## Reporting Bases

dat on recelpte, expendituree, and debt which appear in the "Tressury Bulletin" are based largely on two Treasury financial reports, the "Dally Statement of the United States Treasury" and the "Montbly Statement of Recelpta and Expenditures of the United gtates Government." Certain monetary bratletica are based at least In part on the Ciroulation Statement of United State Money. Where these statementr are given as cources for individual tablea, thep are cited by name only. Thelr respective reporting bases are desoribed below. For other data in the Bulletin, information on sourcse or reporting bases le given in conneotion with the tablee themeelver.

The monthly etatement of recelpte and oxpenditures wae firat published for February 1954, and replsoed the dally atatement as the primary eource of informetion on budget reeulta and other recelpt and expenditure data olaseifled by type of account. At the eams time, the dally etatement was ohanged to a statement of cash deposite and witbdrawale affecting the account of the Tressurer of the United Ststes. Botb publicatione have provided comparative flgures on their respective bases from the beginning of the f18cal year 1953. The announcement of Feliruary 17, 1954, ath respect to theee reporting changee may be found in the April 1954 1eve of the Bulletin.

The monthly etateaent abow all recelpte and expendituree of the Governivent, Including those made from cash accounts beld outside the United States Treasurg. The information is complled from reporta by the Treasurer of the United gtates and by all other collecting and diabursing agenciea, including thoos agenciee which malntaln checking accounte in comercial banke. These reporte cover traneaction recorded in the accounte of the agencie during the reporting period. Tbe net of the transactloos ab complled from these reporte is reconciled in the ponthly statement to changee in the balance in the Treapurer's account and in cbeh held outalde the Treaburer'e account and changee in the public debt outetanding.

Recelpte of taxee and cuetome dutiee are reported on a collections basle. Other receipts are reported partially on a collections basis and partlally on a deposite baele. Expendituree, except intereet oo the public debt, are reported on the baele of checis 1 seued or caeh paymente made by dleburaing officera. Iraneactione of an interfund or intragovernmental nature are lncluded on the same hasie even though the actual iseuance of checks may not be involved. Intereat on the public debt $1 \mathrm{~s} 1 \mathrm{n-}$ cluded on an accrual bable beginnine with rigures for Juns 1955 and the flecal year 1955. Frior to that, it wae included on a Sue and payable baele. The same reporting basie ae that in the monthlg etstement providee the flecal year flgures for the Treaeury's "Coabined Staterent of Receipte, Expenditures and Galancee of the United State Government and for actual recelpte and expenditures in the "Sudget of the Un1ted States Government."

Rezinrilng aith the final otatement for the flacal year 2363. the montrily etatement reporta totale for net budet receljte aric zudet expenditure after ceduction of certain interfund tranasctione which are inclucee in the detall of both budget recelits and budot exjeristures. The trancactione deducted consibt of interest pajments and minor anounta of certain other Caymento mace by lovernment ajenclea to the mroasury. This reorting chance wea aace in eccorcance with the plan atcted in the Fresident's Suceet Keesace of January $1 \%$ 1950. It does not affect the surplus or deflcit. Firures for earlier periode shown

In the Treasury Bulletin were revibed to the new reporting basia In the Sertember 1960 1ssue. The interfund tranaactlons deducted under thla procedure do not include paymente to the Treasury by wholly owned Government corporacions for retirement of their capltal atock and for disposition of earringe. Theae cepital tranefers have been excluded currently from budget recelpta and budget expendturee beginning July 1,1948 , and ilguree for orlor flecal yeare back throuth 1932 were reviged accorcidncly at that tre.

The dally atatement on the new babls was flrat lasued for February 17, 1954. In the depoeite and withdrawale as shown, no distinction $1 \theta$ made as to tha type of accounta (budget, irust etc.). The depolite are on the baile of certificates of deposit cleared through the account of the Freasurer of the United gtatee, Total withdrawale are on the besis of checks pald or cash disburements made out of the Treaeurar's account. Some of the Withdrawal clasel:lcations shown are reported on the basie of malled reports of cbecke lenued and are adjusted by means of clearing accounta to the total of checke pald. Except for relstively minor amounte, noncash interfund and other intragovernmental tranesctione are excluded. The public debt flguree in the dally etatement also are on a "olearance" babie, with the exception of those 1 asuanoe and retirement transaoilone reported on the basls of telegrame from Federal Reaerve Banks. Noncaab debt tranasctione are included, bowever.

The dally statement before February 27, 1954, covered not only transactions cleared through the Treasurer's socount but albo certain Govermment agenoy traneactlone whlch were handied through commerclal bank accounta, and included noncasb interfund and other intragovemmental traneactions. It provided informetion almilar to that in the preeent dally etatement with respeot to the atatue of the Treasurer's account, and almilas to that in the preeent end-of-wontb dally etitement with resfect to debt lesuance, retirement, and amount outbtanding- Reoelpte and expenditurea, however, were clasafled by type of account, and the budget results shown in the dally stategent were used as the baib for reflecting the reaults under the Fresident' $\epsilon$ budget program as enacted by the Congrees.

Recelpte were on the basia of deposita as tbeg cleared the Treasurer'e account. Expendituree cleared through tbe Treasurer' sccount were reported on two euccessive basee. Through 1946 they were on the basio of checks pald by the Treasurer of the Uniticd Statea. Beginning with 1947, expenditures made through the facilltiee of the Treasury Department's Divielon of Disbureement were on the basla of checke labued, whlle certaln others, prlncipally those of the Department of Defense and ita predeceseor organizations, were on the basia of checke paid. Transaotione handled through comerclal bank aocounta, oonsigting of market traneactione in public debt and guaranteed eecurlites, were sa reported by the agenoses. Interset on the publio debt was inoluded on a due and pajable baid beginning with November 1949 and on a cbecka-pald baela prlor to that time.

The olroulation etatement refleote traneactions through the Treasurer'e socount whoh affect monetery etooks of gold and ellver and the amounte of ooin and ourrenoy in the money aupply of the country. It $1 e$ leeued later than the dally etstement, however, and the fleuree are based on traneactione ooneumated during the reporting period even though eome may not have cleared the Traseurer'e booount during that period.

## Treasury Financing Operations

Exchange of Series $F$ and $G$ Savings Bonds for Marketable Treasury Bonds

On November 18, 1960, the Treasury announced that it would offer to holders of Series $F$ and $G$ savings bonds which mature in 1961 (approximately \$750 million) an opportunity to exchange them at their face amount with certain interest and other adjustments as of December 15,1960 , for 4 percent Treasury bonds of 1969 at a price of $120 \frac{1}{2}$ percent of their face value. The 4 percent bonds constitute an amount additional to the $\$ 1,276$ million of bonds outstanding, which were first issued on October 1 , 1957. The subscription books were open from November 21 through November 29, 1960. Exchanges of the $F$ and G savings bonds were made on the basis of equal face amounts and were allotted in full. Preliminary reports show that $\$ 144$ million $F$ and $G$ gavings bonds were exchanged for the Treasury bonds of 1969.

The Series $F$ and $G$ bonds were accepted in the exchange at amounts shown in the two accompanying tables for their respective months of maturity. These exchange values were higher than current redemption values. They were ifxed to provide the holders of such bonds an investment yield approximately 1 percent per annum more than otherwise would accrue from December 15, 1960, to the maturity dates of their bonds and will provide an investment yleld of approximately 3.93 percent per annum from the respective maturity dates of the $F$ and $G$ bonds to October 1, 1969, the maturity date of the 4 percent

Treasury bonds of 1969. Since holders who exchanged the $F$ and $G$ bonds receive interest on the Treasury bonds of 1969 at the rate of 4 percent per annum from October 1, 1960, interest adjustments were made as follows: All subscribers were charged accrued interest on the Treasury bonds of 1969 from October 1, 1960 , to December 15,1960 ( $\$ 0.82$ per $\$ 100$ ) and also were charged with the premium on the issue price of the new bonds ( $\$ 0.50$ per $\$ 100$ ). Interest 1s payable on the bonds of 1969 on April 1 and october 1 in each year until their maturity.

The bonds of 1969 were 1 ssued in bearer form with interest coupons attached, and in registered form, in denominations of $\$ 500, \$ 1,000, \$ 5,000$, $\$ 10,000, \$ 100,020$. and $\$ 1,000,000$. Holders of smaller denomination Series $F$ and $G$ bonds could exchange them for the next higher multiple of $\$ 500$ upon payment in cash of any difference.

Any qualified depositary was permitted to make payment by credit in ite Treasury tax and loan account for any cash payments authorized or reaulred to be made for bonds allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposita.

The exchange values of Series $F$ bonãs, the differences between such values and the offering price of the 4 percent bonds, the intereat which w111 accrue on the new bonds, and the total amounts to be collected from holders of Serles $F$ bonds per $\$ 100$ (face amount) are as follows:

6/ In the 1961 Budget document, Special Analysis $G$, taxes not otherwise classified are included in miscellaneous receipts.
7) Beginning 1957, includes collections under increased ratea in the Higbwey Reyenue Act of 1956 (see footnote 13).
8/ Flgures shown include (aee footnote 9) decressea in income tax withheld of $\$ 98$ million in January and $\$ 52 \mathrm{million}$ in October, and in income tax not withheld of million in January and $\$ 3$ million in October; increases In tranafera to Federal 01d-Age and Survivors insurance Trust Fund of $\$ 90$ million in January and $\$ 50 \mathrm{million}$ in October, and to Federal Disablifty Insurance Trust Fund of \$11 miliion in January and $\$ 5$ million in October.
2) Amounts approprlated to the Federal Old-Age and Survivora Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of oldage insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and seif-employment income records maintained in the Social Security Administration. The amount of old-age Insurance tax refunds is reimbursed to the general fund by the trust fund.
10) The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages pald and taxable years beginning after December 31, 1956.
11. Amounts are appropriated to the Rallroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) ard transfers are made currently. Figures for 1953 and 1954 exclude the Covernment's contribution for creditable military service ( 45 U.S.C. 228C-1 ( $n$ )).
12) The Employment Security Act of 1960, approved September 13, 1960 (74 Stat. 970) established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with the fiscal year 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax recefpts are transferred currently on the basis of estimates by the Secretary of the Treasury, With later adjustments as neceasary. From that account are to be paid the administrative expenses of the employment security program. Prevlously the corresponding amounts were included, respectively, in budget receipta and budget expenditures. Refunds of taxes are to be reimbursed from the administration account.
13/ The Hyghway Revenue Act of 1956, approved June 29, 1956 (23 U.S.C. 120, Note) establiahed a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before July 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuela, motor vehicles, tires and tubes, and use of certain vehtcles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. The use tax was imposed by the act and rates were increased for the other taxes. Previous to the fiscal year 1957 corresponding excise tax receipts were included in net budget receipts and Federal-ald highway expenditures were included in budget expenditures.
$\frac{14}{15}$ Interest on refunds is included in expenditures in Table 4
15/ For content, see Table 3. These transactions are included in the detail of both budget recelpts and budget expenditures, but are deducted from the totals in accordance with the reporting procedure outlined in the President's Budget Message of January 18, 1960 (see Reporting Bases, P.Il)

p Preliminary. n.a. Not available

The cash inoome and autgo data appearing in the Treasury Bulletin, beginning with the February 1956 laaue, are on $\varepsilon$ basis consiatent with recelpts from and paymenta to the public as derived in the 1957 and aubsequent Budgeta of the United States, Special Ansiyela A. Reconcilistion to cash deposita and withdrawala in the account of the Treasurer of the Unitev Statea is ahown on the aame basia as in the Budget doouments. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, dsta in accordancs with the Budget clsasificstions ars made available month by month. Figures for back yeara have been revised where necessary in order to make them as nearly comparable with current Budget claselfications as available data will permit. For this reason certain of the ilgures differ somewhat from those published in earlier Budget documenta as well as in the Bulletin.

The Budget series of cash transactions 18 designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes tranactions not cleared through the Treasurer's account. Receipts and payments include transactions both in buđget accounts and in trust and depasit fund accounts. Operations of Covernment-sponsored enterprisea are included in payments on a net basia as reflected in Treasury reporta.

Major intragovemmental transactions which are reported ss both expenditures and receipts are eliminated from both. Noncseb iteme which represent accrusd obligations of the Government to make paymenta in the future are alao oliminated from expenditures but are addod latar when aotual paymenta are made. Recelpts from the axercise of monetary authority (mostly esigniorage on sliver) are excluded es not representing cash recelved from the public. Federal cas $\Omega$ borrowing from the public includes net borrowing by the Treasury through public debt tranasotions and also net borrowing by Government agenciea and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direot cash borrowing from the publio. The net effect of all these transactions with the public ia reflected in changes in the balance in tre Tressurer's account and in caab held outside the Trasary.

Cash transactions through the Treasurer's account are olmilar in general concept to those includsd in the Budget seriea, but are ilmited in covarage to transactions whioh affect the balance in that account. On the other hand, they include recelpts from the exeroise of monetary authority, wich are excluded from receipts from the public in the Budget aeriss.

## Footnotes to Table 3

1. All previously published ifgures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures, to accord with the new reporting procedure outlined in the Preaident'g Budget message of January 18, 1960 (see pages 2 and 5). Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
2) Treated as noncash refund deductiona from receipta when iasued and as cast refund deductions wben redeemed.
3) Consiata of aeignforage and the increment reaulting from reduction in the
welght of the gold dollar; exciuded from receipta from the public but included in cash deposits in the Treasurer's account.
4) Figures in this colum differ from those published prior to the September 1960 Treasury Bulletin because a few additional items of budget receipts which are also budget expenditures are fncluded in the interfund transactions deducted from budget receipts and budget expenditures (see footnote l).

## Footnotes to Table 4

1 See footnote 1 to Table 3.
Net operating expendtures, or receipts ( - ), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 7). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they bold, and they apply the net income received from operations to repayment of borrowing from the public or to investment in Federal securlties. On that basis, net expenditures for operations are ahown in this table in terms of the combined net of disinvestment In Federal securities and aale of agency obligations in the market, and net
receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the mariset.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurar of the United States reflects not only budget reoelpts and expenditurea but also truat, deposit Iund, and public debt transactions.

The working cash of the Treaaury is held mainly in Treasurer's accounts with Federal Reservo Banks and branches. As the balanoes in theso accounta becoma depleted, they are reatorod by calling in (tranaferring) funde from the tax and loan accounte with thousands of commercial banks throughout the country.

Deposits to tax and loan accounta occur in the normal course of buelneas under a uniform procedure applicable to all banks whereby cuatomers of banks deposit with them tax payments and funde for the purchase of Government securitiea. In most cases the transaotion involves merely the transfar of money from a customer's
account to the tax and loan account in the aane bank. On occaslons, to the extent authorized by the Tressury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of thelr customers.

The tax and loan account system parmits the Treasury to leave funde in banks and in the comunities in which they arlae until such time as the Treasury needs the funda for ita operations. In this way tbe Treasury is able to neutralize the effect of ite fluctuating operationa on bank reseryes and the economy.

A detalled description of the Treasury's depositary aystem may be found in the Annual Report of tho Secretary of the Traasury for 2955, pages 275-284.

1/ Consiste of Tressuner'e checks outstanding, reserve and other deposits of Board of Trustees of the Postal Savings System, uncollsctad iteme, exchanges, etc., Jeginning December 1954; prior to that time included also Post Office Department and Postmasters ${ }^{1}$ diebursing accounts (see footnots 2).
2) Beginning December 1954, Post Office Department and Postmesters'
diebursing accounte are no longer treeted as liability accounts of the Tressurer of tha Unitad States, but are clessifisd and treated in the same manner as othar disbursing secounts, in accordance with the change in mathod of reporting Post office transections (sos "Budget Roceipts and Exponditures," Table 4). An adjustment of $-\$ 207$ million in the balance in the Freasurer' eccount (and in the "clearing account") reflects this chenge.

Note: The computed annual interest cbarge represents the amount of interest that would be paid if eacb intereat-bearing issue outstanding at the ond of aacb montb or yoar should remain outstanding for a yoar at the applicable annual rate of intereat. The charge is computad for ach issua by applying the appropriate annual interest rete to the amount outstanding on that date the anount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all intereat-bearing issues constitutes the total computed annual interest charge. Tbe average annual interast rate is computed by dividing the computed annual intarest charge for the total, or for any
group of iasues, by the corresponding principal amount. Beginning with dets for December 31, 1958, the computation ia based on the rate of affactive yisld for issues sold at premium or discount. frior to thet date $1 t$ was based on the coupon rete for all issuas. 1/ Includes only guaranteed securlties held outside the Treasury.
2 Total includea "Otber bonda"; sse Table 3
3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest cbarge and annual interest rate. 4/ On United Statas asvinga bonda the rate to meturity is applied agalnat the amount outatanding.

Excess of price over zero yleld.
Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and aak quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. When issued" prices are included in the history beginning October 1, 1939. Dates of highs and lows in cage of recurrence are the latest dates.
3/ Of the $\$ 2,000 \mathrm{mil1i}$ ion $4 \%$ notea of August 15, 1962, outstanding on October 31, 1959, \$1,684 million were exchanged for the $4-7 / 8 \%$ notes of November 15, 1963 , and $\$ 159$ million were presented for stamping for redemption on February 15, 1960, leaving $\$ 158$ million to mature August 15 , 1962.

4/ Amount outstanding inciudes an additional issue of \$746 million on December 15, 1959, accepted in exchange for $P$ and $G$ savings bonds due to mature in 1960.
5f Following the advance refunding offer announcement dated June 6, 1960, relative to the $2-1 / 2 \%$ bond of November 15,1961 , outstanding in the amount of $\$ 11,177$ million, $\$ 3,893$ million were exchanged for $3-3 / 4 \%$ notea of May 15,1964 , and $\$ 320$ million for $3-7 / 8 \%$
bonds of May 15,1968 . As a result of a later offering, an additional amount of $\$ 1,070$ million of $3-7 / 8 \%$ bonds of May 15 , 1\%8, were issued. See "Debt Operations", Table 6.
6/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
7/ The following exchangea resulted from the advance refunding offer dated Soptember 9, 1960: \$643 million of the 2-1/2\% bonds of June 15, 1962-67, for 3-1/2\% bonds of November 15, 1980; 993 million of the $2-1 / 2 \%$ bonds of December $15,1963-68$, for $3-1 / 2 \%$ bonds of February 25,1990 (an additional issue of an existing bond); and a total of 2,343 million of the $2-1 / 2 \%$ bonds of June 15, 1964-69, and December 15, 1964-69, for 3-1/2\% bonds of November 15, 1998. The issue date for the new and additional issuea was October 3 , 1960. See "Debt Operations", Table 6.

Table 1.- Average Yielda of Taxable Treasury and Moody'a Aaa Corporate Bonda by Perloda

Source: Beginning April 1953, Treasury bond ylelds are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source
for the average of A日a corporate bonds. For definition of taxable bonds, see footnotes to the "Treasury Survey of Owmership" in
this issue of the Bulletin.
1/ Beginaing April 1953, the average includes bonds neither due nor
callable for 10 yeara; April 1952 through March 1953, the ainimum length (neither due nor callable) was 12 years; October 1941 through March 1952, the minimum length was 15 years. For bonds currentiy in the average, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

Source: Internsl Revenue Service reports for detsil of collections by type of tax; monthly statement of receipts and expenditures of the covermment for budget receipts from internal revenue (for explsnation of reporting bases in this publication, see page II). Certain detail by type of tax is avallsble only from returna filed with the Internal Revenue Service The figures shown laciude collections for credit to specisl accounts for certsin island possessions, ss reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they laclude the amounts of tsx collected in Puerto fico upon articles of merchandise of Puerto fican mennufscture coming into the United States. Figures for 1954 have heen revised to the ssme bssis, but those for 1953 lnclude only amounts oollected st ports of mintry into the United Ststes.
1/ Differences between the smounts of internal revenue reported by the Internsl Revenue Service as collections for given periods and the smounts reported in Treasury statementa as budget receipts for the same periods arose becsure of differences in the time when psyments were included in the respective reports. Tax paymenta are lacluded in budget receipta when they sre reported ss credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tsx and old-sge insurance taxes and later extended to railroad retirement tsxes and many excises, these trxes are paid currently into Tressury depositaries and the depositsry receipts, ss evidence of such psyments, are sttsched to quarterly returns to the Internsl Revenue Service.

Under this procedure, the payments are included in budget receipts in the month in which the depositary recelpts are issued to the tsxpayers. Revised sccounting procedures effective July 1, 1954, extended the same practice to Internal Revenue Service collection reports.
2/ Monthly and fiscsl year 1960 figures laclude social security tsx on self-employment Income, which is levied and collected ss part of the Individual income tax. Prior fiscal year figures exclude this tax, on the basis of estimstes (see footnote 3), snd it is included under "Old-age and disability insurance."
$3 /$ In Internal Revenue Service reports current collections are not sepsrated as to type of tsx; the breskdown shown for fiscal yesrs is bssed on estimstes made in sccordance with provisions of Sec. 201 of the Socisl Security Act, as amended ( 42 U.S.C. 401), for transfer of tsx receipts to the trust funds (see "Budget Recelpts and Expenditures," Tsble 1).
4) Beginning with the fiscsl yesr 1955, collections shown fnclude undis tributed depositary receipts and unapplied collections. For excise tayes these receipts are included in the total only. Tots] collections include "Taxes not otherwise clasaifled."
5) Budget receipts for 1956 were reduced by $\$ 3,566$ thoussind representing tax collections transferred to the Government of Guam pursuant to the sct spproved August 1, 1950 ( 48 U.S.C. 1421 h ), but this smount was included in collections reported by the Internal Revenue Service. Beginning with 1957, such collections are excluded slso in Internal Revenue Service reports.

Data relating to capltal movementa between the United statea and forelgn countriea have been collected since 1935, purauant to Executive Order 6560 of January 15 , 1934, Executive order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is publiahed regularly In the "Treasury Bulletin." Supplementary Information is published at leas frequent intervala. Reporta by banka, bankera, securitiea brokers and dealera, and incustrial and commercial conoerns in the United Statea are made Initially to the Federal Reaerve Banka, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banke in the Territariea and poasessions of the United Statea are included in the published data.

The term: "foreigner" as used in these reporta covera all ingtitutions and individusis domiciled outside the United States and ita Territorles and possessions, the official institutiona of foreign countriea, wherever such institutions may be located, and international organizations. "Short-term" refera to original maturitles of one year or leas, and "long-term" refera to all other maturitiea. A detalled discuasion of the reporting coverage, atatistical presentation, and definitiona appeared in the June 1954 18sue of the "Treasury Bulletin," pages 45-47. As a reault of changes in preaentation introduced in that isaue, not all breakdowns previously
published will be exactly comparable to those now preaented.

The pirst three section which follow are fublished monthly. They provide aummariea, by periods and by countries, of data on short-tert banking liabllitles io and clalma on foreigners and tranaactiona 1 n long-term aecuritiea by foreigners, and preaent detalled breakdowns of the lateat available preliminary data.

Section IV providea aupplementary date in eix tables which appear at lesa frequent intervala. Table 1 , shortterm forelgn liabllities and clalms reported by nonfinancial concerns, is published quarterly in the January, April, July, and October lesues of the Bulletin. Teble 2, long-term foreign $11 a b 111 t 1 e 6$ and clalms reported by banks and bankers, and Table 3, estlmated eold reserves and dollar holdings of foreign countrlea and international inatitutiona, are publiahed quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balancea in brokerage accounts, appeara semiannually in the March and September issuef. Table 5, short-teril liabllities to forelgners in countries and areas not regularly reported separately by banking institutione, is presented annually, appearing in the April 1asue through 1958 and in the March issue thereafter. Table 6, purchases and sales of long-term eecurities by forelgners during the preceding calendar year, also appears annually, beginning with the May 1959 18sue.

[^12]a. The classilication by ares and country has been revised to their reapective geagraphlc areas; Western European dependencies located in the Latin American area, however, are included in "Other countries."
b. The figure for gold holdings of the Bank for Intermational Settlements included in "Otber" Western Europe now represents the Bank'a total gold assets net of its total gold deposit ilabilitiea (which in some instances results in a negative figure), rather than its gold assets in bars and colns as heretofore. Because most of the gold dejosited with the B.I.S. is included in the official gold

The current innancial stetemente of corcorations and certain other business－type activities of the United states Government which appear in the＂Treasury Bulletin＂begin－ ning vit：－the August 2956 issue are complled from reporte submitted to the Treasury under Departiaent Circular No． 966 ，1ssued Jonuary 30,1956 ，and Supplement No． 1, issued June 1,1956 ．The regulations so issued are pur－ fuant to Section 114 of the Suoget and Accounting Proce－ cures Act of 195 ）（ 31 U．S．C． 66 b ），and represent another step in the program of comprehersive and integrated Gov－ ernment accounting anc financial reporting for which authority was provided in that act．They supersede Eudget－Treasury Regulation No．3，isaued under Executive Order No． 8512 of August 13 ， 1940 ，as amenced by Execu－ tive order $\approx 0.90 \mathrm{~g}_{4}$ of Narch 3，1942，under whict．fi－ nancial stetements previously pubilsheci in tre Bulletin vere submitted．

In coverage，Department Circular io． 966 requirea euonisaicn of financial gtatements by all wholly owned and mixec－awnership Government corrorations apecifically includec in the Government Corporation Control Act，as amended（ 31 U．S．C．846，856）；anc all other activitie6 of the Government operating as revolving funds for which buciness－type public enterprise or intragovernmental fund bucgetc are required by the Bureau of the Budget．Other activities and agencies whose operations，services，or functions are largely self－liquidating or firimarily of a revenue－producine nature，and activities and agenciee whose operations result in the accumulation of substantial inventories，investments and other recoverable sesets， may be brought under the resulations as agency accounting syetems are developed to the point where they are capable of furnishing the financial reports required．

Four $\therefore$ insis of finencial st＝tements are cslled for by Dep－rtmert Jircular ：：O．ЭEf．mhey sre etatements of finsncl：l concition，income and expense，gource and appllcation sf finke，ans certsin conmituents and contin－ gencies．One 日tstem．シスts of ilnancisl condition are
published quarterly and arpear as Seciion I in the series of tables．The first data under the new resulations are for karch 31，1756，and were cresented in the Ausust 1956 Bulletin．Statements of income and expense and source and application of fundis are nublished semiannually，for June 30 and December 31 reportins datea，and appear as Sections II and III．The first of these stritements under the new regulations cover the fiscal year 1956，and were published in the January 1957 Bulletin．Within the sections，the afencies are erouped in separate tablea by type，as follows： public enterprise revolving funde，intragovernmental revolving funde，certain other activitiee，deposit funds， and trust revolvins funde．

Supplement No． 1 adoded to the coverage by including all executive agencies and activities not reporting under Department circular i：o． 966 ，but requireâ only a statement of financial condition annually as of June 30．These are mainly not businecs－type activities，and those which had not yet developed formal accounting proceauree to provide complete balance sheet types of statementa were authorized tempararlly to report only the asset sice．Thus the sup－ plement rounds out proyi $\in i$ on for the information on properties and assets of the United States Government which the Treasury has been asked to furrish to the Committee on Government Operationa，House of Repreaentatives，for a continuing study of the assets of the Goverament．The first comprehensive reporting unâer Supplement No．I is for June 30，1957，and the data were published in the December 1957 issue of the Bullet in as Part B of Table 4 in Section I．

A swamary of loans outstanding for a serles of dates 1s included in section $I$ of the Bulletin presentation beginning with the June 1958 issue．Two claseifications of the loans are shown，one by type and one by azency． Data prior to 1956 are based on the earlier reporting requirements，which provided for complete coverage of Government lencing agencies．

1/ In accordance with an amendment issued June 23, 1960, to Department Circular No. 966, purchase money mortgages and similar long-term paper held by the agenciea have been reclassified as loans receivable and are included in this table. These aasets had heretofore been classified as accounts and notes receivable or other asseta. As of June 30, 1960, a few agencies that have outstanding loans made their first submissiona of statements of financial condition and the loans of these agencies are also included in this table.
$2 /$ Does not include foreign currency loans.
2/ The dollar equivalenta of theae loans are computed for reporting
purposes at varying rates. Where the loan agreements stipulate a dollar denominated figure, the loans outstanding are generally valued at agreement rates of exchange. Loans executed in units of foreign currency are valued at the market rates (1.e., the rates of exchange at which Treasury sells such currencies to Government agencies).
5/ Includes certificates of interest.
6/ Certain ather activity (Part A).
Certain other activities (Parts A and B).

## Footnotes to Table 1

1 Business-type activitles reporting pursuant to Department Circuiar No. 966.
2 Activities reporting purauant to Supplement No. I to Department Clrcular No. 966. Theae are malnly not busineas-type activities. Excluded from the June 30,1960 , figures are those activities whoae reports for that date cover asseta only (see Headnote), and alao certain activities of the Department of Defense, which have not yet furniahed the data required by Supplement No. I.
3) With the exceptions indicated in footnote 2.

4 These amounts consiat in the ina in of unexpended balances of geperal, apecial, and revolving fund accounta against which checks may be drawn to pay proper charges under theae funds. The funds are considered as asgets of the agencies, but are not assets of the United States
Government since funds muat be provided out of cash balances of the
Treasurer of the United Statea and future recelpta to take care of checks to be isaued againgt the balancea.
5/ Includes foreign currency assets, representing loana and other receivables recoverable in forelign currency as well aa balancea of
forelgn currenciea in United States depositarles, aggregating +1,137.089 thousand in dollar equivalent. These currencies, acquired without the payment of dollara, were generated under varlous Government programs, principaliy the Agricultural Trade Development and Assistance Act of 1954 , as amended, and the MutusI Security Acts, as amended. Dollar equivalent are computed for reporting purposes, to provide a comon denominator for the currencles of the many countries involved. The ratea of exchange used in the conversion of foreign currency unita to United States dollar equivalent generally depend on the ultimate utilization of these currencies. Loana and other forelgn currency recelvables that are dollar denominated in loan agreementa are valued at agreement rates of exchange. Loans atated in unita of foreign currency and receivables in currencles that are avallable for aale for dollara and certain other United States useg are converted at market rates of exchange in effect on reporting datea, 1. e., the rates at which the Treasury sells such currency to Govermment agencies.

## Footnotes to Table 2
