I/ For basis of appropriations, ese Teble 7. Amounte eppropriated are equivalent to the amounte of taree collected and depoeited for oldage insurance. The Social Security Act Amendmente of 1950 (Fublic Lav 734), epproved August 28, 1950 , changed in certain reapects the besis of transferring the eppropriated funds to the trust fund. Effective Jonuary 1, 1951, the old-age ingurance taxee on employers and employeee and the withhold income tax are paid into the Treaeury in combined amounts without eeparation as to type of tax. The old-age 1nsurance tax on eelf-employment income, impoeed by public Lev 734 , is levied and collected as part of the individual income tar, baginnfig with the taxable year 1951. Begloming January 1951, the amounto transferred currently as epproprietions to the truat fund are based on estimatoo of old-age insurance tax recelpte made by the Secretary of the Tressury, and are adjusted in later transiers on the basis of wase and eelf-employment income records mainteined by the Federal

Security Adminietrator. For purposee of this table, the amounte credited to the trust fund bagiming Jamuary 1951 are considered to repreeent eetimated recsipts of old-age insurance taree for correeponding periods. Accordingly, theee amounte are included under employment tares and excluded from total incame and profits taxes as ebown. Throughout the calandar year 1951, the eame amounto ware deducted from the combined taree paid in by employers, and the balance was ohown as income tax vithheld. Boginning January 2952, the tax on eolf-gmployment incame ie alloved for in the amounts credited to the trust fund, but no breakdown between the two typee of old-age insurance tares is evailable monthly. Eetimatee of the break-down are made on a flecal year basie begiming 1952.
8/ Intereet on refunds ie included in Table 5 under "Miscellaneous".
2/ Since monthly ifguree in theee two colume include old-age insurance taxes (eee footrotee 2 end 3), they will not add to the total, which excludes thoee taxes.

Table 4.- Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness and Securities Guaranteed by the United States Government

United gtatas aringe bonda were first offered in March 1935 and began to mature in Maroh 1945. Sariea A-D were sold between Maroh 1935 and the end of April 1941, and Seriee $E, F$, and $G$ were firat offered in May 1941. When Series E began to mature on May 1, 1951, ownare of the matured bonde ware offered thres optione: To redeam the bonda in cash in aocordance with the original tarma; to retain thom with an extended maturity of 10 yeara at -specilled rates of intersat aoomal; or to exohange them for seriea $G$ bonde. A number of changee became effective May 1, 1952. The principal ones were: The rate of intereat socrual on Series E was increased, sapscially for the near term, with correaponding changes in axtonded Sories E; and Seriee $F$ and $O$ were replaced by two naw labues, Sariee J
and $K$, aleo at higher intereat ratee. A new current-income bond, Series $H$, similar in interest return to Seriee E, was offored beginning Junel. For detalls of these ohanges aee "Treaeury Bullotin" for May 1952, oage A-1.

In the tables whloh sollow, Series $A-F$ and $J$ eales are ahown at iseue prioe and total redemptions and amounte outatanding at ourrent redemption values. Serios $\sigma, H$, and $K$ are shom at face value throughout. Hatured bonde which have been radasmed are inoluded in redomptions. Data by denominations and eales by gtates are published on a montbly basis but not in each isaue of the "Treasury Bulletin".

Noto: Treasury bands included in the everages, bsginning April 1952, are thoee neither due nor oallable for twelve years. The mindmum longth of the bonds included was 15 Jears from December 1935 through Maroh 1952, and 12 yeare prior to December 1935 for the periods abom in thie table. For e disouseion of the camposition of theee Ireasury bond everages, wee "Trosaury Bullatin" for March 1944, page 58; for the compotition of the bigh-grede oorporete bond everage, see the "Treasury Bujletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yielde are computed on the basie of the mean of closing bid and aek quotations in the over-the-counter market ae reported to the Treasury by the Federal Reaerve Bank of Now York, beginning September 2, 1941. Prior to that time, yialds were ocmputed on the basis of closing prioes on the Now York Stock Hxchenge, except that on daye when an lesue did not sell the field was oomputed on the man of closing bid and ask quotations on the Exohenge. Corporate bond yielde are computed on the basie of olosing prices on the New York 8took Ezchange and the New York Curb Exchange; on daye when an ieeue
does not sell, the price of the last preceding esle is used.
1 For definition of taxable and partially tax-exempt bands, see footnotes to the "Preasury Survey of Ownersbip" in this iseue of the "Treasury Bulletin". The partially tax-axempt average was discontinued on December 15, 1945, because thore wore no longer any bonde in thie catagory with ififtean or more Jears to maturity or ifrat call.

Data relating to claims on forelgners and liabilitiea to foreignera, and capital movements between the United States and foreign countries, have been collected aince 1935, purauant to Executive Order 6560 of January 15 , 1934, and Treasury ragulationa thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securitiea brokers and dealers in the United States. Thia information 28 published regularly in the "Trasaury Bulletin". Supplemantary information 18 publiahed at lese frequent intervala. All raports are made initially to the Federal Reaerve Banka, which forward consolidated ilgures to the Treaaury.

The term "foreigners" as used in these raporta oovera all institutions and individuala (inoluding United statea citizens) domiciled outside the United States, as wall as international organizations, wheraver domiciled, created by treaty or convention between sovereign atatea. "Short-term" refars to original maturitisa of one year or leas, and "long-term" refers to all other maturitiea. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movementa figurea appeared in the April 195018 sue of tha "Treasury Bulletin", pages 50-52. Reviaed report forms and regulations became effective with
the data for January 1950. Attention is called to the fact that although the grand total ilgures on the revised reporting basis are reaaonably comparabla with thoae for preceding montha, data for individual countries in some instances ara not comparable because of certain changes in coverage and geographical claaailication.

The aupplemantary information, contained in Section IV, is presentad in three tablea appearing at different times. Table 1 gives data by countries on short-term claima on and Ilab1litie to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerna in the United States. This information was published for the pirst time in the October 1949 1seus of the "Treasury Bullatin" and begins with data for September 30, 1946. Tabla 2 aupplies information by countries on long-term claims on and liabllitiss to foreignere as reported by banka and bankers in the United States. This table appeared for the IIrst time in the Dacember 1949 1ssue. Data are for the end of the calandar year baginning with 1942. Table 3 gives information on ehort-term liabilities to countries not ragularly reported aeparately by banks and bankers. This table appeared for the first time in tho April 1950 1ssue. The data have been raquasted at irregular intervale, the earliest date being October 1943.
