## Reporting Bases

Data on recelpts, expendituras, and debt which appear In the "Treasury Bulletin" are based largely on two Treasury Inancial reporta, the "Daily Statement of the United States Traaaury" and tha "Monthly Statament of Recelpta and Expenditures of the Unitad States Government." Certain monetary statistics are based at least in part on the "Circulation Statament of United States Money." Where theas atatements are given aa sourcea for individual tables, thay are olted by name only. Thair respective reporting basea are desoribed below. For other data in the Bulletin, information on sources or reporting basea is given in connection with the tablas thamselvas.

Tha monthly statement of receipts and expenditures was f1ret published for February 1954, and replaced the daily atatement as the primary scurce of information on budget results and other receipt and expenditure data claasifled by type of account. At the aame time, the dally statement was changed to a atatement of cash deposits and withdrawala affeoting the account of the Treasurer of the Unitad Statea. Both publications have provided comparative ilgurea on their reapective basea from the beginning of the flacal year 1953. The announcoment of February 17, 1954, with respect to theas reporting changes may be found in the April 1954 1asue of the Bulletin.

The monthly atatement showa all receipts and expenditures of the Government, including those made from caah accounts held outside the United Statea Treasury. The information ia complled from reporta by the Treasurer of the Unlted States and by all other collecting and disburaing agencies, including those agencies which maintain checking accounts in commercial baniks. These reports cover transactiona recorded in the accounta of the agenciea during the reporting period. The net of the transaotions a complied from these reports is reconciled in the monthly atatement to changes in the balance in the Traasurer's aocount and In cash held outaide the Treasurer's account and changea in the public dabt outatanding.

Receipts of taxes and customs dutiea are reported on a collectiona basia. Other receipta are reported partially on a collections basis and partially on a deposits basis. Expenditures, except intarest on the public dabt, are reported on the basis of checks 1seued or cash paymanta made by diabursing officers. Transactions of an interfund or intragovernmental nature are included on the aame basis even though the actual 1asuance of checks may not be 1nvolved. Intereat on the public debt is included on an accrual basis beginning with figures for June 1955 and the P1acal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basia as that In the monthly statement providea the fiscal year figures for the Treasury'a "Combined Statemant of Reoelpta, Expend-

Itures and Balances of the United States Government" and for actual receipta and expanditures in the "Budget of the United Statea Govarnment."

Beginning with the final atatement for the flaca], year 1960 , the monthly statement reporta totala for net budget receipts and budget expenditures after deductior of certain interfund transactions which are inciuded ir the detall of both budget receipta and budget expenditures. The transactions deducted consiat of interest payments anc minor amounts of certain other paymenta made by Government agencies to the Treasury. This reporting change was made 11 accordance with the plan stated in the President's Budget Message of January 18,1960 . It doea not affect the surplui or deflcit. Figures for earlier periods ahow in the Traas. ury Bulletin were revised to the naw reporting basia in the September 1960 1ssue. The interfund tranaactions deducted under this procedure do not include paymenta to the Treasury by wholly owned Government corporations for retirement of thair capital stock and for dispoaition of earninga. These capital transfers have been excluded currently frof budget recelpta and budget expenditurea beginning July 1 , 1948 , and 11 gurea for prior 11scal yeara back through 1936 were revised accordingly at that time.

The daily atatement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as ahown, no diatinction 1 made as to the type of accounts (budget, trust, etc.). The deposita are on the basis of certiflcatea of deposit cleared through the account of the Treasurer of the United Statas. Total withdrawala are on the basis of checks paid or cash disbureements made out of the Treasurer'a account. Some of the withdrawal classifications ahown are reported on the baaia of mailed reports of checka iaauad and are adjuated by means of clearing accounta to the total of checke paid. Except for relatively minor amounta, noncash interfund and other intragovernmental transactiona are axcluded. The public debt figures in the daily atatement alao are on a "clearance" baais, with the exception of those issuance and retirement transactions reported on the basia of telegrame from Federal Reserve Banka. Noncash debt tranaactions are included, howevar.

The dally atatement befors February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency tranaactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental tranaactions. It provided information almilar to that in the preaent daily statement with respeot to the atatus of the Traasurer'a account, and aimilar to that in the present end-of-month daily statement with raspect to debt isauance, retirement, and amount cutstanding. Receipta and expenditures, however, were. clasalfled by type of account, and the budget resulta shown

## Reporting Bases - (Continued)

In the dally statement were used as the basis for reflecting the reaults under the President's budget program as enacted by the Congress.

Reoeipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, sxpenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally thoss of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-
died through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that tims.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the dally statement, however, and the figures are based on transactions consummatad during the reporting period even though some may not have cleared the Treasurer's account during that period.

## March Advance Refunding

On February 20, 1963, the Treasury announced an offering to holders of eight Treasury securities outstanding to exchange them in advance of their maturities for $188 u e s$ at higher yielde. Offered in exchange, as of March 15, 1963, were a new 3-year 11 -month $3-5 / 8$ percent note and additional amounts of three reopened bonds. The offering combined a junior advance refunding (of relatively short issues) with a prerefunding (of issues maturing within the ensuing 12 months). The exchange of $\$ 7.7$ billion of the $\$ 20.3$ billion publicly held was the largeat dollar amount of such holdings exchanged in any of the seven advance refundings undertaken by the Treasury. The new issues exchanged for the various eligible securities are shown in the following table.
contributing to inflationary pressures in the future. The refunding reduced the debt maturing witbin one year by about $\$ 6$ blllion and the debt maturing in one to three years by $\$ 1.1$ billion. On balance, the operation produced an increase of $\$ 3.3$ billion in the debt maturing in three to five years, and respective increases of $\$ 1.5$ billion and $\$ 2.2$ billion in the debt maturing in plve to ten years and in more than ten years.

This major reatructuring of the dabt will allow much more flexibility in debt management operations in the monthe ahead, permitting the Treasury to adapt its future cash financing to changing market conditions and balance-of-payments requirements without running the risk of producing an excessive increase in the very short liquid debt.

1/ Not eligible.

This advance refunding constituted a major step forward In the continuing progrem of the Treasury to arrange the maturity composition of the marketable debt in order to avoid

## Treasury Financing Operations - (Continued)

The announcement of the exchange offering followed a Treasury statement on January 30 that the Treasury planned to announce a junior advance refunding and a further statement on February 19 that,

> "In view of favorable market developments following completion of its February refinancing, the Treasury is now giving active consideration to the poselbility of combining a junior advance refunding with a "prerefunding", that 1s, an advance refunding of 1 sвues maturing within the next 12 menthe.
> "Becauae of the overlapping interrelationehips between two such offerings, it would be expected that a prerefunding would include an optional offering of a four-year maturity or less at the same time that the junior advance refunding would offer existing holdera of various two-to four-year maturities the opportunity of extending further.
> "No lagues are under consideration for either a prerefunding or a junior advance refunding that would fall inside a range of $1-1 / 2$ yeara preceding or $2-1 / 2$ years following the $3-3 / 4$ percent bonds of August 1968 that were included in the Treaaury's recent succeasful exchange offering."

Subscription booke were open February 25 through 28 for all clasese of aubscribere, but individuale (natural persons in their own right)were allowed to aubscribe through March 8. In addition, it was announced on February 25 , the original aubscription privileges were extended through March 8 for trustees, provided that they plled or malled by midnight February 28 letters of intent stating that they proposed to enter or were considering submiasion of exchange aubecriptions.
the Treasury's exchange offer or of holding them to maturity. Consequently, he could compare hia return resulting from the exchange with the return that he might obtain by relnvesting the prooeeds of the eligible eecuritiea at maturity. The income before tax for making the extenaion through exchange 1 a the coupon rate plus (or minus) any payment on the new lasue. If a holder of the eligible securities did not make the exchange, he will recelve the coupon rates on the eligible lsaues to their maturity and will have to reinveat at that time at a rate equal to that shown in the next aucoeeding table for the remaining terms of the isaues offered in order to equal the return (including any payment) he will recelve by accepting the exchange of fer.

For example, if the 3 percent bonde of February 15, 1964 were exchanged for the $3-7 / 8$ percent bonds of November 15, 1971, the investor recelves interest at the rate of $3-7 / 8$ percent for the entire eight yeare and eight monthe plus 70 cents (per $\$ 100$ face value) immediately. If the exchange was not made, a 3 percent rate wlll be recelved until February 15, 1964, requiring reinvestnent of the proceeds of the 38 of 1964 at that time at a rate of at least 4.11 percent for the remaining seven yeare and nine months, all at compound interest, to average out to a $3-7 / 8$ percent rate for eight years and eight months plus the 70 cents 1 mmediate payment. Thia minimum reinvestment rate for the extension period 18 shown in the table on the following page, as are the minimum reinvestment rates for the other issues included in the exchenge.

As a reault of the refunding, the average maturity of the marketable portion of the public debt was lengthened by approximately three months to flve years and one month, the longest bince September 1958. The extension of maturity effected by the various exchanges 18 ahown in the table preoeding.

Options of the holders.-- A holder of the outstanding eligible certificates and notes had the option of accepting

Tax proviaions.-- Pursuant to the proviaions of section 1037 (a) of the Revenue Code of 1954, the Secretary of the Treasury has declared that no gain or loas shall be recognized for Federal income tax purposea aolely on accouni of the exchange of the eecurities. Section 1031 (b) of the Code, however, requirea recognition of any gain realized on the exchange to the extent that mones (other than interest) is received by the security holder in connection with the exchange.

Accordingly, if the falr market value (the mean of bid and asked quotations on the date subscriptions are submitted) of the new securities plus the amount paid to the investor (discount) oxceeded the investor's cost basis of the old securities, the gain, but not to exceed the amount of the payment, must be recognized and acoounted for as gain for the taxable year of exchange. The investor will carry the new securities on his books at the same amount as he carried the old securitise except that he will reduce the cost basis by the amount of the payment and increase it by the amount of the gain recognized. If the fair market value of the new securities plus the amount of the payment did not exceed the cost basie of the old securities, the basis in the new securities $1 s$ the cost basis in the old securities reduced by the amount of the payment. If a premium was paid by the subscriber, no gain or lose wlll be recognized; but the tax basis in the new securities will be his cost basis In the old securities increased by the amount of the premium. Gain to the extent not recognized, or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new notes or bonds.

The $3-7 / 8$ percent bonds of 1974 and 4 percent bonds of 1980 will be redeemable at par and accrued interest prior to maturity for the purpose of using the proceeds in payment of Federal estate taxes but only if they are owned by the decedent at the time of his death and thereupon constitute part of his estate.

Terms of payment.-- Exchanges were made with accrued intereet adjustments and cash payments to or payable by the subscribers, which approximately equalized current market values among eligible lssues having different coupons and maturitiee and provided an attractive exchange value for each of the issues offered. The amount of the offering was limited to the amount of securities aocepted in exchange, and oash subscriptions were not invited. Banking inetitutions generally could submit subecriptions for account of customers. Subscribers requesting registered securities had to furnish appropriate identifying numbers as required on tax returns and other documents submitted to the Internal Revenue Service. Completion of payment was required by March 15. Of the securities surrendered in exchange, coupons for May 15,1963 , and August 15,1963 , and for subsequent dates were required to be attached.

Banks under the supervision of the office of the Comptroller of the Currency, Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation were permitted to place the new notes and the bonds received in exchange on their books at the amount at which the oligible securities surrendered were carried on their books, plus the amount of premium, if any, paid on the new securities, or reduoed by the amount of discount, if any, received and increased by the amount of gain recognized, if any.

Amounts to equalize the current market values among the eligible issues and the accrued interest paid to or by subscribers are shown in the table on the next page.

Description of the securities offered.-- The new Treasury $3-5 / 8$ percent notes of Series $B-1967$ are dated March 15. 1963, and bear interest from that date payable on a semiannual basis on August 15, 1963, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable on February 15, 1967. The notes, like the three reopened bonds, were 1 seued in bearer form

Forelgn Currency Sories
Two bonds of the forsign currency series were issued on February 14, 1963, both denominated in deutsche mark and each the approximate equivalent of $\$ 50$ million. One was a 3.09 percent 21 -month security and the other, a 3.14 percent 24 month obligation. Together with those issued in January, the deutsche mark series outstanding at the end of February amounted to the equivalent of $\$ 200$ million.

Transactions in this series and in the foreign series (both of which are 1ssued solely to foreign monetary authorities) from August 1961 to date are shown in the section on Public Debt Operations, tables 7 and 8.

Source: Actual figures through the flscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation. More detail for data on this page will be found in succeeding tables.

1) Fiscal year figures beginning with the September 1960 issue of the Treasury Bulletin, and calendar year figures beginning with the June 1961 issue exclude certain interfund transactions from hoth net budget receipts and budget expenditures (see page II, 2, and 5). Figures previously published for these series have been revised to the new reporting basis. The change does not affect the budget surplus or deficit.
2/ Excess of receipts, or expenditures (-). For detail, see pages 12-16. For checks outstanding and telegraphic reports from Federal Reserve banks; public debt interest accrued and unpaid beginning with June and the fiscal year 1955 (previously included from November 1949 as
interest checks and coupons outstanding); also deposits in transit and changes in cash held outside the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).
For current month detail and list of acts, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion, on Juna 26, 1946; \$281 billion, on August 28, 1954; \$278 billion, on July 1, 1956; \$275 billion, on July 1, 1957; $\$ 280$ billion, on February 26, 1958; \$288 billion, on September 2, 1958; \$290 billion, on June 30, 1959; \$295 billion, on July 1, 1959; $\$ 293$ billion, on July 1, 1960; $\$ 298$ billion on July 1, 1961; and $\$ 300$ billion on March 13, 1962. The limit is $\$ 308$ billion from July 1, 1962, through March 31, 1963; $\$ 305$ billion from April 1 through June 24, 1963, and $\$ 300$ billion from June 25 through June 30, 1963. Under proposed legislation the statutory debt limitation for June 30, 1963, as estimated in the 1964 Budget document, is $\$ 308$ billion.

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates are from the 1964 Budget document, released January 17, 1963, including effect of proposed legislation.

1) Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion charges, and gifts
and contributions.
2/ Includes $\$ 210$ million received from the French Government and \$179 million from the ltalian Government for prepayment of loans.
3. Includes $\$ 375$ million for repayment of advances from Federal extended compensation account (Temporary Extended Unemployment Compensation compensation account (Temporary Extended Unemployment Compensation
Act of 1961 , approved March 24,1961 ) and a decresse of $\$ 93$ million for transfer of receipts to Comodity Credit Corporation fund.

## Footnotes to Table 1 - (Continued)

6/ Includes adjustments as follows for: Income taxes not withheld,
October $-\$ 4$ million and January $-\$ 4$ million; income taxes withheld, October - $\$ 142$ million and January - $\$ 67$ million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, October $+\$ 134$ million and January $+\$ 62$ million; and transfers to Federal Disability Insurance Trust Fund, October $+\$ 12$ million and January $+\$ 9$ million. See also footnote 9 .
7) Interest on refunds is included in expenditures in Table 3.

8/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
10) The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred fram time to time to the trust fund on the same basis as transfers to the Federal 0ld-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
12) The Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
13 The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expendítures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxea on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
14 For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures, but are deducted from the totals (see Reporting Bases, p.II).
15/ Figures in thia column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).
16/ Transfers reduced by $\$ 300$ million to adjust those made earlier on basis of estimates (see footnote 9).
17 Reflects gross amounts based on reimbursements by trust accounts for refunds of taxes which were made in previous months or fiscal years.

* Less than $\$ 500,000$.

Source: Actual figures are from the monthly statement of recelpts and expenditures of the Government (for explanation of reporting beses, see page II); estimates are from the 1964 Budget document, released Januery 17, 1963, including effects of proposed legislation.

1) Certain intertrust fund tranasctions are excluded from both receipts and expenditures beginning with the July 1961 issue of the Bulletin. For detall see Table 6.
2) Beginning with the February 1963 Bulletin amounts for refunds of taxes (principal only) have been deducted from receipts, and therefore

3/ Also includes guarranteed securities (see Table 4).
k/ Effective July 1, 1955, securlty transactions of Government-sponsored enterprises are included in deposit fund account expenditures (net) and excluded from net investment by Government agencies in public debt securities (see Table 4) and from net redemption or sale of obligations of Government agencies in the market (see Table 5). Figures for 1955 have been revised to the new classification basis.
5/ Adjusted for reclassification of certain repayments of advances from the general fund.

The cash income and outgo data appearing in the Treasury Builatin, beginning with the February 1956 issue, are on a basis consistent with recelpts from and payments to the public as dorived in the 1957 and subsequent Budgets of the United States (in the Budget for 1963 in Special Analysis 8 ). Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United Statos $1 s$ shown on the game basis as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made avallable month by month. Figures for back years have been revised where necsssary in order to make them as nearly comparable with current Eudget classifications as avallable data will permit. For this reason certaln of the flgures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Bureau of the Budget series of cash transactione is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Reoeipts and payments include transactions both in budget accounts and in trust and deposit fund acoounts. Operations of Government-eponsored enterprises are included in payments on a net basis ae rellected in Treasury reports. Major intragovermental trans-
sotions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligation of the oovernment to make payments in the future also are eliminated from expenditures but are sdded later when actual payments are made. These items consist of certain interest acorued on the public debt, expenditures involving the lasuance of a few special public debt securities, and clearing accounts. Receipts from the exercise of monetary authority are excluded as not representing cash recsived from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these tranaactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Trsasurer's account are similar in general concept to those included in the Bureau of the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are oxcluded from receipts from the public in the Bureau of the Budget series.

Source: See Table 1. Details of basic receipt figures appear in preceding sections in the Bulletin.
1 Previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures; and further revised in the July 1961 issue for deductions of certain intertrust fund transactions from both trust account recelpts and trust account expenditures (see pp. 2, 5, 12, and 13). Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
2. Revised beginning with the February 1963 Bulletin to inciude principal amounts of refunds of taxes as deductions from trust account receipts. Previously such amounts were included with trust account expenditures.

3 Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.
4 Consiats of seigniorage and the increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.
5 Figures in this colum differ from those published prior to the September 1960 Treasury Bulletin because a few additional items of budget receipts which are also budget expenditurea are included in the interfund transactions deducted from budget receipts and budget expenditures (see footnote 1).
6) Adjuated for reclasaification of certain repayments of advancea from the general fund.

* Leas than $\$ 500,000$.

$1 /$ See Table 2, footnote 1.
2) In this table, in accordance with treatment in Budget docurents, net investrnent in United States securities by Government-sponsored enterprises includes a small amount by other enterprises regarded as representing net transactions with the public. In table 3 under "Trust Account and Other Transactions," these amounts are included with other trust accounts.
3/ See Table 2, footnote 2.
4/ Net operating expenditures, or receipts (-), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 6). To a large extent, these Governmentsponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to
repayment of borrowing from the public or to investment in Federal securities. On that basis, net expenditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency obligations in the market. Net receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the market.
5) See Table 2, footnote 5

6/ See Table 2, footnote 5. cash withdrawals. See footnote 7 .
7 Figures have been revised to exclude transactions of clearing accounts beginning with the February 1963 Bulletin, as shown in the daily Treasury statements beginning January 2, 1963.
8/ Does not include revolving fund receipts representing acquired securities amounting to $\$ 1,643,070$ (par value).
2 See Table 2, footnote 6.

Table 4.- Intragovernmental Transactions Excluded from Both Receipts and Payments
( n millions of dollars)

Source: See Table 1.
1/ Includes relmbursements for administrative expenses by the Federal Old-Age and Survivors and the Federal Disability Insurance trust funds, and beginning 1961, the Unemployment Trust Fund; reimbursements for refunds of employment and certain excise taxes (highway) through flacal 1960; reimbursement by the District of Columbia; Federal National Mortgage Assoclation for payment of dividends, interest, etc. under secondary market operations; and Federal intermediate credit bank franchise tax and repayment of capital stock to the Treasury after December 1956 and before January 1959.
$2 /$ See Table 2, footnote 2 .
3 Consists of payment of franchise tax by banks for cooperatives, and also by Federal intermediate credit banks beginning January 1959.
4/ Includes relatively small amounts of deductions from salaries paid by truat funds and Goverment-sponsored enterprises. Beginning with fiscal 1958 excludes deductions from salaries of District of Columbia
employees, and beginning with fiscal 1959 excludes voluntary contributions.
5) Consista of payments to employees' retirement funds representing employing agency, Federal Government, and Government corporation shares of contributions; payments to the Railroad Retirement Account (for creditable m1litary service), the Unerployment Trust Fund, veterans life insurance funds, Judicial Survivors Annuity Fund, trust fund for technical services and other assistance under the agricultural conservation program, and District of Columbia; and awards of Indian Claims Commission.
6/ Figures in this colum differ from those previously published because budget receipts which are also budget expenditures, and trust fund recelpts which are also trust fund expenditures are no longer included; see Tables 2 and 3.
7) Adjusted for reclassification of certain repayments of advances fram the general fund. * Less than $\$ 500,000$.

Table 5. - Accrued Interest and Other Noncash Expenditures Excluded from Payments

Source: See Table 1.
1 Accrued interest on savings bonds, i.e., the difference between the purchase price and the current redemption value, and the discount on bills at the time of issuance, less interest paid on savings bonds and bills redeemed.
2) Net increase, or decrease ( - ), in accrued Liability except for 1955 which includes the net change in public debt interest checks and coupons.

Source: Actual figures are based on the daily Treasury statement; eatinates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation. Figures in the first four columns of this table may differ somewhat from those originally published in tbe daily Treasury statement because of sub-
sequent reclassification of certain transactions.
1/ Beginning with the February 1963 Builetin figures have been revised, as shown in daily Treasury statements beginning January 2, 1963, to exclude transactions of clearing accounts.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United Statea replects not only budget recelpts and expenditures but also trust, depoait fund, and public dsbt tranaactions.

The working oash of the Treasury is held mainly in Treasurer's accounta with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restorad by calling in (transferring) funde from the tax and loan accounta with thousands of commercial banke throughout the country.

Depoeits to tax and loan accounts occur in the normal course of businees under a uniform procedure applicable to all banke whereby customers of banks deposit with them tax paymenta and funds for the purchase of Governmant aecuritiee. In moat cases tha transaction involvas merely the tranafer of monay from a customer's account to the tax and loan aocount in
the same bank. On occasions, to the extent authorized by the Treasury, banka are pormitted to depoait in theae accounts procesds from aubscriptions to public debt securitiea entered for thelr own account as well as for the account of thelr customere.

The tax and loan account ayatem parmita the Treasury to leave funds in banks and in the commanities in which they arise until such time as the Trasaury noeds the funds for its operations. In this way the Treasury is able to neutralize ths effect of 1 te fluctuating operations on bank reaerves and the economy.

A detalled description of the Treasury's depositary ayatem may be found in the Annual Report of the seoretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other depoalts of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined whth "Unclassified collections, etc." shown under assets. Post Office Department and postmasters' disbursing accounts also are included through November 1954. (See footnote 2). Treasurer's checks outstanding are Included through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 3).
2) Beginning December 1954, Post Office Department and postmasters'
disbursing accounts are not treated as liability accounts of the Treasurer of the United States, but are classified and treated as other disbursing accounts, in accordance with the change in method of reporting Post Office transactions (see "Budget Receipts and Expenditures," Teble 3). An adjustment of $\mathbf{\$ 2 0 7}$ million in the balance in the Treasurer's account (and in the "clearing account") reflects this change.
3 Through June 1958, the balance of the Treasurer was reduced when Tfeasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
4/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previousl: these items were included under liabilities.

1) Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2) Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning March 1948; taxes on employers and employees under the Federal

Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
3/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

| Source: On the bssis of the daily Treasury statement. <br> lote: The computed annual interest charge represents the amount of interest that would be paid if each Interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for |  |  |  |  |  | amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues. <br> 1. Guaranteed securities included are those held outside the Treasury. <br> 2/ Total includes "Other bonds" through May 1961; see Table 3. <br> $3 /$ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate. <br> L/ On United States savings bonds the rate to maturity is applied against the amount outstanding. |  |  |  |  |  |  |  |  |

65 Sale of a "strip" of Treasury bills, consisting of an aiditional $\$ 100$ million for cash of ten series of weekly Treasury bills maturing from January 17, 1963, to March 21, 1963.
66 Holders of approximately $\$ 458$ million or Series $F$ and $G$ savings bonds which mature in 1963 and 1964 were offered in exchange either the $3-7 / 3 \%$ bonds or the $4 \%$ bonds with certain adjustments as of December 15, 1962, at a price of 19.50. Smaller denaminations of savings bonds could be exchanged for the next higher multiple of $\$ 500$ of the bonds upon payment oi any cash difference. Cash payments amounted to about $\$ 93,000$ for the $3-7 / 8 \%$ bonds and about $\$ 101,000$ for the $4 \%$ bonds.
67 The bonds were sold to a syndicate on the basis of competitive biduing for reorfering to the public. The winning bid was $\$ 99.85111$ per $\$ 100$ of face amount for a $4 \%$ coupon, resulting in a net basis cost to the Treasury of $4.008210 \%$, calculated to maturity.
65) Includes $\$ 3,921$ million allotted to Federal Reserve Banks and Government investment accounts of the $3-1 / 4 \%$ certificates and $\$ 15$ million of the $3-3 / 4 \%$ bonds
69 In addition to the amounts allotted to the public, there were allotted to Government investment accounts $\$ 19.8$ million of the $3-5 / 8 \%$ nates, $\$ 29.6$ million of the $3-7 / 8 \%$ bonds of 1971, $\$ 151.9$ million of the $3-7 / 8 \%$ bonds of 1974 , and $\$ 123.9$ million of the $4 \%$ bonds of 1980 .

2 All by investors other than Federal Reserve Banks.
$3 /$ Two issues of bills, maturing January 16, 1957, and February 15, 1957 respectively, were rolled over into two issues of tax anticipation bills, both maturing June 24, 1957.
4/ Tax anticipation issue; for detail of offerings beginning 1957, see Table 4; for amounts redeemed for taxes and for cash see "Note" below.
5 During June and July 1958, \$491 million of the $2-5 / 8 \%$ Treasury bonds of 1965 was purchased by the Treasury for retirement under section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a).
6/ Called on May 14, 1958, for redemption on September 15, 1958.
7) Represents amount which owners exercised the option to redeem on August 1, 1959 (see Table 4, footnote 9).
8/ Holders of the $4 \%$ notes, who had the option to redeem at par on February 15, 1960, by giving notice not later than November 16, 1959, were permitted to exchange their holdings on November 15, 1959, for the $4-7 / 8 \%$ notes.
9/ Rolled over into a one-year bill (see Table 4).
10 Anount which owners exercised the option to redeem on February 15, 1960 (see Table 4, footnote 11).
11. Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.
12. Holders of 2-1/2\% Treasury bonds maturing November 15, 1961, were offered the option to exchange the bonds during the period from June 8, 1960, to June 13, 1960, inclusive, subject to allotment if subscriptions exceeded by 10 percent the offering limits of $\$ 3.5$ billion for the notes and $\$ 1.5$ billion for the bonds.
13/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $3-1 / 8 \%$ certificates or the $3-7 / 8 \%$ bonds, which were offered in an aggregate of around $\$ 8-3 / 4$ billion. For detail of offering, see Table 4 .
14. Excess of maturing 4-3/4\% Treasury notes over allotments of new securities on subscriptions from holders of those notes (see Table 4 , footnotes 32 and 34).
15 Reopening of an earlier issue.
16 Holders of $2-1 / 2 \%$ Treasury bonds maturing June 15, 1967, December 15 1968, June 15, 1969, and December 15, 1969, were offered the option to exchange the bonds during the period from September 12, 1960, to September 20, 1960, inclusive, the first for $3-1 / 2 \%$ bonds of 1980 , the second for $3-1 / 2 \%$ bonds of 1990 , and the other two for $3-1 / 2 \%$ bonds of 1998, subject to allotment if the combined total of subscriptions for the bonds of 1990 and 1998 exceeded an outside limit or $\$ 4.5$ billion.
17 Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4\% notes offered in the amount of around $\$ 6.9$ billion. For detail of offering, see Table 4.
18/ Excess of maturing $4-7 / 8 \%$ certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 39 and 40 ).

19 From March 20 through March 22, 1961, owners of $2-1 / 4 \%$ tonds of June 15, 1959-62, 2-1/4\% bonds of December 15, 1959-62, 2-5/8\% notes maturing February 15, 1963, and 2-1/2\% bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new 3-5/8\% bond due November 15, 1967, and the last for a new $3-3 / 8 \%$ bond due November 15, 1966. Exchanges were subject to allotment if subscriptions exceeded $\$ 5$ billion for the bonds of 1967 or $\$ 3$ billion for the bonds of 1966.
20 Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $\$ 5,250$ million offering of $3 \%$ certificates or the $\$ 2,500$ million offering of $3-1 / 4 \%$ notes. For detail of offering, see Table 4.
21 Excess or maturing $4-3 / 8 \%$ certificates and $3-5 / 8 \%$ notes over allotments of new securities on subscriptions from holders of those certificates and notes (see Table 4, footnotes 43 and 44).
22) $\$ 1,569$ million were redeemed for cash and $\$ 168$ million were exchanged for the tax anticipation bills dated March 23, 1962 (see Table 4).
23. Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $\$ 6,500$ million offering of $3-1 / 2 \%$ certificates, the $\$ 1,500$ million offering of $4 \%$ bonds, or the $\$ 750$ million offering of $4-1 / 4 \%$ bonds. For detail of offering, see Table 4.
24) Excess of maturing $4 \%$ notes and $3-1 / 4 \%$ notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 58 and 59).
25/ Fran September 10 through September 12, 1962, owners of securities maturing February 15, 1963 ( $3-1 / 2 \%$ certificates, $2-5 / 8 \%$ notes, $3-1 / 4 \%$ notes), and May 15, 1963 (3-1/4\% certificates, $3-1 / 4 \%$ notes, 4\% notes) were granted the option of exchanging their holdings, subject to allotment if subscriptions exceeded the offering limits of $\$ 6$ billion for the notes and $\$ 3$ billion for the bonds.
26/ Called on August 14, 1962, for redemption on December 15, 1962.

Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt upon which interest has ceased.

1) Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series $E$ bonds for Series H bonds, which are reported in Table 3 .
2 Details by series on a cumulative basis and by periods for Series A-D combined will be found in the Februery 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions the distribution of redemptions wetween sales price and accmed discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in finsl
reports of classified redemptions. All periods shown have been revised on this besis.
4 Reductions were made in issues and redemptions of Series $E, H, F, G$, J , and K bonds in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: $\$ 18$ million for issues of Series $E$ and $H, \$ 17$ million for issues of Series $F, G, J$, and $K$, and $\$ 35$ million for unclassified retirements.
2) Series $F$ and $G$ sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
6/ Includes exchanges of Series 1941 F and $G$ savings bonds for $3-1 / 4 \%$ marketable bonds of 1978-83.
7. Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marixetable notes of 1964.
8) Includes exchanges of Series 1949 F and G bonds for 4 marketable bonds of 1969.
9 Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968.
10/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1972 and $4 \%$ 酔rketable bonds of 1980.
11/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues. * Less than $\$ 500,000$.

1/ Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.
2) The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold certiricates issued before January 30, 1934, gilver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes 1ssued before the serles of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 (31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Ad justment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Cold certificates issued before January 30, 1934; silver certificates, United States notes, Federal Reserve Bank
notes, and national bank notes all issued before July l, 1929; Federal Reserve notes issued prior to the serles of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Tressury notes of 1890; and on August 27, 1962, \$9 million of gold certificates, $\$ 15$ million of silver certificates, \$18 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and $\$ 15$ million of national bank notes.

## 3/ Highest amount to date.

4 Issued prior to January 30, 1934.
5 Includes $\$ 15$ million issued before July 1, 1929.
6 Includes $\$ 18$ willion issued prior to the series of 1928.
7/ Based on the Bureau of the Census estimated population. Through fiscel 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawail, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with flscal 1960, Hawail.

Table 2.- U.S. Treasury Nonmarketable Notes and Bonds Issued to Official Institutions of Foreign Countries

Data relating to capital movements between the United States and Porelgn countries have been collectec since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8,1949 , and Treasury regulations promulgated thereunder. Information on the principal typss of data and the principal countries is reported monthly, and is published rcgilarly in the "Treasury Bulletin." Supplementary information is published lesa Irequently. Reports by banks, bankers, securities brokers and dealers, and industrial and comercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolicated figures to the Treaaury. Beginning April 1954, data reportec by banks in the Territoriea and possesalons of the United Statea are inciuded in the published data.

The term "forelgner" as uaed in these reports covera all institutions and individuals domiciled outside the United States and its Territories and posseasions, the official institutions of forelgn countriea, wherever such institutions may be located, and irternetional organizations. "Short-tem" refera to original maturities of one year or less, and "long-term" refers to all other maturities. A detalled discussion of the reporting coverage, statistical presentation, and definitions appeared in tre June 1954 1ssue of the "Treasury Bulletin," pages 45-47. As a result of changes in preaentation introduced in that issue, not all breakdowns previously published
w111 be exactly comparable to those now presented.
The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liablilties to and claims on forelgmers and transactions in long-term securlties by foreigners, and present detalled breakdowns of the latest available preliminary data.

Section IV provides supplementary data in six tables which appear at leas frequent intervals. Table 1 , shortterm foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, fugust, and November issues of tric Bulletin. Table 2, lone-term foreign $11 a b 111 t i e s$ and claims reported by bania and bankers, and Table 3, estlmated gold reserves and dollar holdings of foreign countriea and international institutions, are published quarterly in the March, June, September, and December 1asuea. Table 4, foreign credit and debit balances in brokerage accounts, appears sem1annually in the March and September isauea. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually, appearing in the April 1asue through 1958 and in the March 18 aue thereafter. Table 6 , purchases and sales of long-term securities by forelgners during the preceding calendar year, also appears annually, beginning with the May 1959 issue.

## Section IV - Supplementary Data by Countries

 Table 5.- Short-Term Liabilities to Foreigners in Countries and Areasnot Regularly Reported Separately by Banks and Bankers $1 /$ not Regularly Reported Separately by Banks and Bankers

1 The data in this table are based on annual reports from banks and bankers in the Second (New York) Federal Reserve District only, and include funds held in an account with the U. S. Treasury. They represent a partial breakdown of the amounts shown for the corresponding dates for the "Other" categories in the regular monthly series in the "Treasury Bulletin."

2/ Data for the Bahamas (1957-1959), Jamaica (1957-1960), and Trinidad and Tobago (1957-1961) included with British West Indies.
3/ Including Kenya, Mauritius, Seychelles, Tanganyika (through 1960), Uganda, and Zanzibar.
n.a. Not available.

The current financial statements of corporations and certain other business-typa activities of the United Statea Government which appear in the "Treasury Bulletin" beginning with the Aurust 1956 1ssue are complled irom reporta submitted to the Treasury under Department Circular No. 966 , 18sued January 30,1956 , and Supplement No. 1, 1ssued June 1, 1956. The regulations ao issued are pursuant to Section 114 of the Budget and Accounting̈ Procedures Act of 1550 ( 31 U.S.C. $66 b$ ), and represent another step in the program of comprehensive and integrated Government accounting and financial reporting for which authority was provided in that act. They supersede Budget-Tressury Regulation No. 3, 1ssued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financisl atatements previcusly published in the Bulletin were submitted.

In coverage, Department Circular No. 966 requires submission of financial atatements by all wholly owned and mixed-ownership Government corporations apecifically included in the Govemment Corporation Control Act, as amended (31 U.S.C. 84́a, を56); and all other activities of the Government operating as revolving funds for which businesstype public enterpriae or intragovernmental fund budgets Are required by the Buresu of the Budget. Other activities and agencies whose operations, services, or functions are largely aelf-1iquidating or primarily of a revenue-producine nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments and other recoverable assets, may be brought under the regulations as agenoy accounting systems are developed to the oolnt where they are capable of furnish$1 n_{0}$ the financial reports required.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial connition, income and expense, source anc application of funds, and certain commitments and contingencies. Tre
statemerts of financial condition are published quarteriy and appear as Section I in the series of tables. The firat cata under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Sections II and III. The firet of these statements under the new regulations cover the fiscal year 1956, and was publlshed in the January 1957 Bulletin. Within the sections, the agencies sre grouped in separate tables by type, as follows: public enterprise revolving funds, intragovernmental revolvinc funos, certain other activities, deposit funce, anc trust revolving funcs.

Supplement No. I added to the coverage by including all executive agenclea and activities not reportinj under Department Circular No. 966 , but required only a statement of financial condition annually as of June 30. These are mainly not busineas-type activities, and those which had not yet developed formal accounting procedures to provice complete balance sheet types of statements were authorized temporarily to report only the asset side. Thus the supplement rouncs out provision for the information on propertles and assets of the United States Government which the Treasury has been asked to furnish to the Comittee on Government Operations, House of Representatlves, for $\varepsilon$ continuing study of the assets of the Governmert. The first comprehensive reporting under Supplement No. 1 is for June 30, 1957, and the data were published in the Eecemicer 1957 issue of the Bulletin as part $B$ of Table 4 ín section I.

A summary of loans outstanding for a serles of dates is included in section $I$ of the Bulletin presentation beJinning with the June 1958 issue. Two classifications of the losns are shown, one by type and one by sgency. Data prior to 1956 are based on the earlier reporting reauirements, wilch provided for complete coverase of Goverrment lenoinč agencies.

1/ Includes purchase money mortgages, mortgages purchased from insured lending institutions to prevent default, and similar long-term paper held by the agencias which are now classified as loans receivable. Prior to June 30, 1960, these assets had been classifled as accounts and notes receivable or other assets.
$\frac{2}{3}$ Doas not include foreign currency loans.
3 The dollar equivalents of these loans are computed for reporting purposes at varying rates. Where the loan agreements stipulate a dollar denominated figure, the loans outstanding are generally valued at agreement rates of exchanga. Loans executed in units of foreign currency are valued at the market rates (i.e., the rates of exchange at
which Treasury sells such currencies to Government agancies).
4/ Includes certificates of interest.
5/ This Agency submits financial statements annually as of Juna 30, pursuant to Supplement No. 1 to Department Circular No. 966. A complete balance sheet as of December 31, 1962, was not submitted, but the outstanding loans of this Agency were reported to Treasury and are shown on this line.
6/ As of June 30, 1962, the latest availabla.
$\frac{7}{8}$ Public enterprise revolving fund.
