# What We Gain from the Proposed Financial Agreement with Britain 

The following addrese was delivered by Secretary Fingon before the
Horth Carolina Howspaper Inetitute at Chapel Hill, Korth Carolina on Januery 24, 1946.

Coming from Kantuoky I feel that I am vielting my friends and neighbors when I oome to North Carolina. All of ua in the south are proud of what you are dolng. We are proud of the great forward atridea you are making in induatrial and agricultural development. We are proud of the great forward atridea you are making in eduoation and publlo welfare. We see in North Carolina a vigorous and progreselve democracy bullt on the fine st traditiona and higheat ideala of the South.

Tonight we shall discusa a measure, on which the representatives of two democratic netiona reached agreement, that will better our chances of eatablishing a sound world eoonomy. That measure, which 1 a subject to the conalderation and apnroval of the Congreas, 18 the proposed innancial agreement between the United Kingdom and the United Statea.

The Amerioan people ahould underatand fully the nature and effecte of the proposed agreement in order that Congress can have the benellt of their viewa in applying ita beat judgment to the proposal.

One part of this agreement provides that the United Statea will offer a credit of $\$ 3,750$ million to Britain. There are certain miaconceptions about thla ilne of credit to Britain which ahould be dispelled at the outset. In some quartera this credit ia atill aald to be, through inadvertence, mlaunderstanding, or purpose, a glit.

The proposed line of credit is not a gift; it is a loan. It ia not merely a loan of ao many dollara to be repaid, but it ia an intereatbearing loan. The intereat ia not a nominal fee, but it is reasonably comparable to what it coata the UnIted Statea Government to borrow money.

The repayment of the loan and the intereat, moreover, is not all of the conslderation or benefit that the United Statea recelvea under thia financial agreement. Britain promisea, in addition to repaying the loan With intereat, to remove currency reatrictions. Koreover, Britain promiaes to avold trade controls whlch would diacriminate against American producta. On top of this Britain has agreed with the United Statea on the princlplea that should be followed by a pro-
posed International Trade Organization to 1 mprove world trade practices.

In addition to these benefita which the United Statea recelves, a general purpose of the loan, as stated in the agreement, "1a to facilltate purchasea by the United Kingdom of gooda and aervices in the United states." This will be a real contribution to our domestic program of high production, employment and national income.

A atrong oase could be made that in view of these benefita to the United Statea which I have mentioned last -- the expanaion of our marketa abroad, the principlea for an International Trade Organization -- the ellmination of trade diacriminatione -- the abolition of monetary controls which reatrlot trade -- that in view of these subatantial gaina, we could have made the $\$ 3,750$ million a gift instead of a loan. While $\$ 3,750$ million is a lot of money, it is a amall investment if it contributes to an expanaion of world trede and to peace and to general prosperity.

Some may aak that 11 it could be claimed that these oonalderationa fully supported a gift, why did we bargain for a loan and an intereatbearing one at that. The answer is almple. The Adminiatration wanted to make the beat agreement poasible from our viewpoint and to offer a plan which would be acceptable to our people and the Congrea.

Now in regard to this financial agreement we have an anomalous altuation. If the beneilta are aa great as $I$ have indicated, and they are, why is there aa much oppoaition as there la? The only explanation, I belleve, 18 that there are ao many benefits extending in so many direotiona in so many direot and indirect waye that the total plcture appeara to be complex, whereupon, partioular economic isolationiat or defeatiat groupa muddy the water and parade their pet prejudicea in pictureaque and aometimes demagogic language.

It ia my hope, therefore, to explain some of these benefita in auch plain language that those who wlah to underatand will not be lured away by colorful statementa without subatanoe. As we proceed to thla more detalled examination, keep this over-all sumary of the proposed innancial
ggreement in mind: the money extended Britain is not a gift but an interest-bearing loan wherein we recelve not only a return of the dollars and interest but benefits that in truth many believe would have supported a gift.

The prosperity of this country 18 closely ilnked with our export trade. Even during the 1930'日, when world trade was severely reduced, our exports accounted for some 7 or 8 percent of our agricultural and industrial production. For many of the producte of our factories and farms, forelgn trade meant the diference between prosperity and depression. And of all our forelgn trade, no part was more 1 mportant than that with the British Empire.

It 18 hardly necessary for a Southerner addressing southerners to state that British trade 1s 1 mportant to the south. But just look at cotton and tobacco, the two principal crops of the south. In the four years before the war, from 1935 to 1938 , for every two pounds of tobacco we consumed in this country, we sold one pound abroad. In that same period England alone bought more than two-thirde of all our tobacco exports. of our flue-cured tobacco a much larger proportion went abroad, principally to England. And the same thing 18 true with cotton. In the four years from 1935 to 1938 , for every bale of cotton consumed in this country we sold a bale abroad. England alone bought nearly one-fourth of all our cotton exports. It 1 s plain that without the British market it would not have been possible to maintain our cotton and tobacco production and prloe levels.

During the war Britain adopted certain monetary and trade controls which if continued would hurt serloubly peacetime trade. I gay, frankly, American business cannot afford to see Britain's wartime trade and currency restrictions oontinued.

In conneotion with these wartime controls you have heard of the sterling area, blocked sterling, and the dollar pool. What does this mean

Most of us spend our entire lives in the United states. We are accustomed to money in the form of dollars and cents. When we work we are paid in dollars. When we buy we spend in dollars. When we travel up North, we ilnd that they take our dollars, too.

In the world, however, there are other cur-
renoles. There are a few of inter-country application, but the world-wide currencies are primerily the dollar and the pound-oterling. If you have a dollar and want to buy something in another country you may have to change your money into its ind. If someone abroad wants to buy your cotton or tobacco, he has to change his money into dollars.

In this convertibility of money from one kind to another, restriotions and 1 mpediments on grow up or be 1 mposed. As you can readily see, thls puts a brake on trade between nations.

Now what do we mean by the sterling area? These are the countrieg of the British Emplre and some European countries who keep their monetary reserves in the form of sterling in London. Australla, for example, keeps its reserves on depoeit In English banke. Before the war, the stering area countries could draw on these reserves to buy goodg all over the world. If Australia wanted to buy American cotton, $1 t$ sold etering for dollars. But during the war, Britain had to etop the convertibility of sterling.

That bringe us to blooked sterling. Britain had to say to these countries of the sterling area -- to India, Egypt, Australia and all the reat -- the regerve you now have in aterling cannot be converted into dollars. You can use these gterling reserves for making payments to each other but not to outgiders.

One resson for restricting the convertibllity of sterling was that England did not have enough gold and dollars. During the war not only did Britain sell $\$ 4,500$ million worth of her foreign investments to Inance her expenditures, but also ghe incurred an enormous debt of $\$ 13,000$ million, measured in our money, held by foreign countrieg in the form of sterling balances in London banks and sterling securities of the Brit1sh Treasury. Britain had to restrict the convertibility of sterling. She couldn't convert such large amounts into dollare or other currencies. She had to block their use.

But it maen't enough to block the wartime sterling balances and end the convertibility of sterling. England had to mobllize all of its dollar resources to pay for war neede. The Erit1gh Treasury took over private holdinge of American securities in England, paying for them in sterilng, and sold many of these investments in the United states for dollars. And it took steps
to see that all of the dollar recelpts of the aterling area countries were mobllized for war.

This was done through the so-called dollar pool. For example, when an Egyptian oxporter sold goods in the United States, he turned over the dollars he recaived to the National Bank of Egypt and received Egyptian pounds. These dollars were then sold by the National Bank of Egypt to the Britioh Treasury for aterling. In this way all of the dollar recelpta of the sterling area are pooled in London. Then when a country In the sterling area needa dollars, bay Eeypt, it applies to London which allocates these dollars on the basis of the most esaentlal needs. To conserve dollars, London does not allocate funde to buy goods in Amerioa if they oan be secured from sterling area countries.

Of course, along with these ilnanolal oontrols, there are direct controls of 1 mporta in all sterling area countries. And these controls, like import licenses, are used to ksep out goods that must be pald for in forelgn exchange. In practice, this meant keeping to a minimum imports from countries that had to be paid for in forelen exchange.

These wartime restrictions are atill in effect in Britain. Clearly, they were essential for the war. They halped Britain to mobllize her foreign exchange resources and devote them to war purposes. They restrioted the use of her foreign exchange reaources for non-essentlal purposea. But these wartime restrictiona are dangerous in peace. During war, ordinary trade muat give way to war; but trade 1 a the very 111日-blood of peace. To restrict trade in timb of peace 18 to foroe poverty on the world. That 18 why we and all countries have an interest in aeeing the prompt removal of Britain's wartime restrictiona.

Neither England nor the countries of the aterling area have any wish to continue these wartime restrictions. But until Britain finda some other means to pay for 1 ts 1 mporta it cannot renove these reatrictions. Until the blocked sterling balances are aettled, sterling cannot be made convertible. Until Britain's dollar recelpta are incraased, ahe cannot parmit tha aterling ahe pays for her imports to be ueed freely in any country, and particularly the United Statea. Until Britain can earn enough to pay for her 1 moorts from the dollar area, she must continue the dollar pool. Until Britain exporta enough to pay for its esasntial importa it must
continue to $11 m i t$ importa from outalde the sterling area, and particularly from the United Siaiea.

The alimination of all these wartime reatriotions and discriminations is the majorinternational economic problem for the entire world. Whather they are eliminated depends on what we do. We are the largast exporting country in the world. It depends on what England does. England 18 the largeat 1 mporting country in the world.

As you know, England's attitude w111 influenos other countries, just as ours will. A number of countrise in the Britiah Erpire and in Europe are so completaly dependent on Britiah currency and trads, that they are invariably gulded by Britiah policy. That is why Britain'a deciaion to terminate her wartime reatriotions and diecriminations 1 is an essential prerequisite to establishing fair trade and currenoy practices.

This country has a partioular interest in the removal of England's currency and trade reatrictions. England 1 s our best customer. Onealxth of all our exporta before the war went to England. Nearly 40 percent of all our exports were sold to the Britiah Empire and the sterling area. Every section of this country, every American induatry has a vital interest in the opening of Britibh marketa to our products on falr and non-disoriminatory termb. The people of this country, the people of the South, cannot afford to aee England continue and extend her wartime restrictions on currenoy and trade.

Let's aee, for example, what that means to the South. It meana that England would concentrate $1 t \mathrm{~b}$ trado within the sterling erea whers countrisa would take payment in sterling for the cotton and tobacco and other thinge England would buy. It means that England would buy cotton primarily from India and Egypt; she would buy tobacco primarily from Rhodasia and the Near East. England would atimulate produotion in her trading area, and once such produotion was bullt up, the British market micht be lost to us forever.

You know the consequences to the South if Britain should adopt such a policy. In plain language, we would have no other alternative than to cut the produciion of cotton and tobacco by 20 or 30 percent. More than thet! With the decline in tobaoco and ootton exports the downward preasure on pricsa would be heavily increased. Tle might once again see 8 -cent tobaoco and 5 -cent ootton.

I speak of cotton and tobacco, only, because they are southern crope that we know so well. But the situation would be much the same in other Induatries. Wherever American farms and factorles depend on exports, the olosing of the markets of the British Empire and the aterling area would mean economic dieaster.

A good deal of progrese has been made toward establiahing a world in which countries can trade together. We have agreed on the falr currency and trade prinolples that are necessary to make It poselble for world trade to expard and grom. But it will do no good to agree on these principles unlese all of the trading countries are ready to put them into practice. We can move ahead on thie program only after Britain removee the restrictions on the use of sterling outelde the aterling area; only after the wartime dollar pool is abondoned; only after the blocked eterling problem 1e settled. When these wartlme restrictions have been removed it will be posible for world trade to expand and to make 1 te full contribution to world prosperity.

Frankly, we have told England that we should like to see her wartime ourrency and trade restriotions brought to an end. We want importers in England and the entire sterling area to have an opportunity to buy Amerioan produote if they prefer our producte. The Britiah Government, in turn, hae told us frankly that they have no wiah to continue these wartime reatriotions. If they could find some other meane to secure the flow of eaential importe of food, raw materiale and equipment into Britain they would be prepared to abandon at onoe these partime restrictions and discriminatione.

We all know that Britain, as an laland nation, rellea heavily upon trade. During the war What ohe ahlpped in and bought and what ahe ah1pped out and aold was thrown out of kilter. In 1944 she shipped out only 30 percent of what she did in 1938. Her export induatriea mere converted to war production. She has loet a large part of her merchant fleet. Her income from forelgn banking and ineuranoe services declined. The aold many of her most marketable foreign investmente, and loat the income from theee. Britain muat somehow make good the fall in her forelgn exchange income because she needs to import large amounts of food and raw materiale to feed her people and induatries.

This 18 the basio reason that Britaln neods
the money in this loan. The loan will help balanoe the difference between what ohe must buy abroad and what ohe sells untll ehe reostablithes a full flow of export trade. And may I add that though in the transition period her imports will far exoeed her exports that the resulting standard of living for Britain will be little different from the austere wartime levele.

In return for the loan, in addition to repaying principal and interest, here 18 what Britain undertakes to do by way of removing within a year, unlese we agree to a temporars extension, the wartime trade and currency controls:

First, all countries of the sterling area wlll be allowed to use the proceeds of thelr exports to England to buy goode in any other country, including the United states. That's because eterling arleing from ourrent trade will be made convertible.

Second, all oountries of the stering area W111 be able to uee the dollare they acquire from their trade $w 1$ th the United States to make purchases in the United states. That's because the sterling area dollar pool wlll be diseolved.

Third, England'e import controle will be administered in a manner which will not diecriminate againgt Amerloan produote. Any exports from the United states to England will be pald for in dollars or in eterling that can be converted into dollare by American exporters.

Fourth, England w1ll settle the blocked sterling obllgations out of her own resources. The funda that are released in settling these balances, whether as an 1 mmediate payment or as future paymente, can be ireely used for purchases in any oountry, including the United States.

Fifth, England will support the American propoaal for the establlehment of an International Trade Organization, for the reduction of trade barriers and for the ellmination of trade discriminations.

This agreement, then, will be a big atep in preventing economic warfare. It will aleo be a blg etep in oreating a world in which countries live and work together in peace and proeperity. For England it will mean a chance to feed her
people and reoonvert her industries in a world of expanding trade. For the United states $1 t$ will mean the opening of the markets of our beat customera, England and all the countrise in the Britiah Empire and the aterling area, to the products of our factories and farma. It will mean a larger American ahare in a larger world trads. For the south it will mean the atimulation of the great induatrial development which now beokona. Just as there cannot be national propperity in tha United statea without international prosper1ty, there cannot be that great economic development of the South without general proeperity in the United statea and the world. For all countries $1 t$ will mean a chanoe to reconetmuct a warshattered world with expanding trade, great employment and higher standards of IIving.

The alternative is as unhappy as it is clear. If England cannot secure the innancial asaistance of this loan, ahe w111 have to take drastic steps to ourtail her 1 mports and force her salea on other countriea. This means that England and the countries that depend on England' $\theta$ currency and trade -a the aterling aroa countries - would reduca their purchases in the United States and in the dollar area. Our exports would be excluded as far as poasible from Britigh markets. Britain would enter into bllateral agreements with countriea in Europe and South America, offering to swap her manufacturea for their food and raw materials. Suah a polloy would inevitably divide the world into conflioting eoonom10 bloos.

I have no doubt we oould defend ourselves. We would have to fight ilre with sire. We would be forced to retaliate. We mould set up restrictions and disoriminations of our owr. In blunt language, the world would be at war $-\infty$ economic war. And 11 we won, at beat we would win a aorry viotory. World trade would be deatroyed and all countries would suffer.

That is not the kind of a world our people want. Our basic goal is to sitabliah a world in which countries can live and work together in peaoe and prosperity. Two world wars and a world-wide depression have taught this generation the blttar lesaon that thare 18 no other road to peace - there 1a no othar road to prosperity oxcept through international cooperation. The politioal and eoonomic problems of the world cannot continue to be solvad by force. That road leade to deatruotion.

This 1a nothing new to the people of the South. They have long known that expanded trade among nations will contribute to the proeperity of all. It was Hoodrow wilaon, a Southerner brought up in Virginia, North Carolina, and Georgia, who warned an unheeding world that only through international cooperation will it be posalble to maintain peace. Without regret for what might have been we muat ilniah the job we have at laat begun. That job is to build through international cooperation a peacesul and proaperous world.

The paple of the United gtater and the United Nations have agresd on a program in which countries cooperate to maintain peace and prosperity. The United Nationa Organization, with 1ta Security Counoil, General Aseambly, International Court of Juatioe, and Social and Economic Council, conatitutsa one alde of this program. The Food and Agricultural Organization, the International Monetary Fund and the International Bank for Reconstruction and Development, and the proposed International Trade Organization constitute another alde of the aame program. The Inancial agreement with the United Kingdom is a sound, b1g step to the realization of this entire program for peace and prosperity. This 18 what $I$ hope the people and Congreas will bear in mind in considering the ilnanolal agreament.

## Our System of Government Has Stood the Test

> The folloving addree va delivered by. Secretary Vinson bofore the Baltimore Ascoclation of Comerce at Baltimore. Haryland on January 31,1946 .

Amerlcans have never been ones to rast upon their laurels or to engage in the luxury of living merely to oito thoir history. Prom our pant, however, we do gain experienoe and secure conflIenoe.

Ingtitution of banking which ia oolebrating ita 150th annivereary in Maryland and Baltimore. One of the most satisfying aspoots of banking is that It is a part of the agrioultural, industrial, and commerolal 1110 of the communty.
into consideration the welfare of the entire business community. Others depend upon the banker for advice and guldance. The banker has a great opportunity for leaderah1p. Our democratic sybtem of government requires leadership in all groups in and out of government.

Bankars have performed a real sarvice in the financing of the war. The problems of peace are al so 1 mportant. In two of our basic problems the banker can play a very large role. There is the restoration and maintenance of full production in a peacetime economy. There is the preservation and enlargement of our system of free enterprise in a world which has so recently been regimented for war.

Primarily it is the banker who must supply the credit for high levels of production and trade. In thi eregard, as in others, we must ralse our sights. Now as well as established enterprises must have credit. Financial ald ib a necessity for an expanding economy. Finanoial ald is a necessity for amall enterprise to hold lts own against giant concentration. A high and diversifled level of production, employment and income, ie both a causs and an effect of pree enterprise. In short, we want our whole economy in high gear.

Since banking 18 a part of the entire community, the debooiation of Commerce in honoring the 150 th anniversary of banking 18 , in a broader sence, honoring the Cly of Baltimore for 1 ts long and notable part in the development of this country.

Even before we had grown to nationhood, Baltimore was an 1 mportant center of colonial industry and commerce. Your enterprise and initlative oontributed to the bullding of the nation. The highwaye and rallroads that started from Baltiwore puahed into the west and helped open a new continent.

You have played an equally notable part in the development of the forelgn oommerce of the United States. The shipe built in Balltmors yards were the glory of the Amerloan merchant marine of a century ago. The famous Baltimore clipper ehipe salled all over the world, carrying Amerlican produce of a strange and distant world. Today, you are the third largest seaport of the country.

1tb past. The country has reason to be grateful for what you did during the critical years of the war. You gave a full share of your youth to the plghting services. The workers and businesamen of Baltimore produced steel, copper, 011, planes and shipe that went to war. And through this port, more than 100 million tons of cargo passed during the war with the precious freight of viotory.

Instead of trying to review the last 150 jears of our history, let us review in more detall the last tenth of 1 t . In the last 15 years we have partiolpated in the writing of more hietory than most people ever see during their entire lives. We have seen tremendous developments in the natural solences. Hore 1 mportant, we have seen our way of 11 fe , our form of government, put in the crucible and found not wanting.

S1noe the Fall of 1929 our way of 111e, our form of government, has atood trial under the woret depreselion this country has ever had, and the worat war that has ever engulfed the world. When our way of doing things has stood two such testras these, we oan be supremely confident of our ability to grapple with any problem that may confront us. We need no further assurance to face the future.

It 18 easy not to recognize the 1 mport of our suocess. It is so easy to forget. Without a great faculty of memory or 1 magination we cannot reconstruct our life during the gloomy daye of the depresaion or the dark days of the war.

During the depression many of our people suffered, flghting for the stark neceselties of 111e: some food, some clothing. Our unemployment problem then was mase unemployment. It was not a matter of a little traneitional unemployment. Several.millions of our people were out of work, not by choice, not through lack of initietive, but almply because they were not offered a job of any kind.

Even the lot of many who were employed wab unfortunate, Many were in jobs that stinfed their amblition. And most jobs carried poor pay. Our economy did not permit the pursuit of life, liberty and happiness in the way our founders must have pictured when they wrote that stirring constitutional phrase.

That depression with its closed banks, ite heartachos, its 5 -cent cotton, 10 -oent corn, and.

8-cent tobacco, was a stern trisl for our system of government. Not long afterwarde our way of life faced the test of fire.

We saw the peoples of Europe maimed, killed and conquered. Those were dark day日. Mere survival was a question. Remember Dunkirk.

Later we were attacked. War brought ua urgent, tough probleme. We had to grind to a halt much of our peacetime production. We had to lick shortages. We bad to remove bottlenecks. In short, we were faod with the taak of converting a civilian economy into military preparedness after the fighting had started. And we were fighting against countries thst had been building up their military might for years. You can lose a war that way. We almost did.

Mobllization for war put terrific strains upon our nation. Thoussinds of men and women changed jobs. Other thousands marched out of their homes, out of school, out of retirement. Materials in short supply had to be controlled. Inflation threatened. That meant the control of wages and prices.

In spite of this colossal effort, it appeared that we were losing the war in the summer of 1942. It appeared that stalingrad, Alexandria, and the Suez Canal would fall. Australia was threatened. The U-Boats roamed the oceans. If we had gained our military might just a little slower, or 11 the Axls had been just a little stronger, we would be living tonight under the heels of men who now stand trial at Nuernberg as criminsla against civilization.

On the piring line, where the might of this nation met the might of the enemy, our men in uniform bore the brunt reality of war. These men, their familles, and thelr loved ones, made the great and noble sacrifices. We must thank our soldiers, whether they be the living, the desd, or the living dead, by getting out and working for the peace every blt as fully as we worked for victory.

We gathered sufficient atrength to whip the depression and to win the war. That is agreat lesson. But there is a grester lesson. We mustered that strength and licked the depression and whipped the Axis without impairing in any way our basic principles of government.

Way of life simply because temptation dic not beckon. During the depression the atage was set for starry-eyed plans of salvation. Not only was the situation ripe for the sppesls of demagogio despota, but the sppeals were made. It would have been easy to turn to men with liquid promiee日.

Likewise, when the war clouds gathered and later when we were in it to the hilt, it would have been so easy for our people, beladen with suffering and sacriflce, to turn to some fatallatic course. Some asked us to bury our heade in the sand. Some asked for a negotiated peace. Instead we out-produced, out-fought, out-thought, and out-lsated the enemy. We did all this without selling any of our birthright. We preserved our democratic way of life, up to and including our constitutional right to gripe.

When we think of our constitutional right to gripe we think of those "confounded" war measures --wage control, priorities, allocations, rations, manpower and price controls. Those controls were necesaary. We were waging a total war. We were preserving a sound economy. Those controls were promulgated under law and if any individual thought that as to hif the application of any control violated the due procese of law he could go to the courthouse. That latchatring was never removed. But few went and fewer mon.

How did we fare under those "odious" controls? Every group in this country, worker, farmer, manufacturer, distributor, retaller, had a higher degree of prosperity than at any time in the history of our nation. Moreover, our standard of living was high. Oh yea, we had to put up with the old car and the old radio. But our people ate more food, better food, and a wider variety than ever before. We were clothed and boused. We even bougnt more jewelry and perfume, and went to more movies.

We whipped an enemy from within and from Without, and neither during the depreseion nor during the war was any life, liberty or property taken from any citizen without due process of law; neither during the depression nor during the war was the Blll of Righta abrogated; ne1ther durine the depression nor during the war Wes the election of our governing officials suspended.
our headaches and our heartaches. But we did the job, and our way of life, our system of government, stood the acid and the 11re.

We have our problema today and we wlll have our problems tomorrow. Eut we had some tough ones yesterday too. During the war we overwhelmed an enemy with our might, lived well at home, and kept inflation from our door. When we have proved ouraelves like that, we can face the future with full confldence.

Not only does this record give us conildence but also the record itself gives us a sound base upon which to bulld. He can face our veterans with leas embarrassment than we did last t1me.

We can tell our boya as they return that the things they dreamed Amarioa stood for as they fought from foxhole, plane or ahlp have been preserved. We can tell them that while they fought we produced the articlea of war and kept our country on her course with even keel. We can tell them that we have laid the foundation for full production, full employment and a high national inoome.

We can tell them that reconversion has come along in pretty good shape. We oan point out, for example, that physioal reconversion of war plants is virtually complete. We can point out that unemployment is only about one-hall that of estimates made just after the guna were lald down.

There are, of course, some kinks in the machine. Just as we had annoyances and difficulties, such ss shortages and bottlenecks during the war, we have temporary impedimenta today as we awing toward high levela of production. Prodigious production is sorely needed, not only to build our standard of living in which we have always prided ouraelves, but to counteract the inflationary pressure which 18 still our number one problem st home.

The Amerlican people have done a good job on the inflation front, so far. The cost of living in the 72 months of this war went up one-half of what it did in the 52 montha of World War $I$, and after November 18, 1918, the cost of 11 ving continued to incresse rapidly until June 1920. At that time the cost of IIving was over twice what it was at the start of the war. In the next 12
months came the crash. The cost of living has been stable since the close of Forld Far II and we are in a much better position to avoid a almilar collapse. While everyone knowa the increase in the cost of living during this war has pinched some of. us, and was a minor irritation to all of us, it is an excellent record compared with 25-cent augar last time.

The feeling of the busineasman who wante to remove price controls ia not hard to understand. He cooperated, as did we all, to win the war. He may now see a mirage of big proitta going by the board every day because he cannot charge more than celling prices for his goods. H1s conclusion that price controls ahould be abandoned is faulty.

There are many proverba and fables that counsel against grabbing today's chances without regard for the future. There 1 s sound phllosophy in the old saws: don't kill the goose that lays the golden eggs; look before you leap.

Likewise, we know beyond persdventure that America's great business tradition was not built upon the quicksand base of short range operations. 'Every succesaful bualnesaman knows that it ia tomorrow's profit that is the most 1 mportant. We do not want the boom-crash that followed the last war.

Disastrous inflation 18 still possible. It is likely that none of us has too much of a heart interest in coconuts, so let us use them for an example. The celling on coconuts was $\$ 61.50$ par thousand. They took the celling off. Next day the price was $\$ 140$, the second day $\$ 175$, and tha third day $\$ 252$.

We don't want price increases like that on augar, flour, meat, or even on shirts, dresses and suits, when we can find them. Until the goods on the shelves of our atores can match the money in our pocketbooks, in our asfe deposit boxes, in our socks, and in our readily convertible deposits, there will be a danger of inflation. There are symptions in the air, such as real estate and stock marketa, wage-price contests, to remind $u s$ that the atmosphere 18 still charged.

We have the tools to finish the job: price control, the buying of government bonds or $88 \mathrm{\nabla}$ ing in other ways, control of credit purchases,
and most of all the will to prevent inflation. We should extend the Price Control Act just as soon as possible to remove the lingering hope of the minority that they. can profit out of the scarcity that exists before our total reconversion makes avallable all of the items for which our appetite 18 whetted.

It 18 my bellef that more of our people than ever before realize the importance of the continuation of price oontrol. The Iowa poll of January 27 shows that of the several recommendations the president made in his recent radio talk the continuation of price and rent control was oonsidered the most necessary. From more and more quarters comes support for the extension of the Stabilization Aot. Just this week an AntiInflation Committee representing nearly all of the leading businesamen and merahants in the Distriot of Columbla began a campalgn to prevent infation and to keep the O. P. A.

Te have won the inflation battie for nine rounds. It would be pathetic if we lost the tenth and last round.

The battle against inflation, whlle the most important today, 18 only one of the problems that confront us at home. There are all of the probleme of inding and oarrying out the means of full production, full employment, mase purohasing power, and efficient distribution. Each of these factors augments the others. These objectives, like total war, require vigilance and action on many fronts.

We must conquer the housing problem. This is a fleld wherein the realization has never been up to the ideal of a truly Amerioan standard of living. The inadequacy of our housing has been acoentuated by the war, so we are further behind
than ever befors. A real housing program will be a great oontribution to our entire econumio condition because it is a big market for many materiale and it has a great effeot upon employment.

Our way of life means a deoent wage for all. The present law sets a forty-cente-an-hour minimum. That 1 a far too low. We must have a substantial inorease in the minimum wage unleas we mean to render only lip service to our Amerioan standard of living.

We must do everything in our power to ald the veteran. He 1 s the one that made the gonuine saorifices in this war. Not only has he rendered the great service, but now he must face the probleme of becoming an integral part of our peacetime economy. We must make the interruption to his career of as little disadzantage ae posible.

These, and other problews, confront us on the bome front. In addition we have the political, social, and economic problems among nations that twioe in our generation rocked us into war. If the nations of the world can solve their probleme by peaceful discussion and at the same time be ready, willing and able to stamp out the international gangeter before be commits his high felonlea, we will have prevented war. since wars are not ordalned but are man made, man can avoid war by solving the problems that cause war.

The would be less than frank if we did not reoognize that at times there will be darknees. But Americans are not by nature pessimistio and ahould not be now. There is a proverb that he who lights a candle is better than he who ourses the darkness. Let us all go forth and light a candle in watever place or atation we be. These specks of light, multiplied many times will dispel the darkness.

# Individual Income Tax Returns for 1944 With Adjusted Gross Income Under \$25,000 

Income and Tax Liability

The Buresu of Internal Revenue recently completsd preliminary tabulations of individual income tax returns for 1944 covering Forms $\operatorname{Wi}-2$ and Forms 1040 with sdjustsd gross income under \$25,000. This 18 the ilrst of two articles summarizing the data tabulated. This artiole presents dats with respect to amounts of income and patterns of inoome. The second articlewill nresent data on the marital and dependency statua and the number of employers reported on returns showing reoeipt of salaries or wages.

In preparing these data, the Bureau of Internal Revenue used a preliminary sample of returns which was extended to give national coverags. This sample 1s discussed further in the section on "Composition of Sample". By this technique, the Bureau is able to make data avallable on 1944 individual returns much sooner than was possible for earlier years. A fuller coverage of returns with adjusted gross income under $\$ 25,000$, and oomplete representation of returns With adjusted gross inoome of $\$ 25,000$ and over will be presented in the pinal Statistics of Income reports which will be published at some future date.

Forms W-2 and Forms 1040 were the two types of returns which could be flled for 1944. The Form $W-2$ is the withholding receipt which persons with incomes under $\$ 5,000$ derived wholly from wages, dividends or interest, and including not more than $\$ 200$ from income not subject to withholding, were given the option of filing as the final tax return. The Form 1040 was used by all other persons including those with incomes under $\$ 5,000$ who were given the option of filing a short-form return on Form 1040. Facsimiles of the two forms are presented on page A-14.

## Number of Returns, Income, and Tax

An ostimated total of 46.2 I/ million returns (Forms $w-2$ and Forms 1040) with adjusted gross incoms under $\$ 25,000$ were covered in the preliminary study, cowprising returne with adjusted gross income of undsr $\$ 7,000$ and those with adjusted gross income from $\$ 7,000$ to $\$ 25,000$ which showed tax 11ability in axcess of the sum

1/ Estimated on the basis of prellminary figures availablo in Auguat 1945. Subsequent information, though atill not final, incicates that the ostimate of 46.2 million may be overstated to the extent of about three-fourths of a million foturns.
of any withholdings and payments on 1944 declarations of estimated tax. Excluded from the study wore approximately 300,000 Forms 1040 with adjusted grose 1 noome from $\$ 7,000$ to $\$ 25,000$ which reported withholdings and declarstion payments totalling an amount equal to or in exoess of liabllity, if any. These 46.2 million returns reported 104.6 billion of adjusted groseinoome. Taxable returns totalled 41.4 million and socounted for about 98 peroent of the adjusted gross inoome reported. The tax liability on the taxable returns aggregated $\$ 11.8$ billion. Data have not yot been prepared for returne with adJusted gross income of $\$ 25,000$ or more. It is estimated that such returns number approximately 150,000 and have an sggregate tax ilability of 1088 than $\$ 5$ billion. The table below summarizeo the number of returns, adjustod grosa income and tax liability for the estimated 46.2 million returns with adjusted gross income under $\$ 25,000$ included in the study.

| Returns with adjusted grose inoome under $\$ 25,000$ | Amount | Peraent |
| :---: | :---: | :---: |
|  | $\begin{aligned} & \text { (In min } \\ & \text { lione) } \end{aligned}$ |  |
| Number of returne: Taxable returns. Nontaxable returns. | $\begin{array}{r} 41.4 \\ 4.8 \end{array}$ | $\begin{aligned} & 89.6 \\ & 10.4 \end{aligned}$ |
| Total. | 46.2 | 100.0 |
|  | (In billions of dollars) |  |
| Adjusted groes inoome: Taxable returns. Nontaxable returns. | $\begin{array}{r} 102.9 \\ 1.7 \end{array}$ | 98.3 1.7 |
| Total..................... | 104.6 | 100.0 |
| Tax 11ability................ | 11.8 | 100.0 |

Table l, at the end of thie artiole, prosents more detalled data on income and tax liability classified by aize of adjusted gross inoome.

## Income Patterns

Sources of Income and Loss. The $\$ 104.6$ blllion of adjusted gross income reported on the 46.2 million returns comprised positive items of Income totaling $\$ 105.5$ billion offset by $\$ 0.9$ blllion of losses. The sourcea snd amounts of

Income or loas uad to arriva at adjustad groas inoome are listad below.

| Souroe of inoose or loge | Inoome | Loas | Not inoome or 1000 |
| :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { (In milliona. } \\ & \text { of dollars) } \end{aligned}$ |  |  |
| Salarios or wages. | 86,002 | - | 86,002 |
| Dividends and/or intereat. | 2,257 | - | 2,257 |
| Annuitioa and penaiona.... | 149 | - | 149 |
| Ronte and royaltios - net prof1t or lose........... | 1.535 | 137 | 1,399 |
| Bueiness or profosaion net profit or lose...... | 10,949 | 413 | 10,536 |
| Partnerahipa - net proilt or losa. | 3,063 | 60 | 3,003 |
| sale or exohange of oap1tal ase日ts - net gain or losa. | 626 | 173 | 454 |
| sale or exohange of proporty other than oapital easets - net gain |  | 173 95 |  |
| Estates and trusts... | 417 | 95 | 417 |
| Other souroes, not epeoified. | 465 | - | 465 |
| Total. | 105,522 | 878 | - |
| Adjusted grose inoome. | - | - | 104,646 |

The frequenciea with which the various sources of income or $108 s$ were reported on the 46.2 million returna with adjusted groea income under $\$ 25,000$ are as followa:

| Souroe of inoome or lobs | Number of returns reporting |  |
| :---: | :---: | :---: |
|  | Inoome | Loss |
|  | (In thousanda) |  |
| Salaries or wagae | 40,045 |  |
| Dividenda and/or interat | 5,404 |  |
| Annulties and pensions...... | 246 | - |
| Renta and royalties - net profit or loss. $\qquad$ | 3,330 | 627 |
| Businece or profeasion - net profit or lose............. | 5,992 | 518 |
| Partnarshipa - net profit |  |  |
| or lose.................. | 1,004 | 69 |
| Sale or exohange of oapital aeseta - net gain or lose. | 899 | 367 |
| sale or exohange of proporty other than oapital asete - net gain or loas. |  | 69 |
| Eatates and truata............ | 263 | - |
| Other aourasa, not apeolfled. | 894 | - |

From Table 2 it 1 a posalble to compare the income pattern on returne in the under $\$ 5,000$ adJusted gross inoome range with the inoome pattern for the $\$ 5,000$ to $\$ 25,000$ range. In summary, slmost 88 percent of all returna with adjuated grose income under $\$ 5,000$ reported alarles or wagea; over 10 percent reported dividenda or intereat; about 22 percent showed other income. In contrast, lesa than 70 percent of the returna With adjuated grose income frow $\$ 5,000$ to $\$ 25,000$ reported aalaries or wagea; over 40 peroent re-
ported dividende or interest, and almost 60 percent reported other inoome.

Returns with Salaries or Wagea. Of the 46.2 million returna oovered in the otudy, over 40 million or 87 peroent, reported reoelpt of ealarios or wages. The following table presenta the number of these returns reporting ealarioa or wages alone or salariea and wagea together with inoome from other souroes.

| Returne with ealarle or wages | Number of roturns | Poroont of total |
| :---: | :---: | :---: |
|  | $\begin{gathered} \binom{\text { In mina }}{\text { liona }} \end{gathered}$ |  |
| salaries or wages only... Balaries or wages and | 32.5 | 81.1 |
| dividende and/or interest. | 2.7 | 6.7 |
| Salarles or wages and other inoome 1/. | 3.5 | 8.8 |
| 8alarlee or vages, dividende and/or interest. and other inoome........ | 1.3 | 3.3 |
| Total..................... | 40.0 | 100.0 |

As the table showa, of the 40 million returna roporting ealarios or wages, 32.5 million or 81 porcent reported no inoome from any other source.

The item "salariea or wages" in the case of Forms W-2 compriees only auch inoome as was subject to Withholding. About 1.1 million Forms N-2 reported, in addition to alariea or wages of the above category, amounts of aalariea or wages not aubject to withholding and dividends and interest aggregating about $\$ 40$ million. Amounts of income from each of these aources were not separately reported. They wore tabulated in total as dividends and interest, and the 1.1 million returns involved were claaalfied among the 2.7 million returns having dividends or interest only in addition to aglaries or wagea.

Tho distribution of all 40 million returne Wh asiaries or wages in Table 3 by sizo of such inoome indicates that over one-flfth of the returns ahowed alaries or wages of 1088 than $\$ 1,000$, and over one-half showad salaries or wages of lese than $\$ 2,000$. Of the 4 million returna reporting dividends or intereat in addition to salaries or mages, over two-thirds had dividende and intereat totalling lesa than $\$ 100$, and

1/ Nother incomen includes income (or 108s) from annuitiss and pensions, rents and royalties, business, partnarshipe, sale or axchango of capital asests or other property, ostates and triste and miscollaneous nourcos. other than salarise or wages, difidends or intarest.
only about 10 percent had dividends and interest of $\$ 500$ or more. On Forms $\forall-2$, amounte of dividende and interest were 11 mited to a maximum of \$100. The 1.1 million Forme $W-2$ reporting this item are included among the two-thirde having such inoome of less than $\$ 100$.

Of approximately 5 million returne which renorted other income in addition to salaries or wages, almost one-third had net positive income from sources other than salarles or wages and dividende or interest totalling less than $\$ 100$, or had a net lose from such sources. An additional one-third had net other income of $\$ 100$ to \$500, and the remaining one-third had net other 1ncome of $\$ 500$ or more.

Returne with Dividende and/or Intereet. DivIdends and/or interest as the sole sources of income were reported on about 150,000 returns. D1vidende and/or intereet and other inoome, but no ealaries or wagee, were reported on 1.2 mlllion returns. These returns, in addition to the earlier mentioned 2.7 million having ealariee or wages and dividende or interest, and the 1.3 mll lion returns having salaries or wages, dividende or interest, and other income, y1eld a total of 5.4 million returns ( 12 percent of the 46.2 mil11on) reporting the reoipt of dividende or 1 n terest. More than 3.1 million, or over one-half of the 5.4 million returne had dividends and interest of lese than $\$ 100$. These 3.1 million returne include the 1.1 million Forme w-2 for which the item "dividende or interest" includes salarlee or wages not subject to withholding.

Returns with Other Income 1/. A total of 10.9 m11110n returns on Forms 1040 , or 24 percent of those covered by the study, reported income (or lose) from sources other than salaries or wages, or dividends or interest. The $10.9 \mathrm{mil}-$ lion returns include (1) about $4-3 / 4$ million returns which ahowed only income from sources other than salaries or wages, dividende or interest; (2) the earlier mentioned 3.5 million having salarles or wagee as well as other income; (3) the 1.2 million having dividends or interest in addition to other income; and (4) the 1.3 million having salaries or wages, dividende or interest, and other income.

Of the total of 10.9 million returns report-

[^0]ing inoome (or lose) from other than salaries or wages, dividends or interest, about 1 million, or 10 percent, had a net lose from such other sources. About one-half of the returns reported net positive incomes from other sources of less than $\$ 1,000$.

## Type of Deductions

Returne claesified as having taken the standard deduction compriee (a) all Forme $W-2$, (b) Forme 1040 with adjueted groes income under $\$ 5,000$ ueing the tax table, and (c) Forme 1040 With adjusted grose income of $\$ 5,000$ or more using the $\$ 500$ standard deduction. All other returns were claselfled as having itemized deduotions.

Table 1 at the end of this article ahows that a total of 44.2 million returne reported adjusted groes income of less than $\$ 5,000$. Of these, 37.2 million or 84 peroent, With adjusted grose income aggregating about $\$ 73$ bllllon, took the standard deduction. The remaining 7 million returne with itemized deductione had an aggregate adjusted groes income of $\$ 16$ billion and deductlons of $\$ 3$ blllion, leaving a net income of $\$ 13$ billion.

Of the 2 million returne with adjusted grose Income from $\$ 5,000$ to $\$ 25,000$ included in the study, almost 1.2 million or 60 percent, with aggregate adjusted grose income of $\$ 5.2$ billion, took the $\$ 500$ standerd deduction. The ee returne had net incomes equal to adjusted grose income 1ese $\$ 500$ per return, or an aggregate of about $\$ 7.7$ billion net income. Over 0.8 million of the returns with adjusted groes income from $\$ 5,000$ to $\$ 25,000$ itemized deductione. These returns had adjusted groes income aggregating $\$ 7.4$ billion, and deductions aggregating $\$ 0.9$ billion, with reeultant net income of $\$ 6.5$ billion.

## Composition of Sample

The data contained in the preliminary etudy were derlved from a eample of 428,000 returne, etratifled according to elze of adjusted grose income, and comprieing 342,000 Forme $W-2$ and Forme 1040 with adjusted grose inoome under $\$ 7,000$, 29,000 Forms 1040 with adjusted groes income from $\$ 7,000$ to $\$ 10,000$ and 56,000 Forme 1040 with adjusted groes income from $\$ 10,000$ to $\$ 25,000$. The sub-sample of returne with adjueted grose income under $\$ 7,000$ was iteelf composed of four etrata independently selected.

Data with respect to the above eix sub-
aamples were extended to their separate estimated oub-universes, which combined to yield an estimated total univerae of 46.2 million individual returna with adjuated grose income under $\$ 25,000$. From this univeree were excluded Forma 1040 with adjuated groas income irom $\$ 7,000$ to $\$ 25,000$ which elther were nontaxable or else were taxable but reported withholdinga and daclaration paymenta equal to or in excesa of liability. Thase are eatimated to number about 300,000 .

## Changes in the Internal Revenue Code

The comparability of the income and tax data for 1944 with that of the previous year is affected by amendmenta to the Internal Revenue Code which were contained in the Individual Income Tax Act of 1944. The principal chances aflecting the data tabulated from indjvidual returns were as follow :
(a) For 1944 all citizens or residents of the United states, includins minora, who nad grosa income of $\$ 500$ or more were required to flle income tax returns. In 1943 a $31 n g l e$ person or married person not living with husband or wife was required to ille $1 f$ gross income equalled or exceeded \$500. Married persons Ilving with husbanda or wives were required to flle if grosa Incomes equalled or exceeded $\$ 624$, or if comhined groas income equalled or exceeded $\$ 1,200$. In addition, all persons llable for tax for 1942 were raquired to 111e for 1943 . A number of persons who had incomes of leas than $\$ 500$ from wages gubject to withholding filed returns for 1944 in order to aecure refund of taxes withheld during tile year. Joint returna were permiasible for 1944 even though one apouse had no income; on joint returns the aggregate income, deductions and credita were treated as though huaband and wlle ware ons person, and exemptions were allowed for both.
(b) The personal exemntion for alrtax purposes was changed to a uniform $\$ 500$ for the taxpayer, for hle (or her) spouse, and for eacin dependent.
(c) A dependent was redeinned as any cloaely related oerson for whom the tampayer furniahes over hall of the support, provided that auch person doea not raceive an annual Brojs income of $\$ 500$ or more, and 1a a citizen of the United

States or a reaident of the United states or a contiguous country.
(d) The Victory Tax waa repealed and a new normal tax of 3 percent was lmposed on the net inoome on each return in excesa of a llat exemption of \$500. However, a hurband and wifa siling a joint return were allowed a normal tax exemption of $\$ 500$ plus an additional $\$ 500$ or the amount of the amaller of the two incomes whichever 1a leas.
(e) The previous normal tax and gurtax were combined into a new surtax with rates ranging from 20 percent on the ifrat $\$ 2,000$ of surtax net income to 91 percent of the portion in excesa of $\$ 200,000$.
(f) The item "adjuated groos income" introduced by the Act, is defined as grosa income minus allowable trade and busineas deductions, expenges of travel and lodging in connaction with employment, reimburaed expenaes in connection with employment, deductiona attributable to renta and royalties, certain deductiona of life tenanta and income beneficiarles of property and losasa from aale or exchange of property.
(g) The scope of the almplified table method of tax computation was broadened (1) by raising the upper limit of the table from $\$ 3,000$ to \$5,000, (2) by extending its uae to all types of income, and (3) by ralsing the atandard allowance for deductions incorporated in the table from 6 to 10 percent.
(i) Persons with fross income of leas than $\$ 5,000$ derived entirely from wages, intereat, and dividends and including not more than $\$ 100$ from sourcea not subject to witholdine were kiven the option of f1ling the withholding receipt, Form $N-2$ as a final tax return. In such ingtances the tax was determined by the collector on the basia of the gross income and axemntions reported by the taxpayer, from a tax table provided by law which allows about 10 percent of total income in 11eu of deductions for charitable contributions, intereat, taxes, medical expenses, etc.
(1) Fon returna with adjusted grose income of $\$ 5.000$ or more, the Act provided a standard allowance for deductions of $\$ 500$.

## Publication of Statistics of Income for 1942, Part 1

The Treasury Department recently released the final report, "Statistlos of Inoome for 1942 , Part 1". Thie report, which 18 preparedeach year by the Bureau of Internal Revenue, 1 s complled from individual inooms tax returns, taxable rlduolary inoome tax returna, estate tax returns, and gift tax returns. Summary tables from "Btatletios of Inoome for 1942" wers published in the April 19451 sauc of the "Treasury Bulletin". The reoently published oomplete raport may be puroheed from the U. S. Government Printing or110e, Washington 25, D. C., prioe \$.55.

The report sets forth by various oleseliloatlons, data relative to the inoose, deduotione, exemptions, oredite, tax liability, and other pertinent faote reported on inoome tax returne for 1942 11 © in 1943 . Ther are inoluded hietorioal presentatione of ignifioant data raported on the returne slled for earlier yeare, and a synopela of tax ratec, oredite, and other provialons of the Federal tax laws whioh affeot the comparability of these hietorioal deta.

## Treasury Market Financing

> Elstorical detaile of Trasury markot financing operations involving bonds, notes, and cortifloates of indebtedness, beginning with the fourth Mar Ioan, are publiched in the tables on pagee 32 and 33. Dotaila of voekly Treasury bill offerfags are ehom on pagee 34 and 35 .

## Refunding in January

On January 21, 2946, the secretary of the Treasury announced the offerling of new one-year $7 / 8 \%$ Certifloates of Indebtednees in exchange for the certifloate lasue maturing February $1,1946$. Cash subseriptions were not aocepted.

The maturing iasue was outstanding in tha amount of 5,043 million. The Treasury reports on the ownership of Government seourities indioate that on December 31, 1445 about $77 \%$ of the maturing certifloates were owned by reporting commeralal banks and Federal Reservo Banks.

The now oertiflcates were dated February 1 , 1946 and w111 mature February 1, 1947. Intereat at the rate of $7 / 8 \%$ per annum 1 a payable on

August 1, 1946 and Fobruary 1, 1947. Intoreat on these oertlfloates 1 a eubjeot to all Pederal taxes now or horeafter 1 mposed.

The cortifloatea were lesued in bearer form only, in denominations of $\$ 1,000$, 5,000 , $\$ 10,000, \$ 100,000$, and $\$ 1,000,000$. The exchange was on a par for par basis. The subsoription books wore open from January 21 to the dose of bubiness on Jenuary 23 exoept for the reoelpt of aubseriptiona frow holders of $\$ 100,000$ or leas of the maturing oortifloatea, for whioh the booke remalned open through January 26.

Exohanges awounted to $\$ 4,954$ million or $98 \%$ of the maturing lasue, leaving 89 alllion to be paid in oash.

## Sales and Redemptions of Uniteā States Savings Bonds

#### Abstract

Unitad States eavinge bonde were flyst offersd for ale in Maroh 1935. Bonds of serise $A-D$ vere bold between March 1935 and Apri1 1941. Ser1e日 E, F, and $G$ bonds bave been on ale aince May 1 , 1941.

Sorise A-E bonds are 10-year discount bonds aold st $75 \%$ of maturity value, and yleld $2.90 \%$ per annum if hold to maturity. Seriee F bonde are 12-year discount bonde bold at $74 \%$ of maturity value, and jield $2.53 \$$ per annum if held to maturity. Serles 0 bonde are l2-year ourrent income bonds, sold at par, bearing intereat at $2-1 / 2 \%$ рег snnum, and redosmabia at par at maturity or at atated prices leas than par before mefurity.

Purchases of series $A-D$ bonds were 11mitad to $\$ 7.500$ 1日eue orice in any one calendar year. Theae bonda were avallable to all subscribers prior to April 1, 1940, and to individuels only after that date. Purchase of series $E$ bonds are limited to 33,750 iesue price in any one calendar yaar, and may be made only by individuala (defined as natural peraona only). The 11mit for aeries $F$ and $G$ combined 18 $\$ 100.00019 s u 8$ price in any one calendar year $(\$ 50,000$ in calendar yaar 1941).

Series $F$ and $G$ bonda are avellable to all aubscribers except commercial banka. Com mercial banke, however, were permitted to purchase these bonds during oertain perioda and with oertain reatriotions. For detalle concerning theee periode and restrictions ee "Tressury Eulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946. page 37, footnote 9 . For detalla concerning features, investmant fields, and redemption valuer ese "Ireecury Bulletin" for May 1945 , pagea $A-3$ and $A-4$.

Series A bonds mstured in 2945, and bonds of eeries $B$ began to meture in Jenuary 1946. Maturad bonds turned in for redemption are included in the ilgurea on redemptions. Matured bonds outstanding are reflected in the intareat-bearing debt until all bonde of the aeriee bave aatured. when they are traneferred to matured debt upon which interest has ceased. in accordance with the practice of the Dally Treasury Statement.

In the following tablea sales flgurea are quated at iseue price, snd redemptione and amounte outatanding at current redamption velues. Amounts of series $G$ outstanding are quotad at par.
