## Geographic Distribution of Bank Deposits

In order to assist State War Finance Committees in subdividing their State quotas for war bond drives into county and other local goals, the Treasury Department this year has again made a compilation of the distribution of bank deposits by counties. This compilation has been made from data supplied (1) by the Comptroller of the Currency for all national banks and banks in the District of Columbia, (2) by the Board of Governors of the Federal Reserve System and the Federal Reserve Banks for all State member banks, and (3) by the Federal Deposit Insurance Corporation for all nonmember insured banks. The Federal Deposit Insurance Corporation also obtained data on the deposits of noninsured banks from the appropriate State supervisory authorities.

Data were compiled only on the deposits of "individuals, partnerships, and corporations" (listed as a single item in the banks' reports). These deposits, amounting to \$89.6 billion on December 31, 1943, exclude deposits of Federal, State, and local governments, interbank deposits, and certain minor classes of deposits, and compare with total

deposits of all classes of \$118.3 billion on the same date. The compilation covers all banks in the continental United States, including commercial, stock savings, and mutual savings banks.

The accompanying maps show the distribution of total deposits of individuals, partnerships, and corporations as of December 31, 1943, and the percentage net change for the calendar year 1943 for the twenty-five largest metropolitan areas and for the residual portion of the States, excluding these areas. The twenty-five metropolitan areas selected were those having the largest volume of total bank deposits of individuals, partnerships, and corporations on December 31, 1943. The boundaries of these areas follow county lines and are those used by the Bureau of the Census. The table below lists these metropolitan areas in the order of deposit size and indicates the component counties for each area.

It is interesting to note that while these twenty-five areas had approximately 34.5 percent of the nation's civilian popula-

tion at the end of 1943, they had 62.1 percent of the total deposits of individuals, partnerships, and corporations. The latter percentage has declined in the past two years, however. It was 63.6 percent on December 31, 1942, and 66.7 percent on December 31, 1941.

Table I, which appears on page A-4, shows the demand, time, and total deposits of individuals, partnerships, and corporations for each of the twenty-five metropolitan areas at the end of the calendar years 1941, 1942, and 1943, with the net increases or decreases for the years 1942 and 1943 and the percentage change.

Table II shows the same type of information as Table I but covers the whole country by States, and further subdivides those States in which metropolitan counties occur between the metropolitan area or areas falling within that State and the non-metropolitan counties of the State. This presentation of the data showing the division of metropoli-

can areas which fall across State lines has been made primarily because the War Loan Drives are organized on a State basis and these portions of metropolitan areas constitute important segments of each State's bond quota.

In order to make the geographic distribution as accurate as possible, deposits of branch banks located outside of the county of the head office have been attributed to the county in which the branch is located, rather than to the county of the head office. Cities not a part of any county, and cities and counties forming a single political entity, have been treated as separate counties for the present purpose.

The reports of a few institutions are based on reporting dates other than December 31. In the class of noninsured banks, a number of institutions have been excluded because of failure to submit data in time for inclusion in this compilation.

<sup>1/</sup> In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

<sup>1/</sup> Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90 percent per annum and Series F is considered to yield 2.53 percent.  
<sup>2/</sup> Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

<sup>1/</sup> Excludes postal savings bonds, Federal Housing Administration debentures, and guaranteed securities held by the Treasury.  
<sup>2/</sup> It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed

maturities. The abbreviations refer to the following corporations: Home Owners' Loan Corporation, Commodity Credit Corporation, and Federal Farm Mortgage Corporation.  
<sup>3/</sup> The Reconstruction Finance Corporation notes, Series X-A, X-B, and X-C, which are held entirely by United States Government agencies, have been classified as non-marketable issues.

\* Less than \$50,000.

<sup>1/</sup> These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; series B and series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3/). Sale of series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

<sup>2/</sup> Includes matured Treasury savings notes.  
<sup>3/</sup> Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92 percent per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at the tax payment value

current at the time of presentation. (See also footnote 1/.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 per value; this limitation was removed as of that date.

<sup>4/</sup> Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately .48 percent per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

<sup>5/</sup> Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07 percent per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1/.

Source: Daily Treasury Statements commencing November 1, 1942; prior thereto, Post Office Department.

- 1/ Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.
- 2/ Estimated on the basis of samples conducted by the Post Office Department.
- 3/ Sales and redemptions commence with May 1, 1941 when the special

defense series of stamps went on sale. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands. Details not available for May, June, and July 1941.

4/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.

5/ Net of sales less redemptions. See footnote 1/.

6/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.
