## Reporting Bases

Data on recelpts, expenditures, and debt which appear in the "Treasury Bulletin" are baged largely on two Treasury financial reports, the "Dally Stetement of the United States Treasury" and the "Monthly statement of Receipta and Expenditures of the United States Government." Certaln monetary etatistics are based at least in part on the "Clrculation Statement of United States Money." Where these statezents are glven as sources for individual tables, they are citad by name only. Their reapective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases le given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the dally statement as the primary source of information on budget resulta and other receipt and expenditure data claselfled by type of account. At the ame time, the dally statement was changed to a statement of cash deposite and withdrawals affecting the account of the Treasurer of the United States. Both publicstions bave provided comparative ilgures on their respective bases from the beginning of the 11scal year 1953. The announcement of February i7, 1954, with respect to these reporting changes may be founs in the April 1954 lasue of the Bulletin.

The monthly stateaent shows all recelpte and expenditures of the Governvent, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treaturer of the United states and by all other collecting and disbursing agencies, including those agencies which maintain cheoking accounts in commercial bsiks. These reports cover transsctions recorded in the accounts of the agencies during the reporting period. The net of the transactions as complied from those reports is reconciled in the monthly otatement to changes in the balance in the Treasurer's account and in cash beld outside the Treasurer's account and changer in the public debt outstanding.

Recelpts of taxes and customs dutlee are reported on a collection basie. Other recelptg are reported partially on a collections basis and partially on deposits baeis. Expenditures, except interest on the public debt, are reported on the basia of checks issued or cash payments made by disbursing offloers. Transactions of an interfund or intragovernmental nature are included on the same basle even though the actual issuance of ohecks may not be involved. Interest on the public debt is included on an accrual basia begiming with figures for June 1955 and the flacal year 1955. Frior to that, it was included on a due and payable basis. The ame reporting basia ae that in the monthly etatement provides the flacal year rigures for the Treasury's "Combinad Statenent of Receipts, Expenditures and Balances of the United States Governaent "and for actual receipte and expendstures in the "Sudget of the Unsted States Government."

The daily statement on the new basie was first 1ssued for February 17, 1954. In the deposits and withdrawale as shown, no distinction is wade as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certiricates of deposit cleared through the sccount of the Treasurer of the United States. Total withdrawals are on the basis of checke pald or cash dis* bursements made out of the Treaturer's account. Some of the withdrawal classiflcations shown are reported on the hasis of malled reports of checiss lssued and are adjusted by eesns of clearing aocounts to the total of checke pald. Except for relatively minor amounte, noncssb interfund and other intragovermental transactions are excluded. The public debt flgures in the dally gtatevent also are on a "clearance" basis, with the exception of thoee isguance and retirement transactions reported on the basis of telegrame from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally etatement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Govemment agency transactions which were handed through comercial bank sccounts, and included noncssh interfund and other intragovemnental transactions. It provided information olmllar to that in the preaent dally atatement with respect to the status of the Treasurer's account, and almilar to that in the present end-of-montb dally otstement with resfect to debt ispuance, retirement, and amount outstanding. Receipts and expenditures, however, were clessifled by type of account, and the budeet results shown in the dally staterent were used as the basie for reflecting the results uncer the Fresident'e budget progran as enacted by the Congresa.

Recelpts were on the besis of deposits as they cleared the Treasurer's account. Expendituree cleared through the Treesurer's account were reported on two succesalve bases. Throuch 1946 they were on the bacie of checke palc by the Treasurer of the United Statea. Beginning with 1947, expenditures made through the fecllities of the Treasury Departient's Divibion of Disbursement were on the basis of checks lasued, whlle certein others, principally those of the Department of Defenae and ita predecessor organizations, were on the basis of checks pald. Tranactions hanaled through commercisl bank accounte, consieting of market transactions in public debt and guaranteed securities, were as reported by the agenclee. Interest on the publio debt was included on a due and payable basis beginning with November 1949 and on a checks-paic bafis prior to that time.

The circulation statement reflects trensectione through the Treasurer's account which affect monetary stocks of gold and bilver and the amounts of coin and currency in the money eupply of the country. It 18 lseued later than the dally statement, however, and the rigures are based on transections consummated during the reporting period even though somo may not have cleared the Treaeurer's account durlng that period.

## Treasury Financing Operations

## Reaults of the May Refunding

Subscriptions to the optional exchange offering of $3-1 / 2$ percent Treasury certificates of indebtedneas, Seriee $B-1958$, and $3-5 / 8$ percent Treasury notes, Series $A-1962$, totaled $\$ 2,998$ million, leaving \$1,157 million to be paid in cash. Subscriptions to the $11-1 / 2$-month certificates amounted to $\$ 2,351$ million and to the 4 year and $9-1 / 2$-month notes to $\$ 647$ million. Of the $\$ 4,155$ million of maturing $1-5 / 8$ percent notes, Seriee B-1957, Federal Reserve Banks and Governsent investment accounts held \$114 million as of April 30, 1957; and commercial banks held $\$ 1,389$ million as of March 31, 1957, as reported in the Treasury Survey of Ownership. Terme of the offering were summarized in the May Bulletin, page $\mathrm{A}-10$.

## Marketable Bond Offering Postponed

The Treasury Department announced on May 16 , 1957, that deciaion had been made, in view of market conditions, to postpone indefinitely any offering of marketable bonds to the holders of maturing Seriea $F$ and $G$ savinge bonds.

## Offering of 119-Day Tax Anticipation B111a

To ralse cash for current requirementa, as announced on May 16, 1957, the Treaaury Department on May 17 invited tenders on May 22 for $\$ 1.5$ billion, or thereabouts. of 119-day Treasury bills, Tax an-
ticipation Series. The bllla are dated May 27, 1957, and w111 mature September 23, 1957. Payment could be made by any qualified depositary by credit in its Treasury tax and loan account for Treasury bllls allotted to 1 for 1 itself and 1 ts customers up to the amount for which 1 t was qualified in excess of ex1sting deposits. The bills will be acceoted at face value in payment of income and profits taxee due on September 15, 1957, and to the extent they are not presented for this purpose the face amount of the bllls will be payable without interest at maturity.

Tenders were accepted in the amount of $\$ 1,501$ mlllion at the average rate of discount of 2.825 percent. Noncompetitive tenders for $\$ 300,000$ or less aggregating $\$ 399$ million were accepted at the average price of accepted competitive bide and are included in the total accepted tenders.

Weekly Treasury B1lls Refunded
The five weekly maturities of May bllls totaling $\$ 8.7$ billion, were refunded by new bllis in equivalent amounts. All but the last were 9l-day b1119. The fifth maturity, a 92-day 1 ssue, was refunded by a 90 -day 1 ssue. The first three $18 s u e s$ were for $\$ 1.7$ blllion each, and the last two for $\$ 1.8$ bililion each. Average rates of discount on the new issuea were 3.039 percent for May 2; 2.909 percent for May 9; 2.895 percent for May 16; 3.122 percent for May 23 ; and 3.245 percent for May 31.

Table 5.- Net Redemption or Sale of Obligations of Government Agencies in the Market (In millions of dollors; nepative ingures indicate net eales)

The cash income and outgo data appearing in the "Treasury Bulletin," beginning with the February 1956 1 saue, are on a basis consistent with receicts from and payments to the public as derived in the 1957 and subsequent Budgets of the United Statea, Special Anglysis A. Reconciliation to cash deposita and withdrawals in the account of the Treasurer of the United States 18 shown on the same basis as in the Budget documents. There 18 also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by montb. Figures for back yeara have been revised where necessary in order to make them as nearly comparable with the Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents $a s$ well as in the Bulletin.

The Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Tressurer's acccunt. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as rellected in Treasury reports. Major intragovemmental transactions which are reported as both expenditures and receifts are eliminated from both. Noncash items which represent accrued obligations of the Government to make paymente in the Puture are also eliminated from expenditures but are added later when actual payments are mace. Receipts prou the exercise of monetary authority (mostly seizniorage on silver) are excluded as not
representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the publio. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Tressury.

Cash transactions through the Treasurer's account are similar in general concept to those includad in the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Budget serias.

Beginning with figuree for the fiscal year 1953, the series of transactions with the public is based on the "Monthly Statement of Receipts and Expenditures of the United States Government," which is compiled from reports by all callecting and disbursing officers and includes those transactions not cleared through the Treasurer's account. Cash deposits and withdrawals in the Treasurer's account, beginning with the figures for the gane year, are reported in daily Treasury statements. For those years prior to 1953 both cash transactions serles are based on a single source, namely, the earlier basis of dally Treasury statements which reported separate classifications for budget results, trust account transactions, etc.

p Preliminary.

United States savings bonds were ilret offered in Warch 1935 and began to mature in March 945 . Series $A-D$ were sold between March 1935 and the end of April 1941, pind Series $E, F$, and $G$ were first oflered in May 2941. When Series $E$ began to mature on May 1,1951 , owners of the matured bonds were offered thres options: To redeem the bonos in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at opecified rates of interest accrual; or to exohange tham for Serles $G$ bonds. A number of changes beosme effective May 1, 1952. The principal onee wore: The rate of interest accrual on Serles $E$ was increased, especially for the near term, with corresponding ohanges in extended Serles $E$; and Serles $F$ and $G$ were replaced by two now 188ues, Series J and $K$, also at higher interestrates. A nev current-incoms bond, Series $H, s i m l i s r$ in interest return to Series $E$, was offered beginning June 1 . Detalls
of these changes appear in the May 1952 Bulletin, page A-1. Series $F$ and $G$ began to mature on May 1, 1953. For the exchange offering made to holdene of these bonds maturing through December 31,1953 , see the May 1953 1ssue, page A-1. Sales of Series $J$ and $K$ were diecontinuedaftor April 30, 1957. An incresce in interest rates on Serles E and $\mathcal{H}$ was announced on April 20,1957, retroactive to February l. Detalle of the changes appear in the May 1957 Bulletin, page A-1. In the tables which follow, Serise A-F and J sales are included at issue price and total redemptions andamounts outstanding at current redemption vilues. Serios $G$, $H$, and $K$ are included st face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are inciuded in the interestbearing debt until all bonds of the annusl series have matured, when they are transferred to matured debt upon which interest has ceased.

Certein detail by type of tax is eveileble only on the basie of returne flled witb the Internal Revenue Service. The figuree shown include collections for credit to epecial eccounte for certein island poesessions, as reported by the Internal Revenue Service.

1) Includes social security tax on self-employment incame, which 18 levied and collected es part of the individual income tax. For estimeted figcsl year breakdow, ges Table 1.
2/ For estimated flacsl yoar breakdown between income tax withheld and sociel security taxes, see Teble 1.
3/ Under revised eccounting procedures effective July 1, 1954, tax paymente made to banke under the depositary recelpts ayetem are included in Internal Revenue Service reporte of collections in the manth in whict the depositary receipte aro lesued instead of the montb in wisch tex returns supported by the depositery rocelpte are recoived
in internal revonue offices, es wes the previous prectice. The "Undietributed depositary recelpts" included io the collections represent the amount of depositary recolpts lesued during the perlod less the amount received yith the returns. In the case of excise taxes, it is not possible to clessify the depositary receipte by type of tex until the returne are recolved. Accordingly, the amount of auch und istributed depositary receipts is included only in the totel of exciae taxes.
2) includes edvance payments of estate and gift taxes not further clessi fled in the amounts of $\$ 16,116,000$ and $\$ 19,381,000$ for 1955 end 1956 , respectively.
5/ Includee unidentified and excess collections and profit from sele of ecquired property. These collections were included with "Otber excise taxes" prior to the August 1956 1esue of the Bulletin.

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15 , 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and 18 published regularly In the "Treasury Bulletin." Supplementary information is published at less frequent intarvals. Reporta by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are mado Inltially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reportad by banks in the Territorles and possessions of the United States are Included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and 1 te Territories and possessions, the official institutions of forelgn countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin,"
pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide sumaries, by periods and by oountries, of data on short-term banking liabilitles to and claime on forelgners and transactions in long-term securities by foreigners, and present detalled breakdowns, of the latest avallable preliminary data.

Section IV provides supplementary data in five tablea which appear at less irequent intervals. Table l, shortterm foreign 11ab1lities and clalms reported by non-1 financial concerns, 19 published quarterly in the January, April, July, and October 1esues of the Bulletin. Table 2, long-term forelgn liabilities and claime reported by banks and bankers, and Table 3, estlmated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June,
 and debit balances in brokerage accounts, appears semiannually in the March and September 1ssues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually in the April issue.

The financial statements of corporations and certain other business-type activities of the United States Government which appear in the "Treasury Bulletin" beginning with the August 1956 issue are complled from reports submitted to the Treasury under Department Circular No. 966, 1ssued January 30, 1956, and Supplement No. 1, 1ssued June 1, 1956. The regulations so issued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 ( 31 U.S.C. 66 b ), and represent another step in the program of comprehensive and integrated Government accounting and ilnanoial reporting for which suthority was provided in that act. They supersede Budget-Treasury Regulation No. 3, 1 ssued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942.

In coverage, the new regulations require submission of financial statements by all wholly owned and mixedownership Government corporations specifically included in the Government Corporation Control Act, as amended ( 31 U.S.C. 846,856 ); and all other activities of the Government operating as revolving funds for which businesstype public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget. Other activities and agencies whose operations, services, or functions are largely self-1iquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments
and other recoverable assets, may be brought under the regulations as agency accounting systems are developed to the point where they are capable of furnishing the financial reports required.

Four kinds of financial statements are called for by Department Circular No. 966 and Supplement No. 1. They are statements of Ifnancial condition, income and expense, source and application of $f$ unds, and certain commitments and contingencies. All of the financial statements required by the Circular will be presented in the Bulletin. The statements of financial condition are published quarterly, as before, and appear as Section I in the serles of tables. The first data under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds continue to be published semiannually, and appear as Sections II and III. The first of these statements under the new regulations cover the fiscal year 1956, and were published in the January 1957 Bulletin. Certain commitments and contingencies will be added on a semiannual basis for a subsequent date. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise funds, intragovernmental funds, certain other activities, deposit funds, and trust revolving funds.
