## Reporting Bases

Data on reoelpte, expenditures, and debt which appear in the "Treasury Sulletin" are based largely on two Treasury financial reporte, the "Daily Statoment of the United Statee Treasury" and the "Montbly statement of Recelpta and Expenditures of the United States Government." Certaln menetary statiatice are baeed at leset in part on the "Ciroulation Statement of United States Money." Where these ataterenta are given as sources for individual tables, they are cited by name only. Their reapective reporting bases are desoribed below. For other data in the Bulletin, information on sources or reporting beaes ie given in conneotion with the tablec themelves.

The monthly statement of recelpte and expenditures wee flret publlehed for February 1954, and repleoed the dally etatement ae the primary source of information on budget reaulte and otber recespt and expenditure date olaselfled by type of account. At the ame thee, the dally etatement was changed to a atatement of cash deposita and withdrawale affocting the account of the Treasurer of the United Statea. Both publications have provided comparative figurea on their reapective bases from the beginning of the f1acal year 1953. The announoement of February 17. 1954, with reepect to theee reporting changes mag be found in the April 1954 18aue of the Bulletin.

The menthly etatement abowe all reoelpta and expendituree of the Govemnent, inoluding thoee mode from cash accounte held outside the United States Tressury. The information is complied from reporta by the Treasurer of the United Statea and by all other collecting and disbursing agenoies, including thoes agenoios which waintein obeoking acoount in commercial benks. Theee reporte cover traneactions reoorded in the aocounte of the agenciee during the reporting period. The net of the traneactions as complled from these reporte is reconolled in the monthly etatement to ohange in the balance in the Treaouraris account and in cesh beld outalde the Tressurer'a acoount and changee in the publio debt outetanding.

Recelpte of taxes and cuetome duties are reported on a collections besie. Other recelpts are reported partially on a oollectiona basia and partially on a deposite basis. Expenditurea, exoept interest on the publio debt, are reperted on the basia of cheoks lasued or cash payments made by diabursing offleera. Transactions of an interfund or intragevernmental nature are included on the aame basio even though the actual lesusnce of ohecks may not be involved. Interest on the publio debt is included on an accrual basis beginning with pigures for June 1955 and the flecel year 1955. Prlor to that, it was included on a due and payabls basie. The same reporting besis as that in the monthly atatement provides the flacel year flgures for the Tresaury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipte and expenditures in the "Budget of the Unitad States Government."

Tho dsily statement on the now basls was flret lasued for February 17, 1954. In the deposite and withdrawale as shown, no distinction 18 made ae to the type of aooounte (budget, trust, etc.). The depeeits are on the bsals of oertificatea of deposit cleared through the account of the Treasurer of the United Statea. Total witharawala are on the besie of chacke pald or casb disbureemente made out of the Treasuror'e account. Some of the Whtharawal olaselfiostions shown are reported on the besie of malled reporta of obecke 18 sued and are adjuted by meens of clearing aocounte to the total of cheake pald. Exoept for relatively minor ameunte, noneseb interfund and other intragovernmental tranesctione are exoluded. The public debt figures In the dally otatement alec are on a "olearance" basie, with the exception of those leeuence and retifement tranaactione reported on the basis of telegrame from Federal Reserve Banke. Nonoash debt tranesotlone are included, however.

The dally etstement berore February 17, 2954, cevered not only transsoclone oleared through the Treasurer's socount but alpo certadn Government ageney traneaotione whieb were handled through comarcial bank accounte, and included nonoasb interfund and other intragovernvental transacrions. It provided information -1milar to that in the present dasly etatement with reepect to the status of the Treseurer's aocount, and similar to that in the present ond-of-montb dally tatement with reapect to debt lesuance, retirement, and amount outstanding. Heoeipte and expenditures, howover, were claselfled by type of account, and the budget reaults shown in the dally statement were ueed as the basie for refleoting the resulta under the Freaident's budget pregram as enacted by the Congresa.

Reoolpta ware on the basis of deposite as they cleared the Treasurer's acoount. Expendituree oleared through the Tressurer's account were reported on two successlve bases. Through 1946 they were on the basis of checke paid by the Troasurer of the Unsted States. Beginning with 2947, expenditurea made through the facilitiee of the Treaeury Department's Divisien of Diabureement were on the beele of checke lsoued, while certaln othera, principally tbose of the Defsrtwent of Defense and ite predeceseor organizatione, were on the besis of checke paid. Trenesetione bancled through comercial bank accounta, consisting of market transactions in public debt and guarantsed seourities, were as reported by the agenciee. Intereet on the publlo debt was included on a due and payeble basio beginning with November 1949 and on o checke-pald baela prior to thet time.

The circulation etatement reflecte transactions through the Tressurer's aocount which effect monetary tooks of gold and silver and the amounts of ooin and currenoy in the money supply of the oountry. It is lesued later than the dally etetement, bowever, and the ilgures are besed on transaotions ooneumated during the reporting period even theugh some way not have cleared the Treseureris acoount during that period.

## vory few investors elected to take advantage of that offer.

Commercial banks, which for this purpose are defined as banks accepting demand deposits, were permitted to subscribe for thelr own account without deposit, but were restricted in each case to an amount not exceeding 50 percent of the combined capital, surplus, and undivided oropite of the subscribing bank. A payment of 2 percent of the amount of securitise subscribed for was required on all other subscriptions. Any commercial bank qualirled as a depositary was permitted to make payment for the new securities by credit in its Treasury tax and loan account up to the amount for which it was qualified in excess of existing deposits.

Both commercial banks and other lenders were requested to refrain from making unsecured loans, or loans collateralized in whole or in part by the securities subscribed for, to cover the 2 percent deposits required to be paid when subscriptions were entered. Subscribing banks were required to certify on all subscriptions entered for account of their customers that no such loans had been made; and that the banks had no benepicial interest in their customers' subscriotions, and that the customers had no beneficial interest in the banks" own subscriptions.

Terms of the certificates of indebtedness, Series $C-1958$, were summarized in the August Bulletin, page $A-1$. The new notes bear interest from September 26,1957 , at the rate of 4 percent per annum, payable on a samiannual basis on rebruary 15 and August 15,1958 , and thereafter on those monthly dates in each year until the princ1pal amount becomes payable. They were issued in bearer form only and in denominations of $\$ 1,000$,

p Preliminary.
a.a. Hot avallable.

The cash income and outgo data appearing in the "Treasury Bulletin," beginring with the Februery 1956 1saue, are on a bseis conslatent with recelpts from and payments to the public as derived in the 1957 and aubsequent Budgets of the United Statea, Special Analgais A. Reconcilistion to cash deposits and withdrawals in the account of the Treasurer of the United Statea is ahown on the same basia as in the budget documenta. There is also shown the amount of net caeh borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordanoe with the Budget classifications are made available month by month. Figures for back yeara have been revised where necessary in order to make them as nearly oomparable with the Budget classifications as available data will permit. For this reason certain of the figures difer somswhat from thoee published in earlier Budget documents as well ss in the Bulletin.

The Budget serles of cash transactions $1 s$ designed to provide informstion on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget sccounts and in trust and deposit fund sccounts. Operstions of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reparts. Major intragovernmental transactions which are reported $s 8$ both expenditures and receipts are eliminated from both. Noncsab items which represent accrued obligation of the Government to make payments in the future are also eliminated from expenditures but are added latar when actual paymenta are made. Receipte from the exerciee of monetary authority (mostly seigniorage on sllver) are excluded as not
representing cash received from the public. Federal cash borrowing from the publio includes net borrowing by the Tressury through public debt transactions and also nst borrowing by Government agencies and Government-sponsared enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The nat effect of sll these transactions with the public is reflected in changes in the bsiance in the Treasurer's account and in cash held outside the Tressury.

Cash transactions through the Treseurer's account are similar in general concept to those included in the Budget series, but are ilmited in covarage to transsctions whiob affect the balance in that account. On the other hand, they include receipte from the exercise of monetary authority, which are excluded from receipte from the public in the Budget series.

Beginning with ilgures for the fiscal year 1953, the series of transactions with the public is based on the "Monthly Statement of Recelpta and Expenditures of the United States Government, "Which is complied from reports by all colleoting and disbursing offlcers and includes those transactions not cleared through the Treasurer's account. Cash deposits and withdrawals in the Treasurer's sccount, beginning with the figurss for the same year, are reported in dally Treasury atatementa. For those years prior to 1953 both cash transactions series are based on a single source, namely, the earlier basis of dally Treasury statements which reported separate classificstions for budget results, trust account traneactions, etc.

United States eavinge bonds were lirst offered in March 1935 and began to mature in March 1945. Series A-D were sold between Maroh 1935 and the end of Apr11 1941, and Serles $E, F$, and $G$ were f1ret offered in May 1941. When Series E began to mature on May 1, 1951, ownere of the matured bonds were offered three options: To redeem the bonde in cash in accordance with the original terme; to retain them with an extended maturity of 10 yeare at specifled rates of interest accrual; or to exchange them for Serlee $G$ bonds. A number of changee beoame effeotive May 1, 1952. The principal one were: The rate of interest accrual on Serles $E$ was inoreased, espeolally for the near term, with corresponding changes in extended Serles $E$; and Serles $F$ and $G$ were replaced by two new Le日les, Series $J$ and $K$, also at higher interest rates. A new current-ircome bond, Series $H$, elmilar in interset return to Serles $E$, was offered beginning June 1. Detalle
of these changee appear in the May 1952 Bulletin, page A-1. Series $F$ and $G$ began to mature on May 1, 1953. For the exchange offering made to holders of theee bonds maturing through Deoember 31, 1953, see the May 1953 1ввue, page A-1. Sales of Serles J and $K$ were diecont1nued aft er Apr11 30, 1957. An increase in interest rates on Serles Eand $H$ was announced on April 20,1957, retroactive to February 1 . Detalle of the changes appear in the May 1957 Bulletin, page A-1. In the tables which follow, Serlos A-F and $J$ eales are included at lesue prioe and total redemptions andamounte outstanding at ourrent redemption valuee. Series $G, H$, ard $K$ are inoluded at face value throughout. Matured bonds which have been redoemed are included in redemptions. Matured $F$ and $G$ bonds outetanding are included in the interestbearing debt until all bonde of the annual serles have matured, when they are traneferred to matured debt upon which interest has ceased.

1) Detalle by series on e cunaletive besis and by periods for Series A-D comblied will be found in the February 1952 and previous issues of the "Trseaury Bulletin."
2) Includes exchanges of matured Series $E$ bonds for Serles $G$ bonds beginning May 1951 and for Serles I bonde beginning May 1952.
3/ Salss of Series J and K were discontinued at the close of businass on April $30,1957$.
3) Includes both matured and unmatured bonds; see Teble 4.

5 Includes total value of redemptions not yet clessified between matured and unmatured bond $\theta$.
6/ A change in procedure, beginning in June 1954, for processing redeemed sevings bonde hes resulted in a high lavel of redemptions not yet classified between matured and unmatured bonds. This increase temporarily obscures the relationship betveen the redemption colums showing sales price and accrued discount in Tables 2 through is and also the relationship between the matured and unmatured sections of Table 4.
(Ses alac footnots 5). The subsequent diatribution of this high level of unclessified redemptions may be large enough in any monts to show redemptions of matured bonds for a series in Teble 4 wbich are greater than the total redemptions of that series as shown in Teble 3, and to show a negetive in the unmatured section of Table 4.
1/ Reductions were made 10 lasues and redemptions of Series E, H, F, G, J, and K in July 1954 to compensete for the erroneous inclusion of reisoue transactions in June 1954 as reparted in the deily Tressury statement. The amounts icvolved were as follows: $\$ 18$ million for lasuse of Serfes $E$ and $H$ and $\$ 17$ million for lasues of Series F, G, J , and K ; and $\$ 35$ million for unclaesified ratiremente.
8) Sales began June 1, 1952.

9/ Compareble date are not eveileble prior to January 1950.
10) Includes axcbanges of Series 1 hli F and $G$ savings bande for Treasury $3-1 / 4 \%$ bonds of 1978-83.

Data relating to capital movements between the Unlted States and forelgn countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executlve Order 10033 of February 8,1949 , and Treasury regulations promulgated thereunder. Information covering the principal typee of data and the principal countries 18 reported monthiy, and is published regularly in the "Treasury Bulletin." Supplementary information is publlshed at less erequent intervals. Reports by banks, bankers, securities brokers and dealers, and induetrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and posseseions of the United States are included in the published data.

The term "Porelgner" as used in theae reports covers all institutions and individuals domiciled outside the United States and its Territorles and possessions, the official institutions of forelgn countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original msturities of one year or less, and "long-terw" refers to all other maturities. A detalled discussion of the reporting coverage, statistical preaentation, and definitions appeared in the June 1954 1saue of the "Treasury Bullotin,"
pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The ilrat three sections which follow are published monthly. They provide summaries, by periods and by oountries, of data on short-term banking liabilities to and clalms on forelgners and transactions in long-term securities by forelgners, and present detalled breakdowns of the lateat available preliminary data.

Section IV provides supplementary data in ilve tablea Which appear at leas frequent intervals. Table l, shortterm foreign liabilities and clalms reported by nonfinancial concerns, is published quarterly in the January, April, July, and October lesues of the Bulletin. Table 2, long-term foreign liabllities and claims reported by banks and bankers, and Table 3 , estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, Jure, Septomber, and December 1saues. Table 4, foreign credit and debit balances in brokerage accounts, appeara aemiannually in the March and September 1s8ues. Table 5, short-terullabilities to foreigners in countries and areas not regularly reported separately by banking institutions, 18 presented annually in the April issue.
