## Reporting Bases

Data on receipts, expanditures, and debt which sppear in the "Treaaury Bulletin" are based largely on two Treaaury Ilnancial reporta, the "Daily Statement of the United Statea Treasury" and tha "Montbly Statament of Receipts and Expenditures of the United Statea Government." Certaln monatary statlatica are based at leaat in part on the "Circulation Statement of Unitad States Money." where theee atatements are given as sourcea for individual tables, tbay are cited by name only. Their reapective reporting baace are deecribed balaw. For other data in tha Bulletin, information on sources or reporting basea is given in conrection with the tables themaelvea.

The monthly atatement of recelpta and expenditures wa firat publlehed for February 1954, and replaoed the dally etatement aa the primary aource of informetion on budget reaults and other recelpt and expenditure data claasifled by type cfaccount. At the eama time, the dally etatement was ohanged to a atatemant of caah depolta and withdrawals affecting the accunt of the Treasurer of the United Statea. Both publicationa have provided comparative figures on their reapective baacs from the baginning of the riecal year 1953. Tbe announcement of February 17, 1954, with reapact to these reporting changea may be found in the April 1954 18ave of the Bullatin.

The monthly atatement ahowa all receipta and expenditurea of the Government, including thoas made from caah accounta held autaide the United Statea Treaaury. Tha Information le complled from reporta by the Treaeurer of the United States and by all other callecting and dieburalng agenclea, including thoae agenciea which maintain cheoking account in commercial banka. Thaae reporta cover tranaactione recorded in the accounts of the agenclee during tha reporting period. The net of the transactiona as complled from thasa reporta la reconclled in the monthly atatement to ohangee in the balance in the Traaaurer'a account and in caah bald outalde the Treasurer'a aocount ana changee in the public debt outetanding.

Receipte of taxea and cuetoma dutiea are reported on a collectiona basie. Other recalpts are reported partially on a collectiona basia and partially on a depooita basia. Expenditurea, except intereat on the public debt, are reported on the baala of checka laaued or cash paymenta made by diaburalng offlcera. Tranaactiona of an interfund or Intragovernaental nature are includad on the sama basia even though tbe actual lasuance of cbecks may not be involved. Interast on the public debt ia included on an accrual baela beginning with pigurea for June 1955 and the riacal year 1955. Prior to that, it waa included on a due and pajable basic. The aama reporting basia as that in the monthly atatement providee the llacsl year flgures for tha Treaaury'a Combined Statement of Receipts, Expenditurea and Balancea of the United Statea Government" and for actual receipta and expenditures in the "Budget of the United States Government."

Tha dally etatement on the new bala was flrat lasued for February 17, 1954. In the depoaita and withdrawsle as ahown, no distinction 1日 made as to the type of accounts (budget, truat, etc.). Tha deposita are on the basia of certificates of depcait cleared through the account of the Treasurer of the United Statea. Total withdrawala are on the basis of checka paid or caah disburaementa made out of the Treaurer's account. Some of the withdrawal claseifications ahown are reported on the basia of mailed reports of checisa $18 a u e d$ and are adjuated by means of clearing accounta to the total of checka paid. Except for relatively miner amounta, noncaah interrund and other intragovernmental transactions are excluded. The public debt IIgurea In the dally etaterent also are on a "clearance" basia, with the exception of those lasuance and retirement transactiona reperted on the baais of telagrana from Federal Reaerve Banka. Noncaah debt tranaactions are included, however.

The dally atatement before February 17, 1954, covered not only tranaactiona cleared through the Treaaurer'a account but also certain Governmant agency tranaactions which were handled through commercial bank accounta, and included noncash interfund and other intragovernuental tranaactiona. It provided information almiler to that in the preaent dally atatement with respect to the atatus of the Treaburer's account, anc almilar to that in the present end-of-month dally atatement with resfect to debt lasuance, retirement, and amount outstanding. Receipts and expenditurea, bowever, were cleasifled by type of account, and the budget reaulta ahown in the dally ateterent were uaed aa the bala for reflecting the reaulta under the Fresident's budget procram as enacted by the Congresa.

Receipta were on the basis of deposita as they cleared the Treasurer'a account. Expenditurea clearea through the Treaaurer's account were reported an two buccesalve bases. Through 2946 they were an the bacis of checke pald by the Treasurer of the Uniteó States. Beginning with 1947 , expenditures made through the facilitlee of the Treasury Department'a Division of Diaburement were on the basia of checka lsaued, while certaln cthers, prinolpally thoae of the Department of Defenae and its predeceasor organizations, were on the basis of checka paid. Transactiona handled through commercisl bank accounte, conalating or market tranaactiona in public debt and guaranteed aecuritlea, were as reported by the agenciea. Intereat on the public debt was included on a due and payable baala beginning witb November 1949 and on a checke-paio baela prior to that time.

The circulation atatement reflects trensactiona through tha Treasurer'a account which affect monetary atocka of gol"d and allver and the amounta of coin and currency in the money aupply of the country. It 18 laaued later than the dally atatement, bowever, and the rigures are based on tranaactions consummated during the reporting perlod even though some may not hava cleared the Treaeurer's account durlng that perlod.

## Treasury Financing Operations

## August B111s

"New cash" totaling \$l.6 billion was raised by the Treasury Department in August by sale of Treasury bills. Tax anticipation bills brought in $\$ 1.0$ billion and additional adounts of weekly issues of 13 -week bills, $\$ 0.6$ billion.

The tax anticipation bills consisted of an adational offering of the issue dated July 8, 1959, to mature March 22, 1960. Tenders for the 216-day bills (issued August 19) were opened on August 13 , with settiement required by August 19. The terms of subscription, deposit, payment, and redemption were the same as those for the original issue (described in the July Bulletin, page A-l). The average rate of discount was 3.719 percent and tenders were accepted in the amount of $\$ 1.0$ billion. Included were noncompetitive tenders of $\$ 200,000$ or less aggregating over $\$ 231$ million which were accepted in full at the average price of acceptea competitive bids.

13-Week and 26-Week 31118
Regular weekly Treasury bills issued in August totaled \$6.2 billion which refunded $\$ 5.6$ billion of maturing 13 -week and 26 -week bills and provided $\$ 0.6$ billion in "new cash." The four new issues of 13 -week bills amounted to $\$ 4.6$ billion and the four of 26 -week bills to $\$ 1.6$ billion. Of the 13 -week bills, the first, on August 6 , was for $\$ 1.0$ billion and the others were for $\$ 1.2$ billion each. The first three have 91-day terms and the fourth a g2-day maturity. Each 182-day issue was for $\$ 0.4$ billion. Average rates of discount on the regular weekly bills were as follows:

3 Beginning 1955 excludes net transections of Government-sponsorad enterprises (aes Teble 3).

The cash income and outgo data appearing in the "Treasury Bulletin," baginning with the Fobruary 1956 lasue, are on a basis consiatent with receipta from and paymenta to the public as derived in the 1957 and aubaequent Budgeta of the United Statea, Special Analyaia A. Reconcillation to caah deposits and withdrawals in the account of tha Treaaurer of the Unitad Statea ia ahown on the same basia as in the Budget documenta. There ia alao ahown tha amount of nat caah borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget claasificationa are made available month by month. Figurea for back yeara have baan reviaed where neceaaary in order to make them as nearly comparable with the Budget clasaificationa as avallable data will permit. For this reason certain of the ilgurea differ aomawhat from those published in earlier Budget documenta as well as in the Bulletin.

The Budget seriea of cash tranaactiona $1 a$ dealgned to provide information on the flow of money between tha public and the Federal Government aa a whole, and therefore includea tranaactions not cleared through the Treaaurer'a account. Receipta and payments include tranaactions both in budget accounta and in trust and deposit fund accounts. Operations of Government-aponsored enterprisea are included in paymenta on a net basis aa reflected in Treaaury reporta. Major intragovermmental tranaactiona which are reported as both expenditures and receipts are eliminated from both. Noncash itema which reprasent accrued obligations of the Government to make paymenta in the future are alao aliminated from expenditurea but are adod later wben aotual paymenta are made. Recelpts from the exerciee of monetary authority (moatly selgalorage on allver) are excluded as not
repreaenting cash recelved from the public. Federal cash borrowing from the public includea net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencles and Government-sponaored enterpriaas through salea of their own securitiea. It excludea changes in the public debt which do not represent direct caah borrowing from the public. The net effect of all theaa tranaactions with the public ia reflected in changea in the balance in the Treasurer's account and in caah held outside the Treasury.

Cash tranaactiona through the Treasurer's account are almilar in general concept to those includad in the Budget aeries, but are limited in coverage to tranaactions which affect the balance in that account. On the other hand, they include recelpta from the exercise of monetary authority, which are excluded from recelpta from the public in the Budget sorles.

Beginning with ilgurea for the flacal year 1953, the aarles of transactions with the public 18 based on the "Monthly statement of Receipts and Expenditures of the United Statea Government," which ia complled irom reporta by all colleoting and diabursing officars and includes those tranaactiona not cleared through the Treasurer's account. Cash deposita and withdrawala in the Treasurer's account, beginning with the figuras for the same year, are reportad in dally Treasury atatementa. For those yeara prior to 1953 both cash tranaactions serles are based on a alngle acurce, namely, the earlier basia of dally Treasury atatamenta which reported aeparate claselficatlona for budget results, truat account tranaactions, etc.

## Source and Avallability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget reoelpts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reaerve Banks and branches. As the balances in these accounts become depleted, they are reatored by calling in (transferring) funds from the tax and loan accounts with thousands of comrercial banks throughout the country.

Deposits to tax and loan accounts occur in the normsi course of business under aniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaotion involves mersly the transfer of money from a customer's
account to the tax and loan account in the same bank. On occsaions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for thelr own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the compunities in which thay arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detalled description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

United Statea aavings bondo were first offered in March 1935 and began to mature in March 1945. Seriea A-D were sold between Maroh 1935 and the end of Apr11 1941, and Series $E, F$, and $G$ were ilrat offered in May 1941. When Serlee $E$ began to mature on May 1, 1951, ownera of the matured bonda were offered three optiona: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 yeara at epecifled rates of interest accrual; or to oxohange them for Serles $G$ bonda. A number of changea beosme effectivo May 1, 1952. The principal ones were: The rate of intereat accrual on Series $E$ waa increaeed, especially for the near term, with correaponding changes in extended Series $E$; and Series $F$ and $G$ were replaced by two new 1ssues, Series $J$ and $K$, also at higher interest rates.
 return to Seriea $E$, was offered beginning June 1 . Detaile
of these changes appear in the May 1952 Bulletin, page A-1. Serles $F$ and $G$ began to mature on May 1, 1953. For the exohange offering made to holdera of theae bonds maturing through December 31, 1953, see the May 1953 1seue, page A-1. Sales of Series $J$ and $K$ were discontinued aft or April $30,1957$. An increase in interest ratea on Series $E$ and $H$ was announced on April 20,1957, retroactive to February 1 . Detalls of the changes appear in the May 1957 Bulletin, page $A-1$. In the tables which follow, Seriee $A-F$ and $J$ ales are included at lesue prioe and total redomptions and arounte outatanding at current redemption values. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptiona. Matured $F$ and $G$ bonds outatanding are included in the interestbearing debt untll all bonds of the annual serles have matured, when they are tranaferred to matured debt upon which interest has ceased.

Certein detail by type of tax is eveilable only from returas filed with the Internel Fevenue Service. The figures shown Include collections for credit to speciel eccounts for certein island possessions, as reported by the Internel Revenue Service. Beginning with the fiscel yeer 1955, they include the amounte of tax collected io Puerto Rico upon articles of merchandise of Puerto Riceo manufecture coming lato the United States. Figures for 1954 heve been revieed to the same besis. Figures for prerious years ioclude only amounts collected at ports of entry into the United Stetes.
1/ Differeaces between the amounts of internel revenue reported by the Internel Revenue Service as collections for given periode and the emounts reported in Treseury statements as budget recelpts for the same periods aroee becsuse of differences in the time when payments were included in the reepective reports. Tex payments ere included in budget recelpta when they are reported ae credite to the eccount of the Treesurer of the Uoited States. Prior to July 1954, they were included in Internal Revenue Service collectioo reports after the returne to which they epplied hed been recelved in internal revenue offices. Under procedure begun in 1950 witb $w$ ithheld income tax aod old-age insurence taxes end later extended to railroad retirement taxes end many excisee, these taxee are pald curreatly loto Treseury depositaries and the depositary recelpts, es evidence of such paymente, are attached to querterly returne to the Internel Ravenue

Service. Under thie procedure, the paymente are included in budget recelpts in the month in whicb the dopoeltary receipte ere issued to the texpayers. Revised eccounting procedures effective July 1, 1954, extended the seme prectice to Internel Revenue Service collection reports.
12/ Moothly figures include social security tax on seif-employment income, Which is levied and collected as part of the individuel locome tax beginning with the texeble yeer 1951. Fiecel year figures exclude this tex, on the hasis of estimates heginning 1952 (see footnote 3), and it is Included under "Old-ege and dieability insurance."
3/ In Ioternel Revenue Service reports beginning Jenuery 1951, current collectione heve not heen sopareted es to type of tar but the breakdown shown for fiscel years is besed on estimetee made in eccordence with provielons of Sec. 201 of the Social Security Act, as amended (42 ण.S.C. 401), for trensfer of tax recelpte to the trust funds (oes "Budget Raceipts and Expenditures," Teble 1).
4 Eeginnlog with the fiacel yeer 1955, collections shown Include undietributed depoeitery recelpts and unepplied collections. For excies taxes these recelpts are included in the total only. Total collections Include "Taxes not otherwiea classified."
Budget receipts for 1956 vere reduced by $\$ 3,566$ thoueand representing tax collections transferred to the Government of Guam pursuant to the act epproved Auguat 1, 1950 ( 64 Stat. 392), but this amount wee included in collections reported by the lnternal Revenue Service. Beginning vith 1957, such collectioos are excluded elso in internel Revenue Service reports.

[^7]Data relating to capltal movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15 , 1934, Executive Order 10033 of February 8, 1949, and Treasury regulatione promulgated thereunder. Infornation covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information it published at less frequent intervals. Reports by banks, bankera, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated flgures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and 1 ts Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to orlginal maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin," pages $45-47$. As a result of changes in presentation introduced in that issue, not all breakdowns previously
published will be exactly comparable to those now presented.

The first three sections which follow are fublished monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on forelgners and transactions in long-term securities by forelgners, and present detalled breakdowns of the latest available preliminary data.

Section IV provides supplementary data in $s i x$ tables which appear at less frequent intervals.
