### Treasury Market Financing During July

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fifth War Loan, are published in the tables on pages 31 and 32. Details of weekly Treasury bill offerings are shown on pages 33 and 34.

#### Cash Payment and Refunding

On August 1, 1946, there was a maturity of 7/8% certificates of indebtedness in the amount of \$2,470 million. The Secretary of the Treasury announced on July 17, 1946 that about \$1,250 million of this would be paid off in cash and that a new, one-year 7/8% certificate would be offered in exchange for the remainder, par for par. Exchange subscriptions were received subject to allotment to all holders on an equal percentage basis, except that subscriptions of \$25,000 and less were allotted in full. Cash subscriptions were not received.

Reports to the Treasury on the ownership of Government securities indicate that on June 30, 1946 about 82% of the \$2.5 billion of maturing certificates was owned by reporting commercial banks and Federal Reserve Banks. Since such a large part of the maturing issue was owned by banks, the pay-off had the direct effect of further reducing bank ownership of the public debt. The June 30 figures on ownership are the latest available. Market transactions after that date may have resulted in some shifts in ownership between banks and nonbank investors.

The new certificates were dated August 1, 1946 and will mature August 1, 1947. Interest at the rate of 7/8% per annum is payable on February 1 and August 1, 1947 and is subject to all Federal income taxes.

The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. Subscription books remained open through July 19 except for the receipt of subscriptions from holders of \$25,000 or less of the maturing certificates, for which the books remained open through July 22.

On July 29, 1946, Secretary of the Treasury Snyder announced that subscriptions for the new issue aggregated \$2,307 million. Subscriptions of \$25,000 or less were allotted in full in the amount of \$39 million. Subscriptions in amounts of over \$25,000 were allotted 52% on a straight percentage basis, but not less than \$25,000 to

any one subscriber, and with adjustments to the next highest thousand where necessary. Total allotments amounted to \$1,223 million, with \$1,246 million to be paid off in cash.

#### Net Decline in the Public Debt

With the payment in cash of \$1.2 billion on the certificates maturing on August 1, 1946, the Treasury had paid off \$13.5 billion on maturing and called securities since the beginning of March 1946. These cash pay-offs represented more than half of the total of \$26.4 billion of securities maturing or called for payment during the period. The following table shows the amount of each issue maturing or called for payment since February 28, 1946 and the amount of cash pay-off in each case.

**Cash Pay-offs on Securities Maturing or Called for Payment**

(In billions of dollars)

	Total.....	26.4	13.5

By August 2, 1946 the debt had been reduced by \$12.3 billion to a total of \$267.5 billion from its peak of \$279.5 billion on February 28, 1946. The net decline in the debt was thus about \$1.2 billion less than the total of cash pay-offs. The difference was accounted for by other transactions such as the continued sale of

savings bonds and the sale of special issues to United States Government trust funds. The table below presents a reconciliation of the cash pay-

offs and the net decline in the debt from February 28, 1946 to July 31, 1946, and to August 2, 1946.

On page 49 of this issue of the "Treasury Bulletin" estimates are presented as to the ownership of the public debt by classes of investors with the latest figures for June 30, 1946. Between February 28 and June 30, 1946 the interest-bearing debt declined by \$9.9 billion, and the ownership figures indicate that holdings by commercial banks and Federal Reserve Banks decreased \$5.3 billion, or about 5/6 of the total

decline. Complete figures on ownership are not available through August 1, but preliminary data indicate that the results continued at least as good proportionately in reducing bank ownership of the debt. This is consistent with the Treasury policy of reducing bank ownership as much as possible to assist in the control of inflationary pressures.

## Changes in Classification of Expenditures in Treasury Reports Effective July 1, 1946

On July 1, 1946 several changes were made in Treasury reports in order to conform with current budgetary practice, and to reclassify expenditures from a checks paid to a checks issued basis. The changes involved are as follows:

- (1) Transactions of wholly owned Government corporations (other than sales and redemptions of obligations in the market) were removed from the category "Transactions in checking accounts of Government corporations, etc. (net)" under "Trust accounts, etc., and are now shown as a net item under "Budgetary expenditures." Consequently, these transactions are now reflected in the budgetary surplus or deficit.
- (2) Transactions of mixed ownership Government corporations (other than sales and redemptions of obligations in the market) were removed from the category "Transactions in checking accounts of Government corporations, etc. (net)" and are now included in "Special deposits and miscellaneous funds and accounts."

(3) The subcategory "Sales and redemptions of obligations of Government corporations, etc., in the market (net)" which was formerly included under "Transactions in checking accounts of Government corporations, etc. (net)," now appears as a separate classification.

(4) The category "Clearing account for outstanding checks" has been introduced under "Trust accounts, etc." This new account reflects the difference between checks issued and checks paid, in order to reconcile to the General Fund balance.

The tables on budgetary receipts and expenditures, and trust accounts, etc. receipts and expenditures contained on the following pages have been revised back through the fiscal year 1945. Prior to July 1944 the figures in these tables are still on the old basis.

The table below shows a comparison of budgetary receipts and expenditures and net receipts or expenditures of trust accounts, etc., on both the new and the old basis.

1/ Less than \$500 thousand.

2/ Includes Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Railroad Retirement Account, Unemployment Trust Fund, etc.

3/ Prior to July 1, 1946 this category includes transactions of mixed ownership Government corporations (other than sales and redemptions of obligations in the market).

4/ Breakdown of this amount on the old basis is not available.

5/ This classification was discontinued on July 1, 1946. It contained "Sales and redemptions of obligations in the market (net)" and "Other transaction (net)." Beginning with July 1, 1946 "Sales and redemptions of obligations of Government corporations, etc., in the market (net)" appear as a separate item (see footnote 5). "Other transactions (net)" appear as a separate item (see footnote 5).

6/ Expenditures of wholly owned Government corporations are included in "Budgetary expenditures," and "Other transactions (net)" of mixed ownership Government corporations are included in "Special deposits and miscellaneous funds and accounts" (see footnote 2).

7/ Prior to July 1, 1946 this item was a subcategory under "Transactions in checking accounts of Government agencies, etc." (see footnote 4).

8/ Since July 1, 1946 expenditures are classified primarily on the basis of checks issued, rather than checks paid which was used previously. This new classification reflects the difference between checks issued and checks paid, in order to reconcile to the General Fund balance.

9/ Expenditures for July 1946 on a checks paid basis are not available, consequently this item appears as an adjustment.

1/ Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.

3/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates.

"Taxable" securities are subject to both normal and surtax rates. Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 25.

Preliminary.

Not available.

Original call and maturity date are used.

Bank restricted issue.

Prior to the refunding operation of March 1, 1946, maturing

issues were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

## Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and bonds of series B began to mature in January 1946. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Note: It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

## Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1940 appeared in the "Treasury Bulletin" for April 1940, page 77-81.

Average of Treasury bonds as either due or callable for fifteen years. For discussion of composition of averages see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the

case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax. For discussion of present composition of high-grade corporate bond averages, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1, 1943, page 61.

5/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

6/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnotes 2, 4, 5.

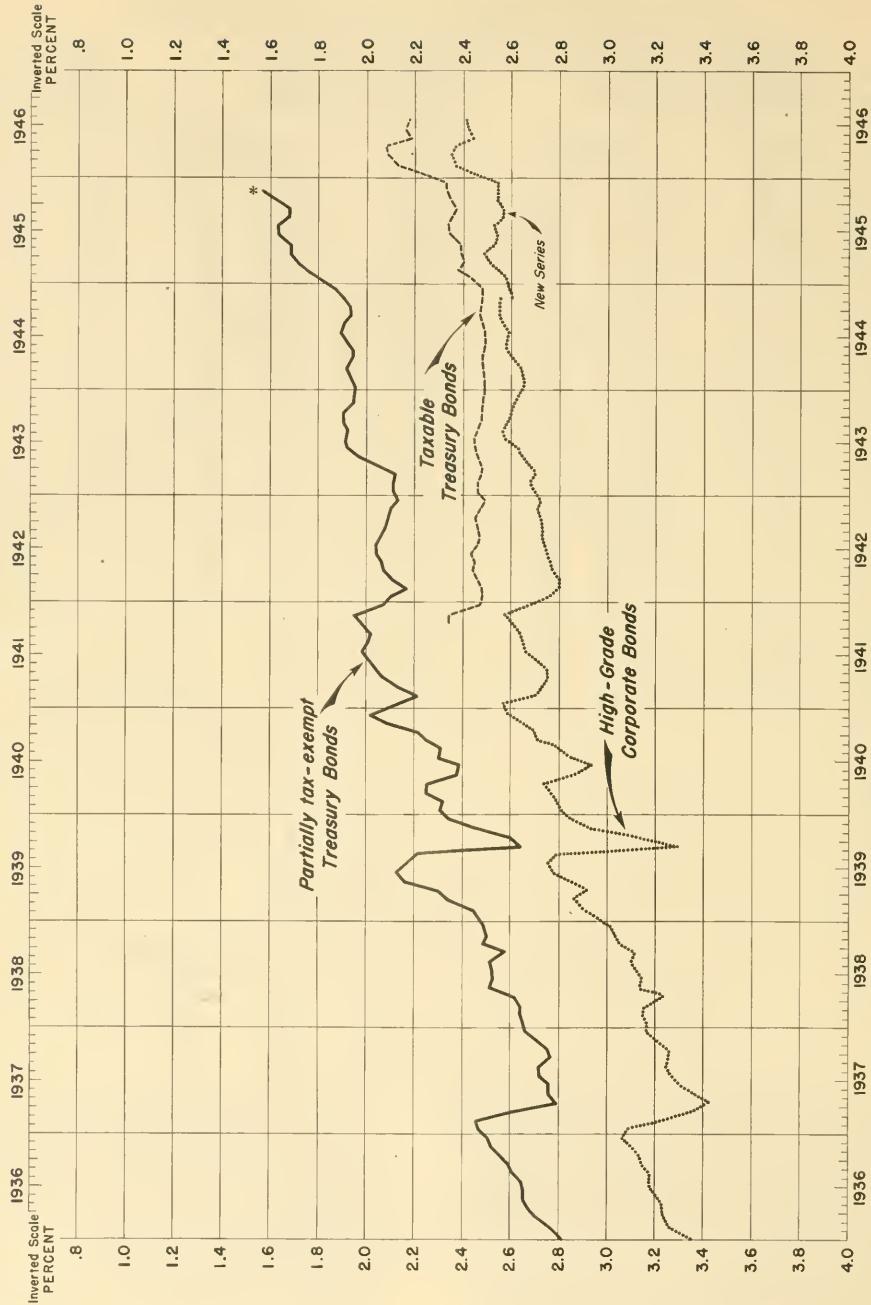

7/ On days when the exchanges are closed, the date and prices of the previous day are used.

CAPITAL MOVEMENTS BETWEEN THE UNITED STATES  
AND FOREIGN COUNTRIES AND NET POSITION  
IN FOREIGN CURRENCIES

## Capital Movements Between the United States and Foreign Countries

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements, by the principal types of data and by years, starting with 1935. The last thirteen months are also shown. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for the last thirteen months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are

available.

The last group contains information regarding the net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts and purchases and sales of foreign exchange, both spot and forward. This section covers a twelve-month period.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", November 1945, for capital movements, and position in foreign currencies by months, 1942-1945.

"Treasury Bulletins", March 1942 and earlier, for details covering years back to January 2, 1935.
