## Reporting Bases

Date on receipts, expendituree, and debt which appear in the "Treaeury Bulletin" are hased largely on two Treasury finenciel reporte, the "Dally Statement of the Undted Statee Treasury" and the "Monthly Ststament of Recelpte and Expenditures of the United States Government." Certain monetary atatistice are based at lesst in part on the "Clrculetion Statement of Undted states Money." Where thece etatemente are given ae eources for individual tables, they are citad by name only. Their reapective reporting heees are deeoribed helow. For other dats in the Bulletin, information on sources or reporting bases is given in conneotion with the tables themeelves.

The monthly statement of recelpts and expenditures was firet puhlished for Fehruary 1954, and replaced the dally etatement as the primary source of information on hudget reaulta and otber recelpt and expenditure data clasalfled by type of account. At the same time, the dally etatement wee changed to a atatement of cash deposits and withdrawals affecting the account of the Treaurer of the United Stateo. Both publicstions have provided comparative ilguree on their respective baeed from the beginning of the riscal year 1953. The announcenent of February 17, 1954, with reapect to theee reporting changea may be found in the April 1954 igeue of the Bulletin.

The monthly etatement shows all recelpte and expenditures of the Government, including those made from cash accounte held outelde the United States Treasury. The information ie complled from reports by the Treaeurer of the United States and by all other collecting and dieburaing agenciee, including thoes agenclee which maintain checking sccounte in comnercial banks. Thase reporte cover transactiona recorded in the accounte of the agenciee during the reporting period. The net of the traneactions as complied from these reporte 1 e reconciled in the monthly statement to changee in the belance in the Trbesurer's account and in cesh beld outside the Treasurer's eccount and changes in the publio debt outetending.

Recelpte of taxes and cuatome duties are reported on a collections basia. Other recelpts are reported partially on a collections basie and partially on a deposits basis. Expenditures, except interest on the puhlic debt, are reported on the basie of cheoke lesued or cash paymente made by diebursing offlcers. Traneactions of en interfund or intragovernmental nature are Included on the eame basis even thougb the actual iesusnce of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with flgures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payahie basie. The same reporting baale ae that in the monthly etatement provides the ilecsl year flgures for the Treseury's "Combined Statement of Recelpts, Expenditures and Balances of the United Statee dovernment" and for actual recelpte and expenditures in the "Budget of the United States dovernment."

The dally statement on the new basis was first isaued for February 17, 1954. In the depoaits and withdrawale ae shown, no dietinction 1 s made ae to the type of accounta (budget, trust, etc. . The deposite are on the bais of certificates of depoit cleared through the account of the Treasurer of the United States. Total withdrawale are on the hasis of checks pald or cash diabursements made out of the Treasurer'e account. Some of the withdrawal claselfications shown are reported on the basie of malled reporta of checis issued and are adjusted hy meane of clearing eocounte to the total of checks pald. Except for relatively minor amounta, noncash interfund and other intragovemmental transactions are excluded. The public debt figuree In the dally statement also are on a "clearance" baele, with the exception of these issuance and retirement transactions reported on the hasis of telegrans from Federal Feserve Benke. Noncesh deht transactions are included, bowever.

The dasly etatewent before February 17, 1954, covered not only tranasctione cleared through the Treasurer's account but also certain Government egency transections which were handled through commercial bank eccounte, and included noncash interfund and other intragovermental iransantions. It provided informetion Bimilar to that in the present daily etatement with reapeot to the etatus of the Treasurer'a account, and Bimilar to that in the present end-of-month daily etatement with respect to debt leguance, retirement, end amount outstanding. Recelpte and expendituree, however, were cleselfled by type of eccount, and the budget reaulta show in the dally atatenent were ueed as the basis for reflecting the resulte under the President's budget program as enacted by the Congreas.

Recelpts were on the basis of deposite as they cleared the Treasurer's account. Expendsturee cleared through the Treasurer'e sccount were reported on two successive basee. Through 1946 they were on the basie of checke paid by the Treasurer of the United Statee. Beginning with 1947, expendituree mado through the facllities of the Traseury Department's Divieion of Dishuresment were on the basle of checke lsaued, while certaln others, principally those of the Department of Defense and its predeceseor organizations, were on the beaia of checke pald. Traneectione handied through commercial bank accounts, ooneisting of market treneactions in public debt and gusranteed eecuritise, were as repgrted by the egenciee. Interset on the publio debt wae included on a due and payable basie beginning with November 1949 and on a checks-pald hasia prior to that time.

The circulation atatesent reflecte transactione through the Treasurer's aocount which affect monetary stooke of gold and ellver and the amounte of coin and currency in the money eupply of the country. It le iseved later than the dally etatement, however, and the ilguree are hased on transactione consummated during the reporting period even though eome may not have cleared the rreagurer'e account during that period.

The cash income and outgo data appearing in the "Treasury Bulletin," beginning with the Fabruary 1956 lasue, are on a basia conalatent with recelfta from and paymenta to the public as derived in the 1957 and aubsequent Budgets of the United States, Special Analysis A. Reconciliation to cash depoaits and withdrawala in the account of the Treasurer of the United Ststes is ahown on the same basis as in the Budget documenta. There is also ahown the amount of net caah borrowing from, or repayment of borrowing to, the public. By theae arrangementa, data in accordance with the Budget clasalfications are made available month by month. Figures for back yeara have bean revised where neceasary in order to make them as nearly comparable with the Budget clasaifications as avallable data will permit. For this reaaon certain of the flgures differ somewhat irom those publiahec in earlier Budget documents as well as in the Bulletin.

The Budget aeries of cash transactions is designed to provice information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not clesred through the Treasurer's seccunt. Receipta end paymenta include transactions both in budget accounts and in trust and depoait fund accounts. Operations of Government-eponsored enterprisea are included in paymenta on a net basie as reflected in Treasury reports. Major intragovermmental transactiona which are reported as both expenditures and recelcts are eliminated from both. Noncasb Ltema which repreaent accrued obligationa of the Government to make paymenta in the future are also eliminated from expenciturea but are added later when actual paymenta are mace. Recelpts from the exercise of monetary authority (mostly aeljniorage on allver) are excluded as not
repreaenting cash recelved from the public. Federal cash borrowing from the public includea net borrowing by the Treasury through public debt transactions and also net horrowing by Government agencles and Government-aponaored enterpriaes through alea of thelr own aecurities. It excludea changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these tranaactiona with the public is reflected in chancea in the halance in the Treasurer'a account and in cash held outside the Treasury.

Caah tranaactions through the Treasurer's account are sim.ilar in general concept to those incluosd in the Budget aerlea, but are imited in coverage to tranaactions whioh affect the balance in that account. On the other hand, they include recelpta from the exerciae of monetary authority, which are excluded from recelpta from the public in the Budget serles.

Beginning with figures for the fiscal year 1953, the series of tranastions with the public 18 based on the "Monthly Statement of Recelpts and Expenditures of the Uniled Statea Government, " which la compiled from reporta by all collecting and diabursing offlcers and includes those tranaactiona not cleared through the Treaaurer's account. Caah depoaits and withdrawals in the Treasurer's account, beginning with the ilguras for the aame year, are reported in dally Treasury atatementa. For those yeara prior to 1953 both cash transactions serles are hased on a alngle source, namely, the earlier basis of dally Treasury statementa which reported separate classificationa for budget results, truat account transactiona, etc.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United Statee reflects not only budget reoelpte and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Tresourer's accounts with Federal Reserve Banke and branches. As the balanoes in these accounts becoms depleted, they are restored by calling in (transferring) funds from the tax and loan accounte with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts oceur in the normal courae of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funde for the purohase of Government securities. In most cases the transaotion Involves merely the tranefer of money from a customer's
account to the tax and loan aooount in the eame bank. On occaelons, to the extent authorized by tbe Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system pormits the Treasury to leave funds in banks and in the conmunities in which they arise until suoh time as the freasury needs the funds for its operations. In this way the Treasury is able to neutralize the effeot of its fluctuating operations on bank reserves and the economy.

A detalled cescription of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

United Statea savings bonds were first offered in March 1935 and began to mature in March 1945. Seriaa A-D were sold between March 1935 and the end of April 1941, anc Seriea $E, F$, and $G$ were firet offered in May 1941. When Seriea E began to mature on May 1, 1951, ownera of the matured bonda were offered three optione: To redeem the bonds in caah in accordance with the original terms; to retain them with an extendad maturity of 10 yaara at specified rates of intereat accrual; or to axohange tham for Series $G$ bonda. A number of changea beame effective May 1, 1952. The principal onea ware: The rate of intereat accrual on Seriea $E$ was inoroasad, especially for the near term, with correaponding ohangea in extendad Series $E$; and Seriea $F$ and $G$ were replaced by two new 18日ues, Series $J$ and $K$, alao at higher interestrateo. A new current-income bond, Series $H, s i m i l e r$ in interest return to Serlea $E$, was offered beginning June 1. Detalla
of these changea appear in the May 1952 Bulletin, page A-1. Series $F$ and $G$ began to mature on May 1, 1953. For the exchange offering made to holdere of these bonds maturing through December 31, 1953, вee the May 1953 1sвue, page A-1. Sales of Series $J$ and $K$ were discontinued after April 30,1957. An increase in interest rates on Serlea $E$ and $H$ was announced on Apr11 20, 1957, retroactive to February l. Detalla of the changes appear in the May 1957 Bulletin, page A-1. In the tables which follow, Serlas A-F and J asles are included at isaue price and total redemptions and amounte outstanding at current redemption valuea. Serias $G, H$, and $K$ are includad at face valua throughout. Natured bonds which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outatanding are included in the interestbearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

5 Includes total value of redemptions not jet clessified between matured and ummaturad honde.
6/ A change in procedurs, begianing in June 1954, for processing redeemed savings hande hes resulted in a high level of redemptiona not yet claselfied between matured and unmatured bonds. This increase temporarily obscuree the relationsh1p between the redemption colume ghowing salee price and accrued discount in Tables 2 through 4 and aiso the relationehip between the matured and unmatured sectione of Tahle 4.
(See elso footnota 5). The eubeequent distribution of this high level of unclagelfied redemptions may be large enough in any moath to show redemptions of matured bonds for a series in Table 4 which are greater than the totel redemptione of that aerles a shown in
Table 3, and to show a negative in tha unmatured eection of Table 4.
I Reductions vere made in lseves and redemptions of Serlas E, B, F, G, $J$, and $K$ in July 1954 to compensata for the arroneous incluaion of reisene transactions in June 1954 as reported in the daily Treasury statament. The amounte involved were as follows: $\$ 18$ million for
lesuee of Series E and 18 and $\$ 17$ million for issues of Serlas F, G, J , and K ; and $\$ 35$ mililion for unclassifled retirements.
8 Salee began June 1, 2952.
9/ Coaparable data are not evelleble prior to January 1950.
10 Includes exchanges of Series $19 \mathrm{H} / \mathrm{F}$ Fand G savings bonds for Treasury $3-1 / 4 \%$ bonds of $1978-83$.

Data relating to capital movements between the United states and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Troasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banke, which forward consolidated Plgures to the Treasury. Beginning April 1954, data reportad by banks in the Territories and possessions of the United States are included in the publiahed data.

The term "forelgner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and posaessions, the official institutions of foreign countries, wherever such inatitutiona may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discusaion of the reporting coverage, statistical presentation, and definitiona appeared in the June 1954 18sue of the "Treasury Bulletin,"
pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The firat three sections which follow are published monthly. They provide summaries, by periode and by countries, of data on short-term banking liabilities to and clalma on forelgners and transactions in long-term securities by forelgners, and present detalled breakdowns of the lateat available preliminary data.

Section IV providea supplementary data in Pive tables which appear at less frequent intervals. Table 1 , shortterm foreign liabilities and claims reported by noninnancial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term forelgn liabilitiea and claims reported by banke and bankers, and Table 3 , estimated gold reserves and dollar holdings of foreign countries and international institutions, are publiahed quarterly in the March, Jure, Septsmber, and December 1ssues. Table 4, forelgn credit and debit balances in brokerage account 6 , appears semiannually in the March and September issues. Table 5, short-term liabilities to forelgners in countries and areas not regularly reported separately by banking inatitutions, is presented annualiy in the April issue.
