Note: Where calculations have been made from unrounded figures, the details may not check to the totals shown.

Data on recespta, expenditures, and debt which appear in the "Treaary gulletin" are basect largely on two Treaaury flnancinl reporte, the "Dally Stateeent of the Urilted Statea Treasury" and the "Monthly gretarent of Recelpta and Expendituree of the Unsted States Government." Certain monetary atazatice are based at leat in part on the "Circulation statement of Unsted Stateo Money." Where theso atatements are Elven as sourcea for incividual tablea, they are cited by nate only. Thelr respec:ive reporting baeas are deacribed below. For other cata in the Bulletin, Information on sourcea or reporting bagea ia glven in connection with the tables tremeelvaa.

The monthly otatement of reoespts and expendituree wae :1ret publlahed for Fetruary 1954, and replaced the dally esatement eo the primary source of information on budget reaults and other recelpt and expenditure data clasolilied by type of account. At the same tlife, the dally etaterent waa changed to a atatement of cabh deposita and witherawale af fecting the account 0 : the Treasurer of the United Statea. Both publicatione have provided cemparative figures on thelf respective bases from the beginning of the ilacal year 1953. The announcement of February 17, 1954, with reapect to these reporting changes may be found in the April 1954 10sue of the Bulletin.

The monthiy atatement bowa all receipta and expensituree of the Government, includine thooe made from cash accounta beld ourelce the United Statas Treasury. The information 1 o oomplled irom reporta by the Treadurar of the Unlied gtates and by all othar colleoting and dibburaing agencles, including thoas agencies which maintain checking accounte in commerolal benka. Thea report oover tranaactiona recerded in the accounte of the agenciee curing the reporting period. The net of the traneactione as complied from these reporta is reconciled in the montrily etatement to changea in the balances in the Treseurer' account and in caeh held outolde tha Traeurer' aocount and changea in the public debt จutatancinz.

Reaelpte of taxea and cuovome cutiee are reported on a collectiono basio. Other recelpto aro reportad partially on a collectiono baelo and partlally on deposite beele. Expenditurea, excopt intereat on the putilic debt, are reported on the basia of chocisa $18 a u \operatorname{dof}$ cash paymenta made by disbureling offlcera. Iransactlone of an interfund or intragovernmental nature are incluced on the anme basia even though the actual lesuance of ohecise may not be involvee. Interest on the public debt la included on an eccrual basio Deginalne with :lguree for June 1955 and the f1acal year 1955. Frior to that, it wae included on a due ard payable basle. Tho ame reparting basio a that in the montriy statamant providea the flacal year flsuree for tha "reasury's "Cambined Staterent of Recelpta, Expenditures and Salanceo of the United Statea Government" anc for cotual recelpto and expenditures in the "Budget of the United Stateo Governnent."

The dally ataterent on the new basia was 1rat 180ued for February 17. 1954. In the dejusita and Wlthárawala as Bhow, no diatinction la made ab to the type of accounta (budect, trusi, etc.). The depoalte are on the basib of certilicstes of deposit cleared through the account of the Trtaaurer of ithe United gtatea. Total witharswala are on the bas 10 of checise palcor cash asnburrerents -ade owe of the Treasurer'a account. Soze of the withdriwal classiflcatlons shown are reported on the basia of malled reports of checke japued and are acjusied by meana of cleurlos ancounte to the total of checsa paid. Exeept for relatively winor arounte, noncash Interfund and other intragovernmental traneaotiona are exclucled. Tbe public debt Itoure in the cally otaterent al ao are on a "clesrance" basia, with the exception of those laauance and retsreant tranasciona reported on the basia of telegrama from Fedoral Reaerve Banka, but thby Inolude noncaah debt tranaactiona.

The cally etatement before February 17. 1954, caverec not only tranaactiona cleared through the Treasures'a account but alao certain Government agenoy trangactiona which were handed through comercial bank accounts, and inclued noncash interfund and other intragovermmental tranaactione. It provided information olmilar to that in the present dally otatement with reepect to the atatua of tha Treaburer'a acsount, ard alellar to that in the present end-of-month dally atatement with reapect to debt 16 auance, retiresent, and ancunt outatanding. Roocipta and expenditurea, however, were clasalfled by type of account, and the bugget reoulte ahown in the dally atatenent were used as the balaia for reilecing the resulta under the Prealdent's budet program as enacted by the conereas.

Recespta were on the basia of depoasta aa they cleared the Treasurer'a account. Expenditurea cleared through the Treaaurer'a eccount were reported on two aucceesive bases. Throush 1946 they were on the baila of checis pald by the Treaturer of the United States. Seginning with $1 y^{\prime}$ fo, expenditurea made through the fac:lltiea of the Treaaury Eepartment's Diviaion of Diaburaement were or the basie of checks looued, whlle certain others, principaliy thase of the Department of Eefense and ita predeceasor organizat lona, were on the basia of checia pald. Tranaactione handied trough comercial bank accounte, conalating of mariet tranaactione in public dobt and guaranteed aecurlitea, were a reported by the agenciea. Intereat on the public debt was includec on a dur and payable basia beginnine with Noverber 1949 and on a checks-paid basia prior to tiat tlme.

The circulation tatezent reflecte iramactiona throwish the Ireasure'e account which affect wonetary atooke of sold and allver and the arounte of coln and currency in the money auply of the country. It is labued later than the dally acatement, however, and the fsgree are baoed on tranaactions conammated during the reporting period even though some way not have cleared through the Freasurer'a account during that perlod.

The caah income and outco date appearing in the "Treasury Bulletin" have been revised, beginning with the February 1956 1asue, to a basis consiatent with receipte srom and paymenta to the public as derived in the 1957 Audget of the United States, Special Analysis A. Reconclliation to cash deposits and withcrawale in the account of the Treasurer of the United Statea 18 ghown on the Eame basis sa in the Budget document. There 2a also ahown the amount of net cabh borrowing from, or repayment of vorrowing to, the public. By these arrangemente, data in accorciance with the Budget clasolficstione are tade avallable month by month. Figures for back years have been revised where necessary in order to make thet as nearly comparable with the 1957 Budget claselfications as avallable cista will peralt. For this resson certain of the flgures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Budget serles of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts end psyments include transactions both In bucget accounte and in trust and deposit fund accounte. Operations of Government-eponsored enterpriees are included in paymenta on a net basie as reflected in Ireasury reporta. Major intragovemmental transactions which are reported as both expenditures and receipts are eliminated from both. Noncash ltems which represent accruea obligations of the Government to make payments in the future are also eliminated from expenditures but are added later when actual paymente are made. Receif ts from the exercise of monetary authority (mostly eelgniorage on ollver) are excluded as not
repreaenting cash received from the public. Federal cash borrowing from the public includes net borroking by the Tressury through public debt transections and siso net borrowing by Government agencles and Gorernment-aponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not repreaent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the ressury.

Cash transactions through the Treseurer's account are sirllar in general concept to those included in the Budget serles, but are limited in coverage to tranaactions which affect the balance in that account. On the other hand, they include receipts from the exerciae of monetary authorlty, which are excluded from recelpts from the public in the Budget series.

Beginning with flgures for the ilacal year 1953, the serles of transactions with the public is based on the "Monthly Statement of Receipte ana Expenditures of the United States Government," which is complled from reports by all collecting and diaburaing offlcers and includes those tranasctiona not clesred through the Treasurer's account. Cash deposits and withdrawals in the Treasurer's account, beginning with the figuras for the aame year, are reported in dally Treasury atatements. For those yeare prior to 1953 both cash transactions serles are bsece on a alngle aource, namely, the earller basis of dally Treasury statementa which reported aeparate claseliflcations for budget results, trust account transactions, etc.

## Table 5.- Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness - (Continued)

United States avings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of Apr11 1941, and Series $E, F$, and $G$ were first offered in May 1941. When Seriea $E$ began to mature on May 1, 1951, owners of the matured bonds were offered three optlons: To redoem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specifled rates of interest accrual; or to exchange tham for Series $G$ bonds. A number of changes becsme effective May 1, 1952. The principal ones were: The rate of Interest accrual on Series $E$ was increased, especially for the near term, with correoponding changes in extended Series $E$; and Series $F$ and $G$ were replaced by two new 1ssues, Series $J$ and $K$, also at higher interest ratos. A now current-income bond, Series $H$, almilar in intereat return to Serles $E$, was offered beginning June 1 . For
detalls of these changes see "Trasury Bulletin" for May 1952, page $A-1$. Series $F$ and $G$ began to mature on May 1, 1953. For the exchange offering rade to holders of theae bonds maturing through December 31, 1953, eae the May 1953 1ssue, page A-1. The Treasury invited holders of Serles $F$ and $G$ which began to mature in January 1954 to reinvest the proceeds in other seriee of savings bonds. In the tables which follow, Series A-F and $J$ aalea are inoluded at $188 u e$ price and total redemptiona and amounts outstanding at ourrent redemption values. Series $G$, $H$, and $X$ are included at face value tbroughout. Matured bonds whioh have boen redeemed are inoluded in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest hae ceased.

Data relating to capital movements between the United Stares and forelgn countrles have been collected since 1935 , pursuant to Executive Order 6560 of January 25 , 1934, Executlve Order 10033 of February 8,1949 , and Treasury regulations promulgated trereunder. Information covering the principal types of oata and the principal countries 18 reported monthly, and 18 published reguiarly In the "Treasury Bulletin." Supplementary information 18 published at less frequent intorvals. Reports by banks, bankers, securities brokers and dealers, and incustrial and comercial concerns in the United States are mads inltially to the Federal Reserve Banks, which forward consolicated IIgures to the Treasury. Beginning April 1954, data reportsd by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domicileo outside the United States and its Territories and possessions, the offlcial institutions of forelgn countries, wherever such institutions way be located, and international organizations. "Short-term" refers to orlginal moturities of one year or less, and "long-term" refers to all other maturities. A detalled discuseion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin,"
pages 45-47. As a result of changes in presentation introduced in that issue, not all treakdowns previously published wll be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summarles, by perlods and by oountrles, of data on short-term banking liabllities to and clalms on forelgners and transactions in long-term securitles by forelgners, and present detalled breakdowns of the latest avallable preliminary data.

Section IV provides supplementary data in flve tacles which appear at less irequent intervals. Table l, shortterm foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the Janusry, April, July, and October issues of the Sulletin. Table 2 , long-term foreign liabllitles and claics reported by banks and bankers, and Table 3 , estimated gold reserves and dollar holdings of forelgn countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and deblt balances in brokerage accounts, appears sertannually in the March and September issues. Table 5, short-term liablilties to forelgners in countries and areas not regularly reported separately by banking institutions, is presented annually in the April issue.
