## Reporting Bases

Data on recelpts, expenaituree, and debt which appear in the "Treacury Bulletin" are based largely on two Treaeury financial reporte, the "Dally Statement of the United States Treaaury" and the "Monthly Statement of Recelpta and Expanditures of the United States Governent." Cartain monetary atatiatice are based at least in part on the "Circuletion Statement of United Statea Money." Wbers these etatementa are given as sources for individual tablea, they are cited by name only. Their reepective reporting baesa are deaoribed balow. For other data in the Bulletin, inforwation on sourcea or reporting baeee lagiven in conneotion with the tablee themeslves.

The monthly stetement of recelpte and expendituree wae ilrat pubiluhod for February 1954, and replaoed the dally etatemant ae the primary aource of information on budgat reaulta and otber recesp and expenditure data oleesifled by type of aocount. At the samo time, the dally otatement was changed to a etatement of caeh depoeite and withdrawale affecting the account of the Treaaurer of the United Statee. Both publicatione have provided oomparative figuree on their reepeotive basea from the beginning of the fiecal year 1953. The announcement of February 17, 1954, with reepect to theee raporting ebanges may be found in the April 1954 leeue of the Bulletin.

The monthly etatemant ehow all reoelpta and expenditurea of the Government, inoluding thoae mada from cash accounte held outcide the Unitsd States Treasury. The information ie complled from reports by the Treaeurar of the United States and by all other collecting and disburaing agenciee, incluaing those agenclea whicb maintaln obaoking accounts in commercial benka. These reporte cover traneactione recoraed in the accounta of the agenclea during tbe reporting period. Tha nat of the tranaaction ae complled from these reporte ia reconciled in the monthly efatement to ohangee in the balance in the Treacurer'e aocount and in ceeh hold outelde the Treaaurer'e account and changee in the publio debt outatanding.

Recelpte of taxes and cuetoma dutles are reported on a colleotions basis. Otber recelpts are reported partially on a oollectiona basio and partially on a depoelte baala. Expanditurea, exoapt intereat on the publio debt, are reported on the basis of obacka leeued or cash paymente made by diaburaing offloera. Tranecotione of an interfund or intragovernmental natura ara included on the aame basie evan though the actual laauance of obecke may not be involved. Interaet on tbe public dabt ie includad on an accrual baela haginning with figuree for June 2955 and the fieoal year 1955. Prior to that, it wae ineluded on a due and payable baele. The same reporting baale ae that in the monthly etetement providee the flecal year figuras for the Treasury's "Comblned Stateaent of Recelpte, Expenditurea and Balances of the United States Government" and for actual recelpte and axpanditures in the "Budgat of the United Statas Government."

The dally atatement on the now baic was flrat lequed for February 17, 1954. In the depoeita and witherawale ae ahown, no diatinetion le made as to the type of accounta (budget, truet, etc.). The depoeita are on the baela of certifleatea of depoalt cleared through the account of the Treasurer of the United Statas. Total withdrawale are on the baale of checke pald or cash disbursemanta made out of the Treaeurer'e account. Some of the withdrawal claasifloations ehown are raported on the basie of melled reporta of checke laeued and are adjuated by meane of clearing accounte to the total of checke pald. Except for relatively minor amounte, noncaah interfund and other intragovernmental transactions are excluded. The public debt ifgurea in the dally etatement also are on a "clearance" baala, with the exception of those laeuanoe and retirament traneaotione reported on the basia of telegrame from Federal Reaerve Banks. Noncaak debt tranaactiona are ineluded, however.

The dally etstement before February 17, 1954, covered not only tranaactiona cleered through the Treasurer's acoount but aleo certain Qovernment agency traneactions whiob were handled through commarcial bank eccounta, and included noneash interfund and other intragoverncantal traneaotions. It provided inforwation almilar to that in the preeent dally etatement witb reapeot to the btatue of the Treasurar'a account, and elmilar to that in the preaent end-of-month delly atatement with reapect to debt 1asuance, retirement, and amount outetanding. Receipte and expenditurea, however, were cleaelfled by type of account, and the buaget reaulta ahom in the dally atatenent were uaed ae the basie for reflecting the resulta under the Preaident'e budget program as enactad by the Congreas.

Recelpta were on the basle of depolto a tbey cleared the Treasurer'e account. Expenditurea cleared through the Treasurer's account were reported on two aucceesive baeee. Through 1946 they were on the basie of checka pald by the Treasurer of the Unlted States. Baginning with 1947, expenditures made through the facllitiea of the Treaaury Department's Diviaion of Dlabursement were on the baila of checka labued, while cortain others, princlpally thoae of the Department of Defenae and ite predecesaor organizatione, were on the babie of checka pald. Tranaactione handled through commercial bank accounta, oonelating of market traneactione in public debt and guaranteed aecuritiea, were as reported by the agenciea. Intereet on tbe publio debt was 1 n cluded on a due and payable basis beginning with November 1949 and on a cbecke-pala baela prior to that time.

The oirculation atatement reflecta transactione througb the Treasurer's aocount which effect monetary etooks of gold and allver and the amounte of coin and ourreney in the money eupply of the country. It le lasued later than the dally etatement, bowever, and the figurea are based on tranaactiona conaummated during the reporting period even thougb aoma may not have cleared the Traseurer's account during that parlod.

(In millions of dollars)

[^0]* Lese than $\$ 50,000$.

The cash inoome and outgo data appearing in the "Treasury Bulletin," beginning with the Fobruary 1956 iasue, are on a basis conaistent with reoelpta from and paymente to the public as derived in the 1957 and aubaqquent Budgets of the United Statea, Special Analyaia A. Reooncillation to caah deposits and withdrawale in tha account of the Treasurer of the Unitad Statea 18 shown on tha same basie as in the Budget doouments. There is aleo ahown the amount of net caah borrowing from, or repayment of borrowing to, the publio. By these arrangemente, data in accordanos with the Budget claseiflcationa are mada available month by month. Flgurea for back yeara have been raviaad whare naceaaary in order to make them aa nearly oomparable with the Budget claselfications as avallabla data w111 permit. For this reason certain of the plgurea differ somewhat from those publiahed in earlier Budget documenta as well as in the Bulletin.

The Budgat aeriea of caah tranaactiona $1 a$ designed to provide information on the flow of money betwaen the publio and the Fedaral Government as a whole, and therafore Includes tranaaotiona not cleared through the Treasurer'a aocount. Receipta and paymenta include tranaactiona both In budget accounts and in trust and deposit fund accounts. Operations of Govermment-aponeored enterpriaes are Included In payments on a net basia as reflected in Treasury reporta. Major intragovemmental transaotiona which are reported as both expenditures and recelfts are eliminated from both. Noncash iteme whion reprasent accrued obligations of the Govermment tomake payments in the futura are alao eliminated from expenditure but are adaad latar when aotual paymenta are made. Recelpts irom the exercioe of monetary authority (mostly selgniorage on pllver) are excluded as not
repreeenting caah recelved from the public. Federal oash borrowing from the public includes net borrowing by the Treasury through public debt traneaotione and aleo net borrowing by Government agenciea and Government-aponsored anterpriaes through asiea of their own eecurities. It excludes changea in the public dabt which do not repreaent direct caah borrowing from the publio. The net effect of all these tranaactions with the public ie reflected in chances in the balance in the Treasurerte account and in cash held outside the Treasury.

Cash transactiona through tha Treaaurer's account are similar in general concept to thoae included in the Budget aeriea, but are limited in coverage to tranaactiona whiab affect the balance in that account. On the other hand, they includa receipte from the exerolea of monetary authority, which are excluded from recelpte from the public In the Budget aeriea.

Beginning with figures for the flacal year 1953, the aeries of transactions with the public 18 based on the "Monthly Statement of Receipta and Expenditurae of the United States Government," which ia compllad from reporta by all collecting and diabureing offlcera and includes those tranaactions not cleared through the Treasurar's account. Cash deposits and withdrawala in the Treaaurer's account, beginning with the ilgures for the ame year, are reportad in dally Treasury atatementa. For those yeara prior to 1953 both cash tranaactions aerlea are based on a aingle source, nanely, the earlier basia of dally Treasury atatements which reported eeparate claasiflcationa for budget reeults, trust aocount transactione, etc.

## Source and Avallability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury 18 beld mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balanoes in these accounts become depleted, they are restored by calling in (transferring) runds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purohase of Government securities. In most cases the transaotion Involves merely the transfer of money from a customer's
account to the tax and loan account in the same bank. On occssions, to the extent authorized by the Treasury, banks are permitted to deposit in these sccounts proceeds from subscriptions to public debt securities entered for thelr own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for 1 ts operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the aconomy.

A detalled description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Note: The computed annual interest charga represents tbe amount of interest that would be pald if each intarest-baring issue outstanding at the end of each montb or year should remain outstanding for a year at the spplicable annusl rate of interest. The charge is computed for asch losue by spplying the approprlate annual interest rete to the amount outstanding on that date. The aggregate charge for ell intarest-bearing issues constitutes the total corquted annual interest charge. The everage
annual intareat rate is couputad by dividing the computad annual intarest charge for the total, or for any group of issues, by the corresponding
principal amount. Beginning with data for Dacember 31, 1958, couputation of the avarage annusl intarest charge and rata is basad on tbe rate of affective ylald for lisues sold at premsum or discount. Prior to thet date it wes besed on the coupon rate for all issues.
1/ Excludes guarantasd securities held by the Trassury.
2/ Total includas "Other bonds"; ses Table 3.
Included in debt outstanding at fece smount, but discount value is used in conputing annual intarest cherge and annuel intereat rete.
4/ On Unitad Stetas sevinga bonds the rete to maturity is eppliad sgainst the emount outstanding.

Source: Intarnal Revenue Sarvice reporte for detail of collectiona by type of tax; daily Treasury etatement for budget recelpts from intarmal revenue for the fiacal year 1952, and the monthly etetement of recelpte and expenditures of the Govermment for recaipte thereafter (for explenation of reporting bases in theee publications, aee page II). Certain detail by type of tax ie availeble only from returne filed with the Internal Revanue Service. The figurea shown include collectione for credit to specisl sccounte for certein ieland poseassions, as reported by the fnternal Revenue Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articlee of merchandisa of Puerto Fican manufacture coming into the United Statas. Figuree for 1954 have baen revieed to the asme halsis. Figurea for previous yeere include only amounta collected at ports of entry into the United States.
1/ Differences betwean tha amounts of intermal reveoue reported by the Internal Revanue Sarvice as collactions for given pertode and the smounte reported in Treseury statemeots ae budget recelpte for the eame periode eroee because of differences in the time what payments were included in the reopective reports. Tax paymenta are includad in hudget recelpte when they ere reported es credits to the eccount of the Treasurer of the United States. Prior to July 2954, they were included in Internal Revenue Service collection reporte after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tax and old-age insurence tares and later axtended to railroad retirement taxes and many excieae, these taxes are paid currently into Traasury depositarias and the depoeitary receipts, as evidence of such paymente, are attachad to quarterly returne to the Intermal Revenue Service.

Under this procedure, the peymente are included in budget receipte in the month in which the depositary receipte are ieeued to the taxpayere. Reviaed eccounting procedures effective July 1, 1954, extended the eame prectice to Internal Revenue Service collection reporte.
2) Monthly figures include social securlty tax on ealf-employment income, which is levied and collected as part of the individual income tax. Fiecal year figuree exclude this tax, on the basia of estimates (see footnote 3), and it is iocluded under "old-ege and disability insurance."
3 In Internal Revenue Service reporte curreat collections ere not eeparatad ae to type of tax; the breakdown shown for flecal yeare is hased on estimates made in eccordance with provieione of Sec. 201 of the Social Security Act, ae smeoded ( 42 J.S.C. 401), for tranefer of tax receipte to the trust funde (eee "Budget Recaipte and Expand Itures, "Teble 1).
4/ Beginning with the flecel year 1955, collectione shown include undietributed depoeitary recaipte and unapplied collectione. For excisa taxes these receipte are includad in the total only. Total collectione include "Taxes not otharwias classified."
5/ Budget receipte for 1956 were reduced by $\$ 3,566$ thouseod repreeenting tax collactione traneferred to the Government of Guam purauant to the act approved August 1, 1950 ( 64 Stat. 392 ), but this amount wae included in collactions reported by the Internal Revenue Service. Beginning with 1957, euch collections are excluded aleo in intermal Revenue Servica reporta.
6/ Detail ie reported by quartera beginning with the fiecel year 1956.

Data relating to capital movements between the United states and forelgn countries have been collected since 2935, pursuant to Executive Order 6560 of January 15 , 1934, Executive Order 10033 of February 8,2949 , and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less irequant intervals. Reporte by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United Statee are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United Statss are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of forsign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "Long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin," pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously
published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking lisbllitlee to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest avallable preliminary data.

Section IV provides supplementary data in six tables which appear at less frequent intervals. Table 1 , shortterm foreign liabilities and claime reported by nonfinancial concerns, is published quarterly in the January, April, July, and October lssues of the Bulletin. Table 2, long-term forelgn $11 a b 1 l i t l e s$ and clsims reported by banks and bankers, and Table 3 , estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Tsble 5 . short $\rightarrow$ term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually, appearing in the April issue through 1958 and in the March issue thereafter. Table 6, purchases and sales of long-term securities by foreigners during the preceding calendar year, also appears annually, beginning with the May 1959 1ssue.
