Source: Figures for years 1936-1941, "Statistics of Income, Part 2".

- 1/ Estimates are based on the assumption that Federal expenditures estimated in the Budget of the United States Government for the fiscal year ending June 30, 1945 will be made during calendar year 1944. Estimates are conceptually comparable with "Statistics of Income, Part 2". Compiled net profit accordingly does not include the profits estimated or determined to be excessive for corporations which reduce their taxable income by these amounts prior to filing final tax returns.
- 2/ Consists of returns for (1) calendar year indicated, (2) fiscal years ending from July 1 of the year indicated through June 30 of the succeeding year and (3) a part year with the greater number of months falling in the calendar year indicated. Most of the returns, however, are for the calendar year.
- 3/ Compiled net profit or loss as defined in "Statistics of Income", equals compiled receipts, which include dividends received and tax-exempt interest, minus compiled deductions, which exclude net operating loss deduction.
- 4/ The first year's net loss allowed to be carried over is for a taxable year beginning on or after January 1, 1939; the first year in which the loss is allowed as a deduction is in a taxable year beginning on or after January 1, 1940.
- 5/ Cumulation of this item for the years 1940-1944 would involve double counting of net operating loss deduction, once in the year in which the net operating loss occurs, and once in the year to which it is carried forward.
- 6/ Dividends from domestic corporations subject to income taxation. This is the amount used for computation of dividends received credit.
- 7/ Decrease in 1942 can be attributed in large part to the use of consolidated returns as permitted under the Revenue Act of 1942.
- 8/ Includes both partially and wholly tax-exempt interest.
- 9/ The Revenue Acts of 1942 and 1943 provide a postwar credit, or a current tax reduction not greater than such credit and amounting to 40 percent of the amount paid in debt retirement, for each taxable year ending after December 31, 1941 (except in the case of a taxable year beginning in 1941 and ending before July 1, 1942) and not beginning after the date of cessation of hostilities, of an amount equal to 10 percent of the excess profits tax for each such taxable year.
- 10/ Postwar credit refunds are comparable with "Statistics of Income" figures based on income tax returns before audit. The refunds are

overestimated by refunds on excess profits tax liabilities on excessive profits of corporations renegotiated after filing final tax returns in the amounts of \$27 millions for 1942, \$26 millions for 1943, and \$19 millions for 1944. The net postwar refunds estimated to be due all corporations are therefore \$538 millions for 1942, \$734 millions for 1943, and \$696 millions for 1944.

- 11/ Excludes the effect of the carryback of net operating losses and of unused excess profits credit and the effect of other provisions of the law (such as Section 722 of the Internal Revenue Code) which permit corporations to reopen their tax returns and to recompute their tax liabilities. The amounts, deferred by reason of the application of Section 710 (a) (5), relating to abnormality under Section 722, however, are included. Relief under Section 722 will affect tax liabilities for years beginning in 1940; the carryback provisions will affect the tax liabilities for years beginning in 1941.
- 12/ These estimates are comparable with "Statistics of Income" which will include in compiled net profit the excessive profits of corporations whose war contracts have been renegotiated after filing final tax returns. As a result, the figures shown overstate the amounts estimated to be retained by corporations after taxes, dividend payments, and renegotiation, by the reduction in postwar credit refunds (\$27 millions, \$26 millions, and \$19 millions in 1942, 1943, and 1944, respectively), and by the amount of excessive profits included in income tax returns recovered as cash refunds flowing into the Treasury as "Miscellaneous receipts" (\$85 millions, \$75 millions, and \$55 millions in 1942, 1943, and 1944, respectively). Thus, compiled net profit excluding dividends received after taxes and dividends paid, shown in item 19 for 1942 as \$5,855 millions, becomes \$5,743 millions after allowance for renegotiation (\$5,855 millions minus \$27 millions minus \$85 millions) or \$5,205 millions excluding postwar credit refunds (\$5,743 millions minus \$538 millions). See also footnotes 2/ and 10/.
- 13/ Consists of cash and assets other than corporations' own stock paid to stockholders other than domestic corporations.
- 14/ Compiled net loss or deficit.
- 15/ Decrease in 1942 can be attributed in large part to change made by the 1942 Revenue Act in the treatment of the reserve earnings deduction of life insurance companies.
- 16/ Deficit corporations are liable for only the capital stock tax which is included as a deduction in compiled net profit or loss.

## Treasury Market Financing

On April 24, 1944, subscription books were opened for an issue of 7/8 percent Treasury certificates of indebtedness, dated May 1, 1944, and maturing May 1, 1945. These certificates were offered in exchange for \$1,655 millions of certificates of indebtedness maturing May 1, 1944. Cash subscriptions were not accepted. Preliminary 1/ subscription and allotment figures, released on

May 4, showed that holders of \$1,615 millions, or 98 percent, of the maturing certificates accepted the exchange offer.

---

1/ When final figures on allotments become available, they will appear in the table "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness", which appears on page 30 of this issue.

<sup>1/</sup> In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold, in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

7/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1935 - \$91 millions, 1936 - \$397 millions, 1937 - \$99 millions, 1938 - \$51 millions, and 1939 - \$5 millions, total - \$645 millions. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

<sup>1/</sup> Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90 percent per annum and Series F is considered to yield 2.53 percent.

<sup>2/</sup> Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

- 1/ Excludes postal savings bonds and Federal Housing Administration debentures.
- 2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed

maturities. The abbreviations refer to the following corporations: Home Owners' Loan Corporation, Commodity Credit Corporation, and Federal Farm Mortgage Corporation.  
 3/ The Reconstruction Finance Corporation notes, Series I-A, I-B, and I-C, which are held entirely by United States Government agencies and trust funds, have been classified as non-marketable issues.

\* Less than \$50,000.

<sup>1/</sup> At current redemption values except Series G, which is stated at par. Unclassified sales shown in the Daily Treasury Statement have been classified by series.<sup>2/</sup> Estimated, except for Series G.<sup>3/</sup> Series A-D, the sales of which commenced in March 1935 and continued through April 1941, are 10 year discount bonds which were sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any one calendar year and from April 1, 1940, could be made only by individuals. Series E, F, and G have been on sale since May 1, 1941. Series E is a 10 year discount bond sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases are limited to \$3,750 issue price in any one calendar year and may be made only by individuals. Series F is a 12 year discount bond sold at 74% of maturity value, yielding 2.53% per annum if held to maturity. Series G is a 12 year current income bond, sold at par, bearing interest at the rate of

2-1/2% per annum, redeemable at par on maturity, or at stated prices less than par before maturity. Purchases of Series F and G in any one calendar year are limited to \$100,000 issue price for the two series combined (\$50,000 in the calendar year 1941) and through December 31, 1943 could be made by all investors except commercial banks. Commencing January 1, 1944, commercial banks holding savings deposits (as defined in Regulation Q of the Board of Governors of the Federal Reserve System) were permitted to purchase Series F and G bonds providing such combined purchases do not total more than \$100,000 issue price in any one calendar year and providing that the total holdings of Series F and G bonds, 2-1/2 percent Treasury bonds of 1965-70, and 2-1/4 percent Treasury bonds of 1956-59 do not exceed 10 percent of savings deposits. For further details concerning redemption values and investment yields, see "Treasury Bulletin" for August 1943, page 4.

<sup>4/</sup> Prior to April 1, 1940, commercial banks were permitted to purchase savings bonds on the same terms as other investors. It is estimated that such purchases aggregated about \$300 millions.<sup>5/</sup> Not yet available.

\* Less than \$50,000.

<sup>1/</sup> These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; series B and series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote <sup>3/</sup>). Sale of series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

<sup>2/</sup> Includes matured Treasury savings notes.

<sup>3/</sup> Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92 percent per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at the tax payment value

current at the time of presentation. (See also footnote <sup>1/</sup>.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 per value; this limitation was removed as of that date. <sup>4/</sup> Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately .48 percent per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

<sup>5/</sup> Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07 percent per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote <sup>1/</sup>.

Source: Daily Treasury Statements commencing November 1, 1942; prior thereto, Post Office Department.

- <sup>1/</sup> Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.
- <sup>2/</sup> Estimated on the basis of samples conducted by the Post Office Department.
- <sup>3/</sup> Sales and redemptions commence with May 1, 1941 when the special

defense series of stamps went on sale. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands. Details not available for May, June, and July 1941.

- <sup>4/</sup> Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.
- <sup>5/</sup> Net of sales less redemptions. See footnote <sup>1/</sup>.
- <sup>6/</sup> Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.
