Treasury Financing Operations

Maturing F and G Savings Bonds

On December 11, 1953, the Treasury invited holders of those Series F and G savings bonds which begin to mature in January 1954 to exchange them at maturity for other series of savings bonds. The statement added that at this time the Treasury was not offering to holders of these maturing bonds any Treasury issue other than savings bonds.

It was pointed out that individual owners of the maturing Series F and G bonds may make reinvestment in Series E and H bonds up to the \$20,000 annual limits on each of these series. Not only individuals, but any other holders of these maturing bonds may reinvest in Series J and K bonds, which have a combined annual limitation of \$200,000 issue price. These transactions will be handled at Federal Reserve Banks and branches and at the Office of the Treasurer of the United States in Washington. Holders of the maturing bonds may submit them, for either exchange or cash payment, direct or through their banks after having the request for payment

certified, which can be done at any bank or post office.

In the case of Series G bonds, the final interest due on the maturity date will be paid with the principal. No interest will accrue on bonds of either Series F or G after maturity. In order to avoid loss of interest on their investment, holders should submit the bonds from twenty to thirty days in advance of their maturity dates, whether for cash redemption or for new bonds.

Treasury 91-Day Bills Refunded

Maturities of 91-day Treasury bills totaled \$7.5 billion in December. They were refunded in full by weekly offerings in amounts equivalent to the \$1.5 billion maturing. The average rates of discount on the new offerings were 1.589 percent for December 3; 1.603 percent for December 10; 1.682 percent for December 17; 1.704 percent for December 24; and 1.574 percent for December 31.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings" and "Dis-

position", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

8/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, changed in certain respects the basis of transferring the appropriated funds to the trust fund. Effective January 1, 1951, the old-age insurance taxes on employers and employees and the withheld income tax are paid into the Treasury in combined amounts without separation as to type of tax. The old-age insurance tax on self-employment income, imposed by Public Law 734, is levied and collected as part of the individual income tax, beginning with the taxable year 1951. Beginning January 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age

insurance tax receipts made by the Secretary of the Treasury as required by law, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. For purposes of this table, the amounts credited to the trust fund beginning January 1951 represent estimated receipts of old-age insurance taxes for corresponding periods. Accordingly, these amounts are included under employment taxes and excluded from total income and profits taxes as shown. The breakdown needed for excluding appropriate amounts from individual income tax withheld and not withheld is estimated only on a fiscal year basis. Figures for June 1953 include adjustments by increase in amounts transferred as appropriations as follows: \$53 million based on records of self-employment income for calendar year 1951 and \$39 million based on records of wages earned in the quarters ending September 30 and December 31, 1952.

9/ Interest on refunds is included in Table 5 under "Miscellaneous".

- 10/ Expenditures are "net", after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. Further information on these capital transfers may be found in the 1952 Annual Report of the Secretary of the Treasury, pages 512 and 513.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For

details of these changes see "Treasury Bulletin" for May 1952, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. The Treasury invited holders of Series F and G which began to mature in January 1954 to reinvest the proceeds in other series of savings bonds. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin".

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Because of a change in procedure in July 1953 for processing redeemed savings bonds, the amount of redemptions not yet classified at the end of July as between matured and unmatured was larger than normal. This situation was reversed in subsequent months as these redemptions were

classified. Since the unclassified redemptions are included in these tables at issue price, the relation between issue price and accrued discount is somewhat distorted also.

5/ Sales began June 1, 1952.

6/ Comparable data are not available prior to January 1950.

7/ Includes redemptions not yet classified between matured and unmatured.

8/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued as follows: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; Savings Series A from May 15, 1951, through May 14, 1953; Savings Series B from May 15, 1953, through September 25, 1953; and a new Savings Series C from October 1 through October 23, 1953, when sale of these notes was suspended.

Details concerning terms and conditions for purchase and redemption and information on investment yields of Savings Series C appear in the October 1953 issue of the

"Treasury Bulletin", page A-1. Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin", and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate years.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

^{1/} Excludes trust departments.^{2/} Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.^{3/} Includes those banks and insurance companies not reporting in the Treasury Survey.^{4/} United States savings bonds, Series E, F, and J, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.^{5/} Holdings by reporting agencies not available.^{6/} Excludes guaranteed securities held by the Treasury.^{7/} Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 2, footnote 1.^{8/} Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal

tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

^{9/} Includes Federal Housing Administration debentures; see footnote 10.^{10/} A small indeterminate amount of these debentures is partially tax-exempt.^{11/} Includes \$147.3 million depository bonds held by commercial banks not included in the Treasury Survey.^{12/} The proprietary interest of the United States in these banks ended in July 1951.^{13/} Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in these banks ended in June 1947.

MARKET QUOTATIONS ON TREASURY SECURITIES, NOVEMBER 30, 1953

Current market quotations shown here are over-the-counter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed include all regularly quoted

public marketable securities issued by the United States Government except Panama Canal bonds. Outstanding issues which are guaranteed by the United States Government are excluded because they are not regularly quoted in the market.

"When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.

3/ Not quoted on November 30, 1953.

4/ Amount allotted on November 30, 1953, was \$8,175.

5/ Not called for redemption on December 15, 1953. Callable on four months' notice on June 15, 1954.

6/ Yield to first call date. Yields are computed to call date when the

YIELDS OF TAXABLE TREASURY SECURITIES, NOV. 30, 1953
Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. 1/ Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of the mean of closing bid and ask quotations. For definition of taxable bonds, see footnote to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin".

2/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: April 1952 through March 1953, bonds neither due nor callable for 12 years; October 1941 through March 1952, bonds neither due nor callable for 15 years. For a discussion of the

composition of these Treasury bond averages, see the "Treasury Bulletin" for March 1944, page 58.

3/ Moody's Investors Service average of Aaa corporate bonds. This series supersedes the Treasury average of high-grade corporate bonds previously shown in this table, which was discontinued after March 1953.

4/ The long-term taxable Treasury bond average was revised beginning April 1, 1952, see footnote 2. The old average for April 1952 was 2.62 percent.

5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by the Internal Revenue Service for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by the Internal Revenue Service because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad (repealed by Public Law 386, approved June 10, 1952, for taxable years ending after that date).

2/ Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous taxes"); declared value (repealed for years ending after June 30, 1946); Excess Profits Tax Act of 1940 (Title II of the Second Revenue Act of 1940, which was repealed for

years ending after December 31, 1945). Includes also excess profits taxes on Army and Navy contracts under the Vinson Act as amended (34 U.S.C. 496) and income tax on business income of exempt organizations, imposed by the Revenue Act of 1951, approved October 20, 1951.

3/ Monthly figures include old-age insurance tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures exclude this tax, on the basis of estimates beginning 1952, and it is included under "Old-age insurance taxes".

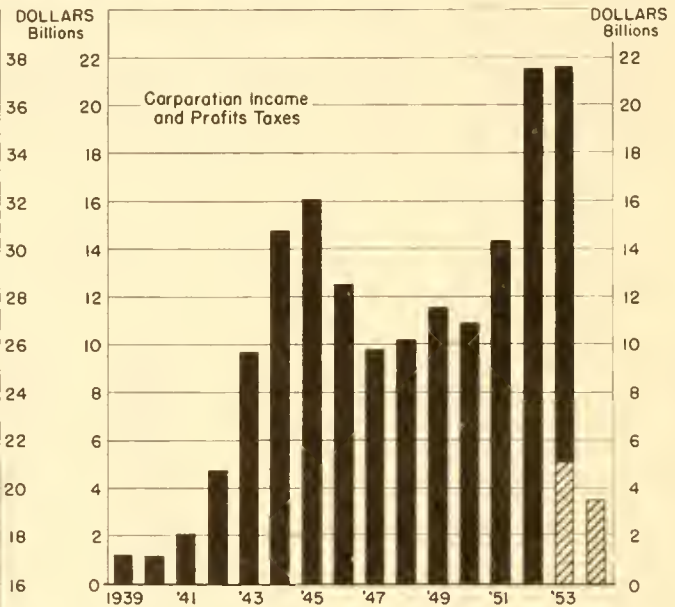

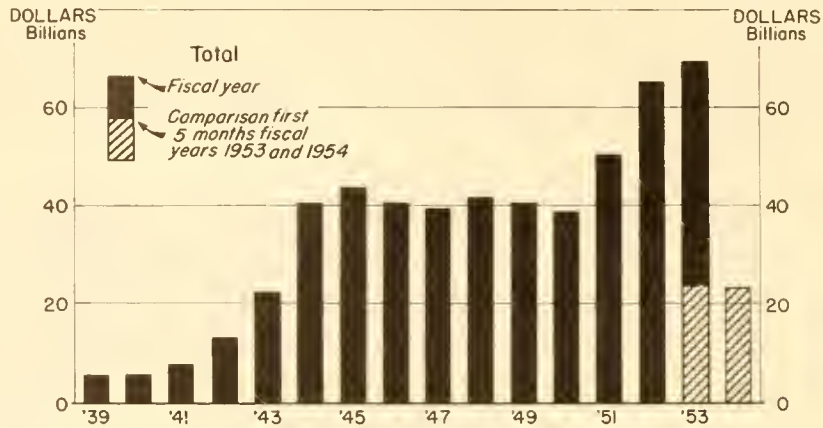

4/ Withheld income tax and old-age insurance taxes on employers and employees are paid into the Treasury in combined amounts beginning January 1951, so that current collections are not separable as to type of tax. The breakdown is estimated for fiscal years beginning 1951.

5/ Repealed for years ending after June 30, 1945. Beginning July 1950, included under "Miscellaneous taxes".

Source: Daily Treasury Statement for total receipts from internal revenue; reports by the Internal Revenue Service for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by the Internal Revenue Service because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

Financial statements of corporations in which the United States Government has a proprietary interest, direct or indirect, and of certain other business-type activities of the United States Government are submitted quarterly to the Treasury Department, in accordance with Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942. Data from these reports, adjusted for consistency where necessary, are compiled in a series of tables covering balance sheets, statements of income and expense, and statements of source

and application of funds, which are published in the "Treasury Bulletin".

The balance sheet tables for September 30, 1953, appear in this issue. They are published for each quarter. The tables on income and expense and source and application of funds are published at six-month intervals, and cover the periods ending June 30 and December 31. They appear in each case in a Bulletin issue subsequent to that carrying the corresponding balance sheet data.
