Treasury Financing Operations

April Certificates Refunded

The announcement was made by the Secretary of the Treasury on March 18 that holders of the Treasury 1-1/8 percent certificates of indebtedness maturing on April 1, 1949, would be offered in exchange one-year 1-1/4 percent certificates of indebtedness. The maturing certificates totaled \$1,055 million. Subscription books for the exchange offering were opened March 21 and were closed at the close of business on March 24. The new certificates, Series D-1950, were dated April 1, 1949, and bear interest from that date at the rate of 1-1/4 percent per annum, payable with the principal at maturity on April 1, 1950. Exchanges were made par for par and cash subscriptions were not received. The certificates were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of

Government securities indicate that on January 31, 1949, about 45 percent of the maturing certificates were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for January 31 are the latest available for holdings of commercial banks.

Subscriptions to the new certificates amounted to \$963 million on the basis of preliminary figures, leaving \$92 million to be paid in cash.

Treasury Bills Refunded

Treasury bills maturing in February totaled \$3.4 billion and were refunded in full. The issues dated February 3 and 17 amounted to \$800 million each and those dated February 10 and 24 amounted to \$900 million each. The average rate of discount on the first issue was 1.161 percent and on the remaining three issues, 1.163 percent.

Note: Details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes,

and certificates of indebtedness, and the table "Offerings of Treasury Bills", in this issue of the "Treasury Bulletin".

Source: Actual figures from Daily Treasury Statement; estimates based on the 1950 Budget document, including effect of proposed legislation.

1/ Both receipts and expenditures exclude (1) refunds of receipts and (2) payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings.

2/ Gross receipts less appropriations to Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts (see Table 1 under "Budget Receipts and Expenditures").

3/ Exclude refunds of receipts, formerly shown as expenditures but now shown as deductions from receipts (see Table 2 under "Budget Receipts and Expenditures"). Figures for the fiscal year 1948 include \$3,000 million transfer in June to Foreign Economic Cooperation Trust Fund; figures for fiscal year 1949 (actual and estimated) exclude expenditures from this fund.

4/ Established in accordance with the Economic Cooperation Act of 1948; positive figures indicate net receipts and negative figures indicate net expenditures.

5/ Consists of: all trust accounts other than Foreign Economic Cooperation Trust Fund; sales and redemptions of securities of Government corporations, etc., in the market (net); increment on gold; seigniorage on silver; and miscellaneous funds and accounts. Figures exclude retirement of national bank notes chargeable against increment on gold (fiscal years 1937-39).

6/ Clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks; excess of receipts, or expenditures (-).

7/ For data on guaranteed securities and total Federal securities outstanding, see Table 1 under "Debt Outstanding" in the current issues of the "Treasury Bulletin"; for earlier data, see issues of July 1948, page 1.

3/ Includes \$4.7 million for salaries and expenses, which would be financed directly from the trust account under proposed legislation. Less than \$50,000.

1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund. For explanation of the transaction, see "Treasury Bulletin" for September 1947, page 17.

2/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash

budget receipts of the Treasury shown in these tables, but is excluded from the 1950 Budget document figures for "Receipts from the public". In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund (see footnote 1). 1/ Original call and maturity dates are used.

2/ Prior to the refunding operations of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found in the "Treasury Bulletin" for October 1948, page A-1. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning terms and conditions, investment yields, and tax payment or redemption values

of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

^{1/} Not quoted on February 28, 1949.^{2/} Not issued until after February 28, 1949; for amount, see Table 3 under "Debt Operations".^{3/} Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.^{4/} Called on February 14, 1949, for redemption on June 15, 1949.^{5/} Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".^{6/} Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).^{7/} All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.^{8/} These securities are not shown until date of issue.^{9/} Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.^{10/} Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

YIELDS OF TREASURY SECURITIES FEB.28,1949

Based on Mean of Closing Bid and Ask Quotations

Explanation. The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the

basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

- 1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.
- 2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.
- 3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.
- 4/ Market closed.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I presents first a historical summary of the principal types of data on capital movements, beginning with 1935 when the information was first compiled. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total net capital movement is given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Section III presents details with respect to capital movements and short-term claims and liabilities. These are shown for the latest month for which final data are

available and the latest month for which preliminary data are available.

Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

The data in these four sections are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

Data relating to corporations in which the United States Government has a proprietary interest, direct or indirect, and to certain other business-type activities of the United States Government are presented in a series of four tables. Table 1 gives a summary of loans outstanding, Table 2, balance sheet data, Table 3, income and expense, and Table 4, source and application of funds. Tables 1 and 2 are compiled from the mid-month "Daily

Treasury Statement", which contains greater detail than the summaries presented here. Tables 3 and 4 are compiled from reports of the agencies, adjusted by the Treasury Department. The latest available loan and balance sheet data are presented in this issue of the "Treasury Bulletin", and Tables 3 and 4 for the same date will appear in a subsequent issue.
