Note: Where calculations have been made from unrounded figures, the details may not check to the totals shown.

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury inancial reporta, the "Dally statement of the United States Treasury" and the "Monthly Statement of Recelpts and Expenditurec of the United States Governvent." Certain monetary statistics are based at least in part on the Mrculation Statement of Unlted States Money." Where theae atatements are given as sources for inclvidual tablea, they are cited by name only. Their respective reporting basee are deecribed below. For other data in the Bulletin, information on sources or reporting bases 1s given in connection with the tables themelves.

The monthly etatement of receipts and expenditures was first published for February 1954, and replaced the dally statement as the primary source of information on bugget reaults and other recelft and expenciture data claesifled by type of account. At the oane time, the dally otatement was changed to a etatement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be round in the April 195418 sue of the Bulletin.

The monthly statement shows all recelpts and expenditures of the Government, including those made from cash accounts held outside the United states Treasury. The information $1 \theta$ compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agenciee which maintain checking accounte in commercial banke. These redorto cover transactions recorded in the accounts of the agencies during the reporting period. The nat of the transactions as complled from these reportis is reconciled in the monthly atatement to change in the balance in the Treasurer's account and In cash held outcids the Treasurer's account and changee in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipte are reported partially on a colleotions basie and partially on a deposite basis. Expenditures, except interest on the public debt, are reported on the basis of checks 18 sued or cash paymente made by disbureing officers. Transactione of an interfund or intragovernmental nature are included on the same basis even though the actual isouance of checks may not be involved. Interest on the public debt ie
included on an accrual basis beginning with figures for June 1955 and the f1ecal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in tbe monthly otstement provides the fiscal year 1 gures for the Treasury's "Combined Statesent of Rece Ifte, Expenditures and Balances of the United States Governventw and for sotual recelpts and expenditures in the "Budget of the United States Government."

Eeginning with the final statement for the E18cal year 1960, the montbly statement reporto totals for net budget recelpts and budget expend1tures after deduction of certain interfund transactione which are included in the detall of both budget recelfts and budget expenditures. The transactions deducted consist of Interest payments anc minor amounts of certain other psyments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Eudget Message of January 18, 2960. It doee not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 2960 1s 日ue. The interfund transactions deducted under this procedure do not include paymento to the Treasury by wholly owned Government corporations for retirement of their capital stock and for dieposition of earnings. These capital transfers have been excluded currently from budget recelpto and budget expenditures beginning July 1,1948 , and 12gures fcr prior 1180 al yeare back through 1932 were revised accordingly at that time.

The dally statement on the new basis was flrat 1ssued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounte (budget, truet, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checis paid or cash disbursements made out of the Treasurer's account. Same of the witharawal cisseifications shown are reported on the basis of mailed reports of checks 1 isuled and are ajusted by means of clearing accounts to the total of checke paid. Except for relatively minor amounte, noncesh interfund and other intragovernmental transactions are excluded. The public debt flguree in the dally statement also are on a "clearance" basis, with the exception of those 1 susunce and retirement transactions reported on the basis of telegrams from Feceral Reserve Banks. Noncash debt traneactions are 1 n cluded, however.

The dally Btatement before Fabruary 17, 1954, covered not only tranaaotiona olaared through the Treasurer's account but also certain Government agency traneactione which were handled through comercial bank accounta, and included noncaeb interfund and other intragovarnmantal traneactions. It provided information similar to that in the presant daily statement with respect to the atatus of tha Traasurer'a acoount, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outatanding. Reoeipts and axpenditures, however, were olassilied by type of account, and the budget reaulte ehown in tha dally statement were ueed as the basia for refleoting the reaults under the President's budget program as anactad by the Congreas.

Reosipte were on the basio of deposite as they cleared the Treaeurer'e acoount. Expenditures cleared through the Treasurer'e aooount were reportad on two aucoeselve bases. Through 1946 they were on the basis of chacke paid by the Treasurer of the Unit ad Statas. Beginning with 1947, expenditures
made through the faollitiea of the Treasury Department'a Division of Disburesmant were on the basia of checks isaued, while certain others, principally those of the Department of Defenee and its predecessor organizationa, were on the basie of checks paid. Tranaactions handlad through commercial bank accounts, consisting of market transactions in public debt and guarantead securities, ware as reported by the agenciae. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checka-paid basie prior to that time.

The circulation statemant reflects transactions through the Treasurer's account which affect monetary stocks of gold and silvar and the arounta of coin and currency in the money supply of the country. It is is sued later than the dally etatement, however, and the figures are based on tranaactions consummated during the reporting period even through aome may not have cleared the Traasurer's account during that pariod.

## Footnotes to Table 1 - (Continued)

6) In the 1962 Budget locument, Special Anslyais G, taxea not otherwiae clasaified are included in miscellaneous receipta.
7) The President's wessages referred to in the source note on page 2 did not include detailed estimates for these items.
8/ Figurea ahown inciude (aee footnote 9) decreasea in income tax withheld of $\$ 84$ willion in January, $\$ 8$ million in April, and $\$ 170$ million in June, and in income tax not withheld of $\$ 7$ million in January, $\$ 3$ million in April, and $\$ 6$ willion in June; increases in tranafera to Federal 01d-Age and Survivors Inaurance Truat Fund of \$86 million in January, $\$ 8$ miliion in April, and $\$ 162$ willion in June, and to Federal Diaability In\&urance Truat Fund of $\$ 4$ million in January, $\$ 3$ million in April, and $\$ 15$ million in June.
2/ Amounta appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounta of taxes collected and deposited for old-age insurance. Amounta transerred currently for appropriation to the trust fund are based on eatimates of old-age Inaurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjuated in later transfera on the basis of wage and self-employment income records meintained in the Social Security Administration. The amount of old-age insurance tax refunds ia reimburged to the general fund by the trust fund.
8) The Federal Disability Insurance Trust Fund was eatabliabed by the Social Security Act Amendmenta of 1956, approved August 1, 1956 ( 42 U. S.C. 401 (b)). The act appropriated to the trust. fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounta appropriated should be tranaferred from time to time to the trust fund on the aame basia as tranafers to the Federal Old-Age and Survivora Ingurance Trust Fund. Ratea of tax were increased by the percentagea appropiated to the Federal Diability Inaurance Truat Fund, the increase being applicable to wagea paid and taxable yeara beginning after December 31, 1956.
11/ Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act depoaited in the Treasury, less refunda, during each fiacal year ( 65 Stat. 222 and 66 Stat. 37i) and ".sansfera are made currently. Figurea for 1954
exclude the Government's contribution for creditable military service ( 45 U.S.C. $228 \mathrm{c}-1$ ( n )).
12/ The Employwent Security Act of 1960, approved September 13, 1960 (74 Stat. 970) eatabliabed in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with the flacal year 1961, amounts equivalent to taxes collected and depoaited under the Federal Unemployment Tax Act. The tax receipts are tranaferred currentily on the basis of eatimates by the Secretary of the Treasury, with later adjustmenta as necessary. From that account are to be paid the administrative expensea of the ewployment aecurity program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures. Refunds of taxes are to be reimburaed from the administration account.
13/ The Highway Revenue Act of 1956, approved June 29, 1956 (23 U.S.C. 120, Note) established a Highway Trust Fund from which are to be made, as provided by appropriation acta, Federal-aid highway expenditures after June 30, 1956, and before July 1, 1972. The act appropriated to this fund amounts equivalent to specified percentagea of receipta from certain exciae taxes on motor fuela, motor vehiclea, tires and tubes, and use of certain vehiclea, and provided that the amounta appropriated ahould be transferred currently to the trust fund on the basis of estimatea by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. The use tax was impoaed by the act and rates were increased for the other taxes. Previous to the fiaca 2 year 1957 corresponding exciae tax receipts were included in net budget receipta and Federal-aid highway expenditures were included in budget expenditures.
$1 \underline{1}$ Interest on refunda ia included in expenditurea in Table 3
15 For content, see Table 4. These transactiona are included in the detail of both budget receipta and budget expenditurea, but are deducted from the totals (aee Reporting Bases, p. II).
16/ Figurea in thia column differ from those publiahed under the same caption prior to the September 1960 Treasury Bulletin becauae of the exclusion of certain interfund tranaactions (see footnote 15).

p Preliminsry.

The cash inoome and outgo data oppearing in the Treasury Bulletin, beginning with the Fobruary 1956 iseue, are on basio consletent with reoelpte from and paymente to the public as derived in the 1957 and subsequent Budgete of the United Statea, Special Aralyols $A$. Reconclilation to cash deposite and withdrawale in the account of the Treasurer of the United Statee 10 ohown on the oame baile as in the budget doomente. There 10 also show the amount of net ceeb borrowing from, or repaysent of borrowing to, the public. By these arrangemente, data in accordance whth the Budget Classification are mede avallable month by month. Flgures for back yeare have beon revised where necessary in order to make them as nearly comparable with current Buczet clas siflcations as avallable data will permit. For this reason certain of the flgurea differ somewhat from thooe putlished in earller Budget documents as well es in the Bulletin.

The Budget series of cash transactions 18 designod to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's sccount. Receipts and paywents include transactions both in budget accounts and in trust and deposit fund accounts. Operation of dovernment-sponsored enterprisee are included in paymention a net basis as roflected in Tressury reports.

Major intragovermental iranasctions which are reported as both expenditures and receifte are eliminated from both. Noncesh iteme whion represent accireo obligetrone of the Govemment to make paymente in the future are also eliminated from expenditure but are adcel leter waen aotual paymente are rade. Recelptis from the oxercise of monetary authority (mostly oelgalorage on liver) are excludec ae not representing cash recelved from the public. Federal casn borrowing from the public includes net borrowing by the Trea日ury through public debt traneactione and aleo net borrowing by Government agenciea and Government-eponsored enterprise日 through sales of thelr own securitiee. It excludes changes in the public debt which do not repreaent direot cash borrowing from the publio. The net effect of all these transactions with the public ie reflected in changee in the balance in the Treasurer's account and in cael held outelde the Treasury.

Casb traneactione through the Treasurer'a account are similar in general concept to those included in the Budget serles, but are limited in coverage to transactions whioh affect the balance in that account. On the other hand, they include recelpts from the oxercise of monetary authority, which are excluded from recelpte from the public in the Budget eerles.

20 Advance refunding offering. Purguant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 ab added by Public Law 86-346, approved September 22;, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or lose, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.
21. Holders of 2-1/2\% Treasury bonds maturing November 15, 1961, were offered the option to exchange the bonda during the period from June 8, 1960, to June 13, 1960, inclusive, subject to allotment if subscriptions exceeded by 10 percent the offering limits of $\$ 3.5$ billion for the notes and $\$ 1.5$ billion for the bonds.
22/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $3-1 / 8 \%$ certificates or the $3-7 / 8 \%$ bonds, which were offered in an aggregate of around $8-3 / 4$ billion. For detail of offering, see Table 4.
23 Excess of maturing 4-3/48 Treasury notes over allatments of ne securities on subscriptions from holders of those notes (see Table 4, footnotes 44 and 46).
24 Reopening of an earlier issue.
25 Holders of 2-1/2\% Treasury bonds maturing June 15, 1967, December 15, 1968, June 15, 1969, and December 15, 1969, were offered tbe option to exchange the bonds duriny the period from September 12, 1960, to September 20, 1960, Inclusive, the first for 3-1/2\% bonds of 1980, the second for $3-1 / 2 \%$ bonds of 1990 , and the other two for $3-1 / 2 \%$ bonds of 1998, subject to allotment if the combined total of subscriptions for the bonds of 1990 and 1998 exceeded an outside limit of $\$ .5$ billion. Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to preaent them in payment or exchange, in whole or in part, for the $3-1 / 4 \%$ notes offered in the amount of around $\$ .9$ hillion. For detall of offering, see Table 4.
27 Exeess of maturing $4-7 / 8 \%$ certiflcates over allotments of new securities on subscriptions from holders of those certificates (see Table 4 , footnotes 51 and 52).
28/ From March 20 through March 22, 1961, owners of $2-1 / 4 \%$ bonds of June 15, 1959-62, 2-1/4\% bonds of December 15, 1959-62, 2-5/8\% notes waturing February 15, 1963, and $2-1 / 2 \%$ bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new $3-5 / 8 \%$ bond due November 15,1967 , and the last for a new 3-3/8\% bond due November 15, 1966. Exchanges were subject to allotment if subscriptiona exceeded $\$ 5$ billion for the bonds of 1967 or $\$ 3$ billion for the bonds of 1966.

29 Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 5,250 million offering of $3 \%$ certificates or the $\$, 500$ willion offering of $3-1 / 4 \%$ notes. For detall of offering, see Table 4.
30/ Excess of maturing $4-3 / 8 \%$ cerificates and $3-5 / 8 \%$ notes over allotments of new securities on subscriptions from holders of those certificates and notes (aee Table 4 , rootnotes 55 and 56 ).

Note: In thege tables salea of Seriea A-F and $J$ bonds are included at laaue price, and redemptions and amounts outstanding at current redemption value. Sertes G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-basing debt until all bonds of the annual aerlea have matured, and are then transferred to matured debt upon which intereat has ceased.
1/ Selea and redemption figurea include exchangea of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series $F$ and J bonds for Series H bonds beginning January 1960; hovever, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
2) Detalla by aeries on a cumulative basis and by periods for Seriea A-D comblned will be found in the February 1952 and previous lasuea of the Treaaury Bulletin.
3/ Because there la a normal lag in classifying redemptions the distribution of redemptions between gales price and accrued discount has been estimated. Begirning with the Treaoury Bulletin of March 1961 the method of distributing redemptions between a日les price and accrued diacount has been changed to reflect the distribution shown in final
reports of clasaified redemptiona. All perioda shown have been reviaed on thia basia.
4. Reductions were msde in isaues and redemptions of Seriea E, H, F, G, J , and K bonds in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 aa reported in tbe dally Treaaury atatement. The amounta involved vere as follows: \$18 million for issues of Series E and H, $\$ 17$ million for issues of Seriea F, G, J, and $K$, and $\$ 35$ willion for unclasaified retirementa.
5/ Series F and G aalea were discontinued April 30, 1952, and Series J and K galea were diecontinued April 30, 1957. Selea figures after April 30, 1957, represent adjustmenta.
6/ Includea exchanges of Seriea $1941 F$ and $G$ savinga bonda for Treasury 3-1/4\% bonde of 1978-83.
V) Inciudes the December 1959 exchangea of Sertes 1948 F and $G$ bonds for $4-3 / 48$ marketable notes of 1964.
8) Includes the December 1960 exchanges of Seriea 1949 F and G bonds for $4 \%$ marketable bonda of 1969, of whicb $\$ 145$ million were reported in December 1960, and $\$ 3$ willion in January 1961.
2/ Representa changea In the amounts of redemptiona not yet classified between matured and unmatured issuea.

Table 1.- Summary by Principal Sources

Source: Intemal Revenue Service reports for detall of collections by type of tax; monthly statement of recelpts and expenditures of the Government for budget receipts from internal revenue (for explanstion of reporting bases in this publication, see page ll). Certain detail by type of tax is available only from returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain 1sland possessions, aa reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articles of merchendise of Puerto Rican manufacture coming 1nto the United States. Figures for 1956 have been revised to the some basis.
1 Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same perlods arose because of differences in the time when payments were included in the reapective reporta. Tax payments are included In budget receipta when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were Included in Internal Revenue Service collection reports after the returns to which they applled had been recelved in Internal revenue offices. Under procedure begun in 2950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many exciaea, these taxes are paid currently into Treasury depositaries and the depoaitary receipts, as evidence of such payments, are atiached to quarterly returns to the Internal Revenue Service. Under this procedure, the payments are included in budget receipts

In the month in which the depositary recelpts are 1 ssued to the taxpayers. Revised accounting procedurea effective July 1, 1954 , extended the same practice to Internal Revenue Service collection reports.
2. Monthly figures include social securlty tax on self-employment income, which is levied and collected as part of the individual Income tax. Fiscal year figures exclude this tax, on the basis of estimates (see footnote 3), and it is included under "Old-age and disability insurance."
2) In Internal Revenue Service reports current collections are not separated as to type of tax; the breakdown show for fiscal years is based on eatimates made in accordance with provisions of Sec. 201 of the Socisl Security Act, as amended ( 42 U.S.C. 401 ), for tranafer of tax recelpts to the trust funds (see "Buaget Recelpts and Expenditures, "Table 1).
af Beginning with the fiscal year 1955, collections show include andiad tributed depositary rece1pts and unapplied collections. For exclse taxes these recelpts are included in the total only. Total colleciions Include "Taxes not otherwise classifled."
2/ Budget receipts for 1956 were reduced by $\$ 3,566$ thousand repreaentIng tax collections transferred to the Government of Cuam purauant to the act approved August 1, 1950 ( 48 U.S.C. 1421 h ), but this amount was included in collections reported by the Internal Revenue Service. Beginning with 1957, such collections are excluded also in Internal Revenue Service reports.
6) Detall is reported by quarters beginning with the fiscal year 1956.
