1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,067 millions for the fiscal year 1937 is considered as a part of the working balance.

- ^{1/} This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.
- ^{2/} This represents the increase in the gross public debt, except as noted. (See footnote ^{7/}.)
- ^{3/} Includes Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust funds.
- ^{4/} Comprises Public Works Administration revolving fund and special deposits (net). Also includes Agricultural Marketing Administration commodity food stamp transactions.
- ^{5/} Includes expenditures for retirement of national bank notes.
- ^{6/} In the fiscal years 1935 and 1936, \$91 millions and \$554 millions were transferred from increment on gold to the working

balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold, in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

- ^{7/} Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1935 - \$91 millions, 1936 - \$397 millions, 1937 - \$99 millions, 1938 - \$51 millions, and 1939 - \$5 millions, total - \$645 millions. The increases in the public debt shown in the table Means of Financing Cash Requirements for the above fiscal years will not agree for the reason stated above.

^{1/} Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

^{2/}

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90 percent per annum and Series F is considered to yield 2.53 percent. Guaranteed securities sold directly to the Treasury, and securities guaranteed as to interest only, are not included in this table.

* Less than \$50,000.

^{1/} These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; series B and series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote ^{2/}). Sale of series C notes which were designed for the investment of idle cash reserves as well as the accumulation of tax reserves was continued and the notes were designated Treasury savings notes.

^{2/} Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92 percent per annum. The maximum amount which may be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each

taxable year is limited to \$5,000 par value. Through June 22, 1943 the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at the tax payment value current at the time of presentation. See also footnote ^{1/}.

^{3/} Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately .48 percent per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

^{4/} Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07 percent per annum if held to maturity. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote ^{1/}.

- 1/ Figures for November 1942 and following months are not strictly comparable with earlier months because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.
- 2/ Estimated on the basis of samples conducted by the Post Office Department.
- 3/ Includes minor amounts which were exchanged for postal savings

certificates prior to November 1, 1942. These did not aggregate in any one month more than \$26 thousands nor more than 0.9 percent of total redemptions.

- 4/ Sales and redemptions commence with May 1, 1941 when the special defense series of stamps went on sale. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands. Details not available for May, June, and July 1941.
- 5/ Net of sales less redemptions. See footnote 1/.
- 6/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

Summary Data from Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States, September 30, 1943

The following tables present summary data from the Treasury survey, as of September 30, 1943, of the ownership of securities issued or guaranteed by the United States. The large commercial and savings banks and insurance companies covered in the survey account for approximately 95 percent of the holdings of United States Government and Government-guaranteed securities held by all banks and insurance companies in the United States.

Note: Revisions of previously published data on life insurance companies and on fire, casualty, and marine insurance companies appear on pages 52-63 of this issue of the "Treasury Bulletin". These revisions have been made quarterly from March 1941 through March 1943 and also for April 30 and May 31, 1943.

Revisions of Data on Insurance Companies Covered in Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States

The regrouping of insurance companies which first appeared in the Treasury survey as of June 30, 1943 ("Treasury Bulletin" for August 1943, pages 47-52) has now been completed for selected earlier months and is shown below. This regrouping did not affect the data for all reporting insurance companies but did result in revisions in the figures on life insurance companies and in the figures on fire, casualty, and marine insurance companies. It should be noted that prior to March 31, 1943 revisions have been made only on a quarterly basis; data on the break-down of insurance companies for the intervening months have not been revised and therefore should not be used for comparative purposes.

^{1/} When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-seconds.

^{2/} Prices represent the mean of closing bid and ask quotations in the over-the-counter market except that prices of Treasury, Federal Farm Mortgage Corporation, and Home Owners' Loan Corporation bonds for the period prior to October 1, 1939 represent closing prices on the New York Stock Exchange. "When issued" prices are included beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

^{3/} Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.

^{4/} Included in average of long-term taxable Treasury bonds shown later in this chapter.

^{5/} Security is not transferable to commercial banks until ten years after issue date.

^{6/} Quoted on yield basis since November 12, 1942; prior price quotations have been converted to yields for book figures.

^{7/} Excludes Federal Housing Administration debentures and issues held entirely by Government agencies.

^{8/} Included in average of long-term partially tax-exempt Treasury bonds shown later in this chapter.

^{9/} Excludes postal savings bonds.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and subsequent issues.

^{1/} These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure silver certificates.^{2/} The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.^{3/} Increase due principally to cumulative adjustment in computing average cost per ounce.
