United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941 and Series $E, F$, and $G$ have been on sale since May $1,1941$. Beginning in May 1951, holders of maturing Series E bonds heve three options: to redeam them in casb, to retain them with an extended maturity of 10 yeara at specified retes of interest accrual, or to exohange them for series $a$ bonds. Further information on these options will be found in the "Treasury Bulletin" 1saue for April 1951, page A-1, and information on the terme and conditions of the various serles of sevings bonds appears in the annual reporta of the secretary of the Treaaury.

Series $A-F$ ales are shown at 1 soue price and total redemptions and amounts outstanding at current redemption values. Series $G$ is shown at face value throughout. Matured bonds which have been redeened are included in redemptions. Matured bonda outstanding of Series $A-D$ were included in the intereat-beering debt until all bonda of the seriea matured, when they were transferred to matured debt upon which interest has ceesed. Savings bonds data by denominetions and the amounts of sales by states are published on a monthly basis but do not appear in each lasue of the "Treasury Bulletin".

Data relating to cleime on forelgners and llabilltles to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the princlpal countries is reported each month by banks and bankers and securities brokere and dealere in the United Statea. This information is pubilshed regularly in the "Treasury Bulletin". Supplementary information is published at le日e frequent intervals. All reporta are made initially to the Federal Reserve Banks, which forward consolidated Iigures to the Treasury.

The term "foreigners" as used in these reports oovers all inotitutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or lese, and "long-term" refers to all other maturities. A detalled dicouesion of the reporting coverage, basis of reporting, and derivation of capital movements ilguree appeared in the April 1950 iesue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulationa became effective with
the data for January 1950. Attention 18 called to the fact that although the grand total flguree on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in eome inetances are not comparable because of certain changes in coverage and geographical olassification.

The supplementary information, contained in section IV, io presented in three tables appearing at different times. Table I give data by countries on ehort-term cladme on and liablilties toforeigners as reported quarterly by exporters, importers, and induetrial and commercial concerns in the United States. This information was published for the first time in the October 1949 isous of the "Treasury Bulletin" and begine with data for September 30, 1946. Table 2 supplies information by countries on long-term claime on and liabilitie日 to forelgnere as reported by banka and bankers in the United Statse.
