8) Amounte eppropriated to the Federal Old-Age and Survivars Insurance Trust Frod are equivelent to the emounts of taree collected and depoeitad for old-age ingurance ( 42 U.S.C. 401 (e)). The social Security Act Amendments of 1950 (Public Law 734), epproved
August 28, 1950, changed in csrtein respects the basis of transforring this epproprieted funds to the trust fund. Effective Jemusty 1, 1951, the old-age insurance tares on employers and exployees and the withheld income tax are paid into the Ireasizy in oombinod emomite without separation as to type of tax. The old-age insurance tax on selfewplaymont 1ncomo, 1mpoeed by Public Law T34, is lovied and collectod as part of the individual income tex, beginning with the tarable jear 1951. Begiming Jenuary 1951, the amounts transforred currentiy as eppropriations to the truet fund are based on estimatise of oldage

1nsurance tax reoeipte made by the Secretary of the Treseury as required by lav, and are adjustod in lator tranafors on tha basis of vago and solfouployment income records mainteined in the Social Security Adminietration. For purposee of thie table, the amounte crodited to the truat fund beginning January 1951 rapresent eetimated reoeipte of old-age insurance taxee for corresponding periods. Accordingly, theeo anounte are included mender employment taxes and excluded from total income and profits taxee as shown. The breakdown needed for exoluding eppropricto emounts from individual incose tex withheld and not withheld is e日timatod oniy on a fiscal yoer basis. This estimate for 1953 is not yet available. Figuree for Jume 1953 include edjustmente by increase in amounts transfarred as epproprietions as follows: $\$ 53$ million besed an recorts of eelf-employmont income for calendar year 1951 and $\$ 39$ million besed on racords of wages earned in the quartars onding September 30 and December 31, 1952.

United Statee eavinge bonda were firet offered in March 1935 and bagan to mature in March 1945. Seriee A-D were aold between March 1935 and the end of April 1941. and Series $E, F$, and $G$ were firat offared in May 1941. When Serlea $E$ began to mature on May 1, 1951, owners of the matured bonds were offered three optione: To redeem the bonde in caeh in accordance with the original tarme; to retain them with an extended maturity of 10 years at specified rates of intereat accrual; or to exchange thew for semies $G$ bonda. A number of changea became effective May 1, 1952. The principal onee were: The rate of intereet accrual on Series $E$ was increaeed, especially for the near term, with correaponding changee in extended Series E; and Serles $F$ and $Q$ were replaced by two new leeuee, Serles $J$ ano $K$, al so at higher interest ratas. A new current-income
bond, Serias $H$, aimilar in intereat return to seriee $E$, wae offered beginning June 1. For detalls of these ohanges see "Treaaury Bulletin" for Nay 1952, page A-1. Series F and $Q$ began to mature on May 1, 1953. For the exchange offering made to holders of theae honds maturing through December 31, 1953, aee the May 1953 1asue, page A-1. Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United Statea and forelgn countries, bave been collected aince 1935, purauant to Executive Order 6560 of January 15 , 1934, and Treaaury regulationa thereunder. Information covering the principal typea of data and the principal countriea ia reported each month by banks and bankers and aecurities brokers and dealera in the United States. Thia information is published regularly in the "Treasury Bulletin". Supplementary information ia publiehed at leas frequent intervala. All reports are made initially to the Federal Reserve Banke, which forward conaolidated ilgurea to the Treasury.

The tarm "foreigners" as used in these reports covara all institutions and individuals (Including United Statea citizena) domiciled outaide the United States, aa wall aa international organizations, wherever domiciled, created by treaty or convention between aovereign atatea. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detalled disouasion of the reporting coverage, basia of reporting, and derivation of capital movements figures appeared in the April 1950 iasue of the "Treaaury Bulletin", pages 50-52. Revised report forms and regulationa became effective with
the data for January 1950. Attention is called to the fact that although the grand total ifgurea on the revised reporting basis are reasonably comparable with thoae for preceding montha, data for individual countries in some Instances are not comparable because of certain changee in coverage and geographical classification.

The supplementary information, contained in Section IV, 1a presented in three tables appearing at different times. Table 1 gives data by countries on short-term cladme on and liabllitiee to foreigners as reported quarterly by exportera, importere, and induetrial and commercial concerns in the United States. Thia information waa publiahed for the ifat time in the October 1949 iseue of the "Treasury Bullstin" and begine with data for september 30, 1946. Table 2 supplies information by countries on long-term claima on and liabllitisa to forelgnere as reported by banks and bankere in the United Statsa. This tabla appeared for the firat time in the December 1949 188ue. Data are for the end of the calendar year beginning with 1942. Table 3 givea information on ehort-term liabilitiea to countriea not regularly reported aeparately by banka and bankers. This table appeared for the firat time in the April 1950 1asue. The data have bean requeated at irregular intervale, the earlieat date being October 1943.
