1/ The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, change in certain respects the basis of appropriating social security employment taxes on employees and employers. Effective January 1, 1951, these taxes and withheld income taxes are paid into the Treasury in combined amounts without separation as to type of tax. The amounts of such taxes credited currently as appropriations to the Federal Old-Age and Survivors Insurance Trust Fund are based on estimates by the Secretary of the Treasury and are later adjusted on the basis of wage records maintained by the Social Security Administration. For the purposes of this table, beginning January 1951, the same amount as is credited each month to the trust fund is included under "Employment taxes" as receipts for old-age insurance, and the balance of the combined receipts is shown under income tax as "Withheld by employers".

2/ Figures include adjustments in estimated receipts amounting to

\$113 million in October and \$37 million in November. (See footnotes 7 and 9).

2/ Current appropriations were suspended during the period October 10 through November 5 until adjustments amounting to \$150 million had been completed, in accordance with Public Law 734 (see footnote 7). Of the amount adjusted, \$113 million was applied in October and \$37 million in November.

10/ For description of content, see Table 6, footnote 3.

11/ Beginning November 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States. Includes public works undertaken by the Veterans' Administration. Includes transactions relating to the Foreign Economic Cooperation Trust Fund (see page 1).

Note: This table presents a recapitulation by months, with calendar-year as well as fiscal-year totals, of budget receipts by principal sources and deductions from budget receipts as they appear in Table 1. Figures as originally published for earlier years have been revised where necessary so as to place each series on a comparable basis for the whole period shown. It is planned to publish a similar recapitulation from time to time in order to bring the information up to date in convenient form for reference. Corresponding data on net receipts (gross budget receipts less deductions) are published each month in Table 6.

1/ Fiscal year ending June 30 of year indicated.

2/ Under Current Tax Payment Act of 1943, effective July 1, 1943, as amended (26 U. S. C. 1621-1632). Victory taxes withheld pursuant to the Revenue Act of 1942 are included in "Other income and profits taxes".

3/ For basis of figures shown beginning January 1951, see footnote 8.

4/ For adjustments reflected in this figure, see footnote 9.

5/ Consists of receipts for old-age insurance under the Federal Insurance Contributions Act, unemployment insurance under the Federal Unemployment Tax Act (taxes on employers of 8 or more), and railroad retirement under the Railroad Retirement Act (taxes on carriers and their employees). Railroad unemployment insurance contributions for administrative expenses are included in "Other receipts".

6/ Includes proceeds from sale of surplus property (not approved October 3, 1944) and from Government-owned securities, and deposits resulting from negotiation of war contracts.

7/ Represents appropriations equal to "Social security-employment taxes", collected and deposited as provided under Section 201 (a) of the Social Security Act Amendments of 1939, as amended.

8/ The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, changed in certain respects the basis of appropriating social security employment taxes on employees and employers. Effective January 1, 1951, these taxes and withheld income taxes are paid into the Treasury in combined amounts without separation as to type of tax. The amounts of such tax receipts credited currently as appropriations to the Federal Old-Age and Survivors Insurance Trust Fund are based on estimates by the Secretary of the Treasury and are later adjusted on the basis of wage records maintained by the Federal Security Administration. For purposes of this table, beginning January 1951, the same amount as is credited each month to the trust fund is included under "Employment taxes" as receipts for old-age insurance, and the balance of the combined receipts is shown as "Individual income tax withheld by employers".

9/ Current appropriations were suspended during the period October 10 through November 5, until adjustments amounting to \$150 million had been completed in accordance with Public Law 734. Of the total amount adjusted, \$113 million was applied in October and \$37 million in November. Excludes interest on refunds, which is included in "Miscellaneous expenditures", Table 6 B.

Note: This table presents a recapitulation by months, with calendar-year as well as fiscal-year totals, of budget expenditures under the classifications shown in Table 2 through 5. Expenditure figures as originally published for earlier years have been reclassified and revised where necessary so as to place each series on a comparable basis for the whole period shown. It is planned to publish a similar recapitulation from time to time in order to bring the information up to date in convenient form for reference. The corresponding data on total budget expenditures are published each month in Table 6, which carries also an explanation of the coverage of the figures. Expenditures are "net", after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury.

The balance of the United States quota for the Fund, or \$1,800 million, was paid from the Exchange Stabilization Fund. Part of the payment to each institution was made in the form of noninterest-bearing notes to be redeemed as the cash was needed by

the Bank and the Fund, respectively (see "Debt Outstanding", Table 1).

- ^{11/} Prior to July 1945, the net of Export-Import Bank operations is included under "Miscellaneous" expenditures. - ^{17/} Beginning November 1949, interest on the public debt is reported as an expenditure when it becomes due and payable, as distinguished from the previous practice of showing it as an expenditure when paid by the Treasurer of the United States. Figures for the fiscal year 1950 include not only the interest that became due and payable in that year but also the interest for prior years which had not been presented as of June 30, 1949, for payment by the Treasurer of the United States, amounting to \$225 million.

1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

2/ Consists of seigniorage on silver and increment resulting from

reduction in weight of the gold dollar. This item is part of the cash budget receipts shown in these tables, but is excluded from the 1953 Budget document figures for "Receipts from the public". In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

^{1/} Obligations, issued by certain Government corporations and other agencies, which are guaranteed by the United States as to both principal and interest.

Such obligations were first authorized in 1932. Prior to September 1939, the figures represent principal shown as a contingent liability of the United States; beginning September 1939, they represent principal outstanding, both matured and unmatured. Guaranteed securities held by the Treasury are excluded.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act, as amended, (31 U.S.C. 757 b), provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not exceed in the

aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

1/ Original call and maturity dates are used.

2/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called

securities would be presented for cash redemption.

These nonmarketable bonds, dated April 1, 1951, and maturing April 1, 1960, are exchangeable for 1-1/2% marketable Treasury notes. See Table 3, footnote 2.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941 and Series E, F, and G have been on sale since May 1, 1941. Beginning in May 1951, holders of maturing Series E bonds have three options: to redeem them in cash, to retain them with an extended maturity of 10 years at specified rates of interest accrual, or to exohange them for Series G bonds. Further information on these options will be found in the "Treasury Bulletin" issue for April 1951, page A-1, and information on the terms and conditions of the various series of savings bonds appears in the annual reports of the Secretary of the Treasury.

Series A-F sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G is shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding of Series A-D were included in the interest-bearing debt until all bonds of the series matured, when they were transferred to matured debt upon which interest has ceased. Savings bonds data by denominations and the amounts of sales by States are published on a monthly basis but do not appear in each issue of the "Treasury Bulletin".

 1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified F and G redemptions, beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Sales of Series A-D after April 30, 1941, represent adjustments.

5/ Beginning May 1951, includes exchanges of matured Series E bonds for Series G bonds as shown in Table 4.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued in five series: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; and Savings Series A beginning on May 15, 1951.

Details concerning terms and conditions for purchase and redemption and investment yields of Savings Series A appear in the June 1951 issue of the "Treasury Bulletin", page A-1. Similar information with respect to Savings Series D will be found in the October 1948 and September 1949 issues, and with respect to Savings Series C in the October 1945

issue. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Tax Anticipation Series.

2/ Amount issued on January 3, 1952, was \$1,201 million.

3/ Prices are the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, are closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

4/ Callable on 4 months' notice on September 15, 1952.

5/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

- ^{1/} For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.
- ^{2/} Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.
- ^{3/} As of December 21, 1949, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4's of 1951 were dropped from the average, having been called.
- ^{4/} As of October 20, 1950, the Standard Oil Company of California 2-3/4's of 1965-66 were dropped from the average, having been called.
- ^{5/} Market closed.

Sources: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositaries.

^{1/} Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad.

^{2/} Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous"); declared value (repealed for years ending after June 30, 1946); Excess Profits Tax Act of 1940 (Title II of the Second

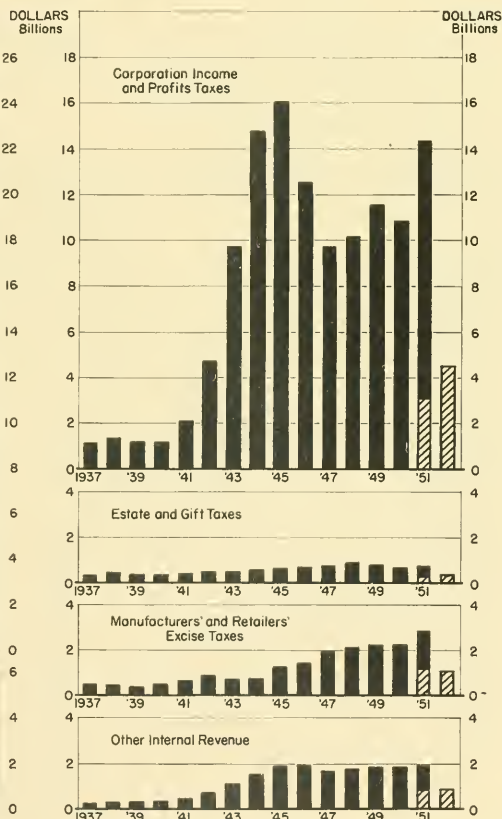

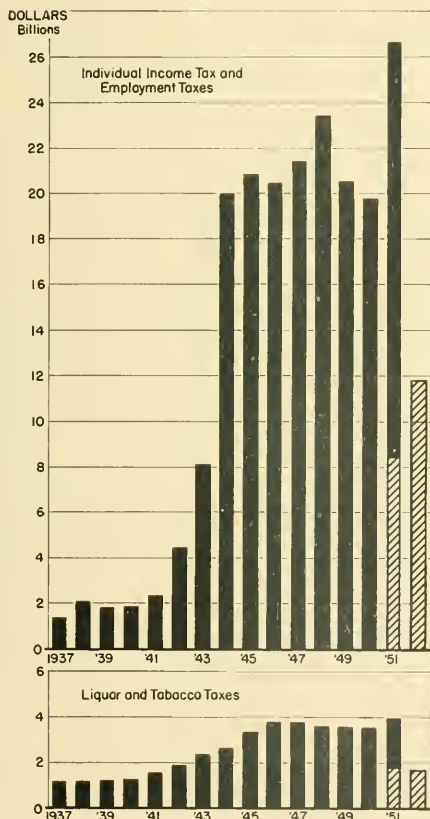

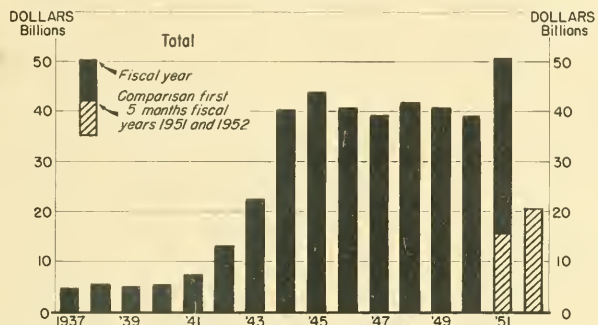

Revenue Act of 1940, which was repealed for years ending after December 31, 1945), and Vinson Act as amended (34 U.S.C. 496).

^{3/} Beginning January 1951, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax, pursuant to the Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950. The figures for prior periods have been combined accordingly in this table for purposes of comparison, but are shown separately in the March 1951 and preceding issues of the "Treasury Bulletin".

^{4/} Repealed for years ending after June 30, 1945. Beginning July 1950, included under "Miscellaneous".

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.
