## Reporting Bases

Data on recelpts, expenditurss, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Goverment." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of recelpts and expenditures was f1rst published for February 1954, and replaced the dally statement as the primary source of information on budget results and other recelpt and expenditure data classifled by type of account. At the same time, the dally statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their reapective basea from the beginning of the f1scal year 1953. The announcement of February 17 , 1954, with reapect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, incluaing those agencles which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencles during the reporting period. The net of the transactions as. complled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basia of checks $1 s$ sued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basia. The same reporting basis as that in the monthly statement provides the fiscal year plgures for the Treasury's "Combined Statement of Receipts, Expend-

Itures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detall of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deflcit. Figures for earlier perlods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 1ssue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earninge. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1 , 1948, and flgures for prior fiscal years back through 1932 were revised accordingly at that time.

The dally statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no diatinction is made as to the type of accounts (budget, truat, etc.). The deposits are on the basis of certiflcates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks pald or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of malled reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt flgures in the dally statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled throush commercial bank accounts, and included noncash interfund and other intragovernmental tranaactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month dally statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

## Reporting Bases - (Continued)

In the dally statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-
died through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the dally statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Note: Where calculations have been made from unrounded flgures, the details may not check to the totals shown.

## Treasury Financing Operations

## One-Year E1lls

On September 17, 1963, the Treasury Department announced the second offering on September 25 of the new serles of one-year Treasury bills for $\$ 1$ billion or thereabouts.

Tencers totaled $\$ 2,395 \mathrm{mlllion}$, of which $\$ 1,001$ million, on the basis of oreliminary reports, was accepted at the average bank discount rate of 3.586 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These amounted to \$46 million.

Payment for accepted tenders was required to be made or completed on October 1,1963 , in cash or other immediately available funds. Banking institutions generally could submit tencers for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent of the face amount of the one-year bills applied for, unless accompanied by an express guaranty of payment by an incorporated bank or truet company.

The 365-day bills are dated October 1, 1963, and mature September 30, 1964, when the face amount will be payable without interest. Iesued in bearer form only, the bills are in denominations of $1,000, \$ 5,000, \$ 10,000, \$ 50,000$, $\$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value).

## Tax Anticipation Bills

Following an announcement on October 2, tenders were received on October 9 for $\$ 2$ billion, or thereabouts, of 160-day tax anticipation bills for cash and in exchange for *2.5 billion of oneyear Treasury bills maturing October 15, 1963. Tenders totaled \$2, 957 million, of which \$2,000 million was accepted at the average rate of discount of 3.537 percent. The acceptances include $\$ 131$ million of noncompetitive tenders for $\$ 400,000$ or less (without stated price) from any one bidder accepted in full at the average price of accepted competitive bids.

The 160-day tax anticipation bills are dated October 15, 1963, and mature March 23, 1964. They will be accepted at par in payment of income and profits taxes due March 15, 1964; to the extent they are not presented for this purpose the $f$ ace amount will be payable without interest at maturity. Payment for the bllls was required to be made or
completed on October 15, 1963, in cash or other immediately available funds or in a like face amount of the bills maturing on that date. Requirements relating to deposits with tenders and the denominations were like those for the one-year bills offered september 25, 1963.

## Strip Bills

Under an announcement dated October 16, the Treasury invited tenders on October 22 for $\$ 1$ billion, or thersabouts, in cash, for additional amounts of ten series of Treasury bills.

Tenders for the strip of bills totaled $\$ 2,108$ million, of which $\$ 1,001$ million was accepted at the average rate of discount of 3.601 percent based on $132 \frac{1}{3}$ days, the average number of days to maturity.

Estimates are from the 1964 Budget document, released January 17, 1963, including effect of proposed legislation.
1/ Consists of miscellaneous taxes (principally the tornage tax on
foreign vessels entering U. S. ports), bullion charges, and gifts and contributions.
2) Includes $\$ 375$ million for repayment of advances from Federal extended compensation account (Temparary Extended Unemployment Compensation Act of 1961 , approved March 24,1961 ) and a decrease of $\$ 93$ million for transfer of receipts to Commodity Credit Corporation fund.

## Footnotes to Table l - (Continued)

6/ Includes adjustments as follows for: Income taxes not withheld, January - $\$ 4$ million, March $-\$ 2$ million, June $+\$ 58$ million, and September - \$3 million; income taxes withheld, January $-\$ 67$ million, March - \$14 million, June $-\$ 8$ million, and September +88 million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, January $+\$ 62$ million, March $+\$ 19$ million, June $-\$ 47$ million, and September $-\$ 10$ million; and transfers to Federal Disability Insurance Trust Fund, January + $\$ 9$ million, March - $\$ 2$ million, June $-\$ 3$ million, and September $+\$ 5$ million. See also footnote 9 .
7. Interest on refunds is included in expenditures in Table 3.
8) The principal amounts for refunds of employment texes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
10 The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Digability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
in the Treasury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371 ) and transfers are made currently.
12) The Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund an adminiatration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
13 The Highway Revenue Act of 1956 , as amended, ( 23 U.S.C. 120 , note) eatablished a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30,1956 , and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuela, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
14 For content, see Table 4 . These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
15 Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).

The cash income and outgo data appearing in the Treasury Bulletin, beginning with the February 1956 isaue, are on a basis consistent with recsiots from and payments to the public as derivad in the 1957 and subsequent Budgets of the United States (in the Budget for 1963 in Speoial Analysis S ). Reconciliation to cash deposits and withdrawale in the account of the Treasurer of the United States 18 shown on the same basis as in the Budget documenta. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget olassifications are made avallable month by month. Figures for back years have been revised where neceseary in order to make them as nearly comparable with current sudget clabsifloations as avallable data will permit. For this reason certain of the ligures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Bureau of the Budget serles of cash transactions 1s designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Reoeipte and payments include transactions both in budget accounts and in trust and deposit fund acoounts. Operations of Government-sponsored enterpriaes are included in payments on a net basis as reflected in Treasury reports. Major intragovemmental trans-
aotions which are reported as both expenditures and receipts are excluded from both. Noncash iteme representing the obligation of the Government to make payments in the future also are eliminated from expenditures but are added later when actual payments are made. These items consist of certain interest acorued on the public debt, expenditures involving the iesuance of a few special public debt securities, and clearing accounts. Receipte from the exercise of monetary authority are excluded as not representing cash reoelved from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencles and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public sebt whioh do not represent direct cash borrowing from the public. The net effect of all these transactions with the public ie reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Traasurer's account are similar in general concept to those included in the Bureau of the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they inciude receipts from the exercise of monetary authority, which are excluded from recelpts from the public in the Bureau of the Budget series.

Source: See Table 1. Details of basic receipt figures appear in preceding sections in the Bulletin.
1/ Previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures; they were further revised in the July 1961 issue for deductions of certain inter-trust fund transactions from both trust account receipts and trust account expenditures. Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
2/ Revised beginning with the February 1963 Bulletin to include principal amounts of refunds of taxes as deductions from trust account receipts. Previously such amounts were included with trust account expenditures.

3/ Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.
4 Consists of seigniorage and the increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.
5) Beginning fiscal 1961, figures have been revised for reclassification of receipts for the food stamp program, Department of Agriculture. Such receipts are included as deductions from expenditures in Table 3.

2/ Fiscal year figures beginning with the August 1963 Bulletin and calendar year figures beginning with the September issue have been revised to take account of certain changes in classification. See "Trust and Other Transactions," Table 1, Note.
3/ Includes Government-sponsored enterprise net operating expenditures, or receipts (-), as measured by funds provided by or spplied to net security transactions reflected in Treasury reports (see Table 6). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to repayment of borrowing from the public or
to investment in Federal securities. On that basis, net expenditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency securities in the market. Net receipts from operations are show in terms of the combined net of investment in Federal securities and redemption of agency securities in the market.
4/ Previously included under cash withdrawals. See footnote 7.
5/ Figures have been revised to exclude transactions of clearing accounts beginning with the February 1963 Bulletin, as shown in the daily Tressury statenent beginning January 2, 1963.
6/ Does not include revolving fund receipts representing acquired securities amounting to $\$ 1,643,070$ (par value).

(In millions of dollars)

Source: Actual figures are based on the daily Treasury statement; estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation. Figures in the first four colums of this table may differ somewhat from those originally pub-
lished in the daily Treasury statement because of subsequent reclassi-
fication of certain transactions.

I/ Beginning with the February 1963 Bulletin figures have been revised, as shown in daily Treasury statements beginning January 2, 1963, to exclude transactions of clearing accounts.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States replects not only budget recelpts and expenditures but also trust, deposit fund, and public debt transactions.

The working oash of tha Treasury is held mainly in Treasurer'a accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Depoolts to tax and loan aocounts oocur in the normal course of business under a unlform procedure applicable to all banks whereby cuetomers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan aooount in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to depoelt in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account aystem parmite the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury neede the funds for its operations. In this way the Treasury is able to neutralize the effect of ite fluotuating operstions on bank reserves and the economy.

A detalled description of the Treasury's depositary aystem may be found in the Annual Report of the Saoretary of the Treasury for 1955, pages 275-284.

2) Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

1. Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U. S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2) Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
3/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments. * Less than $\$ 500,000$.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the arount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960) The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for
the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Garanteed securities included are those held outside the Treasury.
2) Total includes "Other bonds" through 1960; see Table 3.

Included in debt outstanding at face arount, but discount value is used in computing annual interest charge and annual interest rate.
4) On United States savings bonds the rate to maturity is applied against the amount outstanding.

Table 4.- Redemptions of Matured and Unmatured Savings Bonds

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outatanding at current redemption value. Series G, H, and $K$ are included at faca value throughout. Matured bonds which have been redeemed are incIuded in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing तebt until all bonds of the annual series have matured, and are then transferred to matured debt upon which interest has ceased.
1 Sales and redemption figures include exchanges of minor amounts of (1) matured Series $\mathbb{E}$ bonds for Series $G$ and $K$ bonds from May ${ }^{1} 951$ through April 1957 and (2) Series F and J bonds for Series $H$ bonde beginning January 1960; however, they exclude exchanges of Series E bonds for Series $H$ bonds, which are reported in Table 3.
2 Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method or distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been
revised on this basis.
4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5. Includes exchanges of Series 1941 F and G savings bonds for $3-1 / 4 \%$ marketable bonds of 1978-83.
6/ Includes exchanges of Series $19,48 \mathrm{~F}$ and G bonds for $4-3 / 4 \%$ marketable notes of 1964.
7) Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968
2/ Includes exchanges of Series 1951 and 1952 F and $c_{1}$ bonds for $3-7 / 8 \%$ marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues. * Less than $\$ 500,000$.

## Table 1.- U. S. Gold Stock, and Holdings of Convertible Foreign Currencies by U. S. Monetary Authorities

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of \$4,125 million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund ( $\$ 1,031.2$ million) and the Fund's net use of dollars; on September 30 1963, these two amounts totaled $\$ 1,050.0$ million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of September 30, 1963, this amounted to $\$ 800 \mathrm{million}$.
2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.
3/ Includes holdings of Treasury and Federal Reserve System.

## October 1963

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereuncer. Information on the principal types of data and the princlpal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and noniinancial business concerns in the United States are made initially to the Federal Reserve Benks, which forward consolidated fieures tc the Treasury. These statistics are consolldated by the Treaaury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistica have been reviced a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/A detailed description of the content of the statiatica, including the changes instituted, appeared in the July 296318 sue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introouced in that issue, not all vreakcowns previously published will be exactly comparable to those now presented.

## Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the forelgn subsidiarles and offices of United States banks and business concerns; the central governments, central baniss, and other official institutions of foreign countries, wherever located; and international and regional oryanizations, wherever located.

In general, data are reported opposite the forelgn country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencite of forelen officiel institutions are reforted opposite the country to which the official institution belonge. Data pertaining to international and regional orgarizations are reported opposite the classification "International," "European regional," or "Latin American regional," aa appropriate, except for the Bank for Internaticnal Settlements and the European Fund, Which are included in the classification "Other Western Europe."
"Short-teri" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes aecurities having no contractual maturity.

## Exclugions

The data published herein do not cover all types of capital movements between the United Statec and foreign countries. The data reported to and published by the Treaaury Department exclude entirely the intercompany capital transactione of business enterprises in the United States with their own branches and subsidiarles abroad or with their forelgn parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital trensactione of the United States Government and on ahipments and recelpte of United States currency are also excluded from the Treaaury reports. Certain oapital transactions not effected through reporting institutions, suoh as securities trensactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all typea of capital transactions are published by the Department of Commerce in ita regular raports on the United States balance of payments.

The lizbilities data oxclude nonnegotiable, noninterestbearing special notes of the United statea held by the InterAmerican Development Bank and the International Development Association.

The eecurities transactions data exclude nonmarketable U.S. Treasury notes, foreign aeries, and nonmarketable U.S. Treasury bonds, foreign currency series (aee "International Financial Statistica" section, Table 2).
