## Reporting Bases

Data on receipte，expenditures，and debt which appear in the ＂Treasury Bulletinn are baed largely on two Treasury innancial reporte，the＂Dally Statement of the United Statea Treasury＂and the＂Monthly Stetement of Receppta and Expenditures of the Unsted Statea Governcent．＂Certaln monetary statietlce are based at least in part on the＂Cleculation Statement of United Statea Money．＂Where theac tateqenta are glven as sources for in－ dividual tables，they are cited by name only．Their reopective reporting baces are described below．For other data in the Eulletin，information on bources or reporting baees io given in connection with the tablee themelve日．

The monthly utatement of recelpte and expenditures was plret publlehed for February 1954，and replaced the dally etatement as the primary gource of information on budget reaults and other recespt and expenditure data classifled by type of account． At the sare time，the dally statezent was ohanged to a atatement of cash deposits and withdrawale affecting the account of the Fresaurer of the United states．Both publications have provided comparative ilgures on their reapective bases from the beginning of the flacal year 1953．The announcement of February 17，1954， with reopect to these reporting changes way be found in the April 1954 lesue of the Bulletin．

The monthly etatersent show all recelpto and expenditures of the Govemment，including those made fron cash accounta held outalde the United States Treasury．The information le complled from reporte by the Treasurer of the Unlted States and by sll other collecting and diebureing agencies，including those agenclee which maintain cheoking accounte in comercial banke．These reporta cover traneactions recorded in the aocounta of the agencied during the reporting period．The net of the trans－ actlons as complied from these reporte is reconclied in the monthiy etatement to changee in the balance in the Freasurer＇s account and in ce日h held outalde the Treasurer＇a account and changer in the public debt outetanding．

Recelpte of taxes and cuetoma duties are reported on a collection bade．Other recelpts are reported partially on a oollectione basie and partially on a deposite basis．Expendrurea， except interest on the publio debt，are reported on the basis of ohecks lasued or cash paymente made by diaburaing officera． Truneactions of an interfund or intragovernmental nature are included on the oame basio even thougb the actual lasuance of checks may not be involved．Interest on the public debt is in－ cluded on an accrual basio beginning witb flgures for June 2955 and the ilecal year 1955．Frior to that，it wae included on a cue and payable basis．The eame reporting basio as that in the monthly etatement provides the flecal year Ilgures for the Treseury＂＂Combined Statement of Recelpts，Expendituree and Balance of the Unsted States Government＂and for actual recelpte and expenditures in the＂Budiset of the United States Government．

The dally etatement on the new hasio wab plrat lesued for February 17，1954．In the depoeite and withdrawale as shown，no diatinction 18 made as to the type of accounte（budget，trust， etc．l．The deposite are on the basio of certipicates of deposit cleared throust the account of the Freasurer of the United States． Total withorawale are on the baslo of checke pald or casb dis－ bursements made out of the Ireasurer＇s account．Some of the wittdrawal claselificationo shown are reported on the basie of walled reports of checis lesucd and are adjuetee by means of clearing accounte to the total of checke pald．Except for relatively minor amounte，noncasb interfund and other intra－ govermental transactions are excluded．The publlc deht ilguree In the dally atatexent also are on a＂clearance＂basla，with the exception of those 1 bibunce and retirement iransactions reported on the basis of telegrame from Federal Reserve Banks．Noncesh debt traneactions are included，however．

The dally etarement before February 17，1954，covered not only tranastions clearec through the Treasurer＇s account but also certain Government agency tranaactione wish were handled through comercial bank accounte，and lncluded noncash interfund and other intragovemnental traneactione．It provided information almlar to trat in the present dadly otatement with respect to the etatue of the Treasurer＇e account，and olollar to that in the present end－os－month dally 6 tatement with reafect to debt qesuance，retirement，and amount outstanding．Fecelpts and expenditures，however，were clesaliled by type of account，and the budet reaults ahown in the dslly staterent were used as the basis for reflecting the resulto uncer the Fresldent＇$\varepsilon$ budget program an enacted by the Congress．

Recelpte were on the besle of deposita as they cleared the Treasurer＇s account．Expendituree cleared through the Treesurer＇g account were reported on two successive basee．Through 2446 they were on the baldo of checke palc by the Treasurer of the United Statea．Beginning with 1947，expenditures abe throush the facllitiee of the Treasury Departirent＇s Divieion of Diobursement were on the basls of checke leaued，while certein others，prir．－ clpally thooe of the Defartient of Defense and 1te predecessor organizations，were on the basis of crecke palo．Transactions handzed through commercisi benk eccounts，consleilng of market tranesctione in public debt anc guaranteed securitiee，were as reported by the agencies．Intereet on the public debt was in－ cludec on a due and payable bala beginning with November 1949 and on a checke－pald bacia prior to thet time．

The circulation statement reflects trensectione through the Treasurer＇s sccount which affect monetary atocks of gold and Bllver and the amounte of coln and currency in the money supply of the country．It 1 is 18日ued later than the dally otatement， bowever，and the ItEures are based on transactions conoummated during the reporting period even though oome may not have cleared the Treasurer＇s account during that period．

receipts and expenditures of the Govermment (based on preliminary reports) and that from final accounts of disbursing officers.
3 In 1953, taxes collectod in Puerto Rico on products of Puerto Ricar. canufscture coraing into the United States, amounting to $\$ 16$ million, are clessifled es miscellaneous budget recelpte; thereafter, such collections are included in lntermal Revenue collections of excise taxes.
Less than $\$ 500,000$.

## Footnotes to Table 1 - (Continued)

7/ Through 1953 , contributions to the Railroed Unemployment Insurance Administration Fund were carried in the dally Treasury 3tatement es miscellaneous receipts, while the 1001 Budget document, Ipectal Analysis C, included them in employment taxes in 1952. Beginning 1954 the contributione are credited direct to the truat arcount. For smounts of the contributions included in budget receipts, see "Treasury Bulletin" Cor Februery 1954, page 7.
8/ In the 101 Budget document, Special Analyais $G$, taxes not otherwise clessified are included in miscellaneous receipts.
2/ Beginning 1957, includes collections under increased rates in the Highway Revenue Act of 1956 (see foctnote 14).
10/ Figures shown include (see footnote 11) decrebses in income tax of $\$ 98$ million withheld and $\$ 4$ million not withheld and increases in transfers of \$0 million to Federal Old-Age and Survivors Insurance Trust Fund and $\$ 11$ million to Federal Disebility Insurance Trust Fund.
11/ Amounts appropriated to the Federal 01d-Age and Survivare Insurance Trust Fund are equivalent to the amounts of texes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are bserad on estimates of oldage insurance tax recelpts mede by the Secretary of the Treasury ( 42 U.S.C. $401(\mathrm{E})$ ), and are adjusted in leter transfers on the besia of wage and self-employment income records maintained in the Social Security Administration. The anount of oid-age insurance tax refunds is reimbursed to the general fund by the trust fund.
12/ The Federel Disebility Insurance Trust Fund wes established by the Social Security Act Amendments of 1956, epproved Auguet 1, 1956 (L2 U.S.C. 401 (b)). The act eppropriated to the trust fund anounts equivalent to specifled percentages of tbe wages and self-employment income, respectively, which are taxed for old-age insurance, and provided thet the amounts eppropristed should be transferred from
time to time to the trust fund on the same besis as transfers to the Federal ald-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages eppropriated to the Federal Disability Insurance Truet Fund, the increase being applicable to wages pald and taxable yeare beginning after December 31, 1956.
13/ Excludes the Government's contribution for creditable militery service ( 45 U.S.C. $228 \mathrm{C}-1$ (n)). Amounts are 6 ppropriated to the Reilroad Retirement Account equal to the amount of texes under the Rallroad Retirement Tax Act deposited in the Treasury, less refunde, during eacb fiscal year ( 65 Stat. 222 and 66 Stet. 377) and transfers are aede currently.
14. The Higbway Reverue Act of 1956, epproved June 29, 1956 (23 U.S.C. 120, Note) establlahed e H1ghwsy Trust Fund from which are to be made, as provlded by epproprietion ects, Federal-aid bighway expenditures after June 30, 1956, and before July 1, 1972. The act approprieted to this fund amounts equivalent to spacified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and uee of certain vehicles, and provided thet the amounts epproprlated should be transferred currently to the trust fund on the besis of estimates by the Secretary of the Treasury with proper adjustments to be made in eubsequent transfers. The use tax was imposed by tbe act and retes were increased for the other taxes. Previous to the fiscal year 1957 corresponding excise tax receipts were included in net budget receipts, and Federal-ald highway expenditures were included in budget expenditures.
15 Interest on refunds is included in expenditures in Table 3.
16/ Transfere reduced by $\$ 300$ million to correct those made earlier on besis of estimates (see footnote 11).
17) Net of reimbursement of $\$ 89$ million from the Federal 01d-Age and Survivors Insurance and Federal Disability Insurance trust funds.

* Less than $\$ 500,000$.

The cash income and outgo data appearing in the "Treasury Bulletin, beginning with the Februasy 1956 isaue, are on $s$ basis conalstent with recelfts from and payments to the public as derived in the 1957 and aubsearent Budgets of the United Ststes, Special Analyaia A. Reconciliation to cash deposita and withdrawala in the account of the Treasurer of the United States is ahown on the same basie as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, dsts in accordance with the Budget classifications are made avallable month by month. Figures for back yesrs have been revised where necessary in order to make them 38 nearly comparable with the Budget classiflcations as avallable data will pemit. For this reason certaln of the flgurea differ somewhat from those publighed in earlier gudget cocuments as well as in the Bulletin.

The Budget aeries of cash traneactions is designed to provice information on the flow of money between the public and the Federel Government as a whole, and therefore Includes transactions not cleared trrough the Treasurer'e acccunt. Recelfts and payments include traneactions both In budget sccounts and in trust and deposit fund accounts. Operaticns of Governtient-sponsored enterprises ere included In paymenta on a net basls as reilecteo in Treasury reports. Major intrasovermmental transactions whlch are reported as both expenditures and recelfts are eliminated from both. Noncssh 1 tema which represent accrued obligatione of the Government to make payments in the future are alco ellminsted from expenditures but are added later when actual payments are mace. Recelrta from the exercise of monetary authority (mostly seignlorage on sllver) are excluded as not
representing cash received irom the public. Federal casn borrowing from the public includee net borrowing by the Treasury through public debt transactions and aleo net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactione with the public is reflected in chances in the balance in the Treasurer's account and in cash held outalde the measury.

Cash transactions through the Treasurer's sccount sre sim1lar in general concept to those included in the Eudset serlee, but are limited in coverage to transacticns whioh affect the balance in that account. On the other hand, they include recelpts from the exercise of monetary authority, which are excluded from recelpts from the public ir the Eudget series.

Beginning with figures for the fiscal year 1953, the serles of transactions with the rublic is based on the Monthly Statemert of Recelpts and Expenditures of the United States Government," whlch 19 complied from reports by 21 collecting and disbursing offlcera and includes those tranaactions not cleared through the Treasurer's sccount. Cssh deposits and withdrawals in the Treasurer's account, beginning with the figures for the sare year, are reported in dally Treasury ststements. For thoce years prior to 1953 both cash transactions serles are based on a single source, namely, the earlier basis of dally Treasury stetements whlch reported separste classiflcatlons for budget results, trust account transacilons, etc.

## Source and Avallability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget reoelpts and expenditures but slso trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Preasurer's accounts with Federal Reserve Banks and branches. As the balanoes in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of comercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaotion involves merely the transfer of money from a custorer's
account to the tax and loan account in tise ame bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securitles entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the conmunities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of 1 ts Iluctuatine operations on bank reserves and the economy.

A detalled description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Noter The computed annual interest charge represente the amount of interest thet would be pald if each intereat-bearing iesue outatanding et the end of eech month or year sbould remain outetanding for e year et the epplicable anmal rete of intereet. The charge ie computed for eech issue by epplying the eppropriete annual interest rete to the amount outstending on that dete. The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The everage annual interest rate is computed by dividing the computed anmal interest charge for the total, or for any group of lsaves, by the corresponding

Note: In these tables Series A-F and J sales are included at issue price and redemptions and amounts outstanding at current redemption values. Series G, H, K are included at face value tbroughout. Matured bonds which have been redeetned are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest bas ceased.

1) Sales and redemption figures include exchanges of minor amounts of (1) matured series $E$ bonds for series $G$ and $K$ bonds from May 1951 through April 1957 and (2) series $F$ and $J$ bonds for series $H$ bonds beginning January 1960; however, they exclude exchanges of series $E$ bonds for series $H$ bonds, which are reported in Tabla 3
2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin."
3/ Includes both matured and unmatured bonds; see Table 4
L) Includes total value of redemptions not yet classified batween aales nrice and accruad dj mount.
2) A change in procedure, beginning in June 1954, for processing redeemed savings bonds bas resultad in a high level of redemptions not yet classified by yearly seriea of issue. This increase temporarily
obscures the relationsbip between the redemption columns sbowing sales price and accrued discount in Tables 2 and 3 and also the relationsbip between the matured and unmatured sactions of Tabla 4. (See also footnote 4). The subsequent distribution of this high level of unclassified redemptions may be large enough in any month to show redamptions of matured and unmatured bonds in Table 4 which are greater than the total redemptions for that month.
6/ Reductions were made in issuas and redemptions of Series E, H, F, G, $J$, and K in July 1954 to compensate for tha arroneous inclusion of reissue transactions in Juna 1954 as reported in the daily Treasury statement. The amounts lnvolvad were as follows: 18 million for issues of Seriss $E$ and $H$ and $\$ 17$ million for issues of Series F, G, J , and K ; and $\$ 35$ million for unclassified retirements.
3) Serias $F$ and G selas were discontinued April 30, 1952, and Series $J$ and $K$ salas were discontinued April 30,1957 . Sales figures after April 30, 1957, represent adjustments.
8/ Includes tha Decamber 1959 exchanges of serias 1948 F and G bonda for $4-3 / 4 \%$ markatable notes of which $\$ 692$ million were reported in Decamber 1959, 51 million in January 1960, and 3 million in Fabruary 1960.
If Rapresants cbanges in tbe amounts of redemptions not yet classifiad as batween matured and unmatured issuas.
10/ Includes axchanges of Serias 1941 F and G savings bonds for Treasury 3-1/4\% bonds of 1978-83. Less than $\$ 500,000$.

Table 5.- Seigniorage
(Cumulative from January 1, 1935 - in millions of dollars)

Data relating to capital movementa between the United statea and forelgn countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive order 10033 of Fabruary 8, 1949, and Treasury regulations promulgated thereunder. Information covering the princlpal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information 1a published at less irequent intervale. Reports by banke, bankers, eecurities brokers and dealera, and induetrial and commercial conoerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated Plgures to the Treasury. Beginning April 1954, data reported by banke in the Territories and possesbions of the United states are included in the publishad data.

The term "forelgner" as used in these reports covers all inetitutiona and individuals domiciled outalde the United States and its Territorles and possessions, the official institutions of forelgn oountriea, wherever auch inatitutions may be located, and international organizationa. "Short-term" refers to original maturitles of one year or less, and "long-term" refers to all other maturitica. A detalled discusaion of the reporting coverage, statistical presentation, ana definitions appeared in the June 1954 Lesue or the "Treasury Bulletin," pages 45-47. As a reault of changes in presentation introduced in that 1saue, not all breakdowns previously
published w111 be exactly corparable to those now presente.

The first three sections which follow are publisher morthly. They provide aumariea, by periods and b: countrlee, of data on short-term banking liabllities te and claims on foreigners and traneactions in long-tert securlties by forelgners, and present detalled oreardown of the latest avallable preiminary data.

Section IV providea supplementary data in six tablei which appear at less frequent intervala. Table 1 , short. terif forelgn llabllities and claine reported by nonfinancial concerns, is published quarterly in the January. April, July, and October issuee of the Bulletin. Table 2 . long-term foreign liabilitiea and clalme reported b: banks and bankers, and Table 3, eetimated gold reservei and dollar holdinge of foreign countries and Internationa: institutions, are published quarterly in the March, June Seprember, and December 19sues.
