Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expend-

itures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

Reporting Bases - (Continued)

In the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-

dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Note: Where calculations have been made from unrounded figures, the details may not check to the totals shown.

Treasury Financing Operations

Second 1963 Bond Sale to Syndicate

A new issue, designated Treasury bonds of 1989-94, was sold to a syndicate on April 9, 1963, in the amount of \$300 million, on the basis of competitive bidding. The winning bid was \$100.55119 per \$100 of face amount for a $4\frac{1}{8}$ percent coupon, with a resulting net basis cost to the Treasury of 4.093145 percent, calculated to maturity. The syndicate reoffered the bonds to the public at \$100.75 per \$100 of face amount, to yield 4.082 percent to their maturity on May 15, 1994. As in January, the Treasury on April 3 had offered bidders the option of bidding upon either a 4 percent or $4\frac{1}{8}$ percent coupon rate. Each bidder could submit only one bid, which was to specify one of the two coupon rates. The successful bidder was required to make a bona fide reoffering of all the bonds to the investing public.

The winning syndicate was headed by Salomon Brothers & Hutzler, C. J. Devine & Co., The Chase Manhattan Bank, First National City Bank, Chemical Bank New York Trust Company, Bankers Trust Company, The First National Bank of Chicago, and 67 others.

The two other bidders and their bids were:

A syndicate headed by the First Boston Corporation, Continental Illinois National Bank and Trust Company of Chicago, Discount Corporation of New York, and 64 others: \$100.51259 for a $4\frac{1}{8}$ percent coupon, resulting in a net basis cost of money of 4.095344 percent; and

A syndicate headed by Morgan Guaranty Trust Company of New York, Bank of America--National Trust and Savings Association, Blyth & Co., Inc., Halsey, Stuart & Co., Inc., and Aubrey G. Lanston & Co., Inc., and 38 others: \$98.21262 for a 4 percent coupon, resulting in a net basis cost of money of 4.101936 percent.

The Treasury stated that it was satisfied with the bidding results. All three bidders offered effective interest costs to the Treasury that fell within a range of 1/100th of 1 percent. Although the basis cost of money to the Treasury provided by the winning bid was higher than that of the January auction, the relationship of this bid to other prevailing yields in the market was approximately the same.

The regulations governing the sale of Treasury bonds through competitive bidding were issued on December 17, 1962, and were published in the Federal Register dated December 18, 1962. They contained the rules governing bids, awards, and delivery; and the basic features of the securities except, principally, the maturity period, coupon rates, and interest dates.

The $4\frac{1}{8}$ percent bonds of 1989-94 are dated April 18, 1963, and bear interest from that date at the rate of $4\frac{1}{8}$ percent per annum, payable on a semiannual basis on November 15, 1963, and thereafter on May 15 and November 15 in each year until the principal amount becomes payable. They will mature May 15, 1994, but may be redeemed at the option of the United States on and after May 15, 1989, at par and accrued interest, on any interest day, on four months' notice of redemption given in such manner as the Secretary of the Treasury shall prescribe.

Bearer bonds with interest coupons attached and bonds registered as to principal and interest were issued in denominations of \$500, \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

If the bonds are owned by a decedent at the time of death and thereupon constitute a part of his estate, they will be redeemed at par and accrued interest at the option of the representative of the estate, provided the Secretary of the Treasury is authorized by the decedent's estate to apply the entire proceeds of redemption to payment of the Federal estate taxes on such decedent's estate.

On March 20, 1963, the Secretary of the Treasury issued a public notice of invitation for bids to be received at the Federal Reserve Bank of New York not later than 11:00 a.m., eastern standard time, on April 9. The accompanying announcement stated that a supplemental notice, to be published on April 3, would set forth the provisions relating to the coupon rate or rates of interest upon which bids would be received. It also stated that bidders must file a notice of intent to bid at the Federal Reserve Bank of New York not later than 12:00 noon, eastern standard time, on April 5. Other than the coupon rates, terms of the bond issue also were contained in the March 20 announcement, except those generally applicable to bonds sold by the Treasury at competitive bidding (published in the regulations dated December 17, 1962). In the supplemental notice issued on April 3 the Secretary of the Treasury announced that bidders would be offered either the 4 percent or $4\frac{1}{8}$ percent coupon rate. Payment for the bonds was required in immediately available funds not later than 11:00 a.m., eastern standard time, on April 18.

One-Year Bills Increased

On April 2, 1963, the Treasury Department announced an offering on April 10 for \$2.5 billion, or thereabouts, of 366-day Treasury bills for cash and in exchange for \$2.0 billion of Treasury bills maturing April 15, 1963.

Treasury Financing Operations - (Continued)

Tenders totaled \$4,048 million, of which \$2,501 million, on the basis of preliminary reports, was accepted at the average bank discount rate of 3.062 percent. Noncompetitive tenders for \$400,000 or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These amounted to \$191 million.

Payment for accepted tenders was required to be made or completed on April 15, 1963, in cash or other immediately available funds, or in a like face amount of the Treasury bills maturing on April 15. Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, or an express guaranty of payment by an incorporated bank or trust company.

The new one-year bills are dated April 15, 1963, and will mature April 15, 1964, when the face amount will be payable without interest. Issued in bearer form only, the bills are in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Increase in Weekly Bills Resumed

Weekly Treasury bills issued in March totaled \$8.4 billion, refunding the \$8.3 billion of bills maturing and providing \$0.1 billion in "new money." In the first three

weeks the maturing bills were rolled over. In the last one, for the bills dated March 28, the Treasury added \$100 million in new bills, resuming the weekly increases which had ended with the bills bearing January dates. Each of the four 91-day issues in March was for \$1.3 billion, and each of the four 182-day issues, \$0.8 billion. The first three pairs of maturing issues amounted to \$2.1 billion and the last, to \$2.0 billion. Average rates of discount on the bills are shown in the tabulation following.

Foreign Currency Series

A two-year bond of the foreign currency series, bearing interest at the rate of 3.27 percent per annum, was issued on March 29, 1963. Denominated in Italian lire, it was the equivalent of \$25 million. During March, there was retired in advance of its maturity of January 27, 1964, the 3.00 percent bond dated October 26, 1962, denominated in Italian lire and also the equivalent of \$25 million.

Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation. More detail for data on this page will be found in succeeding tables.

1/ Fiscal year figures beginning with the September 1960 issue of the Treasury Bulletin, and calendar year figures beginning with the June 1961 issue exclude certain interfund transactions from both net budget receipts and budget expenditures (see page II, 2, and 5). Figures previously published for these series have been revised to the new reporting basis. The change does not affect the budget surplus or deficit.

2/ Excess of receipts, or expenditures (-). For detail, see pages 11 - 15.

3/ For checks outstanding and telegraphic reports from Federal Reserve banks; public debt interest accrued and unpaid beginning with June and the fiscal year 1955 (previously included from November 1949 as

interest checks and coupons outstanding); also deposits in transit and changes in cash held outside the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).

4/ For current month detail and list of acts, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion, on June 26, 1946; \$281 billion, on August 28, 1954; \$278 billion, on July 1, 1956; \$275 billion, on July 1, 1957; \$280 billion, on February 26, 1958; \$288 billion, on September 2, 1958; \$290 billion, on June 30, 1959; \$295 billion, on July 1, 1959; \$293 billion, on July 1, 1960; \$298 billion, on July 1, 1961; and \$300 billion on March 13, 1962. The limit is \$308 billion from July 1, 1962, through March 31, 1963; \$305 billion from April 1 through June 24, 1963, and \$300 billion from June 25 through June 30, 1963. Under proposed legislation the statutory debt limitation for June 30, 1963, as estimated in the 1964 Budget document, is \$308 billion.

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates are from the 1964 Budget document, released January 17, 1963, including effect of proposed legislation.

^{1/} Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion charges, and gifts

and contributions.

^{2/} Includes \$210 million received from the French Government and \$179 million from the Italian Government for prepayment of loans.

^{3/} Includes \$375 million for repayment of advances from Federal extended compensation account (Temporary Extended Unemployment Compensation Act of 1961, approved March 24, 1961) and a decrease of \$93 million for transfer of receipts to Commodity Credit Corporation fund.

Footnotes to Table 1 - (Continued)

^{6/} Includes adjustments as follows for: Income taxes not withheld, October -\$4 million, January -\$4 million, and March -\$2 million; income taxes withheld, October -\$142 million, January -\$67 million, and March -\$14 million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, October +\$134 million, January +\$52 million, and March +\$19 million; and transfers to Federal Disability Insurance Trust Fund, October +\$12 million, January +\$9 million, and March -\$2 million. See also footnote 9.

^{7/} Interest on refunds is included in expenditures in Table 3.

^{8/} The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.

^{9/} Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.

^{10/} The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.

^{11/} Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371) and transfers are made currently.

^{12/} The Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.

^{13/} The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note), established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.

^{14/} For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures, but are deducted from the totals (see Reporting Bases, p.II).

^{15/} Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).

^{16/} Transfers reduced by \$300 million to adjust those made earlier on basis of estimates (see footnote 9).

^{17/} Reflects gross amounts based on reimbursements by trust accounts for refunds of taxes which were made in previous months or fiscal years.

* Less than \$500,000.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page 11); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation.

Note: Figures in this table are for agencies as constituted at the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 6. Agency shifts are reflected in this table as follows: Beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federal intermediate credit banks and production credit corporations as indicated in footnote 12; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Media Guaranty Fund from "Funds appropriated to the President" to "Independent agencies"; beginning 1959, Federal Civil Defense Administration from "Independent

agencies" to "Executive Office of the President," Civil Aeronautics Board from "Commerce Department" to "Independent agencies," Civil Aeronautics Administration from "Commerce Department" and Airways Modernization Board from "Independent agencies" to the "Federal Aviation Agency," National Advisory Commission for Aeronautics from "Independent agencies" to "National Aeronautics and Space Administration"; from fiscal 1960 through November 1962, military assistance from "Funds appropriated to the President" to "Defense Department, military," and thereafter under "Funds appropriated to the President"; and beginning 1962, subscriptions to international institutions from "Treasury Department" to "Funds appropriated to the President."

1/ Consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis, and beginning fiscal 1960 payment for public services.

Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

- 1/ Collections in the various States do not necessarily indicate the Federal tax burden of the respective States, since the taxes collected in one State are, in many instances, borne by residents of other States. For example, the withholding taxes reported by employers situated in metropolitan areas near State boundaries include amounts withheld from salaries of employees who reside in neighboring States.
- 2/ Includes old-age and disability insurance taxes on self-employment income.
- 3/ Includes tax on business income of exempt organizations.
- 4/ Consists of estate and gift taxes, and excise taxes; excise tax receipts deposited by postmasters from sales of documentary stamps; excise taxes on imported items deposited by collectors of customs;

and amounts collected in Puerto Rico upon Puerto Rican manufactures coming into the United States.

- 5/ Includes District of Columbia collections.
- 6/ Consists of collections from U. S. taxpayers in Puerto Rico, Canal Zone, etc., and in foreign countries.
- 7/ The amount of undistributed depository receipts consists of all those issued during the calendar year minus those received with tax returns which are included in the States totals.
- 8/ Withheld taxes covered into the Treasury of Guam (48 U.S.C. 1421h).
- 9/ Net transactions in the clearing account on the central books of the Treasury for income taxes withheld from the salaries of Federal employees.
- * Less than \$500.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation.

^{1/} Certain intertrust fund transactions are excluded from both receipts and expenditures beginning with the July 1961 issue of the Bulletin. For detail see Table 6.

^{2/} Beginning with the February 1963 Bulletin amounts for refunds of taxes (principal only) have been deducted from receipts, and therefore

are excluded from expenditures.

^{2/} Also includes guaranteed securities (see Table 4).

^{4/} Effective July 1, 1955, security transactions of Government-sponsored enterprises are included in deposit fund account expenditures (net) and excluded from net investment by Government agencies in public debt securities (see Table 4) and from net redemption or sale of obligations of Government agencies in the market (see Table 5). Figures for 1955 have been revised to the new classification basis.

^{5/} Adjusted for reclassification of certain repayments of advances from the general fund.

CASH INCOME AND OUTGO

The cash income and outgo data appearing in the Treasury Bulletin, beginning with the February 1956 issue, are on a basis consistent with receipts from and payments to the public as derived in the 1957 and subsequent Budgets of the United States (in the Budget for 1963 in Special Analysis B). Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Bureau of the Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports. Major intragovernmental trans-

actions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligation of the Government to make payments in the future also are eliminated from expenditures but are added later when actual payments are made. These items consist of certain interest accrued on the public debt, expenditures involving the issuance of a few special public debt securities, and clearing accounts. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Bureau of the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Bureau of the Budget series.

Source: See Table 1. Details of basic receipt figures appear in preceding sections in the Bulletin.

- 1/ Previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures; and further revised in the July 1961 issue for deductions of certain inter-trust fund transactions from both trust account receipts and trust account expenditures (see pp. 2, 5, 11, and 12). Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
- 2/ Revised beginning with the February 1963 Bulletin to include principal amounts of refunds of taxes as deductions from trust account receipts. Previously such amounts were included with trust account expenditures.

- 3/ Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.
- 4/ Consists of seigniorage and the increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.
- 5/ Figures in this column differ from those published prior to the September 1960 Treasury Bulletin because a few additional items of budget receipts which are also budget expenditures are included in the interfund transactions deducted from budget receipts and budget expenditures (see footnote 1).
- 6/ Adjusted for reclassification of certain repayments of advances from the general fund.
- * Less than \$500,000.

Source: See Table 1. Details of basic expenditure figures appear in preceding sections in the Bulletin.

1/ See Table 2, footnote 1.

2/ In this table, in accordance with treatment in Budget documents, net investment in United States securities by Government-sponsored enterprises includes a small amount by other enterprises regarded as representing net transactions with the public. In table 3 under "Trust Account and Other Transactions," these amounts are included with other trust accounts.

3/ See Table 2, footnote 2.

4/ Net operating expenditures, or receipts (-), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 6). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to

repayment of borrowing from the public or to investment in Federal securities. On that basis, net expenditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency obligations in the market. Net receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the market.

5/ See Table 2, footnote 5.

6/ Previously included under cash withdrawals. See footnote 7.

7/ Figures have been revised to exclude transactions of clearing accounts beginning with the February 1963 Bulletin, as shown in the daily Treasury statements beginning January 2, 1963.

8/ Does not include revolving fund receipts representing acquired securities amounting to \$1,643,070 (par value).

Figures in the first four columns of this table may differ somewhat from those originally published in the daily Treasury statement because of sub-

sequent reclassification of certain transactions.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Post Office Department and postmasters' disbursing accounts also are included through November 1954. (See footnote 2). Treasurer's checks outstanding are included through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 3).

^{2/} Beginning December 1954, Post Office Department and postmasters'

disbursing accounts are not treated as liability accounts of the Treasurer of the United States, but are classified and treated as other disbursing accounts, in accordance with the change in method of reporting Post Office transactions (see "Budget Receipts and Expenditures," Table 3). An adjustment of -\$207 million in the balance in the Treasurer's account (and in the "clearing account") reflects this change.

^{3/} Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

^{4/} Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

^{1/} Special depositories are permitted to make payment in the form of a deposit credit for the purchase price of U. S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

^{2/} Taxes eligible for credit consist of those deposited by taxpayers in the depository banks, as follows: Withheld income tax beginning March 1948; taxes on employers and employees under the Federal

Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

^{2/} Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depository bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal

amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through May 1961; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

Footnotes to Table 6

Source: Bureau of the Public Debt. Preliminary figures are from subscription and allotment reports; final figures are on "clearance basis" in daily Treasury statement.

- 1/ Original call and maturity dates are used.
- 2/ All by investors other than Federal Reserve Banks.
- 3/ Two issues of bills, maturing January 16, 1957, and February 15, 1957 respectively, were rolled over into two issues of tax anticipation bills, both maturing June 24, 1957.
- 4/ Tax anticipation issue; for detail of offerings beginning 1957, see Table 4; for amounts redeemed for taxes and for cash see "Note" below.
- 5/ During June and July 1958, \$491 million of the 2-5/8% Treasury bonds of 1965 was purchased by the Treasury for retirement under section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a).
- 6/ Called on May 14, 1958, for redemption on September 15, 1958.
- 7/ Represents amount which owners exercised the option to redeem on August 1, 1959 (see Table 4, footnote 9).
- 8/ Holders of the 4% notes, who had the option to redeem at par on February 15, 1960, by giving notice not later than November 16, 1959, were permitted to exchange their holdings on November 15, 1959, for the 4-7/8% notes.
- 9/ Rolled over into a one-year bill (see Table 4).
- 10/ Amount which owners exercised the option to redeem on February 15, 1960 (see Table 4, footnote 11).
- 11/ Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations.
- 12/ Holders of 2-1/2% Treasury bonds maturing November 15, 1961, were offered the option to exchange the bonds during the period from June 8, 1960, to June 13, 1960, inclusive, subject to allotment if subscriptions exceeded by 10 percent the offering limits of \$3.5 billion for the notes and \$1.5 billion for the bonds.
- 13/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/8% certificates or the 3-7/8% bonds, which were offered in an aggregate of around \$8-3/4 billion. For detail of offering, see Table 4.
- 14/ Excess of maturing 4-3/4% Treasury notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 32 and 34).

- 16/ Holders of 2-1/2% Treasury bonds maturing June 15, 1967, December 15, 1968, June 15, 1969, and December 15, 1969, were offered the option to exchange the bonds during the period from September 12, 1960, to September 20, 1960, inclusive, the first for 3-1/2% bonds of 1980, the second for 3-1/2% bonds of 1990, and the other two for 3-1/2% bonds of 1998, subject to allotment if the combined total of subscriptions for the bonds of 1990 and 1998 exceeded an outside limit of \$4.5 billion.
- 17/ Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4% notes offered in the amount of around \$6.9 billion. For detail of offering, see Table 4.
- 18/ Excess of maturing 4-7/8% certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 39 and 40).
- 19/ From March 20 through March 22, 1961, owners of 2-1/4% bonds of June 15, 1959-62, 2-1/4% bonds of December 15, 1959-62, 2-5/8% notes maturing February 15, 1963, and 2-1/2% bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new 3-5/8% bond due November 15, 1967, and the last for a new 3-3/8% bond due November 15, 1966. Exchanges were subject to allotment if subscriptions exceeded \$5 billion for the bonds of 1967 or \$3 billion for the bonds of 1966.
- 20/ Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \$5,250 million offering of 3% certificates or the \$2,500 million offering of 3-1/4% notes. For detail of offering, see Table 4.
- 21/ Excess of maturing 4-3/8% certificates and 3-5/8% notes over allotments of new securities on subscriptions from holders of those certificates and notes (see Table 4, footnotes 43 and 44).

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt upon which interest has ceased.

- 1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
- 2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
- 3/ Because there is a normal lag in classifying redemptions the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final

reports of classified redemptions. All periods shown have been revised on this basis.

- 4/ Reductions were made in issues and redemptions of Series E, H, F, G, J, and K bonds in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: \$18 million for issues of Series E and H, \$17 million for issues of Series F, G, J, and K, and \$35 million for unclassified retirements.
- 5/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
- 6/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
- 7/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
- 8/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- 9/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.
- 10/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
- 11/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues. * Less than \$500,000.

TREASURY SURVEY OF OWNERSHIP, FEBRUARY 28, 1963

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 60 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for

corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

^{1/} Issues included in advance refunding offer dated February 20, 1963.

For further details, see "Public Debt Operations," Table 6.

^{2/} Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in the history beginning October 1, 1939. Dates of highs

and lows in case of recurrence are the latest dates.

^{3/} Not quoted on March 29, 1963.^{4/} On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.^{5/} Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

YIELDS OF TAXABLE TREASURY SECURITIES, MAR. 29, 1963 Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the two classes of points are fitted by eye. Market yields on regular weekly bills other than those offered the latest week and on maturing coupon issues for which an exchange offer has been made and on any issues which are due in less than 3 months are excluded.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the Bulletin.

1/ Series includes bonds which are neither due nor callable before a

given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

2/ One or more new long-term bonds added to the average (see footnote 1).

3/ An existing bond dropped from the average (see footnote 1).

4/ Change in series (see footnote 1).

The Treasury notes of 1890 have been in process of retirement since March 1900 (31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30, 1934; silver certificates, United States notes, Federal Reserve Bank

Through fiscal 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawaii.

1/ These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure silver certificates.

2/ Total of seigniorage on coins and on newly mined silver, beginning

with that for July 1959, is included under coins; the breakdown is not available after June 1959.

2/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of \$4,125 million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund (\$1,031.2 million) and the Fund's net use of dollars; on March 31, 1963, these two amounts totaled \$1,110.5 million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

- 1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of March 31, 1963, this amounted to \$800 million.
- 2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.
- 3/ Includes holdings of Treasury and Federal Reserve System.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin," pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published

will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data in six tables which appear at less frequent intervals. Table 1, short-term foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2, long-term foreign liabilities and claims reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semi-annually in the March and September issues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually, appearing in the April issue through 1958 and in the March issue thereafter. Table 6, purchases and sales of long-term securities by foreigners during the preceding calendar year, also appears annually, from 1959 through 1962 in the May issue, and in the April issue beginning 1963.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

The current financial statements of corporations and certain other business-type activities of the United States Government which appear in the "Treasury Bulletin" beginning with the August 1956 issue are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, issued June 1, 1956. The regulations so issued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b), and represent another step in the program of comprehensive and integrated Government accounting and financial reporting for which authority was provided in that act. They supersede Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

In coverage, Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds for which business-type public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments and other recoverable assets, may be brought under the regulations as agency accounting systems are developed to the point where they are capable of furnishing the financial reports required.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain commitments and contingencies. The

statements of financial condition are published quarterly and appear as Section I in the series of tables. The first data under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Sections II and III. The first of these statements under the new regulations cover the fiscal year 1956, and was published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intragovernmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1 added to the coverage by including all executive agencies and activities not reporting under Department Circular No. 966, but required only a statement of financial condition annually as of June 30. These are mainly not business-type activities, and those which had not yet developed formal accounting procedures to provide complete balance sheet types of statements were authorized temporarily to report only the asset side. Thus the supplement rounds out provision for the information on properties and assets of the United States Government which the Treasury has been asked to furnish to the Committee on Government Operations, House of Representatives, for a continuing study of the assets of the Government. The first comprehensive reporting under Supplement No. 1 is for June 30, 1957, and the data were published in the December 1957 issue of the Bulletin as Part B of Table 4 in Section I.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 1958 issue. Two classifications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.
