## Treasury Financing Operations

### Treasury 91-Day Bills Refunded

The weekly maturities of 91-day Treasury bills amounted to \$6.0 billion in March. They were refunded by four issues in equivalent weekly amounts of approximately \$1.5 billion each. The average rates of discount on the new issues were 1.060 percent for March 4; 1.065 percent for March 11; 1.056 percent for March 18; and 1.030 percent for March 25.

**Note:** Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

## Announcement of Changes in Treasury Financial Reporting

The following is a joint statement issued on February 17, 1954, by the Secretary of the Treasury, the Director of the Budget, and the Comptroller General of the United States. The changes are reflected in this issue of the "Treasury Bulletin" which carries figures for the month of February.

After a year's study we have found that the Daily Treasury Statement of "Budget receipts and expenditures, and budget deficit and surplus," is inadequate in the following respects:

1. It is impossible, at any reasonable cost, to obtain complete and accurate daily reports of checks issued and payments made by all Federal agencies, some of which are engaged in world-wide activities.
2. Even where daily reporting is practicable, the figures are not on a uniform basis. For instance, some expenditures are reported on accrual basis; some are on a current checks-issued basis; others are reported on a delayed-checks-issued basis; and others, are reported on a strictly cash payment (i.e., checks paid) basis.
3. Thus there has not been a common basis for comparing actual expenditures with detailed budgetary estimates.

In the interest of accurate and meaningful information, Treasury Department Circular 940, effective February 17, 1954, changes the basis of reporting in the Treasury Daily Statement, and provides for publication at approximately mid-month of a monthly statement on "Receipts and expenditures of the United States Government."

### Daily Cash Statement

The new Daily Treasury Statement will be limited to a summary of Treasury assets and liabilities, cash receipts and withdrawals, and closing cash balances as they are recorded for the day in the account of the Treasurer of the United States. In addition, it will disclose the effect of the day's operations on the

public debt, but will not show budget surplus or deficit.

### Monthly Budget Statement

The new monthly statement will be an accurate report on receipts and expenditures of the United States Government on a budgetary basis showing surplus or deficit. Monthly reporting on this basis will allow the necessary time for uniform reporting of budget results, including Government corporation and business-type agency transactions, refunds, and trust fund operations and investments, etc.

Budget receipts will be on a collection basis, i.e., when money is received by collecting officers.

Budget expenditures will be reported on a uniform basis of checks issued and payments made by disbursing officers. Thus both revenue collections and expenditures will tie to the accounting records of the various agencies, and to the President's budget.

These budget results will be reconciled with the cash balance in the Treasury and the outstanding public debt.

The new procedure, which is the result of a study made under the Joint Accounting Improvement Program by the Treasury Department, Bureau of the Budget, and General Accounting Office, is being adopted in the interest of better public understanding of Government operations and provides improved means for more effective budgetary control.

This change in reporting procedure does not involve any change in policy regarding the basis of the Government's budget. The administrative budget will continue to be the basis for determining the budget surplus or deficit.

8/ Includes proceeds from sale of surplus property and from Government-owned securities; seigniorage; deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5); and railroad unemployment insurance contributions for administrative expenses through 1953, after which they are carried as trust account receipts under the Railroad Retirement Board.

9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950, approved August 28, 1950 (64 Stat. 477), changed in certain respects the basis of transferring the appropriated funds to the trust fund. Beginning January 1951, the amounts trans-

ferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury pursuant to the provisions of Sec. 109 (a)(2) of the Amendments of 1950, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.

10/ Excludes the Government's contribution for creditable military service under the act of April 8, 1942 (56 Stat. 204). Beginning 1952, amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371), and transfers are made currently. Previously, annual appropriations were based, in effect, on estimated tax collections, with any necessary adjustments made in succeeding appropriations.

11/ Interest on refunds is included in Table 5 under "Other".12/ The classifications have been revised, beginning with the April 1954 issue of the Bulletin\*, to bring them as nearly into line

with the classifications in the 1955 Budget document as the detail available in monthly Treasury data will permit. The estimates in these tables are shown on the same classification basis as the actual expenditures, for purposes of comparison, and therefore will not exactly agree with figures for the corresponding categories in the Budget document.

BUDGET RECEIPTS AND EXPENDITURES

Footnotes for Tables 1 through 5 - (Continued)

- 13/ Expenditures are "net", after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts. They exclude net investments of wholly owned Government corporations and agencies in public debt securities beginning 1951 (when these investments were grouped with those of trust funds and accounts), and public debt retirements chargeable to the sinking fund, etc., under special provisions of law. Payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and disposition of earnings are excluded from both receipts and expenditures. Further information on these capital transfers may be found in the 1953 Annual Report of the Secretary of the Treasury, page 332.
- 14/ Beginning November 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States.
- 15/ Consists of Veterans Administration expenditures, including the direct loan program.
- 16/ Includes transactions relating to the Foreign Economic Cooperation Trust Fund (see page 1).
- 17/ Net transactions by the Departments of the Air Force and the Army relating to "Deposit fund accounts" are included under "Trust Account and Other Transactions" instead of "Budget Receipts and Expenditures" beginning 1952.

- 19/ Excludes certain expenditures made on behalf of the Department of the Air Force out of appropriations to the Department of the Army.
- 20/ Includes certain expenditures on behalf of the Department of the Air Force (see footnote 19).
- 21/ Consists of expenditures from funds appropriated to the President under the Mutual Security Act, approved October 10, 1951 (64 Stat. 373), and the preceding Economic Cooperation Act; and Greek-Turkish assistance.
- 22/ Consists of expenditures of the Atomic Energy Commission.
- 23/ Consists of payments under the Armed Forces Leave Act, expenditures for surplus property disposal, and in 1947 national defense expenditures of the Reconstruction Finance Corporation and certain other agencies.
- 24/ Excludes Bank expenditures under the Mutual Security Act and the preceding Economic Cooperation Act of 1948, as amended.
- 25/ Consists of expenditures from funds appropriated to the President under the Mutual Security Act, and the preceding Economic Cooperation Act.
- 26/ Consists of expenditures under the Bretton Woods Agreements Act in 1947; credit to the United Kingdom in 1947 and 1948; expenditures of the United Nations Relief and Rehabilitation Administration; relief to countries devastated by war; various other foreign relief programs; international children's emergency funds; and loan for construction and furnishing of United Nations Headquarters.
- 27/ Expenditures by the Department of State are included under "Department of State" in this table; expenditures by the Department of the Army are no longer shown separately in monthly reports to the Treasury.
- 28/ Consists of expenditures of the Department of Health, Education, and Welfare except the Office of Education, and of the corresponding component organizations prior to the establishment of this department on April 11, 1953; the Government's contribution under the Railroad Retirement Act for creditable military service; and, beginning 1950, the school lunch program under the Department of Agriculture.
- 29/ Consists of expenditures of the Housing and Home Finance Agency, and of component organizations prior to the establishment of this agency on July 27, 1947; Federal Civil Defense Administration; and disaster relief.
- 30/ Consists of expenditures of the Department of Agriculture except the Forest Service and the school lunch program; and of the Farm Credit Administration.
- 31/ Consists of expenditures of the Department of the Interior; the Tennessee Valley Authority; the Corps of Engineers in the Department of the Army (river and harbor works and flood control); and the Forest Service in the Department of Agriculture.

## TREASURY CASH INCOME AND OUTGO

The cash income and outgo of the Treasury shown in Table 1 consist of cash deposits and withdrawals in the account of the Treasurer of the United States. This is in line with the new reporting basis of the "Daily Statement of the United States Treasury". Effective February 17, 1954, the Daily Treasury Statement shows deposits and withdrawals in the account of the Treasurer of the United States. Budget results and trust account and other transactions are now reported once each month in the "Monthly Statement of Receipts and Expenditures of the United States Government" (see page A-2 in this issue of the "Treasury Bulletin").

Figures for previous fiscal years heretofore published have been revised to the basis of deposits and withdrawals by eliminating corporation and agency transactions included in the old Daily Statement but not cleared through the Treasurer's account. The cash borrowing or repayment of borrowing as now shown is likewise based only on transactions cleared through the Treasurer's account.

In Tables 2, 3, and 4 is given the reconciliation of the cash transactions with the budget and other trans-

actions which formerly appeared in the old Daily Statement and now appear in the new Monthly Statement. These tables follow the method used previously for deriving cash income and outgo from the transactions carried in the old Daily Statement. Some rearrangement has been made in the table setup, principally to combine all receipts and all expenditures instead of deriving separately the cash budget and trust account transactions. Since the figures in both the new Monthly Statement and the old Daily Statement include transactions not cleared through the Treasurer's account, such transactions are eliminated in the present reconciliation, as indicated above.

There remain, under the new reporting system, the differences in figures arising from differences in reporting bases between the new Daily Statement and the new Monthly Statement. An individual transaction near the end of a month, for example, may be included during that month in one statement but not until the following month in the other. These differences tend to correct themselves over a period of time, but for a given reporting date it is necessary to include an adjustment figure to cover them.

Source: Actual figures in Tables 1 through 4 are based on the old Daily Treasury Statement through 1953, and thereafter on the new "Daily Statement of the United States Treasury" and the new "Monthly Statement of Receipts and Expenditures of the United States"; estimates are based on the 1955 Budget document, released January 21, 1954.

1/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash budget receipts shown in these tables, but is excluded from the

Budget document figures for "Receipts from the public".

2/ In addition to this decrease in the balance in the Treasurer's account, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

3/ For explanation, see headnote. Figures for July 1953 through January 1954 will be shown by months in a subsequent issue, after analysis of the monthly data on the new basis has been completed.

## UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For

details of these changes see "Treasury Bulletin" for May 1952, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. The Treasury invited holders of Series F and G which begin to mature in January 1954 to reinvest the proceeds in other series of savings bonds. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

<sup>1/</sup> Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin".

<sup>2/</sup> Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

<sup>3/</sup> Includes both matured and unmaturred bonds; see Table 4.

<sup>4/</sup> Because of a change in procedure in July 1953 for processing redeemed savings bonds, the amount of redemptions not yet classified at the end of July as between matured and unmaturred was larger than normal. This

situation was reversed in subsequent months as these redemptions were classified. Since the unclassified redemptions are included in these tables at issue price, the relation between issue price and accrued discount is somewhat distorted also.

<sup>5/</sup> Sales began June 1, 1952.

<sup>6/</sup> Comparable data are not available prior to January 1950.

<sup>7/</sup> Includes redemptions not yet classified between matured and unmaturred.

<sup>8/</sup> Includes exchanges of Series 1941 F and G savings bonds for Treasury

3-1/4% bonds of 1978-83.

\* Less than \$500,000.

## TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued as follows: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; Savings Series A from May 15, 1951, through May 14, 1953; Savings Series B from May 15, 1953, through September 25, 1953; and a new Savings Series C from October 1, through October 23, 1953, when sale of these notes was suspended. Details concerning terms and conditions for purchase and redemption and information on investment yields of Savings Series C appear in the October 1953 issue of the "Treasury Bulletin", page A-1.

Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin", and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate years.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Excludes trust departments.

2/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ United States savings bonds, Series E, F, and J, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

5/ Holdings by reporting agencies not available.

6/ Excludes guaranteed securities held by the Treasury.

7/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 2, footnote 1.

8/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal

tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

9/ Includes Federal Housing Administration debentures; see footnote 10. A small indeterminate amount of these debentures is partially tax-exempt.

10/ Includes \$112.9 million depositary bonds held by commercial banks not included in the Treasury Survey.

11/ The proprietary interest of the United States in these bonds ended in July 1951.

12/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in these bonds ended in June 1947.

\* Less than \$500,000.

## MARKET QUOTATIONS ON TREASURY SECURITIES, FEBRUARY 26, 1954

Current market quotations shown here are over-the-counter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed include all regularly quoted

public marketable securities issued by the United States Government except Panama Canal bonds. Outstanding issues which are guaranteed by the United States Government are excluded because they are not regularly quoted in the market.

1/ Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of the mean of closing bid and ask quotations. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin".

2/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: April 1952 through March 1953, bonds neither due nor callable for 12 years; October 1941 through March 1952, bonds neither due nor callable for 15 years. For a discussion of the composition of these Treasury bond averages, see the "Treasury Bulletin" for March 1944, page 58.

3/ Moody's Investors Service average of Aaa corporate bonds. This series supersedes the Treasury average of high-grade corporate bonds previously shown in this table, which was discontinued after March 1953.

4/ Average covers 8-1/2 months beginning April 15, the inception date of this series.

5/ The long-term taxable Treasury bond average was revised beginning April 1, 1952, see footnote 2. The old average for April 1952 was 2.62 percent.

Source: Internal Revenue Service for collections by type of tax; Daily Treasury Statement for budget receipts from internal revenue through the fiscal year 1953, and the new "Monthly Statement of Receipts and Expenditures of the United States Government" for receipts thereafter. Certain detail by type of tax is available only in Internal Revenue Service reports. Differences in the amounts reported for a given period by the two sources arise because of differences in the timing of the reports. Under arrangements begun in 1950, certain taxes are paid currently into Treasury depositories, and the depository receipts, as evidence of payment, are attached to quarterly tax returns to the Internal Revenue Service. These deposits are included currently in Treasury reports of internal revenue receipts but are taken into the accounts of the Internal Revenue Service after the returns are filed.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad (repealed by Public Law 386, approved June 10, 1952, for taxable years ending after that date).

2/ Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous taxes"); declared value (repealed for years ending after June 30, 1946); Excess Profits Tax Act of 1940 (Title II of the Second Revenue Act of 1940, which was repealed for years ending after December 31, 1945). Includes also excess profits

taxes on Army and Navy contracts under the Vinson Act as amended (34 U.S.C. 496), and income tax on business income of exempt organizations imposed by the Revenue Act of 1951, approved October 20, 1951.

3/ Monthly figures include old-age insurance tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures exclude this tax, on the basis of estimates beginning 1952 (see footnote 4), and it is included under "Old-age insurance taxes".

4/ Withheld income tax and old-age insurance taxes on employers and employees are paid into the Treasury in combined amounts beginning January 1951. In Internal Revenue Service reports, current collections have not been separated as to type of tax but the breakdown for fiscal years beginning 1951 is based on estimates made in accordance with provisions of Sec. 109 (a) (2) of the Social Security Act Amendments of 1950, for appropriations to the Federal Old-Age and Survivors Insurance Trust Fund.

5/ New reporting basis beginning with the fiscal year 1954; for explanation, see page A-2 in this issue of the "Treasury Bulletin". Figures for July 1953 through January 1954 will be published by months after analysis of the monthly data on the new basis has been completed.

6/ Repealed for years ending after June 30, 1945. Beginning 1951, included under "Miscellaneous taxes".

7/ See Table 2, footnote 5, regarding change to quarterly returns in the fiscal year 1954.

Source: Internal Revenue Service for collections by type of tax; Daily Treasury Statement for budget receipts from internal revenue through the fiscal year 1953, and the new "Monthly Statement of Receipts and Expenditures of the United States Government" for receipts thereafter. Certain detail by type of tax is available only in Internal Revenue Service reports. Differences in the amounts reported for a given period by the two sources arise because certain taxes are paid currently into Treasury depositories, and the depository receipts, as evidence of payment, are attached to quarterly returns to the Internal Revenue Service. These deposits are included currently in Treasury reports of internal revenue receipts but are taken into the accounts of the Internal Revenue Service after the returns are filed.

- 1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad (repealed by Public Law 386 approved June 10, 1952, for taxable years ending after that date).
- 2/ Includes excess profits taxes on Army and Navy contracts imposed by the Vinson Act as amended (34 U.S.C. 496), and income tax on business income of exempt organizations imposed by the Revenue Act of 1951, approved October 20, 1951.
- 3/ Includes old-age insurance tax on self-employment income, imposed by the Social Security Act Amendments of 1950 (Public Law 734), approved

August 28, 1950. The tax is levied and collected as part of the individual income tax beginning with the taxable year 1951. For estimated fiscal year breakdown, see Table 1.

- 4/ Beginning January 1951, withheld income tax and social security employment taxes on employers and employees are paid into the Treasury in combined amounts without separation as to type of tax, pursuant to the Social Security Act Amendments of 1950. For estimated fiscal year breakdown, see Table 1.
  - 5/ Collections in fiscal year 1954 are not comparable month by month with those in the prior year because of the institution of quarterly returns with credit against them of receipts for interim payments made directly into Government depositories (see also source note).
  - 6/ Repealed, effective November 1, 1951, by Revenue Act of 1951.
  - 7/ Effective November 1, 1951, under Revenue Act of 1951.
  - 8/ Applies to diesel oil used in highway vehicles; effective November 1, 1951, under Revenue Act of 1951.
  - 2/ New reporting basis beginning with the fiscal year 1954; for explanation, see page A-2 in this issue of the "Treasury Bulletin".
- \* Less than \$500.

## CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.

Note: The information in this table is reported to the Treasury Department as of December 31 of each year. The totals will not agree with those shown for the corresponding date for "Other Europe", "Other Latin America", "Other Asia", and "Other countries" in the regular monthly series in the "Treasury Bulletin". Reports have been requested only from banks and bankers in the Second Federal Reserve District, and countries have been

omitted or grouped to avoid revealing individual accounts or the foreign position of any reporting institutions. The total of the amounts shown here represents about 75 percent of the total for these categories reported by all districts. Data previously published in this series may be found in Section IV, Table 3, in the April 1950-1953 issues of the "Treasury Bulletin".

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

---

Financial statements of corporations in which the United States Government has a proprietary interest, direct or indirect, and of certain other business-type activities of the United States Government are submitted quarterly to the Treasury Department, in accordance with Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942. Data from these reports, adjusted for consistency where necessary, are compiled in a series of tables covering balance sheets, statements of income and expense, and statements of source

and application of funds, which are published in the "Treasury Bulletin".

The balance sheet tables for December 31, 1953, appear in this issue. They are published for each quarter. The tables on income and expense and source and application of funds are published at six-month intervals, and cover the periods ending June 30 and December 31. They appear in each case in a Bulletin issue subsequent to that carrying the corresponding balance sheet data.
