1/ Treasury bills are included in interest-bearing debt figures at face amount, but for the purpose of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of interest on United States

savings bonds, Series A-E are considered to yield 2.90 percent per annum and Series F is considered to yield 2.53 percent. 2/ Excludes securities guaranteed by the United States which were sold directly to the Treasury. Consists only of securities guaranteed by the United States as to both principal and interest.

^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with

respect to which a definite notice of call has been made, however, are listed as fixed maturities. The abbreviations refer to the following corporations: Home Owners' Loan Corporation, Reconstruction Finance Corporation, Commodity Credit Corporation, Federal Farm Mortgage Corporation, and United States Housing Authority.

T Taxable issues.

1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-seconds.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Computed on mean price to call date when prices are above par; to maturity date when prices are below par.

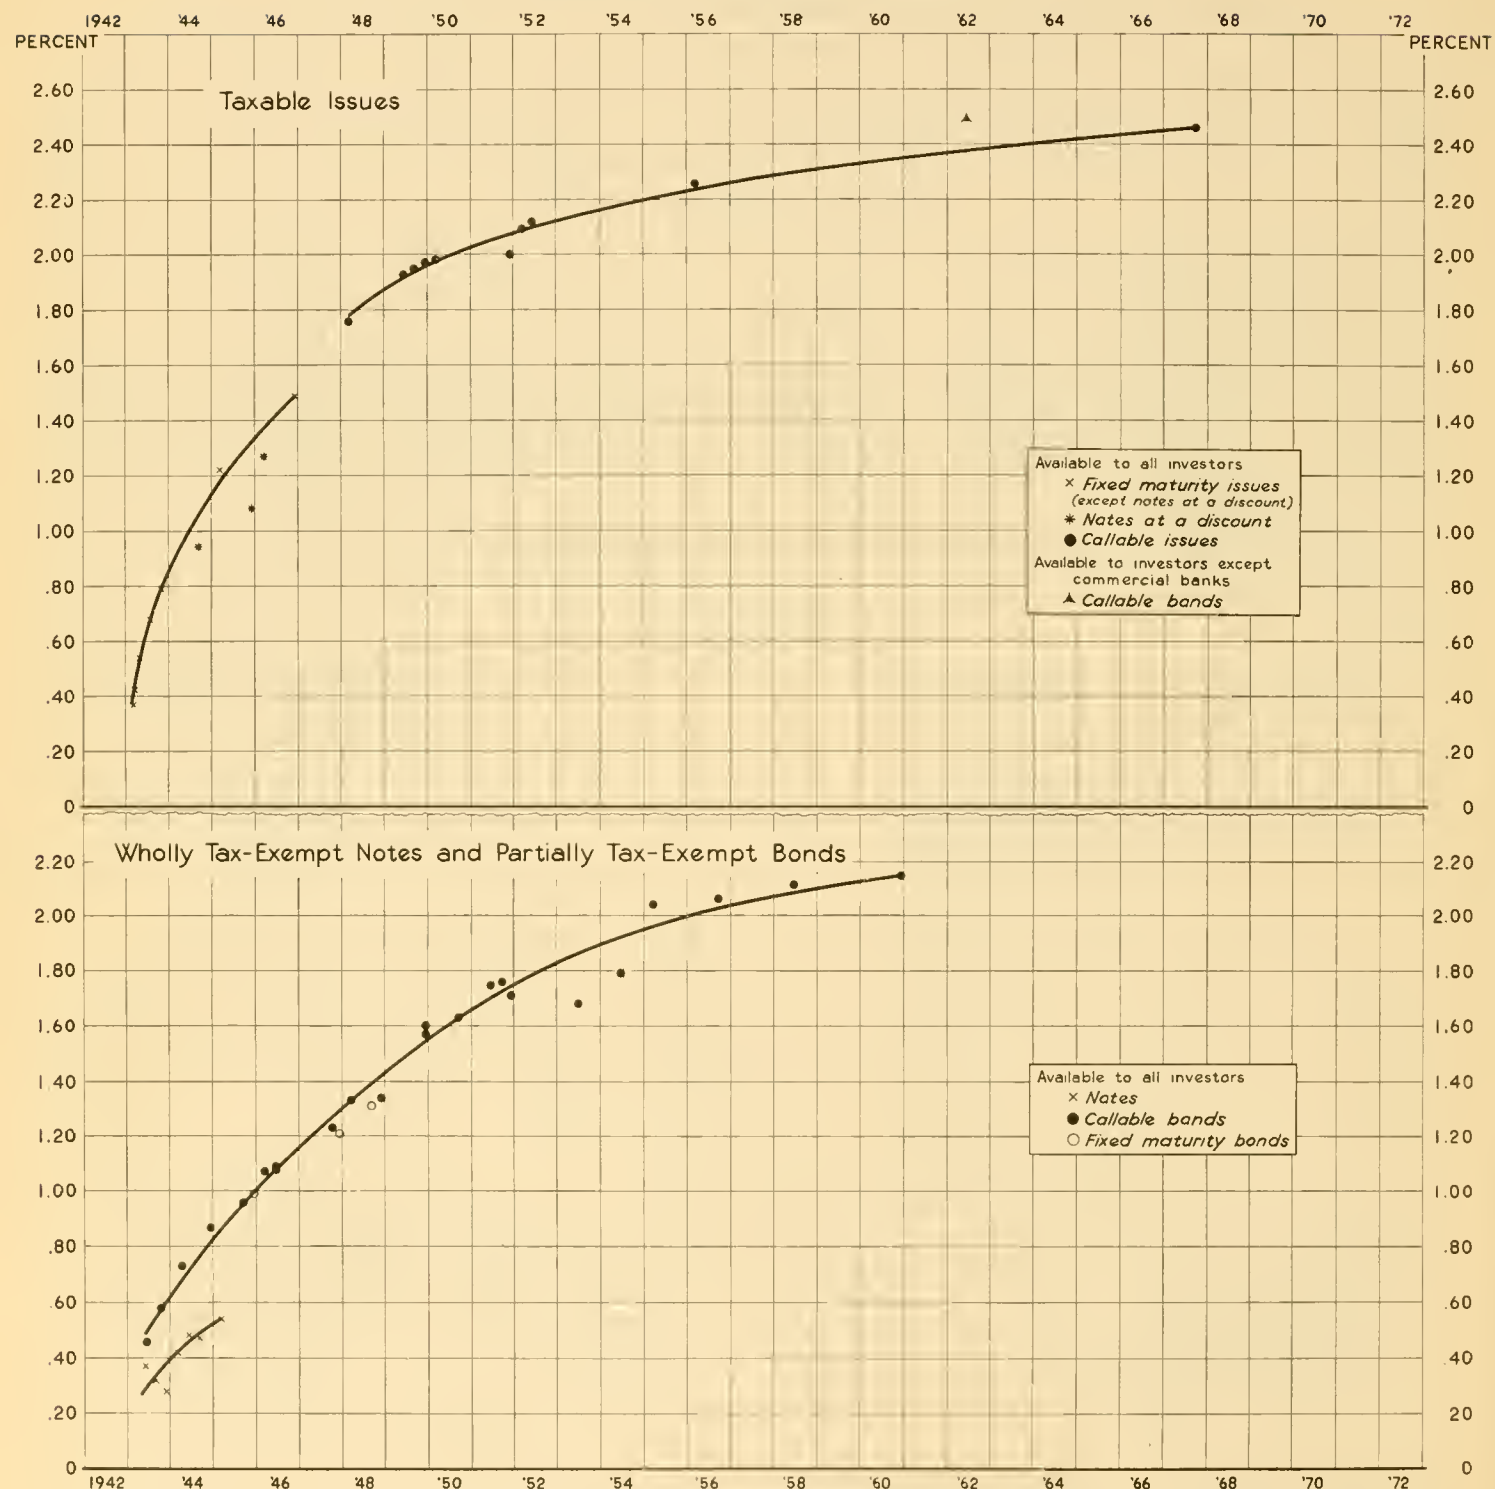

4/ Excludes issues completely held by Farm Credit Administration agencies.

5/ Callable on 30 days' notice at 100-1/2 on January or July 3, 1943. "Yield" is computed to maturity or that call date which gives the lowest yield.

6/ Not quoted.

YIELDS OF TREASURY SECURITIES NOV. 30, 1942

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and subsequent issues.

OTHER TREASURY STATISTICS

Individual Income Tax in United States, United Kingdom, and Canada^{1/}

Married Person Without Dependents

The following tables show the amount of individual income taxes payable by a married person without dependents on selected amounts of net income under the tax laws of the United States, the United Kingdom, and Canada.

The data for the United States include the income tax liability under the New York State income tax. About a third of the American States have no net income taxes, and in many of the others the rates are below those in New York. In neither Canada nor the United Kingdom do jurisdictions other than the central government now impose income taxes.

For purposes of these calculations it is assumed that net income is the same for the New York tax as for the United States tax except that the New York tax is deducted in computing the net income subject to Federal tax. The United States tax shown is the liability under the Revenue Act of 1942. This includes the 5-percent Victory tax, which does not become effective until January 1, 1943. In computing the Victory tax, it has been assumed that gross income subject to Victory tax (before the exemption) is ten-ninths of net income. The income tax exemption is \$1,200, the Victory tax exemption \$524. Maximum earned income credit has been assumed; this is 10 percent of earned net income but not more than \$1,400 and is deducted only in computing the income subject to normal tax.

The calculations for the United Kingdom are based on the Finance Act of 1941, now in effect. The personal exemption for a married person is \$560. Maximum earned income credit is assumed; this is 10 percent of net income but may not exceed \$600. The rate of normal tax is 32-1/2 percent on the first \$650 of normal tax net income and 50 percent on the balance. The surtax applies to net income before deduction of exemptions and credits and begins at 10 percent on income over \$8,000. Conversion to dollars was made at the rate of \$4 to the pound.

The Canadian law provides for a flat rate normal tax of 7 percent on all net income if the net income is over \$1,200 for a married person. In addition the amount of net income in excess of \$650 is subject to graduated rates ranging from 30 to 85 percent, but a married person is allowed a deduction of \$150 from the tax payable under the graduated rates. The total normal tax and graduated tax cannot reduce the income after tax to less than \$1,200. There is no earned income credit, but an additional tax of 4 percent is imposed on investment income above \$1,500.

The description above applies to "gross taxes", part of which are refundable currently or after the war. The United Kingdom does not permit the taxpayer to take the post-war credit currently. In the United States

the taxpayer may take the post-war credit currently to the extent of (a) premium payments on life insurance policies in force September 1, 1942, (b) net reduction of debt outstanding on September 1, 1942, plus (c) net purchases of eligible United States Government bonds. In Canada the credit ("minimum savings requirement")^{2/} can be taken currently to the extent of (a) contributions to pension or retirement funds, (b) premiums paid on life insurance policies in force prior to June 23, 1942, (or premiums not exceeding \$100 on policies not in force prior to June 23, 1942), (c) reduction of debt outstanding prior to June 23, 1942, on one residential property, plus (d) certain types of installment savings in effect prior to June 23, 1942, where postponement of payments would result in substantial loss to the taxpayer.

These data are subject to the limitations which apply to international tax comparisons. Some of the difference in the taxes of the three countries, not reflected in these tables, can be noted. The difference between the British and the United States and Canadian methods of taxing dividends is highly important. The British consider the tax (except the excess profits tax) paid by the corporation on its profits as a payment on behalf of the stockholder. If the stockholder is liable to the reduced (32-1/2 percent) normal tax rate instead of full rate (50 percent), he is entitled to claim a refund. For normal tax the stockholder is not required to include the dividends in his taxable income since the tax is paid at source. However, for surtax he must include not only the dividends actually received but also the tax paid by the corporation with respect to the dividends. The methods of taxing capital gains and losses also differ; the Canadians in general follow the British practice of disregarding gains and losses from certain casual or isolated transactions not connected with the taxpayer's trade or business; the United States, under the Revenue Act of 1942, includes capital gains and losses in income to varying degree but in effect provides that the tax rate on gains from capital assets held more than six months shall not exceed 25 percent. The definitions of the taxpayer unit and of "gross income" and "net income" vary considerably. The British, for example, require husbands and wives to file joint returns, grant virtually no exemption to interest on government bonds, include in gross income the rental value of a dwelling occupied by the owner, and do not allow the deduction of charitable contributions. Canada imposes a tax on the excess profits of unincorporated businesses. Finally, it should be noted that income tax comparisons do not represent comparisons of the total tax burdens for the three countries.
