Treasury Financing Operations

December - January Bond and Certificate Maturities

On November 30, 1949, the Secretary of the Treasury announced that a new issue of 1-3/8 percent Treasury notes to mature in four and one-quarter years would be offered on December 5. The notes were to be offered in exchange for the three series of Treasury bonds, which, on August 12, had been called for redemption on December 15, and also for the one-year 1-1/4 percent certificates of indebtedness, Series H-1949, maturing December 15, 1949. The three series of maturing bonds totaled \$4,375 million and the maturing certificates amounted to \$519 million, which together totaled \$4,894 million.

The Secretary also announced on November 30 that holders of the one-year 1-1/4 percent certificates of indebtedness, Series A-1950, which will mature January 1, would be offered a one-year 1-1/8 percent certificate in exchange.

Subscription books for the new Treasury notes, Series A-1954, were opened on December 5 and were closed at the close of business on December 8. The notes were dated December 15, 1949, and bear interest from that date at the rate of 1-3/8 percent, payable on a semiannual basis on September 15, 1950, and thereafter on March 15 and September 15 in each year

until the principal amount becomes payable on March 15, 1954. The notes were issued in bearer form only, with interest coupons attached, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Call of 2 Percent Treasury Bonds of 1950-52

On November 14, the Secretary announced that all outstanding 2 percent Treasury bonds of 1950-52, dated October 19, 1942, are called for redemption on March 15, 1950. The announcement stated that holders of these bonds may, in advance of the redemption date, be offered the privilege of exchanging all or part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will hereafter be given.

Treasury Bills Refunded

Treasury bills maturing in November were refunded in the full amount of \$4.0 billion. Each issue amounted to \$1,000 million. The issue of November 25 was the eleventh consecutive rollover. The successive average rates of discount on the four November offerings, beginning with that dated November 3, were 1.063 percent, 1.074 percent, 1.056 percent, and 1.052 percent.

Note: Details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes,

and certificates of indebtedness, and in the table "Offerings of Treasury Bills", in this issue of the "Treasury Bulletin".

1/ Expenditures from the Foreign Economic Cooperation Trust Fund (all of which occurred in the fiscal year 1949) are treated in this series of tables as cash trust account expenditures rather than as cash budget expenditures.

2/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

3/ Consists of seigniorage on silver and increment resulting from reduction

in weight of the gold dollar. This item is part of the cash budget receipts of the Treasury shown in these tables, but is excluded from the 1950 Budget document figures for "Receipts from the public".

4/ In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund (see footnote 2).

1/ Original call and maturity dates are used.

2/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

4/ Refunding operation was announced November 30, 1949. Details will be released later.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

^{1/} Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.
^{2/} Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found in the "Treasury Bulletin" for October 1948, page A-1. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning terms and conditions, investment yields, and tax payment or redemption values

of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ United States savings bonds, Series D, E, and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

"Taxable" securities are those with the income subject to normal tax and surtax.

MARKET QUOTATIONS, OCTOBER 31, 1949

Market quotations shown here are over-the-counter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. 1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Called on August 12, 1949, for redemption on December 15, 1949.

3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

4/ Issues which commercial banks may not acquire prior to specified

dates (with minor exceptions); see "Debt Operations", Table 1, for eligibility dates.

5/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

6/ These securities are not shown until date of issue.

7/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

8/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

MARKET QUOTATIONS, OCTOBER 31, 1949

YIELDS OF TREASURY SECURITIES, OCT. 31, 1949

Based on Mean of Closing Bid and Ask Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the

basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

$\frac{1}{2}$ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

$\frac{2}{2}$ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

$\frac{3}{2}$ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories. Reports of collections do not coincide because of a lag in deposits of collections. Detail by tax is reported on a collection basis because it is not available on the basis of deposits.

^{1/} Exclude collections for credit to certain trust accounts for Territories

and insular possessions, etc.; includes corporation income tax on Alaska Railroad.

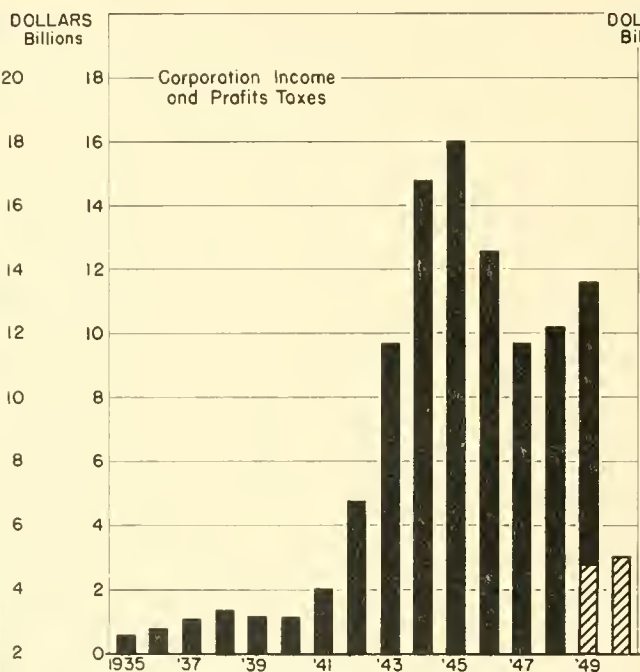

^{2/} Beginning with the fiscal year 1947, collections from the unjust enrichment tax, previously carried in this column, are included with other repealed taxes under "Miscellaneous".

^{3/} Repealed for years ending after June 30, 1945.

^{4/} Repealed taxes not separately shown are included under "Miscellaneous", beginning with figures for the fiscal year 1948.

1/ These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure

silver certificates.

2/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

CAPITAL MOVEMENTS

Monthly data relating to capital movements between the United States and foreign countries as reported by banks, bankers, and brokers throughout the United States appear in the first four sections of "Capital Movements". Supplementary data are presented at less frequent intervals in Section V. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

Section I contains the historical summary of principal types of monthly data on capital movements, beginning with 1935 when the information was first compiled. Each type is then broken down into its chief components in the same chronological detail. Section II supplies a summary by countries, showing a geographic breakdown for recent months of the same principal series and most of the same components. Foreign debit and credit balances in brokerage accounts also are shown by countries.

Section III presents data by countries for certain components of total short-term claims and liabilities and total long-term security transactions. This information is given for the latest month for which final figures are available. Similar information for the latest month for which preliminary figures are available is presented in Section III A. "Short-term" as used in all tables on capital movements refers to original maturities of one-year or less, and "long-term" refers to all other maturities. Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

Section V presents in Table 1 information by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin", covering quarterly periods from September 30, 1946, through December 31, 1948. An explanation of the figures appeared in the headnote on page 49 of that issue. Later data will be published in subsequent issues. Table 2 in Section V supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. These data are collected along with those on short-term balances. However, since the amounts involved represent only a small part of the total long-term investment position of the United States, and the figures exclude by definition the banks' holdings of long-term securities suitable for trading in public securities markets, they have not been published heretofore, nor are they incorporated in the regular monthly series on capital movements. Table 2 appears for the first time in the current issue of the "Treasury Bulletin" and gives data for the end of the calendar years 1942 through 1948. Corresponding data will be published for later years.

Publication of detailed figures in the monthly series on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.
