**Statement by Secretary Vinson on the Proposed Financial
Agreement with Britain, before the Senate Committee
on Banking and Currency, March 5, 1946**

I am happy to appear again before this committee. Your work and all of the work throughout Congress as we start our postwar building is of vital importance to our people. I hope that what I have to say will be helpful to you.

Our people ask their government to do everything possible to achieve enduring peace and sound prosperity. This objective requires vigilance and action on many fronts.

This morning we are concerned particularly with our international economic program. In my judgment, the best milestones we have seen on the road to peace and prosperity is our international economic program. This program is well developed and we can soon put it into full effect. But if this program is to succeed it is necessary to have the full participation of England. That is why the President stated in his message "that the next order of international business before the Congress should be our financial relations with the United Kingdom." The purpose of the financial agreement with England, which is now before you, is to make it possible to put this program into immediate operation.

We have based our policy on a simple proposition: conflicts between nations should not be settled by fire and sword; international problems should be solved in the common-sense way. The common-sense way is to deal with them through discussion and agreement, through international cooperation. It is essential, of course, for the United Nations to cooperate on political problems that effect world security. But that is not enough. There must be a sound economic foundation for peace. That foundation can be built only through cooperation among the nations.

Our International Economic Policy

For the past five years this government has stood for, and has advocated, a definite international economic policy. That policy is to restore world trade, to free it from the restrictions that isolate countries and from the discriminations that divide nations into conflicting economic blocs. We have not been content with

securing agreement on abstract principles. International economic problems must be dealt with in the concrete terms in which they arise. The responsibility for dealing with these problems does not rest in any one country. They are international in scope and they can be dealt with only when and if the several nations get together. We have proposed, therefore, that the United Nations provide the means for continuing cooperation through the International Bank, the International Fund and an International Trade Organization.

This policy of international economic cooperation is a frank recognition that the breakdown in world economic relations in the 1930's was an important factor in prolonging and intensifying the great depression. It is a frank recognition that the economic warfare of the 1930's was part of the master plan for aggression by Germany and Japan. Admitting that we should learn from experience, we have urged the United Nations to adopt a comprehensive policy of international cooperation to restore world trade.

The success of this policy depends upon securing prompt economic reconstruction, orderly currency arrangements, and the reduction of trade barriers. World trade cannot be restored until the war-devastated countries in Europe and the Far East are again able to produce, and to buy and sell. World trade cannot be restored until the currency restrictions that have plagued the world for more than a decade have been eliminated. World trade cannot be restored until the present barriers that block trade have been abolished. When the countries of the world are again producing, when they have put into effect fair currency and trade practices, world trade will expand and grow. Then the business men of all countries can secure access to world markets on fair and equal terms.

This international economic program is a big and vital part of what we are doing to give the American people peace and prosperity. You cannot maintain American production and employment in the midst of world-wide depression. You cannot

expect sick and hungry men to build a peaceful world. You cannot raise a new generation dedicated to peace in the ruins of bombed-out cities. The chances for maintaining peace will be immeasurably better in a world that is working and trading — in a world in which economic warfare has been eliminated.

Importance to the United States

Our own program of maintaining high levels of production, employment and national income is dependent on our success in expanding world trade. Foreign trade is an important factor in our economy. We need markets abroad. Before the war, 8 percent of our physical production of agricultural and industrial goods was sold abroad. In many of our more important industries more than 10 percent of the entire output was exported.

In 1937 and 1938, 31 percent of our raw cotton, 30 percent of our leaf tobacco, and 12 percent of our wheat and flour, were sold abroad. Looking at industrial products, 54 percent of our refined copper, 15 percent of our farm equipment and machinery, 14 percent of our automobiles and trucks, 14 percent of our industrial machinery, and 11 percent of our refined mineral oil were sold abroad. The fact of the matter is that for large segments of agriculture and industry, exports mean the difference between prosperity and depression.

Our need for foreign markets will soon be greater than ever before. American production is at the highest level ever reached in peacetime. As a nation we must learn to use an industrial plant with a capacity nearly twice as great as before the war. For every steel ingot produced before the war we can now produce two. For every machine made before the war we can now make four. There are new fabrics, new plastics, new processes. And in agriculture, too, we have reached new records of production for nearly all our major crops.

Much the largest part of our output will, of course, be sold at home; but we must have foreign markets for many of our products. The world needs and wants American goods. We must make sure the world can buy them. The one way to keep the markets of other countries open to American products is to bring about an expansion of world trade. We want to trade. We want to export and we want to import. We ask no special advantages

in world trade. And we want no discriminations aimed against us.

A program that stimulates a full flow of trade among nations is necessary for world recovery. That is good business for America. But it is because of no sordid motive that we urge this program on the United Nations. It is also good business for the entire world. We want a prosperous America. We want a prosperous world. We gain more than material benefits, important though they are. In a prosperous world we gain a genuine chance for lasting peace.

That in brief is the program of international economic cooperation this Government has proposed to the United Nations. We have made much progress. The World Fund and the World Bank have been ratified by 35 countries. The inaugural meeting of the Fund and Bank will start in Savannah within the week. We have reached the stage where much of this program can be put into practical operation.

The one danger is delay. The longer we wait the longer there will be reliance on the currency and trade restrictions, which reached new heights during the war. If postwar trade becomes adjusted to the protection that these devices provide, there will be strong opposition to their removal. That is why the success of our program depends largely on the prompt application of fair currency and trade practices. But England will not be able to put these positive principles into effect until she is sure she can secure her essential imports of food and raw materials.

The British Problem

The people of England are confronted with a difficult and urgent problem, vital to their whole economy. England must increase her export trade in order to buy the imports she needs. She must expand her export trade to the level necessary to maintain the living standard of her people and the functioning of her industries. In addition, England will require help from abroad to secure, during the next few years, the imports she must have. England must assure her people the means of living and working in the five critical years ahead.

The war has seriously disrupted England's international economic position. In the three years before the war England imported annually \$4,200 million of goods. She paid for 55 percent

of her imports by her merchandise exports. About 24 percent of her imports was paid for with the net income from British investments in all parts of the world. Another 17 percent of her imports was paid for out of the net receipts from shipping, insurance, banking and other services. England's foreign exchange receipts from all these sources have been sharply reduced.

In order to devote as much of her industrial output as possible to war purposes Britain converted her export industries to war production. Lend-Lease aid from the United States, Mutual Aid from Canada, and foreign loans in sterling made it possible for England to secure her war-time imports without maintaining the prewar volume of exports. In fact, British exports were deliberately reduced until in 1944 they amounted to 30 percent of the prewar volume. The producing power thus freed was diverted to Britain's armed forces and to her munitions industries.

England's exports have been rising since the end of the war and they will continue to rise. In view of the loss of foreign exchange from other sources, England's exports will have to be increased far above their prewar volume. But even with favorable conditions of world trade and with help from friendly countries England will need several years to expand her export trade. During these years she must find some way to feed her people and her factories with imported food and raw materials.

In financing her overseas war expenditure and her wartime imports England sold many of her foreign investments. These investments before the war yielded net foreign exchange income of nearly \$1,000 million a year. With the sale of some investments, the destruction of others in Europe and the Far East, and with the new foreign debt that England incurred, the net income from her foreign investments has fallen sharply. In 1945 it was less than \$400 million. With present prices, net income from foreign investments will pay for only one-third the quantity of imports it bought before the war.

Shipping and other services have always been an important part of England's international business. During the war the losses from enemy action were enormous, and in spite of the fact that shipbuilding was given high priority, England's merchant fleet was greatly reduced. The insurance, banking, and commercial services that England formerly supplied to all parts of

the world have also fallen off along with her trade. With greatly expanded world trade, British income from shipping and other services will again pay for a large part of England's imports. But this, too, will take time.

Not all the ravages of war are seen in rubble heaps. Compare the cost to Britain of her lost foreign assets and her new foreign debt, amounting to more than \$17,000 million, with the \$6,000 million of damage done by German bombs, robots, and rockets and the \$3,000 million of damage done by German submarines. To a country like England, unique in her dependence on overseas supplies, the deterioration in her international economic position is even more serious than the destruction from bombing.

Which Policy for England?

The restoring of her international economic position is primarily a problem for England to solve. She must revitalize her export industries. She must increase the efficiency of her workers and her business men. That is the only way in which England can increase her exports far above the prewar level. That is the only way in which she can continue to pay for her imports of essential raw materials. There can be no doubt that British industries are capable of developing technical efficiency of a character which would permit them to compete for their share of the world's markets. To survive, England must restore and expand her export trade.

England can deal with this problem in one of two ways. One way is to join in the economic program of the United Nations. She would accept and effectuate the fair trade and currency principles which we have proposed. Under this program, England would remove her war-time currency and trade controls without waiting until her exports have been restored. Then as world trade grows England would share in the growth, and her increased exports would in time pay for her imports.

The alternative is to continue and even to extend these currency and trade controls. England would form a British economic bloc. Countries that want to sell to her would have to take payment in British exports. The countries to whom Britain owes \$13,000 million in blocked sterling would be compelled to take British goods in payment of the debts. In brief, England would form an exclusive British economic bloc in which trade inside the bloc is encouraged through pref-

erences and pressures, and trade outside the bloc is discouraged through discriminations and controls. We would be one of the countries outside the bloc.

The people of England prefer to solve their international economic problem through cooperation with the United States and the United Nations. Britain's economic and political traditions and interests strongly favor such a solution. There are few people who want a British economic bloc for its own sake. England too, needs an expansion of world trade. That is the only way in which she can achieve her objectives of raising British production and maintaining the British standard of living.

England is willing to assume the risk of selling her exports in fair competition with the exporters of other countries. She is willing to commit herself to our program of fair currency and trade practices in order to encourage an expansion in world trade. Britain cannot undertake the commitment to put this program into effect, however, unless she gets help in financing her imports during the next few years.

This help can come only from us and to a lesser extent from Canada and some other countries. If England cannot secure help from the countries committed to a policy of international economic cooperation, she will have to continue and to extend the war-time impediments to world trade. In this way she would simply force additional aid out of the British trading bloc. This is not a matter of preference. It is sheer necessity.

During the war England took measures to mobilize and conserve foreign exchange for essential war purposes. These war-time currency and trade restrictions are still in effect. They were necessary in the war emergency; but they are harmful to world trade and prosperity in time of peace. The continuation of these restrictions would affect us more than any other country. The fact of the matter is that American exports would be excluded from their major markets abroad. We can see from the war-time controls what such a policy would involve.

You have heard a good deal about these war-time restrictions, particularly the sterling area, blocked sterling area, blocked sterling, the dollar pool, trade controls, and payments arrangements. You may want to know how these

restrictions operate and how they hurt American business.

The Sterling Area

The sterling area now includes the countries of the British Empire except Canada, and a number of other countries mainly in the Middle East. These countries do much of their business with England and they keep most of their monetary reserves in the form of sterling in England.

Before the war sterling could be used by these countries to buy goods all over the world—in the United States, Canada, Latin America, anywhere. For example, if Australia wanted to buy American cotton before the war it sold the sterling for dollars, and used the dollars to pay for American cotton. That is to say, sterling was freely convertible into dollars.

That was before the war. During the war the sterling area took on some new features. Because England didn't have enough gold and dollars, she no longer permitted sterling to be sold freely. She made sterling inconvertible. In practice, this means that the countries of the sterling area cannot use the sterling they receive for their exports to buy American goods, unless they obtain permission from England.

As it is now, Australia cannot use her sterling receipts to buy American cotton; but she can use the sterling to buy cotton in India or Egypt. In short, while trade among the sterling area countries continues unaffected by these currency restrictions, the trade of all sterling area countries with the United States is subject to the will of Britain.

We do not want England saying to Australia and other countries from which she imports: "You cannot use the sterling you acquire from us to buy goods in the United States." That would mean that American exporters would be discriminated against in all trade with the sterling area.

Blocked Sterling

That brings us to blocked sterling. England had to go on buying goods in the sterling area, and meeting the costs of her armies in India, Egypt and other countries. She bought the goods and she met her war expenses in these countries by paying in sterling. England did not have the means to convert the sterling into dollars, she could not export enough to let these countries use all of their sterling to buy goods. In

effect, the accumulated sterling balances were blocked from use.

The amount of sterling accumulated by various countries during the war was very large. Although England sold \$4,500 million worth of her foreign investments, her war-time overseas expenditures were so enormous that sterling balances accumulated in rapid fashion. These balances now amount to \$13,000 million. They are held by foreign countries in the form of sterling deposits in London banks and sterling securities of the British Treasury. This is a tremendous sum for a foreign debt.

What is done about these blocked sterling balances will mean much to American trade. We do not want England saying to India and the other countries holding blocked sterling: "These balances will be freed only to buy goods in England." That would mean the exclusion of many American products from the whole sterling area.

Sterling Area Dollar Pool

England also needed and bought goods outside the sterling area. Many commodities we shipped to England had to be paid for in dollars. And that was also true of some of England's imports from other countries. England had to mobilize all her dollar resources. She sold some of her American investments to obtain dollars. Other dollars were borrowed by pledging some of her investments. In addition, England arranged to have the dollar receipts of the sterling area countries pooled in, and allocated by, London.

Under this system, when an Indian exporter sells goods in the United States he turns the dollars over to the Reserve Bank of India and receives rupees. These dollars are then sold to England for sterling. This happens in all of the sterling area countries that have net dollar receipts. In short, all the dollar holdings of the sterling area are pooled in London.

Then when a country in the sterling area needs dollars, it applies to London. To conserve dollars, no funds are allocated to buy goods in the United States if they can be secured in any sterling area country. That point needs emphasis. Under the sterling area dollar pool goods are not bought in the United States if they can be found in any sterling area country. American producers lose markets under this system. We want American exporters to have a fair chance to sell their products in every country that has dollars to pay

for them.

Other Trade and Payment Restrictions

Along with these financial controls there are direct trade controls on imports in England and all the sterling area countries. These controls are exercised through import licenses, shipping priorities, and in other ways. They are used to exclude goods that are bought with dollars. This has meant, throughout the war and even now, keeping to a minimum the imports of all goods from countries outside the sterling area and particularly American products.

Some countries, including England, do not have the means to pay for as much imports as their people want to buy. Total imports in such countries may have to be limited. But we want the limitations on imports to be applied across-the-board. We do not want discrimination against American exporters.

There is another kind of currency restriction that England is now using. During the war, and particularly since the war, England entered into bilateral agreements with a large number of countries to whom Britain is an important export market. Under these bilateral agreements England pays for her imports from these countries in sterling. The sterling can then be used to buy goods in England and in the sterling area.

Any sterling not used to buy imports from the sterling area must be kept idle. This means that some countries whose export trade is adequate to pay for the imports they want are compelled to restrict their purchases in the United States. We want such limitations removed so that countries can use the proceeds of their exports to every country to buy goods from any country.

Effect on World Trade

The continuation and the extension of these currency and trade controls in England would necessitate their retention in many other countries. Throughout the sterling area and the countries with which England has bilateral payments agreements, supplementary measures would be taken to restrict purchases from areas in which payment cannot be made in sterling. In other countries, particularly Canada, their exclusion from the sterling area market would limit seriously their exports, and they, in turn, would restrict purchases from the United States. It is a vicious cycle.

We are going to have one system or the other. Either we will have prosperity producing world trade or we will have economic blocs. The currency and trade controls in England endanger the whole international economic program that the United Nations have developed over the past five years.

The countries that have close trade and currency relations with Britain are a major factor in world trade. Together they account for 55 percent of world imports and nearly 50 percent of world exports. Clearly, what such a group does on currency and trade policy must be a major factor in the world economy.

Our own trade relations with this group thus far have been very close. Nearly half of our total exports and imports in the years 1936-38 went to the countries of the sterling area and to the payments agreements countries. Omitting Germany and Japan, 56 percent of our trade was with these countries.

Our whole program for maintaining high levels of production, employment and national income would be seriously affected. In six commodity groups, constituting more than 80 percent of all United States exports in 1937, these countries were our indispensable buyers. Of our metal machinery and vehicle exports, they took 47 percent; of our leaf tobacco exports, they took 88 percent; of our meat, grain and other food exports, they took 59 percent; of our raw cotton exports, they took 49 percent; of our petroleum and related exports, they took 46 percent; and of our wood and paper exports, they took 47 percent. Gentlemen, the continuation of these war-time controls would be a body blow to our whole economy.

Conflicting Economic Blocs

We need and want our trade with India, Australia, New Zealand, South Africa and Egypt. These are some of the countries of the sterling area. We cannot risk the loss of our export markets in France, Belgium, Netherlands, Sweden, and Czechoslovakia, or in Brazil, Bolivia, and Peru. These are some of the countries with which England has payments agreements.

What we have here, potentially, is a British economic bloc. Such a powerful bloc excluding the United States, Canada, and the countries of the dollar area would be a challenge to our economy that we could not ignore. Our position in

world trade would be threatened. We would have to defend ourselves. We would be compelled to form an economic bloc of our own.

Two rival blocs would mean economic warfare. Probably we would win, but it would be a pyrrhic victory. World trade would be destroyed and all countries would suffer. If England and the United States should drift into such a conflict, it would be a tragedy for all. We would find our trade decreased and our people unemployed. England would find her standard of living deteriorated and her people impoverished. The hope for economic cooperation might be lost forever. The consequences to world prosperity and even to world peace would be disastrous.

This would be a sad augury for the post-war world. If we permit a renewal of economic warfare, we will not justify our heritage or our faith in the future. International economic problems can no more be solved by economic force than political problems can be solved by war. Our people know this. The British people know this. They know the dangers to themselves and to the entire world that would arise from a conflict in economic policy. They want this problem settled by discussion and agreement, not by economic warfare.

Provisions of the Financial Agreement

That is why the representatives of the United States and of England discussed this problem for three months. The American representatives wanted England to remove promptly the various war-time restrictions and discriminations. They wanted England to put into effect the fair currency and trade practices for which the United Nations stand. They wanted England to assure American exporters an opportunity to sell their goods in competition with the exporters of other countries on fair and equal terms. That is precisely what the financial agreement provides.

In brief, here is what we gain by the financial agreement:

1. Exports of goods and services from the United States to England will be paid for in dollars, or if they are paid in pounds, the sterling can be converted into dollars. This is particularly important to the American companies which in the past have experienced considerable difficulty in getting their earnings out of England. They will now be able to get dollars.

That means, for all practical purposes, American business men can be just as sure of payment for their current claims in England as they were before the war.

2. Within a year, unless in exceptional cases the United States agrees to a later date, England will make all sterling arising from current trade convertible. England will thus return to the free use of sterling in international trade that she permitted before the war. For example, if Mexico and Egypt exports goods to England they will be able to use the money they get to buy goods in any country. That means they could convert the sterling into dollars and buy goods in the United States.
3. Within a year, unless in exceptional cases the United States agrees to a later date, England will dissolve the sterling area dollar pool. Each country in the sterling area will again have complete freedom to use its dollars as it wishes. For example, the money India gets for its exports to the United States and Latin America could be spent here without getting an allocation of dollars from England. That means India could use the dollars she gets to buy American machinery instead of being forced to buy English machinery.
4. The blocked sterling balances will be settled by England and the countries concerned. All payments on these balances now or later will be free for making purchases in any country, including the United States. This large debt will not be used to exclude American products from the sterling area, or to put our exporters at a disadvantage in competition with British exporters. England will not force the countries holding \$13,000 million in blocked sterling to buy British instead of American goods.
5. England's import controls will be administered in a manner which does not discriminate against American products. If England finds it necessary to impose a quantitative limitation on her imports this will be applied on an equal basis toward all countries. That means England will not keep out American cotton and to-

bacco, grains and meats, fruits and nuts, or any of our industrial products, in order to buy these same goods in other countries.

6. Within a year, unless in exceptional cases the United States agrees to a later date, England will impose no restrictions on payments and transfers for ordinary current transactions. In effect, all of the countries that have payments agreements with England will be permitted to use the proceeds of their sales to England, if they wish to buy goods in other countries. They will be allowed to use the sterling they acquire in this way to buy American products on the same basis as they are able to buy British products.

In addition, England has agreed that she will support the American proposal for an International Trade Organization to reduce trade barriers and eliminate trade discriminations. Thus, England gives wholehearted support to our policy of expanded trade, with all countries having access to world markets on fair and equal terms. The adoption of the proposed fair trade practices will complete our program for international economic cooperation. England's support of our proposal assures the success of the United Nations trade conference to be held later this year.

The Credit to England

If the Congress approves, the aid that Britain needs in carrying out her commitments under the financial agreement will come largely from the United States. This Government will open a line of credit of \$3,750 million on which England can draw until 1951 to pay for her current imports. Beginning in 1951, England is to repay the credit with interest at 2 percent. She will do this in 50 annual payments of \$119 million. Including the payments under the Lend-Lease settlement, England will pay the United States \$140 million a year.

The greater part of the credit will be used to pay for exports from the United States. Directly or indirectly nearly all of the money will ultimately be spent in the United States. The credit to England will enable her to maintain her essential imports. May I emphasize that Britain will still have to enforce an austere level of consumption little different from that of the war years. For some time to come British imports will have to be far below the import demand of the Eng-

lish people, perhaps as little as 60 percent of the pre-war amount.

I want to make it perfectly clear: that the credit is not a gift; that it is a loan which England is to repay; that it is to be repaid with interest; that it is not an unconditional credit. It is a credit which must be used only to meet Britain's current payments and to enable her to remove her war-time currency and trade restrictions. None of the credit can be used to pay the blocked sterling balances or any of England's present obligations. Payments on such obligations must be met by England out of her own resources or out of funds secured in some other way.

The principal of the credit due each year must be repaid without qualification. Under conditions of severe depression in world trade, and under objective standards stated in the agreement, the interest due in any year can be waived. If such an emergency situation develops, I believe that it is to our own benefit to collect the principal and not to force a default which might have serious consequences to the world economy. As soon as these temporary conditions pass, England would resume the payment of interest on the credit.

There are people in this country who say the terms are too easy. There are people in England who say the terms are too harsh. These people forget that the financial agreement is not just a loan. It is a contract with rights and obligations for both parties. When you think of the financial agreement in this way, I am confident that you will find that the terms are fair to both countries and they will prove beneficial to both countries.

It is true that the interest rate on this loan is less than England would have to pay on a strictly commercial loan from bankers. The interest is, nevertheless, substantial for an agreement of this character. The effective rate of interest, assuming the credit is used in five equal annual amounts and all payments are met, would be 1.83 percent. If the credit is used in three equal annual amounts, the effective rate of interest would be 1.76 percent. This is reasonably comparable to the cost of money to the Treasury.

There is no easy way of stating without qualification what is the cost of borrowing by

this Government. The computed average rate of interest on all outstanding Government loans is 1.97 percent. This rate is more than the cost of new borrowing and more than the Treasury actually pays. If the Treasury were now borrowing \$3,750 million through the same securities we now have outstanding, and in the same proportions, the cost on the basis of present yields would be 1.64 percent. I say, therefore, that the rate of interest on the credit is quite comparable to the cost to the Treasury of borrowing this money.

The interest charged on the credit is only a part of the agreement. The terms on which this Government can offer the credit, the terms which England can undertake to pay, are determined by those provisions of the agreement which commit England to certain currency and trade practices. The benefits that this country will secure in the form of expanded trade and increased national income are far more important than the principal and interest that England will pay. Our people will see the effects in higher incomes for our farmers, our workers, and our business men. The Treasury will see the effects directly in the revenue it collects in taxes.

If you want to see the real meaning of the financial agreement, just consider the opposition to it in England. The opposition is directed very largely to the provisions regarding the convertibility of sterling received from current transactions and their free use to pay for exports from the United States. The opposition comes from a small but influential group which has urged that England retain the present restrictions, secure the necessary volume of exports through bilateral agreements, and form a British economic bloc. The great majority of the British people join with us in a desire to deal with international economic problems through international economic cooperation. They ask merely the aid to carry on until this program has had its effect in expanding trade.

Special Bond Issue

You have seen the proposal that the credit to England be given only from funds invested in special bonds issued for this purpose. The payment to bondholders of principal and interest would be made only from the sums received from England. Of course, no bond issue of this kind ever was or ever could be floated. This is not just a commercial loan, and it is not the kind of loan that private investors or private bankers should make. I have a feeling that this proposal

is simply one form of saying "no" to the agreement.

It is most important to appreciate fully that a loan on bankers' terms would not give us the basic objective and the broad benefits of the financial agreement. That objective is the removal of discriminatory currency and trade restrictions. These restrictions reduce world trade, force it into uneconomic channels, and discriminate against our exports. The interest on a loan in which you get commitments to remove these restrictions must obviously be more favorable than the market rate for foreign securities.

British Investments in the United States

Some of the opponents of this loan have said that the British ought to sell their assets or put them up as collateral. This is based on a misconception of the amount of British investments in the United States. In order to pay for her purchases of munitions prior to Lend-Lease, England sold \$820 million of her American investments. In addition, she pledged a considerable amount of her American investments with the Reconstruction Finance Corporation in 1941 for a loan with which to meet obligations incurred prior to Lend-Lease.

At the end of 1945 British holdings of securities and direct investments in the United States, including pledged assets, amounted to about \$1,475 million. This was divided into \$575 million of securities and \$900 million of direct investments. The Reconstruction Finance Corporation estimates the value of the collateral pledged against the loan at about \$895 million. Of the \$530 million of securities and direct investments which remain unpledged, many are small holdings and of the type that cannot readily be vested and sold by the British Government.

Apart from these assets, there are some British interests in estates and trusts set up under American law. British interests are intermingled with the American interests in these estates and trusts, and the assets cannot be taken by the British Government. They are under the jurisdiction of American courts. The only way to value these interests is by the arbitrary capitalization of the income. On such a basis, British interests in American estates and trusts would not exceed \$350 million. All other scattered and miscellaneous British holdings in the United States, equally difficult to vest or

liquidate, are estimated at approximately \$100 million.

Effect on Inflation Problem

Opponents to the loan make the point that the credit will add to the inflationary pressures in this country. I have been concerned with the inflation problem in more than mild fashion for some time now. I know how important it is to this country to prevent inflation. It remains our most important domestic problem. The long-run sound way to fight inflation is to produce more goods in the United States and to produce more goods throughout the world. The lifting of trade restrictions as a result of the financial agreement will stimulate trade and production everywhere. In that way, it will do much to relieve the world shortage of goods and help the fight against inflation.

The \$3,750 million credit will not be spent all at once, nor will the bulk of it be used to purchase goods that are in scarce supply. It will be used over a five-year period. The amount of the credit is about one-half of one percent of the total demand for goods in the United States during the next five years. Part of the credit will be used to buy goods of which we already have a surplus, like cotton. Certainly, the credit will increase infinitesimally the total spending in this country. That will be more than offset, in my judgment, by its favorable effects on production and trade which are the real factors in preventing inflation.

Not a Precedent

The credit to England is in no way a precedent for other loans. Its particular purpose from the American point of view is to free a major segment of the world's trade from the currency and trade restrictions by which it is now shackled. The key to the removal of these restrictions is to make it possible for England to pay for its imports with funds that can be used to buy goods in any country. What England does about her currency and trade controls is of the utmost significance in determining whether the entire world will be one large and prosperous international trading group or whether it will be broken up into conflicting economic blocs.

The proposed credit to Britain is to enable her to participate in world trade, without currency and trade discriminations, while she reconverts her industries to peacetime production and

resumes her usual place in world markets. No other country has the same problem. No other country has the same strategic position in world trade. That is why this loan cannot and will not be regarded as a precedent.

Other nations need help. Some will need help for which they cannot pay. They will get such help through UNRRA. Some will need help in maintaining the stability of their currency. They will get that help through the International Fund. And many countries will need help in restoring their economy. For all worthwhile projects, help of this character will be available through the Export-Import Bank and soon through the International Bank for Reconstruction and Development.

The Bretton Woods Agreements Act established the National Advisory Council on International Monetary and Financial Problems. This council is charged with coordinating the activities of all agencies of the Government on foreign loans and monetary transactions. The members of the Council have spent many hours during the last six months in carrying out their statutory responsibilities. They have met more than forty times to go over the foreign financial problems before this Government.

The first report of the Council, as required by law, has just been sent to the President and to Congress. When you examine this report, I believe that you will agree that the Council has been motivated by the desire to carry out in the financial field the major objectives of American foreign policy while securing the most efficient use of the funds of the American taxpayer.

An Investment in Peace and Prosperity

The loan to Britain is an essential and integral part of our program of international economic cooperation. A peaceful and prosperous world requires the full participation of England, and of the countries closely linked with England, in the world economy. The policy that Britain chooses in meeting her balance of payments problem will affect the economic well-being of the entire world. The United States has a vital in-

terest in the solution of this problem.

The financial agreement is a sound investment in world peace and prosperity. Not only will the \$3,750 million be fully repaid, but American business will reap rich dividends through its access to world markets on a fair and equal basis. Every section of this country, every sector of our economy, depends in part on world trade. The financial agreement will open the markets of England and many other countries to our exporters. This means more exports for our farmers and manufacturers, more jobs for our workers, more profits for business, and a higher income for all our people.

We live in a world that is growing more interdependent economically and politically. The great hope of mankind is that we will proceed to build the kind of world that our heads and hearts desire. We are doing that in cooperation with the United Nations. There can be no turning back. It is impossible to revert to the international political or economic conditions of the 1930's without endangering the welfare of this country and the survival of the entire world. Our people are determined that political and economic differences should be settled by peaceful and cooperative means.

Man will not have fulfilled his divine destiny while there is war and want. Two world wars and a world depression have made this a generation of bitter memory. It is wonderful to have again the hope of peace and plenty. The cynics shut their eyes and close their ears and sit among the scorners. Ours is a higher duty — to find a way to give effect to the will of the people. Let us have faith equal to our great task. Let us put into effect the determination of our people for a world in which nations work and live together in peace and prosperity.

There are times that are turning points in the history of mankind. This is such a time. The decisions we make or do not make today will shape the destiny of the world for generations to come. I pray that we shall have the vision to act bravely and boldly.

Federal Wartime Financing and Growth of Liquid Assets

The incurring of a large deficit by the Federal Government during the war years was accompanied by an unprecedented volume of liquid savings from income and a corresponding expansion in the liquid assets in the hands of the public. The fact that all three - the Federal deficit, liquid savings, and the increase in liquid assets - are approximately equal is not accidental; they are all the product of the same factors. This article presents a brief analysis of these factors, with special emphasis on the relation of wartime production and spendings to Federal financing and liquid asset formation.

The production of goods and services is accompanied by the creation of an equivalent amount of money income 1/. For example, an airplane is built and sold to the Army. The manufacturer pays wages to his workers and dividends to his stockholders; he pays other producers for the materials they provide; he sets aside part of his gross receipts to cover depreciation and to meet his taxes, and he has some left that represents his profits. The same is true, of course, with the entire chain of production from raw materials to finished products. As a result, money income is received by individuals and business enterprises in an aggregate amount equal to the value of total production in the economy. In addition, individuals receive money income from certain governmental outlays not arising from current production such as war contract prepayments, veterans' pensions, and mustering out pay. As a total, then, the country's gross income flow is equal to the combined expenditures of individuals, corporations, and government. Total spendings 2/ and total income are really the same figures; they are the head and tail of a coin.

This is not to say, of course, that income and spending are equal for any particular individual or group. The wartime composition of spendings as between individuals 3/, corporations, and State and local governments, on the one hand, and the Federal Government, on the other, was considerably different from the distribution of total income. Wartime taxes fell far short of covering total Federal expenditures so the Federal Government incurred a substantial deficit. As a corollary, taxes fell short of eliminating the war-swollen surpluses of income of the rest

Note: See page A-18 for footnotes.

of the economy.

It was these surpluses which the Federal Government tried to reach as far as possible in financing the war. It was important that every possible means be taken to persuade people to hold these funds rather than attempt to spend them, because such an attempt on a large scale would have meant inflation. The surpluses were dammed up in the first instance by governmental rationing and price controls which directly limited the ability of holders to spend their money. Scarce goods were rationed, many products requiring scarce materials and labor were not permitted to be made at all, and prices and wages were regulated. Once the savings were made, however, the Treasury had to operate on another front to see that they remained saved. The best way to accomplish this was to get as much of them as possible into Federal securities.

The Federal Deficit and Liquid Savings from Income

An analysis of the flow of income, spendings, and liquid savings 2/ with particular reference to Federal financing is presented in the following discussion, with accompanying charts. The figures cover the six calendar years 1940 through 1945, using preliminary data for December 1945.

Federal expenditures 1940-1945 totaled \$365 billion. During the six calendar years, the Federal Government spent \$365 billion, as shown in Chart 1. This is ten times as much as total Federal expenditures 4/ in the comparable World War I period. About 95 percent of the total was either for direct war costs or for "aftermath of war" expenditures - that is, interest on the public debt, aid to veterans, and tax refunds. Expenditures for munitions and government-financed war construction alone accounted for \$211 billion.

Federal expenditures other than for war or aftermath of war totaled only \$19 billion during these years, or about one-third less than similar expenditures during the six preceding years (1934-1939). These other expenditures include public works, aid to agriculture, and social security assistance (budgetary items only) as well as regular departmental expenditures and the net outlays of nonwar Government corporations. See Table 1 for details on Federal expenditures,

\$517 billion of consumers' goods and services and \$55 billion of capital goods 7/. Over 96 percent of the aggregate expenditures of \$987 billion 8/ represented the purchase of goods and services as distinguished from payments for pensions, relief, etc.

At the peak of wartime activity the Federal Government's share of total spendings was close to one-half. This situation may be contrasted with the experience of World War I, when Federal expenditures accounted for a maximum of only about one-quarter of total spendings.

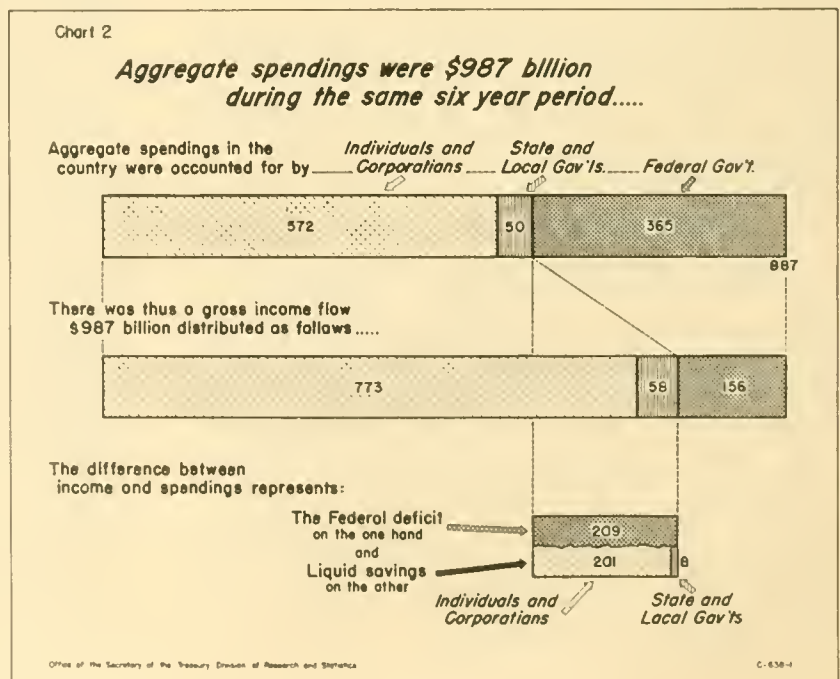

Federal deficit of \$209 billion matched by new liquid savings. The \$987 billion of aggregate wartime spendings in the country was

receipts, and borrowing by calendar years, 1940-1945.

40% of Federal expenditures covered by taxes. Of the \$365 billion expenditures, \$156 billion, or over 40 percent, was covered by net budgetary receipts. The bulk of these receipts was from taxes, with the individual and corporation net income and excess profits taxes alone accounting for \$113 billion, and the remainder supplied mainly by excise taxes. For the six years combined, then, there was a Federal deficit of \$209 billion. This amount plus funds used (1) to build up the Treasury's cash balance and (2) for miscellaneous outlays, such as minor trust fund transactions, had to be financed through borrowing 5/.

Federal expenditures 3/8 of aggregate spendings in the country. Federal Government expenditures of \$365 billion accounted for approximately three-eighths of aggregate spendings in the country of \$987 billion during the last six years. (Chart 2). In addition to Federal Government spendings, State and local governments spent about \$50 billion; individuals and corporations 6/ together accounted for the remainder by their purchases of

matched, of course, by an equivalent amount of gross money income received by individuals, by corporations, and by government. This income was received by the major recipient groups in proportions quite different from their spendings. It has already been noted that the Federal Government received \$156 billion in taxes during the six years and incurred a deficit of \$209 billion. At the same time, State and local governments received \$58 billion in taxes as compared with

their \$50 billion of expenditures, so they had a surplus of about \$3 billion. Individuals and corporations together had income of \$773 billion left after taxes, or an amount \$201 billion greater than their expenditures for available goods and services. This \$201 billion surplus and the \$3 billion surplus of State and local governments together equalled total liquid savings of \$209 billion in the economy as a whole - exactly the same as the Federal deficit.

Growth in major forms of liquid assets amounted to \$215 billion. Chart 3 shows the forms in which these liquid savings were accumulated - the kinds of liquid assets $\frac{2}{3}$ of the public put them in - currency, commercial bank deposits, and Federal securities held by non-

bank investors $\frac{10}{100}$. Total major liquid assets rose by \$215 billion during the six-year period, reflecting the \$209 billion of liquid savings, and certain other factors, principally increases in bank loans to individuals and corporations $\frac{11}{100}$. For a detailed reconciliation of the Federal deficit and liquid asset accumulation for the calendar years 1940-1945, see Table 2.

This \$215 billion increase in the major forms of liquid assets for all nonbank investors balances out inter-investor transactions. This means, for example, that deposits by individuals in mutual savings banks, which are themselves nonbank investors, are not added as a separate item $\frac{10}{100}$. To avoid double counting of these funds they are considered as a part of the \$215 billion increase only to the extent that assets of savings banks in the form of currency, commercial bank accounts, and Federal securities. Other examples of such inter-investor transactions are net individuals' savings in insurance, deposits in the postal savings system, investments in corporate securities, etc.

In its war financing program a major objective of the Treasury was to recapture as much as possible of this \$215 billion through sales of securities to nonbank investors. Given the amount of the Federal deficit and other sources of expansion, the liquid assets held by the nonbank public would inevitably increase by the same amount. The problem was to hold down the propor-

tion of the total which went into money forms - currency and commercial bank accounts - and to enlarge as much as possible the amount going into Federal securities. The reason for this is obvious; a dollar of wartime savings held in the form of Federal securities was less likely to be suddenly drawn on for spending than a dollar in cash or commercial bank accounts. In other words, a dollar invested in war bonds was generally a dedication of that dollar for the prosecution of the war whereas a dollar in the form of idle cash might be drawn on more freely to add to the inflationary spending stream.

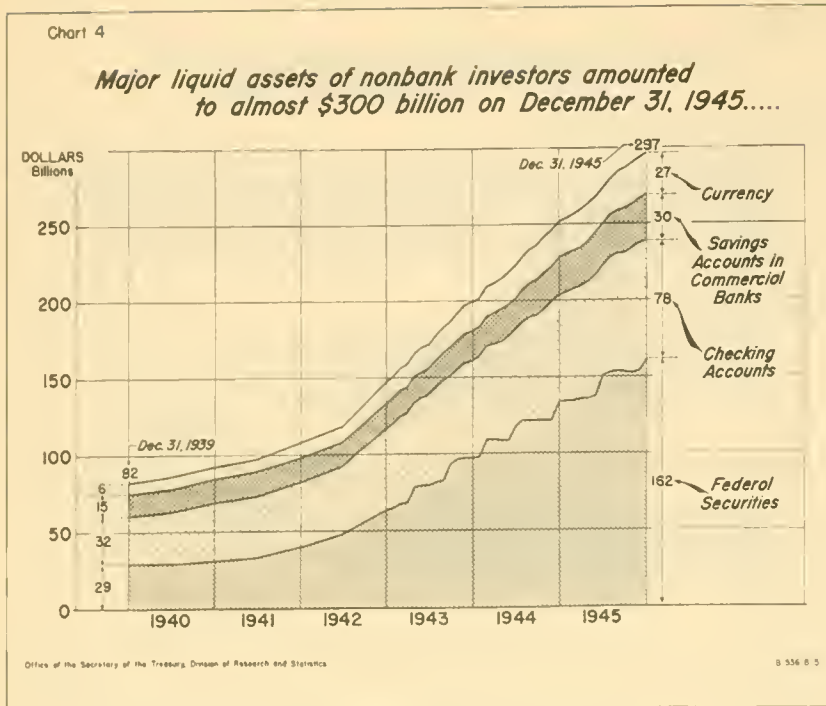

Federal securities accounted for $\frac{2}{3}$ of new liquid assets. In the final analysis, nonbank investors chose to take two-thirds of their new liquid assets in the form of Federal securities. The other one-third they acquired in the form of money assets. The actual figures were as follows: Nonbank investors acquired \$133 billion of Federal securities, and increased their holdings of cash, including deposits, by \$82 billion.

It is obvious that a considerable amount of increase in cash was necessary during the war period but the question naturally arises as to whether or not the one-third ratio indicated an unduly large expansion of cash in the hands of the public. To seek an answer to this question, it is desirable to take up each of the major forms of liquid assets separately, studying not only the changes in volume during the war period

debt - about the same proportion as in 1939.

Nearly one-quarter of the debt is currently held by individuals - \$64 billion. Insurance companies, savings banks, and other corporations and associations 12/ together account for another quarter, with State and local governments and Federal agencies and trust funds accounting for the rest of the 60 percent of total debt in nonbank hands. A total of \$114 billion of Federal securities is owned by the banks - \$90 billion by commercial banks and \$24 billion by Federal Reserve Banks.

At the end of 1939 these banks owned \$18 billion of Government securities, so the increase in their holdings during the war period was \$96 billion. This absorption by banks resulted primarily from the fact that individuals and businesses, as already noted, chose to place about one-third of their new liquid assets in cash forms. (Chart 3). As a corollary of this decision on the part of the public to acquire cash assets, the banks in turn acquired Government securities. Acquisitions of Federal securities by banks were further enlarged by the fact that the Treasury increased its cash balance by a large

but the ownership by various classes of investors.

Growth and Ownership of Major Liquid Assets

Liquid assets more than tripled; rising to \$297 billion. The \$215 billion increase in major liquid assets held by nonbank investors during the war resulted in more than a trebling of the 1939 total. The prewar level of these liquid asset holdings was \$82 billion, and the wartime addition of \$215 billion meant that by the end of 1945, major liquid assets were close to the \$300 billion mark. (Chart 4).

Nonbank holdings of Federal securities increased \$133 billion; now at \$162 billion. Chart 5 presents data on the ownership of Federal securities 9/ during the last six years. The lower area in the chart presents figures for all nonbank investors combined. Bank ownership is shown in the upper area of the chart. The total volume of interest-bearing Federal securities outstanding has risen from \$47 billion at the end of 1939 to \$276 billion six years later. Nonbank investors now own \$162 billion of Federal securities as compared with \$29 billion six years ago; they now hold about 60 percent of the total

sum during the war period. In summary, there was an increase in bank liabilities representing the growth of currency and deposits in the amount of \$106 billion, and an increase on the asset side of the balance sheet in holdings of Federal securities of \$96 billion. See Table 3 for a reconciliation of (1) expansion in currency and deposits and (2) increase in bank holdings of Federal securities.

Federal securities amounted to 35 percent of total liquid assets of nonbank investors at the end of December 1939; now they account for 55 percent of the total. The increase during the war in the proportion of liquid assets which nonbank investors have been keeping in Federal securities has, of course, been accompanied by a similar reduction in the relative importance of savings in money forms.

Currency rose to \$27 billion. The total of currency outstanding in the hands of nonbank investors aggregated about \$27 billion at the end of 1945 as compared with about \$6 billion six years previously. (Chart 6). Practically all of the increase has been absorbed by individuals, who held all but an estimated \$2 billion of the

total in December 1945.

In evaluating the \$21 billion increase in currency it should be remembered that during the war the distribution of income by income size classes was altered, so that millions of families which were formerly on a bare subsistence level, or even below, received adequate incomes for the first time in their lives. For many of these people, currency holdings used to be almost non-existent, so it is natural that they should acquire significant amounts of currency when able to afford it.

At the wartime peak, business activity was more than double 1939 levels and more currency than ever before was needed for current operations. In addition, the keeping of funds in banks was not always convenient for many people, because of odd working hours or a lack of nearby banking facilities; this also resulted in an increase of currency, particularly where industrial growth was more striking.

Some part of the expansion of currency, of course, arose from black market operations and tax evasion, because those who were guilty would obviously avoid bond

checking accounts were built up, as many investors, principally corporations, accumulated funds in cash forms in anticipation of investment in the forthcoming drives. These holdings were drawn down when the war loan securities were purchased.

It may be estimated that about \$38 billion, or almost half, of total checking accounts of nonbank investors at the end of 1945 was owned by individuals. This was almost equally divided between farmers and unincorporated businesses, on the one hand, and the broad group of wage earners, professionals and retired persons, etc., on the other. Most of the other half of checking accounts was held by other corporations and associations $\frac{12}{100}$, with minor amounts held by insurance companies and mutual savings banks. State and local governments accounted for about \$5 billion in all.

purchases or increases in their bank accounts since it would leave a written record.

Finally, an important factor bearing on the growth of currency during the war period was that liquid assets of the public were rising to unprecedented levels. This meant there was a much greater ability to acquire and hold currency in convenient amounts than ever before. Chart 7 shows that currency represented around 8 or 9 percent of total liquid assets throughout the war period. The experience of World War I was similar, when currency fluctuated between 7-1/2 and 9-1/2 percent of liquid assets throughout the war period. This empirical evidence suggests a tendency for currency to grow roughly in the proportion of one dollar for each ten dollar growth in liquid assets. This is an interesting reflection of the force of the various factors accounting for currency increases as noted above.

Checking accounts now at \$78 billion. Chart 8 shows that checking accounts $\frac{2}{3}$ owned by nonbank investors amounted to \$32 billion at the end of 1939. Six years later, the total had more than doubled in reaching \$78 billion. Checking accounts actually exceeded \$80 billion in November 1945 but the Victory Loan drew the total down before the end of the year. Although the general trend of checking accounts was steadily upwards during the war the movement from month to month was affected directly by the timing of the war loans. In the months prior to the war loans

Of the \$46 billion increase in checking accounts in the six-year period, corporations and associations accounted for about \$19 billion or 40 percent. For the most part, these funds were needed for increases in working capital and for reserves set aside in anticipation of reconversion expenditures or post-war expansion. In any event, corporation funds were seldom involved in inflationary spending so the holding of an increased volume of checking accounts by these investors was not inconsistent with the program to absorb inflationary dollars through bond sales.

Another large part of the increase in checking accounts took place in the accounts of unincorporated businesses and farmers. These groups were, in many cases, faced with the same need for larger working capital as corporations. About \$12 billion of the checking accounts accumulated by individuals during the six-year period should be credited to these investors as business accounts. In addition, State and local governments added about \$2 billion to their checking accounts. On the other hand, insurance companies and mutual savings banks actually reduced their deposits by nearly a billion dollars. This makes a total of about \$32 billion of the increase in checking accounts which was mainly for business purposes. The remaining \$14 billion of the increase in checking accounts was added to the holdings of

the broad group of wage earners, professionals, retired persons, etc. It is this portion which was potentially dangerous from an inflationary point of view, but not all of the \$14 billion would fall in this class. This is because a large part of this money was certainly legitimate diversification of savings, rather than cash held for current spending spree.

The \$46 billion increase in checking accounts, large though it was, appears less startling when seen in the perspective of Chart 7. In December 1939, nonbank investors held 39 percent of their liquid assets in checking accounts. During the war the percentage fell by one-third so that only 26 percent was held in this form at the close of 1945.

Savings accounts in commercial banks increased to \$30 billion. Savings accounts in commercial banks 9/ increased from \$15 billion in December 1939 to \$30 billion in December 1945. Nearly all of the increase has taken place in the last half of the six-year period, with 1945 alone showing an increase of about \$6 billion. As shown in Chart 9, practically all of these savings accounts were held by individuals 13/. Mi-

nor amounts were held by State and local governments and by other corporations and associations.

The \$15 billion growth of savings deposits in commercial banks during the war probably may be explained mostly by the desire of many people for diversification of their investments. The limited Treasury goals in war loan drives were often misinterpreted as maxima, and additional savings merely piled up in other forms. Many individuals and small businesses accumulated large amounts in commercial bank accounts simply because they felt they had fulfilled their patriotic duty by putting a given percentage, say 10 percent, of their income into war bonds. Savings over that amount were often placed in savings accounts instead.

Even with a \$15 billion increase during the war, the proportion of the liquid assets held in savings accounts in commercial banks dropped from 16 percent to 10 percent. (Chart 7).

Individuals' holdings of liquid assets now \$181 billion; more than 3 times prewar level. The preceding analysis has considered nonbank investors as a group. The last five charts show that on Decem-

ber 31, 1945 individuals alone held \$64 billion in Federal securities, \$33 billion in checking accounts, \$29 billion in savings accounts in commercial banks, and \$25 billion in currency. By adding the \$25 billion of liquid assets that individuals held in the form of claims on other nonbank investors 14/ - such as mutual savings banks, postal savings, and savings and loan associations - a total of \$181 billion is derived for individuals' holdings of liquid assets. (Chart 1C). This was more than three times their holdings six years ago 15/.

This \$181 billion of current holdings may be divided into three approximately equal parts. The largest segment - \$64 billion - is in Federal securities, two-thirds of which consists of sav-

ings bonds. Currency and checking accounts together account for \$63 billion, while various types of savings accounts amount to \$54 billion.

In the current transition period, when the supply of goods and services is still seriously limited, every effort must be made to see that these accumulations continue to be saved and are not used to bid up prices. In the period after peacetime production has been resumed on a large scale, the existence of this huge fund of liquid assets may alter consumers' spending-saving patterns materially, a factor which may have a stimulating effect on consumption and new construction, and be an important key to the maintenance of a prosperous economy.

1/ There are a number of concepts of income in current use, each of which is useful for particular purposes. Thus income payments to individuals represents the sum of all income flowing to individuals. This includes such items as wages, salaries, dividends, interest, net profits of farmers and unincorporated enterprise, and payments for relief, pensions, and social security benefits.

National income is individuals' income from production, including their equity in profits accumulating in the hands of corporations and equity in social insurance funds. National income differs from income payments by excluding payments, such as relief, which do not come from production, and by including (1) undistributed corporate profits as well as dividends, and (2) social insurance taxes on both employers and employees.

Gross national product is, on the one hand, the sum total of goods and services produced in the country and on the other hand, it represents the income generated by that product. National income, which is a kind of net national product, differs from gross national product by deducting the amount of (1) allowances for depreciation, depletion, etc., and (2) business taxes.

Gross income flow (and aggregate spendings), as used in this article, includes gross national product plus government expenditures for pensions, relief, prepayments and settlements on war contracts, tax refunds, etc. In one sense, a minor share of this gross income flow should not be called income because it represents either a return of capital or an adjustment to income for a past or future year. Thus the new reserves set aside by business for depreciation or depletion are the measure of capital used-up by current production, while the receipt of war contract prepayments and settlements or tax refunds by individuals or corporations are really transactions affecting either prior or future years' income. In addition, there are certain minor Federal items (such as the receipt of taxes on carriers and their employees and the transfer of the taxes to the Railroad Retirement Account) which are bookkeeping transactions. They tend to inflate both aggregate expenditures and gross income flow by a negligible amount - but it would be impractical to adjust regularly published Federal expenditures and receipts figures for them. As a practical matter, all of these deviations from more general definitions of income may be ignored in studying the flow of funds in relation to Federal borrowing.

Money income, used here to represent the total value of output in the country, is made up primarily of actual money receipts of individuals and corporations. In addition, it includes small amounts of income which are

paid out in kind, such as wages paid to farm laborers in the form of food and lodging. There are, on the other hand, other forms of output not sold for money which are not included as part of income, such as gardening and housework undertaken by individuals for their own use.

2/ Spendings include purchases of new construction, durable producers' and consumers' goods, and increases in inventories, and therefore are not confined to expenditures for immediate consumption. Similarly, savings refer only to liquid savings and exclude economic savings in the form of net increases in physical assets.

3/ Individuals include unincorporated businesses (both partnerships and sole proprietorships) and personal trust accounts.

4/ Throughout this analysis figures on Federal expenditures (and deficit) include net operating outlays of Government corporations (excluding their outlays for debt retirement). Department of Commerce estimates of Federal expenditures for goods and services are smaller than total Federal expenditures shown here since the Commerce figures exclude expenditures for relief, pensions, tax refunds, prepayments on war contracts, and similar items.

Figures on Federal expenditures do not include the expenditures of Federal trust funds for social insurance benefit payments. The expenditure figures do include, of course, budgetary social security assistance expenditures, such as aid to the blind, indigent aged, and dependent children where no trust fund contributory system is involved. They also include budgetary expenditures for interest paid on trust fund investments and transfers to trust accounts. In the analysis of gross income flow, Federal trust funds are treated as part of the broad category of "individuals and corporations" since their operations are considered to be like those of an insurance company or other private financial institution.

5/ See Table 1 for details on Federal expenditures, receipts, and borrowing by calendar years, 1940-1945.

6/ Spendings of business include only additions to capital assets and inventories, and exclude expenditures for raw materials and supplies used up in production, which are included in the valuation of products flowing to ultimate consumers.

7/ Capital goods comprise construction, producers' durable equipment, increase in inventory volume, net export of goods and services, and net exports and monetary use of gold and silver, as estimated by the Department of Com-

merce as components of gross national product. The last two items present a conceptual problem in the present analysis which should be mentioned. Viewed in another way, the total of these two items equals the net import of capital plus the net increase in the nation's monetary stock of gold and silver, arising both from imports and from domestic production. "Spandings" in the form of increases in monetary stock cannot be allocated to any specific group of purchasers since they are really purchased by the nation as a social entity. Inasmuch as they are not part of Federal expenditures in the accepted sense, they are treated in this analysis as purchases by individuals and corporations combined.

- 8/ Aggregate spendings of \$987 billion consist of gross national product of \$952 billion plus government payments of \$35 billion for pensions and relief (budgetary expenditures only; trust fund payments are excluded) and miscellaneous expenditures other than for goods and services.
- 9/ Major forms of liquid assets comprise Federal securities, currency, checking accounts, and savings accounts in commercial banks which are defined as follows for this article:
- (a) Federal securities: interest-bearing public debt and guaranteed obligations of the United States Government.
 - (b) Currency: holdings outside (1) Treasury, (2) Federal Reserve Banks, and (3) commercial banks.
 - (c) Checking accounts: demand deposits as reported by the Comptroller of the Currency for all active commercial banks in the continental United States for (1) individuals, partnerships, and corporations, (2) State and local governments, and (3) mutual savings banks (bank and reserve balances). Figures for checking accounts are on the basis of bank records rather than holder records and are, therefore, inflated slightly because of duplication represented by items in the process of collection.
 - (d) Savings accounts in commercial banks: time deposits as reported by the Comptroller of the Currency for all active commercial banks in the continental United States for (1) individuals, partnerships, and corporations, (2) State and local governments, and (3) postal savings redeposited with banks.
- 10/ Nonbank investors include all investors in the economy except (1) Federal Government and (2) banks - commercial banks and Federal Reserve Banks. The investors who initially account for the liquid savings - individuals, corporations, and State and local governments - are, of course, nonbank investors. The amounts of liquid savings which they make in the first instance, however, are not the amounts which they have available to add to their liquid assets. Part of these savings is transferred to other nonbank investors through debt repayment, for example, or through investment by individuals in private life insurance or social security funds. The recipients of these transfers constitute the rest of the nonbank investor group: insurance companies, mutual savings banks, savings and loan associations, government social insurance funds, credit unions, non-profit institutions, etc. These investors have only very minor amounts of liquid savings in the first instance; almost all of their income available for investment arises through transfers from other investors.

Mutual savings banks are classified as nonbank investors (as contrasted to commercial banks and Federal Reserve Banks) because their operations involve only the use of existing funds and do not involve the creation of credit. Accordingly, they were eligible to participate in the purchase of securities in war loans, which were confined to nonbank investors beginning with the Third War Loan.

Technically, savings placed in currency and commercial bank accounts also represent a transfer of funds from one investor group to another. Savings placed in commercial banks require the corollary purchase of Federal securities by commercial banks (or by Federal Reserve Banks), while savings in currency require, with minor exceptions, the purchase of Federal securities by Federal Reserve Banks. These items are not treated here as transfers between investor groups, because they represent the particular kinds of liquid asset creation which the war financing program intended to minimize.

- 11/ When nonbank investors are considered as a group, liquid savings are reflected for the most part in increases in major forms of liquid assets: Federal securities, commercial bank accounts, and currency.

At the same time, certain other transactions of banks result in liquid asset expansion quite apart from the Federal deficit and liquid savings. These comprise (1) on the asset side, increases in bank loans and investments other than Federal securities and (2) on the liability side increases in bank liabilities and capital other than deposits and currency. Additions to the nation's stock of monetary gold and silver also result in liquid asset expansion.

- 12/ Other corporations and associations include dealers and brokers, non-profit institutions, savings and loan associations, foreign balances in this country, etc.
- 13/ Individuals' holdings of savings accounts placed with other nonbank investors (mutual savings banks, postal savings, and savings and loan associations) are shown in Chart 10.
- 14/ These investments are essentially similar to savings accounts in commercial banks. There are many other inter-group items which represent assets of individuals and liabilities of other nonbank investors, of course. The most important of these are (1) equity in private life insurance policies and in social insurance funds, and (2) holdings of corporate, foreign, and State and local government securities. In a discussion of individuals' liquid asset accumulation in relation to Federal financing, however, it is preferable that these assets be excluded. Individuals' holdings of corporate and State and local securities decreased slightly during the war, so no new savings of individuals as a whole were invested in these forms. Individuals' equity in insurance increased substantially during the period, but insurance cannot be placed in the same class as cash, bank accounts, or Federal securities as far as ease of liquidation is concerned.
- 15/ The Federal Reserve Bulletin for February 1946 presents data showing liquid asset holdings of individuals and businesses for December 1945 of \$225 billion. Individuals alone are estimated to hold \$173 billion of these liquid assets (\$145 billion of personal holdings plus \$28 billion of holdings by unincorporated businesses). This total differs from the \$181 billion shown above for individuals primarily in that the Federal Reserve figures exclude individuals' holdings of savings and loan association shares.

Individual Income Tax Returns for 1944 With Adjusted Gross Income Under \$25,000

Marital and Dependency Status and Number of Employers

This is the second of two articles summarizing data from a preliminary sample study recently compiled by the Bureau of Internal Revenue relating to individual income tax returns with adjusted gross income under \$25,000 filed for 1944. This article presents data on the marital and dependency status, and the number of employers reported on returns filed by salary or wage recipients. The first article ^{1/} dealt with sources of income and tax liability reported on the returns, provided summary statements with respect to the sample from which the data were derived, and summarized the important provisions of the Individual Income Tax Act of 1944.

Marital and Dependency Status

In total, an estimated 46.2 million individual income tax returns with adjusted gross income under \$25,000 were covered by the tabulations prepared by the Bureau; these returns reported 109.8 million surtax exemptions or an average of 2.4 exemptions each.

Marital status. The table at the end of this article shows, for all returns and for each of four marital status groups, the distribution of returns by size of adjusted gross income and by number of surtax exemptions reported. The four marital status groups are: Single persons and married persons not living with husbands or wives, husbands and wives filing separate returns, husbands and wives with one income only filing joint returns, and husbands and wives with two incomes filing joint returns. The classification of returns according to marital status was based on the marital status of the taxpayer on December 31, 1944. However, persons whose spouses died within the taxable year were classified according to status as of the date of the death of the spouse. All Forms W-2, filed as combined returns of husbands and wives, were classified as joint returns with two incomes, regardless of whether tax liability on such returns was determined by the collector on a joint or separate basis.

In accordance with provisions of the Individual Income Tax Act of 1944, surtax exemptions could be claimed for the person filing; for the spouse of the taxpayer, if he or she did not file separately, or if either spouse filed separately

and the other spouse had no gross income for 1944; and for close relatives with 1944 incomes of less than \$500 who received more than half of their support from the taxpayer. A person could not be claimed as a dependent if he (or she) was married and filed a joint return with his (or her) spouse.

Distribution of the 46.2 million returns, according to marital status of the taxpayer, is shown below together with the number of dependents and the total number of surtax exemptions claimed on returns in each category.

Marital status	Re- turns	Depend- ents	Total surtax exemp- tions
(In millions)			
Returns of single persons and married persons not living with husbands or wives.....	17.5	5.9	23.4
Separate returns of husbands and wives.....	4.7	2.3	7.0
Joint returns of husbands and wives with one income only.....	18.0	24.0	60.0 ^{2/}
Joint returns of husbands and wives with two incomes.....	6.0	7.4	19.4 ^{2/}
Total.....	<u>46.2</u>	<u>39.6</u>	<u>109.8^{2/}</u>
(In percent)			
Returns of single persons and married persons not living with husbands or wives.....	38	15	21
Separate returns of husbands and wives.....	10	6	6
Joint returns of husbands and wives with one income only.....	39	61	55
Joint returns of husbands and wives with two incomes.....	13	19	18
Total.....	<u>100</u>	<u>100</u>	<u>100</u>

Dependency status. Single persons and married persons not living with their spouses reported an average of about 1-1/3 surtax exemptions each. Over three-fourths of these returns reported one surtax exemption only, for the taxpayer, and claimed no dependents. About 14 per-

^{2/} Due to the coverage of two spouses on each joint return, figures will not add across.

^{1/} Published in the "Treasury Bulletin" for March 1946.

cent reported two exemptions, accounted for by the taxpayer and one dependent. Over 5 percent claimed two dependents and less than 3 percent claimed exemptions for 3 or more dependents.

An average of about 1-1/2 exemptions each were reported on separate returns of husbands and wives. About 68 percent of these reported one exemption only, for the spouse filing, and claimed no dependents. Over 20 percent of the returns reported two exemptions, accounted for by one dependent in addition to the person filing. About 8 percent claimed exemptions for two dependents, and about 4 percent claimed exemptions for 3 or more dependents.

Husbands and wives filing joint returns with one or two incomes claimed an average of somewhat less than 3-1/3 exemptions per return. About 37 percent of the returns reported exemptions for both spouses only, and claimed no dependents. About 26 percent of the returns reported 3 exemptions, accounted for by one dependent in addition to the two spouses. About 20 percent claimed exemptions for two dependents, and about 17 percent claimed exemptions for 3 or more dependents.

Thus, the 109.8 million surtax exemptions

reported covered 17.5 million single persons or married persons not living with their spouses who filed returns, 4.7 million husbands or wives who filed separately, a total of 48.0 million husbands and wives who filed jointly, and an aggregate of 39.6 million dependents.

Number of Employers

Of the 46.2 million returns with adjusted gross income under \$25,000 covered in the preliminary study, 40 million returns reported receipt of salaries or wages. These 40 million returns are distributed below by number of employers, (1) in the aggregate, and (2) separately for (a) returns filed jointly by husbands and wives each having income in non-community property states 1/, (b) returns filed jointly by husbands and wives each having income in community property states 2/, and (c) returns reporting only one income 3/.

In summary, the 40 million returns with salaries or wages reported an average of over 2-1/2 employers each. Of these returns, 25.4 million or 63 percent reported one employer only, 9.3 million or 23 percent reported two employers, 2.9 million or 7 percent reported three employers, and 2.1 million or 5 percent reported four or more employers.

Number of employers	Total number of returns		Joint returns with two incomes: non-community basis		Joint returns with two incomes: community basis		All other returns reporting one income only	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent

1/ Includes all joint returns on Form 1040 and combined returns on Form W-2 reporting two incomes filed in other than the eight community property states (Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, and Washington), and also all combined returns on Form W-2 filed in the community property states which did not report solely community income equally divided between the two spouses.

2/ Includes all joint returns on Form 1040 and combined returns on Form W-2 reporting two incomes filed in com-

munity property states, excepting those combined returns on Form W-2 filed in community property states which did not report solely community income equally divided between the two spouses. The eight community property states are Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, and Washington.

3/ Includes returns filed by single persons or married persons not living with their spouses, by husbands or wives separately, and by husbands and wives jointly where only one spouse had income.

* Less than 50.
 1/ The total number of surtax exemptions is the summation of the number of returns reported in each column multiplied by the number of surtax ex- emptions shown at the head of the column.
 2/ Includes all nontaxable returns.
 3/ Includes combined returns of husbands and wives filed on Form #2, with taxes computed either on a joint or separate basis, whichever was to the taxpayers' advantage.

Preliminary Statistics from Corporation Income and Taxable Excess-Profits Tax Returns for 1943

Secretary of the Treasury Vinson recently made public preliminary statistics from corporation income and taxable excess-profits tax returns for 1943, filed through December 31, 1944. ^{1/} The data released are summarized in this article. The preliminary report, "Statistics of Income for 1943, Part 2," is available at the U. S. Government Printing Office.

This release contains data on number of returns filed, receipts, net income, ^{2/} taxes, and dividends paid. Tabulations are given by major industrial groups, for returns with net income and returns with no net income, for all corporations and for corporations filing consolidated returns. Tabulations are also given by major industrial groups for all corporations of the wholly and partially tax-exempt items, dividends received and interest on Government obligations. Data from taxable excess-profits tax returns are tabulated by adjusted excess-profits net income classes. Finally, a historical summary is given for 1934-43 of selected items from similar tabulations for earlier years.

The data presented in this release are from corporation income tax returns (Form 1120) and corporation excess-profits tax returns (Form 1121) for the calendar year 1943, for fiscal years ending between July 1943 and June 1944, and for part years with the major part of the accounting period falling in 1943. Returns filed by foreign corporations engaged in business in the United States are included. Amended returns and tentative returns are not included. The statistics are compiled from the returns as filed, prior to any revisions that may be made as a result of audit by the Bureau of Internal Revenue, and prior to any changes which may result from the renegotiation of war contracts after the returns are filed. Changes resulting from the renegotiation of war contracts are recorded as settlements reached, however, and the effect of rene-

^{1/} Press Service No. V-229, February 25, 1946. This release gives greater coverage of 1943 corporate tax returns than those covered in a similar article published in the September 1945 issue of the "Treasury Bulletin".

^{2/} Net income or deficit as used throughout this article is the amount reported for declared-value excess-profits tax computation adjusted by excluding the net operating loss deduction. Net income for declared-value excess-profits tax computation includes inter-corporate dividends received.

negotiation settlements reached to date will be shown in a special tabulation to be included in the complete report, "Statistics of Income for 1943, Part 2".

For corporations filing returns for the calendar year 1943 or for fiscal or part years ending in 1943, there was no change in the income or excess-profits tax provisions from those in effect in 1942. Corporations filing on the basis of fiscal or part years with part of the accounting period falling in 1944, however, compute their tax under both the 1943 and the 1944 tax laws, pro-rated according to the part of the accounting period falling in 1944. Under the 1944 law, the excess-profits tax rate was increased from 90 to 95 percent, the specific exemption was increased from \$5,000 to \$10,000, and the invested-capital credit was decreased. Further information with respect to these changes may be found in the original release.

Number of Returns, Net Income, and Tax

Income tax returns. A total of 455,753 income tax returns for 1943 were filed through December 31, 1944. Of these, 283,698 reported net income ^{2/} of \$28,689 million, 136,787 reported deficit of \$899 million, and the remaining 35,268 showed no income data. The income tax liability reported totaled \$4,476 million. The following table presents a comparison of 1943 data with similar data for 1942.

	1943 (Preliminary)	1942 (Complete)	Increase or decrease (-)	
			Number or amount	Percent
Number of returns:				
With net income ^{2/}	283,698	269,942	13,756	5
With no net income	136,787	172,723	-35,936	-21
Inactive returns..	35,268	37,012	-1,744	-5
Total.....	<u>455,753</u>	<u>479,677</u>	<u>-23,924</u>	<u>-5</u>
	(In millions of dollars)			
Net income ^{2/} , deficit and tax:				
Returns with net income:				
Net income ^{2/} ..	28,689	24,052	4,637	19
Income tax....	4,476	4,338	139	3
Returns with no net income:				
Deficit.....	899	1,001	-102	-10

For 1943, the number of consolidated income-tax returns filed was 1,286, of which 1,005 show net income amounting to \$3,536 million, while 277 show deficit of \$120 million, and 4 have no income data. The number of consolidated returns is only 0.3 percent of all corporation returns, but the net income reported in consolidated returns is 12.3 percent of the net income of all returns showing net income, and the income tax reported, amounting to \$771 million, is 17.2 percent of the income tax for all corporations.

Taxable excess-profits tax returns. A total of 68,163 taxable corporation excess-profits tax returns were filed for 1943. The excess-profits tax liability reported was \$11,268 million. The following table shows the number of returns, income, and tax liability for 1942 and 1943.

Table 1 at the end of this article gives more detailed data on the number of income tax returns filed, income, taxes, and dividends paid, by major industrial groups. Table 2 presents a historical summary of selected items from income and excess-profits tax returns for the years 1934-1943.

	1943 (Preliminary)	1942 (Complete)	Increase or decrease (-)	
			Number or amount	Per cent
Number of returns...	68,163	54,002	14,161	26
(In millions of dollars)				
Excess-profits net income 1/.....	22,265	17,084	5,181	30
Adjusted excess-profits net income 2/.....	14,520	10,495	4,025	38
Excess-profits tax, net 3/.....	11,268	7,852	3,417	44

- 1/ Excess-profits net income is obtained from net income by making certain adjustments, consisting principally of the exclusion of long-term capital gains and losses, dividends received, and the declared-value excess-profits tax, and the inclusion of the net operating loss deduction.
- 2/ Adjusted excess-profits net income is excess-profits net income less the sum of the specific exemption, the excess-profits credit, and the unused excess-profits credit adjustment.
- 3/ The excess-profits tax shown is that imposed by section 710 of the Internal Revenue Code, and should not be confused with the declared-value excess-profits tax. The tax is shown after deduction of the credit for debt retirement and the net postwar refund.

1/ The industrial classification is based on the business activity reported on the return. When multiple businesses are reported on a return, the classification is determined by the business activity which accounts for the largest percentage of total receipts. Therefore, the industrial groups do not reflect pure industry classifications.

2/ Net income or deficit is the amount reported for declared-value excess-profits tax computation adjusted by excluding the net operating loss deduction. Net income for declared-value excess-profits tax computation includes intercorporate dividends received.

3/ Total compiled receipts consists of gross sales, gross receipts from operations, all interest received on Government obligations, other interest, rents and royalties, net capital gain, dividends, and other receipts required to be included in gross income. Total compiled receipts excludes nontaxable income other than tax-exempt interest received on certain Government obligations.

4/ Income subject to excess-profits tax was allowed as a credit in computing normal tax and surtax net income for taxable years beginning after December 31, 1941 and is, in general, equal to the adjusted excess-profits net income.

5/ The excess-profits tax shown is that imposed by Section 710 of the Internal Revenue Code, and should not be confused with the declared-value excess-profits tax. The

tax is shown after deduction of the credit for debt retirement and the net postwar refund.

6/ In making historical comparisons of this kind, of course, consideration must be given to changes in the tax laws. Details concerning such changes for years through 1941 may be found in "Statistics of Income, Part 2," for the year in question. Changes applicable in 1942 are given in the preliminary "Statistics of Income, Part 2," for that year, and those applicable in 1943 are shown in the original press release which this article summarizes. Some of the more important changes which should be borne in mind are the presence of the surtax on undistributed profits in 1936 and 1937, the introduction of the excess-profits tax in 1940, and the changes in the method of computing income subject to excess-profits tax and income tax introduced in 1941 and 1942.

7/ In 1940, income tax was deducted from net income in determining excess-profits net income. In 1941, income tax was not deducted in arriving at excess-profits net income, but instead excess-profits tax was allowed as a deduction in the computation of normal tax net income. For 1942 and later years, income subject to excess-profits tax, rather than excess-profits tax, was deductible in determining normal tax net income.

8/ Adjusted excess-profits net income is excess-profits net income less the sum of the specific exemption, excess-profits credit, and unused excess-profits credit adjustment.

Treasury Market Financing

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fourth War Loan, are published in the tables on pages 32 and 33. Details of weekly Treasury bill offerings are shown on pages 34 and 35.

Refunding and Repayment in February

On February 13, 1946 Secretary of the Treasury Vinson announced the offering of an issue of one-year 7/8% certificates of indebtedness in exchange for all except about \$1 billion of the certificates maturing on March 1, 1946. Cash subscriptions were not accepted. At the same time, he announced that payment would be made in cash for the Treasury bonds of 1946-56 called for redemption on March 15, 1946, and the Treasury notes maturing on March 15, 1946, as well as the \$1 billion of maturing certificates. Altogether, the March maturities aggregated \$5.9 billion of which \$2.3 billion was to be paid off in cash.

Maturing issues. Details of the three issues maturing in March are shown in the following table:

Maturing issues	Amount outstanding (In millions of dollars)	Tax status 1/
7/8% certificates of indebtedness due 3/1/46...	4,147	Taxable
1% Treasury notes due 3/15/46.....	1,291	Taxable
3-3/4% Treasury bonds of 1946-56 called for redemption 3/15/46.....	489	Partially exempt
Total.....	<u>5,927</u>	-

An analysis of the Treasury reports on ownership of Government securities indicates that on January 31, 1946, about 83% of the maturing issues was owned by reporting commercial banks and Federal Reserve Banks. The following table summarizes the ownership figures of these three securities as reported to the Treasury Survey of Ownership of Securities Issued by the United States Government and by Federal Agencies, January 31, 1946.

Maturing issues	Total outstanding	Held by	
		Reporting banks 2/	All others
(In millions of dollars)			
7/8% certificates of indebtedness due 3/1/46.....	4,147	3,567	580
1% Treasury notes due 3/15/46.....	1,291	1,072	219
3-3/4% Treasury bonds of 1946-56 called for redemption 3/15/46.....	489	254	235
Total.....	<u>5,927</u>	<u>4,893</u>	<u>1,034</u>
(In percent)			
7/8% certificates of indebtedness due 3/1/46.....	100	86	14
1% Treasury notes due 3/15/46.....	100	83	17
3-3/4% Treasury bonds of 1946-56 called for redemption 3/15/46.....	100	52	48
Total.....	100	83	17

The distribution of ownership in the above table is based on the latest available data, and some changes probably occurred after January 31. The announcement that \$2.3 billion of the \$5.9 billion of maturing issues would be paid in cash may have caused some holders to sell in the market in order to reinvest in other securities. Such trading may have affected the distribution between bank and nonbank holders, but it is difficult to estimate the amount of such change.

New issue. Since the new one-year certificates were offered on an exchange basis for about \$3.1 billion of the \$4,147 million of the matur-

2/ Includes (1) 7,377 commercial banks holding approximately 95 percent of the United States Government obligations held by all commercial banks in the United States, and (2) Federal Reserve Banks.

1/ For definitions of tax status, see page 31.

ing certificates outstanding, subscriptions were received subject to allotment to all holders on an equal percentage basis, except that subscriptions in amounts up to and including \$25,000 were to be allotted in full. On February 28, Secretary Vinson announced that subscriptions aggregated \$4,104 million. Subscriptions in amounts of \$25,000 or less were allotted in full in an amount of \$49 million. Subscriptions in amounts of over \$25,000 were allotted 76% on a straight percentage basis, but not less than \$25,000 to any one subscriber with adjustments to the next highest thousand, where necessary. Total allotments amounted to \$3,133 million, leaving \$1,014 million to be paid off in cash.

The new certificates were dated March 1, 1946 and will mature March 1, 1947. Interest at the rate of 7/8% per annum is payable semi-annually on September 1, 1946 and March 1, 1947 and is subject to Federal income taxes.

The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. The exchange was on a par for par basis. Subscription books were

closed on February 20, except for the receipt of subscriptions from holders of \$25,000 or less of the maturing securities for which they remained open through February 23.

Call of 3% and 3-1/8% Treasury Bonds

On February 14, 1946, the 3-1/8% Treasury bonds of 1946-49 and the 3% Treasury bonds of 1946-48 were called for redemption on June 15, 1946. The 3-1/8% bonds were dated June 15, 1931 and the 3% bonds were dated June 15, 1934. The final maturity dates on these bonds were June 15, 1949 and June 15, 1948, respectively, with the option to call for redemption by the Treasury, on four months' notice, on any interest payment date from June 15, 1946 to final maturity. There are now outstanding \$819 million of the 3-1/8% bonds and \$1,036 million of the 3% bonds.

The Treasury's announcement of call stated that holders of the bonds may be offered, in advance of the redemption date, the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice would hereafter be given.

SUMMARY OF FISCAL STATISTICS

Budgetary Receipts and Expenditures

	First 8 months, fiscal years 1944 to 1946				Complete fiscal years, 1944 to 1947					
	1944	1945	1946	Change 1945 to 1946	Actual		Estimated 1/		Change

* Less than \$500,000.

1/ Based upon the 1947 Budget as released in January; revised estimates of receipts and expenditures for the fiscal year 1946 were released by the President on April 11. They show estimated receipts of \$42,932 million, expenditures (including net outlays of Government corporations) of \$64,654 million, and deficit (including net outlays of Government corporations) of \$21,722 million. Since the expenditure and deficit estimates include net outlays of Government corporations they are not strictly comparable to the figures shown in the table. The revised estimates were not released in sufficient detail to permit their inclusion in the table; no revisions were made for the fiscal year 1947. The April 11 revision did not include any estimates for public debt and cash balance items, which appear on the following page.

2/ For further details, see following chapter, Tables 1 and 2.

3/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

4/ Includes deposits resulting from the renegotiation of war contracts.

Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

5/ Classification changed to reflect expenditures of surplus property disposal agencies for the fiscal years 1946 and 1947. Prior year expenditures are included under "Other".

6/ Includes transfers to trust accounts, etc.

7/ Includes expenditures for public works undertaken by Veterans' Administration.

8/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the social security program. For discussion of excess profits tax refund bonds, see following chapter, Table 3.

9/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of the Social Security Act.

* Less than \$500,000.

^{1/} Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc. under special provisions of law.

^{2/} For further details, see Table 2.

^{3/} For explanation see tables which follow entitled "Social Security Program".

^{4/} For further details, see Table 3.

^{5/} For further details, see Table 4.

^{6/} For further details, see Table 5.

^{7/} Total expenditures less net receipts.

^{8/} Represents expenditures for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law.

^{9/} Includes recoveries of U. S. investments in capital funds. Such recoveries totaled \$54 million in the fiscal year 1940; \$319 million in the fiscal year 1941; \$18 million in the fiscal year 1942; and \$10 million in the fiscal year 1943.

^{10/} Receipts from reductions in capital stock and paid-in surplus available to be reissued under existing law are included as negative items under expenditures. Such reductions totaled \$315 million.

^{11/} Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

Source: Daily Treasury Statement.

Back figures: For monthly data for the period July 1941 through July 1944, see "Treasury Bulletin" for September 1945, pages 6 and 7.

• Less than \$500,000.

^{1/} General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.^{2/} Includes public works undertaken by the Veterans' Administration.^{3/} Does not include transfers to trust accounts, etc. These are shown in Table 5.^{4/} "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government". Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.^{5/} Consists of Administration of Sugar Act of 1937, Agricultural Adjustment Agency, exportation and domestic consumption of agricultural commodities, Farm Credit Administration, Farm Security Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and other.^{6/} Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management,

War Manpower Commission (U. S. Employment Service) under authority of Social Security Act. For further details, see tables which follow on the Social security program.

^{7/} Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.^{8/} Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social security program and the Department of Agriculture departmental expenditures.^{9/} For additional information, see "Treasury Bulletin" for August 1945, page 6.^{10/} Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal; and capital stock of the Federal Deposit Insurance Corporation, Home Owners' Loan Corporation, Federal home loan banks, and Disaster Loan Corporation. Gross expenditures have been reduced \$160 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.^{11/} Includes \$257 million for restoration of capital impairment of Commodity Credit Corporation applicable to fiscal years 1943 and 1944. Classified as miscellaneous expenditures commencing July 1, 1945.^{12/} Includes \$174 million, Export-Import Bank of Washington - capital stock.

Source: Daily Treasury Statement.

Note: For back figures for the period July 1940 through April 1943, see the "Treasury Bulletin", May 1943, page 7.

* Less than \$500,000.

1/ Includes war public housing functions.

2/ Similar items for periods prior to fiscal year 1941 are classified under "Other departmental" and "Other general expenditures" in Table 3. Includes war expenditures of Commerce, Justice, Interior, Labor, and State Departments; Civil Service Commission; Executive Office of the President (including Office for Emergency Management); Panama Canal; and capital stock of Smaller War Plants Corporation. Includes Defense Aid Special Fund through the fiscal year 1943;

thereafter such expenditures are reflected within the respective departments.

3/ Classification changed to reflect expenditures for the fiscal year 1946 under "War activities". Prior year expenditures are included under "General".

4/ Payment of \$370,286,944 was made on Dec. 29, 1945, by the Federal Surplus Commodities Corporation of the Department of Agriculture to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures by the Commodity Credit Corporation.

Back figures: For Monthly data for the period July 1941 through July 1944, see "Treasury Bulletin" for September 1945, pages 11 and 12.

r Revised.

• Less than \$500,000.

1/ Includes Government Retirement funds, etc. (See footnote 2.)

2/ Comprises Public Works Administration revolving fund, special

deposits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified as "other trust accounts".

3/ Net receipts in this column constitute net sales, and net expenditures constitute net redemptions of obligations.

4/ Details not available.

 * Less than \$50,000.

- 1/ Formerly Title VIII of the Social Security Act.
- 2/ Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).
- 3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in

- 4/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.
- 5/ Covered by appropriations by Congress.
- 6/ Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal employers' tax for 1936 collected under the Social Security Act.

• Less than \$50,000.

^{1/} Operated as Railroad Unemployment Insurance Administration Fund. Represents 10% of contributions under the Railroad Unemployment Insurance Act; the remaining 90% is deposited in the Railroad Unemployment Insurance Account, Unemployment Trust Fund (See Section II, Table 3). Excludes amounts appropriated to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected for the period January 1936 through June 1939 from employers subject to the Railroad Unemployment Insurance Act. These amounts aggregated \$15.0 million and were distributed by calendar

years, as follows: 1937, \$5.3 million; 1938, \$6.8 million; and for the first six months of the calendar year 1939, \$2.9 million. These amounts are included in Table I under Federal Unemployment Tax Act (unemployment insurance).

^{3/} Includes only expenditures from appropriations made specifically for administrative expenses relating to the Railroad Unemployment Insurance Act.

^{4/} Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

^{5/} Covered by appropriations by Congress.

		Liquidations of 1940 and prior contract authorizations.....	-467,872,846	-
		Total approved, rescinded, pending appropriations or rescissions, and net contract authorizations ^{1/}	\$355,764,963,458	\$ 9,378,866,861

^{1/} Consists of appropriations and net contract authorizations available on and after July 1, 1940. Excludes: (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations), available for expenditure in the fiscal year 1941.

^{2/} Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this purpose.

^{3/} Includes appropriations made available for prior years. For amounts see appropriate footnotes in "Treasury Bulletin" for July, 1945, page 16.

^{4/} Unappropriated contract authorizations for the naval expansion program are as follows:
Public Law No. 441.....\$2,257,137,102
Public Law No. 204 (Estimated by Navy Department) 2,484,905,021
Public Law No. 375.....55,000,000
Public Law No. 375 (Estimated by Navy Department) 1,825,000,000
Public Law No. 529.....60,000,000

^{5/} Revised to adjust classification.

^{6/} The amounts of appropriations repealed by Congress and carried to the surplus fund in accordance with the provisions of this act are shown separately below.

^{7/} Includes \$180,000,000 for the fiscal year 1945.

^{8/} Excludes rescission of the unobligated portion of the contract authorization under Aviation, Navy.

^{9/} Pending appropriations, as used herein, represent appropriation bills reported from the Committee on Appropriations to the House, or in subsequent stages of Congressional action before Presidential approval. Estimates of appropriations for national defense purposes reported by the President to Congress and submitted to the Committee on Appropriations, amounting to \$12,169,327,281, are not included.

^{10/} Excludes rescission of the United States Maritime Commission in the amount of \$460,000,000.

^{11/} For details of appropriations made by the 76th Congress, Third Session and 77th Congress, First Session, see "Treasury Bulletin" for March, 1944, page 5.

^{12/} Includes actual transfer of balances of the Bureau of Marine Inspection and Navigation from the Department of Commerce to Coast Guard, Navy, in the amount of \$1,153,802 in accordance with Executive Order 9083, dated February 28, 1942. Also includes \$57,133,291 received as war contributions under authority of the Second War Powers Act and deposits of advance payments made by foreign governments to the Defense Aid Special Fund for the procurement of defense articles amounting to \$292,508,191.

Sources: Daily Treasury Statement.

• Less than \$500,000.

- 1/ This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.
- 2/ This represents the increase in the gross public debt, except as noted. (See footnote 6.)
- 3/ Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust accounts. (See footnote 5.)
- 4/ Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 6.)

- 5/ Comprises Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".
- 6/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1936 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1936, \$397 million; 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.
- 7/ Includes inactive gold in the amount of \$1,087 million.

Source: Daily Treasury Statement.

* Less than \$500,000.

^{1/} Guaranteed securities held by the Treasury and securities guaranteed as to interest only are not included in this table.

^{2/} Bank restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date, with two exceptions: (1) concurrently with the 4th, 5th and 6th War Loans and the Victory Loan, commercial banks were permitted to subscribe for limited investment of their savings deposits; (2) commercial banks may temporarily acquire such issue through forfeiture of collateral.

^{3/} The face value of any yearly series of United States savings bonds and Treasury savings notes maturing from month to month which are not currently presented for retirement are included in the interest-bearing debt until all the bonds or notes of the series have matured.

^{4/} Demand obligations.

^{5/} Consists of Reconstruction Finance Corporation notes, Series L-A, L-B, and L-C, which were held by United States Government corporations and credit agencies.

^{6/} Includes prepayments on securities.

Source: Daily Treasury Statement.

^{1/} Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-F are considered to yield 2.90% per annum and Series F is considered to yield 2.53%. ^{2/} Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and

interest by the United States (except such guaranteed obligations as may be held by the Secretary of the Treasury), shall not exceed in the aggregate \$300 billion outstanding at any one time.

Table 1.- Condition as of February 28, 1946

(In millions of dollars)

Maximum amount of securities which may be outstanding at any one time, under limitations imposed by Section 21 of the Second Liberty Bond Act, as amended.....	300,000
Amount of securities outstanding subject to such statutory debt limitation:	
U. S. Government securities issued under the Second Liberty Bond Act, as amended 1/.....	289,040
Guaranteed securities 2/.....	551
Total amount of securities outstanding subject to statutory debt limitation.....	289,591
Balance issuable under such authority.....	10,409

Source: Public Debt Service.

1/ For comparison with the public debt outstanding, see following

table 2.

2/ Excludes guaranteed securities held by the Treasury.

Table 2.- Analysis of U. S. Government Securities Outstanding Subject to Statutory Debt Limitation and Comparison with the Public Debt Outstanding, February 28, 1946

(In millions of dollars)

	U. S. Government securities outstanding subject to statutory debt limitation 1/	Total public debt outstanding
Interest-bearing securities:		
Marketable issues:		
Treasury bills.....	17,032	17,032

Source: Daily Treasury Statement, and reports to the Treasury.

- 1/ Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).
- 2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.
- 3/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates. ^{4/} Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 25.

Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness

Note: For period December 1941 through December 1943, see "Treasury Bulletin" for November 1944, page 32.

p Preliminary.

1/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.

2/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.

3/ Figures on amount of War Loan securities issued consist both of amount issued in connection with the Drive, and of amount issued concurrently with Drive to commercial banks and Treasury invest-

ment accounts.

4/ Bank restricted issue. See preceding table (maturity schedule of interest-bearing public marketable securities) for earliest date which commercial banks may acquire this issue.

5/ Reopening of previously offered security.

6/ Interest commenced on March 15, 1944.

7/ Interest commenced on June 26, 1944.

8/ Interest commenced on September 15, 1944.

9/ This is the same security that was offered in the Sixth War Loan.

10/ Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness and Securities Guaranteed by the United States

Date of refunding for exchange transaction, or of retirement for cash transaction	Description of called or maturing security 1/ (Date of issue is shown in parentheses)	Amount out-standing	Disposition offers by Treasury		Results of exchange offers			Description of new security offered
			Cash retirement	Exchange security offered	Ex-changed	Turned in for cash	Percent ex-changed

Note: For period December 1941 through December 1943 see "Treasury Bulletin" for November 1944, page 33.

p Preliminary.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

3/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Offerings and Maturities of Treasury Bills

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941).

Series F and G bonds are available to all subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for May 1945, pages A-3 and A-4.

Series A bonds matured in 1945, and bonds of series B began to mature in January 1946. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Table 1.- Summary of Sales and Redemptions, by Series, as of February 28, 1946

United States savings bonds	Sales	Accrued discount	Sales plus accrued discount	Redemptions	Amounts outstanding		Percent of redemptions to sales plus accrued discount

Note: It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by states are not available prior to October 1944.

* Less than \$500.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax-payment or redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series

A and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax-payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months see "Treasury Bulletin" for February 1946, pages 42 and 43.

Table 1.- Summary of Sales and Redemptions, by Series, as of February 28, 1946

Source: Daily Treasury Statement commencing November 1, 1942; prior thereto, Post Office Department.

- 1/ Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.
- 2/ Estimated on the basis of samples made by the Post Office Department.
- 3/ Details not available for May, June, and July 1941.

- 4/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousand for the period August 1, 1941 through June 30, 1942 and \$55 thousand for the period July 1, 1942 through October 31, 1942.
- 5/ Net of sales less redemptions. See footnote 1.
- 6/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

* Less than \$50,000.

$\frac{1}{}$ Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

Treasury Survey of Ownership of Securities Issued by the United States Government and by Federal Agencies, January 31, 1946

Section I - Securities Issued or Guaranteed by the United States Government

The tables in Section I present summary data as of January 31, 1946 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95 percent of the amount of such securities

owned by all banks and insurance companies in the United States.

Section II presents summary data on the ownership of Federal land bank bonds and Federal intermediate credit bank debentures.

Table 1.- Summary: All Interest-Bearing Securities

(In millions of dollars)

Classification	Total amount outstanding	Held by investors covered in Treasury Survey							Held by all other investors ^{3/}
		Banks ^{1/}			Insurance companies			All U. S. Government agencies and trust funds, and Federal Reserve Banks	
		7,377 commercial banks ^{2/}	34 stock savings banks	541 mutual savings banks	Total	317 life insurance companies	648 fire, casualty, and marine insurance companies

Back figures: The Treasury Survey commenced with data for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for September 30, 1944 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1943 through February 1944 appeared in the May 1944 issue, pages 52-57; revisions of data on insurance companies for May 31, 1943 and prior months appeared in the November 1943 issue, pages 52-63.

• Less than \$500,000 or less than .05%.

1/ Securities held in trust departments are excluded.

2/ Includes trust companies.

3/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See head-note to this section.

4/ Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions). See footnote 2, page 25.

5/ Guaranteed securities held by the Treasury are not included.

6/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from 35,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

7/ Includes an estimated amount of Federal Housing Administration debentures.

8/ Actual figures by tax status are unavailable except for the total amount outstanding.

* Less than \$500,000.

^{1/} United States savings bonds, Series B-D, E, and F are shown at current redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

^{2/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the sur-

tax rates. "Taxable" securities are subject to both normal and surtax rates.

^{3/} Securities held in trust departments are excluded.

^{4/} Includes trust companies.

^{5/} This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See heading to this section.

^{6/} Series B-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.

^{7/} Guaranteed securities held by the Treasury are not included.

^{8/} C.C.C. demand obligations in the amount of \$506 million held by all commercial banks are shown only in total amount outstanding.

Section II - Interest-Bearing Securities Issued by Federal Agencies

But not Guaranteed by the United States ^{1/}

^{1/} Excludes Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

^{2/} Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

^{3/} Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

^{4/} Included in the Average Yield of Long-Term Taxable Treasury Bonds.

^{5/} Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions). See footnote 2, page 25.

^{6/} Quoted on a yield basis.

^{7/} Quoted on price basis at par beginning February 20, 1946; from February 5 through February 19, quoted on basis of zero yield plus premium per thousand dollars; prior to February 5, quoted on a yield basis.

^{8/} For amount of this security issued on March 1, 1946, see table on "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates" in the chapter on "Public Debt and Guaranteed Obligations of the United States Government."

^{9/} Called on November 14, 1945, for redemption on March 15, 1946.

^{10/} Called on February 14, for redemption on June 15, 1946.

^{11/} Excludes postal savings bonds.

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.
2/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity

3/ Prices more significant when an issue is selling at or below par. Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.
4/ Not quoted on February 28, 1946.
5/ Excludes issues completely held by Farm Credit Administration agencies.

YIELDS OF TREASURY SECURITIES FEB. 28, 1946

Based on Mean of Closing Bid and Asked Quotations

Explanation The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the

case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Holiday.

7/ Closed.

r Revised.

* Less than \$500.

1/ Figures are for the five months ended November 30, 1945 with exception of Lend-lease and U.S.R.R.A. activities.

2/ Consists of Agricultural Marketing Act Revolving Fund and Emergency Crop and Feed Loans.

3/ Consists of Indian Loans, Puerto Rican Hurricane Relief Loan Section, and Puerto Rico Reconstruction Administration.

4/ Consists of Public Works Administration and War Public Works, community facilities.

5/ Figures in this statement are a combination of accrual and cash bases.

6/ Consists of Navy Department, sale of surplus supplies (World War I), and guaranteed loans (World War II); War Department, guaranteed loans (World War II); Federal Public Housing Authority, war housing and subsistence homesteads; Federal Security Agency, loans to students; and Treasury Department, miscellaneous loans and certain other assets.

7/ Negative figures indicate loss.

8/ Negative figures indicate deficit.

Section II - Sources and Application of Funds of Corporations and Certain Other Agencies of the United States Government, for the Six Months Ended December 31, 1945

Table 1.- Summary

(In thousands of dollars)

	Total 1/	Corporations	Certain other agencies 1/
Sources of funds			
Borrowings:			
From U. S. Treasury.....	1,136,300	1,136,300	-
From Government agencies.....	740,542	657,969	82,573

Source: (1) Total receipts from internal revenues; Daily Treasury Statement; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

r Revised.

* Less than \$500.

^{1/} Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

^{2/} Consists only of collections for which returns have been filed with the Collector of Internal Revenue. Collections under this act as shown in Daily Treasury Statements consist of withholdings deposited in Government depositories in addition to payments accompanying returns filed with the Collector of Internal Revenue.

^{3/} Current collections consist in general of taxes paid within twelve months after the close of the taxable year for which the return was filed.

^{4/} Current individual income tax collections for the fiscal year 1945 include payments on unforgiven portion of 1942 tax, due March 15, 1945, of \$308,605 thousand for the period January 1, 1945 through April 30, 1945.

^{5/} Represents collections under the Federal Insurance Contributions Act.

^{6/} Represents collections under the Federal Unemployment Tax Act.

^{7/} Represents collections under the Carriers' Taxing Act of 1937.

^{8/} Tax imposed upon the manufacture and sale of, and the occupational tax on, mixed flour repealed as of November 1, 1942.
