## Reporting Bases

Data on receipta, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury IInancial reporta, the "Dally Statement of the United states Treasury" and the "Monthly Stetement of Receipts and Expenditursa of the United States Government." Certain monetary atatistics are based at least in part on the "Circulation Statement of United States Money." Where those atatements are given as sources for individual tables, they are cited by name only. Thelr respoctive reporting bases are desoribed below. For other data in the Bulletin, information on sources or reporting bases 1a given in connection with the tables themelves.

The monthly etatement of recelpts and expenditures was first published for February 1954, and replaced the dally 6 tatement as the primary source of information on budget results and other reoelpt and expenditure data classifled by type of account. At the aame time, the dally atatement was changed to a statement of cash deposits and withorawale affecting the account of the Treacurer of the United States. Both publications have provided comparative ilgures on their respective bases from the beginning of the flecal year 1953. The announcement of February 17, 1954, with respect to these reporting changes way be found in the April 1954 iseue of the Bulletin.

The monthly statement shows all receipts and eqpenditures of the Government, including those made from cash accounte held outside the United States Treasury. The information 18 complled from reporto by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking acoounts in comercial banke. These reports cover transactions recorded in the accounta of the agencies during the reporting period. The net of the transaotions ac complled from these reports is reconclled in the monthly statement to changes in the balanoe in the Troasurer's acoount and in cash held outfide the Treasurer's account and changes in the publio debt outstanding.

Recsipts of taxes and customs dutise are reported on a collecticns basis. Othar reosipts are reported partially on a collections babis and partially on a deposite basis. Expenditures, except interest on the public debt, are reported on the basie of checke $188 u 8 d$ or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual lesuanoe of checks may not be involved. Interest on the public dabt 18
included on an accrual bas 16 beginning witb figuree for June 1955 and the flecal jear 1955. Prior to that, it was included on a due and payable basie. The same reporting basis as that in the monthly statement provides the fleaal year ilgures for the Treasury's "Combined Statement of Rece1pts, ExpendIturee and Balances of the United Statee Governsent" and for sotual reoeipts and expenditures in the "Budert of the United States Government."

Boginning with the inal etatement for the flacal year 1960, the monthly statement reporte totala for net budget recelpts and budget expend1tures after decuction of oertain interfund transactions which are included in the detall of both budget receifts and budget expenditures. The transactione deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change Was made in accordanoe with the plan stated in the President's Budget Message of January 18,1960 . It dose not affect the ourplus or deficit. Figures for earlier perlode hown in the Treasury Bullotin were revised to the new reporting basis in the September 1960 1ssue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporatione for retirement of their capital atock and for disposition of earnings. These capital transfers have been excluded ourrently from budget recelpts and budget expenditures beginning July 1,1948 , and 1igures for prior $1180 a l$ years back through 1932 were revised acoordingly at that ilme.

The daily atatement on the new basis was ilret 1esued for February 17, 1954. In the depoelte and withdrawale as shown, no dletinction is made as to the type of acoounts (budget, truet, eto.). The deposits are on the basic of certiflcates of deposit cleared through the account of the Treasurer of the United States. Total withdrawala are on the basie of checks pald or cash disbursements made out of the Treasurer's account. Some of the withdrawsl claesiflcations shown are reported on the basie of malled reports of ohecks 1 seued and are adjusted by means of olearing accounte to the total of ohecks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt flgures in the dally statement also are on "clearance" basis, with the exception of those lesuance and retirement transactions reported on the basis of telegrame from Federal Reserve Banka. Noncach debt transactione are included, however.

## Reporting Bases - (Continued)

The dally statement before February 17, 2954, covered not only transaotions oleared through the Treasurer's acoount but also certain Government agency transactione whioh were handled through comercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present dally atatement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month dally statement with respect to debt issuanoe, retirement, and amount outstanding. Reoelpts and expenditures, however, were olassif1ed by type of account, and the budget results shown in the dally statement were used as the basis for refleoting the results under the Prosident's budget program as enacted by the Congress.

Receipts were on the basis of deposita as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's acoount were reported on two successive base日. Through 1946 they were on the basis of checke pald by the Treasurer of the United States. Beginning with 1947, expendituree
made through the faollitlee of the Treasury Department's Division of Disbursemsnt were on the basis of checks 1seued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basie of ohecke paid. Transaotions handled through commercial bank aocounta, consisting of marlet transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a dus and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactione through the Treasurer's account which affect monetary stocks of gold and ellver and the amounte of coin and currency in the money supply of the country. It is 1saued later than the dally atatement, however, and the ilgures are based on transactions consummated during the reporting period even through some may not have cleared the Treasurer's account during that pariod.

Source: Actual figurea through the riscal year 1952 and the calendar year 1953 are from the daily Treasury atatement, and thereafter from the monthly statement of receipts and expenditurea of the Government (for explanation of reporting bases, aee page II); estimatea are based on budget messages of the President dated March 24 and March 28, 1961, and the Statement of the Director of the Bureau of the Buaget before the Joint Economic Comittee on March 27, 1961. More detail for data on this page will be found in succeeding tables.
1/ Fiscal year figures beginning with the September 1960 iasue of the Treasury Bulletin, and calendar year figurea beginning with the June 1961 isaue exclude certaln interfund transsctions from both net budget receipta and budget expenditures (see pages II, 2, and 4). Figures previously published for these series have been revised to the new reporting basis. The change does not affect the budget surplua or deficit.
2/ Excess of receipts, or expenditures (-). For detail, see psges 9 For checks outatanding and telegraphic reports from Federsl Reserve Banks; public debt interest accrued and unpad beginning with June and the fiscal year 1955 (previously Included from November 1949 as
interest checks and coupons outstanding); also deposits in transit and changes in caah held outside the Treasury and in certain other account beginning with the fiscal year 1954. Net increase, or decrease (-).
4/ For current month detail and list of acts, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each becsme effective are as follows: \$275 billion, on June 26, 1946; \$281 billion, on August 28, 1954; \$278 billion, on July 1, 1956; \$275 blllion, on July 1, 1957; \$280 billion, on February 26, 1958; $\$ 288$ billion, on Septerber 2, 1958; $\$ 290$ billion, on June 30, 1959; $\$ 295$ billion, on July 1, 1959; and $\$ 293$ billion, on July 1, 1960 . From July 1, 1961, through June 30, 1962, the limit is $\$ 298$ billion. Thereafter it will revert to $\$ 285$ billion.
5 Transactions of the Foreign Economic Cooperation Trust Fund, estab1ished under Section 114 (f) of the Economic Cooperation Act of 1948 ( 62 Stat. 150), are consolidated with budget expenditures.
6/ The President's budget messages of March 24 and March 28, 1961 did not include detailed eatimates for these items.

Source: Actual figures are from reports to the Ireasury Department by diaburging officers, on the monthly statement reporting basis (see page II); estimates are based on budget messages of the President dated March 24 and March 28, 1961, and the Statement of the Director of the Bureau of the Budget before the Joint Economic Committee on March 27, 1961.

1) Consigts of miscellaneous taxes (principelly the tonnage tax on foreign vessele entering U. S. ports), bullion charges, and gifts and contributions.
a. Difference between the total shown in the monthly statement of reportg) and that from final accounts of disbursing officers.
2) In 1953, taxes collected In Puerto Rico on products of Puerto Rlican manufacture coming into the United States, amounting to \$16 mili1on, are classified as miacellaneoug budget receipts; thereafter, such collections are included In Internal Revenue collections of excise taxes.
4 See Table 1, footnote 7. * Less than $\$ 500,000$.

## Footnotes to Table 1-(Continued)

6/ In the 1962 Budget document, Special Anslysis G, taxes not otherwise classified are included in miscellaneous receipts.
7) The President's budget messages of March 24 and March 28, 2961, did not include detailed estimates for these items.
8/ Figures shown include (see footnote 9) decreases in income tax withheid of $\$ 52$ million in October, $\$ 84$ miliion in Jenuary, and $\$ 8$ million in April, and in income tax not withheld of $\$ 3$ million in October, $\$ 7$ miliion in Jenuary, and $\$ 3$ million in April; increases in transfers to Federal 01d-Age and Survivors Insurance Trust Fund of $\$ 50$ olilion in October, $\$ 86$ million in Januery, and million in April, and to Federal Disability Insurance Trust Fund of $\$ 5$ million in October, $\$ 4$ million in Jenusry, and $\$ 3$ million in April.
9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of texes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C $401(a))$, and are adjusted In later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. The amount of old-age insurance tax refunds is reimbursed to the general fund by the trust fund.
10) The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust find amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transierred from time to time to the trust fund on the same basis as transfers to the Federal 01d-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxea under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiacal year ( 65 Stat. 222 and 66 Stat. 371 ) and transfers are made currently. Figures for 1953 and 1954 exclude the Covernment's contribution for creditable military service (45 U.S.C. 228c-1 (n)).

12 The Employment Security Act of 1960, approved September 13, 1960 ( 74 Stat. 970) established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with the fiscal year 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are tranaferred currentiy on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the adminiatrative expenses of the employment aecurity program. Freviously the corresponding amounts were included, respeatively, in budget receipts and budget expenditures. Refunds of taxes are to be reimburaed from the administration account.
23 The Highway Revenue Act of 1956, approved June 29, 1956 (23 U.S.C. 120 , Note) establianed a Highway Trust Fund from which are to be made, as pro vided by appropriation acts, Federal-aid highway expenditures after Jun 30, 1956, and before July 1, 1972. The act eppropriated to this fund amounts equivalent to specified percentages of receipts fram certain excise taxes on motor fuels, motor vehiclea, tires and tubes, and use certain vehicles, and provided that the amounts appropriated should be tranaferred currently to the trust fund on the bagis of estimates by the Secretary of the Treasury with proper adjustmenta to be made in subsequent transfers. The use tax was impoed by the act and rates were increased for the other taxes. Previous to the fiscal year 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures. Interest on refunds is included in expenditures in Table 3.
For content, see Table 4. These tranaactions are included in the detai of both budget receipts and budget expenditures, but are deducted from the totals (see Reporting Bases, p.II).
16/ Figurea in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin becouse of the exclusion of certain interfund transactions (see footnote 15).
17 Transfera reduced by $\$ 300$ million to correct those made earlier on besis of estimates (ace footnote 9).
28 Net of reimbureement of $\$ 72$ million in November from the Highway Trust Fund.
Lees than $\$ 500,000$.

The caeh inoome and outgo data appearing in the Treasury guiletin, beginning with the February 1956 1saue, are on a basis consistent vith receipte Irou and payments to the public as derived in the 1957 and subgequent Budgets of the United States, Speoial Analysis A. Reconciliation to cash deposita and withdrawale in the account of the Treasurer of the United States is hown on the same basie as in the Budget documenta. There is also shown the amount of not cash borrowing from, or repayment of borrowing to, the public. By these arrangementa, data in accordanoe with the pudget classiflcatlons are mads avallable month by month. Figures for back years have bean revised where necessary in order to make them ss nearly comparable with current guczet claselfications as avallable data will permit. For this reason certaln of the fleures differ samewhat from those published in earller guceet docunenta as well as in the Bulletin.

The Budget gerles of can transactions 18 debigned to provice information on the $110 w$ of money between the public and the Federal Government as a whols, and therefore Includes transactions not cleared through the Treasurer's acccunt. Recelpts and payments include transactions both In budget accounte and in trust and deposit fund sccounts. Operations of Government-aponaored enterprisea are included in paymente on a net bssia as rellected in Treasury reports.

Major intragovermmental transactions which are reporied as both expenditures and recelpto are eliminated from both. Noncash iteme which represent accrued obligations of the Govermment to make payments in the future are siso eliminated from expenditures but are added later when actual paymente are made. Recelfta trom the exercise of monetary authority (mostly eelgniorage on ellver) are excludec as not repreaenting cash recelved from the public. Federal can borrowing from the public includes net borrowing by the Treasury through public debt tranaactions and aleo net borrowing by Government agencles and Government-sponsored enterprises through asies of their own securities. It excluder changer in the public debe which do not repreaent direct cash borrowing from the public. The net eflect of all thess transactions with the public 1s reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer ${ }^{1}$ g account are shrilar in general concept to thoge incluoded in the gudget aer10日, but are I1mited 1n coverage to transactions whah arfect the balance in that account. On the other hand, they include recelpte from the exerciee of monetary authority, which are excluded from recelpte from the public in the Budget aeries.

## Footnotes to Table 3

1) All previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures; and also in the July 1961 issue deductions for certain intertrust fund transections from both trust account receipts and trust account expenditures (see pp. 2, 4, 9, and 10). Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
2) Treated as noncash refund deductions from receipts when issued and as cash ref und deductions when redeewed.
3/ Consists of seigniorage and the increment resulting irom reduction in the
weight of the gold dollar; excluded from recelpts from the public but included in cash deposits in the Treasurer's account.
4 Figures in this column differ from those published prior to the September 1960 Treasury Bulletin because a few additional ftems of budget recefpts whifh are also budget expenditures are included in the interfund transactions deducted from budget receipts and budget expenditures (see footnote 1).
5 Adjusted for reclassification of certain repayments of advances from the general fund.

## Source and Availability of the Balance in the Treasurer'a Account

The account of the Treasurer of tha United Statea replects not only budget recelpts and expenditurea but aleo truet, depoait fund, and public debt iranaactiona.

The working cath of the Treasury is held mainiy in Treasurer'a accounta with Federal Reaerve Banka and branches. As the balances in these accounta become depleted, they are reatored by calling in (tranalerring) funds from the tax and loan accounta with thousands of comrercial banks throughout the country.

Depoaita to tax and loan accounta occur in the normal couree of buaineas under a unlform procedure applicable to all banks whereby cuetomers of banks depoeit With them tax payments and funds for the purchase of Government sacuritiea. In most casea the tranaaction Involvea merely the tranefer of money from a cuatomer'a
account to the tax and loan account in the gate bank. On occaelone, to the extent authorized by the rreasury, banka are permitted to depoait in these accounts proceeda rom aubscriptions to public debt aecurities entered for their own account as well as for the account of their cuatomera.

The tax and loan account syatem parmite the Treasury to leave funds in banks and in the comounitlea in which thay ariae until auch time as the Treasury neede the funda for 1 ts operationa. In this way the Tresaury $1 s$ able to neutralize the effect of ite fluctuatinz operatione on bank reserves and the aconomy.

A detalled deacription of the Treasury's depoaitary syatem may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1 Speclal depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issueg.
2 Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld Income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
3 Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Tabie 2.- Computed Interest Charge and Computed Interest Rate on Federal Securities

## Source: Dally Treasury statement

ote: The computed annual interest charge representa the amount of interest that would be pald if each interest-bearing issue outatanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is conputed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securlites aold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate ia computed by dividing the computed anmul interest charge for the total, or for
any group of 1 ssues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for isaucs aold at premium or discount. prior to that date $1 t$ was based on the coupon rate for all 1asues.
1/ Includes only guaranteed securities held outside the Treasury.
2/ Total includes "Other bonds"; see Table 3.
3/ Included in debt outatanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
4 On United States savinga bonds the rate to maturity is applied agalnat the amount outstanding.

Table 1.- Summary by Principal Sources

Source: Internal Revenue Service reports for detall of collectiona by type of tax; monthly statement of receipts and expenditures of the covernment for budget receipta from internal revenue (for explanation of reporting basee in this publication, see page II). Certain detail by type of tax ia available only frow returns filed with the Internal Revenue Service The rigures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articies of merchandise of Puerto Rican manufacture coming into the United States. Figures for 1954 have beem revised to the same basis, but those for 1953 include only amounts collected at ports of entry into the United States.
1/ Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget recelpts for the aame perlods arose because of differences in the time when payments were included in the respective reports. Tax payments are included In budget receipts when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld incose tax and old-age insurance taxes and later extended to rallroad retirement taxes and many excises, these taxes are pald currently into Treasury depositaries and the depositary recelpts, as evidence of such payments, are attached to quarterly returns to the Intermal Revenue Service.

Under this procedure, the payments are included in budget receifts in the month in which the depositary receipts are issued to the taxpayers. Revised accounting procedures effective July 1, 295k, extended the same practice to Internal Revenue Service collection reports.
2/ Monthly figures include social security tax on self-employment income, which is levied and collected as part of the individual. income tax. Fiscal year figures exclude this tax, on the basis of estimates (see footnote 3), and it is included under "old-afe and disability insurance."
3/ In Internal Revenue Service reports current collections are not separated as to type of tax; the breakdown shown for £1scol years is based on estimates made in accordance with provisions of Sec. 201 of the Social Security Act, as amended ( 42 U.S.C. 401), for quanziet of tax receipts to the trust funds (see "Budget Receipts a..d Expenditures," Table 1).
4/ Beginning with the fiscal year 1955, collections shown inciade urijistributed depositary receipts and unapplied collections. For excise taxes these receipts are included in the total only. Total collections include "Taxes not otherwise classified."
2/ Budget rece1pts for 1956 were reduced by $\$ 3,566$ thousand represent Ing tax collections transferred to the Goverment of Guam pursuant to the act approved August 1, 1950 ( 48 U.S.C. 1421 h ). but this amount was Included in collections reported by the Internal Revenue Service. Beginning with 1957, such collections are excluded also in Internal Revenue Service reports.

Data relatine to cafital movemente between the United States and foreign countriea have been collected since 1935. purauant to Executive Order 6560 of January 15 , 1934, Executive Oraer 10033 of February 8, 1949, and ${ }^{m}$ reasury refulstions promulgated thereuncer. Information covering the principal types of data and the principal countries is reforted monthly, and is published regularly in the "Treasury Bulletin." Supplementary Information ia published at leas frequent intervals. Reports by banis, bankera, securities brokera and dealers, and incustrial and commercial concerna in the United States are made initially to the Federal Reaerve Eaniss, which forward consolldated figures to the Treasury. Eeginning April 1954, data reported by banks in the Territories and poasesalons of the United States are included in the pubilshed data.

The term "roreigner" as used in these reports covers all institutions and individuals domicilec outside the United States and its Territoriea and possescions, the official ingtitutions of foreign countries, wherever such 1 nstitutions may be located, and international organizations. "Short-term" refera to original maturitiea of one year or leas, and "long-term" refera to all other maturitiea. A detalled discuasion of tize reporting coverase, otatictical presentation, and definitions appeared in the June 1954 1ssue of the "Treasury Bulletin," pages $45-47$. As a reault of changes in preaentation introduced in that $18 s u e$, not all breakdowns rreviously
published will be exactly comparable to those now presentec.

The first three sectiona which fol ow are fublisised monthly. They provide summaries, by periocs and by countriea, of data on short-term bankinz liabil1:1es :o and claime on forelgners and transactions $1: 3$ long-term securities by foreigners, and preaent detalled breardowns of the lateat available preliminary data.

Section IV providea supplementary data in $a 1 x$ tatles which appear at less frequent intervale. Table l, shortterr foreign liabilities and clains reported by ner.financial concerns, is published quarterly in the Janusry, April, July, and October 1ssues of the Bulletin. Table 2, long-term forelgn liabilitiee and clalma reported by banine and bankers, and mable 3 , eatimated eold reeerves and dollar holcinge of forelgn countries and interrational institutions, are published quarterly in the March, iune, September, and December 1ssues. Table 4 , roreign crenit and debit balances in rrokerage accounts, appears spriannually in the March and September issuea. Table 5 , short-term $11 a b 111$ tiea to forelgners in countries anc areas not regularly reported separately by banising $1 r-$ otitutiona, 16 presentec annually, appearing in the iprll 1saue througt 1958 and 17 the March $18 s u e$ theredfter. Table 6, purchases and aalea of long-term securitles by foreigners during the preceding calendar year, also appeara annually, beginning with the May 1959 16sue.
