This issue contains figures for the tables listed for both September and October. Results of the Treasury survey of ownership of Federal securíties are included for both August 31 and September 30.

Data on reoelpta, expenditures, and debt which appear in the "Treasury Bulletin" are bsaed largely on two Treasury IInancial reporta, the "Dasly Statement of the United Statea Treasury" and tho "Monthy Stetement of Recelpts and Expenditures of the United States Government." Certain monetary statletics are based at least in part on the "Circulation statament of United States Money." Where these statements are given as eources for individual tables, they are cited by name only. Thelr respeotive reporing basee are desoribed below. For other data in the Bulletin, information on sources or reporting bases 18 given in connection with the tables themeelves.

The monthly atatement of recelpte and expendituree was 11ret published for February 1954, and replaced the dally statement as the primary source of information on budget results and other recelpt and expenditure data classifled by type of account. At the aare time, the dally statement was changed to a statement of cash depoeita and withdrawale apfecting the account of the Treasurer of the United statea. Both publications have provided comparative ilgures on their reepeotive bases from the beginning of the 1180al year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 1saue of the Bulletin.

The monthly statement shows all recelpte and expenditures of the Government, including those made from cash accounta held outelde the United States Treasury. The information 1 a complled from reports by the Treasurer of the United Statea and by all other collecting and diaburaing agencies, including those agencies which maintain checking accounte in commercisi banks. These reports cover transactions recorded in the accounts of the agenciee durine the reporting period. The net of the transactions a complled from these reporte is reconciled in the monthly statement to change in the balanoe in the Treasurer's acoount and in cash held outelde the Treasurer's account and changes in the public debt outstanding.

Recelpte of taxee and custome duties are reported on a collections basis. Otbar recelpte are reported partially on a collections basia and partlally on a deposits basis. Expendituree, except Interest on the public debt, are reported on the basis of checks 1ssued or cash payments made by dieburaing officere. Transactions of an interfund or intragovernmental nature are included on the eame basie even though the actual iesuanoe of ohecks may not be involved. Interest on the public debt ie
included on an accrual basis beginning with ilguree for June 1955 and the ilecal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly etstement provides the $1180 a l$ year ilgures for the Treasury's "Combined Statement of Recelpts, Expend1ture and Balances of the United State Government" and for sotual recelpte and expenditures in tho "Budget of the United States Government."

Beginning with the rinal etatement for the Placal year 1960, the monthly atatoment reporte totale for net budget recsipte and budget expend1turee after decuction of certain interfund transactione which are included in the detall of both budget reoelpte anc budget expenditures. The transactions deducted consiat of interest payments and minor amounts of certain other payments made by Government agencles to the Treaary. This reporting change was made in accordance with the plan stated in the Presldent's Budget Message of January 18, 1960. It does not affect the surplus or deplcit. Figures for earlier periode khown in the Treasury Bulletin were reviaed to the new reporting basis in the geptember 1960 1ssue. The interfund transactions deducted under this procedure do not include paymenta to the Treasury by wholly owned Government corporatione for retirement of thelr capltal stock and for disposition of earnings. These capital transfers have been excluded currently from budget recelpta and budget expenditures beginning July 1,1948 , and Ilgures fcr prior 118cal yeare back through 1932 were revised accordingly at that time.

The dally atatement on the new basio was ilrat 1esued for February 17, 1954. In the depoeite and withdrawale as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposite are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash diebursements made out of the Treasurer's account. Same of the witharawal classiPlcations shown are reported on the basis of malled reports of checks 18 sued and are adjucted by meane of clearing sccountr to the total of checks paid. Except for relatively minor amounte, noncaah interfund and other intragovernmental transactions are excluded. The public dobt ilgures in the dally statement aleo are on a "clearance" basis, with the exception of those iseuance and retirement transactions reported on the basie of telegrame from Federal Reserve Banks. Noncsih dobt traneaotions are included, however.

## Reporting Bases - (Continued)

The dally statement before February 17, 1954, covered not only transactions cleared throurh the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information bimilar to that in the present dsily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month dally statement with rospect to debt issuance, retirement, and amount outstanding. Reoelpts and expenditures, however, were classilied by type of account, and the budget reaulta shown in the dally statement were used as the basis for reflecting the results under the Preaident'a budget program as enacted by the Congress.

Recelpts were on the babis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's acoount were reported on two successive basea. Tbrough 1946 they were on the basis of checks pald by the Treasurer of the United states. Beginning with 1947, expenditures
made through the faollities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizatione, were on the basie of checks pa1d. Transactions handled through commercial bank aocounts, consisting of market transections in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money aupply of the country. It is 1s sued later than the dally etatement, however, and the ilgures are based on transactions consummated during the reoorting period even through some may not have cleared the Treasurer's account during that period.

## Footnotes to Table 1 - (Continued)

6) In the 1962 Budget document, Special Analysis G, taxes not otherwise clasalfied are included in wiscellaneous receipts.
If Figures shown include (see footnote 8) decreases in income tax withheld of $\$ 84$ million in January, $\$ 8$ million in April, $\$ 170$ million in June, and increase of $\$ 109$ million in October, and decreases in income tax not withheld of $\$ 7$ million in Jamury, 3 willion in April, $\$ 6$ million in June, and $\$ 2$ willion in October; increases in transfers to Federal O1d-Age and Survivors Insurance Trust Fund of $\$ 86$ willion in January, $\$ 8$ million in April, $\$ 162$ million in June, and decrease of $\$ 105$ willion in October, and increases to Federal Diability Insurance Trust Fund of $\$ 4$ million in January, $\$ 3$ million in April, \$15 willion in June, and decrease of $\$ 2$ million in October.
8/ Amounta appropriated to the Federal Old-Age and Survivors Inaurance Trust Fund are equivalent to the amounta of taxea collected and deposited for old-age insurance. Amounta transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjuated in later transfera on the basis of wage and seir-employment income records maintained in the Social Security Administration. The amount of old-age insurance tax refunds is reimburged to the geners I fund by the trust fund.
9/ The Federal Disability Insurance Trust Fund was establisbed by the snnlal Security Act Amendments of 1956, approved August 1, 1956 (42 U. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employwent incowe, respectively, which are taxed for old-age ingurance, and provided that the amounta appropriated should be tranaferred from time to time to the truat fund on the agme basia aa tranafera to the Federal Old-Age and Survivora Inaurance Trust Fund. Ratea of tax were increased by the percentagea appropriated to the Federal Disability Insurance Truat Fund, the increase being applicable to wagea paid and taxable years beginning after December 31, 1956.
10 Amounta are appropriated to the Railroad Retirement Account equal to the amount of taxea under the Railroad Retirement Tax Act deposited In the Treasury, leas refunda, during each fiacal year ( 65 Stat. 222 and 66 Stat. 371) and transfera are made currentiy. Figurea for 1954
exclude the Government's contribution for creditable military service ( 45 U.S.C. $228 \mathrm{c}-1$ ( $n$ )).
7) The Roployment Security Act of 1960, approved September 13, 1960 (74 Stat. 970) eatablished in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with the fiacal year 1961, amounta equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipta are tranaferred currently on the basia of estimatea by the Secretary of the Treaaury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures. Refunds of taxes are to be reimbursed from the administration account.
12/ The Highwsy Revenue Act of 1956, approved June 29, 1956 (23 U.S.C. 120 Note) established a Highway Irust Fund from which are to be made, as provided by appropriation acta, Federal-aid highway expenditures after June 30, 1956, and before July 1, 1972. The act appropriated to thia fund amounts equivalent to speciried percentages of receipta from certain excise taxes on motor fuels, motor vehicles, tirea and tubea, and use of certain vehicles, and provided that the amounto appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. The use tax was imposed by the act and rates were increased for the other taxes. Previous to the fiscsl year 1957 corresponding excise tax receipts were included in net budget receipts and Federsi-aid highwsy expenditures were included in budget expenditures.
13 Interest on refunda ia included in expenditurea in Table 3.
14/ For content, aee Table 4. These transactions are Included in the datail of both budget receipta and budget expenditures, but are deducted from the totale (ace Reporting Besea, p. II).
15/ Figures in thia column differ from those publiahed under the same caption prior to the September 1960 Tressury Bulletin because of the exclusion of certain interfund tranactions (see footnote 14).
16/ Transfers reduced by $\$ 300$ m11110n to correct. those made earlier on basis of eatimatea (aee footnote 8).

Footnotes to Table 3.- (Continued)
\& The 1960 figures in the Bulletin differ from tbose in the 1962 Budget document because of a reclassification in the latter by which the Fresident's special international program in the amount of $\$ 7$ million is shifted from "Funds appropriated to the President" to "Independent Offices."
5) From 1955 through 1959, consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis.
6) Reported on an accural basis effective June 30, 1955.

1. Consists of Federal payment and loans and advances.
$3 /$ For content, see Table 4. These transactions are included in the detail of both budget receipts and budget expenditures, but are deducted fram the totals (see Reporting Bases, $p$. Il).
2. Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 8).
20 Includes payments of United States subscriptions to three international financial organizations. In June 1959, pursuant to an act approved Tunr 17, 1959 ( 22 U.S.C. 286e), an additional $\$ 1,375$ million was paid the International Monetary Fund consisting of $\$ 344$ million in gold (see "Monetary Statistics," Table 3) and $\$ 1,031$ miliion in special notes.

To the Inter-American Development Bank, as authorized by an act approved August 7, 1959 (22 U.S.C. 283e), there were paid in September 1959, \$0.5 million, in June 1960, $\$ 79.5$ million, and in October 1961, $\$ 110$ million which included $\$ 25$ million of special notes. In November 1960, as authorlzed by an act approved June 30, 1960 ( 22 U.S.C. 2840 ), tbere was paid to the International Development Association $\$ 74$ million, of which $\$ 78$ million was in special notes. The special notes of the United States issued to these organizations are nonnegotiable and noninterest-bearing and are payable on demand. See also "Debt Outstanding," Table 1, and "Cash Income and Ortgo," Table 6.
11' Beginning with the riacal year 106l, administrative expenses of the employment security program are handled as trust account expenditures instead of budget expenditures, pursuant to the Employment Security Act of 1900 , approved September 13,1900 (74 Stat. 970 ); see Table 1, footnote 12.
12 Includes unclassified expenditure transfers until these have been distributed in final fiscal year figures.

The cash inoore and outgo data appearing in tha Treasury Eulletin, beginning with the Fobruary 1956 1asue, are on basis consistont with recelpts from and payments to the public as derived in the 1957 and aubgequent Budgets of the United States, Spsoial Analyala A. Reconciliation to cash deposita and withdrawale in the account of the Tresurer of the United Statas is ahown on the same basis as in the Budget dooumants. Thare is siso ahown the amount of net cash borrowing from, or rapayment of borrowing to, the public. By thase arrangementa, data in accordanos with the Budget claseificationa are mada available month by month. Flgures for back yeara hava bean revised whare nacesasy in order to make them as nearly comparable with current Budet clasafications as avallable data will permit. For this reason certain of the fleures differ somewhat from those published in earlier Budjet docuinents as well as in the Bulletin.

The Budget series of cash iransactions is designed to provids information on the flow of money betwaen tha public and the Faderal Government as a whole, and therefore includes transactions not cleared through the Treasurer's sooount. Receipts and payments include transactions both In budget accounta and in trust and deposit fund accounts. Oparations of Government-aponsored enterprises are included in peymente on a net basis as refleoted in Treasury raporta.

Major intragovernmental traneactions which are reported as both exdenditures and receifte are eliminated from both. Nonoseh iteme whioh represent acorued obligations of the Govarnment to make paymenta in the future are also aliminatod from expandituree but are added later when aotual paymente ars made. Recelpts from the exerciee of monetary authority (mostly selgniorage on pllver) are exaludad ae not repreaenting cash received from the public. Federal casa borrowing from the publio includea nat borrowing by the Traasury through public debt tranasotione and aleo net borrowing by Government aganoles and Government-aponsored onterprises through gales of thelr own securities. It excludes changes in the public dobt which do not represent direot cash borrowing from the publio. The net effact of all these transactions with the public is reflected in changes in the balance in the Trasarar'a aocount and in asah held outaide the Troasury.

Cash transaotions through the Treasurer's account are alailar in general concept to those includad in the Budgat serios, but are limited in coverage to tranaactions what affect the balance in that account. On the other hand, thoy include reoeipta from the axercisa of monetary suthority, which are excluded from recelpta from the publio in the Buaget serisa.

Source and Avallability of the Balance in the Treasurer'a Account

The account of the Treasurer of the United Statea reflects not only budget reoelpts and expenditurea but also trust, depoait fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer'a accounta with Federal Reserve Banks and branchea. As the balanoea in these accounta becoma depleted, they are reatored by calling in (transferring) funds from the tax and loan accounts with thousanda of comercial banks throughout the country.

Depoaits to tax and loan accounts occur in the normal courae of buainesa under a uniform procedure applicable to all banks whereby cuatomers of banka deposit with them tax paymenta and funds for the purchase of Government securitiss. In most cases the transaotion involves merely tha tranalar of money from a cuatomer's
account to the tax and loan acoount in the sare bank. On occasions, to the extent authorized by the Treasury, banka are permitted to deposit in these accounts proceeda from aubscriptions to public debt ascurities entered for their own account as well as for the account of their customers.

The tax and loan account syatem parmita the Treasury to leave funda in banks and in the conmunitiea in which they ariae until such time aa the Treaaury needs the funds for ita operationa. In thia way the Treasury is able to neutralize the effect of ita iluctuating operstiona on bank reservea and the aconomy.

A detalled description of the Treasury's depositary ayatem may be found in the Annual Report of the Secretary of the Treasury for 1955, pagea 275-284.

2) Beginning December 1954, Post Office Department and Postmatera
disbursing accounts are no longer treated as liability accounts of the Treaaurer of the United Ststea, but are claasifled and treated in the same manner as other disbursing accounis, in accordance with the change in method of reporting Post office transactiona (aee "Budget Recelpts and Expenditures," Table 3). An adjustment of - 207 million in the balance in the Treasurer's account (and in the "clearing accoun:") reflects this change.

Note: The computed annual interest charge represents the amount of interest that would be paid if each intereat-bearing issue outstanding at the end of each month or year sbould remain outatanding for a year at the applicable annual rate of interest. The charge 19 computed for cach iasue by applying the appropriate annual interest rate to the amount outstandIng on that date (the amount actually borrowed In the case of aecuritles sold at a premium or discount, begiming with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annusl interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for
any group of isaues, by the corresponding principal amount. Beginning With data for December 31, 1958, the computation is based on the cate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1. Includes only guaranteed securfties held putside tbe Treasury.

2/ Total Includes "Other bonds" through May 1961; aee Table 3.
3 ) Included in debt outatanding at face amount, but diacount value is used in computing annual interest charge and annual interest rate. (On United suates savings bonds the rate to maturity is applied againat the amount outstanding.

Source: Internal Revenue Service reports for detail of collections by type of tax; monthly statement of recelpts and expenditures of the Govermment for budget receipta from internal revenue (for explanation of reporting bases in this publication, see page II). Certain detail by type of tax is available only from returns filed with the internal fevenue Service. The figures shom include collections for credit to special accounts for certain Island possessions, as reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they include the fmounts of tax collected in Puerto Rico upon articles of merchandiae of Puerto Rican manufacture coming into the United States. Figures for 1954 have been revised to the same basis.
1 Differences between the awounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same periods arose because of differences in the time when payments were included in the respective reports. Tax payments are included in budget recelpts when they are reported as credits to the account of the Treasurer of the United States. Pritor to July 1954, they were included in internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure beguri in 1950 with withheld income tax and old-age insurance taxes and later extended to ralirood retirement taxes and many excises, these taxes are pald currentiy into Treasury depositaries and the depositary receipts, aa evidence of such poyments, are attached to quarterly returns to the Internal Revenue Service. Under this procedure, the paymenta are included in budget receipts
in the month in which the depositary receipts are issued to the tixpayera. Revised accounting procedures effective July 1, 1956, extended the same practice to internal Revenue Service collec:Ion reports.
2/ Monthly figures include soctal gecurity tsx on self-eaplayment income, which is levied and collected as part of the individual income tax. Fiscal year flgures exclude this tax, on the basis of estimates (see footnote 3), and it is included under "Old-agr and disability insurance. ${ }^{\text {m }}$
3/ In Internal Revenue Service reports current collec:ions are not aeparated as to type of tax; the breakdown show for fiscal jears is based on eatimates made in accordance with provislons of Sec. 201 of the Soctal Security Act, as amended (4. U.S.C. 401), for 'ransfer of tax recelpte to the trust funds (see "Budget Recelpts and Expenditures," Table 1).
4) Beginning with the fiacel year 1955, collections show include undistributed depoattary recelpta and unapplied collections. For excler taxes these receipts are included in the total only. Total culicct no include "Taxes not otherwse classilied."
5/ Budget receipts for 1956 were reduced by $\$ 3,566$ thousund repr.swnt ing tax collectiona transferred to the Covernment of Guam pursions to the act approved Aurgust 1, 1950 ( 48 U.S.C. 1421 h ), but thigs amount was included in collections reported by the Intermal Reverise Service. Beginning with 1957, such collections are excluded als dr, Internsl Revenue Service reparts.
6/ Detall is reported by quarteris beginning with the fisend yonr 1 k. .

(In millions of dollara)

Data relating to capital movaments between the United States and forelgn countries have been collected since 1935, pursuant to Executive order 6560 of January 15, 1934, Executlve Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal typse of data and the principal countries 18 reported wonthly, and is published regularly in the "Treasury Bulletin." SuFplementary information 18 published less frequently. Reports by banks, bankers, securities trokers and dealers, and industrial and commercial concerns in the United Statea are made initially to the Federal Reaerve Banks, which forward consolidated Ilgures to the Treasury. Beginring April 1954, data reported by banks in the Territories and possesilons of the United States are included in the fublished data.

The term "roreigner" as used in theae reporta covers all institutions and individuals domiciled outside the Unitec States anc its Territorlea and posessions, the offlcial institutions of foreign countries, wherever suck institutions may be located, and internetional organ1zetione. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other Taturities. A detalled diacuseion of the reporting coverage, statlstical presentation, anc deflnitions appeared in the June 1954 isaue of the "Treasury Bulletin, " pagea 45-47. As a reault of changes in preaentation introduced In that 1ssue, not all breakdowns previously published
w1ll be exactly comparable to tbose now presented.
The flret three eections whlob follow are publlshed monthly. They provide summarlea, by perlods and by oountries, of data on short-term banking liabllities to and clalm on forelgnars and transactione in long-term sacuritiee by forelgners, and present detalled breakdowns of the latest available preliminary data.

Section IV provides supplementary data in oix tableb wich appear at lese Irequent intervale. Table l, ahortterm forelgn liabilities and clalme reported by nonfinancial concerne, 19 published quarterly in the January, April. July, and October lssues of the Bullatin. Table 2, long-term foreign 11 ablilties and claime reported by banise and bankers, and Table 3 , eetlmated gold reserves and dollar holdinge of forsign countries and international institutions, are published quarterly in the March, June, September, and December 18sues. Table 4, forsign credit and debit balances in brokerage accounts, appears aet.1annually in the March and September isaues. Table 5 , shorq-term liabilities to forelgners in countries and araas not regularly reported aeparately by banklne institutions, 18 presented annually, appearing in the Aoril 1* Bue through 1958 and in the March iosus thereafter.
