## Treasury Financing Operations

## Call before Maturity

On May 14, 1956, the Treasury Department issued notice that the 2-3/4 percent Treasury bonds of 1956-59, dated September 15, 1936, due September 15, 1959, are calleả for redemption on September 15 , 1956, when interest on these bonds will cease. There are $\$ 982$ million of the issue outstanding.

The announcement stated that holders may, in advance of the redemption date, be offered the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will be given.

91-Day Bills Refunded
Four issues of weekly Treasury bills matured in April in the total of $\$ 6.4$ billion. They were refunded in full by new 91 -day issues in the amouriss of $\$ 1.6$ billion each, the approximate equivalents of those maturing. The average rates of disccunt on the new issues were 2.397 percent for April 5; 2.497 percent for April 12; 2.769 percent for April 19 ; and 2.788 percent for April 26.

Note: Details of Treasury market financing operations are shown elsewhere in this 1ssue of the "Treasury Bulletin," in the tables on "Offerings" and "Diaposition," respectively, of marketable issues of bonds, notes, and certificates of indsttedness, and in the table "Offerings of Treasury B11le."

The cash income and outgo data appoaring in the "Treasury Bulletin" have been reviaed, beginning with the February 1956 1seue, to a basis consistent with recelpte from and payments to the public as derived in the 1957 Budget of the United Statea, Special Analyala A. Reconcillation to cash deposita and withdrawals in the account of the Treasurer of the United states is shown on the aame basia as in the Budget document. There is also shown the amount of net cash borrowing frem, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classificationa are made avallable month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with the 1957 Budget claselfications as avallable data will perait. Far thia reason certain of the flgures differ somewhat from those publiahed in earller Budget documenta as well as in the Bulletin.

The Budget berles of cash tranaactions is designed to provice information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Recelpts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Tressury roports. Major intragoyermmental transactions which are reportad as both expenditures and receipts are eliminated fram both. Noncash items which reprasent accrued obligations of the Government to make payments in the future are alao eliminated from expenditures but are added later when actual payments are made. Receipts from the exercise of monetary authority (mostly selgniarage on sllver) are excluded as not
representing cash recelved from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transaotions and also net borrowing by Government agencies and Government-sponsored enterprises through eales of their own securities. It excludes changes in the public debt which do not repreaent direct cash borrowing fram the publio. The net effect of all these tranaactions with the public is reflected in changes in the balance in the Treasurer'a account and in cash held outalde the Treasury.

Cash transactions through the Treasurer's account ar bimilar in general concept to those includod in the Budgat serlea, but are limited in coverage to transactions whioh affect the balance in that account. On the other hand, they include recelpts from the oxerciae of monetary authority, which are excluded from recelpts from the public in the Budget a日riea.

Beginning with figure for the fiacal year 1953, the serles of tranaactions with the public 18 based on the "Monthly Statement of Recelpta and Expenditures of the United States Government, " which 18 camplied from reporta by all collecting and disbureing officera and includes those transactions not cleared through the Treasurer's account. Cash depoaits and withdrawals in the Treasurer's account, beginning with the figures for the aame year, are reported in dally Treasury statementa. For those yeara prlar to 1953 both cash tranaactions aerles are based on a alngle aurce, namely, the earller basia of dally Treasury atataments which reported aeparate clasalplcationa for budget results, truat account transactions, etc.

United gtatea bavings bonda were first offered in March 1935 and began to mature in March 1945. Serles A-D were sold between March 1935 and the end of Apr11 1941, and Series $E, F$, and $G$ were first offered in May 1941. When Series $E$ began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redsem the bonds in cssh in sccordance with the originsl terms; to retain them with an extanded maturity of 10 years at specifled rates of interest accrual; or to exchange them for Series $G$ bonds. A number of changea becane effectivo May 1, 1952. The principal ones were: The rate of interest sccrual on Series $E$ was incressed, especially for the nesr term, with corresponaing changes in extendad Serles $E$; and Series $F$ and $G$ were replaced by two new 1sbues, Series $J$ and $K$, also at higher interestrates. A now current-income bond, Sories $H$, similar in interest return to Series $E$, was offered beginning June 1 . For
detaile of these changea see "Treasury Bulletin" for May 1952, page A-1. Seriee $F$ and $G$ began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May $1953188 u e$, page A-1. The Tressury invited holders of Serles $F$ and $G$ which began to mature in January 1954 to reinvest the proceeds in other series of savings bonds. In the tables which follow, Serie6 $A-F$ and $J$ aales are inoluded at isbue price and total redemptions and amounts outstanding at current redemption values. SeriesG, $H$, and $K$ are included at face value throughout. Matured bonds whioh have bsen redeaned are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interset has ceased.

The figuree ohown include collections for credit to epecial accounte for certein ieland poeseseione, as reported by the Internal Revenue Service. Begirming with the fiecal year 1955, they include the amounts of tax collected in Puerto Fico upon articlen of merchanise of Puerto Rican manufecture coming into the United States. Figures for 1954 have been reviead to the esme basie. Figuree for previous yeare include only amomte collected et ports of entry into the United Statoo.
1/ Difference between the amounte of intermal revenue reported by the Intermal Revenue Service ae collections for given periode and the amounte reported in Treasury etatemente as budget receipts for the same periode arose because of ifferences in the time when peymente are included in the reepective reporte. Tax paymente are included in budget receipte when they are reported as credite to the account of the Treesurer of the United States. Prior to July 1954, they were included in Intermal Revenue Service collection reporte after the returne to which they epplied had been received in internal revenue offices. Under procedure begun in 1950 with withheld incom tax and old-age ineurence taxes and leter extended to railroed retirement taxes and many excises, these taxes ane paid currently into Treasury depositaries and the depoeitary reoeipte, es evidence of such peyment, are ettached to quarterly retuma to the Internal Revenue Service. Inder thie procedure, the paymente are included in budget receipte in the month in which the depoeitary receipte are iseued to the texpayery. Fevised accounting procedures effective

The term "foreigner" as ueed in these reports covers all institutions and indivičuals domicileó outsice the United States and its Territories and possesalons, tre official institutions of ioreign countries, wherever such institutions may be located, and international organizations. "Short-term" refere to original maturitiea of one year or lesa, and "long-term" refers to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitiona appeared in the June 1954 1ssue of the "Treaaury Bulletin,"
pages 45-47. As a result of changea in presentation introduced in that iasue, not all treakcowns previously published will be exactly comparable to those now presented.

The first three section which follow are fublished monthly. They provide sumaries, by oeriocis and by countries, of data on short-term banking liabilities to and clalms on forelgners and transactions in long-term securities by foreigners, and present detalled breakconns of the latest avallable preliminary data.

Section IV providea aupplementary data in ive takles which appear at less fraquent intervala. Table 1 , shortterm foreign liabilitiea and claims reported by nonfinancial concerna, 18 published quarterly in the January, April, July, and October 1asues of the Bulletin. Table 2, long-term foreign liabilities and claits reported by banks and bankers, and Table 3 , eatlmated gold reserves and dollar holcings of foreign countries and international inatitutiona, are published quarterly in the March, Jure, Septe-ber, snd December 1asues. Table 4, foreign credit and debit balances in brokerage accounts, appears serlannually in the March and September 1seues. Table 5. short-term liabilitiea to forelgners in countriea and areas not reeularly reported separately by banking institutiona, is presented annually in the April issue.
