## Reporting Bases

Date on revelpte, oxpecditures, and debt what appear in the "Ireaeury Bulletin" are baecd largely on two Treasury finanolal roporte, the "Dally Statement of the United States Treasury" and the "Monthly Btatoment of Reooipte and Expeaditurea of the United Statee Goverment." Certain monetary etatletice are based at least in part on the Ciroulation Statement of Onitad states Money." Whers thee etatemente are given as aurces for individual tables, they are oited by name only. Their reepeotive reporting baees are deeoribed below. For other data in the Bullatin, information on cources or reporting hases is given in oonneotion wh the tablee thomeelvee.

The monthly etatement of recoipts and expenditures wae ilret publiohed for February 1954, and replaoed the dally etatement ae the primary souroe of information on budget reaults and other reoeipt and expenditure data olaeoilied by type of account. At the ame $t$ lme, the dally etatemont was changed to a atatement of cash depasite and withdrawals affecting the account of the Treseurer of the United States. Both publioatione bave provided oomparative igures on their reepeotive bases frow the beginning of the flacal year 1953. The announoement of February 27, 1954, with reopect to thee reporting changes may be found in the April 1954 1esue of the. Bulletin.

The monthiy etatement ehowe all reoelpta and expeoditurea of the Goverment, inoluding those made from cash aocounta held outoide the United States Treseury. The information 18 complled from reporte by the Treaourer of tho United statsa and by all other collecting and diobureing agencioe, inoluding those agancies which aaintein obeoking accounte in comerolal banke. These reporta oover traneaotione recorced 10 the aocounta of the agenciee duriag the reparting parlod. The net of the transections as complled from these reporte is reconolled in the monthly otatenent to changee in the balance in the Tresourer's account and in oash beld outside the Treasuror's account and changee in tho publio debt outatanding.

Recolpto of taxes and oustoms duties are reported on a colleotione basie. Other receipta are reported partially on a collections basie and partially on a deposite basio. Expenditures, sxoept intereet on the publio debt, ars reparted on the beeis of obeoks lasued or cash paymente made by diabureing offioera. Tranesotions of an interfund or intregovernmental nature are included on the sam basis even though the aotual lasuane of obecke may not be involved. Intereat on the public debt 181 n cluded on an accrual baeie beginning with figuree for Juna 1955 and the flecal year 1955. Prior to that, it was included on a due and payable basie. The eare reporting basis as that in the monthly etatement providee the liscal year flgurea for the Treaeury's "Combined Btatement of Recelpta, Expenditurea and Balances of the United Statea Government" and for actual recelpts and expendituree in the "Budget of the United Statse Government."

The daily atatameat on the new baele wae firet leued for Fobruary 17, 1954. In the deposite and withdrawale achovn, no dietinction la made as to the type of aooounte (budget, tmet, eto.). The doposite are on the basis of oertifiostoe of dopoit oleared through the account of the Troasurer of the United Beatee. Total withdrawale are on the basis of chooze paid or caeb disbursamenta made out of the Treaeurer'g aooount. Some of the withdrawal olaesifloatione ahovn are reportod on the baeid of mallod reporta of oheoks leeued and are adjuted by meane of clearlag socounte to the total of oboote pald. Exoept for relatively minor amounte, nonoseh intorfund and other intragovammental transactione are oxeluded. The public debt ilguree in the dally etatement also are on "olearance" basie, with the exception of those leeuanoe and retirecent traneaotione reported on the basie of telegrame from Federal Resorve Banke. Noncaoh debt tranesotione are inoludod, however.

The dally tatement before February 17. 1954, covered not only tranaactione oleared through the Freaeurer's aocount but also certain Government agenoy transaction whioh wor hanaled through comeroial bank accounte, and included nonoseh interfund and other intragovernmental transactions. It provided informatioc almilar to that in the present daily statement with roepeot to the atatue of the Treasurer's aocount, and almilar to that in the present end-of-month dally atatemeot with respect to debt 1esuance, retirement, and amount outetanding. Reosipte and expenditures, however, were classifled by typo of account, and the budget reauits shown in the dally etatement were used ae the basis for reflecting the reaulta under the Prosident'e budget program as enacted by the Congrese.

Recelpte were on the basis of aeposite as they oleared the Treasurer' account. Expendituree oleared through the Treasurer's account vere reportad on two succeselve besee. Through 1946 they were on tho basis of checks paid by the Treasurer of the United Statee. Beginning with 1947, expendituree mado through the facilitiee of the Treseury Department's Divieion of Disburesment wire on the basis of ohecks 1saued, while oertaln others, principally those of the Departwent of Defense and ite predeceser organizations, were on the basis of checke pald. Tranesotione bandled through commerclal bank aocounta, oonelsting of market traneactione in public aebt and graranteed securities, were as reported by the agenoice. Intereet on the publiodebt was included on a due and payable basie beginning with November 1949 and on a checks-paid basia prior to that time.

The ofrculation atatement reflecta transactione through the Treasurer's aocount which affect monetary stooke of gold and silver and the amounts of 001 n and currency in the money oupply of the country. It le lesued later than the dally atatement, however, and the ifgures are based on transactione oonsummated during the reporting poriod evon though eome may not have cleared the Treasurer'a acoount during that period.

## Treasury Financing Operations

Exchange Offering and New B111 Cyole
In ite program to achleve a more orderly scheduling of its short-term debt maturities two further steps were announced by the Treasury Department on November 18 .

The first was the offering to holders of $\$ 9,833$ million of $3-3 / 4$ percent certificates of indebtednese maturing December 1, 1958, and the holders of $\$ 2,368$ million of $2-1 / 2$ percent Treabury bonds maturing December 15, 1958, the opportunity to exchange any of these holdings for either refunding issue, singly or in combination. The new securities are a $3-3 / 8$ percent $11-1 / 2$ month certificats due November 15 , 1959, 18sued at a price of 99.95 percent of race value, to yleld 3.43 percent and a $3-5 / 8$ percent 2-year 5-1/2 month note due May 15, 1961, 1 ssued at a price of $99-7 / 8$ percent of face value, to y1eld 3.68 percent. Both are dated December $1,1958$. The subscription books were open Iram November 19 through November 21.

Subscriptions accepted for the new issues totaled $\$ 11,787$ million, leaving $\$ 414$ million to be paid in cash. Results of the exchange offering are shown in the accompanying table.

The new Treasury certificates of indebtedness, Series E-1959, bear intereet from December 1 at the rate of $3-3 / 8$ percent per annum, payable on a semiannual basis on May 15 and at maturity on November 15. 1959. The new Treasury notes, Series B-1961, bear interest from December 1 at the rate of $3-5 / 8$ percent per annun, payable on a semiannual basis on May 15 and November 15, 1959, and therealter on May 15 and November 15 in each year until the principal amount becomes payable on May 15, 1961.

Both the new certificates and notes were issued in bearer form only, and in denominations of $\$ 1,000$, $\$ 5,000, \$ 10,000, \$ 100,000, \$ 1,000,000, \$ 100,000,000$, and $\$ 500,000,000$.
"With the completion of this financing," the announcement stated, "over 80 percent of outstanding Treasury marketable securities maturing within the next ten years (excluding regular Treasury bllle and tax anticipation eecurities) will fall due in February, May, August, or November. For some time, the Treasury has been working toward scheduling its maturities on these quarterly dates to reduce the number of times each year its financing will interfere with

[^0]Exchanges were made as of December 1 , and in the case of the maturing bonde with an adjustment of interest as of that date. A payment of $\$ 0.50$ per $\$ 1,000$ face value of the new certilicates, and $\$ 1.25$ per $\$ 1,000$ faca value of the new notes representing the discount from the face values were paid to holders upon 1 ssuance of the new securities.
other borrowers such as corporations, States, manicipalities, etc.; to minimize the 'chuming' In the money markets on the major quarterly corporate income tax dates; and to facilitate the effective execution by the Feceral Reberve of its monetary policy. In addition, the present offering also works in the direction of a more

## Treasury Financing Operations - (Continued)

even distribution of the amounts of certilicates maturing on each of the four quarteriy dates.

#### Abstract

"Another important debt management objective, from the etandpoint of marketing techniques, is to place on a routine basis, so far as practicable, the 'roll-over' of the Treasury dobt maturing within one year. The amount outstanding at a given time will tend to vary considerably, depending on the liquidity needs of the economy and on the abllity of the Treasury to extend the debt. The composition of the shortterm debt, however, influences to a degree the amount of market disturbance occasioned by refinancing, and also affeots Treasury borrowing costs.

"As the second etep in its program to achleve a better composition of the short-term debt," the Treasury also announced that it plans "a rearrangement of the structure of its weekly bill maturities. Accordingly, on December 11, 1958, the Treasury will inaugurate a program to move gradually over the next 6 montha from the present cycle of 13 -week bllle (\$23.4 billion total) to a new cycle which wll incluae hoth 13 -week and 26 -wesk bills ( $\$ 26.0$ billion total). Full detalle of the program will be announced during the week preceding the offering.

[^1]Now Cyole of 13-Weak and 26-Week Bille
On Deoember 1 , further details were announced of the program to move gradually from the cycle of

13-week Treasury b1116 to the 13-week and 26-week cycle. The announcement stated,
"On Tbursday, December 4, 1958, the Treasury will invite tenders for $\$ 1.6$ billion, or thereaboute, of 91-day Tressury bllls, and $\$ 0.4$ billion, or thereabouts, of 182-day Treasury bllls, to be $16 s u e d$ on a diecount basis under competitive and noncompetitive bidding. Tenders for both series will be received on Monday, December 8 , 1958. The bllle of both series w111 be dated Dooember 11, 1958, and w111 mature March 12, 1959, and June 11, 1959, respectively.
"The Treasury expects to 1 ssue both 13 week and 26-week Treasury bills each week, although both the aggregate smount of bills and the relative proportion of 13 -week and 26 -week bills may be varisd from week to week. It is presently contemplated that by the end of the first 13 weeks under the new program the aggregate amount of Treasury bills outstanding wlll be increased by $\$ 2.6$ bil11on. After this additional cash is raised, the aggregate amount of the two weekly 1ssues of bllls to be offered 1s expected to be $\$ 1.6$ b1111on."

## Tax Anticipation Bllle Offered

Earlier, on November 7, it was announced that the Treasury Department on November 10 would invite tenders for $\$ 3$ billion, or thereabouts, of 214-day Treasury tax anticipation bills to raise cash for current requirements. The tenders were opened on November 14; the b111s were dated November 20, 1958, and will mature June 22, 1959. They will be accepted at face value in payment of income and profits taxes due June 15, 1959; to the extent they are not presented for this purpose the face amount will be payable without interest at maturity. Payment of accopted tenders at the prices offered were required to be completed in cash or other immediately avallable funde on November 20, provided bowever, that any qualified depositary was permitted to mako payment by oredit in its Treasury tax and loan acoount for Treasury bills allotted to it for 1 tself and its customers up to any amount for which it wae qualified in excess of existing deposits.

Tenders were acoepted in the amount of 2,997 million at the average rate of diecount of 2.999 percent. Noncompetitive tenders for $\$ 400,000$ or

## Treasury Financing Operations - (Continued)

I8s8 in the aggregate of $\$ 747$ million were accepted in full at the average price of accepted competitive blds and are included in the total of accepted tenders.

November B11ls Inoreased
New 18848 of weekly Treasury bllls totaled $\$ 7.2$ billion in November, refunding $\$ 7.0$ billion bills maturing and providing $\$ 200$ million in cash. The new 1ssues wers for $\$ 1.8$ billion ach; the elrst two maturities were for $\$ 1.7$ blllion each and the last two for 1.8 billion each. The $188 u e$ of November 13 was the tenth in the period beginning

September 11 having an increase of $\$ 100$ million over the maturity, making a total of $\$ 1$ billion provided in cash. At the close of November the 13-week cycls of bllls was on a uniform weekly basis of $\$ 1.8$ billion outstanding. Tbe 91-day 18 sues dated November 6 and 20 refunded 91-day maturities; the 92-day 1ssue for November 13 refunded a 91-day maturity; and the new 90-day 1ssue dated November 28 refunded a 92-day maturity. The average rates of discount on the new 1ssues were 2.649 percent for November 6; 2.774 percent for November 13; 2.876 percent for November 20; and 2.723 percent for November 28.

Source: Actual figuree through 1958 are from the deily Treaoury etatement and thereafter from the monthly otatement of racaipte and expenditures of the Government (for explanation of reporting beees eoe page II); eotimatee are from the Midyoar Review of the 1959 Budget, released September 11, 1958, and aupporting deta, including offocte of proposed lagialation.

1) Por furthar detall, ese tablea under "Internal Revenue Collectiona. Breakdown was not made in the dally Treasury stetement and the manthly atatement for years priar to 1954.
3/ Beginning January 1951, the diatribution of receipte between individual income taxes and old-age and disability inaurance taxae ie made in accordance with provielions of Seo. 201 of the Social Security Act, ae amended (42 U.S.C. 401), for tranefer to the Faderel 01d-Age and Survivors Ineurance Truet Pund (ese footnote 11), and efter December 1956 aleo for tranefer to the Federal D1eability Ineurance Trust Fund (een rootnote 12).

4 Tasas on omployera and employee under the Faderal Insurance Contributione Act, ee amended (26 U.S.C. 3101-3125), and beginning vith the taxable year 1951, tax on eelf-employed individuale under the Selfonployment Contributions Act, es amended (26 U.S.C. 1401-1403). The Sociel Security Act Amendmente of 1956, epproved Auguat 1, 1956, increesed the rates of tax appliceble to wages peid and taxabla yeare beginning efter December 31, 1956, to provide for dieability ineurance (as footnote 12 ).
5/ Tazse on oarriere and their employees undar the Reilroad Retirement Tax Aot, as amended ( 26 U.S.C. 3201-3233).
6) Tax on amploger of 4 or more under the Federel Unemployment tax Act, ae amended (26 U.S.C. 3301-3308); with reopect to eervicee performed before January 1, 1956, the tar wee impoesd on amplojare of 8 or mare.
Remaining footnotes on following pare.

## Footnotes to Table 1 - (Continued)

I/ Through 1953, contributione to the Ra1lroad Unemployment Insurance Adminiotration Fund were carried in the dally Treaeury atatement ab miscellaneous receipte, while the 1959 Budget document, Speciel Analyale K, includes them in employwent taxes through 1952. Beginning 1954 the contributione are credited direct to the truat account. For amounte of the contributione included in budget receipte, eee "Treseury Bullet1n" for February 1954, page 7.
8) In the 1959 Budget document, Speciel Anslyo1e K, internel revanue taxee not otherwias claseifled are included in miscellaneous receipts.
2/ Beginning 1955, the figures ehown reflect adjuetmente to corract prior estimates (see footnote 11), in millione of dollars es followe:

| Flacal year | Income | Income tax | Old-age inourance |
| :---: | :---: | :---: | :---: |
| or month | tax withheld | not withheld | taxee traneferred |
| 1955 | - | - | -300 |
| 1956 | +249 | 4 | -246 |
| 1957 | +136 | -1 | -134 |
| 1958-January | -116 | -7 | +123 |
| April | -106 | -8 | +114 |

10) Begining 1957, includee collections under increated rates in the Highway Revenue Act of 1956 (see footnote 14).
11) Amounte appropriated to the Federal Old-Age and Survivors Inowrance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). Beginning January 1951, the amounte transferred currently for appropriatioo to the trust find are beeed on eatimates of old-age insurance tax receipte made by the Secretary of the Trealury pureuant to the provialone of Sec. 201 (a) of the Sociel Security Act, as amended ( 42 U.S.C. 401 (e)), and are adjusted 10 later transfers on the basis of wage and self-employment income recorde mantained in the Socisl Security Adoinietration. The amount of old-age ineurance tax refunde io paid from the trust fund es a reimbursement to the general fund.
12 The Federal Dieability Ineurance Trust Fund was eatablished by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act approprlated to the trust find amounta equivelent to opecified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided thet the amounte appropristed should be transforred from
time to time to the trust fund on the same baele as tranofers to the Federal Old-Age and Survivore Ineurance Trust Fund. Retee of the Fere increased by the percentages eppropristed to the Federel Diabillity Insurance Truat Fund, the increase being applicable to wagee pald and taxeble years beginaing ofter December 31, 1956.
13/ Excludes the Government'e contribution for creditable military eervice ( 45 U.S.C. $228 c-1$ ( $n$ )). Beginning 1952, amounte are appropriated to the Rellraad Retirement Account equal to the amount of taxes under the Railroed Retiremeot Tax Act deposited in the Treasury, lees refunde, during each f1acel year ( 65 Stat. 222 and 66 stat. 371), and transfers are made currently. Previously, annual epproprietione were beeed, in effect, on eetimated tax collections, with any neceerary adjustmente made in oucceeding appropriatione.
12) The Bighway Revenue Act of 2956, approved June 29, 1956 (23 U.S.C. 173) eatabllahed a Elghway Trust Fund from which are to be made, es provided by appropriation acte, Federal-aid highway expendituree after June 30, 1956, and before July 1, 1972. The act appropricted to this fund amquate equivelent to epecifled percentagee of receipte from certain exciso taxes on motor fuele, botor vebicles, tireo and tubee, and use of certain vehiclea, and provided that the amounta appropriated should be transferred currently to the trust fund on the basis of eatimatee by the Secretary of the Treasury with proper adjustments to be mede in subsequent tranefere. The use tax wes impoeed by the act and ratee were increesed for the other taxes. previous to the plecel yoar 1957 correoponding exciee tax receipte were included in net budget receipte, and Federal-eid highway expendituree were included in budget expenditures.
15/ Interest an refund in included in expendituree in Teble 2. Resmbureement by Federal Old-Age and Survivore Iaeurance Trust Fund for refunde of taxes for the fiecal year (see footnote 11) is netted ageinst internal revenue refunde for the month in which the reimbureement 10 made.
13) Net of reimbursement of $\$ 72$ million from the Federal Old-Age and Survivors Inaurance Trust Fund (see footnote 15).
17/ Includes $\$ 132$ million unelloceted increment from reduction in weight of ths gold dollar transferred to the general fund pursuant to Public Law 85-699, epproved August 21, 1958 (72 Stat. 698). See elso "Truet Account and Otber Transactions," Teble 2, and "Monetary Stetletice," Teble 6.

- Less than $\$ 500,000$.

The cash incoms and outgo data appearing in the "Treasury Bulletin," beginning with the February 1956 iasue, are on a basia consistent with receipta frow and paymenta to the publis as derived in the 1957 and subsequent Budgets of the United Statea, Special Analysis A. Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documenta. There ia also ahown the amount of net cash bornowing from, or repayment of borrowing to, the public. By these arrangementa, data in accordance with the Budget clasalficationa are made avallable month by month. Figures for back yeara have bean reviaed where neceacary in order to make them as nearly comparable with the Budget clasaifications as avallable data will permit. For this reason certaln of the flgures differ aomewhat from those publiahe $\mathrm{c}_{\mathrm{c}}$ in earlier Budget documents as well as in the Bulletin.

The Budget serlea of caah transactiona ia decigned to provice information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's acccunt. Recelpta and payments include tranaactiona both in budget accounta and in trust and deposit fund accounta. Operations of Govermment-sponsored enterprises are included in payments on a net basis as replected in Treasury reports. Major intragovermmental tranaactiona which are reported aa both expenditures and recelfts are eliminated from both. Noncash itema which represent accrued obligationa of the Govermment to make paymenta in the future are also eliminated from expenditures but are adced later when actual payments are mace. Receipts from the exercise of monetary authority (mostly aelgniorage on silver) are excluded as not
representing cash received from the public. Federal cash borrowing from the public includea net borrowing by the Treasury through public debt transactiona and alao net borrowing by Government agenciea and Government-sponsored enterprises tbrough alea of tbeir own securities. It excludea changea in the public debt which do not represent direct cash borrowing from the publio. The net effect of all theas transactions with the public is reflected in changea in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash tranaactions through the Treasurer's account are sin.ilar in general concept to thoae included in the Budget aeries, but are imited in coverage to tranaactione whioh affect the balance in that account. On the other hand, they include receipta from the exercise of monetary authority, which are excluded from receipts from the public in the Budget seriea.

Beginning with pigurea for the piscal year 1953, the seriea of transactions with the public is based on the "Monthly Statement of Recelpts ano Expenditures of the United States Government, " which is complled from reports by all collecting and disbursing officers and includes those tranaactiona not cleared through the Treasurer'a account. Cash deposits and withdrawala in the Treasurer's account, beginning with the figures for the ame year, are reported in dally Treasury statements. For those years prior to 1953 both cash tranaactions serles are based on a single source, namely, the earlier basis of dally Treasury atetements which reported separate classificationa for buaget results, trust account transactions, etc.

$\frac{2}{3 /}$ For furthar dote11, Bee "Truet Account and Other Transections," Table 2. areated as noncasb refund deductions from recelpts whea lesued end ea coeb refund deductions when radeemed.

4 Conelste of seigniorage on ailver and lacromeat reeulting from reduction in the weight of the gold dollar; excluded from recelpte from the public but included in ceak depoeita in the Treesurer'e eccount.
-Lese than $\$ 500,000$.

## Footnotes to Table 4

1/ For furthor detail, soe "Budget Raceipta and Expenditurea," Table 2.
2) For Purther detali, see "Truat Account and Otber Transactions," Tablee 3, 4, and 5. Includes net change in balances in Governmeat-aponaored onterprise deposit fund eccounte with the Treseurer of the united Statee.
3/ Nat opersting expendituros, or receipts ( - ), as meseured by fundo provided by or applied to net security transactions reflected 10 Trsaaury reporta (see Table 7). To large extent, theee Governmeat-eponsored enterprisea secure funde for their operations by diract borrowing from the public or by casbing Federel securities which they bold, and they apply the net income received from operations to repayment of borrowing from the public or to inveatment in Faderal securities. On that basie, net
expenditures for operstions are sbown io thie table in terng of the combined net of disinvestment in Federel securities and sele of agency obligatione in the market, and net receipta from operations are ehown in terms of the combined aet of investment in Federsi escuritiea and redemption of agency obligetions in the market.
4 Fedemption of agency obliget
2f Conelsts of only tbose market trensections oot cleared through the Treaburer's account.
6/ See Teble 7, footnate 2.
If Does not include revolving fund receipte representing ecquired securities amounting to $\$ 2,643,070$ (par velue).

## Footnotes to Table 5

1/ Federel intmrmedfete credit bank frenchise tax through Decenber 1956 and, beginning 1953, leo re imbureoriment by Parawa Canel Conpany for expenasa and cervicea.
2/ IncIudee reimburement by Federal Old-Age and Survivore Iavurance Truet Fund and Federal Dieebility Ineurence Trust Fund for edrinietrative experiaes, and also for refunde of taxee (troated ac an offeet to refund rather than being credited to recelpta) boginning with 1953 for the formor and 1959 for the latter; refmbursement by Highway Truet Fund for rofunde of taree; relmbureement by the Diatrict of Columbia; peyment of dividenda, intereat, etc., by Federel Netional Mortgage Aecociation's secondery market oparetione; and Federel intorbedieta credit bank franchiee tax end repegment of cepitel etock to the Treeeury ofter December 1956 and before January 1959.
3 Conelete of peyment of eernings and ropayunt of cepitel etock to the Treaeury through 1952; and payment of franchiee tax by banke ror cooperatives leginning 1955, and by Federal intermediete credit banke beginnina Jenuary 1959.
4/ Includee relatively emall amounta of deductione from ealarise paid
by truat funde and Government-aponsored enterpriees. Beginning with fiecel year 1958 excludes deductione from eelarive of Dietrict of Columble employee ( eee footnote 6).
5/ Conalate of pasmants to employees retirement funde reproeeating United Statec end Government corporstion oheree of contributione: paymente to the Rallroad Petirement Account (for craditeble mllitary aervice), the Unamployment Iruet Fum, veterene' 11fe inaurance funde, Judicial Survivnre Annuity Fund, trust fund for technicel oervizee and other oselstence undar the egriculturel conservetion program, and Dietrict of Columbia; and swards of Iadian Clalma Conmionion.
6/ Includee payment by Dietrict of Colimbie to the Civil Servicea ratiroment fund for ita chare of contributione, and beginning with 1958 aleo daductione from 1te payroll; payment by Rellroed Rotirement Board to Federal 0ld-Age and Survivors Ineurence Trust Fund; transfare from Civil Service retirement fund to Foreign Service retirement fund from 2955 through 1957; and tranafere from Raslroed themplogment Insurance Administration Fund to themploymeat Trust Fuad through 2955.

* Lese than \$500,000.

## Footnotes to Table 6

1) Accrued discount on gevings bonds and bills less fotereat paid on aspinge bonda and bills redeemed.
2) Publif debt intereat due and accrued beginning Juno 30, 1955, effoctive date of the change in accounting and reporting from a due and payable basis to an accrual beale; for 1954, consiats only of public debt interest checks and coupons outatand ing; net increase, or decrease (-). Not reported as a separate clearing account prior to 1954.
3/ Treated so noncash expenditures of the time of 1ssuance of the securities and as caah expenditures at the time of their redemption; net 1 ssuance, or redemption $(-)$.
3) Ireued in 1936 in exchange for adjuated aervice certificatea hold by veterans of World War I. The bonda matured in 1945.

5/ Isaupd in 2947 in payment for accumulated leave. The last of these bonds matured in 1951.
6/ Part of the United Statea aubscription to the capital of the International Monatary Fund was paid in the form of noninterest-bearing nonnagotisble noter paysble on demand (aee 1247 Annual Report of the Secrotary of the Tresaury, pages 48, 350, and 385).
If Checke outatanding lese deposita in transit, and changes in other sccounta; net incresse, or decresse ( - . Prior to 1954 includes also public debt interest due and unpald (aee footnote 2).

* Leas than $\$ 500,000$.

## Footnotes to Table 7

1 In this table, beginoing 1954, in accordance with treatment in Budger documenta, net investment in Unfted States securities by Governmenteponsored ooterprises includes B small amount by other enterprises regarded as repreaenting not tranactions with the public. In Teble 4 under "Trust Account and Other Traneactions," these amounts ars inclined in triset and deposit fund account investment.
2/ Does not include inveatments representing acquired securitiea amounting to $\$ 1,643,070$ (par value) and donation of ecuritiee amounting to $\$ 45,800$ (par value).
3/ Accrued discount on earinge bonds and billa, wbich is included 10 the
principel of the public debt, zeea intereet pold on savinga bonde and b121s redeomed.
4/ Treated es noncesh trensections at the time of iesuence and se ceah trensections et the time of redemption; aet 18suance, or redemption ( - ).
5/ Exciuded from borrowing beceuse the trensections are trested es expenditures in Table 6.
6/ Excluded from borrowing becouee the transactions are treeted os deductions from receipts in Teble 3.
I/ Market trensactions in public debt securitiee end agency obligations. Lees than $\$ 500,000$.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United states reflects not only budget recelpts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts becoms depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposita to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the tranaaction Involves merely the transfer of money from a customer's
account to the tax and loan acoount in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceede from subscriptions to public debt securities entered for their own account as well ge for the account of thelr customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the conmunitiee in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the oconomy.

A detalled description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Source: Dally Treasury atatement.
Note: The computed annual interest charge represents the amount of interest that would be paid if each intereat-bearing iesue outatanding at the end of each month or year should ramain outatanding for a year at the applicable annual rate of interest. The cbarge 1 a computed for each issus by applyins the appropriate annuel interest rate to the amount outatanding on that date. The aggregate charge for all interegt-beardne lesues constitutes the total computed annual interest charge. The average annual interest rate is computed
by dividing the computed annual interest charge for the total, or for any group of iseues, by the correspondige principal amount.

1) Excludes Buaranteed securities held by the Treesury.
2. Total includes "Other bonds"; see Table 2.

3/ Included in debt outatanding at face amount, but discount value is used in computing annual interest charge and annuel interest rate.
4) The annual interest cbarge and annusl interest rate on inited States savings bonds are computed on the basis of the rate to maturity applied againgt the amount outatanding.

## Table 6.- Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness $14 /$ - (Continued)

United Statea eavinge bonde were ilret offered in March 1935 and began to mature in March 1945. Series A-D were aold between Meroh 1935 and the end of April 1941, and Series $E, F$, and $G$ were f1ret offered in May 2941. When Serles $E$ began to mature on May 1, 1951, ownere of the matured bonda were offered threa optiona: To redeem the bonds in caah in accordance with the original terme; to retain them with an extended maturity of 10 yeare at epecifled ratea of interest accrual; or to exohange them for Serles $G$ bonds. A number of changes beome elfactive May 1, 1952. The principal ones were: The rate of Interest accrual on Serles $E$ was increased, especially for the near term, with correaponding ohanges in extended Serles $E$; and Serlea $F$ and $O$ were replaced by two new 1scuee, Serles $J$ and $K$, al 60 at higher intereat rates. A new current-income bond, Serlea $H, 61 m 1 l a r$ in intereat return to Seriea $E$, waa offered beginning June 1 . Detalls
of these changes appear in the May 1952 Bulletin, pase A-1. Serles $F$ and $O$ began to mature on May 1, 1953. For the exchange offering made to holders of theae bonde maturing through December 31, 1953, aee the May 1953 1saue, page A-1. Salee of Series $J$ and $K$ were discontinued after April 30, 1957. An increase in intereat ratea on Seriea Eand $H$ was announced on April 20, 1957, retroactive to February l. Detalle of the changer appear in the May 1957 Bulletin, page A-1. In the tables which follow, Serles A-F and $J$ eales are included at 1 seue price and total redomptions andamounts outetanding at current redemption valuee. Seriea $G, H$, and $K$ are included at face value throughout. Matured bonda which have been redeemed are included in redemptiona. Matured $F$ and $G$ bonds outstanding are included in the interestbearing debt until all bonds of the annual serles have matured, when they are transferred to matured debt upon which interest has ceased.

Source: Daily Tresaury atatoment.
1/ Detaila by serisa on a cumulative baale and by periods for Serlea $A-D$ combined will be found in the February 1952 and previous 1esues of the "Treasury Builetin."
2) Includea excbangss of matured Seriss $E$ bonds for Seriss $G$ bonda begin ning May 1951 and for Serise $\mathbb{E}$ bonds beginning May 1952
3/ Includss both matured and unmatured bands; ses Tabls 4.
4) Includes total value of redemptions not yet claseifled between matured and unmatured bonds.
5 A change in procedure, beginning in June 1954, for pracessing redsemed savings bonds bss resulted in s high fovel of redemptions not yet classified betweon maturse and unmatured bonds. This increase temporarily obacurse the relstionahip between the redemptian columne showing gales price and sccrued diecount in Tables 2 through 4 and also the relationghip between the matured and unmatured aections of Table 4.
(See also footnots 4). The subsequent distribution of this bigh level of unclesaified rodemptions may be large enough in any month to show rademptions of matursd bonda for a series in Table 4 which are greater than the total redemptions of that series as shown in Table 3, and to show negstive in the unatured section of Table 4 . 6/ Reductions wars made in issues and redemptions of Series $E, B, F, G$ $J$, and $K$ in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounta lovolved were as follows: $\$ 18$ million for lasues of Series $E$ and $H$ and $\$ 17$ million for issues of Serles $F, G$, J , and K ; and $\$ 35$ million for anclasaified retiremonts.
Includea exchanges of Serles 1 外 1 F and $G$ sevings bonds for Treasury $3-1 / 4 \%$ bonds of 1978-83

- Less than $\$ 500,000$.

Source: Internal Revenue Service reports for detall of collections by type of tax; dally Treasury stetement for budget receipte from internal revenue through the fiscal year 1952, and the monthly statement of receipts and expenditures of the Government for recelpts thereafter (for explanation of reporting bases in these publicationa, see page II). Certain detall by type of tax $1 e$ availeble anly from returns filed with the Internal Revenue Service. The figures shown include collection for credit to epecisl accoumte for cartain island posseseione, se reported by the Internal Reveave Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articles of merchandiee of Puerto Rican manufacture coming into the united Statea. Figures for 1954 have been revised to the aame bagia. Figures for previous years include only amounte collected et porte of entry into the United Stater.

1) Differences betweon the amounta of internsl revenue reported by the Internal Reveaue Service as collections for given periods and the amounte reported in Tresoury statementa as budget receipts for the same periods arose becsuse of differences in the time when payments were included in the reapective reporte. Tax payments are included in budget receipte When they are roported as credits to the account of the Tressurer of the United Statea. Prior to July 1954, they wore included in Internal Revenue Service collection reports after the returns to wbich they applied had been received in internal revenue offices. Under procedure begum in 1950 with witheld income tax and old-age insurance taxes and later oxtended to rallroed retirement taxes and many excise日, these taxes are paid currently into Treasury depositarios and tho depositary recelpta, as evidence of such payments, are attacbed to quarterly returns to the Internel Revenue Service. Under this procedure, the paymenta are included in budget receipto in the manth in which the depositary receipte are issued to the taxpayerg.

Revised accounting procedures effective July 1, 1954, extended the eacse practice to Internal Revenue Service collection reporta.
2) Monthly and fiscal year 1958 figures include socisl security tax on eelf eemployment income, which 18 levied and collected as part of the individual income tax beginning with the taxable year 1951. Earlier fiecsl year figures exclude this tax, on the basis of eotimates beginning 1952 (see footnote 3), and it is included under "Old-age and disability lasurancs."
3) In Intermal Revenue Service reporta beginning January 1951, current collections have not been aeparated as to type of tax but the breakdown shown for fiscal years is based on estimates made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (42 U.S.C. 401), for transfer of tax receipts to the trust funds ( $e$ ee "Budget Recelpts and Expend 1tuテes," Table 1).
4) Beginning with the fiecal year 1955, collections ahom include undiatributed depositary rece1pts and unapplied collections. For exciee taxes these recelpts are included in the total only. Totel collections include "Taxes not otherwiee clessifled."
5 Budget recelpte for 1956 were reduced by $\$ 3,566$ tbousand represeating tax collections transferred to the Government of Guam pursuant to the act approved August 1, 1950 ( 64 Stat. 392) but this amount was included in collections reported by the Intarnal Revenue Service. Beginning with 1957, eucb collection are excluded also in Internal Revenue Service reporta.
6) Detail is reported by quarters beginning with the fiscal year 1956.

3/ Volued at $\$ 1.38+$ per Pine ounce.
Valued at $\$ 1.38+$ per fine ounce or at $\$ 1.29+$ per $\$ 1$ ne ounce according to whether the bullion is held for recoinage of aubaldiary silvar coins or for recoinags of standard allver dollars.

* Lese than \$50,000.

Table 5.- Selgniorage on Silver

Data relating to capital movements between the United States and forelgn countries have been collected since 1935, pursuant to Executive Order 6560 of January 15 , 1934, Executive Order 10033 of February 8,1949 , and Treasury regulations promulgated thereunder. Information covering the principal typea of data and the principal countries ia reported monthly, and is published regularly In the "Treasury Bulletin." Supplamentary information is published at less frequent intervals. Reports by banks, bankers, eccurities brokere and dealers, and induetrial and commercial concerns in the United States are made inltially to the Federal Reserve Banks, which forward consolidated flgures to the Treasury. Beginning April 1954, data reportad by banks in the Territories and posesesions of the United States are includad in the published data.

The term "foreigner" as used in theae reports covers all institutions and individuals domiciled outside the United States and 1 ts Territories and possessions, the official inetitutions of foreign countries, wherever euch inetitutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitiona appeared in the June 1954 1ssue of the "Treasury Bulletin,"
pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three aections which follow are published monthly. They provide summarlea, by perlods and by countries, of data on ahort-term banking liabilities to and claims on forelgners and transactions in long-term securities by foreigners, and present detalled breakdowns of the lateat available preliminary data.

Section IV provides supplementary data in ilve taties which appear at lese frequent intervale. Tabie 1 , shortterm foreign $11 a b 111 t 1 e s$ and claims reported by nonilnancial concerns, ia published quarterly in the January, April, July, and October 1esues of the Bulletin. Table 2, long-term forelgn $21 a b 1 l i t 1 e a$ and claime reported by banks and bankers, and Table 3 , estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the Marcb, Jure, September, and December 1saues. Table 4, foreign credit and debit balances in brokerage accounta, appears semiannually in the March and September isaues. Table 5, ahort-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutiona, 1 s presented annually in the April $18 s u e$.

p Preliminary.
Rerised.

The current financial atatementa of corporations and certain other business-type activities of the United Statea Government which appear in the "Treasury Bulletin" beginתing with the Auguat 1956 iesue are complled from reporta submitted to the Trasaury undar Department Circular No. 966 , 1saued January 30,1956 , and Supplamant No. 1 , 1ssued June 1, 1956. The regulations so lasued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 ( 31 U.S.C. 66 b), and repreaent another stap in the program of comprehansive and integrated Government accounting and financial reporting for which authority was provided in that aot. They auperaede Budget-Treaeury Regulation No. 3, 1saued under Executive Order No. 8512 of Auguat 13, 1940, as amended by Executiva Order No. 9084 of Maroh 3, 1942, under which 11nanoial atatamenta previously publiahed in the Bulletin were aubmitted.

In coverage, Department Circular No. 966 requires aubmiasion of financial statements by all wholly owned and mixed-ownerahip Government corporations apecifically Included in the Government Corporation Control Aot, as amended ( 31 U.S.C. 846, 856 ); and all other aotivities of the Government operating as revolving funds for which business-type publio enterpriae or intragovernmantal fund budgets are required by the Bureau of the Budget. Other activities and agencies whose operations, carvioes, or functiona are largely eelf-liquidating or primarily of a revenue-producing nature, and aotivities and agenciae whose operatione result in the accumulation of aubatantial inventorles, inveatmente and other recoverable aseets, may be brought under tha regulations as agenoy acoounting aysteme ara developed to the point where they are capable of furnishing the ilnancial reporta required.

Four kinda of financial atatements are oalled for by Department Circular No. 966. They are atatements of Ilnancial condition, income and expense, bource and application of funds, and certain commitments and contingencies. The statementa of inancial condition are
published quarterly and appaar as section I in the aeries of tables. The firat data under the new regulationa are for March 31, 1956, and were preaented in the Auguat 1956 Bulletin. Statementa of income and expenso and source and application of funds are published aemiannually, for June 30 and Dacember 31 reporting dates, and appear as Sections II and III. The first of theae statementa under the new regulations cover the flacal year 1956 , and were publiahed in the January 1957 Bulletin. Within the aections, the agencles are grouped in separate tables by type, as followa: public anterprise revolving funda, intragovernmental revolving funda, certain other activities, deposit funds, and trust ravolving funds.

Supplement No. 1 added to the coverage by including all executive agenciea and aotivities not reporting under Department Circular No. 966, but required only a atatement of financial condition annually as of June 30. Thase ara mainly not business-type activities, and those which had not yet developed formal accounting procedurea to provide complete balanoe sheet types of statementa were authorized temporarily to report only the asaet side. Thus the supplement rounds out proviaion for the information on propertiee and assets of the United States Governmant which the Treasury haa been asked to furnish to the Comittae on Government Operations, House of Repreaentatives, for a continuing atudy of the aaseta of tha Government. The Ilrat comprehenalve reporting under supplement No. 1 ia for June 30, 1957, and the data were publiahed in the Deoember 1957 1esue of the Bulletin as Part B of Table 4 in Section I.

A summary of loana outatanding for a serles of dates ia included in Section $I$ of the Bulletin presentation beginning with the June 1958 1aaue. Two olaseiflcations of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirementa, which provided for complete coverage of Government lending agenoiea.

[^0]:    1/ As reported in the Treasury Survey of ownersh1p as of October 31, 1958.
    2/ The Federal Reserva Banks exchanged $\$ 5,000$ million of their holdings of the maturing certificates for the now cortificates and $\$ 2,858$ million for the now notes.

[^1]:    "The shift of part of the volume of Treasury bills outstanding to a 26 -week cycle will enable certain corporations and other inve日tors to meet their requirements for a regular bill which is longer than the present 13 -week maturity. In the oourse of the transition to the new cycle of Treasury bills, a total of $\$ 2.6$ billion of new money wlll be raised during the next three monthe, thus meeting more than half of the Treasury's anticipated casb borrowing needs of $\$ 4-4-1 / 2$ billion through March 1959. Increases in the amount of outetanding bills under this program, together with continuing efforts to extend the debt, should permit a reduction in Treasury certifioates of indebtedness outstanding over tho period ahead, so that the overall volume of ehort-term debt would not De increased."

[^2]:    Note: Detaile of Treasury markat financing oparations are shown elsewhere in this iesue of the "Trasaury Bulletin," In the tables on "Offerings," "Allotmenta,"
    and "D1sposition," respectively, of marketabla isaues of bonds, notes, and certificates of indebtsdness, and in the table "Offerings of Treatury Bills."
