Treasury Financing Operations

Note Offered for Cash and Refunding

Preliminary details of an offering on May 3 of 15-month 2 percent Treasury notes were announced by the Secretary of the Treasury on April 28. The notes, which are dated May 17, 1955, and will mature August 15, 1956, were issued for cash in the amount of \$2-1/2 billion, or thereabouts, and in exchange for the 1-1/8 percent certificates of indebtedness which matured May 17, 1955, in the amount of \$3.9 billion. The cash offering was made to raise funds to pay off the May and June maturities of Treasury savings notes, Series B, which amount approximately to \$2.3 billion. Subscription books for this offering were open on May 3 only. For receipt of exchange subscriptions the books were opened on May 3 and were closed at the close of business on May 5.

Subscriptions to the cash offering were approximately \$4.0 billion and allotments \$2.5 billion. Subscriptions in excess of \$100,000 were allotted 62 percent but not less than \$100,000. Those for \$100,000 or less were allotted in full. Exchanges amounted to nearly \$3.2 billion, leaving \$712 million to be paid in cash. Of the \$3.9 billion of maturing certificates, 60 percent were held by reporting commercial banks and Federal Reserve Banks as of the end of February. The ownership figures for February 28 are the latest published for holdings of commercial banks reporting to the Treasury on the ownership of Government securities.

On the cash offering, commercial banks, which for this purpose are defined as banks accepting demand deposits, were permitted to subscribe for their own account without deposit, but were restricted in each case to an amount not exceeding one-half of the combined capital, surplus, and undivided profits of

the subscribing bank as of December 31, 1954. A payment of 10 percent of the amount of notes subscribed for, not subject to withdrawal until after allotment, was required on subscriptions from all others. Commercial banks qualified as depositaries were permitted to make payment for the new notes by credit in Treasury tax and loan accounts.

Commercial banks and other lenders were requested to refrain from making unsecured loans or loans collateralized in whole or in part by the notes subscribed for, to cover the 10 percent deposits required to be paid when subscriptions were entered. A certification by the subscribing bank that no such loan was made was required on each subscription entered by it for account of its customers. A certification that the bank had no beneficial interest in its customers' subscriptions, and that no customers had any beneficial interest in the bank's own subscription, also was required.

The securities were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000. They are designated 2 percent Treasury notes of Series B-1956.

Treasury Bills Refunded

Treasury 91-day bills maturing in April were refunded in full in the total amount of \$6.0 billion. They were refunded by four new issues of 91-day bills of \$1.5 billion each, the approximate equivalent of the corresponding weekly maturity. The average rates of discount on the new issues were 1.465 percent for April 7; 1.652 percent for April 14; 1.664 percent for April 21; and 1.697 percent for April 28.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin," in the tables on "Offerings" and "Dis-

position," respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills."

Source: Actual figures are from the old Daily Treasury Statement through the calendar year 1953 except as noted; actual figures on the new reporting basis (see footnote 6) are from the new Daily Treasury Statement and the new "Monthly Statement of Receipts and Expenditures of the United States Government"; estimates are based on the 1956 Budget document released January 17, 1955, including effects of proposed legislation. More detailed information with respect to the figures on this page is given in succeeding tables.

1/ Gross receipts less appropriations of receipts to the Federal Old-Age and Survivors Insurance Trust Fund and the Railroad Retirement Account, and refunds of receipts.

2/ Transactions of the Foreign Economic Cooperation Trust Fund, established under Section 114 (f) of the Economic Cooperation Act of 1948 (62 Stat. 150), are consolidated with budget expenditures. Beginning with the fiscal year 1951, net investments of wholly owned Government corporations and agencies in public debt securities are excluded from budget expenditures, and are included with other such investments under "Trust account and other transactions."

3/ Consists of transactions of trust and deposit funds, investments of Government agencies in public debt securities, and sales and redemptions of obligations of Government agencies in the market; excess of receipts, or expenditures (-).

4/ For checks and interest coupons outstanding and telegraphic reports from

Federal Reserve Banks, and beginning with the fiscal year 1954, also deposits in transit and cash held outside the Treasury; net increase, or decrease (-).

5/ For current month detail, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: March 28, 1942, \$125 billion; April 11, 1943, \$210 billion; June 9, 1944, \$260 billion; April 3, 1945, \$300 billion; June 26, 1946, \$275 billion; and August 28, 1954, \$281 billion (temporary increase ending on June 30, 1955). Guaranteed securities are included under the limitation beginning April 3, 1945. Savings bonds are included at current redemption value beginning June 26, 1946; prior to that time they were included at maturity value. In the debt outstanding, savings bonds are carried at current redemption value.

6/ New reporting basis as announced February 17, 1954 (see April 1954 "Treasury Bulletin," page A-2). The new Daily Treasury Statement shows cash deposits and withdrawals in the account of the Treasurer of the United States. The new Monthly Statement includes agency transactions not cleared through the Treasurer's account, and shows receipts when they are received by collecting officers and expenditures when checks are issued or payments are made by disbursing officers.

BUDGET RECEIPTS AND EXPENDITURES

Footnotes to Tables 1 through 5

- 1/ For further detail, see tables under "Internal Revenue Collections."
- 2/ Breakdown was not made in the Daily Treasury Statement for years prior to 1954.
- 3/ Beginning January 1951, the distribution of receipts between individual income taxes and old-age insurance taxes is made in accordance with provisions of Sec. 109 (a) (2) of the Social Security Act Amendments of 1950, for appropriation to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 11).
- 4/ Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 1400-1432) and, beginning with the taxable year 1951, tax on self-employed individuals under the Self-Employment Contributions Act (26 U.S.C. 480-482).
- 5/ Taxes on carriers and their employees under the Railroad Retirement Tax Act (26 U.S.C. 1500-1538).
- 6/ Tax on employers of 8 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 1600-1611).
- 7/ Through 1953, contributions to the Railroad Unemployment Insurance Administration Fund were carried in the Daily Treasury Statement as miscellaneous receipts, while the 1956 Budget document includes them in employment taxes for those years. This difference in classification accounts for the difference in figures from the two sources. After 1953 the contributions are credited direct to the trust account. For amounts of the contributions, see "Treasury Bulletin" for February 1954, page 7.
- 8/ As announced February 17, 1954 (see April 1954 "Treasury Bulletin," page A-2); see also page 1, footnote 6.
- 9/ In the 1956 Budget document, internal revenue taxes not otherwise classified are included in miscellaneous receipts.
- 10/ Include proceeds from sale of surplus property and from Government-owned securities; seigniorage; deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5); and railroad unemployment insurance contributions for administrative expenses through 1953, after which they are carried as trust account receipts under the Railroad Retirement Board.
- 11/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950, approved August 28, 1950 (64 Stat. 477), changed in certain respects the basis of transferring the appropriated funds to the trust fund. Beginning January 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury pursuant to the provisions of Sec. 109 (a) (2) of the Amendments of 1950, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
- 12/ Exclude the Government's contribution for creditable military service under the act of April 8, 1942 (56 Stat. 204). Beginning 1952, amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371), and transfers are made currently. Previously, annual appropriations were based, in effect, on estimated tax collections, with any necessary adjustments made in succeeding appropriations.
- 13/ Interest on refunds is included in Table 5 under "Other."
- 14/ Expenditures are "net," after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts. They exclude net investments of wholly owned Government corporations and agencies in public debt securities beginning 1951 (when these investments were grouped with those of trust funds and accounts), and public debt retirements chargeable to the sinking fund, etc., under special provisions of law. Payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and disposition of earnings are excluded from both receipts and expenditures. Further information on these capital transfers may be found in the 1953 Annual Report of the Secretary of the Treasury, page 332.
- 15/ Beginning November 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States.
- 16/ Consists of Veterans' Administration expenditures, including the direct loan program.
- 17/ Includes transactions relating to the Foreign Economic Cooperation Trust Fund (see page 1).
- 18/ Net transactions by the Departments of the Air Force and the Army relating to "Deposit fund accounts" are included under "Trust Account and Other Transactions" instead of "Budget Receipts and Expenditures," beginning 1952.
- 19/ A more detailed breakdown became effective in the Monthly Statement for March 1955 which resulted in a shift between "Economic and technical assistance" on one hand and "Mutual military program" and "Other" national security (direct force support) on the other. Figures for the reclassified items are not available by months for July through February, however, and are included only in the cumulative figures shown for the fiscal year to date.
- 20/ Includes retired pay for the military services beginning September 1949 and interservice activities beginning July 1954.
- 21/ Excludes certain expenditures made on behalf of the Department of the Air Force out of 1949 and prior year appropriations to the Department of the Army.
- 22/ Includes certain expenditures on behalf of the Department of the Air Force (see footnote 21).
- 23/ Consists of expenditures from funds appropriated to the President under the Mutual Security Act, approved October 10, 1951 (22 U.S.C. 1651), and the preceding Economic Cooperation Act; and Greek-Turkish assistance.
- 24/ Includes expenditures of the Atomic Energy Commission.
- 25/ Consists of payments under the Armed Forces Leave Act, expenditures for surplus property disposal, and in 1947 also national defense expenditures of the Reconstruction Finance Corporation and certain other agencies; beginning 1954, consists of direct force support.
- 26/ Excludes Bank expenditures under the Mutual Security Act and the preceding Economic Cooperation Act of 1948, as amended.
- 27/ Consists of expenditures from funds appropriated to the President under the Mutual Security Act, and the preceding Economic Cooperation Act.
- 28/ After 1952, expenditures for this purpose are not shown separately in monthly reports to the Treasury; those made by the Department of State (the greater part, currently) are included under that heading in this table; those made by other agencies (principally the Department of the Army) are not included in this table.
- 29/ Consists of expenditures under the Bretton Woods Agreements Act (1947); credit to the United Kingdom (1947 and 1948); expenditures of the United Nations Relief and Rehabilitation Administration; relief to countries devastated by war; various other foreign relief programs; international children's emergency funds; and loan for construction and furnishing of United Nations Headquarters.
- 30/ Consists of expenditures of the Department of Health, Education, and Welfare except the Office of Education, and of the corresponding component organizations prior to the establishment of this department on April 11, 1953; the Government's contribution under the Railroad Retirement Act for creditable military service, and certain other Railroad Retirement Board expenditures through 1953; and also, beginning 1950, the school lunch program under the Department of Agriculture.
- 31/ Consists of expenditures of the Housing and Home Finance Agency, and of component organizations prior to the establishment of this agency on July 27, 1947; Federal Civil Defense Administration; and disaster relief.
- 32/ Consists of expenditures of the Department of Agriculture except the Forest Service and the school lunch program; and of the Farm Credit Administration.
- 33/ Consists of expenditures of the Department of the Interior; the Tennessee Valley Authority; the Corps of Engineers in the Department of the Army (river and harbor works and flood control); and the Forest Service in the Department of Agriculture.
- 34/ Consists of expenditures of the Civil Aeronautics Administration, Civil Aeronautics Board, Maritime activities and predecessor agencies, and Bureau of Public Roads, all now in the Department of Commerce; the Coast Guard in the Treasury Department; and the Post Office Department. Figures prior to 1954 include net expenditures of certain working funds of the Department in addition to the Postal Service Fund (advances to cover the postal deficit). Beginning with 1954, net expenditures of the Department, including the Postal Service Fund, are on the basis of cash receipts and expenditures recorded in the accounts of the Department.
- 35/ Consists of expenditures of the Department of Commerce except those included under "Transportation and communication"; the Reconstruction Finance Corporation (as in liquidation by the Treasury Department beginning July 1954); Federal Facilities Corporation beginning July 1954; the Small Business Administration; the Economic Stabilization Agency; and funds appropriated to the President for the expansion of defense production.
- 36/ Includes expenditures for executive departments and other agencies not included elsewhere and for legislative and judicial functions. Less than \$500,000.

TREASURY CASH INCOME AND OUTGO

The cash income and outgo of the Treasury shown in Table 1 consist of cash deposits and withdrawals in the account of the Treasurer of the United States. This is in line with the new reporting basis of the "Daily Statement of the United States Treasury." Effective February 17, 1954, the Daily Treasury Statement shows deposits and withdrawals in the account of the Treasurer of the United States. Budget results and trust account and other transactions are now reported once each month in the "Monthly Statement of Receipts and Expenditures of the United States Government" (see page A-2 in the April 1954 issue of the "Treasury Bulletin").

Figures for previous fiscal years heretofore published have been revised to the basis of deposits and withdrawals by eliminating corporation and agency transactions included in the old Daily Statement but not cleared through the Treasurer's account. The cash borrowing or repayment of borrowing as now shown is likewise based only on transactions cleared through the Treasurer's account.

In Tables 2, 3, and 4 is given the reconciliation of the cash transactions with the budget and other transactions which formerly appeared in the old Daily Statement and now appear in the new Monthly Statement. These tables

follow the method used previously for deriving cash income and outgo from the transactions carried in the old Daily Statement. Some rearrangement has been made in the table setup, principally to combine all receipts and all expenditures instead of deriving separately the cash budget and trust account transactions.

Reporting bases for the two statements differ in two respects. Certain corporation and agency transactions in securities which are not effected through the account of the Treasurer of the United States are included in the Monthly Statement but excluded from the Daily Statement. These are eliminated from the Monthly Statement figures in arriving at the cash transactions shown in the tables which follow. Other differences arise because of the differences in timing, as between checks issued (Monthly Statement) and checks paid (Daily Statement) for expenditures or between collections (Monthly Statement) and clearances (Daily Statement) for receipts. Thus an individual transaction near the end of a month may be included during that month in one statement but not until the following month in the other. These differences tend to correct themselves over a period of time, but for a given reporting date it is necessary to include an adjustment figure to cover them.

Sources: Actual figures through 1952 are based on the old Daily Treasury Statement; actual figures on the new reporting basis are based on the new Daily Treasury Statement, except the memorandum item, which is from the new "Monthly Statement of Receipts and Expenditures of the United States Government"; estimates are based on the 1956 Budget document, released January 17, 1955, including effects of proposed legislation. Figures in the first four columns of this table may differ somewhat from those originally published in the Daily Treasury Statement because of subsequent reclassification of certain transactions.

- ^{1/} Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash budget receipts shown in these tables, but is excluded from the Bureau of the Budget figures for "Receipts from the public."
 - ^{2/} In addition to this decrease in the balance in the Treasurer's account, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

2/ The issuance of these securities is treated as a noncash budget expenditure at the time of issuances and as a cash budget expenditure at the time of cash redemption; net issuances, or redemption (-).

3/ See Table 3, footnote 3.

4/ The issuance of these securities is treated as a noncash deduction from

budget receipts at the time of issuances and as a cash deduction at the time of cash redemption; net issuance, or redemption (-).

5/ Net investments of Government agencies in public debt securities and net sales of obligations of Government agencies in the market.

6/ Includes borrowing through Postal Savings System.

7/ For explanation, see headnote.

* Less than \$500,000.

Footnotes to Table 3

1/ For further detail, see "Budget Receipts and Expenditures," Table 2.

2/ Includes net investments of Government agencies in public debt securities and net redemptions in the market of securities of Government agencies (see "Trust Account and Other Transactions," Table 1).

3/ The United States subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

4/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

5/ Prior to 1951, consists of net investments of corporations not wholly owned; beginning with that year, includes also those of wholly owned corporations and agencies which for prior years are included in budget expenditures.

6/ For explanation, see headnote.

7/ Treated as noncash expenditures at the time of issuances and as cash expenditures at the time of redemption; net issuances, or redemption (-).

8/ For explanation, see headnote. Excess of expenditures on Monthly Statement basis is deducted.

9/ As shown in the "Monthly Statement of Receipts and Expenditures of the United States Government"; consists of changes in checks and interest coupons outstanding and telegraphic reports from Federal Reserve Banks, and beginning with the fiscal year 1954, also changes in deposits in transit and cash held outside the Treasury.

10/ Net investments of Government agencies in public debt securities and net redemptions of obligations of Government agencies in the market.

11/ Since deposit funds (net) are included under trust account expenditures, the interest received by corporations not wholly owned is carried there as a negative expenditure. Thus when budget expenditures and trust account expenditures are combined, the payment and receipt of this interest offset each other. Payment of interest to wholly owned Government corporations is offset because it is treated as a negative budget expenditure when received by the corporations.

* Less than \$500,000.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For

details of these changes see "Treasury Bulletin" for May 1952, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. The Treasury invited holders of Series F and G which began to mature in January 1954 to reinvest the proceeds in other series of savings bonds. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin."

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes total value of redemptions not yet classified between matured and unmatured bonds.

5/ Adjustments have been made in issues and redemptions of Series E, H, F, G, J, and K in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the Daily Treasury Statement. The amounts involved are as follows: \$18,184,157.50 for issues of Series E and H and \$16,669,880.50 for issues of Series F, G, J, and K; and \$34,854,046.00 for unclassified retirements.

6/ A change in procedure, beginning in June 1954, for processing redeemed

savings bonds has resulted in a high level of redemptions not yet classified between matured and unmatured bonds. This increase temporarily obscures the relationship between the redemption columns showing sales price and accrued discount in Tables 2 through 4 and also the relationship between the matured and unmatured sections of Table 4. (See also footnote 4.) The subsequent distribution of this high level of unclassified redemptions may be large enough in any month to show redemptions of matured bonds for a series in Table 4 which are greater than the total redemptions of that series as shown in Table 3, and to show a negative in the unmatured section of Table 4.

7/ Sales began June 1, 1952.

8/ Comparable data are not available prior to January 1950.

9/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued as follows: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; Savings Series A from May 15, 1951, through May 14, 1953; Savings Series B from May 15, 1953, through September 25, 1953; and a new Savings Series C from October 1, through October 23, 1953, when sale of these notes was suspended. Details concerning terms and conditions for purchase and redemption and information on investment yields of Savings Series C appear in the October 1953 issue of the "Treasury Bulletin," page A-1.

Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin," and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate years.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Amount issued on April 1, 1955, was \$3,210 million.

2/ Tax Anticipation Series.

3/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.

4/ Yield to first call. Yields are computed to call date when the price is above par and to maturity when the price is at or below par.

5/ Included in the average of taxable Treasury bonds due or callable from 12 to 20 years beginning April 15, 1953, as shown under "Average Yields of Long-Term Bonds."

6/ Included in the new long-term taxable Treasury bond class due or callable 20 years and after, as shown under "Average Yields of Long-Term Bonds."

YIELDS OF TAXABLE TREASURY SECURITIES, MAR. 31, 1955

Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

1/ Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of the mean of closing bid and ask quotations. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin."

2/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: April 1952 through March 1953, bonds neither due nor callable for 12 years; October 1941 through March 1952, bonds neither due nor callable for 15 years. For a discussion of the composition of these Treasury bond averages, see the "Treasury Bulletin" for March 1944, page 58.

3/ Moody's Investors Service average of Aaa corporate bonds. This series supersedes the Treasury average of high-grade corporate bonds previously shown in this table, which was discontinued after March 1953.

4/ Average covers 8-1/2 months beginning April 15, the inception date of this series.

5/ The long-term taxable Treasury bond average was revised beginning April 1, 1952, see footnote 2. The old average for April 1952 was 2.62 percent.

6/ Includes the 3 1/2 bonds of February 15, 1955, first quoted on January 28, 1955.

Source: Internal Revenue Service reports for detail of collections by type of tax; Daily Treasury Statement for budget receipts from internal revenue through the fiscal year 1952, and the new "Monthly Statement of Receipts and Expenditures of the United States Government" for receipts thereafter. Certain detail by type of tax is available only on the basis of returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service.

^{1/} Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same periods arise because of differences in the time when payments are included in the respective reports. Tax payments are included in budget receipts when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many excises, these taxes are paid currently into Treasury depositories and the depository receipts, as evidence of such payment, are attached to quarterly returns to the Internal Revenue Service. Under this procedure, the payments are included in budget receipts in the month in which the depository receipts are issued to the taxpayers.

Revised accounting procedures effective July 1, 1954, extended the same practice to Internal Revenue Service collection reports.

- ^{2/} Monthly figures include old-age insurance tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures exclude this tax, on the basis of estimates beginning 1952 (see footnote 3), and it is included under "Old-age insurance taxes."
- ^{3/} Withheld income tax and old-age insurance taxes on employers and employees are paid into the Treasury in combined amounts beginning January 1951. In Internal Revenue Service reports, current collections have not been separated as to type of tax but the breakdown shown for fiscal years beginning 1951 is based on estimates made in accordance with provisions of Sec. 109 (a) (2) of the Social Security Act Amendments of 1950, for appropriations to the Federal Old-Age and Survivors Insurance Trust Fund.
- ^{4/} New reporting basis beginning with the fiscal year 1953; for explanation, see footnote on page 1.
- ^{5/} Beginning July 1954, collections shown include undistributed depository receipts. For the amount of such receipts, see Table 2. It will be noted that for excise taxes the undistributed depository receipts are included in the total only.
- ^{6/} Repealed for years ending after June 30, 1945. Beginning 1951, included under "Miscellaneous taxes."

INTERNAL REVENUE COLLECTIONS BY PRINCIPAL SOURCES

*Beginning July 1954, includes undistributed depositary receipts (see Table 2). The whole amount of such receipts for excise taxes is included under "Other excise taxes."

Source: Internal Revenue Service reports for detail of collections by type of tax; Daily Treasury Statement for budget receipts from internal revenue through the fiscal year 1952, and the new "Monthly Statement of Receipts and Expenditures of the United States Government" for receipts thereafter. Certain detail by type of tax is available only on the basis of returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service.

1/ Includes excess profits taxes on Army and Navy contracts imposed by the Vinson Act as amended (34 U.S.C. 496), and income tax on business income of exempt organizations imposed by the Revenue Act of 1951, approved October 20, 1951.

2/ Includes old-age insurance tax on self-employment income, imposed by the Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950. The tax is levied and collected as part of the individual income tax beginning with the taxable year 1951. For estimated fiscal year breakdown, see Table 1.

3/ Beginning January 1951, withheld income tax and social security employment taxes on employers and employees are paid into the Treasury in

combined amounts, pursuant to the Social Security Act Amendments of 1950. For estimated fiscal year breakdown, see Table 1.

4/ Under revised accounting procedures effective July 1, 1954, tax payments made to banks under the depositary receipts system are included in Internal Revenue Service reports of collections in the month in which the depositary receipts are issued instead of the month in which tax returns supported by the depositary receipts are received in internal revenue offices, as was the previous practice. The "Undistributed depositary receipts" included in the collections represent the amount of depositary receipts issued during the period less the amount received with returns. In the case of excise taxes, it is not possible to classify the depositary receipts by type of tax until the returns are received. Accordingly, the amount of such undistributed depositary receipts is included only in the total of excise taxes.

5/ Applies to diesel oil used in highway vehicles.

6/ See Table 1, footnote 1.

1/ New reporting basis; for explanation, see footnote on page 1.

* Less than \$500.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin."

pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data in five tables which appear at less frequent intervals. Table 1, short-term foreign liabilities and claims reported by non-financial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term foreign liabilities and claims reported by banks and bankers, and Table 3, estimated gold and short-term dollar resources of foreign countries, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually in the April issue.
