## Reporting Bases

Data on recelpts, expencituree, and debt which appear in the "Treaeury Bulletin" are based largely on iwo Treasury financial reporta, the "Dally Statoment of the United States Treasury" and the "Monthly Statexent of Receipte and Expenditures of the United Statee Fovernment." Certain monetary atstistice are based at least in part on the "Circulation Statement of United states Money. " Where theae atatedenta are glven as sourcea for individual tables, they are cited by name only. Their reopective reporting basea are deacribed below. For other data in the Bulletin, information on bources or reporting baees is given in connection with the tablee thamalves.

The monthly statement of recelpts and expenditures was firet publiohed for February 1954, and replaced the dally etatement as the primary eource of information on budget results and other recelpt anc expenditure deta claselfled by type of account. At the ama the, the dally atsiexent wes obanged to a otatement of cash deposita and withdrawala sffecting the account of the Treapurer of the Unlted States. Both publications have provided comparative ilgures on their respective basee from the beginning of the flacal year 1953. The announcement of Femmary 17, 1954, with reopect to these reporting changee way be found in the April 1954 1seue of the Bulletin

The monthly etatenent ahows all recelpta and expenditures of the Governvent, including thoee made from esoh accounta held outalde the United Statea Tresary. The information le complied from reports by the Treaourer of the United States and by all other collecting and diabursing agenclee, including those agencies which maintain checking accounta in comerclsl banka. Theae reporta cover traneactione recorded in the accounts of the agenciea during the reporting period. The net of the tranaactions as complled from these reporte 18 reconclled in the monthly otatement to changea in the balance in the Treseurer'a secount and in cash held outside the Tresourer'o account and changea in the publle debt outatanding.

Recelpte of taxes and customs cutlea ere reported on a collections basis. Other recelpts are reported pertially on a collections basis and partlally on a depoeite baels. Expencitures, exoept intereet on the public debt, are reported on the basic of checss lasued or cash paymente made by diaburelng officere. Trunsactions of an interfund or intragovernmental nature are Included on the same baels even thougb the actual loauance of checks may not be involved. Interest on the public debt is included on an accrual basie beginning with plgurea for June 1955 and the $118 c a l$ yesr 1955. Prior to that, it wes included on a due and payable basis. The same reporting basie as that in the monthly atatement providea the flacsl year ilgures for the Ireasury's "Combined Stetenent of Receipts. Expenditurea and Balances of the Undted Statee Governient" and for sctual recelpte and expendituree in the "Budset of the United States Government."
he delly etatement on the new basie was firot losued for February 17, 1954. In the deposita and withdrawal ae ahown, no distinction le made ae to the type of accounts (budect, truat, etc.). The depooite are on the bsala of certificstes of deposit cleared thrount the account of the Treasurer of the United gtates. Total withdrawale are on the basie of checks pald or caeh diabureements made out of the Treaeurer'e account. Some of the withdrawal cla日日iricatione chown are reported on the bagle of malled reporta of checis 1 beued and are adjusted by mesne of clearing accounto to the total of checks pald. Except for relatively minor amounte, noncash interfund and other intragovernmental transsctione are excluded. The public debt flguree In the dally eqatevent aloo are on a "clearance" baels, with the exception of those 1 seusance and retirement tranaectiona reported on the basis of telegrame from Federal Reserve Banke. Noncaeh debt tranaactione are included, however.

The dally efatement berore Febmary 17, 1954, covered not only transactlong cleared through the Treasurer's account but also certain Governeent agency tranaactions whlob were handied chrough comercisl bank accounts, and Included noncash interfund and other intragovernmental traneactions. It propided inforatation almlar to that in the present dally atatsmant with reapeot to the atatua of the Treacurer's account, and almilar to that in the present ond-of-xonth dally geaterent witr reafect to debt reuance, retirement, snd amount outstanding. Receipto and expenditures, however, were classifled by type of account, and the budget realalta shown in the dally ateqerent were used as the basio for reflecting the reaulta uncer the Fresident'e budget program as enacted by the Congress.

Recelpts ware on the basie of deposits as they cleared the Treasurer'e account. Expendituree cleared through the Treaourer's account were reported on two auccesslve bases. Through 1946 they were on the basia of checke pald by the Freasurer of the United Ststea. Beginning with 1947, expendituree wade through the Cacilltle of the Treasury Departtent's Division of Disburgement were on the basis of check losuec, whlle certaln othera, principally thoae of the Defartwent of Defenee and ite predecetcor organizations, were on the bsale of checks palo. Transactions handled through comerciel bank accounts, consieting of market tranaactione in public debt and guaranteed securitlee, were as reported by the agenciee. Interact on the public debt wac included on due and payable basig beginning with November 1949 and on a checks-palo bede prior to thet time.

The circulation ataterient reflecte trensactione through the Treseurer's account which effect monetary atocke of gold and allver and the smounte of coin and currency in the money supply of the country. It le laeved later than the dally etatement, bowever, and the llgures are hased on transactions consumated during the reporting perlod even though some mey not have cleared the Treaeurer'e account durlng that period.

## Treasury Financing Operations

## 13-Week and 26-Week Bill:

Regular issues of weekly Treasury bills during May 1959 totaled $\$ 5.6$ billion, an amount equivalent to the l3-week bills maturing. The four new l3-week bills amounted to $\$ 4.0$ billion and the four new 26-week bills to $\$ 1.6$ billion consisting of respective weekly issues of $\$ 1.0$ billion and $\$ 0.4$ billion.

With the exception of the new 26 -week bills dated May 28 , which are for 183 daye, the new securitiee carry 91-day and 182-day maturities. Average rates of discount on the new bills were as follows:

The cash inoome and outgo data appearing in the "Treasury Bulletin," beginning with the Februery 1956 leeue, are on a basis coneletent with racelpte rrom and paymente to the public as darlved in the 1957 and aubsequent Budgeta of the United Statea, Spaoial Analyaie A. Reoonciliation to cash dapoaite and withdrawala in the account of the Traasurar of the United Statea is shown on the aame basia as in the Budget dooumenta. There ia also ahown the amount of net cabh borrowing from, or rapaynent of borrowing to, the public. By these arrangements, data in accordanoe with the Budget claselflcationa are made avallable month by month. Figures for back yeare have been revised where naceseary in order to make them as nearly oomparable with the Buaget olasellications as avallable data will permit. For thie reason cartain of the ilgurea differ somewhat from those publiahed in earlier Budget documenta $a 8$ well as in the Bullatin.

The Budget aerlea of cash iraneaotione 1a dasigned to provide information on the flow of money between the public and the Federal Govarnment as whole, and therefore Includes eranaactions not cleared through the Treasurer'e acoount. Recelpts and payments Include transactions both In budget accounts and in trust and deposit fund accounts. Operatione of Govermment-sponeored enterprisea are inciuded In paymente on a net basis as rallected in Treasury raporta. Major intragovemmental traneaotiona whioh are reported as both expenditures and receipts are eliminated from both. Noncash lteme whioh rapresent acorued obllgatlone of the Government to make paymente in the future are also eliminated from expenditurea but ara aded later when aturl paymente are made. Recelpte from the exerele of zonetary muthority (moatly aelgniorage on pllver) are exoluded it not
repreaenting caah raceived from the public. Fedaral cash borrowing from the publio includea not borrowing by the Treasury through public debt traneaotione and also net borrowing by government aganciee and Government-eponaorad enterpriees through ales of thelr own aecurlitioa. It excludea changes in the public dabt whioh do not represent direot cash borrowing from the publio. The nat effect of all thesa tranaactiona with the public ie reilected in changea in the balance in the Treasurer'a account and in oash held outaide the Treasury.

Cash traneaotione through the Traaaurer'e account are oimilar in ganeral concept to those included in the Budgat eerles, but are limited in coverage to tranaactiona whiah affect the balance in that account. On the other hand, thay includa reoelpta frow the axarolse of monetary authority, which are excluded from recolpte from the publio in the Budget oerloa.

Beginning with plguree for the fiscal jear 1953, the oerles of tranazotions with the public 10 based on the MMonthly Statement of Receipise and Exponditures of the United Statee Government," whioh $1 a$ complled from reporta by all colleoting and diaburaing officars and includes those transactiona not oleared through the Treasurer'a aocount. Cash depoelte and withdrawale in the Treasurer's sooount, beginning with the figures for the sane year, are reported in dally Treasury etatementa. For thoee yeara prior to 2953 both cash transactions asiee are based on a oingle source, namely, the eamiar basie of dally treasury otatemente which reported esparate clasalficatione for budgat raoults, trust account tranactions, eto.

## Source and Availability of the Balance in the Treasurer'a Account

The account of the Treasurer of the Uniced States reflects not only budget recelpts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the $t a x$ and loan accounts with thousands $o$ : commercial banig throughout the country.

Depositb to tax and loan accounts occur in the normal course of business under a unffora procedure applicable to all banks whereby customers of banks defosit with them tax payments and funds for the purchase of Government socurities. In most cases the transaction Involves merely the transfer of money from a customer's
account to the tax and loan account in the same bank. On occasions, to the extent authorized by the sreasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public cebt securities entered for their own account as well as for the account of ticelr customers.

The tax and loan account system permits the sreasury to leave funde in banks and in the compunities in wilich they arlse until such time as the Treasury needs the funds for 1 tr operations. In this way the Treasury is able to neutralize the effect of its fluctuatinj operations on bank reserves and the economy.

A cetalled description of the Treasury's decositary system may be founc in the Annual Report of the Secretary of the Treasury for 1955, pages 275-234.

Note: The computed amusl intersat charge repregents the amount of interest that would be paid if asch intorest-bearing issue outatanding at the end of each month or jear should remain outatanding for a year at the applicable annual rate of intereat. The charge is computed for each isaue by applying the appropriate annusl intereat Fate to the amount outatanding on that date. The asgregate charge for all interest-bearina isaues constitutes the total computed
annual interest chargo. The sverase annuel interest rate 18 computed
by dividine the computed annual interest charge for the total, or for any group of iasues, by the correaponding principal amount.

1. Excludes guaranteed securitiea held by the Treasury.

2/ Totsl includas "Other bonds"; see Table 3.
3 Included in debt outatanding at face amount, but diacount value is used in computing annual interest charge and annual interest rete.
4 The annusl interest charge and annual interest rate on United States aspings bonda are computed on the basis of the rate to maturity applied asainst the amount outatendine.

United States asinga bonda were first offered in March 1935 and began to mature in March 1945. Serias A-D were sold between March 1935 and the end of Apr11 1941, anc Series $E, F$, and $G$ were Pirst offered in May 1941. When Series E began to mature on May 1, 1951, ownera of the matured bonds were offered three options: To redeem the bonds in cash in accordanca with the original texma; to retain them with an extended maturity of 10 yeara at epecifled rates of intereat accrual; or to exchange them for Serlea $G$ bonds. A number of changes became sffective May 1, 1952. The principal ones wore: The rate of Interest accrual on Series $E$ was incrsased, especially for the near term, with corresponding ohanges in extended Series $E$; and Serios $F$ and $G$ were replaced by two now Isauea, Series $J$ and $K$, also at higher interestrates. A new current-ircome bond, Series $H$, similar in interest return to Seriea $E$, was offered beginning June 1. Detaila
of these changes appear in the May 1952 Bulletin, pase A-1. Serles $F$ and $G$ began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, aee the May 1953 1sвue, page A-1. Sales of Serlee J and $K$ were discontinued after April 30, 1957. An increase in interest rates on Seriea $E$ and $H$ was announced on April 20,1957, retroactive to February l. Detalla of the changes appear in the May 1957 Sulletin, page A-1. In the tables which follow, Serlea $A-F$ and $J$ sales are includece at issue price and total redemptions andamounte outatanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonda which have been redeemed are included in redemptione. Matured $F$ and $G$ bonds outstanding are included in the interestbearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceaaed.

ravenue through the fiscal yesr 1952, snd the monthly stetement of receipts and expenditures of the Government for receipts thereaftar (for axplanation of raporting beses in thesa publications, sae pags II). Certalo detall by type of tax is availahle only from raturns filed with the Internel Revanue Service. The figures shown include collections far cradit to apecial eccounts for cartain island possessions, as raportad by the Internal Revenue Service. Baginning with the fiacal year 1955, they include the amounts of tax collected in Puarto Rico upon articles of merchendise of Puarto Rican manufecture coming Into tha Unitad Statas. Figures for 1954 have been revised to the seme besis. Figures for pravious yesra include only amounta collected at ports of entry into the United States.
1/ Differancas between the amounts of internal revenue reported by the Internal Revenue Service as collectiona for givan periods and the emounts reported in Tressury statements as budgat racaipts for the same periods arose hecause of differances in the tima whan payments were included in the respective reports. Tax payments are included in budget receipts When they are raportad as credits to the account of the Trassurer of the Undted States. Prior to July 1954, they were included in Internal Revenue Service callection reports aftar the raturns to which thay appliad had bean receivad in intarnal ravanua offices. Undar procedura hegun io 1950 with withheld income tax and old-age insurence taxas and latar extended to reilroed retiranent taxes and many excises, these taxes are paid currently into Treasury depositarias and the dapositary recelpts, as evidence of auch paymenta, ara attached to quarterly returos to the Internal Havenue

Sarvica. Under this procadure, the payments ara ibcludad in budget racalpts in the month in which the dapoaitery receipts are lasued to the texpayers. Revisad accounting proceduree effective July 1, 1954, extended the same practica to Internal Revenue Service collection raports.
2/ Montbly figures include socisl sacurity tax on self-amployment income, Which ia lavied and collected as part of the individuel income tax beglnning with the taxable year 1951. Fiscal yaar figures axclude this tex, on the basis of extimatas beginning 1952 (sae footnote 3), and it is includad under "Old-age and disability insurancs."
3/ In Internal Revanue Sarvice raports beginning January 1951, current collections have not been saparsted as to type of tax but the breakdown shown for fiscal years is besed on astimates made in accordance with provisions of Sec. 201 of the Social Security Act, sa gmended (42 U.S.C. 401 ), for tranafor of tax racaipts to the truat funds (see "Budgat Racalpts and Expendituras," Table 1).
4/ Beginning with the fiscal yasr 1955, collections shown include undistributed dapositary recelpts and unspplied collections. For excise texes these receipts are included in the total only. Tatal collections Include "Taxas not otherwise classiflad."
5/ Budget recespts for 1956 were raduced by $\$ 3,566$ thousand rapresenting tex collections trensferrad to tha Governsent of Cuam pursuant to the act approved August 1, 1950 ( 64 Stat. 392), but this amount was includad in collactions raported by the Internel Revenue Sarvice. Beginning with 1957, such collactions are axcludad also in Intarnal Revenue Sarvice reports.

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15 , 1934. Executive Oraer 10033 of February 8,1049 , and Treasury regulations promulgated thereunder. Infornation covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and incustrial and commercial concerns in the United States are made initially to the Federsl Reserve Banks, which forward consolldated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United states and its serritorles and possessions, the official institutions of forelgn countries, wherever such ingtitutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A cetalled discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 195413 sue of the "Treasury Bulletin," pages 45-47. As a result of changes in presentation introduced in that iesue, not all breakdowns previously
publisher will be exactly comparable to those now presented.

The first three sectione which follow are fublished monthly. They provide summaries, by periods and by countries, of data on short-term banking liablilties to and claims on foreigners and transactions in long-term securlties by foreignera, and present detailed breardowns of the latest avallable preliminary data.

Section IV provides supplementary dsta in $s 1 \times$ tables which appear at less frequent intervals. The current financial statementa of corporations and certaln other businese-type activities of the United states Government which appoas in the "Treasury Bulletin" beginning with the August 1956 iesue are compiled from reporta submitted to the Treasury under Dapartment Circular No. 966 , 18aued January 30,1956 , and Supplement No. 1 , 166ued June 1,1956 . The regulations so $188 v e d$ are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 ( 31 U.3.C. 66 b), and represent another step in the program of comprehensive and integrated Government accounting and ilnancial reporting for which authority was provided in that act. Thoy superesde Budget-Treasury Regulation No. 3, 18 sued under Exscutive Order No. 8512 of Auguet 13, 1940, 日e amended by Executive Ordar No. 9084 of March 3, 1942, under whicb 11nanoial statementa proviouely published in the Bulletin were oubwitted.

In coverage, Department Ciroular No. 966 requirea submiseion of financial etatemente by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Aot, as amended ( 31 U.S.C. 846, 856 ); and all other aotivitien of the Government operating as ravolving funde for whicb business-type publio enterprise or intragovernmental fund budgete are required by the Bureau of the Budget. Other activitiee and agencies whose operations, servioss, or functions are largely eelf-liquidating or primarily of a revenue-producing nature, and sotivities and agenclee whose operationa result in the accumulation of subatantial inventories, investments and other recoverable assets, way be brought under the regulations as agenoy eooounting ayateme ara developed to the point where they are capable of furnishing the inancial reports required.

Four kinds of financial atatements are oallad for by Department Circular No. 966. They are statements of Inancial condition, income and expense, source and application of funds, and certain commitments and contingencies. The etatements of inancial condition are
published quasterly and appear as Section I in the series of tables. The firat data under the new regulationa are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of Income and expense and source and application of Punds are published semlannually, for June 30 and December 31 reporting dates, and appear as sections II and III. The ilret of these statements under the new regulationa cover the ilacal year 1956, and were published In the January 1957 Bulletin. Within the eections, the agencies are grouped in separato tables by type, as follows: public enterprise revolving funde, intragovernmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1 added to the coverage by including all executive agencies and activitie not reporting under Department Circular No. 966, but required only a statement of Ifnancial condition annually as of June 30. These are mainly not business-type notivities, and those which had not yet developed formal accounting proosdures to provide complete balanoe sheet typas of statementa were authorized temporarily to report only the aseet bide. Thus the supplement rounda out provision for the information on properties and assete of the United States Government which the Treasury has been asked to furnish to the comittee on Government Operations, House of Representatives, for a continuing study of the assets of the Government. The flrst comprehenoive reporting under Supplement No. 1 1s for June 30 , 1957, and the data were published in the Deoember 1957 1esue of the Bulletin as Part B of Table 4 in Seotion I.

A summary of losns outstanding for a serles of dates is included in seotion $I$ of the Bulletin presentation beginning witb the June 1958 18sue. Two olaselfications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirementa, which provided for complete coverage of Government lending agenoles.
