 12 monthly figures each of which is total of number of workers in covered employment in pay period of each type (weekly, semimonthly, etc.) ending nearest 15th of month.

[4] Total wages in covered employment for all pay periods ending in year.

[5] And wages of $100 in a calendar quarter.

[6] Or prior to July 1, 1947, wages of $5,000 in a calendar quarter of the current or preceding calendar year.

[7] And wages of $75 ($78 prior to July 1, 1947) in a calendar quarter. [8] Or 25 in 1 week.

[9] Wages of at least $50 to each of at least 4 workers during each of 3 calendar quarters.

[10] But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population. [11] Or wages of $500 in a calendar year. [12] Or wages of $10,000 in a calendar year.

[13] And wages of $225 in a calendar quarter. [14] Or wages of $450 in a calendar quarter.

[15] And wages of $500 in same calendar quarter. [16] And wages of $140 in a calendar quarter.

[17] Or wages of $6,000 in preceding calendar year. Includes employers with wages of $10,000 in a calendar quarter toward which not more than $1,000 per employee need be counted. [18] And wages of $500 in a calendar year.

[1] Excludes railroads and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.
[2] Until January 1945, represents covered employment on last pay roll of each type (weekly, semimonthly, etc.) ending in month; thereafter, employment on pay roll of each type ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.
[3] Total wages in covered employment for all pay periods ending within period.
[4] Annual figures represent first payments made to beneficiaries; monthly figures represent average weekly number of weeks of unemployment compensated during month.
[5] For 1939, represents number of benefit payments.
[6] Beginning with January 1949, represent weeks claimed by continued claims.
[7] Annual amounts adjusted, but monthly figures not adjusted, for voided benefit checks.
[8] Data not available.
[9] Excludes New York for January-March 1939; data not available.
[10] Includes $1,019,000 for 1947, $3,331,000 for 1948, and $1,280,000 for 1949 paid to seamen under the Reconversion Unemployment Benefits for Seamen program.

No. 294.—Number of Railroad Employees, by Amount of Taxable Compensation: 1947

[Includes employees covered under Railroad Retirement and Railroad Unemployment Insurance Acts for whom compensation was reported by subject employers. Some of these employees also had wages taxable under Federal Insurance Contributions Act and are therefore included in preceding tables on old-age and survivors insurance. Earnings in this table include wages and salaries, commissions, back pay, and payments for time lost as an employee, reported by subject employers; however, the excess over $300 in any one calendar month for an employee is excluded]

No. 297.—Workmen's Compensation Payments, by States: 1939 to 1948

[Estimated by Social Security Administration. Payments include net cash and medical benefits paid by private insurance carriers (compiled from the Spectator, Premiums and Losses by States of Casualty, Surety, and Miscellaneous Lines), net cash and medical benefits paid by State funds (from the Spectator and State reports; estimated for some States), and cash and medical benefits paid by self-insurers plus the value of medical benefits paid by employers carrying workmen's compensation policies that do not include the standard medical coverage (estimated from available State data). Data are for calendar years, except for Montana, Nevada, North Dakota, Oregon, West Virginia, and Federal employees, for which fiscal year data were used. Benefit payments made under Longshoremen's and Harbor Workers' Compensation Act and under Defense Bases Compensation Act are included in data for States in which payments are made]

[1] Partly estimated; total not as large as sum of State figures because of adjustment for 2 States. See footnote 5.
[2] Excludes some cases and local funds not administered by State agency.
[3] Estimated.
[4] Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.
[5] Includes unknown number of cases receiving medical care, hospitalization, or burial only.
[6] Represents program administered without Federal participation.
[7] Excludes estimated duplication between programs; 1,532 cases were aided by county commissioners and 4,459 cases under program administered by State Board of Public Welfare.

[1] The States classified as having substantially complete coverage reported 90 percent or more of children served. Those classified as incomplete reported less than 90 percent of children served.

[2] The children reported as in institutions represent only those children served by workers attached to State or local public welfare agencies and not all children receiving institutional care.

[3] Includes a number of children for whom whereabouts are unknown.

[4] Not computed because of incomplete report.

[5] Less than 0.5 percent.

1946	16,034	5,113	96,146	26,827	91,887	1,450,434	185,086	17,924	8,546	2,990	2,563
1947	22,158	6,888	111,416	31,502	103,321	943,026	178,853	17,304	10,372	3,971	3,710
1948	21,879	7,448	125,897	35,353	134,247	432,000	112,846	10,968	9,361	3,563	3,539
1949	31,371	8,935	148,336	39,076	154,252	228,554	61,407	6,338	3,926	4,872	4,685

[1] Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 9,429 in 1949. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62; such annuitants increased from 5 as of June 30, 1942, to 22,619 as of June 30, 1949. Excludes annuities purchased by voluntary contributions.

[2] Data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or, if eligible, elected to take a refund.

[3] Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

[4] Data relate to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

[5] Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

11. Income and Expenditures

The income statistics in this section are of two fundamental types: First, those which provide data on aggregate amounts (national income and national product data) and second, those which provide data on the distribution of families or persons by size of their income (size distribution data). The former are represented by tables 311–318. These statistics are compiled primarily by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. The statistics representing the latter type of income data (tables 319–327) are derived from sample surveys of income conducted by several different agencies. Since these surveys were taken at different times and for different purposes, they differ somewhat in the definitions of income and the income-receiving unit. In addition to the income data, expenditures and savings of families and single persons have been included in this section.

Nation's economic budget.—The Nation's Economic Budget is designed to give a synoptic picture of the economy. (See table 311.) It shows the magnitudes of income and expenditure of major economic groups, net additions and absorption of saving by these groups, and the gross national product or income. Statistics relating to the private sectors of the economy are based on the "National income and product" accounts of the Department of Commerce, while the Federal Government account is based mainly on "Cash receipts from the public" and "Cash payments to the public" as computed by the Bureau of the Budget. Federal cash receipts and payments represent a consolidation of the United States budget with the Government trust and corporation accounts in which intragovernmental and noncash transactions have been eliminated. State-local cash receipts and payments are based on the national income and product series but are rearranged to approximate a cash basis.

The gross national product or income includes all those receipts or payments arising from current production. Receipts or payments involving only transfers of claims are omitted in totaling the sector accounts to arrive at the gross national product or income. Business receipts include corporate retained earnings plus inventory valuation adjustment and capital consumption allowances of all business. Government cash loans to the "rest of the world" are considered as a transfer payment and have been entered as a receipt in the international account. However, unilateral transfers or grants to foreign countries are included as a direct expenditure for goods and services of either consumers or government and do not appear at all in the international account.

The adjustments for receipts relating to gross national product are required to attain equivalence between national income and product. They include the statistical discrepancy and the operating surplus of Government enterprises less subsidies. Other adjustments arise from the fact that the basis of accounting for the income and product series differs from that used in Government cash receipts and payments, particularly in the timing of receipts or payments, and that the cash concept of Government operations is somewhat more inclusive than that incorporated in the income and product series.

A fuller explanation of the Nation's Economic Budget may be found in Appendix A to the Annual Review of the Council of Economic Advisors, included in the *Economic Report of the President to Congress.*

Aggregate income.—The aggregate income statistics presented in tables 312–318 are of three general types: gross national product or expenditure, national income (by

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

distributive shares and by industrial origin), and income payments to individuals by States. **Gross national product** is the market value of the output of goods and services produced by the Nation's economy, before deduction of depreciation charges and other allowances for business and institutional consumption of durable capital goods. Other business products used up by business in the accounting period are excluded. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Gross national product comprises the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. Gross national product differs from national income mainly in that no allowance is made for depreciation or for indirect business taxes, both of which items constitute expenses in the computation of business net incomes.

National income is the aggregate earnings of labor and property which arise from the current production of goods and services by the Nation's economy. Thus, it measures the total factor costs of the goods and services produced by the economy. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Earnings are recorded in the forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings.

National income originating by industry is the sum of factor costs incurred by the industry in production. Hence, it is the net value added to production by the industry, measured at factor costs.

Personal income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private pension and welfare funds are classified as "persons".

Income payments to individuals is a measure of income received from all sources during the calendar year by residents of each State. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief; labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's cash terminal leave payments; and State government bonuses to veterans of World War II. For discussion of distribution by State, see headnote, table 318.

Size distribution of income.—The statistics on the size distribution of income presented in tables 319–328 are based on data collected in various field surveys of income which have been conducted since 1939. The primary purpose of these field surveys was to show the distribution of families or persons by income levels rather than the aggregate amounts of income received by these families. Whereas the aggregate income data provide an indication of the level of total purchasing power, the field survey size distribution data, by showing the numbers and kinds of families and persons in each income bracket, provide an indication of the distribution of purchasing power in the population. In each of these field surveys trained enumerators interviewed representative samples of the civilian noninstitutional population with respect to the income received by the respondents or their families during the previous year.

The income represented in tables 322–328 is consumer money income, defined as the sum of civilian money wages and salaries; net farm entrepreneurial income; net nonfarm entrepreneurial income from business or profession; interest, dividends, and periodic income from estates and trusts; rents and royalties; armed forces pay of per-

Digitized for FRASER

Federal Reserve Bank of St. Louis

sons living in private households at the time of the survey; dependency allotments and contributions from members of the armed forces; veterans payments; social security payments, unemployment and workmen's compensation, pensions and assistance; and miscellaneous items such as periodic contributions for support from persons not in the household, periodic payments from insurance policies or annuities, and alimony. The income is for the calendar year and is before deduction of income taxes (except for 1944 Bureau of Labor Statistics data in table 321) or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is comparable with consumer money income. The nearest approximation is personal income.

Expenditures and savings.—The Bureau of Labor Statistics most recent survey of family income, expenditures, and savings on a Nation-wide basis is for the year 1944. The Survey of Prices Paid by Consumers in 1944 was based on a sample of 1,700 families and single persons in 28 metropolitan districts and 20 cities with populations under 50,000 outside of metropolitan districts. These places were selected to represent (with respect to region, State and city size) all cities in the United States with a population of 2,500 or more.

For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. A single person is one who lives alone or with unrelated people in a private home, lodging house, or hotel. Since 1945, the Bureau has made similar surveys of family expenditure in three cities each year to obtain data necessary to check the prices and weighting patterns used in the consumers' price index; 1945 expenditure data were obtained for Birmingham, Ala.; Indianapolis, Ind.; and Portland, Oreg. (see *Monthly Labor Review,* June 1948); 1946 data for Milwaukee, Wis.; Scranton, Pa., and Savannah, Ga. (available upon request to the Bureau of Labor Statistics); 1947 data for Washington, D. C.; Manchester, N. H.; and Richmond, Va. (see *Monthly Labor Review,* April 1949); and 1948 data for Denver, Colo.; Detroit, Mich.; and Houston, Tex. (available in 1950).

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics,* series A 117–133") provide cross-references, where applicable, to *Historial Statistics of the United States, 1789–1945.* In that historical supplement to the *Statistical Abstract,* statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

[1] Preliminary; represents later estimate than in tables 311 and 314.
[2] Includes construction expenditures for crude petroleum and natural gas drilling; and, for 1939–49, major additions and alterations to residential buildings, profit margins of residential builders, residential land development costs, settlement and allied charges, engineering and architectural fees, and value of construction of a few minor types of nonresidential structures.
[3] Classification of purchases of goods and services into war and nonwar conforms, in general, to Daily Treasury Statement classification of general and special account expenditures. War purchases include also that part of capital formation of government enterprises attributable to war activities. Government contributions to National Service Life Insurance Fund are classified as war; all other government contributions for social insurance, as nonwar.
[4] Consists of sales abroad and domestic sales of surplus consumption goods and materials.

No. 313.—Personal Consumption Expenditures: 1939 to 1949

Millions of dollars. Represents market value of purchases of goods and services by individuals and nonprofit institutions and value of food, clothing, housing, and financial services received by them as income in kind. Includes rental value of owner-occupied houses, but not purchases of dwellings, which are classified as capital goods. Includes expenditures by Federal civilian and military personnel temporarily abroad]

No. 314.—Gross Private Domestic Investment and its Components: 1929 to 1949

[In billions of dollars. Consists of acquisitions of newly produced capital goods by private business and nonprofit institutions and of value of change in volume of inventories held by them; covers all private new dwellings, including those acquired by owner-occupants]

CLASS	1929	1933	1939	1941	1943	1945	1946	1947	1948	1949 [1]
Gross private domestic investment, total [2]	15.8	1.3	9.9	18.3	5.7	10.7	29.5	31.1	45.0	36.8
Nonfarm producers' plant and equipment, total [2]	9.8	2.3	5.7	9.3	4.6	8.7	16.0	20.6	24.7	23.2
Equipment [3]	5.7	1.6	4.0	6.6	3.5	6.3	10.8	14.6	17.3	16.4
Construction [2 4]	4.1	.7	1.7	2.7	1.1	2.4	5.2	6.0	7.4	6.8
Farm equipment and construction [5]	1.1	.3	.8	1.3	.9	1.4	2.0	3.1	3.9	4.0
Residential construction (nonfarm) [2]	2.8	.3	2.7	3.4	1.0	1.1	4.1	6.6	9.1	8.8
Other private construction [6]	.5	.1	.2	.3	(7)	.2	.6	.7	1.0	1.2
Net change in business inventories	1.6	—1.6	.4	3.9	—.9	—.7	6.7	.1	6.5	—.4
Nonfarm	1.8	—1.3	.3	3.4	—.5	—.6	6.9	2.2	5.1	—1.0
Farm	—.3	—.3	.1	.5	—.4	—.1	—.2	—2.2	1.3	.6

[1] Estimates based on incomplete data.

[2] Beginning 1939, includes certain outlays incident to construction which have not yet been estimated for years prior to 1939. For further details, see *Survey of Current Business*, July 1949, p. 7.

[3] Total producers' durable equipment, less "farm machinery and equipment" and farmers' purchases of "tractors" and "business motor vehicles." These figures assume that farmers purchase 85 and 15 percent, respectively, of all tractors and motor vehicles used for productive purposes.

[4] Industrial buildings, public utilities, gas and oil well drilling, warehouses, office and loft buildings, stores, restaurants, garages, and hotels.

[5] Farm construction (residential and nonresidential), plus "farm machinery and equipment" and farmers' purchases of "tractors" and "business motor vehicles." (See footnote 3.)

[6] Includes religious, educational, social and recreational, hospital and institutional, and miscellaneous nonresidential.

[7] Less than $50,000,000.

No. 318.—Income Payments to Individuals, by States: 1929 to 1948

[Income payments are distributed among States on a where-received basis (with exception of wages and salaries, as noted below). Only payments made to residents are included in estimates for continental United States and individual States. Per capita income payments are derived by division of total income payments by total population excluding Federal civilian and military personnel stationed outside continental United States. In five instances, however, income was transferred from place of recipients' employment to place of residence before computation of per capita income. These are New York, New Jersey, District of Columbia, Maryland, and Virginia. In this connection, it should be noted that the wage-and-salary component of total income payments is allocated by States on basis of State of employment, rather than of residence. For all States, except the five listed above, it is assumed that State of employment is identical with State of residence. For definition of income payments to individuals, see text, p. 259]

Highest tenth	33	32	100	100	31	29	100	100

[1] Estimated liability on Federal income tax, excluding tax on capital gains. Tax liability was not obtained directly from interviews or from tax returns, but from comprehensive data on family composition and income obtained in connection with Consumer Finances Surveys. Certain improvements in techniques of estimating tax liability were made in 1949 Survey so that results should be somewhat more reliable than in 1948. (See the *Federal Reserve Bulletin*, July and August 1949.)

Source: Board of Governors of the Federal Reserve System. Based on data from 1948 and 1949 Surveys of Consumer Finances, conducted by Survey Research Center of University of Michigan for the Board of Governors.

No. 320.—Percent Distribution of Family Liquid Assets and Saving, by Income Groups: 1948

[National estimate based on sample interview survey of 3,068 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1949. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps. For liquid asset holdings of individuals and businesses, see table 450, p. 402]

Annual 1948 money income before taxes	Liquid assets [1]	Positive saving [2]	Negative saving [2]	Net saving [2]
All income groups	**100**	**100**	**100**	**100**
Under $1,000	3	1	19	−18
$1,000–$1,999	5	3	12	−7
$2,000–$2,999	10	9	17	(3)
$3,000–$3,999	13	15	15	16
$4,000–$4,999	10	13	11	16
$5,000–$7,499	22	22	17	27
$7,500 and over	37	37	9	66

[1] Liquid assets include all U. S. Government securities, checking accounts, and savings accounts held at time of survey in early 1949. Currency is excluded.

[2] Positive saving comprises the saving of all family units with money incomes in excess of expenditures, negative saving comprises the dissaving of all family units with expenditures in excess of money incomes, and net saving (plus or minus) is positive saving less negative saving for all family units combined. The survey does not undertake to measure directly consumer expenditures and taxes but measures the saving of each family by obtaining detailed information on the changes in the various asset and liability items that make up each unit's balance sheet of saving. The saving of each unit during the year is computed by subtracting algebraically the total change in its liabilities (plus or minus) from the total change in its assets (plus or minus). Positive saving results from a larger increase in assets than in liabilities or a larger decrease in liabilities than in assets. The reverse is true for negative saving. The more important asset and liability items for which information is obtained are changes in liquid asset holdings, changes in consumer indebtedness, net sales or purchases of stocks and bonds, payments of life insurance premiums, payments to retirement funds, net sales and purchases of houses, payments on house mortgages, house improvements, and investment or withdrawal of investment in unincorporated businesses. Capital gains or losses are excluded from saving.

[3] Less than one-half of 1 percent.

No. 321.—Average Money Income, Expenditures and Savings of Families and Single Persons in Cities, by Income Class: 1944

[Estimates based on sample survey of 1,700 consumer units in cities of 2,500 inhabitants or more. Data relate to all civilians except inmates of institutions. Families are defined as economic units of two or more persons contributing to or mainly dependent on a common or pooled income. Single persons are those who live alone or as lodgers or servants in private homes, rooming houses or hotels]

[1] Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

[2] Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

[3] Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

[4] Includes expenditures for alcoholic beverages.

[5] Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

[6] Value of bonds purchased less those cashed.

[7] Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

No. 322.—Distribution of Families and Individuals in Households, by Total Money Income, Urban and Rural: 1945 to 1948

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Individual" is used to refer to a person living alone or with persons not related to him. See source for evaluation of sampling reliability]

No. 328.—Median Wage or Salary Income of Persons 14 Years of Age and Over with Wage or Salary Income, by Color and Major Industry Group, by Sex: 1939 and 1948

[Data based on sample (see source for evaluation of sampling reliability), and restricted to persons who were wage or salary workers at time of survey. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, armed forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. In 1940 census persons were classified as with or without other income on basis of answers to inquiry as to whether $50 or more of income was received from sources other than money wages or salaries. A similar classification was made in 1947 data by comparing amounts of money wage or salary income and total money income. In addition, farmers were classified as with nonwage income on the assumption that they had at least $50 of income in kind. Median wage or salary income based on number of persons reporting $1 or more of wage or salary income. For definition of median, see headnote, table 14, p. 13.]

12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 28 commodities; indexes of food prices at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

The **wholesale price index** measures average changes in commodity prices of about 850 commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible the prices are f. o. b. point of production or sale. In the case of some commodities, prices quoted in organized commodity markets are used.

Commodities are priced in terms of a given specification at stated terms of trade. Most of the commodities are represented by a single quotation. In computing the index the price of each article is weighted by the quantities marketed during a representative period—since 1934, the period 1929–1931. Indexes are computed for 10 major commodity groups, 49 subgroups and 5 economic groups.

Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one group are included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, are included among both farm products and foods. Duplication also occurs between the metals and metal products and building materials groups. However, in computing the index for all commodities, such articles are counted only once.

The **consumers' price index** measures average changes in retail prices of goods, rents and services, weighted by quantities bought in 1934–36 by families of wage-earners and lower-salaried clerical workers in large cities, whose annual incomes averaged $1,524 in 1934–36. It does not measure changes in the total amount families spend for living or relative differences in prices or living costs between cities. The list of items priced for the index includes approximately 192 goods and services. For many goods a number of different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. Indexes for the major groups other than food have been compiled since September 1940, from price data collected in 34 cities. Since July 1947, the following schedule has been in effect:

Food prices and indexes, for 56 cities each month;
Fuel prices and indexes for 34 cities each month;
Commodities (other than food and fuel) and services indexes for 10 cities monthly and for 24 additional cities quarterly on a rotating cycle; beginning in September 1949, quarterly in 24, monthly in 10 cities;
Rents quarterly for 34 cities, on a rotating cycle;
All items and group indexes for 10 cities monthly, and for 24 additional cities quarterly on a rotating cycle;
National indexes (average of large cities) for all items and groups, monthly, based upon prices in the cities surveyed and estimated changes in the unpriced cities.

Federal Reserve Bank of St. Louis

The weights used in calculating the index are based on studies of actual expenditures by families of wage-earners and lower-salaried workers. A study conducted in 1917–19 provided the weights used from 1913 to 1935. Since 1935 the index has been based on 1934–36 expenditure patterns.

The **retail food price indexes** presented in this section for periods from January 1935 to March 1943 are based on the distribution of expenditures as shown by the 1934–36 study of expenditures of wage earners' and lower-salaried clerical workers' families. In March 1943, the weights for this index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, and 50 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

The Bureau of Agricultural Economics prepares currently **indexes of prices received for farm products and of prices paid by farmers.** (See text, p. 601, and tables 692 and 693, p. 582.)

In comparing the **movement of the indexes of consumers' prices and of the prices paid by farmers** for commodities bought for family living (table 692), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

A number of **privately compiled indexes of wholesale and retail prices** provide some groupings not found in the official indexes. For example, the National Industrial Conference Board prepared current indexes for both a prewar and a wartime budget. Special purpose indexes have not been included in this section.

The user of price indexes is reminded that the margin of error in price statistics due to unrecorded changes in quality, in discounts, and in undercover charges is greater in war than in peacetime.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series L 15–25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 331.—Wholesale Prices—Indexes, All Commodities and by Economic Classes: 1930 to 1949

[Figures in column heads indicate current number of quotations. Indexes of National Bureau of Economic Research are weighted arithmetic means for 680 price series, weights being based upon average value of production in 1927 and 1931. For method of computing Department of Labor index, see general note, p. 276. For Department of Labor publications in which data appear, see source note, table 330]

YEAR	DEPARTMENT OF LABOR 1929=100				NATIONAL BUREAU OF ECONOMIC RESEARCH 1929=100				
	All commodities	Raw materials	Semi manufactures	Manufactured products	All commodities	Producers' goods	Consumers' goods	Durable goods	Nondurable goods [1]
	877	106	94	677	680 [2]	418 [2]	292 [2]	222 [2]	469 [2]

[1] Perishable and semidurable.

[2] Sum of number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 332.—Indexes of Spot Market Prices of 28 Commodities: 1939 to 1949

[August 1939=100. Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 28 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

PERIOD	General Index	IMPORT AND DOMESTIC		Domestic agricultural	FOODSTUFFS AND INDUSTRIAL	
		Import commodities	Domestic commodities		Foodstuffs	Raw industrial
	(28)	(11)	(17)	(7)	(11)	(16)

13. Elections

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 155 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Federal offices. The number of registered voters in 1942 in each city of 25,000 inhabitants or more is given in the Cities Supplement to the Statistical Abstract.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 27–31) provide cross-references, where applicable, to *Historical Statistics of the United States 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 347.—Vote for Presidential Electors, by Major Political Parties: 1888 to 1948

[See also *Historical Statistics*, series P 27–31]

[1] Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928–44 exclude void and blank ballots.

[2] For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912 and 1916, Progressive; 1920, Farmer-Labor; 1928 to 1948, miscellaneous. For 1924, votes for La Follette-Wheeler electors, variously designated as Independent Progressive, Progressive, Socialist, Socialist and Independent, Farmer-Labor, etc. [3] Democrat-Populist.

[4] Socialist-Labor only. In 1924 practically all Socialist votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties. (See note 2.) [5] Workers.

[6] Included with miscellaneous are 798 Union votes cast in endorsement of Republican candidate.

[7] Included with miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.

[8] Included with miscellaneous are 496,405 American Labor and 329,235 Liberal votes cast in endorsement of Democratic candidate.

[9] Included with miscellaneous are 1,169,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); included with Democratic are 222,562 Liberal votes cast for Democratic nominees.

No. 350.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1940

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 6 below)]

[1] Number of Representatives not to exceed 1 for each 30,000 inhabitants.
[2] See headnote.
[3] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 6.
[4] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 6.
[5] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.
[6] Assigned after apportionment.
[7] Included in apportionment act in anticipation of Statehood.
[8] Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 352.—Vote for United States Representatives, by Major Political Parties, by States: 1946 and 1948

[In each State, totals represent the sum of votes cast in each Congressional District, except as follows. In New Mexico and North Dakota (and in Arizona in 1946), no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, and Vermont only one representative is elected. In Connecticut and Ohio, representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidates in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

STATE	1946				1948			
	Total	Democratic	Republican	Other parties	Total	Democratic	Republican	Other parties

[1] In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

[2] Includes 208,892 blanks.

[3] Democratic-Farmer-Labor party.

[4] Included in "Other" are endorsing votes cast for major party candidates, as follows: in 1946, for Democrats 290,046 and for Republicans 17,599; in 1948, for Democrats 263,339 and for Republicans 31,735. Democratic total for 1946 includes 27,341 votes cast in endorsement of American Labor nominee. Republican total for 1948 includes 115,824 endorsing votes cast for Democrats.

14. Federal Government Finances

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for appropriations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from *The Budget of the United States Government* for the fiscal year ending June 30, 1951, are presented in tables 358–362. The Treasury Department publishes a *Digest of Appropriations* each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the *Combined Statement of Receipts, Expenditures and Balances,* which is an abstract of the books of the Treasury relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the *Daily Statement of the United States Treasury,* which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a *Statement of the Public Debt,* as of the end of the month, on the first working day of the next month, and certain other special statements on the 15th day of each month. The *Treasury Bulletin,* a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are dealt with in the *Circulation Statement of United States Money* (monthly) and *Prices and Yields of Public Marketable Securities . . .* (monthly), both issued by the Treasury Department. See tables 425, 426, and 482, pp. 383, 384, and 421.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department in accordance with Section 63 of the Internal Revenue Code, which requires the preparation and publication annually of statistics reasonably available with respect to the operation of the income tax laws. The annual report, *Statistics of Income, Part 1,* is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income, Part 2,* also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. Data from these reports appear on pages 321–337, 438–440, and 444.

ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the General Fund of the Treasury, from which all expenditures are made. No money may be drawn from the Treasury except in accordance with appropriations made by law.

Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. General accounts.—The principal categories of general account receipts are income taxes, miscellaneous internal revenue, employment taxes, customs, and miscellaneous receipts, such as proceeds from the sale of surplus property.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) annual appropriations, which are available for incurring obligations only during a specified fiscal year; (b) multiple-year appropriations, which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year) appropriations, which are available for incurring obligations until the appropriation is exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific appropriations, which are fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite appropriations, which are indefinite amounts (so much as may be necessary) provided by permanent legislation without annual action of Congress, such as the indefinite appropriation to cover interest on the public debt.

2. Special accounts.—Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items are those receipts for the reclamation fund, Alaska Railroad fund, and receipts under the Mineral Leasing Act, under the Department of the Interior, and the national forest funds, under the Department of Agriculture.

3. Trust accounts.—Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal old-age and survivors insurance trust fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as explained below, and the basis used is noted at the head of each table.

Daily Treasury Statement.—Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the *Daily Treasury Statement.* This statement is compiled from the latest daily financial reports received from Government depositaries and Treasury offices holding Government funds, and, because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Effective with the beginning of the fiscal year 1947 expenditures of several departments and establishments serviced by the Division of Disbursement, Treasury Department, are reported in the *Daily Treasury Statement* on the basis of checks issued. A clearing account is provided to take care of outstanding checks. Beginning July 1, 1948, such expenditures are reported as of the day on which checks are issued in payment of obligations, through the use of teletype facilities.

Two important changes were made during the fiscal year 1949 in the method of reporting budget receipts and expenditures, both in the *Daily Treasury Statement* and in the Budget document: (1) Effective July 1, 1948, payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings, were excluded in reporting both receipts and expenditures, and (2) effective January 1, 1949, amounts refunded by the Government, principally for the over-payment of taxes, are reported as deductions from total receipts rather than as expenditures.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

Public debt accounts.—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

Warrants issued.—By law, warrants evidence the formal covering of receipts into the Treasury. The term when relating to expenditures may represent payments to claimants, but the greater number are merely advances of funds to disbursing officers for expenditure. Tables when compiled on this basis show expenditures considerably in advance of actual disbursement by disbursing officers.

Checks issued.—This term relates to expenditure statements made up on the basis of checks drawn by disbursing officers.

Collection basis.—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer.

Further details with respect to Treasury accounting bases and procedures are shown on pages 351–353 of the *Annual Report of the Secretary of the Treasury* for the fiscal year 1949.

Public and private debt.—Data from a special study on debt by the Office of Business Economics of the Department of Commerce are presented in this section. (See table 383.) These data are published annually in the *Survey of Current Business.*

Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired.

Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

The net debt concept for each of the four sectors can be summarized as follows: Federal Government net debt is that owed to all other sectors of the economy except the Federal Government proper and its corporations and agencies; State and local government net debt is that owed to all other economic entities except State and local governments; corporate net debt is that owed to all other entities (including corporations) except to corporate members of an affiliated system; and private noncorporate net (or gross) debt is summation of all forms of legal indebtedness except that among individuals and unincorporated nonfinancial business firms. Data represent balances of debts outstanding at end of calendar years, except data for State and local governments which are for June 30 of each year.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 109) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.* In that historical supplement to the *Statistical Abstract,* statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

[1] Excludes debt retirements and beginning 1931, refunds of receipts and capital transfers (see gen. note, p. 304).
[2] Excludes civil expenditures under War and Navy Depts. in Washington through 1915. Subsequent to 1915 includes all expenditures made by Dept. of Army (including rivers and harbors and Panama Canal) and Dept. of Navy. Dept. of Army includes expenditures of Dept. of Air Force.
[3] On basis of warrants issued through 1930; thereafter, on basis of checks issued. Expenditures for Indians exclude interest accounts, which are included in trust fund expenditures beginning 1940. Veterans' pensions represent expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration.
[4] Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office of Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, and expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932.
[5] Represents gross debt as of end of each period; e. g., 1800, 1810, etc.
[6] Years ending Dec. 31 through 1842; average for 1879–1800 begins Mar. 4, 1789; average for 1841-50 is for Jan. 1, 1841–June 30, 1850. See note 5 concerning gross debt.
[7] For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to $3,000,000,000) have been consolidated with budget expenditures.

No. 358.—Federal Government Expenditures by Organization Unit: 1942 to 1949

[**In millions of dollars.** For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in total to daily Treasury statement basis (which is partly checks issued and partly checks paid). This table includes budget expenditures and trust account expenditures and investments. "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Two important exceptions are appropriations from general fund to Federal old-age and survivors trust fund and refunds of receipts, both of which are excluded from expenditures and deducted from receipts. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included; see also table 361). For further explanation, see general note on p. 304; also Budget, 1951, p. A2]

No. 359.—Receipts From and Payments to the Public by the Federal Government: 1929 to 1949

[**In billions.** For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1950 Budget, pp. 1375-1376, headnote to table 358, and general note, p. 304]

YEAR	Receipts from the public [1]	Payments to the public [1]	Excess of receipts from (+) or payments to (−) the public	Receipts from exercise of monetary authority [2]	Excess of Treasury cash income (+) or outgo (−) [3]	Decrease (+) or increase (−) in Treasury cash balance	Decrease (+) or increase (−) in Exchange Stabilization Fund balance	Net borrowing (−) or repayment of borrowing (+) from the public

1949	41.6	40.6	+1.0	(4)	+1.0	+1.5		+2.5

[1] Net of refunds of receipts.
[2] Consists of the increment resulting from reduction in weight of the gold dollar and the seigniorage on silver.
[3] Comparable to "net cash operating income or outgo" currently published in monthly *Treasury Bulletin*.
[4] Less than $50 million.

No. 361.—Budget Appropriations and Other Authorizations for Federal Agencies, by Organization Unit: 1949

In millions of dollars. For year ending June 30. The Budget total of "appropriations and other authorizations" represents total of new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total includes "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend from public debt receipts." "Net new appropriations" represent total of all appropriations less appropriations enacted to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeeding fiscal year the unused balance of an appropriation which would otherwise expire for obligation purposes. "Contract authorizations" permit placement of specific obligations or contracts but require subsequent appropriations to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). "Authorizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance certain types of Government programs. See also general note, p. 304, and headnote to table 358]

No. 368.—Individual and Taxable Fiduciary Income Tax Returns—Summary: 1925 to 1947

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, the filing requirements applicable to individuals (citizens or residents of the United States), for the years tabulated below, are as follows: (1) Single, or married and not living with husband or wife: for 1925 and 1930, net income of $1,500 or over; 1935, $1,000 or over; and for 1940, gross income of $800 or over; (2) Married and living with husband or wife: for 1925 and 1930, combined net income of $3,500 or over; 1935, $2,500 or over; and for 1940, combined gross income of $2,000 or over; (3) For 1944–47, every individual with gross income of $500 or over; for refund purposes, returns are also required with respect to gross incomes under $500 from which taxes have been withheld. (For 1925–35, returns are required to be filed by individuals having gross income of $5,000 or over if single, or married and not living with husband or wife; or having combined gross income of $5,000 or over if married and living with husband or wife; regardless of net income.) *Data for returns showing no net income or no adjusted gross income, filed in accordance with these provisions, are not included in statistics given here.* Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1938, for every trust having net income of $100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144–147]

[1] Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

[2] *Net income, tabulated for years prior to 1944*, is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. *Adjusted gross income, tabulated for 1944–47*, is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property.

[3] Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1944–47 is after deduction of such credits.

[4] Includes defense tax.

[5] For individual returns only, 1944 and later years.

Average adjusted gross income per return	$2,449	$2,497	$2,430	$2,568	$2,755	$2,743	$8,855
Average tax per return	$335	$348	$345	$309	$332	$330	$1,573

[1] Adjusted gross income shown for 1943 is total income less net losses from rents and royalties, from business and profession, from partnerships, and from sales or exchanges of property; for 1944–47, see note 2, table 368.

[2] Salaries, wages, etc., include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but for 1944–47 exclude wages of less than $100 per annum from which no tax is withheld, reported on Form W–2. (See note 12.)

[3] Dividends received exclude those received through partnerships and fiduciaries; for 1943 exclude those reported on Form 1040A, and for 1944–47 exclude those reported on Form W–2. (See note 12.)

[4] Interest received excludes that reported on Form 1040A for 1943 and on Form W–2 for 1944–47. (See note 12.) Partially tax-exempt interest consists of amounts received directly, or through partnerships and fiduciaries, on certain Government obligations issued prior to Mar. 1, 1941, and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Taxable interest, Government and other, excludes that received through partnerships and fiduciaries, except that on fiduciary returns taxable interest on Government obligations includes that received through partnerships and fiduciaries.

[5] Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

[6] Net profit from business is excess of gross receipts over business expenses and, for 1944–47, net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and, for 1944–47, net operating loss deduction over gross receipts from business.

[7] Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

[8] Capital assets consist of all property held by taxpayer *other than* (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and capital loss carry-over from the years 1942–46, inclusive, not previously deducted. Allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T in 1944–47) computed without regard to gains and losses from sales of capital assets, or to $1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see Statistics of Income, Part 1.

[9] Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) for 1943–47 also includes real property used in trade or business.

[10] Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. For 1943, excludes annuities reported on Form 1040A (see note 12); for 1944–47, annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

[11] Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

[12] Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes for 1943, dividends, interest, and annuities reported on Form 1040A, and for 1944–47 wages not subject to withholding, dividends, and interest, not exceeding in total $100 per return reported on Form W–2.

No. 371.—Individual Income Tax Returns, by Family Relationship: 1942 to 1947

[**Money figures in thousands of dollars.** See headnote, table 368]

FAMILY RELATIONSHIP	1942	1943	1944	1945	1946 [1]	1947 [1]
Number of returns	**36,456,110**	**43,506,553**	**46,919,590**	**49,750,991**	**52,600,470**	**54,799,936**
Joint returns of husbands and wives	20,230,892	22,231,629	24,042,777	24,586,056	26,332,777	26,010,512
Separate returns of husbands and wives:						
Men [2]	988,890	1,778,379	1,828,559	1,932,840	2,062,824	2,542,288
Women [2]	1,100,643	2,042,144	2,037,356	1,993,196	2,041,965	2,690,948
Separate community property returns:						
Men [2]	380,314	955,929	632,924	1,029,782	1,055,873	1,594,446
Women [2]	376,134	936,666	642,285	995,066	989,978	1,643,794
Heads of families 1942–43:						
Men [3]	1,360,991	1,268,241				
Women [3]	1,140,781	1,558,534				
Not heads of families 1942–43, and returns of single persons 1944–47:						
Men [3]	5,326,465	5,421,119	7,489,589	8,790,401	10,581,162	10,767,013
Women [3]	5,551,000	7,313,912	10,246,100	10,423,650	9,535,891	9,550,935
Net income (1942–43); adjusted gross income (1944–47) [4]	**78,589,729**	**99,209,862**	**116,714,736**	**120,301,131**	**134,330,006**	**150,295,275**
Joint returns of husbands and wives	48,818,442	57,323,889	68,814,105	68,726,636	77,003,356	82,321,452
Separate returns of husbands and wives:						
Men	4,859,582	7,723,044	8,932,900	9,405,380	10,672,264	12,202,471
Women	2,160,896	3,838,856	4,516,423	4,541,274	5,121,373	6,190,606
Separate community property returns:						
Men	1,525,680	3,279,514	2,663,921	4,050,276	4,574,918	7,117,655
Women	1,457,142	3,167,591	2,586,072	3,735,452	4,246,183	5,979,593
Heads of families 1942–43:						
Men [3]	2,720,801	2,836,538				
Women [3]	1,707,977	2,519,820				
Not heads of families 1942–43 and returns of single persons 1944–47:						
Men [3]	8,397,631	8,808,275	14,035,945	14,526,588	17,759,551	20,266,550
Women [3]	6,941,577	9,712,335	15,165,369	15,315,523	14,952,367	16,216,945

[1] Preliminary.
[2] An unequal number of returns of husbands and wives results from use of sampling in certain income areas, and from the fact that some returns lack sufficient information to identify the family relationship.
[3] Single persons or married persons not living with husbands or wives.
[4] See note 2, table 368.

No. 375.—Corporation Income Tax Returns—Summary: 1925 to 1947

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934–41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940–41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 438–440 and 444. See also *Historical Statistics*, series P 152–164]

[Money figures in millions of dollars]

ITEM	1925	1930	1935	1940	1944	1945	1946	1947 [1]

Deficit [3]	1,963	4,878	3,469	2,284	819	1,026	1,992	1,959
Dividends paid in cash and assets other than own stock	372	1,361	1,290	200	89	163	255	143
Inactive corporations, number of returns	[7]	55,700	56,518	43,741	34,329	33,335	35,211	35,876
TAXABLE EXCESS PROFITS TAX RETURNS [8]								
Number of returns	----	----	----	13,440	55,912	52,097	11,053	----
Excess profits net income	----	----	----	2,998	20,472	14,165	2,191	----
Adjusted excess profits net income	----	----	----	912	12,936	8,368	1,474	----

[1] Preliminary.

[2] Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

[3] Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940–47, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 509, p. 439). Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

[4] Includes defense tax.

[5] Tax repealed.

[6] Tax repealed. Amount shown for 1946 consists only of prorated tax for 1945 portion of fiscal year returns ending in July–November 1946.

[7] Number of returns with no net income, for 1925, includes returns of inactive corporations, not available separately.

[8] For tax reported, see above.

[1] A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of total receipts.

[2] For changes in classification affecting comparability of data, see "Statistics of Income for 1938, Part 2."

[3] Less than $500,000.

[1] For 1942, return is required of every citizen or resident of U. S. who transferred by gift during calendar year to any one donee, property exceeding $4,000 in value or who, regardless of value, made a gift of future interest in property or a gift in trust; for 1943–45, return is required for transfer of property by gift, including gifts in trust, exceeding $3,000, or for gift of future interest in property, regardless of value. A nonresident alien is similarly required to file return if gift consists of property situated in the United States.

[2] There is allowed exclusion of first $4,000 of gifts made to any one donee during the calendar year 1942, except gifts in trust or of future interest in property; for 1943–45, there is allowed exclusion of first $3,000 of gifts made to any one donee during calendar year, except gifts of future interest in property.

[3] Specific exemption may be taken in 1 year or spread over a period of years at option of donor. The specific exemption allowed for 1942 is $40,000, and for 1943–45 is $30,000; less the sum of amounts allowed in prior years.

No. 380.—Federal Estate Tax Returns—Summary: 1930 to 1945

[**All money figures in thousands of dollars.** An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (*a*) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds $50,000; (*b*) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds $100,000; (*c*)in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds $40,000; and (*d*) on or after Oct. 22, 1942, the value of whose gross estate exceeds $60,000; and (2) for estate of every nonresident alien who died (*a*) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (*b*) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds $2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

[1] Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

[2] Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

[3] Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

[1] See note 2, table 380.

[2] Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 3.)

[3] The specific exemption tabulated (a) for estates subject to additional tax is $60,000 under 1942 act; $40,000 under 1941, 1940, and 1935 acts: $50,000 under 1934 and 1932 acts; and (b) for estates subject to earlier acts is $100,000 under 1926 act; and $50,000 under 1924 and prior acts.

[4] Represents excess of total amount of funeral and administrative expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.

[5] Excess of gross estate over allowable deductions, exclusive of specific exemption.

[6] Net estate after deducting specific exemption of $100,000, except for returns filed under 1924 or prior acts for which specific exemption is $50,000.

[7] Applies only to estates of individuals who died subsequent to June 6, 1932.

[8] Credits for (a) estate, inheritance, legacy, or succession taxes paid to States, etc., and (b) gift taxes paid to the Federal Government.

[9] Less than $500.

[1] Figures for 1800–50 are as of Jan. 1.
[2] Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.
[3] Excludes bonds issued to Pacific railways and Navy pension fund.
[4] Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.
[5] Less than $500,000. [6] Includes old Treasury (war) saving securities for 1925.

[1] Holdings of commercial banks and mutual savings banks for 1925 to 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years. U. S. savings bonds, Series A–F, included at current redemption value.

[2] Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury.

[3] Consists of commercial banks, trust companies, and stock savings banks in United States and in Territories and insular possessions. Figures exclude securities held in trust departments.

[4] Includes partnerships and personal trust accounts.

[5] Not available separately. Combined totals of these items as follows: 1925, $13,874,000,000; 1930, $9,097,000,000; and 1935, $11,511,000,000.

[6] Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international acounts in this country.

[7] Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

No. 386.—Interest-Bearing Governmental Securities—Estimated Ownership Outstanding, by Issuer: 1941 to 1949

[Figures represent par values with following exceptions: (1) Holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by U. S. and of State and local governments, Territories, and possessions are book values, (2) holdings of these securities by individuals are residuals, and so deviate from par values in those cases where figures for commercial and mutual savings banks are book values, (3) in the case of data which include U. S. savings bonds, Series A–D, E, and F, figures for these bonds represent current redemption values]

[Par value. In billions of dollars]

[1] Includes partnerships, personal trust accounts.
[2] Includes savings and loan associations, dealers and brokers, and investments of foreign balances in this country.
[3] Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.
[4] Data on daily Treasury statement basis. Since data exclude noninterest bearing debt, they differ slightly from those in table 385. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury and transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in statement published in Daily Treasury Statement for fiscal year.
[5] Less than $50 million. [6] Excludes obligations of the Philippine Islands after June 30, 1946.

No. 387.—Interest-Bearing Securities Issued by All Governmental Units in the United States—Estimated Amounts Outstanding, by Tax Status and Issuer: 1913 to 1949

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exceptions to par value, see table 386]

[Par value. In millions of dollars]

15. State and Local Government Finances and Employment

Sources.—Statistics in this section are from the Bureau of the Census, Department of Commerce. Most of the tables are based upon recent reports in the regular Census series on *State Finances, City Finances, Governmental Finances in the United States,* and *Government Employment.* Some of the statistics here are from the most recent decennial Census of Governments, which related to the year 1942 and was designed to obtain and report basic data concerning all governmental units in the United States. A descriptive leaflet, *Census Bureau Publications on Governments,* is issued annually by the Bureau. Summary series of data based on annual and decennial Census reporting for years up to 1946 are available in the publication, *Historical Review of State and Local Government Finances.*

Compilation of data.—Financial statistics of States and large cities (those over 250,000 population) which appear in this section were mainly compiled by representatives of the Bureau of the Census directly from official accounts and records of these governments, with the advice and assistance of local officers and employees. Financial data for other local governments were compiled from audits, reports or tabulations available in State offices or obtained from the individual units by mail canvass. State and local employment data were also obtained by mail canvass. The Federal Government amounts which appear in certain tables relating to all levels of government are based upon data supplied to the Census Bureau by other Federal agencies.

Relation to State and local records.—Nation-wide statistics on governmental finances and employment must be compiled and presented in accordance with uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear in this section for particular States and large cities, although based upon their official records and reports, will not agree directly with specific amounts in such original sources except where particular segments of the government's accounts conform explicitly with standard Census reporting categories.

Terminology.—Financial statistics in this section relate primarily to "general government," as distinct from operation of enterprises and the finances of governmental trust and sinking funds. The terms "general revenue," "general expenditure" and "general debt" are applied accordingly. All tax amounts, however, are reported as general revenue; any tax collections deposited directly into trust or sinking funds are therefore included in general revenue and, as contributions to trust funds or provision for debt retirement, respectively, in general expenditure. As reported here, revenue excludes receipts from borrowings, and expenditure includes provision for debt retirement. The Census reports from which the various tables are drawn include detailed definitions of concepts and terminology.

Fiscal years.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governmental units, as summarized in table 394. Federal and State government amounts are for fiscal years ending on June 30 of the year specified, except for 7 States with earlier closing dates—3 in the same calendar year and 4 in the latter part of the preceding calendar year. Local government figures are for fiscal years ending in the specified calendar year except for the few units which close their fiscal years in the succeeding January.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics,* series P 188–201") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.* In that historical supplement to the *Statistical Abstract,* statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

[1] Includes Federal Government and 48 State governments.
[2] Incorporated places having more than 2,500 inhabitants.
[3] The City and County of San Francisco in California and the City and County of Denver in Colorado are counted as cities and not as counties.
[4] Following counties are counted only as cities because they are wholly or very largely consolidated with cities indicated: Orleans Parish with New Orleans City; Suffolk County with Boston City; Bronx, Kings, New York, Queens, and Richmond Counties, with New York City; Philadelphia County with Philadelphia City.
[5] Counties not organized as local governments.
[6] County areas of Armstrong, Shannon, Todd, Washabaugh, and Washington are unorganized as counties and are attached for administrative purposes to neighboring counties.

[1] Omits revenue and expenditure of incorporated places having less than 2,500 inhabitants, school districts overlying such places, townships, and special districts.
[2] Not available.
[3] A nonsegregable amount of capital outlay is included in "operation."
[4] Contains contributions to enterprises and to retirement and other trust funds for States from 1941 to 1945 and for cities for 1942. Other data refer only to contributions to retirement funds.
[5] Included in operation; amounts not separable.
[6] Comprises only school and highway grants; other grants included in "operation."
[7] Less than $500,000.
[8] Pension payments of city corporations and overlying local governments of cities having 30,000 inhabitants or more; originally included in "operation."

[1] Sources: Revenue, U. S. Treasury Department, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942, pp. 25–31; other data, special compilation by Bureau of Accounts, U. S. Treasury Department. Adjustments made in Federal data to conform to Bureau of Census classifications for reporting State and local government finances.

[2] Represents only those school districts classified by Census Bureau as independent units of government. School figures for other local governments are included with figures for those governments.

[3] Each of these Federal-State-local totals and State-and-local totals is less than the sum of amounts shown separately for the several components, because totals exclude duplicating intergovernmental fiscal aid.

[4] Included in "Earnings and miscellaneous."

[5] Omits $94 million for debt retirement reported by U. S. Treasury because payment is only nominally an expenditure and is not a charge against revenue.

[6] Included in "Other" public safety.

[7] Includes $21,111 million for war activities.

[8] Less than $0.5 million.

[9] For cities having populations over 100,000 only. Data for other local governments not available.

[10] Total is less than sum of "State" and "Local" because of exclusion of debts incurred by States for loans to local governments, which duplicate local government obligations held by States.

No. 402.—Summary of State and Local Government Finances, by State Area and Level of Government: 1942

[State-and-local aggregates of general revenue and general expenditure are less than the sum of "State" and "Local," because they exclude duplicating intergovernmental aid, i. e., that between State and local levels of government. Thus, both national and State-area aggregates for "Aid received" represent aid from only the Federal Government. See also *Historical Statistics*, series P 188–200, for total general revenue and total general expenditure of all State and local governments]

[In thousands of dollars]

[1] New borrowings are for general-government purposes only, consisting of long-term debt incurred during fiscal year other than by funding or refunding, plus any excess of issuance over redemption (i. e., excluding funding) of short-term debt.

[2] Includes direct redemption and payments into sinking funds for retirement of general debt, not debt incurred for enterprise purposes.

[1] Includes amounts for types of taxes not shown separately.
[2] Includes unincorporated businesses.
[3] Includes estimated amounts (totaling $76,913,000) for missing or incomplete items.
[4] Combined corporation and individual tax amounts as reported by 5 States (Ala., Ga., La., Mo., and S. C.) are tabulated with reported individual income taxes.
[5] Back taxes only; not counted with "Number of States using tax."
[6] Includes related license taxes.
[7] Comprises tax on banks and finance companies, soldiers' bonus excise and additional surtax and excise tax on corporations.
[8] Not available.

[1] Totals are rounded to include estimates for missing items.
[2] Includes health, public welfare, correction, and other general government functions.
[3] Principally alchoholic-beverage monopoly systems (operated by 16 States); also includes airports, harbors, ferries, and other State-operated enterprises.
[4] Nonschool data for a previous month.
[5] Data for State police included with highways.
[6] Data for public safety, except State police, included with "other" general government.
[7] Data for libraries included with general control.
[8] Data for State prisons included with public safety.
[9] Data for hospitals and institutions for the handicapped included with "other" general government.
[10] Data for toll bridges included with highways.
[11] Not available.
[12] Data for correction included with hospitals and institutions for the handicapped.
[13] Data for public safety, except police and alcoholic-beverage control, and for natural resources, except agricultural experiment stations and extension services, included with other.
[14] Data for public welfare included with employment security.
[15] Data for recreation and parks included with natural resources.
[16] Data for State prisons included with highways.
[17] Employee and pay roll data from separate sources; not strictly comparable.

[1] Totals are rounded to include estimates for missing items.
[2] Includes health, public welfare, correction, and other general-government functions.
[3] Principally alcoholic-beverage monopoly systems (operated by 16 States); also includes airports, harbors, ferries, and other State-operated enterprises.
[4] Nonschool data for a previous month.
[5] Data for State police included with highways.
[6] Data for public safety, except State police, included with "other" general government.
[7] Not available.
[8] Data for libraries included with general control.
[9] Information for State prisons included with public safety.
[10] Data for hospitals and institutions for the handicapped included with other general government.
[11] Data for toll bridges included with highways.
[12] Data for correction included with hospitals and institutions for the handicapped.
[13] Data for public safety, except police and alcoholic-beverage control, and for natural resources, except agricultural experiment stations and extension services, included with "other" general government.
[14] Data for public welfare included with employment security.
[15] Data for recreation and parks included with natural resources.
[16] Data for State prisons included with highways.
[17] Employee and pay roll data from separate sources; not strictly comparable.

Enterprise operations:									
Operating revenue	611	665	703	732	763	812	868	42.1	6.9
Operating expense (excludes depreciation)	332	364	399	417	463	540	616	85.9	14.2

[1] Not available. [2] For general-government purposes only.
[3] Includes amounts for functions not enumerated—correction, libraries, and recreation—and miscellaneous and unallocable operation expenditure.
[4] For cities with 1940 populations over 250,000. Aid paid to other governments for cities of 25,000 to 250,000 included in general expenditure for operation. [5] Not computed.
[6] For cities with 1940 populations over 100,000; not available for cities of 25,000 to 100,000.

No. 419.—Selected Items of City Enterprise Finances, by Type of Enterprise: 1948

[**Amounts in thousands of dollars.** For enterprises owned and operated by cities over 25,000 population]

ITEM	All city-operated enterprises	Water-supply systems	Electric light and power systems	Transit systems	Gas-supply systems	Port facilities	Airports	Other city-operated enterprises
Number of enterprises [1]	597	321	52	14	17	31	134	28
Operating revenue	867,876	368,094	184,375	238,711	25,288	24,378	11,262	15,768
Operating expense except depreciation	616,338	188,136	106,018	269,425	15,573	12,187	11,821	13,178
Non-operating revenue	39,741	4,880	2,055	5,292	231	25,326	1,802	155
Non-operating expense	116,905	51,916	7,568	42,693	401	9,783	2,429	2,115
Net contributions from city governments	112,495	6,969	357	82,084	46	7,280	11,790	3,969
Net contributions to city governments	60,388	33,511	16,336	212	5,418	2,932	357	1,622
Debt service	215,191	100,796	18,070	65,849	740	17,277	8,969	3,490
Interest	111,911	48,965	6,610	42,359	315	9,350	2,288	2,024
Provision for debt retirement	103,280	51,831	11,460	23,490	425	7,927	6,681	1,466
Gross debt at end of fiscal year	3,378,781	1,427,158	265,275	1,241,592	10,875	238,930	134,880	60,071

[1] Represents number of cities owning and operating each type of enterprise.

16. Banking and Finance

MONEY AND BANKING

Banking and monetary system.—Collection of banking and monetary statistics in the United States has been conditioned by the development of our banking and monetary system. Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to $5,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—Statistics showing the condition of banks are collected by the various agencies responsible for the supervision of banks. Subdivision of the field among these agencies and the increasing adoption of practically uniform report schedules has made it possible for these agencies to compile the data with little duplication.

The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1864 from these banks from three to six times annually and has tabulated and published summaries of these reports, showing the principal assets and liabilities, that is, total loans, United States Government securities, other securities, reserves, bankers' balances, interbank deposits, other demand deposits, and time deposits. National bank statistics are published in detail in the *Abstract of Reports of National Banks* (usually three times a year). The call report data are also published in the annual reports of the Comptroller although the detailed break-down of assets and liabilities is slightly different than in the abstracts.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit to the Federal Reserve banks their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in detail by the Board of Governors of the Federal Reserve System in the *Member Bank Call Report* (usually three times a year) and in summary form in the *Federal Reserve Bulletin*. *Banking and Monetary Statistics*, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which cover all but a small part of the commercial banking in the country. Beginning with June 30, 1947, a revised all-bank series is being tabulated twice a year by the Federal Deposit Insurance Corporation, replacing the three series previously compiled by the three Federal banking supervisory agencies. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

on the new all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Statistics of the Postal Savings System, which is under the management of the Post Office Department and which performs certain banking functions, are available monthly in the *Federal Reserve Bulletin* and annually in the *Report of Operations of the Postal Savings System.*

Currency.—Currency includes coin and paper money issued by the Government and by banks. It represents a relatively small part of the total media of exchange in the United States, for most of it is held in the form of bank deposits and most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers and not appearing in the official gold and silver export figures. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury.*

Government credit agencies.—Except for the Federal land banks, Federal intermediate credit banks, and a few other agencies, including the war emergency organizations, most of the credit agencies of the United States Government were created in 1932–34 to meet specific financial problems precipitated by the depression. At the present time, there are over 30 agencies, including the Reconstruction Finance Corporation, various agricultural lending institutions, insurance agencies, home mortgage and housing agencies, and certain agencies in liquidation.

There are several lending agencies which are part of, or are supervised by, the United States Department of Agriculture.

The Commodity Credit Corporation is the financial agency used in carrying out price support, supply, and related activities of the Department of Agriculture. As one means of effectuating the price support program, the corporation makes non-recourse loans to farmers, farm cooperatives and to some dealers and processors of farm commodities. Also it guarantees non-recourse loans for such purposes made by commercial banks and other institutions. Collateral for CCC loans are agricultural commodities which may be redeemed upon repayment of the loan.

The Rural Electrification Administration was established on May 11, 1935. It makes loans, with preference to nonprofit and cooperative organizations and to public bodies, to cover full cost of constructing power lines and other electric facilities to serve persons in rural areas who are without central station electric service. In 1949 the agency received authority to make loans to extend or improve rural telephone service. The Congress annually determines the amount of funds REA may lend.

The Farmers' Home Administration which was established in 1946 merged the functions of the Farm Security Administration and the Emergency Crop and Feed Loan Division of the Farm Credit Administration. The FHA is authorized to provide both long- and short-term credit for farmers who cannot get the loans they need at prevailing rates and terms in their communities from banks, cooperative lending agencies, or other responsible sources. This agency is also authorized under certain

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

conditions to insure long term farm mortgage loans made by private lenders. The amount of loans which FHA may make or insure is determined annually by Congress which appropriates funds for the direct loans.

The Farm Credit Administration supervises a system of lending institutions, the general purpose of which is to provide long- and short-term credit to farmers and farmers' cooperative associations on a sound credit basis through coordinated cooperative credit facilities. In contrast to other Federal credit agencies, this system does not lend Government funds; its lending operations are financed principally from the sale of securities of the land banks and intermediate credit banks in the investment market. The system includes 12 Federal land banks and 1,225 national farm loan associations which provide long-term farm mortgage credit, 12 production credit corporations which supervise 503 production credit associations making short-term loans, 13 banks for cooperatives which extend credit to farmers' cooperative associations, and 12 Federal intermediate credit banks which discount agricultural loans. Also, it includes the Federal Farm Mortgage Corporation which is servicing and liquidating the emergency farm mortgage loans made by the Land Bank Commissioner from 1933 to 1947.

Statistics on the principal items of assets and liabilities of Government credit agencies are published quarterly in the *Daily Statement of the United States Treasury.* Quarterly statements showing the assets and liabilities of Government corporations and sources and uses of funds for these agencies are published in the monthly *Treasury Bulletin.* Series of yearly, quarterly, and monthly statistics relating to operations of Government credit agencies are available also in the annual and other reports of individual agencies and the annual reports of the Secretary of the Treasury.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Federal Security Agency and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the *Monthly Labor Review.* (See tables 476 and 477.) Consumer credit statistics are published currently in the *Federal Reserve Bulletin.*

SECURITIES MARKETS AND CORPORATIONS

New issues and retirement of securities.—Current statistical information on new issues of securities has been provided for many years by the *Journal of Commerce* (since 1906), the *Commercial and Financial Chronicle* (since 1919) (see table 491), and the Standard and Poor's Corporation (since 1924). The statistics of the *Commercial and Financial Chronicle,* the most detailed and most widely used of these series, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and the issues of foreign governments and their subdivisions. The series is deficient in information on the uses of the proceeds of new issues, showing totals only for refunding and all other purposes.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. (See tables 489 and 493.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin,* and the *Survey of Current Business.*

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In addition, the Commission has been compiling statistics since 1933 on the volume of retirements of corporate securities and changes in security holdings of institutional groups and the public by type of issue. The Commission has been publishing data on the cost of flotation of securities registered under the Securities Act of 1933.

Individuals' saving.—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in their assets less the increase in their liabilities, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 449.) Annual estimates prior to 1940 were published in the *National Income Supplement to the Survey of Current Business*, July 1947, and in the issue of September 1949. The Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 448.) The Board of Governors of the Federal Reserve System releases annual data covering the distribution of liquid assets and positive, negative, and net savings of families, by income groups. These estimates are based on the Board's Survey of Consumer Finances, a nation-wide interview survey of private households. (See table 320, p. 267.)

Trading in securities.—(See tables 481, 484, 485, 487.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures, reported in connection with the fees paid under Section 31 of the Securities Exchange Act of 1934, include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily volume of trading in stocks on the New York Stock Exchange and the New York Curb Exchange.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission which ordinarily amount to from five to ten percent of total round-lot sales on the Exchange.

Security price averages.—(See table 480.) A number of indices of security prices are published regularly. Among the most widely known are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Probably the most comprehensive and detailed are the indices of the Standard and Poor's Corporation available since 1918, which are based on the Wednesday closing price of approximately 400 stocks divided into about 70 industrial groups. Indices of the Securities and Exchange Commission cover 27 industry classifications represented by 276 common stocks. These indices are published in the Commission's *Statistical Bulletin*.

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, shares in savings and loan associations, and U. S. Government securities held by individuals and businesses. Separate estimates are shown for financial and nonfinancial corporations, unincorporated businesses, other individuals, and trust fund holdings. The series, published in the *Federal Reserve Bulletin*, gives semi-annual figures from December 1939 to December 1946 and annual figures thereafter. (See table 450.)

INSURANCE

Insurance statistics.—There are no complete statistics of insurance for the United States as a whole. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers gather the only statistics approaching comprehensiveness. This situation arises primarily from the fact that the regulation of insurance and the collection of primary information on insurance are in the hands of the various States, Territories, and the District of Columbia. While insurance is now largely subject to Federal regulation, the Federal Government has not exercised its power nor has it taken any steps to collect comprehensive statistics of insurance on a national basis. Basic theory and practice are parallel throughout insurance, but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling in one of these three classes, though there is now a tendency in the direction of permitting insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Security.) Casualty insurers also write several unrelated kinds of insurance, including fidelity and surety bonds.

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance either as exclusive insurers or in competition with private insurers; *savings banks* write life insurance in three States.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series N 172–178") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

[1] Gold and silver certificates and Treasury notes of 1890 excluded before combining money outside Treasury with money in Treasury in order to avoid duplication, since gold and silver held in Treasury as security against these currencies are included. See also notes 1 and 2, table 426.

[2] Both items include also reserve against Treasury notes of 1890.

[3] 1934 to date, gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column "In trust against gold and silver certificates."

[4] Includes total stock of silver dollars and subsidiary silver.

Silver certificates	386,915	701,474	1,581,662	1,650,689	2,060,728	2,060,869	2,060,852
Treasury notes of 1890	1,260	1,182	1,163	1,150	1,147	1,146	1,145
Subsidiary silver	281,231	295,773	384,187	788,283	875,971	918,691	939,568
Minor coin	117,436	125,125	168,977	291,996	331,039	346,112	355,316
United States notes	288,389	285,417	247,887	322,587	320,403	321,485	318,688
Federal Reserve notes	1,402,066	3,222,913	5,163,284	22,867,459	23,999,004	23,600,323	23,209,437
Federal Reserve Bank notes	3,206	81,470	22,373	527,001	406,260	353,499	308,821
National bank notes	650,779	704,263	165,155	120,012	106,429	99,235	92,524

[1] Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

[2] By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. Hence, value of gold based on $35 per fine ounce beginning June 1934; theretofore, based on $20.67 per fine ounce.

[3] Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States, title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin ($287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

No. 427.—Bank Debits and Deposit Turnover: 1919 to 1949

All figures in millions of dollars. Figures represent debits or charges on books of reporting member and nonmember banks of Federal Reserve System to deposit accounts of individuals, firms, and corporations, and of United States, State, county, and municipal governments, including debits to savings accounts, payments from trust accounts, and certificates of deposit paid. Excludes debits to accounts of other banks or in settlement of clearinghouse balances, payment of cashier's checks, charges to expense and miscellaneous accounts, corrections, and similar charges. See also *Historical Statistics*, series N 76–79]

1935	10,126	10,125	1,868.0	110.7	+1,739.0	+.2	8.8
1940	22,042	21,995	4,242.5	170.2	+4,744.5	−644.7	1,807.7
1945	20,083	20,065	−547.8	32.0	−106.3	−356.7	4,293.8
1946	20,706	20,529	623.1	51.2	+311.5	+465.4	3,828.4
1947	22,868	22,754	[5] 2,162.1	75.8	+1,866.3	+210.0	3,618.4
1948	24,399	24,244	1,530.4	70.9	+1,680.4	−159.2	3,777.7
1949	24,563	24,427	164.6	69.9	+686.4	−495.7	4,273.3

[1] Includes gold in exchange stabilization fund beginning 1935; gold in active portion of this fund not included in Treasury gold stock.
[2] Estimate of the United States mint through 1948; figure for 1949 is estimate of American Bureau of Metal Statistics.
[3] Held at Federal Reserve Banks for foreign and international accounts.
[4] Adjusted for changes in gold held under earmark abroad by the Federal Reserve banks.
[5] Includes transfer of 687.5 million dollars gold subscription to International Monetary Fund.

[1] Coinage of domestic gold coin discontinued in 1933.

No. 431.—Silver—Prices, Bullion Value, and Ratio to Gold: 1840 to 1948

[London price converted to basis of ounce 1.000 fine and converted to American money at par of exchange through 1930; from 1931 through 1944, at current rate of exchange; beginning 1945, (London price) reported on basis of ounce 0.999 fine and converted to American money at current rate of exchange. Commercial ratio computed on basis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1934, monetary value of gold is $35.00 per fine ounce, as against $20.67+ in previous years. Value of fine silver (371¼ grains) in dollar computed on basis of London quotations through 1917; thereafter, on basis of New York average price. See also *Historical Statistics*, series N 183–184, for data on commercial ratio to gold and value of silver in dollar]

[All figures, except "Commercial ratio to gold," expressed in dollars]

Federal Reserve Bank of St. Louis

No. 432.—All Active Banks—Principal Assets and Liabilities, by Class of Banks: 1834 to 1948

[Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1890; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 19-34, and N 43-48]

[1] Reciprocal interbank demand balances with banks in the U. S. are reported net, beginning 1942.
[2] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.
[3] Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.
[4] Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.
[5] Beginning 1934, includes capital notes and debentures for banks other than national.
[6] Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.
[7] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.
[8] Capital only.
[9] U. S. Government securities only.
[10] Includes State bank circulation outstanding.
[11] Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.
[12] Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).

[2] Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to $62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on Dec. 31, 1942, aggregated $513,000,000.

[3] Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

[4] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

[5] Central reserve city banks only.

[1] For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

[2] Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

[3] 1 percent on advances secured by Government obligations.

[4] ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

[5] Advances secured to satisfaction of Federal Reserve Bank.

[6] Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

[7] Separate rate to banks eliminated.

No. 449.—Saving by Individuals in the United States: 1942 to 1949

[**In billions of dollars.** Includes unincorporated business savings of types specified but excludes corporate or Government saving. Current data are necessarily estimates and therefore subject to revision]

TYPE	1942	1943	1944	1945	1946	1947	1948	1949
Gross saving, total	+39.1	+47.2	+49.9	+47.4	+33.9	+36.4	+36.9	+37.5
Liquid saving, total	+29.8	+39.1	+41.6	+37.6	+12.9	+7.7	+4.3	+4.3
Currency and bank deposits	+11.0	+16.2	+17.5	+19.1	+10.6	+2.9	−1.3	−1.0
Savings and loan associations	+.3	+.6	+.8	+1.1	+1.2	+1.2	+1.2	+1.4
Insurance and pension reserves	+5.0	+6.8	+8.2	+8.6	+7.0	+7.1	+6.8	+6.0
Private insurance	+2.5	+2.8	+3.2	+3.5	+3.4	+3.7	+3.5	+3.8
Government insurance	+2.5	+3.9	+5.0	+5.1	+3.5	+3.4	+3.4	+2.2
Securities, total [1]	+10.4	+13.9	+15.1	+9.9	+.7	+3.8	+4.0	+3.8
U. S. savings bonds	+8.0	+11.1	+11.8	+6.9	+.9	+1.8	+2.1	+1.5
Other U. S. Government [2]	+2.4	+3.0	+3.9	+3.6	−.4	+.7	−1.0	+.1
State and local government	−.2	−.1	−.1	−.2	−.4	+.4	+1.0	+.8
Corporate and other	+.2	−.2	−.5	−.4	+.6	+1.0	+1.8	+1.4
Liquidation of mortgage debt [3]	−.1	+.4	+.1	−.2	−3.2	−4.1	−4.1	−3.5
Liquidation of debt not elsewhere classified [4]	+3.3	+1.3	−.2	−.8	−3.3	−3.3	−2.5	−2.3
Nonfarm dwellings [5]	+2.2	+1.3	+1.2	+1.4	+4.5	+6.8	+9.1	+8.8
Other durable consumers' goods [6]	+7.1	+6.8	+7.1	+8.5	+16.5	+22.0	+23.5	+24.4

[1] Does not include net purchases by brokers and dealers or other individuals financed by bank loans.

[2] Includes Armed Forces Leave bonds.

[3] Mortgage debt to institutions on one- to four-family nonfarm dwellings.

[4] Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, viz., saving in savings and loan associations, insurance and securities.

[5] Construction of one- to four-family nonfarm dwellings less net acquisition of properties by nonindividuals. Also includes small amount of construction by nonprofit institutions.

[6] Consumer expenditures on durable goods as estimated by Department of Commerce.

[1] Excludes figures for banks, insurance companies, savings and loan associations, nonprofit associations, foreigners, and governmental bodies and agencies.

[2] Estimates of demand deposit balances as they would appear on the records of depositors. They differ from figures based on bank records such as given in regular banking statistics. Depositor-record estimates are lower than bank-record estimates; for example, total demand deposits as of Dec. 31, 1947 on a holder-record basis (see table) amounted to 66.0 billion dollars while on a bank-record basis these deposits amount to 80.2 billion.

[3] Private share capital in all operating savings and loan associations including private repurchasable shares, deposits, and investment certificates.

[4] Includes outstanding amounts of excess profits tax refund bonds beginning December 1945, as follows: December 1945, $1,128 million; June 1946, $58 million; December 1946, $29 million; December 1947, $12 million. Armed forces leave bonds included beginning December 1947. Amount outstanding at time was $767 million.

[5] Includes real estate companies, finance and credit companies, insurance agencies (not carriers), investment trusts, security brokers and dealers, holding companies not otherwise classified, etc.

[6] Includes only amounts administered by corporate trustees.

[7] Includes holdings of farmers and professional persons.

Interest charges [6]	569,756	396,092	293,091	220,113	221,542	229,284	[7] 242,000
Index of interest charges per acre (1910–14=100)	206	135	98	69	70	72	[7] 76

[1] Includes purchase-money mortgages and sales contracts in addition to regular mortgages.
[2] For 1935–49, includes insured commercial banks; prior to 1935, open State and national banks.
[3] Not available.
[4] Average of rates on mortgages recorded during month of March only.
[5] Average contract rates, except for temporarily reduced rates on outstanding loans of Federal land banks, 1935 and 1940, and Federal Farm Mortgage Corporation, 1940 and 1945.
[6] Payable during calendar year on outstanding loans. Excludes amounts paid by Secretary of Treasury to Federal land banks, 1935 and 1940, and Federal Farm Mortgage Corporation, 1940 and 1945, as reimbursement for interest reductions granted borrowers.
[7] Preliminary.

[1] Includes renewals.
[2] Excludes advances in connection with Commodity Credit Corporation programs.
[3] Duplicates amount of credit extended and outstanding for the 3 agencies concerned.
[4] Excludes data for associations placed in liquidation.
[5] Represents refinancing of existing commissioner loans; lending authority of Land Bank Commissioner expired July 1, 1947.
[6] Through Apr. 15, 1949. In accordance with Public Law 38, 81st Congress, the Regional Agricultural Credit Corporation of Washington, D. C., was dissolved and, as of Apr. 16, 1949, its assets were transferred to the Farmers Home Administration.
[7] As of Apr. 15, 1947. See note 6.

[1] In some States number reporting is greater than number active at end of year because former includes associations which, although transacting some business during year, had ceased operation by end of year.

[2] Data are for years ending June 30.

[3] Data are for years ending September 30.

[4] Federal associations only; no State-chartered credit unions in this State.

[1] Straight average of market prices of all taxable bonds due or callable in 15 years and over.

[2] Based on varying list of bonds in attempt to maintain representative issues in each group; number shown represents number currently used. All series computed on daily basis.

[3] Prices derived from average yields on basis of a 4 percent 20-year bond based on Wednesday closing prices.

[4] For old series, prices derived from averages of median yields on basis of 5-percent (high grade, 4 percent) 20 year bond; for new series beginning 1947, from average yields of all issues in series on basis of 3-percent (high grade, 2¾ percent) 30 year bond. Number of bonds represents number currently used.

[5] 1940–46 based on 10 industrial, 20 public utility, and 20 railroad issues including both medium and lower grade bonds.

[6] Prices derived from averages of median yields on noncallable high-grade stocks on basis of a $7 annual dividend. Data from Board of Governors, Federal Reserve System.

[7] Based on Wednesday's closing prices, or last preceding sale price; indexes weighted by number of shares of each stock outstanding in base period. Number of stocks represents number currently used; continuity of series not affected by change in number.

[8] Averages of daily closing figures. Changes have been made in stocks used at various times. However, the number of stocks has remained constant except for public utilities (see note 9).

[9] For 20 stocks prior to June 2, 1938.

[10] Based on prices end of month. 200 stocks used represent for the most part, an identical list, except in public utility group, which is a continuous series comprised of 24 electric utilities (representing combined holding and operating electric companies prior to 1942 and operating electric companies thereafter) and the AT&T Co.

[11] Includes 15 bank and 10 insurance stocks.

[1] Average yields on taxable bonds due or callable in 15 years and over.
[2] Number of issues as of Dec. 1, 1949; number varies for earlier years.
[3] Represents yield estimated as prevailing in first quarter of each year on highest grade issues. Data from Board of Governors, Federal Reserve System.
[4] Not available.
[5] More than usually liable to error.
[6] Represents bonds of 40 years to maturity.
[7] See note 6, table 480.
[8] Based on 14 stocks for August and September 1948; 11 stocks thereafter.
[9] Average of monthly figures computed by dividing the aggregate annual dividends being paid as of the end of each month by the market value of all outstanding shares of the companies as of the same date; see note 10, table 480.
[10] Includes 15 bank and 10 insurance stocks.

No. 489.—Securities—New Securities Offered for Cash Sale, by Type and Issuer: 1939 to 1949

[**Estimated gross proceeds in millions of dollars.** Gross proceeds are derived by multiplying principal amounts or number of units by offering prices, except for municipal issues where principal amount is used. Covers substantially all new issues of securities offered for cash sale in United States in amounts over $100,000 and with terms of maturity of more than 1 year. Figures represent offerings, not actual sales. Includes issues privately placed, publicly offered, unregistered issues and those registered under Securities Act of 1933]

No. 501.—Fire Losses, Total and Per Capita: 1876 to 1948

[**Amounts, except per capita, in thousands of dollars.** Continental United States only. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses]

17. Business Enterprise

General.—Statistics in this section relate in general to the place and the behavior of the business firm and business initiative in the American economy. More specifically, the data show measures of and changes in business population, corporate assets and liabilities, certain types of business income and expenditure, and patents and copyrights.

Business population and turnover.—These estimates of Office of Business Economics (see tables 505 and 506) are based on data from a number of sources, particularly Bureau of the Census, Bureau of Internal Revenue, and Bureau of Old-Age and Survivors Insurance. A firm is defined here as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is counted only in that industry accounting for the highest proportion of its total employment. A self-employed person is considered a firm only if he has either one or more employees or has an established place of business. This count of business population differs from that of the Bureau of the Census which ordinarily represents a count of establishments, i. e., manufacturing plants or retail stores.

The number of new and discontinued businesses is estimated from tabulations prepared by the Bureau of Old-Age and Survivors Insurance, which show the number of employer identification numbers issued and canceled each quarter.

Business transfers represent purchases of going businesses, acquisitions of businesses through inheritance, transfers of businesses to a trustee or executor as well as changes in the form of business organization. The data are not directly comparable with those on new firms and discontinuances.

Information on new incorporations is collected by Dun & Bradstreet and is available monthly, by States, beginning in July 1945. The statistics include both completely new businesses which are incorporated, and changes in existing businesses from the noncorporate to the corporate form of organization, the transfer of an existing corporation to a new State, etc.

Corporate assets and liabilities.—These data are from the Bureau of Internal Revenue and the Securities and Exchange Commission. In its annual report, *Statistics of Income, Part 2*, the Bureau of Internal Revenue presents abbreviated balance sheet and income account data for all United States corporations. In a quarterly release entitled *Net Working Capital of U. S. Corporations*, the Securities and Exchange Commission publishes data on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and liabilities.

Corporation income, profits, dividends, and taxes.—The Bureau of Internal Revenue, the Office of Business Economics of the Department of Commerce, and the Board of Governors of the Federal Reserve System are the principal sources of statistics on these subjects. The statistics of these agencies overlap in many respects but are not comparable because of differing purposes of compilation.

Corporation statistics based on income tax returns are published by the Bureau of Internal Revenue in the annual *Statistics of Income, Part 2*.

Corporate data of the Office of Business Economics are from statistics on national income and product which may be found in its *Survey of Current Business*. In par-

Federal Reserve Bank of St. Louis

ticular, see regular monthly issues of July 1949 and February 1950, and National Income Supplement of July 1947. These data are defined as required for purposes of national income estimation.

The primary sources of data for the Office of Business Economics estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to the Bureau of Internal Revenue and summarized in the annual report on *Statistics of Income, Part 2.* Various adjustments of the *Statistics of Income* data have been required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends and because the original corporate income statements do not represent the final stage of information. For details of these adjustments, see table 38 of the reports on national income and product in the *Survey of Current Business* issues cited above. That table provides a reconciliation between the national income profit series and those reported in *Statistics of Income.*

Unincorporated enterprises.—These data also are from the national income and product statistics of the Office of Business Economics. Net income of these enterprises is a composite income share. It includes return on proprietors' investment and risk, as well as return from proprietors' own labor and any labor contributed by proprietors' families to the business.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and manner in which they are financed. Sources of funds should be equal to their uses. Certain discrepancies, however, apart from errors in estimation interfere with this equality. These discrepancies are not particularly significant and are due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment (2) transactions in securities held as permanent investments except public offerings, and (3) the fact that net new issues omit entrepreneurial capital for new corporations where no offering or sales of securities are made to the public or to institutions. Liquidation of such corporations is similarly not reflected.

Business sales and inventories.—These data include all companies, both corporate and noncorporate, major activities of which are in manufacturing or trade. Farm and other nonfarm businesses are not included. The manufacturing figures are the sum of (1) totals for corporations from Bureau of Internal Revenue *Statistics of Income* data for 1939–46 and projections of 1946 figures by means of a representative sample of manufacturing corporations for 1947–49, and (2) estimates for unincorporated enterprises projected, by means of sample data, back to 1939 and forward to 1949 from benchmarks on sole proprietorships and partnerships from Bureau of Internal Revenue for the year 1945.

Retail and wholesale trade estimates are based on figures in 1939 Census of Business, carried forward by means of sample data, Bureau of Internal Revenue compilations, and other information.

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated (by Bureau of Agricultural Economics) from physical quantity data.

No. 505.—Number of Firms in Operation, 1929 to 1948, and New and Discontinued Businesses, Transfers, and New Incorporations, 1944 to 1949

[**In thousands except new incorporations.** Data are for continental United States. Excludes firms in agriculture, forestry, fishing and the professional services. New businesses include only firms which have been newly established; going concerns which have been purchased are considered business transfers. Discontinued businesses include closures of all kinds without reference to reason for discontinuing—e. g., failure, retirement, illness of proprietor, etc.]

No. 507.—Corporation Assets and Liabilities: 1930 to 1946

[**Money figures in millions of dollars.** See headnote, table 509]

ITEM	1930	1935	1940	1943	1944	1945	1946
Returns of active corportions, number	463,036	477,113	473,042	420,521	412,467	421,125	491,152
Balance sheets, number [1]	403,173	415,205	413,716	366,870	363,056	374,950	440,750
Total assets or liabilities [2]	**334,002**	**303,150**	**320,478**	**389,524**	**418,324**	**441,461**	**454,705**
ASSETS							
Cash [3]	21,012	23,664	41,423	50,271	52,783	57,717	58,502
Notes and accounts receivable [4]	59,675	38,690	42,864	45,728	47,894	51,630	61,371
Inventories	18,771	14,788	19,463	27,187	26,476	26,067	36,965
Investments, government obligations [5]	10,228	21,863	29,570	86,655	111,219	129,935	109,916
Other investments	83,809	90,163	80,429	72,064	74,392	74,026	77,089
Capital assets (less depreciation and depletion reserves)	120,994	100,480	100,214	97,728	95,128	92,057	100,329
Other assets	19,511	13,501	6,514	9,889	10,431	10,029	10,541
LIABILITIES							
Notes and accounts payable	26,870	25,332	22,683	24,265	24,861	24,663	30,840
Bonded debt and mortgages	50,282	49,822	49,199	43,735	42,454	40,987	44,968
Other liabilities	95,568	89,066	110,210	175,859	200,550	221,286	214,283
Capital stock: [6]							
Preferred	19,117	19,533	17,138	15,067	15,112	14,764	14,857
Common	87,067	82,733	72,292	64,481	64,785	64,747	68,334
Surplus and undivided profits [7]	61,832	48,828	61,633	75,837	79,757	83,585	89,840
Deficit [8]	6,734	12,163	12,676	9,720	9,195	8,571	8,416
Net surplus	55,098	36,665	48,957	66,117	70,562	75,014	81,423

[1] Excludes returns with fragmentary balance sheet data.
[2] Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.
[3] Cash in till and deposits in banks.
[4] Less reserve for bad debts. Includes loans and discounts of banks.
[5] Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.
[6] For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."
[7] Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."
[8] Consists of negative amounts for "Earned surplus and undivided profits."

Federal Reserve Bank of St. Louis

No. 509.—Corporation Receipts, Deductions, Profits, and Tax: 1925 to 1946

[Includes data for Alaska, District of Columbia, and Hawaii; based on income tax returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934–41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940–41, by Pan American trade-corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. Data represent combined totals for returns reporting net income and those reporting no net income. For number of returns, see table 375, p. 329]

[In millions of dollars]

ITEM	1925	1930	1935	1940	1943	1944	1945	1946

Taxes paid [6]	[7]	2,297	2,628	4,317	5,699	5,965	5,585	5,831
Depreciation and depletion [8]	3,330	4,449	3,701	4,003	5,251	5,643	6,620	5,065
Other deductions	33,801	44,142	24,167	28,832	33,926	36,249	39,546	47,366
Compiled net profit or loss [9]	9,316	4,649	5,423	9,348	28,126	26,547	21,346	25,399
Net income or deficit [10]	7,621	1,551	1,696	8,919	27,819	26,304	21,139	25,193
Deduction due to net loss for prior year [11]	243	158	---	123	225	149	114	140
Total tax [12]	1,170	712	735	2,549	15,926	14,884	10,795	8,875
Compiled net profit less total tax	8,146	3,937	4,688	6,800	12,201	11,663	10,551	16,524
Dividends paid:								
Cash	5,190	8,184	5,941	6,089	5,728	6,057	6,081	7,497
Stock	544	414	136	140	225	247	334	527

[1] Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

[2] Not available.

[3] Beginning 1936, "Dividends from domestic corporations" are taxable income, tabulated with "other receipts."

[4] Beginning 1934, includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "other receipts" for 1941–46.

[5] Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).

[6] Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of United States, if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

[7] Tabulated with "Other deductions."

[8] Includes amortization of emergency facilities for 1940 and later years.

[9] Compiled receipts less compiled deductions.

[10] Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940–47, amount shown is before deduction due to net operationg loss of prior years.

[11] Deducted by corporations reporting net income.

[12] In addition to income tax, includes: declared value excess-profits tax, 1933–45; defense tax, 1940; and excess profits tax under provisions of Second Revenue Act of 1940, 1940–46.

No. 511.—Income of Unincorporated Enterprises, by Industry: 1942 to 1948

[**In millions of dollars.** Income of unincorporated enterprises measures monetary earnings and income in kind of sole proprietorships, partnerships, and producers' cooperatives from their current business operations—other than supplementary income of individuals derived from renting property. Income equals business receipts (exclusive of capital gains and expenses) less business expenses (exclusive of capital losses and depletion allowances)]

No. 512.—Corporate Income Before Federal and State Income and Excess Profits Taxes, by Industry: 1942 to 1948

[**In millions of dollars.** Corporate income before taxes, as included in national income statistics, represents earnings of corporations organized for profit which accrue to residents of the Nation, measured before Federal and State profit taxes, without deduction of depletion charges and exclusive of capital gains and losses. Profits accruing to residents are measured by eliminating intercorporate dividends from profits of domestic corporations and by adding net receipts of dividends and branch profits from abroad. In other respects, definition of profits is in accordance with Federal income tax regulations. Corporate income before taxes is measured net of capital gains and losses, dividends received, renegotiation refunds, and accelerated emergency amortization charges, but before deduction of depletion charges. Definition with respect to depletion charges has an important effect on data for mining industries. Figures for 1947 and 1948 are preliminary]

No. 513.—Corporate Profits, Taxes and Dividends: 1939 to 1949

[**In billions of dollars.** These series are as presented in official national income statistics. Corporate profits figures represent earnings of corporations organized for profit which accrue to residents of the Nation. (See also headnote, table 512.) They are given both before and after Federal and State taxes on corporate earnings. Disbursement of tax refunds have been deducted from tax liability in year in which tax liability was incurred. Net corporate dividend payments represent amount of cash dividends disbursed to residents of the Nation, and therefore are measured after elimination of intercorporate dividends. Undistributed corporate profits comprise difference between corporate profits after taxes and net dividend payments. Quarterly data are seasonally adjusted at annual rates. Figures for 1947–1949 are preliminary]

YEAR AND QUARTER	Profits before taxes	Income tax liability	Profits after taxes	Dividends	Undistributed profits
1939	6.5	1.5	5.0	3.8	1.2
1940	9.3	2.9	6.4	4.0	2.4
1941	17.2	7.8	9.4	4.5	4.9
1942	21.1	11.7	9.4	4.3	5.1
1943	25.1	14.4	10.6	4.5	6.2
1944	24.3	13.5	10.8	4.7	6.1
1945	19.7	11.2	8.5	4.7	3.8
1946	23.6	9.6	13.9	5.8	8.1
1947	31.6	12.5	19.1	7.0	12.1
1948	34.8	13.6	21.2	7.9	13.2

No. 515.—Annual Sales, Profits, and Dividends of Large Manufacturing Corporations: 1939 to 1948

[**In millions of dollars.** Includes data for 200 corporations with assets of $10,000,000 and over. Asset classification is as of end of 1946. Profits before and after taxes are as published by the 200 companies except for certain adjustments, chiefly to exclude special charges and credits and intercorporate dividends where large. Series includes little or no representation of some important nondurable goods groups such as meatpacking, tobacco and rubber. Data not available before 1939. This new series replaces former series on profits of 629 large industrial companies]

No. 521.—Industrial and Commercial Failures—Number and Liabilities: 1857 to 1949

[Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring failure record more nearly in accordance with type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series]

No. 522.—Industrial and Commercial Failures—Number and Liabilities, by Months: 1944 to 1949

[**Liabilities in thousands of dollars.** Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public]

[1] Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees from 1918 to date.
[2] Data are for period from July 28, 1836, to Dec. 31, 1850, except as otherwise specified.
[3] Data are for 11 years beginning 1840; records prior to this date are not available.
[4] Data are for 8 years beginning 1843.
[5] Data are for 13 years beginning 1838.
[6] Data are for the year 1870.
[7] Data are for 7 years beginning 1874.
[8] Registration of labels suspended from May 27, 1891, to June 9, 1896.
[9] Data are for 8 years; first print registered Mar. 7, 1893.
[10] Data are for the year 1925.
[11] Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 529.)
[12] Excludes 150 trade-mark republications (under Trade-Mark Act of 1946) of trade-marks registered under prior acts for 1947; 19,730 for 1948; and 12,983 for 1949.

Source: Department of Commerce, United States Patent Office; records (not published elsewhere). Fiscal year figures published in Annual Report of the Secretary.

18. Communications

Statistics shown in this section include financial and operating data for telephone, wire-telegraph, ocean-cable, and radio-telegraph carriers which render domestic and foreign service, data on newspapers, periodicals, and books, and data on the postal service. Also included are financial and statistical data relating to authorized standard (AM), FM and television radio broadcast stations and networks in the continental United States and possessions. Additional statistics on the communication industry as well as statistics on the number of telephones on farms, radios in occupied dwelling units, and the manufacture of communication equipment appear in other sections of this *Abstract.*

In the Census of Electrical Industries, the Bureau of the Census has compiled at 5-year intervals, beginning in 1902, reports on the telephone and telegraph industries covering all systems and lines. The last survey was made for the year 1937. Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been concentrated in that agency. Because of the intrastate character of many mutual, cooperative, and smaller commercial telephone companies, the Federal Communications Commission has not been able to continue the same coverage as shown in the Census of Electrical Industries. Where telephone data are presented by States, such information is incomplete to the extent that only the larger interstate carriers are represented. However, on an industry-wide basis, gross operating revenues of the telephone carriers reporting to the Commission are estimated to include approximately 95 percent of the operating revenues of all telephone carriers in the United States. Reports filed by radio broadcast stations and networks, wire-telegraph, ocean-cable, and radio-telegraph carriers cover substantially all domestically domiciled units in these industries which operate in the United States and its possessions or between the United States and foreign countries. Statistical data compiled from these reports are contained in *Statistics of the Communications Industry in the United States* and in the reports to the Congress of the United States, both of which are published annually by the Federal Communications Commission.

"Bell System" as referred to in this section, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries. Data on the postal service, obtained principally from the annual reports of the Postmaster General, are also included in this section.

No. 533.—Telephone Systems—Summary, Class A Carriers: 1926 to 1948

[Covers class A telephone carriers filing annual reports with F. C. C. Class A carriers are those whose average annual operating revenues exceeded $100,000. Gross operating revenues of class A carriers (excluding intercompany duplications of Bell System) reporting in 1937 represented approximately 94 percent of revenues of all telephone carriers as reported for Census of Electrical Industries for that year. Figures include data for carriers consolidated and merged for which annual data are available. Includes intercompany duplications, but data for 1942–48 excluding such duplications are shown in italics below]

[All money figures in thousands of dollars]

YEAR	Gross investment in telephone plant	Operating revenues	Operating ratio (percent) [1]	Net operating income	Net income	Dividends declared	Miles of wire (thousands)	Number of telephones (thousands)	EMPLOYEES	
									Number on Oct. 31 [2]	Total compensation [3]
1926	2,981,213	881,633	67.00	212,088	247,823	190,094	54,541	14,413	323,217	432,210

[1] Ratio of operating expenses to operating revenues.
[2] Number on Dec. 31 prior to 1943.
[3] Data for 1926 through 1932 include estimates.
[4] In comparing figures in this table, consideration should be given to the minor effect of revisions of Uniform System of Accounts, effective Jan. 1, 1933, and Jan. 1, 1937, resulting in certain changes in and rearrangements of both balance sheet and income statement.
[5] Excluding intercompany duplications.

[1] Ratio of operating expenses to operating revenue.
[2] Represents estimates by reporting carriers.
[3] Data for 1926–30 include estimates by reporting carriers.
[4] Beginning 1943, not fully comparable with prior years; reporting requirements changed effective Jan. 1, 1943.
[5] Includes net book cost of plant of Postal Telegraph, Inc., acquired by The Western Union Telegraph Co. in amount of $16,754,000 on basis of gross book cost of $69,320,000 less tentative allowance for depreciation of $52,566,000.
[6] Represents operating income before deduction of income taxes.
[7] Not comparable with amount reported for Dec. 31, 1943, because of accounting adjustment for Postal Telegraph plant purchased by the Western Union Telegraph Co. Oct. 7, 1943; comparable 1943 amount is $477,431,000.
[8] Includes $3,536,000 charged to capital surplus.
[9] Deficit or other reverse item.
[10] As of end of October.

[1] Excluding rural free delivery routes, ocean mail routes, and air-mail routes to foreign countries.
[2] Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.
[3] Domestic excludes and international includes foreign countries on domestic basis.
[4] Continental United States only. Data for years prior to 1926, except 1923, are estimates.
[5] Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.
[6] From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.
[7] From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.

No. 550.—Postal Service Revenues, by Source: 1920 to 1948

[**In thousands of dollars.** For years ending June 30. See headnote, table 549]

Annual cost	107,491	125,243	99,676	108,485	145,267	163,800	[2] 205,444
Average rate of cost—							
Per mile of length (dollars)	386.12	471.70	436.17	508.09	661.98	711.94	1,045.15
Per unit mile traveled (cents)	15.36	18.41	19.06	20.23	23.09	23.45	[2] 31.37
Per 60-foot car mile (cents)	39.31	45.70	45.40	44.31	44.01	44.06	[2] 54.34
Electric railway service:							
Number of routes	288	224	135	85	66	49	42
Length of routes (miles)	8,042	7,012	4,459	2,690	1,963	1,462	1,297
Annual travel of space units (thousand miles)	10,487	9,829	6,047	3,786	3,140	2,342	2,181
Annual rate of expenditure (thousand dollars)	566	571	349	236	224	204	194
Average cost per unit mile traveled (cents)	5.39	5.81	5.77	6.24	7.13	8.69	8.90
Power boat service:							
Number of routes	284	265	196	175	146	135	134
Length of routes (miles)	49,791	40,130	21,043	19,613	8,701	8,810	8,034
Annual travel (thousand miles)	5,298	4,806	2,860	2,451	1,505	1,368	1,319
Annual rate of expenditure (thousand dollars)	1,492	1,401	1,085	924	521	815	672
Average cost per mile traveled (cents)	28.16	29.15	37.95	37.71	34.64	59.54	50.93
Air mail service:							
Length of routes (miles)	2,665	14,907	28,884	37,943	56,849	102,454	130,093
Miles traveled with mail (thousands)	2,077	14,939	31,149	59,236	166,576	[4] 314,506	[4] 321,662
Mail carried (million pound-miles)	([5])	([5])	6,790	18,671	122,909	67,475	67,717
Cost of service (thousand dollars)	2,744	14,618	8,838	19,426	35,536	[4] 21,736	[4] 35,167
Average cost per mile (dollars)	1.32	0.98	0.28	0.33	0.21	0.07	0.11

[1] Annual expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at end of each fiscal year. Annual cost includes emergency and side and transfer service. Average rates based on regular authorizations.
[2] Includes 25 percent interim increase granted participating railroad companies under Railway Mail Pay Case, I. C. C. Docket No. 9200.
[3] For expenditures for Railway Mail Service, see table 551.
[4] Subject to revision. [5] Not computed.

No. 554.—Postal Service Operation—Summary for Principal Items: 1925 to 1948

[For years ending June 30. See headnote, table 549. For sales of postage stamps and other stamped paper and postage collected on second-class matter, see table 550]

Item	1925	1930	1935	1940	1945	1947	1948
Transactions in stamped paper:							
Ordinary postage stamps issued (millions)	17,387	16,269	13,610	16,381	20,240	19,542	20,432
Stamped envelopes (millions)	2,997	3,164	1,618	1,650	2,065	1,996	2,118
Postal cards issued (millions)	1,497	1,643	1,754	2,257	2,282	2,951	3,657
Pieces of mail carried [1] (millions)	25,835	27,888	22,332	27,749	37,912	37,428	40,280
Second-class matter carried:							
Free in county (1,000 pounds)	69,195	75,326	57,560	60,626	59,787	73,178	77,245
Paid at pound rates (1,000 pounds)	1,348,297	1,554,415	1,063,389	1,283,673	1,319,587	1,871,505	2,004,695
Foreign mails dispatched by sea:							
Letters, post cards (1,000 pounds)	5,640	7,103	4,602	4,231	31,426	5,238	5,238
Other articles (1,000 pounds)	66,229	83,377	53,056	62,257	474,160	489,001	600,455
Mail registered:							
Domestic, paid (1,000 pieces)	70,512	76,489	41,318	40,533	[2] 81,094	[2] 69,270	[2] 69,470
International, paid (1,000 pieces)	10,993	7,869	3,444	2,713	[3]	[3]	[3]
Official, free (1,000 pieces)	8,414	8,680	10,582	12,082	[4] 22,907	[4] 16,161	[4] 17,064
Registry fees (1,000 dollars)	8,850	12,807	[5] 7,100	[5] 6,825	[4 5] 17,706	[4 5] 15,020	[4 5] 15,070
Mail insured:							
Domestic, parcel post (1,000 pieces)	152,078	126,421	71,960	80,916	131,384	159,391	182,689
International (1,000 pieces)	603	649	311	380	[3]	[3]	[3]
Total fees paid (1,000 dollars)	8,061	8,775	5,249	5,702	[4] 12,259	[4] 12,641	[4] 15,189
Mail sent C. O. D.:							
Total pieces sent (1,000)	52,362	46,249	31,118	34,648	[4] 44,146	[4] 65,635	[4] 69,416
Total fees (1,000 dollars)	5,562	5,825	4,298	4,748	[4] 10,830	[4] 15,926	[4] 17,084

[1] Continental U. S. only. Data for 1925 are estimates.
[2] Includes "insured mail treated as registered mail," formerly included with regular insured mailings.
[3] Not published.
[4] Excludes data for international mail included in prior years.
[5] Not including surcharges (effective July 1, 1932) amounting to $3,815,000 in 1935, $2,674,000 in 1940, $7,371,000 in 1945, $5,972,000 in 1947, and $5,848,000 in 1948.

19. Power

Energy for supplying mechanical power, heat, light and refrigeration for the complex machinery and processes necessary to maintain productivity and comfort in the United States is derived primarily from coal, oil, water, natural gas, wood and waste, wind, certain basic chemical and physical reactions, and the rays of the sun. Of these between 15 and 20 percent of the coal, over 2 percent of the oil, practically all of the water, and 10 percent of the natural gas are converted to electricity for application to the energy requirements of our economic system.

Statistics on these various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the Minerals Yearbook. For summaries of statistical material from this source, see section 28, Mining and Mineral Products. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Annual summary data are included in this section.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as Electric Power Statistics. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its Statistical Bulletins. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. For the period 1939 to 1946, data on the use of electric power by major industry groups were compiled and published by the Federal Power Commission in a report on Industrial Electric Energy. This series has been discontinued, however, with 1946 the latest data available. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this Abstract.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 573.

The Bureau of the Census in the Census of Electrical Industries compiled at five-year intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 561.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series G 159–170") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

Data in this section relate to continental United States except as indicated.

No. 556.—Energy from Mineral Fuels and Water Power—Annual Supply: 1889 to 1948

[In trillions of British thermal units. Unit heat values employed are: Anthracite, 13,600 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 6,000,000 B. t. u. per barrel; natural gas, 1,075 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as well as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent for manufacturers and mines and of 40 percent for public utilities. See also *Historical Statistics*, series G 159–170]

PERIOD	TOTAL ENERGY		WATER POWER		MINERAL FUELS					
						Coal			Petroleum (total crude, including that refined) [3]	Natural gas
	Water power at constant fuel equivalent	Water power at prevailing central station equivalent	At constant fuel equivalent [1]	At prevailing central station equivalent [2]	Total	Total	Bituminous and lignite	Pennsylvania anthracite

[1] Assuming 4.02 pounds of coal per kilowatt-hour, average of central electric station practice in 1913, base period.
[2] Assuming average central-station practice for each year; declined from about 7.05 pounds of coal per kilowatt-hour in 1899 to 1.3 pounds in 1948. [3] Includes imports. [4] Not available.
[5] Based on amount of coal displaced by gas, as estimated by gas companies. [6] Preliminary.

Hydro					980	980	985	983
Steam					11,135	11,129	11,207	11,447
Internal combustion					641	640	636	625
Hydro as percent of total					7.7	7.7	7.7	7.5

[1] Industrial classification comprises production and capacity of 3,743 industrial electric power plants of 100 kilowatts and over in 1948, including amounts for stationary electric power plants of railroads and railways.
[2] Each prime mover type in combination plants counted separately.
[3] Based on capacity in service at end of year.

No. 561.—Electric Light and Power Industry—Summary: 1902 to 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Excludes establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in nature of public utilities, unless a portion of generated output was sold commercially. Plants operated by Federal Government or by States excluded unless energy sold commercially]

ITEM	1902	1912	1917	1922	1927	1932	1937
Number of reporting establishments,[1] total	3,620	5,221	6,542	6,355	4,335	3,429	3,501
Generating all or part of current	(2)	4,646	5,124	4,389	2,331	1,788	1,812
Distributing or transmitting only	(2)	575	1,418	1,966	2,004	1,641	1,689
Number of separate generating stations	(2)	(2)	5,952	5,444	4,801	4,339	[3] 4,027
Prime movers, hp. (thousands)	1,845	7,530	12,937	19,851	35,710	47,967	50,220
Steam engines	1,394	1,895	1,702	1,371	994	649	712
Steam turbines		3,054	6,747	12,355	24,323	32,904	33,177
Internal-combustion engines	12	111	210	303	548	881	1,101
Hydroturbines and water wheels	439	2,469	4,277	5,822	9,844	13,532	15,230
Generators, rated kilowatt capacity (thousands)	1,212	5,165	8,994	14,313	25,811	34,623	36,481
Output,[4] kilowatt-hours (millions)		14,183	31,044	50,274	96,829	111,716	168,300
Reported as generated	2,507	11,569	25,438	40,292	74,686	79,657	121,097
Reported as purchased or received from other sources	(2)	2,614	5,606	9,983	22,142	32,058	47,202
Number of customers (thousands)	(2)	3,838	7,179	12,710	21,790	23,862	27,219
Revenue from elec. service ($1,000)	[5] 84,187	[5] 287,139	[5] 502,060	[5] 1,020,439	1,802,655	1,975,304	2,356,513
Sales, kilowatt-hours (millions)	(2)	(2)	25,752	41,965	79,011	88,265	132,930
Distribution for other purposes (non-revenue), kilowatt-hours (millions)	(2)	(2)	(2)	(2)	17,817	23,451	35,370
Operating expenses, ($1,000) [6]	(2)	(2)	(2)	553,068	[7] 750,484	803,100	1,042,193
Value of electric utility plant ($1,000,000)	505	2,176	3,060	4,465	[8] 9,297	12,664	12,941
Employees, number	30,326	79,335	105,541	150,762	251,020	244,573	281,335
Salaries and wages ($1,000)	20,647	61,162	95,242	212,433	[7] 367,632	[9] 323,880	470,353

[1] The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. [2] Not available.
[3] Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).
[4] Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."
[5] Includes "Estimated value of free service."
[6] Includes cost of fuel purchased and interchanged power, maintenance and other operating expenses.
[7] Reported by commercial establishments only. No data for municipal establishments.
[8] Includes value of plant and equipment, $902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.
[9] Not comparable with other years; includes only salaries and wages chargeable to electric operating service.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Electric Light and Power Industry. Survey discontinued.

No. 562.—Electric Light and Power Industry—Energy Generated, Sales, Revenue, and Customers: 1930 to 1949

[Figures for energy generated obtained by Edison Electric Institute from Federal Power Commission. Figures for sales, revenue, and customers for 1930 and 1935 not strictly comparable with those for 1940 and subsequent years due to change in classification of sales. See also *Historical Statisics*, series G 225-233]

By private companies	----	----	1,448,500	1,707,100	1,883,649	2,082,316	2,250,595
By public authorities, total	----	----	601,500	1,221,900	1,452,051	1,734,784	2,137,605
By REA cooperatives [2]	----	----	517,500	1,051,000	1,260,516	1,533,894	1,921,160
Other public [3]	----	----	84,000	170,900	191,535	200,890	216,445
EASTERN FARMS [4]							
Number of customers (farms served), average	423,393	551,480	1,431,028	2,160,265	2,400,404	2,737,946	3,135,730
Sales, kilowatt-hours (1,000)	315,597	481,688	1,535,350	3,394,000	4,006,000	4,934,000	6,263,212
Revenue ($1,000)	22,166	26,832	66,525	124,309	143,539	168,159	206,727
Kilowatt-hours per customer	745	873	1,073	1,571	1,669	1,802	1,997
Annual bill, average	$52.37	$48.63	$46.46	$57.50	$59.75	$61.45	$65.90
Revenue per kilowatt-hour (cents)	7.03	5.57	4.33	3.66	3.58	3.41	3.30
WESTERN FARMS [4]							
Number of customers (farms served), average	189,661	213,406	413,989	637,600	731,298	838,993	966,096
Sales, kilowatt-hours (1,000)	1,473,195	1,210,710	1,820,000	2,514,000	3,272,000	4,040,000	5,130,110
Revenue ($1,000)	24,524	21,572	35,500	52,595	65,050	72,104	91,167
Kilowatt-hours per customer	7,768	5,673	4,396	3,943	4,474	4,815	5,310
Annual bill, average	$128.95	$100.98	$85.72	$82.41	$89.03	$86.19	$94.52
Revenue per kilowatt-hour (cents)	1.66	1.78	1.95	2.09	1.99	1.79	1.78

[1] Census figures; relate to Apr. 1 for 1930 and 1940 and Jan. 1 for 1935 and 1945.
[2] Represents cooperatives only and excludes customers of all other agencies (companies and municipals) financed in whole or in part by REA.
[3] Customers served by municipal systems and various power districts not financed by REA.
[4] "Eastern farms" are those located in the area not affected by heavy irrigation pumping and their statistics are a measure of use of electricity on the average farm. "Western farms" are those where irrigation may be involved. Possibly less than one-fifth of farms in irrigation States do actual pumping, but statistics are not available to make a more accurate separation. Figures for "Western farms," therefore, are more a reflection of fluctuation in the energy used than they are of the conventional farm requirements.

Boiler fuel	539	512	384	453	484	585	601	542	547
Bench and producer fuel	781	793	663	700	703	741	[5] 734	[5] 748	[5] 701
OIL									
Total	**603**	**510**	**677**	**752**	**837**	**934**	**1,069**	**1,239**	**1,308**
Water gas enricher	536	465	592	654	731	797	915	1,035	1,075
Boiler fuel	9	11	27	24	23	[6] 24	38	57	61
Oil gas production	58	34	58	74	83	113	116	147	172

[1] Includes fuel used in production of manufactured gas during periods of peak demand or emergency only, for use in systems regularly distributing natural gas.
[2] Bench and producer fuel.
[3] Oven and retort charge.
[4] Less than 500 tons.
[5] Includes 9,000 tons used as oven and retort charge in 1946, 10,000 tons in 1947, and 7,000 tons in 1948.
[6] Includes 500,000 gallons used as bench and producer fuel.
