## Savings Bonds

Secretary Snyder announced on April 29, 1952, a number of changes in United States savings bonds to go into effect on May 1-- the eleventh anniversary of the original offering of Series $E, F$, and $G$ bonds. A brief description of the changes is given in the following paragrapha.

## Sertes E Bonds

The first thing that has been done with respect to E bonds lssued on and after May 1, 1952, has been to improve the intermediate rodemption schedule to give a highor return in the earlier years. Interest will start at the end of 6 months instead of at the end of one year as formerly. The rate accrued at the end of 6 months will be 1.07 percent; at the end of one year, 1.59 percent; at the end of 2 years, 2.10 percent; at the end of 3 years, 2.25 percent; at the end of 5 years, 2.52 percent; and so on. The over-all interest rate on $E$ bonds has also been ralsed -- from 2.9 percent to 3 percent compounded semiannually, the maximum permitted by the law. The $\$ 18.75$ 1ssue price on a $\$ 25$ bond has been retained (a $\$ 4$ return for a $\$ 3$ investment). The change in the over-all return has been effected by shortening the length of the Series $E$ bond from 10 years to 9 years, 8 months. The new interest rats schedule does not apply to bonds outstanding on April 30, 1952, for the period up to their original maturity.

The interest rate on the $E$ bond during the extension period after maturity has also been raised for all bonds which have not yet matured, so that the return will be 3 percent, compounded semiannually, during the additional 10 years of an $E$ bond's life under the extension privilege. The new rates on the extension will not apply to bonds which have matured prior to May 1, 1952.

In addition to these changes in the terms of E bonds, the Treasury has doubled the annual limit on $E$ bond purchases from the $\$ 10,000$ maturity value now in effect to $\$ 20,000$ maturity value.

New stocks of bonds with the new intermediate redemption values and the new maturity will not be avallable on May 1. The exiating stock of E bonds will be sold throughout the period prior to the avallabllity of new bond stock. Every E bond sold after May 1 will by regulation, however, obtain the revised terms and conditions. As soon as new stock is avallable, any purchaser who wishes will be entitled to exchange his old bond (if purchased on or after May 1, 1952) for a new one; but if he does
not make the exchange, he will still obtain the benefits of the revised scale, and paying agents will be furnished new redemption schedules applying to the bonds issued on or after May 1, 1952.

New Current Income Bond, Series H
The Treasury is also offering an entirely new current income savinge bond to be deaignated Series H which will have interest pald by oheck semiannually instead of having the interest acorue. This bond will be a companion to the discount $E$ bond and will be promoted along with the E bond. This bond will be avallable beginning on June 1. I/ It will be lssued and redeemable at par. Interest will be pald by check semlannually on a graduated scale of rates which has been put as close as possible to the E bond scale. It will be issued only to individuals; will have the ssme 9 year, 8 month term as E bonds; and will have a similar annual purchase limit of $\$ 20,000$ maturity value. Unlike E bonde, however, it must be held six months, rather than two monthe, before it can be redeemed and it will be redeemable only on one month's notice; it will be lsaued and redeemable only at Federal Reserve Banks and branches and at the Treasury; and it will be offered with a minimum denomination of $\$ 500$. Because the Series $H$ bond and the $E$ bond are sold exclusively to individuals, and because they resemble each other so closely in interest return, the Treasury will report combined sales of Series E and Series H bonds in the same way that Series $F$ and Series $G$ sales have been reported together.

## Series $J$ and K Replace $F$ and $G$ Bonces

The Series $F$ and $G$ savings bonds are being withdrawn effective May 1 , and two new series of savings bonds to be known as Serles $J$ and Series $K$ are being substituted. I/ Series $J$ will be a revised Series $F$ bond, and Series $K$ will be a revised Series $G$ bond. The new serlea will differ from the old series primarily in their higher interest rate schedules. They will pay 2.76 percent if held 12 years to maturity, and will pay much higher intermediats yields than $F$ and $G$ bonds. Series $J$ and $K$ bonds will pay approximately $1-1 / 4$ percent if held for one year, $1-1 / 2$ percent if held for 2 years, $2-1 / 8$ percent if held for 5 years, and so on. The combined annual purchase limit for Serles $J$ and $K$ bonds has been doubled to $\$ 200,000$, as compared with $\$ 100,000$ for Series $F$ and $G$ bonds.

Further detalls regarding the new savings bonds are presented in the tables which follow.

1/ Interim recoipts will be used until new stooks of bonds are available.

Table 1. - Summary of Terms and Conditions of United States Savings Bonds Revised Series E and New Series H, J, and K

Treasury Bonds, Investment Series B-1975-80, Reopened
On April 30, 1952, the Secretary of the Treasury announced an additional step in the Treasury's program to raise from nonbank sources the funds required in ifnancing the defense program. The Secretary announced that on May 19, 1952, the subscription books would be opened for a limited period for the sale of additional amounts of the $2-3 / 4$ percent Treasury Bonds, Investment Series B-1975-80. These bonds, which were originally 1ssued April 1, 1951, are not tranaferable, but at the option of the owner may be exchanged for $1-1 / 2$ percent ifve-year marketable Treasury notes. The notes are to be dated April 1 and October 1 of each year during the life of the bond.

Subscriptions to the new $2-3 / 4$ percent bonds may be pald for in full in cash, or not less than onefourth of the amount subscribed for may be pald for in cash and the remainder by exchange, par for par, with appropriate interest adjustments, of bonds of any of the four outstanding bank restricted 1/ Treasury bonds with the longest maturities. The Lsaues ellgible for such exchange are the $2-1 / 2$ percent bonds of $1965-70$, the $2-1 / 2$ percent bonds of 1966-71, and the two 1 ssues of $2-1 / 2$ percent bonds of June 15 and December 15, 1967-72. The two latter issues are those which were exchangeable for the 2-3/4 percent Treasury bonds originally issued

April 1, 1951 (outstanding in the amount of $\$ 11.5$ blllion on April 30, 1952).

Commercial banks are excluded from this offering, except to the extent that they turn in restricted bonds acoulred before December 31, 1945, for the partial investment of their savings accounts. Subscriptions from such banks will be accepted only on the basis of one-fourth cash and three-fourths bonds eligible for this exchange.

Payment for the new bonds may be made in full on June 4, 1952, or in four equal instaliments on June 4, August 1, October 1, and December 1, 1952, With provisions for acceleration of payments if subscribers so desire.

Treagury B1118 Increased
New offerings of Treasury bills in April totaled $\$ 5.4$ billion and bills matured in the amount of $\$ 4.8$ billion, resulting in an increase of $\$ .6$ billion in bills outstanding during the month. The maturities amounted to $\$ 1.2$ billion in each of the four weeks. The offering on April 3 amounted to $\$ 1.2$ billion and for each of the three subsequent weeks the offerings amounted to $\$ 1.4$ billion. The average rates of discount on the four new offerings were 1.598 percent for April 3, 1.629 percent for April 10, 1.650 percent for Apr11 17, and 1.616 percent for April 24.

Note: Details of Treasury market financing operations are shown elsewhers in thie issus of the "Troasury Bulletin", in the tables on "offeringe" and "Dispoeition", respectively, of marketable issues of
bonds, notes, and cortificates of indebtednese, and in the table "Offerings of Treasury Bills".

Source: (Same as Table 2).
Footnotee 2 through 6 on page 2 and 10 through 40 on page 4.
I/ For basie of appropcietions, aee Table 7. Anounts appropriated are equivalent to the emounte of taxes collected and deposited for old-age insurance. The Sooial Security Act Arendments of 1950 (Public Law 734), approved Auguat 28, 1950, changed in certain reepecta the basie of trensfarring the appropriated funds to the trust fund. Effoctive January 1, 1951, the old-age insurance taxee an employers and employese and the withheld income tax are paid into the Treasury in oombined emounte without eeparation as to type of tex. The old-sge ineurance tex on eelf-employment income, Impoeed by Public Lew T34, is levied and collected as part of the individual income tar, besioning with the taxeble year 1951. Beginning Jenuery 2951, tbe emounte trensferred currently as approprietions to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury, and are adjusted in later trensfers on the basie of wage and self-
employment inoome reconds maintained by the Federal Security Aiministretor.

For purposea of this table, the amount credited each month to the trust fund is included under "Employnent texes" as eetimeted receipts for old-age insurance. Throughout the calendar year 1951, the balance of the carbined amounts paid in by employers was ebown as inoome tax withheld. Beginning Jenuary 1952, the ter on eelf-eaployment income is ellowed for in the amounte oredited to the trust fund. Theee amounte therefore can no longer be used to derive eotimates of income tax withheld by employers, but they are uaed to derive the estimatee of total income and profite taxee.
8/ Intarest on refunde is included in Table 5 under "Miecolleneous".
9) Current epproprietions were temporarily euspended to ocmplete ad justments (eeo footnoto 7) as follows: October 10 through November 5, 1951, for adjustment of $\$ 150$ million ( $\$ 113 \mathrm{~m} 1111$ in in October and $\$ 37$ million in November); Jenuary 2 through 4, 1952, for ed justment of $\$ 25$ million.

Fiscel jear ending Jume 30 of jear indicated.
Groes recelpts lese eppropriations to Federal Old-Age and Survivors Trourance Irust Fond and refunds of receipts.
3/ Erpenditures are "net", aftar allowance for relmbursemente to epproprietions, receipte of revolving fund eppropriations, and receipts credited to dieburnsing accomnts of corporations and agenciee having euthority to use collections without formal covering into the Treasury. The figures include trensfers to trist accounts, traneactions of the Foreign Economic Cooperation Trust Fund,
eetabliehed under the Economic Cooperation Act of 1948 (62 Stat. 150), and transactions of wholly owned Government corporations and agenciee. Beginaing November 1950, inveetments by theee corporations and acenciee
in public debt securitiee ere exoluded from budget expendituree and included whth other such invoetmants under "Trust account and other transactions". Correeponding adjustments were made in November 1950 and Jenuery 1951 for the inveetacnte claseified as budget expenditures in the period July through October. Budget expenditures exclude also amounte for public debt retirement whici are chargeable to the einking fuma, etc., under epecial provieions of law. Paymants to the Treasury, principaliy by wholly owned Goverminent corporations, for retirement of cepital etook end dispoeltion of eamings are eccluded from both recelpte and sxpenditures. Further information on cepital transfers and the Foreign Econamic Cooperatson Irust Fund may be found in the 1950 Annual Report of the Secretary of the Treasury, pagee 452 and 453.

Table 4.- Disposition of Matured Marketablo Issues of Tressury Bonds, Notes, and Certificstes of Indebtedness and Securities Guaranteed by the United States Government

United states aavinga bonda were firat offered in March 1935 and began to mature in March 1945. Seriea $A-D$ were aold between March 1935 and the end of April 1941, and Seriea $E, F$, and $G$ were firat offered in May 1941. When Series $E$ began to mature on May 1, 1951, owners of the matured boncs were offered three options: to redeem the bonda in cash in accordance with the original terma; to retain them with an extended maturity of 10 yeara at apecified ratea of intereat accrual; or to exchange them for Serles $G$ bonda. On April 29, 1952, a number of changes in aavinga bonde were announcad: the rate of intereat accrual on Seriea $E$ was incressed; a new current-income bond, Seriea $H$, was offered; and Series $F$ and $G$ were replaced with two new lasuea, Serlea $J$ and $K$. Detalla of theae changea are contained in the article "Treasury

Financing Operations" in thie iseue of the "Treasury Pulletin".

In the tables which follow, Serles A-F sales are shown at issue price and total redemptions and amounta outatanding at current redemption values. Seriea $G$ is ahown at face value throughout. Matured bonde which have been redeemed are included in redemptions. Mstured bonss outstanding of Seriea $A-D$ were included in the interest-bearing debt until all bonde of the annual seriee had matured, when they were transferred to matured debt on which interest has ceased. Data by denominations and the amounts of aalea by Statea are published on a monthly basis but not in each 1asue of the "Treasury Bulletin".

Treasury tax and savings notes have been issued in 1者e seriea: Tax Seriea A frcm August 1,1941 , through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally deaignated Tax Series C) from Soptember 14, 1942, through August 31, 1948; Savings Seriee D from September 1, 1948, trrough May 14, 1951; and Savinge geries A beginning on May 15, 1951.

Detalls concerning terme and conditione for purchase and redemption and investment yields of Savinge Series A appear in the June 1951 1ssue of the "Treasury Bulletin", page A-1. Similar information with respect to Savinge Seriead w111 be found in the October 1948 and September 1949 issues, and with reapeot to Savings Series C in the Ootober 1945

1esue. For detalls concerning term and oonditione, investment yielde, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942 , pages 207 and 220 , and for sales and redemptions by ilscal yeare and monthe, see "Treasury Bulletin" for February 1946, pagee 42 and 43.

In the following tables ales and redemptions of Treasury savings notes are hown at par value. Matured notes redesmed (either for oash or for taz payment)are inoluded in the igures on redemptions. Matured notes outstanding are refleoted in the interest-bearing debt unt11 all notes of the series have matured, when they are transferred to matured debt upon which intereat has ceased.

Exoludee trust depertanots.
Inoludes trust oompanies and, beginniag rith ILguree for July 1949, also includeo otook eavinge benks. Formorly these banks vere sbown as a oeparete olaaification, but they are no longer 00 roported.
3/ Inciudee those banks and inauranoe companiwe not reporting in the Treasury Burvey.
4) Onited States avings bonde, Series E and $F$, ars ebown at ourront redemp tion valnes. Thoy vere reported at maturity valuo by the banks and insurance ocapanios inoluded in the Ireasury survey but bsve been adjugted to aurrent redemption values for use in this otetament.
2) Holdinge by reporting agenoies not available.
6) Exoludes guarenteed aecurltiae buld by tho Troasury.

If Insuoe whiok ocmmoroial benks may not acquire prior to epeoifled detee (rith Rinor exoeptions); see "Dobt Outotanding", Teble 3, footnote 1.
8) Federal aeouritios fall into three broed olaseses with reepeot to the inpoeition of Fedaral ingane tares on inocme derived from them. "Wholly" ter -azengt soouritioe are thoes vith the inocee exempt frome both normal tax and eurtax. "Partially" tex-oxempt eeouritios are those with the
inocme exenpt from the normal tax oxcept that in the oase of partially tax-exelept Ireanury boide, intereet derived fram \$5,000 of principer amount ounod by any one hoider ie aleo exenpt from the aurtax. "Tareble" eeourities ars those with the inocne eubjeot to noxral tax and aurtax.
9/ Insludes F. H. A. debentures ses footnote 10.
10/ A small indeterainate smount of these debonturee is partially taxexampt.
11/ Includes $\$ 72.9$ ndillon depoeitary bonds hold by oommeroial banke not included in the Treasury Survej.
12/ C. C. C. domand obligations as of the olose of the previous month in the amount of $\$ 2.3$ million, all held by oonmoroial banks, are ohom only in the total anount outetanding; boldinge by reporting banks are not availeble.
13 The proprietery interset of the United Statee in theme banks ended on Juns $26,1947$.

- Lear than $\$ 500,000$.

Current market quotations ahown here are over-thecounter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed in Section I include all public marketable aecuritiea lasued or guaranteed by the United States Government except those not regularly quoted in the market. The isauea axcluded are postal savinge bonds and Federal Houaing Adminiatration
debentures. The latter are the only public marketable interest-bearing guaranteed securities outstanding. Section II lists the public marketable securities 1saued by Federal agenciea but not guaranteed by the United States Government. Dally quotations for the securities listed in Sections I and II are publiahed monthly in the Treasury Department statement, "Prices and Yields of Public Marketable Securitiea Isaued by the United States Government and by Federal Agenciea".

Weokly earlos - avaragee of datily serise for week ending -

Note: Treasury bonds included in the averagee, beginning December 1935, are those noither due nor callable for iffteen years. Prior to that time, for years shovn in this table, the bonds included vere neither dus nor calleble for twelve years. For a disoussion of the composition of these avorages, 000 "Treasury Bulletin" for March 194h, page 583 for the ocmposition of the high-grede oorporate bond avorage, eoe the "Treasury Bullotin" for July 1947, page 59, end January 1945, page 56. Treasury bond ylelds are ocamputsd on the beale of the moan of alosing bid and ask quotations in the ovor-the-counter mariset es roported to the Ireasury by the Federal Reserve Banik of Kew York, baginning September 2, 1941. Prior to that time, fislds wore computed on the basis of oloeing prices on the Now Iory Stook Rrohenge, exoept that on daye when an Issue did not sell the yield vas oamputed on the mean of olosing bid and ask quotations on the Brohange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Fichange and the Now York Curb Prchange; on days when en lesuo doee not sell, the pricee of the last prooeding oals is used.

1/ For definition of tarable and partially tax-exempt bonds, see footnotee to the "Treasury Survey of Ownarship" in thie iseus of the "mreasury Bulletin". The partially tax-arempt average vas discontinued on Deoember 15, 1945, because there were no longer any bonds in this category with fiftean or more yeare to maturity or first call.
2) Average revised baginning April 1, 1947. Old average for April 1947 vae $2.47 \%$.
3/ As of December 21, 1949, the Consolidatod Gas Eleotrio Light and Power Company of Baltimore 2-3/4 'a of 1981 vere dropped from the average, having been oalled.
4) As of Ootober 20, 1950, the Standard 011 Company of Callfornie 2-3/4'a of 1965-66 were dropped from the average, having bean called.
5/ Market olosed.

Data relating to cleime on forelgners and llabllitles to forelgners, and caplal movemente between the United States and foreign countries, have besn collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury reguiations thereunder. Information covering the principal types of data and the principal countrles 16 reported each month by banks and bankers and securities brokers and dealers in the United States. This information 18 published regularly in the "Treasury Bulletin". Supplementary information is published at less prequent intervale. All raperte are made initially to the Federal Reserve Banke, which forward consolidated flgures to the Treasury.

The term "foreigners" as used in these reporte covers all inetitutions and individuals (Including United states citizens) domiciled outelde the United States, as well ae international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to orlginal maturities of one year or lese, and "long-term" refers to all other maturities. A detalled dicouseion of the reporting coverage, basis of reporting, and derivation of capital movements flgures appeared in the April 1950 1ssue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with
the data for January 1950. Attention is called to the fact that although the grand total pigures on the revieed reporting baela are reaconably comparabla with those for preceding monthe, data for individual countries in soms intances ars not comparable becauee of certain changes in coverage and geographical claselplcation.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 glves data by countrise on short-term cladme on and llabllitles to forelgners as reported quarterly by axporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 1ssus of the "Treasury Bulletin" and begins with data for September 30, 1946. Tabls 2 suppliee information by countriss on long-term claime on and liabllities to forelgners as reported by banks and bankers in the Unitsd Statss. This table appeared for the first time in the December 1949 1esus. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liablilities to countries not regularly reported eeparately by banke and bankers. Thie table appeared for the first time in the April 1950 1seus. The data have been rsquested at irregular intervals, the earllest date being October 1943.
