## Treasury Financing Operations

## March Reiunding Operation

In accordance with an announcement by the Secretary of the Treasury on March 1, 1956, holdere of the $1-5 / 8$ percent notes, Seriee A-1956, maturing March 15, 1956, were 1 nvited on March 5 to bubscribe for an lssue of ll-month and lo-day $2-5 / 8$ percent certificates of indebtednese, and for an additional emount of the $2-7 / 8$ percent Treasury notes (originally lesued December 1 , 1955) maturing June 15, 1958. Holders of the 1-1/2 percent noter, series EA-1956, maturing April 1, 1956, were invited to subscribe to the new certificates. (This was the first maturity of the EA or EO series of notes which began to be 1esued in 1951 in exchange for the nonmarketable 2-3/4 percent bonde, Investment Series B-1975-80.

Interest was adjusted as of March 5 with respect to exchanges of the maturing notes of either series, and acorued interest to that date was pald to subscribers for the certilicates following acceptance of the notea. On exchanges for the additional amount of $2-7 / 8$ percent notes, accrued interest from December 1, 1955, to March 5, 1956, was charged, interast accrued to that date on the notes maturing March 15 was credited, and ouhscribere were paid the difference.

The new certificatee bear interest from Marcb 5, 1956, at the rate of $2-5 / 8$ percent per annum, paysble with the principal at maturity on February 15, 1957. They were 1 ssued in bearer form only, and in denominations of $\$ 1,000, \$ 5,000$,

The caah income and outgo data appearing in the "Treasury Bulletin" have been revised, beginning with the February 1956 1asue, to a basia conalatent with receipts from and paymenta to the public as derivad in tha 1957 Budget of the United Statea, Special Analysis A. Reconcillation to caah deposits and withorawals in the account of the Treaaurer of the United Statea is ghown on tho same basia as in the Budget document. There ia alao ahown tha amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classiricationa are made avallable month by montb. Figures for back yeara have been reviaed where neceasary in order to make tbem as nearly comparable with the 1957 Budget claselfications aa available data will permit. For thla reason certain of the figures differ gomewhat from those published in earller Budget documents as well as in the Bulletin.

The Budget series of cash transactions 18 designed to provica information on the flow of money between the public and the Federal Government as a whole, and therefore includes tranaactions not cleared through the Treasurar'a account. Receipts and paymenta include tranaactions both in budget accounts and in trust and deposit fund accounta. Operations of Govermment-aponsored enterprises are included In paymenta on a net basia as reflected in Treasury reporta. Major intragovermental tranaactions which are reported as both expenditures and receipts are eliminated from both. Noncaah items which reprasent accrued obligations of the Government to make paymenta in the future are al80 eliminated from expenditurea but are added later when aotual payments are made. Recelpta from the exercise of monetary authority (moatly seignlorage on allver) are excludec as not
representing cash received from the public. Federal cash borrowing from the public includea nat borrowing by the Traaaury through public dabt transactions and aleo not borrowing by Government agenolea and Government-aponsored enterprises through sales of tbeir own aecuritias. It excludes changes in the public debt which do not repreaent direct caah borrowing from the public. The nat effact of all thesa transactions with the public $1 a$ reflected in changea in the cash balance in the Treasurer's account and in caah held outaide the Traasury.

Cash tranaactiona through the Treasurer' a account are gimilar in general concept to those included in the Budget aerias, but are 11 mited in coverage to tranaactiona whioh affect the balance in that account. On the other band, they include receipta from the axercise of monetary authority, which are excluded from recelpts from the public in the Budget aeries.

Beginning with ilgurea for the fiacal jear 1953, tha series of tranaactions with the public is based on the "Monthly Statement of Receipta and Expenditures of the Unitad States Govermment, " which 1 a complled from reporta by all colleoting and diaburaing officars and includes thoae tranaactiona not cleared through the Treasurer's account. Cash depoaits and witharawala in the Treasurer's account, beginning with the 11 guraa for the same year, are reportad in dally Treasury atatements. For those yeara prior to 1953 both cash tranaactions saries are based on a aingla source, namely, the earlier basis of dally Treasury atatementa which reportad aeparata classificationa for budget reaulta, trust account trar. actions, atc.

Table 4.- Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness - (Continued)

United States gavings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Serles $E, F$, and $G$ were flrst offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at lopecifled rates of interest accmial; or to exohange them lior Series $G$ bonds. A number of changes became offective May 1, 1952. The princlpal ones were: The rate of Interest accrual on Series $E$ was increased, especially for the near term, with corresponding ohanges in extended Series $E$; and Series $F$ and $G$ were replaced by two new 1ssues, Series $J$ and $K$, aleo at higher interestrates. A now current-inoome bond, Series $K$, eimilar in intereet "return to Series $E$, was offered beginning June 1 . For
dotalls of these changes see "Treasury Bulletin" for May 1952, page A-1. Series $F$ and $O$ began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, wee the May 1953 1esue, page A-1. The Treasury invited holders of Series $F$ and $G$ which began to mature in January 1954 to reinvest the proceed in other series of savings bonds. In the tables which follow, Series $A-F$ and $J$ sales are inoluded at 18 bue price and total redeaptions and amounts outstanding at ourrent redemption valuer. Series $G$, $H$, and $K$ are included at faoe value throughout. Matured bonde whioh have been redeomed are included in redemptions. Matured $F$ and $G$ bonds outstending are included in the interest-bearing debt until all bonds of the annual eeries have metured, when they are transferred to matured debt upon which interest has osased.

Sounce: Internal Revenue Service reporte for detall of collections by type of tar; dally Treaeury etatement for budget roceipte from intermal reveme through the ilecal year 1952, and the "Monthly Statement of Receipte and
Expendituree of the United Statee Goverment" for receipte thareafter.
Certain detail by type of tax ie available only on the beeie of retirns filed with the Internal Revenue Service. The figuree ehown include collections for crodit to epecial accounte for certain ieland poeseseions, as reported by the Internel Revenue Service. Begiming with tbe flecal year 1955, they include the amounte of tar collected in Puerto Rico upon articlee of merchandiee of Puerto Ricen manufacture coming into the Unsted States. Figuree for 1954 heve been revieed to the eame basie. Figures for previoue yeare include only amounte collected at porte of entry into the United statee.
1 Differencee batween the amounte of internal revenue raported by the Intertal Revenue Service ae collections for given periode and the amounte reported in Treaeury etatemente ae budget receipte for the oame periode aroee becauae of differences in the time when paymente ereincluded in the reepoctive reporte. Tax paymente are included in budget recelpte when they are reported ae credite to the account of the Ireasurer of the United Stetes. Prior to July 1954, they vere included in Intermal Revenue Service collection reporte efter the returne to which they applied had been roceived in internal revenue officee. Jader procedure begum in 1950 with withheld incom tax and old-age ineurence taxee and later extended to railroad retirament taree and many excieee, theee taxes are pald currently into 2reasury depositarias and the depoaitary recelpte, as evidence of euch payment, are attached to quarterly returne to the Intermal Revenue Serrice. Under thise procedure, the pejmente are included in budget receipte in the month in which the depositery recelpte are ieeved to the terpayere. Revieed accounting proceduree affective

July 1, 1954, extended the eame practice to Internal Revenue Service collection reporte.
2/ Monthly flguree include old-age ineuranse tar on eelf-employment income, which ie levied and collected as part of the individual incone tax beginniag with the taxable year 195l. Fiecal jear figures exclude thie ter, on the beele of aetimatoe begiming 1952 (eae footnote 3 ), and it ie included under "Old-age ineurance (sae foo
taxee."
3/ Withheld incone tar and old-age Ineurance taxes on employare and employeee are paid into the Treasury in combined amounte beginnine January 1951. In Internal Revenue Service reporte, current collections have not been eeparated ae to type of tar but the breakdom ahom for fiecal yoare begiming 1951 ie based on eetimates made in accordance with provisions of Sec. 109 (a) (2) of the Social Security Act Amendmente of 1950, for transfer of tar recelpte to the Federal Old-Age and Survivore Insurance Trust Fund.
4) New reportiag baele beginning with the fiecal year 1953; for axplanation, see footnote on page 1.
5 Beginming with the flecal year 1955, collections show include undietributed depoeitery rece1pte (eee Teble 2). For exciee taxee theee receipts are incluied in the totel only.
6/ Repealed for years ending after June 30, 1945. Beginning 1951, included under "Miecellaneous excies taxee.
7) Detail ie reported by quartere beglnaing with the flecal year 1956; for monthly totals, eee table 2.

Data relating to capital movements between the United States and forsign countries have bsen collsotad since 1935, pursuant to Executive Ordar 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Trasaury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regulsrly in the "Treasury Bulletin." Supplementary information is published at less irequent intarvala. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerna in the United states are mads initially to tha Federal Reserve Banke, which forward consolldated 11gures to the Treasury. Beginning April 1954, dsta reportsd by banks in the Tarritories and possessions of the United States are includad in the published data.

Ths term "foreigner" as used in these reports covers all institutions and indiviousla domiciled outside the United States and its Territories and possessions, the official institutions of foreign countriea, wherever such institutions may be located, and internstionsi organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 1ssue of the "Treasury Bullatin," pages 45-47. As a result of ohanges in presentation introduced in that issue, not all breakdowns previously published will be exsctly comparable to those now presented.

The ilrst threa sections which follow are published monthly. They provide summaries, by periods and by oountries, of data on short-term banking liabilities to and claims on forelgners and transactions in long-tarm securities by forelgners, and present detalled breakdowns of the lateat available preliminary data.

Section IV provides aupplementary dats in five tablea which sppear at less fraquent intervals. Table 1 , shortterm foreign liabilities and olaims reported by nonfinancial concerns, is publiahed quarterly in the January, April, July, and Ootober 1ssues of the Bulletin. Tabla 2,
long-tarm loreign lisbilities and claime reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdinge of foreign countries and international institutions (rsvised in this issus as described below), are published quartsrly in ths Karch, Juns, Saptember, and Daoember 1ssues. Table 4, forsign credit and dablt balances in broksrage accounts, appears semiannually in the Karch and Septamber 1asues. Tabla 5, short-term liabilitiesto forelgnars in countrios and arsae not ragularly reported separately by banking institutions, is prssented annually in the April issus.

Table 3 in Section IV has been revised in this issue to show two saries for each pariod, instead of one as previously published. In order to present comparable revisad dsta for pset periods in this lasus, Table 3 ahows data as of the ond of yesrs 1949-1953, and Table 3 s covers quarterly data from Dacember 1954 through December 1955. The serlss, "Gold and short-tarm dollara" of foreign countries, includes estimated official gold holdings, and offioial and private short-term dollar balances (principally deposits and U. S. Government securitieswith an original maturity of one year or less) as reported by Unitad states banks and as shown in gection II, Table 1 , and Section III, Table 1. This series differs from that publisked in previous lasues by the exclusion of U. S. Government bonds and notes maturing within 20 montha after date of purchase. A now serles is introduced for the firat time showing estlmated foreign holdings of $\mathbf{U}$. S. Government bonde and notes (original maturity of over one year), based on data on holdings obtained in a recsnt survey of selacted banks In the United States adjusted on the basis of monthly reports from United States banks and brokers of securities transactions by foreigners. This now series includes the data on U. S. Government bonds and notes maturing within 20 months after date of purchasa which were formerly part of the saries on gold and short-term dollar resources. It is bellaved that the serise on estimated foreign holdings of U. $S$. Government bonds and notes provides a useful supplemsnt to the series on forelgn gold and shortterm dollar holdinga.
