## Treasury Financing Operations

Offering of 94-Day Tax Anticipation Bills
On March 4, 1954, the Treasury announced the offering on March 10 of 能. 5 blilion of 94-day Treasury bills, Tax Anticipation Series. Tenders were opered on March 16 , with peyment to be made In cash on March 22. The bills were dated March 22 and w1ll mature on June 24. They will be accepted at face value in payment of income and profits taxes due June 15, 1954; and to the extent they are not used for this purpose the face amount will be payable without interest at maturity. Taxpayers desiring to spply these bills in payment of June 15, 1954, taxes may surrender them to any Federal Reserve Bank or branch not more than flfteen days before June 15,1954 , and receive receipts therefor showing the face amount of the bllls so surrendered. These recelpts may be submitted in lieu of the bills on or before June 15, 1954, to the District Director of Internal Revenue for the district in which such taxes are payable.

Any of the 5.9 billion of tax certificates maturing on March 22 which are not presented in

```
payment of taxes are to be pald off out of tax
recelpts and the proceeds of this offering of
Tressury tax bills. Accordingly, as polnted
out in the March }4\mathrm{ announcement, credit in
Treasury tax and loan accounts could not be glven
to depositaries on subscriptions to the new b111s.
```

It was stated at the same time that the decision to offer these tax bills postponed consideration of longer-term financing uritil later in the fiscal year.

Weekly 91-Day B111s Refunded
Maturities of 91-day Treasury blils in February totaled $\$ 6.0$ billion. They were refunded in four equivaient 1 ssues of spproximately $\$ 1.5$ blllion each. The average rates of discount on the new issues were 1.031 percent for February $4 ; 0.893$ percent for February 11; 1.024 percent for February 18 ; and 0.986 percent for February 25.

Note: Dotalls of Treasury market ffnancing operations are shown elsewhers in this lesus of the "Treasury Bulletin", in the tablee on "Offerings" and "Die-
position", reepectively, of marketsble lesues of bonds, noter, and certificates of indebtednees, and in the table "Offeringe of Treasury Bills".

Source: See Table 1.
Fontnotos 1 through 6 on page 2 and footnotes 9 through 35 on page 4.
I/ Includes proceeds from eale of surplua property and from Goverament owned eecurities; depoeite reeulting from renegotiation of war contracts (bee "Treasury Bulletin" for February 1948, page 5); and repaypents on credit to United Kingiom (eee Table 4).
8/ Amounts eppropriated to the Federal 0ld-Age and Survivors Ineurence Trust Fund are equivalent to the amounte of tareo collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Socurity Act Amendments of 1950 (Public Lavy 734), approved Ausust 28, 1950, changed in certain reepecte the basis of tranglerFing the appropriated funds to the trust fund. Effective Jonuary 1 , 1951, the old-age insurance taxee on employers and employees and the vithheld income tax are paid into the Treseury in combined emounte without eeparation as to type of tar. The old-age insurance tax an eolf-employment income, 1mposed by Public Law 734, 1o lovied and
collected as part of the individual incone tax, beginning with the taxable jear 1951. Beginning Jonuary 1951, the amounta transferred currently as eppropristions to the trust fumd are basod on estimates of old-age ineurance tax recelpts made by the Secratary of the Treasury as required by law, and are adjustad in later transfere an the basis of wage and self-employmant income records maintained in the Social Security Admifistration. For purposes of thie table, the amounte credited to the trust fund beginning Januery 1951 represent eetimated recelpts of old-age insurance taxes for correepoading periods. Accarding 2 y these amounts are included under employment taxee and excluded from total income and profits tazes as ehomm. The breakiown needod for oxcluding appropriate amounts from individual income tax withheld and not withheld has been estimated only on a flacel joer basis. Beginning December 29, 1953, tranefore of appropriations vere euspended until adjustmente amounting to $\$ 25$ million had been comploted. Of the total ad justmente, $\$ 24$ million were made in December and $\$ 1$ million in Jenuary.

Table 4.- Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness

Source: Bureeu of the Public Debt.

1) Original call and maturity detee are used.
2) All by inveatore other than Federal Reeerve Banks

3 These nommarketable bonds, deted April 1, 1951, and maturing April 1, 1980, are exchangeable for 1-1/2\% marketeble Treasury notee soe Teble 3, footrote 2. In the reopening, the Inveetment Serlee bande were offered for cash aubecriptions as well as exchange, and not lees than one quarter of each eubecription hed to be peid in cash.
4) The $2 \phi$ certificete日 maturing Alyust 15 , 1953, were reopened for the Docember 1, 1952, refunding (see Teble 3).

5/ The 2-1/2\% bonde maturing December 15, 1958, were reopaned for the Docarbar 1, 1953, ferunding (oee Table 3).
6/ On Novarbar 9, 1953, the Treasury purchased from the Federal Reearve Syetern and retired $\$ 500$ millian of the 2-1/8\% Treasury notos maturing Decamber 1, 1953. For further detaile see "Treasury Bulletin" for Novaciber 1953, page A-1.
If For detalle of exchange offering Teble 3, footnote 15.
8) It has been announced that bolderg of theee baode, which bere been called for redemption on June 15 , 1954, would heve an opportunlty to excbeage tham for another Treasury 1 leeue later.
p Proliminary.

United Statea asinge bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between Maroh 1935 and the and of April 1941, and Series $E, F$, and were firat offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeef the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 yeara at apecifled rates of interest accrual; or to exohange tham for Serles $G$ bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series $E$ was incrassed, especially for the near term, with corresponding ohanges in extended Series $E$; and Seriea $F$ and $G$ were replaced by two new 1ssuea, Series $J$ and $K$, also at higher interestrates. A new new current-income bond, Series $H$, similar in interest return to Series $E$, was offered beginning June 1. For
detalls of these changes aee "Treasury Bulletin" for May 1952, page $A-1$. Seriea $F$ and $G$ bogan to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 1asue, page A-1. The Treasury invited holders of Series $F$ ard $G$ which begin to mature in January 1954 to reinvest the proceeds in other serles of savings bonds. In the tables which follow, Series $\mathrm{A}-\mathrm{F}$ and J sales are inoluded at 1 saue price and total redemptions and amounts outstanding at ourrent redemption values. SeriesG, $H$, and $X$ are included at face value throughout. Matured bonds whioh have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

Source: Dafly Treasury Statement
1/ Details by earioe cin a cumulative basis and by periode for Soriea A-D cambined $w 131$ be found in the Fobruary 1958 and previous 10sues of the "Ireasury Bullotin".
2) Includas axchanges of matured Sorles E bands for Sorles G bonde beginning May 2951 and for Series $\mathbb{Z}$ boods beginning May 1952.
3. Includoe both matured and urwatured bonds; 000 Toblo 4.

4/ Bocause of a chango in proceduro in Juily 1953 for proceseing rodeemed saringe bonds, the amount of redemptions not jot claselfied at the end of July as botween matured and ummatured wes larger than normal. Thio
aituation was reversed in subsequent monthe as these redemptione were claselfied. Since the unclaselfied redemptions are included in these tableo at iseue price, the rolation between leave price and acorued discount is scmowhat distortod also.
5) Sale日 began June 1, 1952.
6) Comparable date are not available prior to January 1950.

Includos redemptions not jot claseified betveon matured and unmatured. Includes axchanges of Series 1941 F and G 日evings bonds for Treasury 3-1/4\% bonds of 1978-83.

- Lese than $\$ 500,000$.

Traasury tax and savinge notes have boen issuad as follows: Tax Series A from August 1, 1941, through June 22, 1943; Tax Serles B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savinge Series D irom September 1, 1948, through Kay 14, 1951; Savings Series A from May 15, 1951, through May 14, 1953; Savinge Series $B$ 1rom May 15, 1953, through Soptamber 25. 1953; and a new Savings Series C prom Ootober 1, through Ootober 23, 1953, when sale of these notes was suspended. Detalls concerning terms and oonditione for purchase and redemption and information on investment yields of Savings Series $C$ appear in the October 1953 issue of the "Treasury Bulletin", page A-1.

Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin", and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate yeare.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-besing debt until all notes of the annual series have matured, whon they are transferred to matured dobt upon which interest has ceased.

The tables which follow provide an analysis of the security holdinge of commercial banks reporting in the Treasury survey of ownership of seourities issued by the United Statea Government and by Federal agencies. The pigures show the total holdings distributed according to Fedaral Reserva member-banis classes and nonmember banks.

This analysia of oommarcial bank ownership was first publishad in the May 1944 Lasue of the "Treasury Bulletin", based on the survey data for Deoember 31, 1943. It has appeared at samiannual or quarterly intervals since that time, and 1 s now being published for the June 30 and December 31 survay data.

1) Theoe items represent the difference betweon the cost velue and the manetary value of allvar bullion fevalued and beld to secure ellver certificates.
2) The pigures in this colum are not cumuletive; as the arount of bullian bald changes, the potential asigniorage therean changes.

Data relating to claima on forelgnera and llabil1ties to foreigners, and capital movements between the United Statea and forelgn countries, have beon collected alnce 1935, purauant to Executive Order 6560 of January 15 , 1934, and Treaaury ragulationa thereunder. Information covering the principal typea of data and the principal countries is reported each month by banka and bankera and securities brokera and dealera in the United Statea. This information 18 publiabed regularly in tbe "Traasury Bulletin". Supplemantary information ia published at leas frequent intervale. All roperts are made initially to the Federal Reaerve Banks, which forward consolidated figurea to the Treasury.

The term "foreignera" as used in these raports covars all inatitutions and individuala (incluaing United States citizena) domiciled outside the Unitad Statas, as well aa international organizationa, wheraver domiciled, created by treaty or convention between aovereign states. "Short-term" refers to original maturities of one gear or leas, and "long-term" refers to all other maturities. A detallod discuasion of the reporting coverage, basia of raporting, and derivation of capital movements figures appeared in the April 1950 1asue of the "Treasury Bulletin", pages 50-52. Revised report forms and repulationa became effective with
the data for January 1950. Attention 18 called to the fact that although the grand total flgurea on the revised reporting basis are reasonably comparable with those for preceding montha, data for individual countries in some instancea are not comparable becauae of cartain changes in coverage and geographical claasiflcation.

The supplementary information, contained in Section IV, ia preaented in three tables appearing at different times. Table 1 gives data by countriea on short-term claima on and llabilitles toforelgnera aa reportad quarterly by exportera, importers, and induatrial and comercial concerns in the United Statea. This information waa published for the firat time in the October 1949 issua of the "Treasury Bullatin" and begine with data for Septamber 30, 1946. Table 2 auppliea information by countries on long-term clalma on and llabilltiea to foreignera aa raported by banka and bankers in the United States. Thla tabla appeared for the firat time in the Decomber 1949 1aaue. Data are for the end of tha calendar year beginning with 1942. Table 3 gives information on short-term llabllities to countries not regularly reported aeparately by banka and bankera. Thia table appeared for the firat time in the April 1950 lacue. The data have been raquested at irregular intervala, the earlleat date being October 1943.
