## Reporting Beses

Data on recelpts, expenditures, and debt which appear in the "Treaaury Bulletin" are baaed largely on two Tresaury Innancial reporte, the "Dally Statement of the United Statee Treasury" and the "Monthly Statement of Receipte and Expenditures of the Unsted States Government." Certain ronetary otatiotlca are bsaed at least in part on the "Circulation Statement of United States Money." Where these atatezents are glven as bourcea for $2 n-$ dividual tablea, they are cited by name only. Thelr reepective reporting bagea are described below. For other data in the Bulletin, information on aources or reporting basea is given in connection with the tables themselvea.

The monthly ststement of recelpts and exponditures was plret published for February 1954, and replaced the dally atatement as the primary aource of information on budget reaulta and otber recelpt and expenditure data classlfied by type of account. At the same time, the dally atatexent was changed to a statement of caah deoosita and withdrewala affecting the account of the Treasurer of the United States. Both publicationa have provided comparative figures on their reapective baaes from the beginning of the 11ecal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 ieaue of the Bulletin.

The monthly atstement shows all recelpts and expenditures of the Govermment, including those made from cash accounta held outelde the United Stateo Tressury. The information is compiled from reporte by the Treaaurer of the United States and by all other collecting and aleburalng agencise, including thoas agenciea which maintaln cheoking accounts in compercisl banke. Theac reporta cover traneactiona recorded in the accounts of the agenciea during the reporting period. The net of the transactions as complled frow tbese reports is reconclied in the monthiy atatement to changes in the balance in the Treaurer's account and in cash held outside the Treaaurer's account and changes in the publio debt outatanding.

Recelpta of taxes and curtoms dutiea are reported on e collections bsela. otber recelpts are reported partialiy on a collectiona basia and partially on a deposita basie. Expenditurea, exoept intereat on the public debt, are reported on the basis of checisa lsaued or caah paymenta made by dieburaing offlcers. Tranaactions of an interfund or intragovernmental nature are included on the same basia even thougb the sctual lasuance of cbecks may not be involved. Intereat on the public debe ia included on an accrual bsils beginning with flguree for June 1955 and the fiscal year 1955. Prior to tbat, it wae included on a due and paysble basie. The ame reporting basis as that in the monthly tatement provides the flacsi year figures for the Treasury's "Combinad Ststement of Recelpts. Expenditurea and Balances of the United States Oovernment" and for sctual receipte and expendituree in the "Eudget of the United States Government."

The dally etaterent on the new basis was ilret iscued for February 27, 1954. In tbe deposita and withcrawale as shown, no diatinction is made as to the type of accounts (budget, truat, etc.). The deposita are on the basia of certificstes of deposit cleared through the account of the Treasurer of the United States. Total withdrawala are on the bsals of checks pald or caah disbursements wade out of the Tressurer'e account. Some of the withdrawal claselflcations bhown are reported on the basis of walled reports of checsa le日ued and are adjustec by mesns of olearing accounte to the total of checica paid. Except for relatively minor amounta, noncasb interfund and other intragovernmental transactiona are excluded. The public debt ilguree in the dally atatetent also are on a "clearance" basis, with the exception of those leeuance and retirement transactions reported on the basia of telegrame from Federal Reeerve Banka. Noncaah debt transactiona are included, however.

The dally atatement before February 17, 1954, covered not only irsnasctione cleered through the Treasurer's account but alao certain Government agency tranasctions which were handled through commercial bank sccounts, and lncluded noncssb interfund and other Intragovernmental transactione. It provided information almilar to that in the present dally atatement with respect to the atatus of the Treasurer's account, anc almilar to that in the present end-of-month dally etstement hitt respect to debt leauance, retirement, and anount outstanding. Secelpte snd expenditurea, however, were clessifled by type of sccount, and the budget reaulta ahom in the dally atete-ent were used as the basis for reflecting the results uncer the Fresident' $\varepsilon$ budget proeram as enacted by the Congreas.

Recelpta were on the baela of depoaita as they cleared the Treesurer'a account. Expendilurea cleareo through the Treasurer' account were reported on two auccesalve baees. Threugh 1946 they were on the bacla of checke palc by the Treasurer of the United Statea. Beginning with 1947, expenditurea asde through the facilitiea of the Treasury Departrent's Division of Diaburcement kere on the basis of checka isaued, whlle certeln others, priricipally those of the Depertment of Defense and its predeceseor organizationa, were on the bssia of checka paio. Transactione handled through commercisl bank accounte, conalating of market tranesctions in public debt and gusranteed securities, were as reported by the agencles. Interest on the public deot waa included on a due and payable basis beginning with November 1949 and on a checke-pald baela prior to that tlwe.

The clreulation atateant reflecta tranactiona through the Treaarer's account which affect monetary stocke of gold and日llver and the amounts of coin and currency in the money aupply of the country. It 1 a lasued later than the dally atatewent bowever, and the fleuree are based on traneactlona coneumated during the reporting perlod even though some may not have eleared the Treseurer'a sccount during that perlod.

## Treasury Financing Operations

## 13-Week and 26-Week February B1118

Issues of regular weekly Treasury bills during February totaled $\$ 7.2$ billion, an amount equivalent to the 13 -week bills maturing. The four new l3-week bills amounted to $\$ .6$ billion and the four new 26-week bille to $\$ 1.6$ billion, with the respective weekly issues of \$1. 4 billion and $\$ 0.4$ billion.

W1th the exceptions of the new bills dated February 13, which are for 90 days and 181 days, the new securlties carry 91 -day and 182-čay maturities. Average rates of alscount on the new bills were as follows:

| Issue date |  | 13-week | 26-week |
| :---: | :---: | :---: | :---: |
| Februery | 5. | 2.721 | 3.107 |
|  | 13. | 2.809 | 3.326 |
|  | 19. | 2.726 | 3.253 |
|  | 26. | 2.589 | 2.978 |

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin," in the tables on "Offerings," "Allotments," and "Disposition," respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills."

SUMMARY OF FEDERAL FISCAL OPERATIONS

The cash income and outgo data appearing in the "Treasury Bulletin," beginning with the February 1956 issue, are on bsis consistent with receifts from and payments to the public as derived in the 1957 and subsequent Budgets of the United States, Special Analysis A. Reconciliation to cash deposits and withdrawsls in the account of the Treasurer of the United States 18 shown on the same basis as in the Budget cocuments. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangemente, data in accordance with the Budget classifications are made avallable month by month. Flgures for back years have been revised where necessary in order to make them as nearly comparable with the Budget classifications as avallable data will perwit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the sulletin.

The Buaget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Govermment as a whole, and therefore Includes transactions not cleared through the Treasurer's account. Recelpts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Govermment-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports. Major intragovemmental transactions which are reported as both expenditures and receicts are eliminated from both. Noncash items which represent accrued obligations of the Govermment to make payments in the future are also eliminated from expenditures but are added later when actual payments are made. Recelpte from the exercise of monetary authority (mostly selgniorage on silver) are excluded as not
representing cash recelved from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cssh borrowing from the public. The net effect of all thess transactions with the public ls reflected in changes in the balance in the Treasurer's account and in cash held outside the Tressury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Budget series, but are 1 imited in coverage to transactions which affect the balance in that account. On the other hand, they include recelpts from the exercise of monetary authority, which are excluded from recelpts from the public in the Budget series.

Beginning with figures for the fiscal year 1953, the serles of transactions with the public ls based on the Monthly Statement of Recelpts and Expenditures of the United States Government," which is complled from reports by all collecting and disbursing officers and includes those trensactions not cleared tarough the Tressurer's account. Cash deposits and witharawals in the Treasurer's account, beginning with the figures for the same year, are reported in dally Treasury statements. For those years prior to 1953 both cash transactions serles are based on a single source, namely, the earller basis of dally Treasury statements which reported separate classifications for budget results, trust account transactions, etc.

## Footnotes to Tsble 4

1/ Net opereting expenditures, or receipta ( - ), as mosured by funde provided by or applied to net gecurity traneactions reflected in Treasury reporta (see Table 7). To a large extent, the be Govarnmeat oponsored enterpriaes aecure funds for their operations by direct borrowing from the public or by caining Faderal securities which they bold, and they apply the net income recelved from operations to repaymeat of borrowing from the public or to inveatment in Federal securities. On that basa, not expenditures for operations are shown in this table in terme of the combined net of disinvestment in Federal ecurities and sale of agency oblisationa in the market,
and net receipta from operationa are shovn in terma of the combined net of invastment in Federal securities and redemption of ageney obligations in the market.
2/ Not reported prior to 1954.
3) See Tabla 7, footnota 1.

4 Does not include revolving fund receipts rapreseating acquired securities amounting to $\$ 1,643,070$ (par value).
5 Differs froai Monthly Stetement of Rece1pts and Expenditurea for December 1958, becsuea of error in elaesification in that statemont.

## Footnotes to Table 5

1/ Pederal intermediate credit bank franchise tax throuen December 1956 and, beginning 1953, alac reimbureement by Panama Canal Company for expenses and gervices.
2) Includee roimburgement by Federal Old-Age and Survivore Ingurance Truat Fund and Federal Diaability Inourance Trust Fund for Administrative axpenses, and alao for refunds of taxes (treated as an offact to refunds rather than being credited to receipts) beginning Vith 1353 for the former and 1959 for the latter; reimburamment by Highway Trust Fund for refund of taxea; redmburbemeat by the Dietrict of Columbia; paymat of dividende, intersat, etc., by Pederal National Martgage Aasociation's secondary market operationa; and Pederal Intermediate credit bank franchisg tax and repayment of capital atock to the Treaeury After December 1956 and before January 1959.
$3 /$ Consiate of payment of earninge and repeyment of cepital atock to tio Troagury throweh 1952; and payment of francbise tax by banke for cooperative beginning 1955, and by Foderal intermediato credit banke beginning January 1959.
4) Includeg relatively gmall amounte of deductione from aslariea paid by truet funda and Government-sponsored enterprises. Beginning with Ifocel yoar 1958 axcludes deductian fram alaries of Diatrict of

Columbia employee (see footnote 6), and beesnning witb flacal year 1959 excludes volumtary contributions.
2/ Consista of paymenta to employees' retirement rund represeating United Staites and Covernment corporation abares of contributioma; paymenta to the Railroad Retirement Aceount (for creditable military service), the Unemployment Truat Pund, veteranat life inaurance iunda, Judicial Survivors Annusty Fund, truet fund for tochnical gervicos and othar asaiatance under the agricultural congervation prorram, and District of Columbie; and awarda of Indian Claims Commisaion.
6/ Include payment by Disurict of Columbia to the Civil Servicee retiromeat fund for 1 ta bbare of contributions, and beginning vith 1958 slao deductions from its pescoll; payment by Railroad Retirement Board to Poderal 0ld-Age and Survivors Inourance Trust Pund; transfers from Civil Sorvice retirement fund to Foreign Service retirement fund from 1955 through 1957; and transiera rrom Reilroad Unemployment Incurance Administration Fund to Unemploymeat Truat Find through 1955.
-Lees than \$500,000.

## Footnotes to Table 6

1) Accruad diacount on aavinga bonda and b12la leas intereat pasd on aavinge bonds and bills redeemed.
2) Public debt intereat due and accrued beginning June 30, 1955, effective date of the change in accounting and raporting from a due and payable beoie to an accrual basie; for 1954, consiste only of public debt intereat checks and coupons outatanding; net increase, or dacreage (-). Not reported as a soparate clearing account prior to 1954. Treated as nancesh expenditures at the time of lsouance of the securities and as cash oxpenditurea at the time of their redemption; net iseuance, or redemption ( - ).
4 Iseued in 1936 in exchange for adjusted service certificstes held by
veterans of World War I. The bonds motured ia 1945.
5/ Iasued in 1 H 7 in paymeat for accumulated leave. The last of theas bonds wetured in 1951.
3) Part of the thited Statea uubscription to the capital of the International Monetary Fund vas peid in the form of nonintereat-bearing nannegotiable notea pagable on demand (see 1947 Annuel Report of the Secretary of the Treasury, pagea 48, 350, and 385).
I/ Cbecks outstandires lese deposite in transit, and changea in other accounta; not incraase, or decraase (-). Prior to 1954 includes alac public debt intereat dwo and unpeld (aes footaote 2).

- Lese than \$500,000.

## Footnotes to Table 7

1) In this table, beginning 1954, in accordance vith troatment in Budget documate, net inve日tment in inited States gecuritiee by Covernmentspansored enterprisen include a ganll anount by other enterprises regarded as representing net transactiona with the public. In Table 4 under "Truet Account and Other Transactione," these amounta are included in trust and deposit fund account inveatment.
2) Does not include investmente represeating acquired securities amounting to $\$ 1,643,070$ (par valuo) and donation of eocurities amounting to $\$ 45,800$ (par value).
3 Differs from Monthly Statemont of Receipto and Enpenditures for December 1958 because of srror in clasaification in that statemont.

4/ Accruod diacount on gavings bonds and bilis, which is included in tho principel of the public debt, leas interest paid on sevinge bonds and b111s redeemed.
5 Treated as nonceat transactiona at the time of sauance and as cabh tranaactions at the time of redemption; net isaunce or redemption ( $=$ ), 6) Excluded from borrowing because the transactions ara treated as expenditures in Table 6.
I/ Frcluded from borroving because the transactions are treated as deductions fram rece1pts in Table 3.
8/ Market trangactions in public debt accurities and agency obligatiano.

- Leas than $\$ 500,000$.

## Source and Avallability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget reoelpts and expenditurea but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounte with Federal Reserve Banks and branches. As the balanoes in thess accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a unlform procedure applicable to all barks whereby customers of banks deposit with them tax payments and funds for the purchase of Govermment securities. In most cases the transaotion Involves merely the transfar of money from a customer's
account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Tressury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of thelr customers.

The tax and loan account system parmits the sreasury to leave funds in banks and in the conmunities in which they arise until such time as the Treaeury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detalled description of the Treasury's depoaitary syetem may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Source: Coilce of Fiacal Assistant Secretary; fleures are on basis of teler ic reports.

1) Spec Appoaitaries are permitted to make payment in the rorm of a de + credit for the purchaae price of united State Government obly 4. 1 ons purchseed by them for the 1 own account, or for the account of their customers who enter subacriptians through them, when this method of payment 1a permitted under the terme of the circulara inviting aubacriptiona to the isaves.
2) Taxes eligible for credit conalat of those deposited by taxpayers in the depositary banka, sa follows: Withheld income tax beginning

March 2948; taxea on omployars and employees under the Federal Insurance Contributions Act beginnine January 1950 , and under the Rallroad Retirement Tax Act beginning July 1951; and a aumber of excise taxes beginning July 1953.
3 under a apecisl procedure begun in March 1951, authorization may be given for incame tax paymenta, or e portion of them, made by checks of $\$ 20,000$ or more drawn on a apecial depoaitary bank to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periode of baspy tax paymenta.

Table 1.- Summary of Federal Securities

Table 2.- Computed Interest Charge snd Computed Interest Rste on Federal Securities

Source: Dally Treasury otatement.
Note: The computed annual intersat charge repreaente the amount of interget that would be paid if asch intereat-bearing iseue outatanding at the end of aach month or yasu should remain outatanding for a year at the appliceble annual rate of interest. The charge is computed for each iesue by epplying the appropriete annual intereat rete to the amount outatanding an that date. Tho aygregete charge for all intereat-bearing isauea constitutea the total computed annual intareat charge. The average annual intereat rate is computed
by dividing the computed annual intereat charge for the total, or for sny group of iseues, by the corresponding principal amount. 1) Excludes guaranteed securitigs held by the Trasoury.

2/ Total includes "Other bond $\mathrm{s}^{2}$; see Teble 3.
3) Included in dobt outatanding at fece amount, but discount value is used in computing annual interest charge and annual interest rate.
4) The annual interest charge and annual interest rate on united States esvinge bonda are computed on the bagis of the rate to maturity applied againat the amount outatanding.

## Table 6.- Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and CertIficates of Indebtednces $\underline{14} /-$ (Continued)

United States asings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series $E, F$, and $G$ were first offered in May 1941. When Series $E$ began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; tc retain them with an extended maturity of 10 yeare at specified rates of interest accrual; or to exchange them for series 0 bonds. A number of changes beame effective May 1, 1952. The principal ones were: The rate of Interest accrual on Series $E$ was inoreased, especially for the near term, with corresponding changes in extended Serles $E$; and Series $F$ and $G$ were replaced by two new issues, Series $J$ and $K$, also at higher interest rates. A new current-ircome bond, geries $H$, similar in interest return to Series $E$, was offered beginning June 1 . Detaile
of these changes appear in the May 1952 Bulletin, page A-1. Series $F$ and $G$ began to mature on May 1, 1953. For the exohange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 1saue, page A-1. Sales of Series $J$ and $K$ were discontinuedafter April 30,1957. An increase in interest rates on Series Eand $H$ was anncunced on April 20,1957, retroactive to February l. Detalls of the changes appear in the May 1957 Bulletin, page A-1. In the tables which follow, Serles $A-F$ and $J$ sales are included at issue price and total redemptions andamount outstanding at current redemption values. Series $G, H$, and $X$ are Included at face value throughout. Matured bonde which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interestbearling debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

Table 4.- Interest-Bearing Public Nonmarketable Securitiea by Iseuea

1) Includes certain obligations not subject to statutory dobt 11 m tetion.

For amount subject to limitation, bee page 1.
2) Excludes trust departments.

3 Includes trust companies and, beginning with figwres for July 19h9, eleo includes stock sevinge banks. Previnusly, those banks were
reported es separato classificetion.
4 Inoludes those banks and Insurance companies not reporting in the Treosury Survej.
5/ Consists of corporete peasion trust funds and profit aharing plans vhich involve retiremente benefits. The deta are compiled from quarterly reporte by trustees of funde which account for approzimetely 90 percest of thited States Government securitles beld by ell corporete peasion trust funds. Since the data are not evellable each month, the regular manthly survey includes boldings by these funde under "Held by all other investors." The quarterly dete are proseoted as supplo. mental information in amorandum colum accompanying the Survey for each roporting dete, beginning with Decomber 31, 1953. The carresponding information from earlier reporte, beginaing with
December 31, 1949, 1 sumarized on page 30 of the Marcb 1954
"Treasury Bulletin."
$6 /$ Uited States saringe bonde, Series $E, F$, and $J$, are shomm et current redemption valus. They vere reported at maturity velue by the banke and insurance companiea included in the Tressury Survey but have beeo adjuated to curreat redemption value for use in this statemoot.
I/ Inclutes $\$ 75$ million depositary bonds held by commerciel banks not included in the Treasury Survey.
8/ Holdings by reporting investore not evallable.
2/ Ercludes guaranteed securities beld by the Treaeury.
10 Federal securities fell Into three broad clesses with respect to the imposition of Pederal incame taxes on income derived fram them. "Wholly" tax-exempt securitiss are those with the income exempt fram both normal tax and surtax. "partielly" tax-oxempt securitios ere thnee vith the income exempt from the normal tax except thet in the cese of partielly tax-erempt Treesury bonds, interest derived from $\$ 5,000$ of principal amount owned by any one holder is elso exempt from the surtax. "Tarable" securitioe are those vitb the income subject to normal tax and surtar.
Remaiaing footnotes on folloving page.

## Section II - Interest-Bearing Securities Issued by Federal Agencies but

 Not Guaranteed by the United States Government

The tables which follow provide an analyeis of the security holdings of commercial banks reporting in the Treasury survey of ownership of securitias lsaued by the United Statea Government and by Federal agenciea. The Plgures show the total holdinge diatributed according to Federal Reaerve member-bank clasaea and nonmember banke.

This analysis of oommerolal bank ownership was firet published in the May 1944 ieaue of the "Treasury Bulletin" based on the survay data for Deoember 31, 1943. It has appeared at semiannual or quarterly intervala eince that time, and 18 now being published for the June 30 and December 31 aurvay data.

Solrce: Internal Revenue Service reports for detall of collectione by type of tax; delly Treasury statament for budget ricelpte from internel revenu through the flecel yoar 1952, and the manthly atatement of recelpte and expeodituree of the Govermment for receipte thereafter (for oxplanation of reporting bese in these publicaticme, ese page II). Certein detell by type of tax $1 e$ aveilable coly from returns filed with the Intarnal Rovenue Sorvice. The flauree shom inolude collectione for credit to special accounts for certain ieland poeseseione, ae reported by the Internal Revenue Service. Beginaing with the fiecal year 1955 they include the amounta of tax collected in Puerto Rico upan articlos of merchand foe of Puerto Fican manufacturs coming into the United Stetee. Figuree for 1954 have been revieed to the bame beale. Pigures for previous years include only amounte collected at porte of entry into the tinted Statos.
1/ Differeccee between the amomte of intemal revenue reported by the Internal Reveave Servioo ae collectione for given periods and the amonte reported in Treasury statemente as buiget receipts for the same periods arose becauas of differences in the tine when payments vere included in the reepective reporte. Tax paymente aro included in buiget receipte when they are reported ae credite to the account of the Treasurer of the United stetee. Prior to July 2954, thej vere included in Internal Revenue Service collection reporte after the returns to which they applied had beer recelved in internal revenue offices. Under proceduro begun in 1950 with withheld income tax and old-age ineurance taxas and later oxtonded to rail road retiremat taxee and many exaleod, theee taree are paid curreath lato Treasury depoeltaries and the depoeitary recoipte, as evidence of euch pay ments, are attached to quarterly rotume to the Internal Reverue Service. thder manth in vhich the depositary recelpts are lesurd to the torpayers.

Revieed accounting proceduree effective July 1, 1954, extended the ame practioe to Iaternal Reveave Service collection roporte. 2f Monthly figuree include eocial security tax on eolfemploy pent income, which 18 levied and collected as part of the individual income tax beginning with the tarable joar 1951. Fiscal yoar figtroe exclude this tax, on the beals of ostimates begicming 1952 (see footnote 3), and it is included under "Old-age and disability ineurance."
3) In Intermal Revenve Service reports beginning January 1951 curroat colleotione heve not been soparated ae to tspe of tax but the breakdown shown for ilecal yeare is beeod on eetimates made in eccordance vith provisions of Sec. 201 of the Sociel Security Act, ae amended (42 U.S.C. 402), for trensfer of tax recoipte to the truet fund (eee "Buiget Receipte and trpand. 1tures," Table 1).
4/ Beginning with the fiecal yoar 1955, collections show inolude undistributed depositary rece1pts and unappliod collectione. For oxcise taves theee receipts are included in the total cinly. Total collections include "Taxes not otberviae claselfied."
5) Budget rece1pte for 1956 were reduced by $\$ 3,566$ thousand rep-
rosenting tar collections transferred to the Government of Guan pursuant to the act approved August 1 , 1950 ( 64 Stet. 392), but thio amount wae included in oollections reported by the Intornal Revenue Service. Begimang with 1957, eucb collec tione are oxcluded also in Internal Revenue Sorvice roporte.
6/ Detail ie reportod by quartore beginning with the fiscal year 1956.

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8 , 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information 18 published at lees freouent intervals. Reporto by banks, bankers, eecurities brokers and dealers, and industrial and commercial conoerns in the United States are made Initlally to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "forelgner" as used in these reports covers all inetitutions and individuals domiciled outside the United States and its Territorles and possessions, the offlcisi institutions of foreign countries, wherever buch institutions may be located, and international organizations. "Short-term" refers to original maturitles of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin,"
pages 45-47. As a result of changea in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three eections which follow are published monthly. They provide sumasiles, by periode and by countries, of data on short-term banking liablilties to and clalms on forelgners and transactions in long-term securities by forelgners, and present cetalled breakdowns of the latest avallable preliminary data.

Section IV provides supplsmentary data in ilve tables which appear at less frequent intervals. Sable l, shortterm foreign liabilities and claine reported by noninnancial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term forelgn liabllities and claims reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdings of forelgn countries and international institutions, are published quarterly in the March, June, September, and December isoues. Table 4, forelon credit and deb1t balances in brokerage accounts, appears sem1annually in the Karch and Seotomber 1saues. Table 5, short-term liabllitles to forelgners in countriee and areas not regularly reported separately by banking institutions, is presented ennually, appearing in the April 18 aus through 1958 and in the March 18 sue thereafter.

Note: Beginning with this 1ssue, it bes been found possible to sdvance the publication of this table by one month. Previous data in this series may be found in April 1 ssues of the Bulletin, 1950-1958.
I/ The dete in this table are bssed on annual reports from banks and bankers in the Second (Naw York) Federal Reserve District only, and include funde beld in an eccount with the U. S. Treesury. Aree totals will not agree With those shown for the corresponding datea for "Other Europe," "Other Latin Americe," "Other Asis," and "Other Commsiee," in the
regular monthly eeries in the "Treasury Bulletin." Countries have been omitted or erouped to evoid revesiling individual accounte or the foreign position of any reporting institutions.
2) Part of United Areb Republic (Egypt and Syrie) eince February 1958. pata on lisbilitios to Egypt eppear in Section II, Table 1, and Section III, Teble 1.
n.e. Not aveileble.

I Revisod.

The current ilnancial etatemente of corporations and certaln other business-type activities of the United States Government which appear in the "Treasury Bulletin" beginning with the Auguat 1956 issue are compiled from reports submitted to the Treasury under Department Circular No. 966 , 18 sued January 30,1956 , and Supplement No. 1 , 1ssued June 1, 1956. The regulations so leaued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 ( 31 U.S.C. 66 b ), and represent another atep in the program of comprehensive and integrated Government accounting and linancial reporting for which authority was provided in that act. They eupersade Budget-Treasury Regulation No. 3, 18 sued under Executive order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which 11nanolal statemente previously published in the Bulletin were aubmitted.

In coverage, Department Ciroular No. 966 requires submiesion of financial statements by all wholly owned and mixed-ownership Government corporations specilically included in the Government Corporation Control Aot, as amended ( 31 U.S.C. 846,856 ); and all other aotivities of the Government operating as revolving funde for which business-type public enterprise or intragovernmental fund budgete are required by the Buresu of the Budget. Other aotivitles and agencles whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and aotivties and agenciee whose operations result in the accumulation of substantial inventorles, investmente and other recoverable aseets, may be brought under the regulations as agenoy sccounting eyeteme are developed to the point where they are capable of furniehing the finsncial reporte required.

Four kinds of inancial statements are oalled for by Department Circular No. 966. They are etatemente of Ilnancial condition, income and expenee, oource and application of funds, and certain commitmenta and contingencies. The etatementa of financial condition are
published quarterly and appear as Section I in the series of tables. The ilret data under the new regulstions are for March 31, 1956, and were presented in the August 1956 Bulletin. Statemente of income and expense and acurce and application of funde are published semlannually, for June 30 and Deoember 31 reporting dates, and appear as Sections II and III. The first of these otatemente under the new regulations cover the Placal year 1956, and were publlahed in the January 1957 Bulletin. Within the sections, the agencies are grouped in eeparate tables by type, as follows: public enterprise revolving lunds, intragovernmental revolving funds, certain other activities, deposit funds, and truet revolving funde.

Supplement No. 1 added to the coverage by including all executive agencies and activities not reporting under Department Circular No. 966, but required only a statement of financial condition annually as of June 30. These are mainly not bueinees-type activities, and those which had not yet developed formal accounting procedures to provide complete balanoe sheet types of etatements were authorized temporarily to report only the asset side. Thue the supplement rounds out provision for the information on properties and assets of the United Statee Government which the Treasury has been asked to furnish to the Comittee on Government Operations, House of Representatives, for a continuing study of the asoets of the Government. The flret comprehensive reporting under Supplement No. I ie for June 30, 1957, and the data were published in the Deoember 1957 issue of the Bulletin as Part B of Table 4 in seotion I.

A summary of loans outetanding for a seriea of dates is included in Seotion $I$ of the Bulletin preeentation beginning with the June 1958 iesue. Two claesificatione of the loans are shown, one by type and cne by agency. Data prior to 1956 are based on the earlier reporting requiremente, which provided for complete coverage of Govermment lending agencies.
