Treasury Financing Operations

Treasury Bills Refunded

Treasury bills matured in April in the amount of \$3.6 billion, and new offerings totaled \$3.9 billion. Each of the four maturing issues amounted to \$900 million. The first new offering was for \$900 million, and the last three offerings were for \$1.0 billion each. The offering of April 13 was the first since September 8, 1949, which constituted an increase over the issue maturing. In the intervening period each offering had been for the same amount as that maturing. The successive average rates of discount of the four April offerings, beginning with that dated April 6, were 1.148 percent, 1.160 percent, 1.162 percent, and 1.166 percent.

Note: Details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills", in this issue of the "Treasury Bulletin".

- 1/ Both receipts and expenditures exclude (1) refunds of receipts and (2) payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings. For prior fiscal year figures adjusted to a comparable basis, beginning with 1931, see the 1949 Annual Report of the Secretary of the Treasury, pages 360 and 361.
- 2/ Gross receipts less appropriations to Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts (see "Budget Receipts and Expenditures", Table 1).
- 3/ To make the figures for the fiscal years 1948 and 1949 comparable

with those for other years shown in this table, all transactions relating to the Foreign Economic Cooperation Trust Fund (established under Section 114 (b) of the Economic Cooperation Act of 1948) have been consolidated with Budget expenditures, beginning with the March 1950 issue of the "Treasury Bulletin".

- 4/ Consists of: trust accounts; sales and redemptions of securities of Government corporations, etc., in the market (net); increment on gold; seigniorage on silver; and miscellaneous funds and accounts. Figures exclude retirement of national bank notes chargeable against increment on gold (fiscal years 1937-39).
- 5/ For outstanding checks and telegraphic reports from Federal Reserve Banks; excess of receipts, or expenditures (-).

- 1/ For further detail, see tables under "Internal Revenue Collections".
- 2/ Receipts of Victory taxes withheld pursuant to the Revenue Act of 1942 are classified as "Other" income and profite taxes.
- 3/ Consists of receipts for old-age insurance, unemployment insurance, railroad retirement, and health insurance in the 1951 estimate; for details see Tables 7 and 8 in this section. Excludes railroad unemployment insurance contributions, which are included in "Other receipts".
- 4/ Includes proceeds from sale of surplus property and from Government-owned securities; also deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5).
- 5/ Both budget receipts and budget expenditures exclude payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings (see "Treasury Bulletin" for February 1949, page A-2).
- 6/ See Table 7 in this section.
- 7/ Excludes interest on refunds.
- 8/ Allows for deduction of appropriation of \$250 million for Health Insurance Trust Fund, under proposed legislation.
- 9/ In addition to the exclusion of certain payments to the Treasury as indicated in footnote 5, total expenditures shown here exclude refunds of receipts (see Table 1 in this section). Interest on refunds is shown under "Other" expenditures. Budget expenditures also exclude amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law, and include transfers to trust accounts and net expenditures of wholly owned Government corporations, etc., except payments to the Treasury mentioned above.
- 10/ To make the figures for the fiscal years 1948 and 1949 comparable with those for other years shown in this table, all transactions relating to the Foreign Economic Cooperation Trust Fund (established under Section 114 (b) of the Economic Cooperation Act of 1948) have been consolidated with Budget expenditures, beginning with the March 1950 issue of the "Treasury Bulletin".
- 11/ Beginning November 1, 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing it as an expenditure at the time interest was paid by the Treasurer of the United States. In order to take care of the transition in the basis of reporting, the expenditures for interest in the fiscal year 1950 represent not only the interest which becomes due and payable during that year but also the interest for prior years which had not been presented as of June 30, 1949, for payment by the Treasurer of the United States, amounting to \$225 million.
- 12/ Includes public works undertaken by the Veterans' Administration.
- 13/ See footnote 14/.
- 14/ Includes expenditures on behalf of the Department of the Air Force which are made out of appropriations to the Department of the Army, but excludes expenditures as follows: those shown separately in Table 3; international finance and aid, shown in Table 4; river and harbor work and flood control, included in Table 5 under "Public works"; and Panama Canal. War expenditures of the Panama Canal, all prior to July 1, 1947, are included in Table 3 under "Other"; other expenditures of the Panama Canal are included in Table 5 under "Miscellaneous".
- 15/ Excludes expenditures shown separately in Table 3, and those for international finance and aid, shown in Table 4.
- 16/ Excludes expenditures shown separately in Table 3.
- 17/ Beginning March 1948, includes reimbursement for expenditures by the Departments of the Army and the Navy for care and handling of surplus property overseas.
- 18/ Effective January 1, 1950, certain administrative functions of the General Services Administration were consolidated pursuant to Section 106 of Public Law 152, approved June 30, 1949, and appropriated funds relating to such functions were transferred to and combined in one operating account. Accordingly, expenditures by this agency for surplus property disposal and for public buildings other than construction are not reported separately after that date, and are not included in the totals for these purposes shown in Tables 3 and 5. Figures for the preceding months of the fiscal year 1950 have been revised to a comparable basis.
- 19/ After July 1, 1947, expenditures for national defense and related activities were not segregated from the other expenditures of the Corporation and its affiliates, which are included in Table 5 under "Miscellaneous".
- 20/ Prior to July 1, 1946, expenditures for this purpose were not shown separately from "Other" Treasury Department expenditures, included in Table 5 under "Miscellaneous".
- 21/ For content before July 1948 see "Treasury Bulletin" for September 1948, page 4, and February 1948, page 7, except that beginning with the fiscal year 1947 figures have been revised to include expenditures of the National Advisory Committee for Aeronautics. Beginning July 1948, consists of expenditures of that Committee, the Selective Service System, and the Office of the Secretary of Defense. The latter includes retired pay for the military services beginning September 1949.

Source: Actual figures are based on Daily Treasury Statement; estimates are based on the 1951 Budget document, including effect of proposed legislation as outlined in Budget detail.

1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

2/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash

budget receipts of the Treasury shown in these tables, but is excluded from the 1951 Budget document figures for "Receipts from the public".

3/ In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund (see footnote 1).

^{1/} Excludes postal savings bonds.^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. For

date of issue of each security, see "Market Quotations"; for tax status, see "Treasury Survey of Ownership".

^{3/} Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to specified dates; see "Debt Outstanding", Table 3, footnote 1.

1/ Original call and maturity dates are used.

2/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or

a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5.

nominations include both sales and redemptions in thousands of pieces, instead of sales figures alone, previously given in dollar volume at issue price. Redemptions by States were discontinued with the figures through June 30, 1949.

For dollar figures, sales are shown at issue price, and redemptions and amounts outstanding at current redemption values, except that Series G is shown at par. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding are included in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute

by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified F and G redemptions, beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

* Less than \$500,000.

1/ Breakdown of redemptions between matured and unmatured bonds not available prior to January 1950.

2/ Includes for each month redemptions of Series D-1940 which have matured

through that month. Outstanding matured bonds of this series, however, are included in the interest-bearing debt until all bonds of the series have matured.

3/ Includes redemptions not yet classified; see Table 3, footnote 2.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found in the "Treasury Bulletin" for October 1948, page A-1. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning terms and conditions, investment yields, and tax payment or redemption values

of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

Market quotations shown here are over-the-counter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed in Section I include all public marketable securities issued or guaranteed by the United States Government except those not regularly quoted in the market. The issues excluded are postal savings bonds and Federal Housing Administration debentures. The latter are

the only public marketable interest-bearing guaranteed securities outstanding. Section II lists the public marketable securities issued by Federal agencies but not guaranteed by the United States Government. Daily quotations for the securities listed in Sections I and II are published monthly in the Treasury Department statement, "Prices and Yields of Public Marketable Securities Issued by the United States Government and by Federal Agencies".

1/ Not quoted on March 31, 1950.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Price range is shown in terms of yield, a negative yield being expressed as the excess of price over the zero yield price.

4/ Issued after March 31, 1950; for amount, see "Debt Operations", Table 4.

5/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

6/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Operations", Table 1, for eligibility dates.

7/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

8/ These securities are not shown until date of issue.

9/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

10/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

MARKET QUOTATIONS, MARCH 31, 1950

YIELDS OF TREASURY SECURITIES, MAR. 31, 1950

Based on Mean of Closing Bid and Ask Quotations

Explanation. The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does

not sell, the price of the last preceding sale is used.

- 1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.
- 2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.
- 3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.
- 4/ Beginning December 21, 1949, the average includes nine bonds instead of ten, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4 percent bonds of 1981 having been called and exchanged for a new issue.
- 5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

^{1/} Excludes collections for credit to certain trust accounts for island pos-

sessions; includes corporation income tax on Alaska Railroad.

^{2/} Beginning with the fiscal year 1947, collections from the unjust enrichment tax, previously carried in this column, are included with other repealed taxes under "Miscellaneous".

^{3/} Repealed for years ending after June 30, 1945.

^{4/} Repealed taxes not shown separately are included under "Miscellaneous", beginning with figures for the fiscal year 1948.

Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected on Treasury Foreign Exchange Forms since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Certain changes in report forms and regulations became effective with the data for January 1950, which first appeared in that issue. Included in these changes was the discontinuance of reports on outstanding contracts for forward purchases and sales of foreign exchange.

The supplementary information, now appearing as Section IV, is presented in three tables, appearing at different times. Table I gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.

Publication of detailed figures in the various monthly series relating to capital movements was discontinued between the March 1942 and the November 1945 issues. Data omitted during that period, however, were published in the November 1945 issue and supplement.
