Financial Operations of the United States Government during the Fiscal Year 1947

On July 2, 1947, Secretary Snyder issued the press release (No. S-385) reprinted below, in which he reviewed the financial operations of the United States Government during the fiscal year 1947. Three tables attached to the release have been omitted from the reprint, because the information contained in them is largely available in the Statistical Section of the Bulletin. These three tables were "Classified Statement of Budget Receipts and Expenditures, Fiscal Years 1945-1947", "Composition of the Outstanding Public Debt", and "Disposition of Matured Marketable Securities during Fiscal Year 1947".

Secretary of the Treasury John W. Snyder announced today that the Treasury closed the fiscal year 1947 with a budget surplus of \$754 million.

The Secretary said that this achievement of a budget surplus in a fiscal year commencing only ten months after the completion of our military victory was made possible by the untiring economy efforts of President Truman. It is noted that this occurred during a period in which a large proportion of the total Government expenditures was still occasioned by the cost of liquidating obligations resulting from the war.

The President, Secretary Snyder said, has constantly taken the initiative in cutting expenditures consistent with the national safety and welfare. Whenever possible, the President has regarded the appropriations granted by Congress as ceilings, rather than as targets. In numerous cases he has cut expenditures drastically below those authorized by Congress. Since taking office, President Truman has recommended to the Congress the cancellation of appropriations totaling over \$65 billion.

Total Government expenditures in the fiscal year just ended amounted to \$42,505 million. This is a decline of a third from the expenditures of \$63,714 million during the preceding fiscal year and a decline of nearly 60 percent from the wartime peak of \$100,397 million reached in 1945.

The expense of the transition from war to peace continues to comprise a substantial proportion of Federal expenditures. Expenditures for veterans (including terminal leave), for example, amounted to \$9,250 million in the year just ended; while expenditures for UNRRA, the credit to Great Britain, Export-Import Bank loans, and subscriptions to the International Bank and Monetary Fund amounted to another \$5,915 million.

In contrast to the sharp reduction in ex-

penditures, net receipts were practically the same as in the preceding year. The primary reasons for this maintenance of receipts have, of course, been the success of the Nation's reconversion from a wartime to a peacetime economy, the continued high level of production and employment, and substantial receipts from the sale of surplus property.

Of great importance has been the Treasury Department's vigorous enforcement of internal revenue legislation. Secretary Snyder estimated that the extra enforcement activities of the Treasury yielded an additional \$2 billion in revenue during the fiscal year. The funds granted to the Treasury Department by Congress for this extra effort have been repaid many times over.

The Secretary declared that, as long as business, employment, and national income continue high, we should maintain tax revenues at levels that will permit a continued reduction in the public debt. The desirability of such a policy, he added, is emphasized by the fact that the financial soundness and continued stability of the American economy is the cornerstone of our national life.

Comparisons with April budget estimates

Receipts were \$759 million more than the estimates released by the President on April 19, practically all of which was due to an unexpected increase in miscellaneous receipts. This resulted principally from a settlement of accounts earlier than had been anticipated between the Reconstruction Finance Corporation and the Treasury amounting to \$580 million, relating to sales of surplus property and repayment of capital of the Smaller War Plants Corporation.

Expenditures exceeded the April estimates by \$1,255 million, due largely to the payment by the Reconstruction Finance Corporation to the Treasury in the settlement of accounts mentioned above and to the fact that refunds of taxes were con-

considerably heavier than had been expected. The Treasury, of course, has no control over the amount of refunds which are required by law to be made, but has endeavored to speed up the program as much as possible in the interest of economy and as a service to the taxpayers. The acceleration of the payment of tax refunds during the year resulted in substantial interest savings to the Treasury, the amount of interest paid on refunds being \$3.3 million less than last year.

Reduction in debt

During the fiscal year just ended the public debt -- including guaranteed obligations held outside the Treasury -- was reduced by \$11,522 million, of which \$754 million was the result of the budget surplus. The total amount outstanding on June 30 was \$258,376 million. This compares with \$279,764 million at the postwar peak which was reached on February 28, 1946. The major part of this reduction in the debt has been accomplished by reducing the Treasury cash balance from its postwar peak to its present level. Future reductions in the debt can occur only from budget surpluses.

Practically the entire decline in the debt since the peak has been in the holdings of the commercial banking system. Holdings of debt by nonbank investors as a whole have remained practically constant. This concentration of debt reduction in bank holdings has been in accordance with the Treasury policy of spreading the ownership of the debt as broadly as possible, and has helped to alleviate inflationary pressures during the reconversion period. This debt reduction program was made possible by the Treasury's policy of maintaining a substantial portion of the debt in short-term securities.

This policy maintained the liquidity of the banking system and put a large portion of the debt in a form in which it could be easily retired. As a consequence of the liquidity of the banks' Government security portfolios, the large turnover of funds incident to the debt reduction program occurred without disturbance to the money market. The reduction in the debt has naturally resulted in a substantial decline in the proportion of short-term securities, as well as in the proportion held by banks. The two-fold character of this decline has consequently resulted in keeping the maturity distribution and the form of the debt well adjusted to the character of its ownership.

A more detailed analysis of the fiscal year's operations follows:

Budget results

Budget receipts exceeded expenditures by \$754 million, as compared with a deficit of \$20,676 million last year.

Net receipts amounted to \$43,259 million, an increase of \$221 million compared with last year. Total expenditures amounted to \$42,505 million, a decrease of \$21,209 million from the year before. This improvement in the Government's budget of \$21,430 million was accomplished notwithstanding that in 1947 there were several large items of expenditure which were not in the figures for 1946, notably \$1,426 million for subscriptions to the International Bank and the International Monetary Fund under the Bretton Woods Agreement, \$2,050 million under the credit to the United Kingdom, \$837 million additional for United Nations Relief and Rehabilitation Administration, and about \$2 billion for armed forces leave.

A comparative table showing the trend of expenditures during the last 3 fiscal years is shown below:

Public debt

The gross public debt amounted to \$258,286 million on June 30, 1947, a decrease of \$11,136 million during the year. In addition, guaranteed debt held outside the Treasury declined by \$386 million during the year. The sources of debt

reduction during the year are indicated below.

Changes in composition of debt. Marketable issues were reduced \$20,904 million, but this decrease was partially offset by increases in special issues to Government trust funds and investment accounts by \$5,034 million, and non-marketable public issues, \$2,872 million, represented principally by increases in armed forces leave bonds and United States savings bonds and partially offset by a decrease in Treasury savings notes. There was also an increase in the debt amounting to \$2,140 million resulting from noninterest-bearing special notes issued to the International Bank and the International Monetary Fund.

Sales of United States savings bonds (including discount accruals) exceeded redemptions during the year by \$2,354 million, indicating a continuing public interest in this form of savings.

The net changes in the public debt and the Treasury's cash balance are indicated in the table at the bottom of the page.

Changes in maturities 1/. One of the results of the debt retirement program was to retire a substantial amount of bank-held short-term debt. In carrying out the debt retirement program the 91-day Treasury bills were reduced by \$1,264 million and the 1-year certificates of indebtedness 2/ were reduced \$14,418 million. In addition, all other marketable debt callable or maturing during the year was reduced \$5,222 million. Changes in the maturities (based on maturity or first call date) of the marketable public debt are indicated in the table at the top of the following page.

Interest on the public debt. Interest payments on the public debt during the fiscal year amounted to \$4,958 million, compared with \$4,722 million in 1946. Interest payments in 1947 do

not reflect the full annual interest savings which ultimately will be effected from debt retirements made during the year. In the first place, there is a time lag between the retirement of debt and the time the interest savings become effective; for instance, only about a half-year's interest would be saved on debt retired in the first half of the year while the interest savings on debt retired in the latter half would not be noticeable until the year following. The second factor which tends to offset interest savings on

the retirement of marketable debt is the somewhat higher average rate paid on new issues during the year of securities such as special issues to trust funds and Government investment accounts than the rate paid on the issues retired.

The effect of Treasury financing during the year as it relates to the interest burden of the debt is shown in the following table. It should be noted that the figures in this table relate to computed annual interest charges as of a speci-

Note: There are certain differences between computed annual interest charges shown in this table and actual interest payments. The average rates shown for savings bonds and savings notes represent the annual yield if held to maturity. Only the discount currently accruing on savings bonds, which at present

is less than the computed annual interest charge, is included in interest payments. On the other hand, interest on armed forces leave bonds and savings notes is reflected as payments only at time of redemption.

fied date and not to actual payments during any particular year. The principal reason why computed interest charges currently exceed interest payments is that accruals of discount on savings bonds (included as payments) are still well below the average annual interest on such bonds if held to maturity (included as charges).

The over-all computed average rate on the interest-bearing public debt outstanding on June 30, 1947 was 2.107 percent, compared with 1.996 percent a year ago. This increase in the general average rate was due to the retirement of large amounts of short-term debt bearing rela-

tively low rates of interest, and the continued issue of nonmarketable and special issues at higher-than-average rates.

General fund

The general fund cash balance at the close of the fiscal year amounted to \$3,308 million, a reduction of \$10,930 million during the fiscal year. Deposits with special depositaries on account of sales of government securities (i.e., war loan accounts) decreased from \$12,993 million on June 30, 1946 to \$962 million on June 30, 1947, a decrease of \$12,031 million.

Treasury Market Financing

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fifth War Loan, are published in the tables on pages 30 and 31. Details of weekly Treasury bill offerings are shown on pages 32 and 33.

July certificate maturity

On July 1, 1947 there was a maturity of 7/8% certificates of indebtedness outstanding in the amount of \$2,916 million. Secretary of the Treasury Snyder announced on June 23 the offering of a new one-year 7/8% certificate issue in exchange, par for par, for the maturing issue. Cash subscriptions were not received.

The new certificates were dated July 1, 1947 and will mature July 1, 1948. They will bear interest at the rate of 7/8% per annum which will be subject to all Federal income taxes. Interest will be payable in full with the principal at maturity. The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Subscription books were opened on June 23 and were closed at the end of business on June 25. On July 1, 1947, Secretary Snyder announced that exchanges amounted to \$2,742 mil-

lion, leaving \$174 million to be paid in cash.

Reports to the Treasury on the ownership of the debt indicate that on May 31, 63% of the maturing certificates was owned by reporting commercial banks and the Federal Reserve Banks. The May 31 figures are the latest available.

Treasury bill retirement in June

The Treasury Department made a further reduction in outstanding Treasury bills in June. There were four maturities of \$1.3 billion each during the month of June. The first three of these were refunded in full, while the issue maturing on June 26 was reduced by \$.2 billion. Bill retirements from April 17, when the first bill reduction took place, through June 30 reached a total of \$1.3 billion. A more detailed discussion of bill retirement and the entire debt pay-off program was presented in the "Treasury Market Financing Article" in the July 1947 "Treasury Bulletin".

• Less than \$500,000.

^{1/} General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.^{2/} Includes public works undertaken by the Veterans' Administration.^{3/} Does not include transfers to trust accounts, etc. These are shown in Table 5.^{4/} "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social Security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government." Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.^{5/} Consists of Department of Agriculture expenditures, except forest roads and trails which are included in Public works. Amounts for restoration of capital impairment of Commodity Credit Corporation are as follows: Fiscal year 1945, \$257 million; July 1946, \$921 million and May 1947, \$642 million.^{6/} Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Department of Labor, U. S. Employment Service (formerly Office for Emergency Management, War Manpower Commission, U. S. Employment Service), under authority of Social Security Act. For further details, see tables which follow on the Social Security program.^{7/} Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with National defense and related activities by the Federal Works Agency, beginning July 1941.^{8/} Consists of payments under Bretton Woods Agreements Act - International Bank; credit to United Kingdom; and Export-Import Bank of Washington - capital stock.^{9/} Classified as Other expenditures commencing July 1, 1945. For additional information on Direct and work relief, see "Treasury Bulletin" for August 1945, page 6.^{10/} Gross expenditures have been reduced \$315 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.^{11/} Includes \$500 million for Commodity Credit Corporation - postwar price support of agriculture.

• Less than \$50,000.

1/ Formerly Title VIII of the Social Security Act.

2/ Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).

3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in Section II, Table I.

4/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely,

Social Security Administration, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.

5/ Beginning July 1, 1945, payments previously made under the Social Security Act were discontinued, and thereafter made under provisions of the Public Health Service Act of 1944.

6/ Includes expenditures under Social Security Act by the Department of Labor through July 31, 1946.

7/ Classified as "Executive Office, Office for Emergency Management, War Manpower Commission" through July 31, 1946.

8/ Covered by appropriations by Congress.

9/ Second Deficiency Appropriation Act, fiscal year 1936, appropriated \$41 million for refunding to certain States portions of Federal Employers' tax for 1936 collected under the Social Security Act.

• Less than \$500,000.

- 1/ This is the net budget deficit (-) or surplus. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law and beginning with fiscal year 1945 includes Government corporations (wholly owned) etc. (net).
- 2/ Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government Insurance and Retirement Funds and other trust accounts. (See footnote 4.)
- 3/ Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 7.)
- 4/ Comprises Public Works Administration revolving fund, special de-

posits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".

- 5/ Beginning with fiscal year 1945 represents sales and redemptions of obligations of Government corporations, etc., in the market (net).
- 6/ Represents outstanding checks, see Note.
- 7/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1937 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%. 2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not ex-

ceed in the aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

^{1/} Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.^{3/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.^{4/} "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates. Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 21.

p Preliminary.

1/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.

2/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.

3/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to commercial banks and Treasury invest-

ment accounts.

4/ Bank restricted issue. See preceding table (maturity schedule of interest-bearing public marketable securities) for earliest date on which commercial banks may acquire this issue.

5/ Reopening of previously offered security.

6/ Interest commenced on June 26, 1944.

7/ Interest commenced on September 15, 1944.

8/ This is the same security that was offered in the Sixth War Loan.

9/ Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

p Preliminary.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

3/ Prior to the refunding operation of March 1, 1946, maturing issues

were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchasers of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and series B bonds in 1946. Series C bonds began to mature in January 1947. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Note: It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based

on current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

^{1/} Beginning with June 1947 includes small amounts of unclassified redemptions of Series F and G bonds.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

1/ Excludes Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

4/ Included in the Average Yield of Long-Term Taxable Treasury Bonds. Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).

6/ Quoted on a yield basis beginning June 16, 1947; prior thereto quoted on a price basis. Price history ends June 13, 1947.

7/ Quoted on a yield basis.

8/ Not quoted on June 30, 1947; quoted on a price basis at par from June 25, through June 27, 1947; prior thereto quoted on a yield basis.

9/ For amount of this security issued on July 1, 1947, see table entitled "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness" in the section on the "Public Debt and Guaranteed Obligations of the United States Government."

10/ Called on June 13, 1947, for redemption on October 15, 1947.

11/ Excludes postal savings bonds.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly (old series) data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt

from the normal rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for July 1947, page 59; for discussion of its previous composition, see "Treasury Bulletin" for January 1945, page 56.

3/ Average revised beginning July 1, 1941. Old average for July 1941 was also 2.66%.

4/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

5/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%; for week ended April 5, 2.47%. See footnote 2.

CAPITAL MOVEMENTS BETWEEN THE UNITED STATES
AND FOREIGN COUNTRIES AND NET POSITION
IN FOREIGN CURRENCIES

Capital Movements Between the United States and Foreign Countries

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements by the principal types of data, and by years, from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for the last thirteen months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are available.

The last group contains monthly data regarding the net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts and purchases and sales of foreign exchange, both spot and forward.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", November 1945, for capital movements, and position in foreign currencies by months, 1942-1945.

"Treasury Bulletins", March 1942 and earlier, for details covering years back to January 2, 1935.
