Sales of United States Government Securities in December 1942 Classified by Type of Investor

The following table presents an analysis of the sales of United States Government securities in December 1942 by type of investor. Statistics for the breakdown of total sales of the various securities issued are available in part from tabulations of subscriptions and allotment data and are estimated in part on the basis of the information which is available. A complete breakdown, by type of investor, is available only for the 7/8 percent certificates, the 1-3/4 percent bonds, and the 2-1/2 percent bonds. Series E savings bonds are sold only to natural persons. A breakdown for Series A and C tax notes is available between individuals and all corporations, and a breakdown into the same two classes has been estimated for Series F and G savings bonds. The whole amount of sales of these securities to corporations has been classified as "other corporations". Small amounts of them were purchased by the types of corporate investors specifically listed in the table, but not enough to affect the results materially. The total amount shown for Treasury bills is the net increase in the whole supply of bills during the month of December, rather than total sales during that month as is the case for all other securities. The entire increase in bills has been assumed to have been absorbed by banking sources.

Sources of Dividend Receipts, 1936

The accompanying tables are derived from special tabulations of the 1936 income tax returns of individuals, corporations, and fiduciaries, undertaken as a part of the Income Tax Study for 1936 which was sponsored and directed by the Division of Tax Research of the Treasury Department in occupantion with the Works Projects Administration. They contain information hitherto not available and are presented in advance of detailed analysis.

In 1936, corporations paid out a total of \$7.4 billions in cash dividends—the largest amount since 1930—which compares with an average amount of \$6.0 billions for the preceding 10-year period (1926 through 1935). The volume of cash dividends in 1936 undoubtedly was influenced by the operation of the undistributed profits tax which encouraged a more substantial distribution than would otherwise have taken place. It may also be noted that 1936 was the last year for which a tabulation of this nature could be made. Individual and fiduciary income tax returns of subsequent years do not contain detailed dividend schedules.

The amounts and distributions of dividends received do not necessarily reflect corporate ownership. Equal amounts of dividends do not always represent identical amounts of corporate net worth. Moreover, no distinction could be made in the tabulation of these data between dividende on preferred stook and dividends on common stook. Finally, the data throw no light upon the ownership of corporations which did not pay dividends in 1936.

Table I shows the dividende received by corporations, individuals, and fiduciaries, classified (a) by size of total assets of dividend paying corporations and (b) by size of total assets of dividend receiving corporations and by size of net income of dividend receiving individuals. Table II provides the same information for each class of dividend recipients on the basis of percentage distribution of dividends received and Table III provides it on the basis of percentage distribution of dividends peid.

Individuals filing income tax returns received 56 percent, corporations 74 percent, and fiduciaries 70 percent of their dividend income from corporations with total assets of \$10 millions and over. Of the three main groups of recipients, fiduciaries showed the highest percentage of dividends received from the largest corporatione (total assets of \$100 millions and over). Intercorporate dividends are highly concentrated in the group of corporations with total assets of \$10 millions and over. More than \$4 percent of the intercorporate dividends paid by this group went to other corporations with total assets of \$10 millions and over.

The relative importance of individuals as recipients of vidends distributed by small corporations is indicated further by a comparison of the percentages shown in Table II

with a percentage distribution of total cash dividends paid in 1936 by corporations in the various asset size classes. (See below for dividend distribution from "Statistics of Income for 1936", part II, table 5.)

Table II indicates that the financial interest in small corporations of individuals with large amounts of net income is proportionately much smaller than that of individuals with small amounte of net income. For example, while dividend payments of corporations with total assets of less than \$50,000 amounted to 1.26 percent of the dividends paid by all corporations, the proportion of dividends received by individuals with net income of \$50,000 or more from this group of small corporations ranged only between .01 percent (for the class with net income of \$1 million and over) and .94 percent (for individuals with net income between \$60,000 and \$70,000). The ratio increased steadily as net income of the recipients declined, and individuals with net income of less than \$5,000 received on the average 3.11 percent of their dividend income from the group of the smallest corporations.

Table III emphasizes further the disproportionately small financial interest of the high income groups of individuals in small corporations. Of the dividends paid by all corporations to all individuals filing income tax returns, only 18.28 percent was paid to individuals with net income of less than \$5,000. However, the share of this group in the dividend payments of corporations with total assets of less than \$50,000 was 28.81 percent, and in those of corporations with total assets between \$50,000 and \$100,000, 20.27 percent. Similarly, only 12.79 percent of total dividend payments to individuals filing income tax returns was paid to individuals with net income between \$5,000 and \$10,000, but this group was paid more than 24 percent of the dividends paid to individuals by corporations of the two lowest asset size classes. On the other hand, individuals with net income of \$50,000 and more, whose proportionate share was \$1.34 percent, were paid less than 7 percent of the dividends paid to all individuals filing income tax returns by corporations with total assets of less than \$100,000.

METHODS USED IN DIVIDEND STUDY

Procedure: The original tabulation plans called for a 100 percent transcription of the duplicate returns of corporate dividend recipients, of fiduciary returns, and of those individual income tax returns on which a total dividend income of \$10,000 or more was reported. With respect to Others, a 25 percent sample was selected in two stages, as follows: First, every tenth block of 100 returns on file with the Income Tax Study was drawn. After transcription, these blocks were returned to their original position in the file. The second drawing (of approximately 15 percent) was made by taking every seventh block of 100 returns. In those cases where the seventh block was one which had been drawn previously as a tenth block, a substitute block was provided.

Coverage: Compared with the tabulations of dividend income shown in "Statistics of Income for 1936", Parts 1 and 2, the actual over-all coverage of corporate dividend receipts was 55.6 percent; of fiduciary returns, 61.3 percent (estimated); and of individual returns with dividend incomes of \$10,000 or more, 71.7 percent. The tabulation of the 25 percent sample of individual returns with dividend incomes of less than \$10,000 yielded an actual over-all coverage of 18.0 percent. The coverage was incomplete due mainly to inadequate information in the returns selected.

Inflation of the samples: The inflation of the samples to the amounts of dividend income reported in "Statistics of Income for 1936" was made separately for each asset size class of corporate dividend recipients and for each net income class of individual dividend recipients. Coverages of the different sub-groups varied to some extent. In isolated cases where there was only a relatively small number of dividend recipients, the sample coverage exceeded 100 percent of the corresponding totals shown in "Statistics of Income".

The "blowing up" of the data relating to individual dividend recipients was made in two steps. First, the "small" dividend income sample was inflated to the same ocverage represented by the respective classes of the "large" dividend income tabulation, and the sum of the two amounts was then inflated further to the 100 percent levels derived from "Statistics of Innome".

Because no statistics of fiduciary returns of income were available for 1936, a uniform multiplication factor derived from an estimate of the 1936 dividend income of this group was applied, and no breakdowns by size of income are presented.

Inclusion of taxable fiduciary returns is tabulation of individual returns: The total dividend faceme of \$3,228 millions reported for individuals is everstated by \$117,629,000, or 3.6 percent. This amount represents the dividend faceme of taxable setates and trusts. (See "Statistics of Income Supplement Compiled from Federal Income Tax Returns for 1936", Section I, Table 2-J.) In 1936, taxable setates and trusts (i.e., those which failed to distribute more than \$1,000 to their beneficiaries) had to file income tax returns on individual income tax forms (Form 1040) since the Fiduciary Return of Income (Form 1041) of that year was merely an information return and did not provide any space for tax computations.

Although not required to do so, many taxable fiduciaries also filed Form 1041 in 1936, in addition to the income tax return on Form 1040. In order to avoid duplication from the double filing of returns, all fiduciary returns of income (Form 1041) which showed undistributed income of more than \$1,000 were eliminated from the tabulation of fiduciary returns with dividend income.

Table I .- Dividends Received by Corporations, Individuals, and Fiduciaries, 1936 1/2 Classified by Size of Total Assets of Dividend Paying and Receiving Corporations, and by Size of Net Income of Dividend Receiving Individuals.

Estate Tax in the United States, United Kingdom, and Canada Effective Rates, January 1, 1943 1/

The following table and chart show the taxes due on estates of selected sizes in the United States, the United Kingdom, and Canada. The New York State tax has been added to the net Federal tax, and the Ontario Provincial tax has been added to the Canadian Dominion tax; in the United Kingdom only the central government imposes death taxes. These calculations are based on the assumption that the estate in the interval and one additional contractions. tate is divided equally between a widow and one adult child.

In the United States the Federal Government grants each estate a specific exemption of \$60,000; in Canada under the Dominion law the exemption varies according to the number of heirs and their relationship to the decedent, from \$20,000 for a widow to a minimum of \$1,000 per heir with no tax levied if the setate is less than \$5,000. There is no specific exemption in the United Kingdom, but estates of less than \$400 are not subject to tax. 2/

The three countries employ somewhat different types of rate schedules. The United States imposes bracket rates, each rate applying only to the amount of property in a single bracket. The United Kingdom employs totality rates; a single rate, determined by the size of the total state; is applied to the total amount of property subject to tax. Notch provisions prevent a small difference in the size of an estate from making a greater difference in the amount of tax. The Canadian tax also imposes totality rates. These rates however rise very gradually and notch provisions are not needed. With certain exceptions in the lower brackets, two sets of totality rates apply to each inheritance: one not needed. With certain exceptions in the lower brackets, two sets of totality rates apply to each inheritance; one rate is determined by the amount of the total estate, the other by the size of the inheritance and the relationship.

In the United States transfers of property at death are taxed also by all of the States, except Nevada. The Federal Government allows the setate to credit against the Federal liability payments of state death taxes in amounts not exceeding 80 percent of the tax due under the Federal Act of 1926, which imposes rates ranging from 1 to 20 percent. In Canada all Provinces impose death taxes, but the Dominion allows no credit for Provincial death taxes. In the United Kingdom the smaller jurisdictions have no death taxes. However, the central government imposes in addition to the estate duty, which is the major death tax, a legacy and succession duty which varies with relationship. In recent years this latter tax has aversged about 1.9 percent of total estates. years this 1 total estates.

International comparisons of the taxes imposed by different jurisdictions on the transfer of property from one

generation or one person to another are subject to several limitations. The significance of some factors cannot be limitations. The significance of some factors cannot be readily appraised, and it is difficult to summarize and

Variations in the treatment of gifts made before death are especially significant. The United States and Canada, but not the United Kingdom, impose gift taxes. In the United States the gift tax rates are nominally three-quarters of the estate tax rates. The United States gift tax is cumula-tive; all gifts (except philanthropic gifts and amounts exempted and excluded from the base) made since June 6, 1932, are added to determine the bracket or brackets in which the current year's gifts are taxable. The Canadian gift tax is are added to determine the bracket or brackets in which the current year's gifts are taxable. The Canadian gift tax is not cumulative; its rates are higher than the death tax rates. In the United States there is a presumption that outright gifts made within two years of death ars to be included in the estate (credit being given for gift tax paid), but the presumption is not conclusive, and many such gifts as well as a large part of those made more than two years before death are in fact not subjected to the estate tax. In the United Kingdom non-charitable gifts made within three years (and charitable gifts made within one year) of death are included in the estate; in Canada gifts made within three years of death are included in the setate (credit being given for gift tax paid). In all three countries gifts on which there are certain legal restrictions are included in the estate when outright gifts are excluded.

bases are generally similar, important differences other than the exemptions and treatment of gifts already noted. The United States law, for example, permits unlimited deduction of bequests to a wide variety of religious, charitable, sducational, and other variety of religious, charitable, sducational, and other non-profit organizations, whereas the law of the United Kingdom grants virtually no deduction, and the Canadian law Kingdom grants virtually no deduction, and the Canadian law limits the deduction to one-half of the estate. The United States also allows more generous credit than the United Kingdom for "property previously taxed", that is, taxed recently in the estate of another decedent. Canada grants no such credit. Property subject to certain legal restrictions, such as powers of appointment and family settlements, is covered more thoroughly by the United Kingdom than by the United States law. The Canadian law also appears to provide stricter treatment, although the full meaning of the statute awaits further interpretation. The United States allows the executors to choose between valuation of the assets of the estate as of the date of death or a date one year later (or if distributed in the meantime at the date of distribution); neither the British nor the Canadian law provide such option. neither the British nor the Canadian law provide such option.

Less than \$50,000.

Formerly Title VIII of the Social Security Act.

Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment In-

amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I). Frior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Tressury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the fars reflect daductions made for reimbursement to the General Fund account to cover administrative axpenses, which are shown as expenditures in Section 11, Table I.

Includes only expenditures from appropriations made specifi-Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Realth Service and Office of Education of the Federal Security Agency.

ment, and Public Realth Service and Office of Education of the Federal Security Agency. Covered by appropriations by Congress. Second Deficiency Appropriation Act, fiscel year 1938, approved June 25, 1938, carried an appropriation of \$40,561,886.43 for making refund to certain States of portions of Federal amployers' tax for 1936 collected under the Social Security Act. Security Act.

1 In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges

for retirement of national bank notes are reflected directly against increment on gold in the years during which the retiremente were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

Source: Daily Treasury Statements.

1/ Treasury bills are included in interest-bearing debt figures et face amount, but for the purpose of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of interest on United States

eavinge bonde, Serice A-E are considered to yield 2.90 percent per annum and Serice F is considered to yield 2.55 percent.

2/ Excludee eccurities guaranteed by the United States which were cold directly to the Treesury. Consists only of securities guaranteed by the United States as to both principal and interest.

Source: Deily Treasury Statement, and reports to the Treasury.

1/ Excludes postel savings bonds and Federel Housing

Addictivation debentures.

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of finel maturity. Callable issues with

respect to which a definite notice of call has been ande, however, are listed as fixed naturities. The abbreviations refer to the following corporations: Home Owners' Loan Corporation, Reconstruction Finance Corporation, Commodity Credit Corporation, Federal Farm Mortgage Corporation, and Federal Public Housing Authority.

Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness 1/ Since January 1, 1939

Post Utiles Department.

Preliminary.

Preliminary.

Piguree for Hovembor and following months are not strictly comparable with earlier months because of the shift to a Daily Treasury Statement basis. Stemps cold prior to October 1, 1942 were known

as postal savings stamps and were obligations of the Postal Savinge System but subsequently became public debt obligations. Sales and redemptions commence with May 1, 1941. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands.

Net change in amount outstanding as shown on Daily Treasury Statement. See footnote 1/.

Bevised.

Less than \$50,000.

Less than \$50,000. Series A notes have been on sale since August 1, 1941, and yield approximately 1.92 percent per eanum. The maximum amount which may be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year is limited to \$5,000 par value. If not presented in payment of taxes, the notes will be redeemed at the purchase price only. Series B notes were sold from August 1, 1941 through September 12, 1942. The yield on these notes is approximately .43 percent per annum, and

the amount which may be turned in on taxes is unlimited. If not presented in payment of taxes, the notes will be redeemed at the purchase price only. Series C notes were first offered for sale on September 14, 1942. Interest on these notes accruse each month on a graduated scale, and is equivalent to a yield of approximately 1.07 percent per annum if held to meturity. The amounts which may be turned in on taxes is unlimited. If not presented in payment of taxes, the notes will be redeemable at par and accrued interest, either at meturity or, on 30 days' notice, during and efter the sixth month after the month of issue.

Sale of Tax Series Treasury notes began in August 1941. 2/ Sale of Tax Series Treasury notes began in August 1941.

Consists of purchases or salas made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treesury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended. and excludes the Exchange Stabilisation Fund.

The following tables present summary data from the Treasury survey, as of November 30, 1942, of the ownsrship of securities issued or guaranteed by the United States. The large commercial and savings banks and insurance companies covered in the survey account for approximately 95 percent of the holdings of United States Government and Government-guaranteed securities held by all banks and insurance companies in the United States.

Taxable lesuee

5/ Included in long-term average of taxable Treesury bonds shown later in this chapter.

Taxable issues. Excludes postel savings bonds. Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that Treasury bond prices for the period prior to October 1, 1939 represent closing prices on the New York Stock Exchange. "When issued" prices are included beginning October 1, 1939. Dates of highs and lowe, in case of recurrence, are the latest dates.

^{3/} Computed on mean price to call date when prices are above par; to

maturity date when prices are below par.
4/ Included in long-term average of partially tax-exempt Treasury boads shown later in this chapter.

^{6/} Security is not transferable to commercial banks before designated dates in 1952.

Over-the-Counter Closing Quotations on Public Marketable Securities Issued by the United States Government and by Federal Agencies December 31, 1942 - (Continued)

maturity date when prices are below par.

Ly Excludes issues completely held by Farm Credit Administration

6/ Not quoted.

Taxable issues.

When the price of a security is such as to result in a negative yield, the exces of price over zero yield is given in the yield columns in thirty-seconds.

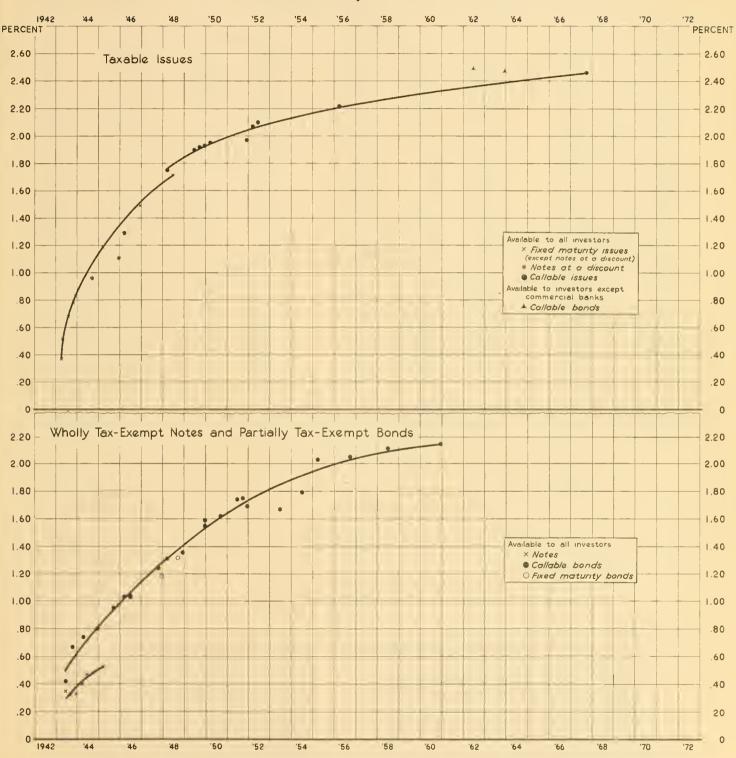

Prices represent the mean of closing bid and est quotations in the over-the-counter market. "When issued" prices are included beginning November 1, 1941. Dates of highs and lowe, in case of recurrence, are the letest dates.

^{3/} Computed on mean price to call date when prices are above par; to

agencies.
5/ Callable on 30 days' notice at 100-1/2 on July 3, 1943. "Yield" is computed to maturity or call, depending on which date gives the

YIELDS OF TREASURY SECURITIES DEC. 31, 1942

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call date when prices are obove par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bld and ask quotations in the over-the-counter market, beginning September 2, 1941; previouely, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and

subsequent issues.

1/ Average of partially tax-exempt Treasury bonds neither due nor callable for twelve years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax. (In addition, interest derived from \$5,000 aggregate principal amount of partially tax-exempt Treasury bonds

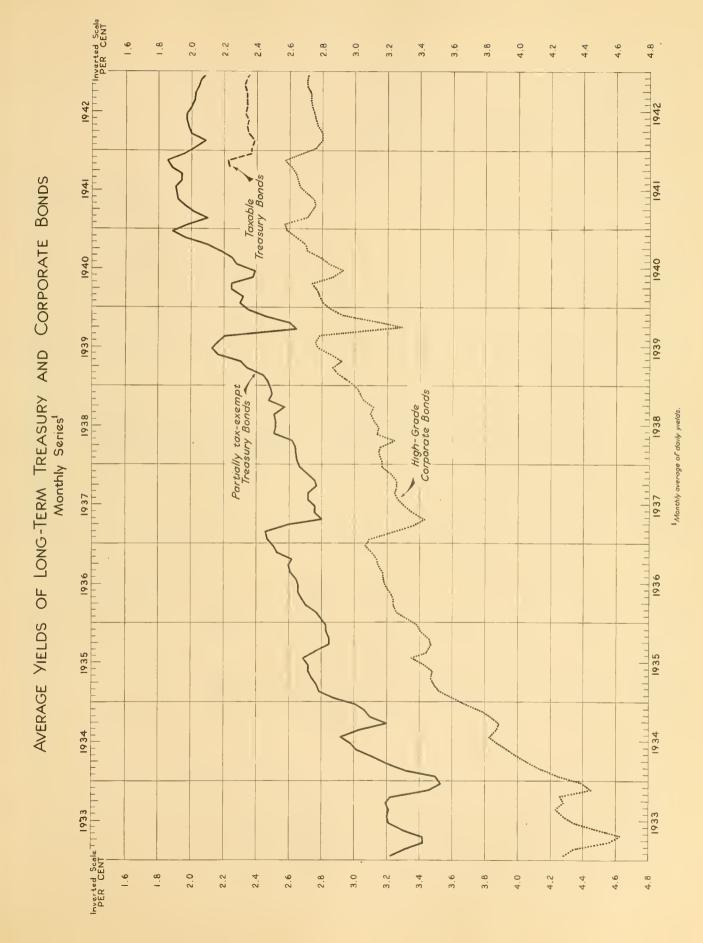

- and United States savings bonds issued before March 1, 1941 is exempt from the surtax rates of the Federal lucome tax.) exempt from the surtax rates of the Federal income tax.)

 Average of taxable Treasury bonds asither due nor callable for twelve years. The 2-1/2 percent bonds of 1962-67 and the 2-1/2 percent bonds of 1963-68, are excluded because of restrictions on their purchase and asgotiability. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax. This average commenced Octaber 20 1041
- rates of the Federal income tax. This average commenced October 20, 1941.

 3/ Average of 9 bands, January 6, 1933 through December 6, 1935; average of 15 bands, December 7, 1935 through July 31, 1937; average of 20 bands, August 1, 1937 through September 13, 1938; average of 5 bands, September 14, 1938 to date.

 4/ Mouthly averages of daily figures. Prior to April 1, 1938.
- corporate bonds are averages of Saturday figures.
 5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Holiday.

Source: Reports received from the corporations and agencies.

Items in this column are the only once in this statement which constitute a charge against the Federal Budget. They repre-

ent amounts of funds drawn against two rederal Bunget. They represent amounts of funds drawn against available appropriations. Except for the H.O.L.C., sales of obligations in the market, as shown in this column, are reduced by the amount of obligations which have been retired (including those which have in effect been refunded through the sale of obligations to the Treesury). In the case of the H.O.L.C., the original amount of obligations sold in the merket is shown in this column and the retirement and refunding of these obligations are shown as "Retirement of obligations issued in exchange for mortgages" in

the statement of uses of funds.

3/ Includes \$3,000,000 H.I.R.A.; \$97,000,000 R.F.C. included in notes canceled by the Treasury (See footnote \(\frac{1}{2}\)); and \(\frac{1}{2}\)13,950,523.60 restoration of Capital Impairment, which is net of repayments to the Treasury of \$43,756,731.01 on the basis of March 31, 1940 appraisel, and \$27,815,513.68 on the basis of March 31, 1942 appraisel of the corporation, pursuant to Fublic No. 442 - 75th Congress, approved March 8, 1938.

its notes sold to the Treasury, such amounts being included in

- the total of obligations of the corporation canceled by the Sec-retary of the Treasury pursuent to the Act of February 24,1938. 5/ Figures are as of October 31,1942. Under Executive Order 9256 dated October 13,1942, effective October 31,1942, the assets and liabilities were transferred to R.F.C. for purposes of liquidation.
- Figures are as of October 31, 1942, the latest available.
 The R.F.C. purchased the stock of the Federal home loan banks from the Treasury Department on February 20, 1941. The net effect of this transaction is the same as a sale of etock to other agencies,
- and is shown as such for purposes of this report.

 Comprises Cargoes, Incorporated, Defense Romes Corporation, Defense Plant Corporation, Defense Supplies Corporation, Letitute of Inter-American Affairs, Inter-American Nevigation Corporation, Metals Reserve Company, Rubber Reserve Company, Smaller War Plants Corporation, United States Commercial Company and War Damage
- 9/ Receipts from the sale of property acquired in liquidation of loans are shown as "Sele of other property acquired".
 10/ Includes \$51,513,100 peid-in capital stock held by member
- inetitutions.

Note: The weekly series of capital movement data through July 1, 1942 has been superseded by a revised monthly series commencing with July 1, 1942. For an explanation of the adjustment made to eliminate the duplication in the two series resulting from the

overlapping of one day, eee the "Treasury Bulletin" for October 1942, page 78.
r Revieed.
