Note: Where calculations have been made from unrounded figures, the details may not check to the totals shown.

Data on rocelpt: expendltures, and debt which appoar in the "Treasury Bullotin" are besod largely on two Traesury finanolal reports, the "Dally statsment of the United States Treasury" and the "Monthly statement of Recelpte and Expenditure of the United Statea Goverment." Certaln monetary atatiotios are based at least in part on the "Ciroulation Btatement of Onited Stateo Money," Where theas statexente are given an sources for individual tables, they are olted by name only. Their reepootive reporting bases are desoribed belov. For other date in the Builetin, information on cources or reporting base is givea in oonnection with the table: themeelves.

The monthly etatement of recelpte and oxpanditures was 815 s publiahod for February 1954, and replanod tho delly atatement as the prianary soureo of information on budget resul to and other roonipt and expenditure data oleesifled by type of acoount. At the enpe time, the dally statemen was ohanged to a atatement of oash deposite and withdravale affeoting the account of the Treasurer of the th: ted States. Both publioationa bave provided comparative slgures on their rebpective basoe from the beginnieg of the flecal year 1953. The announoameat of Fetruary 17. 1954, with respeot to these roporting ohanger may be found in the April 1954 sesue of the Bulletin.

The monthly atstement showa all reoospte and expeodstures of the Governsoot, inoluding thoss made fron oash acoounte beld oute1de the United Stater Treasury. The 1nformation is oompliod from roporte by the Treasurar of the Uolted gtates and by all other colleoting and aleburaing agenoles, inoluaing those agonolen rbich malotalo obooking a000unte 10 oomerolal hanks. These reporte pover transaotsoas reoorded 10 the aocounte of the agencien duriog the reporting poriod. The net of the traneaotions as compllad from these reporte is reconolled in the monthly etatement to changee in the balance in the Treasurar's aocouot and in oasb bold outelde the Tresourer'o acoount and ohanges in the publio debt outetanding.

Reosipte of taxes and subtome duties ars reported on a colleotions basie. Other reosipte are reported partially on a colleotione basle and partially on a deposite bals. Expenditures, except intereet on the publio debt, are reported on the beale of obeoke lesued or cesh paymente made by dishurising offloers. tranesotione of ao interfund or intragovernmeotal nature are included 00 the asme bale even though the actual iseuanoe of ohookt mas not be isvolved. Interest oa the pubilo debt 10 1noluded on an acorual batie beginning with figuree for June 1955 and the flacal year 1955. Prior to thet, it wae inoluced on a due and parable baele. The same reporting bable as that in the mootbly etatement provides the fleon gear figures for the Treasury's "Combloed Bteteribnt of Reoolpte, Expenditures and Balanose of the Dolted staten Governmant and for sotual recospte and expenalturee in the "Buaget of the Onsted Btates Ooveroment."

Beginning with the final atatement for the flecal year 1960, the wonthly atatement roporta totale for net budet recolpta and budget expenditurea aftar deduotion of certain interfund traneactione which are included in the detall of both budget reosipte and budget oxpenditures. The transactions deducted conelat of intereet paymento and manor arounta of oertalin other paymenta made by Qovernment agenole to the Tresoury. Thie reportine chango wor made in accordance with the plan etated in the Preeldent's Budget Measagy or January 18, 1960. It does not affect the surplus or deflelt. Figures for eariler perlode shown
in the Treasury Bulletin were revised to the new reparting basie in the se-tember 1960 1esue. The interfund tranesctions deducted under this procedure do not include paymente to the Treasury by wholly owned Government corporatione for rethrement of their capital atock and for dieposition of earninge. These capltal tranefere have ben excluded currently from buaget receipte and budget expendituree beginning July 1,1948 , and fleures for nrior slacal years bsck through 1932 were revised a000rdingly at that time.

The dally etatement on the new bala wae firet lasued for Fabruary 17, 1954. In the doposite and witharawale as abown, no dietinotioa 16 made as to the typo of ancounte \{budget, truet, -to.). The deposits are on the hall of oartifloates of deposit oleared through the account of the Treasurer of the United States. Total vitherawale are on the besie of obeck pald or cash diebursemente mede out of the Treasurer's account. Some of the witheraval olaesifioutione shom are reported on the baide of malled reporte of oheoxe lesued and are adjusted by meane of olearing sooounte to the total of ohooke pald. Eroopt for relativaly minor amounte, nonoash interfund and other intragovernmental traneactions are exoluded. The publio deht flgures in the dally atatement also are on a "clearanco" basio, with the exception of those lasuance and retirament traneaotions reportod on the basis of telograme from Federal Reservo Banks. Noncast debt traneactions are inoluded, hovever.

The dally atatement before Fabruary 17, 1954, oovered not only tranaaotion oleared through the Treasurer'e account but also certain Government agenoy transactions whioh wero handiod through comerolal bank acoounte, and included nonoabh intertund and other intragovernmental traneantions. It provided information similar to that in the present dally etstement with respeot to the statua of the Troasurer'e socount, and elallar to that in tho present end-of-wonth dally etatemeot with roepect to debt 1esuanos, ret1rement, and amount outetanding. Reoelpte and expenditurea, however, were olabolfled by type of account, anc the budget reaulte ahow in the dally atatement were ueed as the hesig for refleoting the resulto under the Preeident'e buaget program as enaoted by the Congrese.

Recelpte were on the basie of deposite as they cleared the Treasurer's account. Expenditures oloared through the Troasurer'e account were reportec on two ouccesalve basee. Through 2946 they were on the beale of chocke pald by the Iroaburer of the United Stateb, Beginning watb 1947, expendsturee made through tho faclilitise of the Treasury Daparterent's Division of Dieburesment were on the basio of obeck lesued, whlle oortaln otbers, prinexpally those of the Departient of Defenee and its predeceseor organizations, were on the baele of cheoke pald. Traneaotions handied through commerolel bank accounte, consieting of market transaotions 10 public dobt and guaranteod epourlities, wors as reported by the agenoles. Intereat on the publio $d$ obt wat inoluded 00 a due and pajeble baele beginnlog with Novamber 1949 and on a checke-pald basle prlor to thet tlwe.

The olrouletion etatement refleote tranesotione through the Treosurer' account whob affoot monetary, atooke of gold and allver and the mounte of oola and ourrency in the mooey aupply of the country. It in leaued lotor than the dally otetement, however, and the flgurse are based on tranceotion oonsumeted during the reporting period even though eome wey not have cleared the Tremourer' gooount during ther porlod.

In the 1962 Budget document, Special Anslyais G, taxes not otherwise classif fed are included in miscellaneous receipts.
7) Beginning 1957, includes collections under incressed rates in the Highray Revenue Act of 1956 (see footnote 13).
Figures shown include (see footnote 9) decresses in income tax withheld or $\$ 98$ willion in January and $\$ 52$ willion in October, and in fncome tax not withheld of 4 willion in Jenuary and $\$ 3$ willion in October; increase in treasfers to Federal Old-Age and Survivors Insurance Truat Fund of $\$ 90$ willion in Jamuary and $\$ 50$ million in October, snd to Federal Dissbility Inturance Trust Fund of $\$ 11$ million in JeDuary and ${ }^{5}$ million in October.
(7) Amounts appropriated to the Federal Old-Age and Survivora Inaurance

Trust Fund are equivalent to the amounts of taxes collected and depoaited for old-age insursnce. Amounts traneferred currently for appropristion to the trust fund are based on estimates of oldoge insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjusted in later tranafera on the
bsis of vage and aelf-employment income records maintained in
the Socisl Security Administration. The smount of old-age
insurance tax refunds is reimbursed to the general fund by the trust fund.
The Federsi Disability Insurance Trust Fund was egtablished by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropristed to the trust fund amounta equivalent to speciffed percentages of the wages and self-employment incowe, respectively, which are tared for old-age insurance, and provided that the amounta appropristed should be transferred from ifme to time to the trust fund on the same bssis ss tranafers to the Federsl 01d-Age and Survivors Insurance Trust Fund. Ratea of tox were increased by the percentages sppropriated to the Federal
Dissbility lasurance Trust Fund, the incresse being applicable to
wages paid and taxable yeara beginning after December 31, 1956.

1) Amounts are appropristed to the Railrosd Retirement Account equsl to the amont of taxea under the Rallrosd Retirement Tax Act depoaited In the Treasury, leas refunda, during each flacal year ( 65 Stat. 222 and 66 Stat. 37) snd transfers are made currently. Figures for 1953 and 1954 exclude the dovernment's contribution for creditable wilitery Bervice ( 45 U.S.C. 228C-1 ( n ) ).
2) The Euployment Secur1ty Act of 1960, approved September 13, 1960 ( $7 / 4$ Stat. 970) established in the Unemployment Trust Fund an adminiatration account, and appropriated for credit to that account, beginning with the fiscal year 1961, amounta equivalent to taxes collected and deposited under the Federsl Unemployment Tsx Act. The tax recelpts ore tronsferred currently on the bsals of estimates by the Secretary of the Treasury, with later adjustmenta as necessary. From that account are to be paid the administrative expenses of the employment security program. Prevfously the corresponding amoumts vere included, respectively, in budget recelpta and budget expenditures. Refunds of taxes are to be reimbursed from the dministration account.
13/ The HIghway Revenue Act of 1956, spproved June 29, 1956 (23 U.S.C. 120, Note) established a Highway Truat Fund from which are to be made, ss provided by sppropriation acts, Federal-sid highway expenditures af ter June 30,1956 , and before July 1, 1972. The act appropriated to this fund amounta equivalent to specified percentages of receipts from certain excise tsxes on motor fuels, motor vehicles, tires and tubes, and use of certain vahicles, and propided that the smounts appropristed should be transferred currently to the trust fund on the bssis of eatimates by the Secretary of the Treasury with proper adjustments to be pade in subaequent transfers. The use tox was imposed by the sct and ratea were increased for the other taxes. Previous to the fiscsl yesr 1957 corresponding excige tax recelpts were included in net budget receipts and Federal-aid highay expenditures were included in budget expenditures.
14. Intarest on refunds is included in expenditures on Table 4.

15/ For content, see Toble 3. Thess transactions are included in ths detsil of both budget recelpts and budget expenditures, but ste deducted from the totale (ses Reporting Basee, p. II).
16/ Figures in this columa differ from those published under the same coption prior to the September 1960 Tressury Bulletin bacsuss of the excluaion of certain intarfund transactiona (see footnota 15).
17 Transfers reduced by $\$ 300$ willion to corract those made earliar on besis of satimates (see footnote 9).

1/ State unemployment funds; used for benefit paymenta mainly.
2/ Employment Security Administration Fund, established by the Employment Security Act of 1960, approved September 13, 1960 (74 Stat. 970), into which are deposited tax receipta transferred in accordance with the act (aee "Budget Receipts and Expenditures," Table 1, footnote 12) and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Previoualy the corresponding amounts were included, respectively, in budget receipts and budget expenditures, and only the excess of receipts over expenditures, if any, was tranaferred to the trust account by appropriation. Receipts conaiat of appropriated and unappropriated tranafers of tax collections. The Federal unemployment tax allows to the taxpayer credit for contributions to State unemployment funds up to 90 percent of the Federal tax.

3/ Excesa of collections from Federal unemployment tax over expenditure for benefitg and administrative expenses each year is deposited in
this account to maintain a reaerve of $\$ 00$ million available for loans to Stateg when needed to repleniah the balances in their accounts in the trust fund. Beginning 1961, these transfers are from the administration fund in the trust account; previously they were from the general fund. Any remaining exceas ia credited to the State accounts. (42 U.S.C. 1101 - 1103).
4 For payment of benefits and refunds ( 45 U.S.C. 360). Figures exclude interim advance of $\$ 15$ million from the Treasury and subsequent repaywent, both in 1940.
5 Contributions under the Railroad Unemployment Insurance Act of 1938, as amended ( 45 U.S.C. 360 (a)), in excess of the amount apeciried for administrative expenses (see footnote 8).

The oesh inoome and outgo deta appearing in the Treaeury Bulletin, beginning with the February 1956 lesue, are on a basia consiatent with reoelpte from and paymente to the public as derived in the 1957 and subequent Budgete of the United States, Speolal Analyale A. Reoonolilation to cesh depoeite and witherawale in the eooount of the Treaeurer of the United Btates ie shown on the eame basio as in the Budget dooumente. There io aleo ehown the amount of net oash borrowing from, or repayment of borrowing to, the public. By these arrangemente, dete in accordanoe with the Budget oleesifications are mede avallable month by month. Figures for back yeare have been revieed where neceeeary in order to make them as nearly comparable with current Budget claselficatione as evallable data will permit. For thie reaeon certain of the plgures differ somewhat from those published in earlier Budget documente ae well as in the Bulletin.

The Budget eeriee of ceeh traneaotione is designed to provide information on the flow of money between the publlo and the Federal Government as a whole, and therefore inoludee traneaotione not cleared through the Treaeurer'e acoount. Recelpts and paymente include traneactione both in budget accounte and in trust and deposit fund accounte. Operatione of Government-sponsored enterpriees are included in paymente on a net besie as reflected in Treasury reporte.

Major intragovemental traneaotione whioh are reported ae both expendituree and recelpte are ellminated from both. Nonoach itewe whioh represeat acorued obligatione of the Government to make paywente in the future are aleo eliminated from expenditure but are aded later when aotual paymente are made. Recelpte from the exerelse of monetary muthority (mostly eligniorage on liver) are exoluded as not representing cash reoelved from the public. Federal oasin borrowing from the public includes net borrowing by the Treaeury through public debt traneaotions and also net borrowing by Government agencies and Government-eponsored enterprises through eales of their own securities. It excludee changes in the public debt which do not repreeent direot cash borrowing from the publio. The net effect of all these trensactione with the publio le reflected in changes in the balence in the Treasurer's account and in cash held outalde the Treasury.

Cash traneactione through the Treasurer'e account are elmilar in general concept to thoee included in the Budget eerlee, but are ilmited in ooverage to traneactione which affect the balence in that account. On the other hand, they include recelpte from the exerol oe of monetary authority, which are excluded from recelpto from the publio In the Budget series.

Net operating expenditures, or receipts (-), as messured by funds provided by or applied to net securlty transections reflected in Treasury reporte (see Table 7). To a large extent, theae Covernsent-sponsored enterpriaes secure funds for their operations by direct borrowing from the public or by cashing Federal securltias which they hold, and they apply the net income received from operetions to repayment of borrowing from the public or to investment in Federal securities. On that basis, net expenditures for operations are ahown in this table in terms of the combined net of disiavestment in Federal securities and sale of agency obligations in the market, and net
recelpts from operations are shown in terms of the comtined net of investment in Federal securities and redemption of agency obligations in the market.

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget reoelpts and expenditures but slso trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reservo Banks and branches. As the balanoes in these accountr become dopleted, they are restored by calling in (transferring) funds from the tax and losn accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan aocounta occur in the normal course of business under a unlform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaotion Involves merely the transfar of money from a customer's
account to the tax and loan acoount in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well ss for the account of their customers.

Tha tax and loan account system permits the Treasury to leave funds in banks and in the communities in which thay arlae until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detalled description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1) Special depositaries are permitted to make payment in the form of a depoait credit for the purchase price of United States Government obligations purchased by them for their awn account, or for the account of their custamers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2) Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning March

1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January $1^{\circ} 5(1$, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
3/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: In these tablen Series $A=F$ and $J$ sales are lacluded at iasus price and rederuptiong and amounts outstanding at curreat redemptioc values. Series G, H, K are lnoluded at fsoe value throughout. Matured
bonds whiob heve been rodeemed are included 10 redeapticre. Metures
$F$ and $G$ bonde outstanding are included in the laterest-bearing debt
until all bonde of the anmal series bave mstured, when they are traneforred to matured debt upoo which loterest bss cessed.
I/ Sales and redemption figurea include sxchanges of mioor amounts of (1) eatured sorlee E boods for series $G$ and $K$ bonds from May 1951 through April 1957 and (2) serles $F$ and $J$ bonde for seriss 8 bonds beginning Jamuary 1960 ; hovaver, they exclude exchanges of Beries E bonds for eeriea gonda, which are reported io Table 3.
2) Detalls by series on a cumilative basis and by periods for Series A-D conbined Will be found in the Februesy 1952 and previous lesues of the Tressury Bulletin.
3 Tncludes both matored and unmatured bonds: see Table 4
Lf Includes total value of redemptions not yet clasified between asles price and eccrued diacount.
5/ A change in procedure, beginning in June 1954 , for processing redeamed etving bonds has resulted in high level of rederptione not yet claselfied by joarly series of iscue. This incresse tomporarily obscure the rolstionabip betweed the rodemption oolume showige aloa price and acorued diacount in Tables 2 and 3 and also the
reletionship between the matured and thmstured sections of Table 4. (See also footnote 4). The subsequent distribution of this bigb level of unclassifled redemptloos may be large enough in any month to ebow redemptions of asturec and anmatured bonds in Table 4 whicb are greater than the total redemptions for that morth.
6) Roductions were made in issues and redemptione of Series E, H, F, G, $J$, and $K$ io July 2954 to compensete for the erroneous inclusion of relasue transections in June 1954 as reported in the dally Tressury statement. The smounts involved were es follows: 818 million for 19sues of Series $E$ and $K$ and $\$ 17$ willion for issues of Serlas F, G, $19 s u e s$
$J$, and $K$; and $\$ 35$ million for unclaesified retirements.
7/ Series $F$ and $G$ eales were diacontinued April 30, 2952, and Series $J$ and $K$ sales were diecontimued April 30, 1957. Sales Eigures after April 30, 1957, represent adjustments.
8/ Includes exchanges of Series 1941 F and G sevings bonds for Treasury $3-1 / 4 \%$ bonds of 2978-83
2/ Represents changes in the amounts of redemptions not yet clessified es beiween metured snd unmetured issues.

Certain detall by type of tax ia avaliable only from returna filed with the internal Revenue Service The figurea ahow include collectiona for credit to special accounts for certain ialand poasaaions, as reported by the Intemal Revenue Service. Beginning witb the flacal year 1955, they include the amounte of tax collected in Puerto Rico upon articles of merchandiae of Puerto fican manurbcture coming into the United Statea. Figures for 1954 have been reviaed to the alme beris, but those for 1953 include only amounts oollected at porta of antry into the United States.
1 Differencea between the amounta of internal revenue reported by the Internal Revenue Service as collections for given perioda and the amounts reported in Ireasury statementa as budget receipta for the aame perioda aroae becauae of differences in the time when paymenta vere included in the reopective reports. Tox paymenta are included In budget receipta when they are reported as credite to the account of the Ireosurer of the United Statea. Prior to July 1954, they vere included in internal Revenue Service collection reporta after the returas to which they applied had been received in internal revenue officea. Under procedure begun in 1950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement toxea and may exciaea, theae taxea are paid currently into Treasury depaaitariea and the depoaitary receipta, a evidence of such payments, ore attached to quarterly returns to the Internal Revenue Service.
under this procedure, the payments are inciuded in budget receipta In the month in which the depoaitary receipts are 1ssued to the taxpayers. Reviaed accounting procedures effective July 1, 1954. extended the asme practice to Internal Revenue Service collection reports.
2) Monthly figurea Include social securlty tax on self-employment income, which is levied and collected as part of the individual income tax. Fiacal year flgures exclude this tax, on the basis of estimates (see footnote 3), and it is ancluded under "Old-age and C1sability insurance."
3) In Intemal Revenue Service reports current collections are not aeparated as to type of tax; the breakdown ahown for f1scal yeara is based on eatimatea made in accordance with provisiona of Sec. 201 of the Social Security Act, as amended ( 42 U.S.C. L01) , for tranafer of tax recelpta to the trust funda (aee "Budget Recelpta and Expenditurea," Table 1).
4) Beginning with the Placal year 1955, collections shown include undis tributed depoaitary receipta and unspplied collections. For exciae texea these recetpta are included in the total only. Total collections Include "Taxea not Otherwae claa日ifled."
5/ Budget receipts for 1956 were reduced by $\$ 3,566$ thousand representing tax collectiona tranaferred to the Government of Guam pursuant to the act approved August 1, 1950 ( 48 U.S.C. 1421 h ), but this amount wa included in collectiona reported by the Internal Revenue Service. Beginning with 1957, such collections are excluded also in Internal Revenue Service reporta.
6/ Detail is reported by quartera beginning with the fiscal year 1956.

Data relating to capltal movementa between the United states and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15 , 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Inforination covering the principal types of data and the principal countries is reported monthly, and 18 published regularly in the "Treasury Bulletin." Supplementary information 1s published at less Irequent lntervals. Reports by banks, bankers, seourities brokers and dealers, and incustrial and commercial conoerns in the United States are made initially to the Federal Reserve Banks, which forward consolldated rigures to the Treasury. Beginning April 1954, data reported by banks in the Territories and posaessions of the United States are included in the publishod data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and 1 te Territories and poseessions, the official institutions of foreign countries, wherever auch inatitutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refere to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitions appeared in the June $195418 s u$ of the "Treasury Bulletin," pages 45-47. As a result of changes in presentation introduced in that issue, not all brealdowns previously
published will be exactly comparable to those now presentec.

Ths first three sections which follow are fublished monthly. They provide summaries, by periods and by countrles, of data on short-term banking liablililes to and claims on foreigners and transactions in long-term securitles by forelgners, and present detalled breakdowns of the latest available preliminary data.

Section IV providea aupplementary data in $81 \times$ tables Which appear at less frequent intervals. Table l, shortterm forelgn llabilitiee and clains reported by nonfinancial concerne, is published quarterly in the January, Aprll, July, and October 1ssues of the Bulletin. Table 2, long-term foreign liabilitiea and clalme reported by banks and bankers, and Table 3, eatimated gold reserves and dollar holdinge of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit anà debit balances in brokerage accounts, appears semiannually in the March and September 1 isues. Table 5 . short-term liabilitles to foreigners in countries and areas not regularly reported separately by baniking inatitutions, 18 presented annually, appearing in the April $18 s$ ue through 1958 and in the March $18 s u e$ thereafter. Table 6, purchases and sales of long-term securities by foreigners during the preceding calendar year, also appears annually, beginning with the May 1959 issue.
