r Revised.

<sup>1/</sup> Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940, transfers were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund and appropriated directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers to the Trust Fund reflect deductions made for reimbursement to the General Fund account to cover administrative expenses.

<sup>2/</sup> Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act and amounts for administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue; Public Health Service, and Office of Education of the Federal Security Agency.

<sup>3/</sup> Second Deficiency Appropriation Act, fiscal year 1938, approved June 25, 1938, carried an appropriation of \$40,561,886.43, pursuant to authorization of August 24, 1937, for making refund to certain States of portions of Federal employers' tax for 1936 collected under Title IX of the Social Security Act. Other refunds are on account of Employment taxes (Title VIII) and Tax on employers of 8 or more (Title IX, Sec. 901) "Other than to States."

<sup>4/</sup> Covered by appropriations from the General Fund.

<sup>5/</sup> Revised to bring classification into agreement with accounts.

Source: Figures on bank holdings come from reports of the Comptroller of the Currency, Federal Deposit Insurance Corporation, and Board of Governors of the Federal Reserve System.

• Less than 1%.

<sup>1/</sup> Book values.<sup>2/</sup> Holdings of United States Savings bonds have been included in the table showing the amount of bank holdings, but in calculating the percentages, estimates of such holdings of United States Savings bonds have been excluded. Because of this exclusion, and because the figures used for bank holdings represent book values whereas par values are used for the privately held marketable supply, the percentage figures are only roughly accurate.
