## Reporting Bases

Data on recelpts, expenditures, and debt which appear In the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipte and Expenditures of the United States Govermment." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Noney." Where there statementa are givan as sources for individual tables, they are cited by name only. Thair respective roporting bases are desoribed below. For other data in the Bulletin, information on sources or raporting bases is given in connection with the tables themealves.

The monthly statement of recelpts and expenditures was firat published for February 1954, and replaced the daily statement as the primary sourca of information on budget reaults and other receipt and expenditure data claasifled by type of account. At the aane time, the dally atatement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United Statea. Both publications have provided comparative ilgures on their respective bases from the beginning of the fiacal year 1953. The announcement of February 17 , 1954, with reapect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all recelpts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information ia complied from reporta by the Treasurer of the United states and by all other collecting and diebursing agencies, inoluding those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactiona as complled from these reporta 18 reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of tares and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, excopt interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the aame basis even though the actual issuance of checks may not be 1 n volved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Frior to that, it was included on a due and payable basis. The same reportiny basis as that in the monthly statement providos the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expend-

Itures and Ealances of the United States Government ${ }^{n}$ and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget axpenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in aocordance with the plan stated in the Freaident'a Budget Message of January 18,1960 . It does not affect the surplus or deficit. Figures for sarlier periods ahown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 1ssue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditurea beginning July 1 , 1948, and 11gures for prior f1acal years back through 1932 were revised accordingly at that time.

The dally statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no diatinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United Statas. Total withdrawals are on the basis of checka paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal clasaifications shown are reported on the basis of mailed reports of checks lesued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the dally statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncasin interfund and other intragovernmental transactions. It provided information similar to that in the preaent daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Recelpts and expenditures, however, were classlified by type of account, and the budget results shown

## Reporting Bases - (Continued)

In the daily etatement were used as the basis for reflecting the reaults under the President's budget program as enactad by the Congress.

Reoeipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, whlle certain others, principally those of the Department of Defense and 1ts predecessor organizations, were on the basis of checks pald. Transactions han-
died through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is lasued later than the dally statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## Treasury Financing Operations

## Tax Anticipation and One-Year Eill Offerings

The Treasury Department announced on September 20 , 1962, an offering on september 26 for $\$ 3$ billion, or thereabouts, of 170-day tax anticipation bills for cash; and on October 2, an offering on October 9 for $\$ 2.5$ billion, or thereabouts, of 365-day Treasury bills for cash and in exchange for $\$ 2.0$ billion of bills maturing october 15 , 1962.

Tenders for the tax anticipation bills, on the basis of preliminary reports, totaled $\$ 5,942 \mathrm{million}$, of which $\$ 3,005$ million was accepted at the average bank discount rate of 2.616 percent. Of the $\$ 4,535$ million tenders re ceived for the one-year bills, also on preliminary report, $\$ 2,501$ million was accepted, at the average bank discount rate of 2.969 percent. Acceptances in both bill offerings included noncompetitive tenders for $\$ 400,000$ or less (without stated price) from any one bidder at the average price of accepted competitive bids, which amounted to $\$ 563$ miliion of the tax anticipation bills and to $\$ 186$ million of the 365-day b111s.

Tax anticipation bills. - The 170-day bills are dated October 3, 1962, and will mature March 22, 1963. Iscued in bearer form only, the bills are in denominations of $\$ 1,000$, $\$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value). They are acceptable at par in payment of income and profits taxes due on March 15,1963 ; and to the extent they are not presented for this purpose the face amount will be payable without interest at maturity.

Tenders were received without deposit from incorporated banks and trust companies, and responsible and recognized dealers in Government securities; and from others, with the required payment of 2 percent of the face amount of the bills applied for, or an express guaranty of payment by an incorporated bank or trust company.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of this $18 s u e$, until after $1: 30 \mathrm{p.m}$. , eastern daylight saving time, September 26, 1962.

Payment for the bills was required to be completed on October 3, in cash or other immediately avallable funds. Any commercial bank qualifying as a depositary was permitted to make payment by credit in its Treasury tax and loan account for the bills allotted to itself and its customers up to any amount for which it was qualified in excess of existing deposits.

One-year bills. - The 365-day bllls are dated october 15,1962 , and will mature october 15,1963 . Payment for accepted tenders was required to be completed on October

15, 1962, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on the payment date. Requirements releting to deposits with tenders and the denominations were like those for the tax anticipation bills described in preceding paragraphs. Depositaries were not permitted to make payment by credit in Treasury tax and loan accounts.

## 13-Week and 26-Week B111s Increased

Regular weekly Treasury bills issued during September totaled $\$ \delta .0$ billion refunding $\$ 7.6$ billion maturing and providing \$0.4 billion of new cash. By increasing the amounta of weekly bill 18 sues the Treasury has ralsed a total of $\$ 2.0$ billion of new cash in 11scal 1963. In September there were four 9l-day offerings of $\$ 1.3$ billion each, and four of 182 days for $\$ 0.7$ blllion each. Average rates of alscount on the new bills were as follows:

| 13-week <br> (Additional amount of bills of original maturity of 26 weeks) |  |  |  | 26-week |  |

Proposal to sell Long-Term Bonds through Competitive Bidding
The Treasury announced on September 14,1962 , 1ts intention to test the technique in Treasury borrowing operations of the sale of long-term bonds through an underwriting syndicate on the basis of competitive bidding. The announcement stated,

[^0]
## Treasury Financing Operations - (Continued)

"Ths Treasury's objective is to explors the practicability of this technioue for occasionally placing moderate amounts of marketable iong-term Government bonds in the hands of the public, at the lowest possible interest cost to the taxpayers and without adverse effects on the markets for other long-term securities. It is not presently contemplated that offerings of long-term bonds at competitive bldding will be made on a regularly-scheduled basis. If this first trial should prove successful, subsequent applications of this technique for selling long-term bonds will be made, with appropriate notice to the market, whenever the general economic environment and capital market conditions seem approprlate for such an offering."

In recognition of the many problems to be resolved befors such an operation could be undertaken, the Treasury invited members of the financial community and any other interested persons to submit in writing their views on procedural and other aspects of selling long-term securities through competitive bidding. In accordance with the announcement, a public meeting was hsld on October 17 at the Federal Reserve Bank in New York for discussion of questions and suggestions.

Option of Taking Tax Refunds in Savings Bonde
The Secretary of the Treasury announced on September 12, 1962, that taxpayers will have the option of receiving tax refunds for 1962 in the form of savings bonds.

The new individual income tax forms for 1962 will include space for each taxpayer to indicate whether his refund should be made payable in Series E savings bonds. Bonds subsequently will be issued in the customary multiples of $\$ 18.75$ and sent to the taxpayer with a check for any remaining balance due.

Any taxpayer who chooses to take his refund in the foril of savings bonds will receive the largest amount of bende consistent with the size of his refund, provided that
the check to be issued for the cash portion of the refund is not less than $\$ 1.00$. For example, a refund of $\$ 20.00$ could take the form of a $\$ 25.00$ bond, the purchase prics of which $18 \$ 18.75$, and a check for $\$ 1.25$. However, a refund of $\$ 19.00$ would be pald only in the form of a check, since the issuance of even the smallest denomination savings bond would leave a balance of only $\$ 0.25$ to be pald by check.

Savings bonds issued under the new procedure will be inscribed in the name of the taxpayer or taxpayers either as aingle ownership bonds in the case of the single taxpayer or as co-owner bonds in the case of a joint return.

This action makes a third option avallable to reciplents of refunçs. Taxpayers will, of course, continue to have the options of receiving their refunds in the form of a check lesued by the Treasury Department or applying their refunds toward the following year's tax liability.

The decision to arrange for the optional payment of tax refunds in the form of Series $\pm$ savings bonds reflects the favorable responses received from a recent sample survey of some 3,800 taxpayers who received refunds on their payments of 1961 income taxes. The responses indicated a potential demand in the magnitude of one-half billion dollare for savings bonds offered in this way.

The suggestion that tax refunds be avallable in the form of savings bonds has been made by a number of people over the years. However, until the advent of automatic data processing equipment for the handilng of individual income tax returns, it has not been administratively feasible to proceed with such a program. Sufficient progress has now been achleved in the Treasury's automatic data processing program to use this technique in the payment of refunds oweả to lnciviauals.

. Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting basea, see page II); estimates are from the
1963 Budget document, released January 18, 1962, including effecta of proposed legislation. More detail for data on this page will be found in succeeding tables.
1 Fiscal year figurea beginning with the September 1960 iasue of the Treasury Bulletin, and calendar year figurea beginning with the June 1961 issue exclude certain Interfund transactions from both net budget receipts and budget expenditures (see pages II, 2, and 4). Figures previously published for these aeries have been revised to the new reporting basia. The change does not affect the budget surplus or deficit.
2/ Excess of receipts, or axpenditures (-). Por detail, gee pagea $10-14$
For checks outstanding and telegraphic reports from Federal Reserve Banks; public debt interest accrued and unpaid beginning with June and the fiscal year 1955 (previoualy included from November 1949 as
interest checks and coupons outstanding); also deposits in transit and changes in cash held outaide the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).
4 For current month detail and list of acts, see aection on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion, on June 26, 1946; \$281 billion, on Auguat 28, 1954; \$278 billion, on July 1, 1956; \$275 billion, on July 1, 1957; \$280 billion, on February 26, 1958; \$288 billion, on September 2, 1958; \$290 billion, on June 30, 1959; \$295 billion, on July 1, 1959; $\$ 293$ billion, on July 1, 1960; $\$ 298$ billion, on July 1, 1961; and $\$ 300$ billion on March 13, 1962. The limit is \$308 billion from July 1, 1962, through March 31, 1963, \$305 billion from April 1 through June 24, 1963, and $\$ 300$ billion from June 25 through June 30, 1963.
p Preliminary.

Table l.- Receipts by Principal Sources
(In millions of dollars)

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases see psge II); estimatea are from the 1963 Budget document, released January 18, 1962, including effects of proposed legialation.
1 The distribution of receipts between individual income taxes snd oldage and diaability insurance taxes is made in accordance with provisions of Sec. 201 of the Socisl Security Act, as amended ( 42 U.S.C. 401), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 8), and slso for tranafer to the Federal Disability Insurance Trust Fund (see footnote 9).
2/ Taxes on employers and employees under the Federal Insurance Contributions Act, as smended (26 U.S.C 3101-3125), and tax on selfemployed individusis under the Self-Employment Contributions Act, as
amended (26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicsble to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance.
3/ Taxes on carriers and their employees under the Rallroad Retirement Tax Act, as amended (26 U.S.C. 3201-3233).
4/ Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended ( 26 U.S.C. 3301-3308) ; with respect to services performed before January 1, 1956, the tax was imposed on employers of 8 or more.
5/ Beginning 1957, includea collectiona under incressed rates in the Highway Revenue Act of 1956 (see footnote 12).
Remeining footnotes on following page.

Table 2.- Detail of Miacellaneous Receipts by Major Categories
(tn millions of dollar:a)

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly atatement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates are from the 1963 Budget document, released January 18, 1962, including effecta of proposed legialation.

1 Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion oharges, and gifts and contributions.
2/ Includes $\$ 210$ million received from the French Government and $\$ 179$ million from the Italian Government for prepayment of loans.

* Less than $\$ 500,000$. p Preliminary.

## Footnotes to Table 1-(Continued)

6/ Includes adjustments as follows for: Income taxes not withheld, January - $\$ 6$ million, April - $\$ 450$ million, and June $+\$ 12$ million; income taxes withheld, January - $\$ 47$ million, April + $\$ 74$ million, and June - $\$ 89$ million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, January $+\$ 49$ million, April $+\$ 348$ million, and June $+\$ 70$ million; and transfers to Federal Disability Insurance Trust Fund, January +3 million, April + $\$ 29$ million, and June $+\$ 8$ million. See also footnote 8 .
Interest on refurds is included in expenditures in Table 3 . Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and
deposited for old-age insurance. Amounts deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of oldage insurance tax receipts made by the Secretary of the Treasury ( 42 J.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. See also footnote 16.
2/ The Federal Diability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunda, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371 ) and transfers are made currently.
11. The Fmployment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund an administra-
tion account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemploywent Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
12 The Highway Revenue Act of 1956, as amended, ( 23 U.S C.
120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30,1956 , and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropristed should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
13/ For content, see Table 4. These transactions are included in the detail of both budget receipts and budget expenditures, but are deducted from the totals (see Reporting Bases, p. II).
14/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 13).
15/ Transfers reduced by $\$ 300$ million to adjust those made earlier on basis of estimates (see footnote 8).
161 Beginning fiscal 1961, the principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown berein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
17/ Reflects gross amounts based on reimbursements by trust accounts for refunds of taxes which were made in previous months or fiscal years. Leas than $\$ 500,000$. p Preliminary.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1963 Budget document, released January 18, 1962, including effects of proposed legislation.
Note: Figures in this table are for agencles as constituted ot the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 6. Agency shifts are reflected in this table as follows: Beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federal intermediate credit banks and production eredit corporations as indicated in footnote 12; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Medla Guaranty Fund from "Funds appropriated to the President" to "Independent agencies"; beginning 1959, Federal Civil Defense Administration from "Independent
agencies" to "Executive Office of the President," Civil Aeronautics Board from "Commerce Department" to "Independent agencies," Civil Aeronautics Administration from "Commerce Department" and Airways Modemization Board from "Independent agencies" to the "Federal Aviation Agency," National Advisory Commission for Aeronautics from "Independent agencies" to "National Aeronautics and Space Administration"; beginning 1960, military assistance from "Funds appropriated to the President" to "Defense Department, military," pursuant to budgeting instruction in the Mutual Security Act of 1959, as amended by the Intermational Peace and Security Act of 1961 (22 U.S.C. 2312
(b)); and begirning 1962, subscriptions to international institutions from "Treasury Department" to "Funds Appropriated to the President."
1/ Consists of net expenditures of the Postal Fund, reflecting the change in classification of post Office transactions to a public enterprise revolving fund basis, and beginning fiscal 1960 payment for public services.

Source: See Table 2.

1. By Government agencies operated ab revolving funds; on loans (see "Debt Outstanding," Table 6) and other interest-bearing U. S. Investments.
2. Excludes transactions under Defense Production Act.

3 Consiats of payments by: Office of the Administrator for college housing, urban renewal, prefabricated housing loans for 1955, and public facility loans beginning 1957; Federal National Mortgage Association; and Public Housing Admiristration.
/ Direct loan program.
5. By various agencies for programs under the Defense Production Act. Consists of payments by: Reconstruction Finance Corporation for 1955; Colorado River Dam Fund, Boulder Canyon project; Virgin Islands Corpo-
ration; Bureau of Federal Credit Unions;Civil Defense Program Fund;Farmers' Home Administration: Agricultural Credit Insurance Fund (formerly the Farm Tenant Mortgage Insurance Fund) beginning 1956, and the direct loan account, both established pursuant to Title IIl of the Agficultural Act of 1961, approved August 8, 1961; Informational Media Guaranty
Fund beginning 1959; Federal Ship Mortgage Insurance Fund beginning
1960 ; and St. Lawrence Seaway Development Corporation beginning 1960.
7/ For net cost of Canal Zone Government, less tolls on Government vessels, and for part of treaty payment for use of Canal Zone.
8) Realization on the Crovernment's investment.

Less than $\$ 500,000$.
p Preliminary.

## Footnotes to Table 3.- (Continued)

2. Beginning 1957, Federal ald for highways is excluded from budget expenditures and included in trust becount expenditures (see Table 1).
3/ Adjusted Eor reclassification.
Beginning with fiscal 1961, administrative expenses of the employment security program are handled as trust account expenditures rather than budget expenditurea, pursuant to the Foployment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101 ); see Table 1, footnote 11.
5/ Reported on an accrual basis effective June 30, 1955
6/ Includes Reconstruction Finance Corporation except beginning July 1 , 1954, certain functions transferred: Under Reorganization Plan No. 2 of 1954 ( 15 U.S.C. 609 , note) to the Export-Import Bank, the Federal National Mortgage Association, and the Small Business Administration; and under Executive Order 10539, as amended, ( 15 U.S.C. 603, note) to the General Services Administration. The corporation was abolished at the close of June 30, 1957, by Reorganization Plan No. 1 of 1957, and its remaining functions were transferred to the Housing and Home Finance Administrator, Administrator of General Services, Administrator of Saall Business Administration, and Secretary of the Treasury.
7) Establishad pursuant to the Federal Aviation Act of 1958 (49 U.S.C. 1341 (a)), approved August 23, 1958.
B/ Established pursuant to the National Aeronautics and Space Act of 1958 ( 42 U.S.C. 2472 (a)), approved July 29, 1958.
I/ Consisนs of Federal payment and loans and advances. detail of bath budget receipts and budget expenditures, but are deducted from the totals (see Reporting Beses, p. II).
11. Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 10). were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July.26, 1956 (12 U.S.C. 1027), and operations of the merged agencies (as mixed-ownership corporations) were classifled as trust enterprise funds (aee "Trust Account and Other Transactions," Table 3); previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures.
12. Includes $\$ 1,375$ million paid to the International Monetary Fund for the additional United States subscription, authorized by an act approved June 17, 1959, consisting of $\$ 344$ million in gold (see MMonetary Statistics," Table 3) and $\$ 1,031$ million in special notes. The special notes of the United Statea issued to international institutions are nonnegotiable and noninterest-bearing and are payable on demand. See also "Cash Incowe and Outgo," Table 5 and "Debt Outstanding," Table 1. Total includes allowance for contingencies of $\$ 350$ million. Less then $\$ 500,000$.

2/ For description of items included, see Table 5. Although not expended a substantial portion of these amounts is obligated for outstanding purchase orders and contracts for equipment and supplies, for payrolls, and for similar items.
3/ Expenditures for 1962 and 1963 include those for executive direction and management made from "Salaries and Expenses, Office of Emergency Planning" and "Research and Development, Office of Emergency Planning," applicable to functional code 903.
4 Expenditures for 1962 and 1963 include those for loans for conservation applicable to functional code 354 ; grading and classing activities applicable to functional code 355; and for special milk progrem applicable to functional code 654. These expenditures were made from "Commodity Credit Corporation Capital Fund."
5/ See footnote 4.
6/ See footnote 7.
7/ Expenditures for 1962 and 1963 Include those for assistance for elementary and secondary education applicable to functional code 701 and other aids to education applicable to functional code 704. These expenditures were made from "Defense Educational Activities, Office of Education."
8/ Expenditures for 1962 and 1963 include those for veterens' nonserviceconnected pensions applicable to functional code 802 and other veterans' benefits and service applicable to functional code 805. These expenditures were made from "Compensation and Pensions, Veterans Administration.
2/ See footnote 8.
10/ See footnote 3.
Less than \$500,000.
p Preliminary.

## Footnotes to Table 5 - (Continued)

Footnotes 1 through 5 follow Table 5 on page 7.
6/ Consists of new contract authorizations, established by law for the current fiacal year, net of current appropriations to liquidate either current or prior contract authorizations.
7/ Consists of transfers between appropriations; net borrowings from or repayments to (-), the Treasury and the public under authority to expend from debt receipts; and net investment in, or sale of ( - ), public debt securities and certain guaranteed securities issued by Government enterprises.
8/ Consists of transiers to, or restorations from (-), the surplus fund;
rescissions, cancellations, or adjustments of borrowing authority and contract authority; capital trensfers to miscellaneous receipts; and other adjustments.
9) Public debt securities and certain guaranteed securities issued by Government enterprises.
10/ Represents the difference between this report based on accounts submitted by certain disbursing officers and corresponding preliminary data used in the monthly statement of recelpta and expenditures of the Government.

* Less than \$500,000.

## Table l.- Summary of Trust Account and Other Transactions

jource: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see pagc II); estimates are from the 1963 Budget document, released January 18, 1962, including effects of proposed legislation.
$1 /$ Certain intertrust fund transactions are excluded from both receifts and expenditures beginning with the July 1961 issue of the Bulletin. For detail see Table 6.
2) Alao includes guaranteed securities (see Table 4).

Effective July 1, 1955, security transactions of Government-fponsored enterprises are included in deposit fund account expenditures (net)
and excluded from net investment by Government agencies in public debt securities (see Table 4) and from net redemption or sale of obligations of Government agencies in the market (see Table 5). Figures for 1955 have been revised to the new classification basis. 4 Adjusted for reclassification of certain repayments of advances from the general fund.
5) Beginning fiscal 1961, refunds of taxes (principal only) are deducted Irom receipts, and therefore are excluded from expenditures. p Preliminary.

Table 2.- Trust Account Receipts

1/ Includes principolly District of Columbia receipt from taxes and from Federal contributions, loans, and grants; Funds appropriated to the President - $\quad$ utual security trust funds; Indian tribal funds; increment re ulting from reduction in the welght of the gold dollar; and the Railroad Unemployment Insurance Administration Fund through November $19 \times 8$, for treatment after llovember 1958, see Table 10 , published qu-rterly.

1) Fr content see Toble 6. These transactions are included in the detail of both trust receipts and trust expendltures, but are dedu ted from the total

Excludes certain intertrust fund transactions consisting mainly of financial interchanges between trust funds resulting in receipts and expenditures (see footnote 2 ).
2 See Table 1, footnote 4 .
2 See Table 1, footnote 5.
0. Beginning fiscal 1961, tax receipts under the Federal Unemployment Tax Act are transferred currently to an administration account in the Unemployment Trust Fund pursuant to the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101 (b)); see "Budget Receipts and Expenditures," Table 1, footnote 11. Preliminary.

Table 3.- Trust and Deposit Fund Account Expenditures
(In millions of dollars; negative figures are excess of credits)

Source: See Table 1.
1/ Secondary market operations, as provided in the Housing Act of 1954 approved August 2, 1954 (12 U.S.C. 1719). Funds provided by the Treasury (-), or repaid to the Treasury, are shown in a separate column (and correspondingly are reflected net in budget expenditures).
2) See Table I, footnote 4 .

See Table 1 , footnote 5.
See Table 2, footnote 6.
5/ Includes principally District of Columbia operating expenditures; Funds appropriated to the President - mutual security trust funds; Indian tribal funds; expenditures chargeable against increment on gold; and trust enterprise funds (net). The Railroad Unemployment Insurance Administration Fund is included through November 1958 (see Table 10, published quarterly), the Employees' Life Insurance Fund (net) and the Employees' Health Benefits Fund (net) beginning 1961.
6 . For content see Table 6. These transactions are included in the detail
of both trust receipts and trust expenditures, but are deducted from the totals.
7/ Excludes certain intertrust fund transactions consisting principally of financial interchanges between trust funds resulting in receipts and expenditures (see footnote 6).
8) Includes security transactions of Government-sponsored enterprises (see Table 1, footnote 3).
9/ Includes expenditures of the Federal intermediate credit banks which were operated as trust fund enterprises from January 1, 1957, until January 1959, when these banks were classified as Government-sponsored enterprises.
10/ The combined estimate for "Government-sponsored enterprises, other expenditures" and "Other deposit fund accounts" is $\$ 414$ million.
Less than $\$ 500,000$.

1/ Excludes net transactions of Government-sponsored enterprises (see Table 3).
2/ Classified as a public enterprise fund prior to January 1, 1957; as a
trust enterprise fund January 1, 1957, to January 1, 1959; and as a
Government-sponsored enterprise thereafter.

3/ Management and liquidating functions.
4. Secondary market operations.

* Less than $\$ 500,000$.
p Preliminary.

Table 6.- Intertrust Fund Transactions Excluded from Both Net Trust Account Receipts and Net Trust Account Expenditures

Source: See Table 1.

1) Paymenta are made between the Railroad Retirement Account and the Federal 0ld-Age and Survivors and Federal Disability Insurance trust funds so as to place those funds in the position in which they would have been if railroad employment after 1936 had been included minder aocial aecurity coverage.
2/ Includes interest on amounts refmbursed to the Federal 01d-Age and Survivora Insurance Trust Fund for administrative expensea.
3/ Includea temporary advances to the Railroad Unemployment Insurance Account in the Unemployment Trust Fund when the balance in the
account is insufficient to meet payments of benefits and refunds due or to become due.
4/ Repayment of advances plus Interest to the Railroad Retirement Account. See footnote 3.
2) Transfers from the Civil Service Retirement and Disability Fund to the Foreign Service Retirement and Disability Fund.
6/ Contributions and beginaing with 1958, transfers of deductions from employees' salaries to the Civil Service Retirement and Disability Fund.

* Less than $\$ 500,000$.
p Preliminary.

The cash income and outgo data appearing in the Treasury Builetin, beginning with the February 1956 isaue, are on a basis consistent with recelots from and payments to the public as derived in the 1957 and subsequent Budgets of the United States (in the Budget for 1963 in Speoial Analysis B). Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documente. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget olassifications are made available month by month. Figurea for back yeare have been revised where necessary in order to make them as nearly comparable with current Budget classifications as avallable data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Bureau of the Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Reoeipts and payments include transactions both in budget accounts and in trust and deposit fund acoounts. Operations of Covernment-sponsored enterprises are included in payments on a net basis ae reflected in Treasury reports. Major intragovernmental trano-
actions which are reported as both expenditures and receipta are excluded from both. Noncash iteme representing the obligation of the onvernment to make payments in the future also are ellminated irom expenditures but are added later when actual payments are made. These items consist of certain interest acorued on the public debt, expenditures involving the issuance of a few special public debt securities, and clearing accounts. Receipts from the exercise of monetary authority are sxcluded as not representing cash reoeived from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public jebt whioh do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Bureau of the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipte from the public in the Bureau of the Budget serles.

Table 1.- Summary of Federal Government Cash Transactions with the Public
(In millions of dollars)

Source: Actual figurea are based on the monthly statement of receipta and expenditurea of the Government (for explanation of reporting bases, see page II); estimates are from the 1963 Budget document, released January 18, 1962, including effects of proposed legislation.

1) Figures in this column differ from those published prior to the September 1960 Treasury Bulletin because of the exclusion of a few additional items of budget receipts which are also budget expenditures (see Tables 2 and 3). p Preliminary.

Source: See Table 1. Detaila of basic receipt ifgures appear in preceding sections in the Bulletin.
1/ Previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactiona from both net budget recelpts and budget expenditures; and further revised in the July 1961 issue for deductions of certain intertruat fund transactions from both trust account receipts and trust account expenditures (aee pp. 2, 5,10, and 11). Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and poyments to the public.
2/ Treated as noncash refund deductions from receipta when 1 ssued and as cash refund deductions when redeemed.
3/ Consists of seigniorage and the increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public
but included in cash deposits in the Treasurer's account.
4/ Figures in this column differ from those published prior to the September 1960 Treasury Bulletin because a few additional items of budget receipts which are also budget expenditures are included in the interfund transactions deducted from budget receipts and budget expenditures (see footnote 1).
5/ Adjusted for reclassification of certain repayments of advances from the genersl fund.
6/ Beginning fiscal 1961, principal amounts for refunds of taxes applicable to trust accounts, formerly included with trust account expenditures, are deducted from trust account recelpts.

* Less than $\$ 500,000$.
p Preliminary.

Table 3. - Derivation of Federal Government Payments to the Public, and Reconciliation to
Cash Withdrawals from the Account of the Treasurer of the United States

Source: See Table 1. Details of basic expenditure figures appear in
preceding sections in the Bulletin.

1) See Table 2, footnote 1.

Net operating expenditures, or receipts ( - ), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 6). To a large extent, these Government sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to repayment of borrowing from the public or to investment in Federal securities. On that basis, net expenditures for operations are shown
in this table in terms of the combined net of disinvestment in Federal securities and sale of agency obligations in the market. Net receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the market.
3/ See Table 2, footnote 4.
4. See Table 6, footnote 1.

5 Does not include revolving fund receipts representing acquired securities amounting to $\$ 1,643,070$ (par value).
6/ See Table 2, footnote 5.
See Table 2, footnote 6. F Preliminary.

Source: Actual figures are based on the daily Treasury statement; estimates are from the 1963 Budget document, released January 18 , 1962, including effects of proposed legislation. Figures in the
first four column of this table may differ somewhat from those originally published in the daily Treasury statement because of subsequent reclassification of certain transactions.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget reoeipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branohes. As the balanoes in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of businese under a unfform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funde for the purchase of Government securities. In most cases the transaotion involves merely the transfer of money from a customer's
account to the tax and loan acoount in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entreed for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of lis fluctuating operations on bank reserves and the economy.

A detalled description of the Treasury's depoeitary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Table 1.- Status of the Account of the Treasurer of the United States
( In millions of dollars)

Source. Daily Treasury statement.
1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings Systew, and uncollected items, exchanges, etc. Post Office Department and postmasters' disbursing accounta also are included through November 1954. (See footnote 2). Treasurer's checks outstanding are included through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 3).
2/ Beginning December 1954, Post Office Department and postmastera disbursing accounts are not treated as liability accounts of the Treasurer of the United States, but are clasaified and treated
as other disbursing accounts, in accordance witb the change in method - of reporting Post Office transactions (see "Budget Receipts and Expenditures," Table 3). An adjustment of $-\$ 207$ million in the balance in the Treasurer's account (and in the "clearing account") reflecta this change.
3/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance la not reduced until the checks are paid, a procedure also applying to checka drawn on the Treasurer by Government disbursing officers and agenciea.

Sourne: Office of Fiscal Assistant Secretary; figures are on basis of telepraphic reports.

1) Speciol depositaries are permitted to make payment in the form of a deposit credit ior the purchese price of U. S. Covernment obligations pur hesed by them for their own sccount, or for the gecount of their customers who enter subecriptions through them, when this method of payme $t$ is permitted under the terme of the circulars inviting subs.riptions t the issues.

- Toxes eligibie :or redit consist of those deposited by taxpayers in the depos tory ,anks, as follows: withheld income tax beginni.ag

March $1+48$; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 195C, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
2/ Under a specisl procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account i: that t-ik. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year sbould remain outstanding for 3 year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that data (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for
any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for iasues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1 Guaranteed securitiea included are those held outaide the Treasury.
$\frac{2}{2}$ Total includes "Other bonds" through May 1961; ase Table 3.
$3 /$ Included in debt outstanding at face amount, but discount value ia used in computing annual interest charge and annual interest rate. 4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

Table 4.- Redemptions of Matured and Unmatured Savings Bonds

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables sales of Sories A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then tran ferred to matured debt upon which interest has ceased.
(Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 2951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series $E$ bonds for Serie. $H$ bonds, which are reported in Table 3.
$\approx$ Detalis by series on a cumulative bosis and by periods for Series A D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3) Because there is a normal lag in cla sifying redemptions the distribution of redemptions between sales price and accrued disccunt has been estimated. Beginning with the Treasury Bulletin of March 1961 the method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final
reports of classifled redemptions. All periods show have been revised on this basis.
4 Reductions were made in issues and redemptions of Series E, $H, F, G$, $J$, and $K$ bonds in July 2954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: $\$ 18$ million for issues of Series E and H, $\$ 27$ million for issues of Series F, G, J, and $K$, and $\$ 35$ million for unclassified retirements.
5 Series F and G sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
6/ Includes exchanges of Series 1941 F and G savings bonds for $3-1 / 4 \%$ marketable bonds of 1978-83.
7/ Includes exchanges of Series 1948 F and G bonds for $4-3 / 4 \%$ marketable notes of 1964.
8/ Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
9/ Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968.
10) Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.
Less than $\$ 500,000$.

Table 1.- Distribution of Federal Securities by Classes of Investors and Types of Issues

Source: Daily Treasury statement for total amounts outstanding; reports from agencies and trust funds for securities held by U. S. Government investment accounts; and reports from Federal Reserve System for securities held by Federal Reserve Banks.

1) Includes certain obligations not subject to statutory limitation. For amounts subject to limitation, see page 1.
2/ Includes accounts under the control of certain U. S. Government
agencies whose investments are handled outside the Treasury.
3/ The total amount of interest-bearing securities held by private investors is calculated by deducting from the total amount outstanding the amount held by U. S. Government investment accounts and Federal Reserve Banks.
2) Consists of guaranteed securities held outside the Treasury. All are public marketable issues.

Table 2. - Net Market Purchases or Sales of Federal Securities for Investment Accounts Handled by the Treasury l/
(In millions of dollars; negative figures are net sales)

1/ Consists of purchases or sales made by the Treasury of securities issued or guaranteed by the U. S. Government for (1) trust funds which by law are under the control of the Secretary of the Treasury or of the
Treasurer of the United States, and (2) accounts under the control of certain U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. It will be noted that these
transactions differ from those reflected in Table 1 because they exclude those Government investment accounts for which investments are not handled by the Treasury. Table 2 also includes purchases under Section 19 of the Second Liberty Bond Act, as amended (31. U.S.C. 754a), and excludes the Exchange Stabilization Fund. Less than \$50,000.

Table 3.- Estimated Ownership of Federal Securities

[^6]4. Inclules partnerships and personal trust accounts

- Jiscontinued serias. See savings bonds tables.
- Exclusive of banks and insurance companies

2. Consists of the investments of foreign balances and international sccounts in the United States.
8 Consists of savings and loan asgociations, nonprofit institutions, corporate pension trust funds, and dealers and brokers.

The monthly Treasury Survey of Ownership covers securitles issued by the United States Government and by Federal agenciss. The banks and insurance companies included In the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 60 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Builetin, for
corporations and savings and loan associations in the september 1960 Bulletin, and for State and local govemments in the February 1962 Bullstin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

Footnotes at end of Table 4.
Table 4.- Interest-Bearing Public Nonmarketable Securities by Issues

1/ Includes certain obligations not subject to statutory debt limitation. For amount subject to limitation, see page 1.
Excludes trust departments.
$3 /$ Includes trust companies and, beginning with figures for July 1949, also includes stock sevings banks. Previously, those banks were reported as a separate classification.
$4 \sqrt{4}$ Included with all other investors are those banks, insurance companies, savings and loan associations, corporations and State and local government funds not reporting in the Treasury Survey.
5 United States savings bonds, Series E, F, and J, are shown at current redemption value. They were reported to the Treasury Survey at maturity value but have been adjusted to current redemption value for use in this atatement.
6/ Includes $\$ 53$ million depositary bonds held by compercial banks not included in the Treasury Survey.
7/ Holdings by reporting investors not available.
8 Guaranteed securities are those held outside the Treasury.

9 Partially tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, Interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. For all other by any one holder is also exempl to normal tax and surtax.
10/ Includes guaranteed securities which are classified as taxable although a small indeterminate amount of the Federal Housing Administration debentures is partislly tex-exempt,
11. The Treasury bonds of $1960-65$ are partially tax-exempt (see footnote 9).
12 Includes only publicly offered iaaues.
12/ The proprietary interest of the United States in these banks ended in July 1951.
$11 /$ The proprietary interest of the United States in these banks ended in June 1947.
Less than \$500,000.

Section II - Interest-Bearing Securities Issued by Federal Agencies But
Not Guaranteed by the United States Government

[^8]Current market quotations shown here are over-thecounter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed include all regularly quoted public

1) Amount issued on October 3, 1962 was $\$ 3,005$ million.

Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates gre the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing pricea on the New York Stock Exchangc. "When issued" prices are included In the history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.

3/ Not quoted on September 28, 1962.
$4 \sqrt{\text { On callable issues market convention treats the yield to earliest }}$ call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
5) Included in the average yield of long-temm taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds.
6/ Called for redemption on December 15, 1962.

Source: Circulation Statement of United States Money.
1/ Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Ranks and agents.
2/ The following paper currenciea are in process of retirement and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes 1ssued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of re$t$ : rement since March 1900 ( 31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 ( 12 U.S.C. 445 note), and the national bank notea since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the old Series Currency Ad, justment Act, approved June 30, 1961 (31 U.S.c. 912-916). The act authorizea the Secretary of the Treasury to determire from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30 , 1934; allver certificates, United States notes, Federal Reaerve Bank
notes, and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; and on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificatea, $\$ 18$ million of Federal Reserve notes, $\$ 1$ million of Federal Reserve Bank notes, and \$15 million of national bank notes.
3/ Highest amount to date.
4 Issued prior to January 30, 1934.
Includea $\$ 15$ million issued before July $1,1929$. Includes $\$ 18$ million issued prior to the series of 1928. Based on the Buread of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Gusm, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawail. * Leas than $\$ 500,000$.

1) These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure silver certif icates.
Total of seigniorage on coins and on newly mined silver, beginning
with that for July 1959, is included under coins; the breakdown is not available after June 1959.
3/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.
p Preliminary.

The authority, purpose, and amount through 1940 of these allocations are aummarized in the 1940 Annual Report of the Secretary of the Treasury, pages 128-30.
2 Pursuant to Public law 85-699, approved August 21, 1958 (72 Stat. 698) the $\$ 111,753,246.03$ unexpended belance of this allocation was covered
into the Treasury as miscellaneous receipts; and the $\$ 27,546,310.97$ which had been advanced to the Federal Reserve Banks under this allocation was repaid into a special fund from which it was appropriated to the Small Buainess Administration. Under subsequent legislation ( 73 Stat. 209) the unused portion of this appropriation was rescinded and the balance, $\$ 23,653,582.01$, was covered into the Treasury. Preliminary.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of $\$ 4,125$ million. In accordance with Fund policies, these drawing rights include the right to draw virtuslly sutomatically an amount equal to the sum of the United States gold subscription to the Fund ( $\$ 1,031.2$ million) and the Fund's net use of dollars; on September 30, 1962, these two amounts totaled $\$ 1,078.3$ million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.
1 Includes gold sold to the United States by the International Monetary

Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Covernment securities; as of September 30, 1962, this amounted to $\$ 800$ million.
2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.
3/ Includes holdings of Treasury and Federal Reserve System.
Preliminary.

Data relating to capital movements between the United States and foreign countries have been collected since 1935. pursuant to Executive Order 6560 of January 15,1934, Executive Order 10033 of February 8,1949 , and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countriea is reported wonthly, and 18 published regularly in the Treasury Bulletin. Supplementary inforwation is published less frequently. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolldated figures to the Treasury. Beginning April 1954, data reported by banks in the Territorles and posesssions of the United States are incluaded in the published data.

The term "forelgner" as used in these reports covers all institutions and individuals domiciled outside the United States anc its Territories and possessions, the official institutions of forelgn countries, wherever such institutions may be located, and international organizstions. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitions appeared In the June 1954 18sue of the Treasury Bulletin, pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published

Will be exactly comparable to those now presented.
The first three sections whioh follow are published monthly. They provide sumaries, by periods and by countries, of data on short-term banking liabilities to and claims on forelgners and transactions in long-term securitles by forelgners, and present detailed breakdowns of the lateat available preliminary data.

Section IV provides supplementary data in $s 1 x$ tables which appear at less frequent intervals. Table 2 , shortterin foreign liabilities and claime reported by nonfinancial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term foreign $11 a b 111 t 1 e s$ and claims reported by bancs and bankers, and Table 3 , estlmated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December 18sues. Table 4, foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually, appearing in the April 1ssue through 1958 and in the March issue thereafter. Table 6 , purchases and ales of long-term securlties by forelgners during the preceding calendar year, alво sppears annually, beginning with the May 1959 1scue.

## Section I - Summary by Periods

Table 1.- Net Capital Movement Between the United States and Foreign Countries (In millions of dollars; negative figures indicate a net outflow of capital from the United States)

-

[^0]:    "The experiment will be made at some time during the next six months, after there has been full opportunity for comment and appraisal by both investors and the banks and other financial institutions which mizht wish to participate in bidding for and distributing the bonds. The amount to be offered will be in the order of magnitude of one-quarter of a billion dollars.
    "The basic procedures to be followed will be similar to those which have been widely used for many years in sellinz State and local government securities and the bonds of privately-owned public utilities. It is anticipated that potential underwriters will form bidding groups. The conds will be awarded to the group offering the highest bid (the lowest interest cost) for bonds bearing a given coupon and maturity and call provision, if any. The secretary of the Treasury will reserve the right to reject all bids.

[^1]:    Nots: Detalls of Treasury market financing operations are shown elsewhere in this issue of the Builetin in the tables on public debt operations.
