## Reporting Bases

Data on recelpts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Recelpts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of recelpts and expenditures was P1rst published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classifled by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United Statee. Both publications have provided comparative ilgures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all reoeipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transaotions as. compiled from these reports is reconciled in the monthly statement to changes in the balance in the Troasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other recelpts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks lssued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reportiny basis as that in the monthly statement provides the fiscal year flgures for the Treasury's "Combined Statement of Reoeipts, Expend-
itures and Balances of the United States Government" and for actual recelpts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget recelpts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the september 1960 1ssue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget sxpenditures beginning July 1 , 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The dally statement on the new basis was flrst issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks lssued and are adjusted by means of clearing accounts to the total of checks pald. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those lssuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present dally statement with respeot to the status of the Treasurer's account, and similar to that in the present end-of-month dally statement with respect to debt issuance, retirement, and amount outstanding. Rece1pts and expenditures, however, were classified by type of account, and the budget rosults shown

in the dally etatement were used an the basis for refleoting the results under the Preaident's budget program as enacted hy the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checke paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks iesued, while certain others, principally thoes I of the Department of Defense and $1 t s$ predeceesor organizations, were on the basis of checks paid. Transactions han-
dled through commercial bank accounts, consieting of market transactions in public debt and guaranteed seourities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-pald basie prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary etocks of gold and bilver and the amounts of coin and currency in the money supply of the country. It is 1esued later than the daily statement, however, and the flgures are baeed on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Note: Where calculations have been made from unrounded ilgures, the details may not check to the totals shown.

## February Refunding

On January 30, 1964, the Treasury Department announced an optional exchange offering to holders of $\$ 8.4$ billion of securities maturing February 15. The offering consisted of $3-7 / 8$ percent 18-month Treasury notes at 99.875 percent of their face value to yield about 3.96 percent and an additional amount of 4 percent Treasury notes of Series A-1966 at par. The 4 percent notes, of which $\$ 4.0$ billion are outstanding, mature in 30 months. The offering was made to holders of the $3-1 / 4$ percent Treasury certificates of indebtedness of Series A-1964, dated February 15, 1963, and the 3 percent Treasury bonds of 1964, dated February 14, 1958, both maturing February 15, 1964.

Cash subscriptions were not received. Subscription books were open from February 3 through February 5.

As shown in the table following, on the basis of preliminary reports, about $\$ 8,013$ million,or 95.7 percent,of the maturing securities were exchanged leaving about $\$ 363$ million to be paid in cash. Of the $\$ 4,338$ million of maturing certificates and bonds held by the public, $\$ 2,189$ million was exchanged for the $3-7 / 8$ percent notes and $\$ 1,810$ million was exchanged for the 4 percent notes. Federal Reserve Banks and Government investment accounts exchanged $\$ 4,014$ million of their holdings for the new $3-7 / 8$ percent notes.

1/ As reported in the Treasury Survey of Ownership, December 31, 1963.

Payment for the face amount of both notes was required on or before February 17, 1964, or on later allotment, and could be made only in the two maturing securities. Coupons dated February 15, 1964, were to be detached from the certificates and bonds in bearer form and cashed when due. Subscribers exchanging bearer securities for the 3-7/8 percent notes were paid $\$ 1.25$ per $\$ 1,000$ because of the issue price of the notes. Holders exchanging registered bonds were paid the final interest due February 15, 1964 (together with the cash payment of $\$ 1.25$ per $\$ 1,000$ for subscribers to the $3-7 / 8$ percent notes), by Treasury check or by credit in any account maintained by a banking institution with the Federal Reserve Bank in its district.

The 3-7/8 percent Treasury notes of Series D-1965 are dated February 15, 1964, and bear interest from that date at the rate of $3-7 / 8$ percent per annum payable on a semiannual
basis on August 15, 1964, February 15, 1965, and at their maturity on August 13, 1965.

The reopened 4 percent Treasury notes of Series A-1966 are dated February 15, 1962, and are indentical with those issued on that date except that interest will accrue from February 15, 1964. The interest is payable on a semiannual basis on August 15, 1964, February 15 and August 15, 1965, February 15, 1966, and on August 15, 1966, when the principal amount becomes payable.

Both notes were issued in bearer form, with interest coupons attached, or registered as to principal and interest in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 100,000$, $\$ 1,000,000, \$ 100,000,000$, and $\$ 500,000,000$. Subscribers to registered notes were required to furnish appropriate identifying numbers as required on tax returns and other documents subnitted to the Internal Revenue Service.

## One-Year Bills

Tenders were invited on January 23, for the auction on January 30 of $\$ 1$ billion, or thereabouts, of 360 -day Treasury bills for cash. Of the total $\$ 2,212$ million tenders received, \$1,000 million was accepted at the average bank discount rate of 3.680 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These totaled \$31 million.

Payment for accepted tenders in cash or other immediately available funds was required to be completed on February 6, 1964. Payment by credit in Treasury tax and loan accounts was not permitted. Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received wi thout deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent of the face amount of the one-year bills applied for, unless accompanied by an express guaranty of payment by an incorporated bank or trust company.

The 360-day bills are dated February 6, 1964, and mature January 31, 1965, when the face amount will be payable without interest. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000$, $\$ 500,000$, and $\$ 1,000,000$ (maturity value). 13-Week and 26 -Week Bills

Regular weekly Treasury bills issued during January totaled $\$ 10.5$ billion, refunding an equivalent amount of bills maturing. The new bills consisted of five 91-day issues of \$1.3 billion each and five 132-day issues of \$0.8 billion each. Average rates of discount on the new bills are shown in the following table.

## Foreign Series and Foreign Currency Series

January issues by the Treasury Department consisted of two 3-month certificates of indebtedness of the foreign series for $\$ 50$ million each and one 15 -month Treasury bond of the foreign currency series denominated in Swiss francs for $\$ 23$ million.

The new foreign series certificates bear interest at 3.55 percent and 3.50 percent per annum, respectively, and interest on the bond is at the rate of 3.61 percent.

Redemptions of foreign series securities during January totaled $\$ 177$ million and included partial redemption ( $\$ 5$ million) of the certificate dated January 2, 1964. At the end of January foreign series securities outstanding aggregated \$505 million.

One foreign currency series bond denominated in Swiss francs, equivalent to \$23 million, matured on January 20, 1964, and was redeemed. In addition to Swiss francs the foreign currency series outstanding are denominated in Austrian schillings, Belgian francs, German marks, and Italian lire. As of January 31, they totaled $\$ 760$ million.

Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of recsipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1965 Budget document, released January 21, 1964, including effects of proposed legislation. More detail for data on this page will be found in succeeding tables.
1/ Fiscal year figures beginning with the September 1960 issue of the Treasury Bulletin, and calendar year figures beginning with the June 1961 issue excluda certain interfund transactions from both net budget receipts and budget expenditures (see pages, II, 2, and 5). Figures previously published for thesa series have been revised to the new reporting basis. The change does not affect the budget surplus or deficit.
2/ Excess of receipts, or expenditures (-). For detail, see pages 10-14.
For checks outstanding and telegraphic reports from Federal Reserve banks; public debt interest accrued and unpaid beginning with June and the fiscal year 1955 (previously included from November 1949 as
interest checks and coupons outstanding) ; also deposits in transit and changes in cash held outside the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).
4 For current month detail and list of acts, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: $\$ 275$ billion on June 26, 1946; $\$ 281$ billion on August 28, 1954; \$278 billion on July 1, 1956; \$275 billion on July 1, 1957; $\$ 280$ billion on February 26, 1958; $\$ 288$ billion on September 2, 1958; \$290 billion on June 30, 1959; \$295 billion on July 1, 1959; \$293 billion on July 1, 1960; \$298 billion on July 1, 1961; $\$ 300$ billion on March 13, 1962; $\$ 308$ billion on July 1, 1962; $\$ 305$ billion on April 1, 1963; $\$ 307$ billion on May 29, 1963; and $\$ 309$ billion on July 1, 1963. Under the act approved November 26, 1963, the limitation is $\$ 315$ billion from December 1, 1963, through June 29, 1964, and $\$ 309$ billion on June 30, 1964.

Sourca: Actual figures are from the monthly statement of recelpts and expenditures of tha Covernment (for axplanation of reporting bases sae page II); estimates are from the 1965 budget document, released January 21, 1964, including effacts of proposed legislation.
1/ The distribution of receipts batween Indtvidual income taxes and oldaga and disability insuranca taxes is made in accordance with provislons of Sec. 201 of the Soctal Sacurity Act, as amended ( 42 U.S.C. 401), for transfer to the Federal 01d-Aga and Survivors Insurance Trust Fund (see footnote 9), and also for transfer to the Federal Disability Insurance Trust Fund (see footnote 10).
2) Taxes on employers and employees under the Federal Insurance Contributions Act, as amended ( 26 U.S.C. 3101-3125), and tax on selfemployed individuals under the Self-Employment Contributions Act, as
amended ( 26 U.S.C. 1401-1403). The Social Security Act Amendments of
1956, approvad August 1, 1956, increased the rates of tax applicable
to wages paid and taxable years beginning after December 31, 1956,
to provide for disability insurance.
3 Taxes on carriers and their employees undar the Railrosd Retirement Tax Act, as amended ( 26 U.S.C. 3201-3233).
4. Tax on employers of 4 or more undar the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308); with respact to services performed before January 1, 1956, the tax was imposed on employers of 8 or mora.
5/ Beginning 1957, includes collections under fncreased rates in the Highway Revenue Act of 1956 (see footnote 13).

Source: Actual figures through 1961 are from reports to the Treasury Department by disbureing officers and adminietrative egencies, on the monthly atatement reporting basie (see page 1I); and from the monthly etatement of receipts and expenditures thereafter. Estimates are
from the 1965 Budget document, released January 21, 1964, including effect of proposed legislation.
1/ Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U.S. ports),bullion charges, end gifts and contributions

## Footnotes to Table 1 - (Continued)

6/ Includes adjustmants as follows for: Income taxes not withheld, September - ${ }^{3} 3$ million, and December - $\$ 5$ million; income taxes withbald, September $+\$ 8$ million, and December - $\$ 316$ million; transfers to Federal 01d-Age and Survivors Insurance Trust Fund, September - $\$ 10$ million, and Decamber $+\$ 300$ million; and transfers to Federal Disability insurance Trust Fund, September $+\$ 5$ million, and Decamber $\$ \$ 21$ million. See also footnote 9.
7. Interest on refunds is included in expenditures in Table 3.

8/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
9/ Amounts eppropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to tbe amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are besed on estimates of old-age insurance tax receipts made by the Secretary of the Treasury ( 42 J.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
10/ The Federal Disability Insurance Trust Fund was established by the Sociel Security Act Amendments of 1956, epprovad August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wagas and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to tima to the trust fund on the same basis as transfers to the Federal 01d-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the incrase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts ara appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
in the Treasury, lass refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) and transfers are mada currently.
12) The Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivelent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of astimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expanses of the employment security program. Proviously the corresponding amoints were included, respectively, in budget receipts and budgat expenditures.
13) The Highway Revenue Act of 1956 , $\operatorname{se}$ amended, ( 23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by approprietion acts, Federel-aid bighwey expendituree after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentagas of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be trensferred currently to the trust fund on the basis of estimetes by the Secretery of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Fedaral-aid highway expenditures were included in budget expenditures.
14. For content, see Table 4. These transactions ara included in the detail of both budget receipts and expanditures but are deducted from the totals (see Reporting Bases, p. II).
15/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bullatin because of the exclusion of certain interfund transactions (see footnote 14).

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of raporting bases, see page II); estimates are from the 1965 Budget document, released January 21, 1964, including effects of proposed legislation.
Note: Figures in this table are for agencies as constituted at the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 6. Agency shifts are reflected in this table as follows: Beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federsl intermediate credit banks and production credit corporations as indicated in footnote 12; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Media Guaranty Fund from "Funds appropriated to the President" to "Independent agencies;" beginning 1959, Federal Civil Defense Administration from "Independent agencies" to "Executive Office of the President," Civil Aeronautics Board from "Commerce Department" to "Independent agencies," Civil

Aeronautics Administration from "Commerce Department" and Airways Moderniasion Board from "Independent agencies" to tha "Faderal Aviation Agency," National Advisory Commission for Aeronautics from "Independent agencies" to "National Aeronautics and Spaca Administration;" from fiscal 1960 through November 1962, and beginning December 1963, military assistance from "Funds appropriated to the President" to "Defense Department, military," and beginning 1962, subscriptions to intermational institutions from "Treasury Department" to "Funds appropriated to the President."
1/ Consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis, and beginning fiscal 1960 payment for public services.
2) Beginning 1957, Federal aid for highways is excluded from budget expenditures and included in trust account expenditures (see Table 1). 3 Adjusted for reclassification.

Source: Actual figuras are from the monthly statement of receipts and expendituras of the Government (for explanation of reporting bases, (see page II); estimates are from the 1965 Budget document, released January 21, 1964, including effects of proposed legislation.

1) Certain transactions are excluded from both recelpts and expenditures beginning with the July 1961 issue of the Bulletin. For details see Table 6.
2) Includes guaranteed securities (see Table 4).

Note: Figures in this table differ from those published prior to August 1963 for shifts in classification including security transactions of Government-sponsored enterprises from deposit fund account expenditures to net investment by Government agencies in public debt securities, and net redemption of agency securities in the market; and certain deposit fund account receipts from net receipts to net expenditures.

I Secondary market operations, as provided in the Housing Act of 1954, approved August 2, 1954 (12 U.S.C. 1719). Funds provided by the Treasury ( - ), or repaid to the Treasury, are shown in a separate column (and correspondingly are reflected net in budget expenditures).
See Table 2, footnote 4 .
3 Includes principally District of Columbia operating expenditures; Funds appropriated to the President - mutual security trust funds; Indian tribal funds; expenditures chargeable against increment on gold; and trust enterprise funds (net). The Railroad Unemployment Insurance Administration Fund is included through November 1958 (see Table 10, published quarterly), the Employees' Life Insurance Fund (net) and the Employees' Health Benefits Fund (net) beginning 1961.
4 Previously shown as deposit funds (see Table 1, Note).
5) Includes banks for cooperatives, Federal intermediate credit banks, and Federal land banks.
6/ For content see Table 6. These transactions are included in the detail of both trust receipts and trust expenditures, but are deducted from the totals.
7) Excludes certain interfund transactions consisting principally of financial interchanges between trust funds resulting in receipts and expenditures (see footnote 6).
8/ Includes expenditures of the Federal intermediate credit banks which were operated as trust fund enterprises from January 1, 1957, until January 1959, when these benks were classified as Governmentsponsored enterprises.

1/ Includes the Government's contribution for creditable military service
( 45 U.S.C. $228 \mathrm{c}-1$ (n)) until payment was completed in 1954. Beginning 1952, appropriations of receipts are equal to the amount of taxes deposited in the Treasury (less refunds) under the Railroad Retirament Tax Act, and transfers are made currently subject to later adjustments (see "Budget Receipts and Expenditures," Table 1). Beginning 1954, includes unappropriated transfers of tax receipts.
2) Payments are made between the Railroad Retirement Account and the Federal 01d-Age and Survivors and the Federal Disability insurance
trust funds so as to place those funds in the position in which they
social security coverage ( 45 U.S.C. 228 (k)). See Tables 7 and 8.
See Table 10. Receipts include repayment and interest.
Paid from the trust fund beginning 1950 ( 63 Stat. 297).
Includes unappropriated receipts beginning fiscal year 1954.
Includes adjustment for change in reporting to a collection basis.
Beginning fiscal 1961, amounts for interest on refunds of taxes,
formerly included under budget expenditures, are treated as transfers of budget receipts to trust account receipts and are included in trust account expenditures.

## Footnoter to Table 10

1) State unemployment funds; used for benefit payments mainly. Beginning August 1961, withdrawals by States have been reduced by reimbursements to Stata accounts from Federal Extended Compensation Account.
2) Established by the Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act (see "Budget Raceipts and Expenditures," Table 1, footnote 12) and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures, and only the excess of receipts ovar expenditures, if any, was transferred to the trust account by appropriation. Receipts consist of appropriated and unappropilated transfers of tax collections. The Federal unamployment tax allows to the taxpayer credit for contributions to State unemployment funds up to 90 percent of the tax.
$3 /$ Net of repayments.
L/ Excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses each year is deposited in this account to maintain a reserve of $\$ 200$ million available for loans to States when needed to replenish the balances in their accounts in the trust fund. Beginning 1961, these transfers ara from the administration fund in the trust account; previously they were from the general fund. Any remaining excess is cradited to the State accounts (42 U.S.C. 1101 - 1103).
3) Established by the act approved March 24, 1961, (42 U.S.C. 1105 (a)), which provides for a temporary program of extended unemployment compensation payments.
4) For payment of benefits and rafunds ( 45 U.S.C. 360). Figures exclude Interim advanca of \$15 million from the Treasury and subsequant repayment, both in 1940.
5) Contributions under the Railroad Unemployment Insurance Act of 1938, as amended ( 45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses (see footnote 8).
8/ Temporary advances are made when the balance in the Railroad Unemployment

Insurance Account is insufficient to meet payments of benefits and refunds due or to become due. Whenever the balance is sufficient to pay such benefits and refunds, repayments are made, plus interest at 38 per annum, pursuant to an act approved May 19, 1959 ( 45 U.S.C. 360(d)).
2/ Excess, if any, over spacifled balance at end of year is transferred to the account ( 45 U.S.C. 361 (d)).
10 Consists of a specified proportion of contributions deposited in the fund to be available for administrative axpenses. The Railroad Unemployment Insurance Administration Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund (45 U.S.C. 361)
11) Total includes $\$ 107.2$ million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishment ( 45 U.S.C. 363)
12) Beginning fiscal 1961, refunds of taxes (principal only) are reported as daductions from receipts. Interast paid on refunds of taxes is included under axpenditures. See footnote 16.
13 Total includea repayment to Treasury of $\$ 93.4$ million, temporary unemployment compensation ( 1958 act).
14 Total Includes repayment to Treasury of $\$ 190.0$ million, temporary unemployment compensation ( 1958 act ), and $\$ 170.0$ million for proposed legislation.
15/ Includes adjustments to monthly statament basis.
16) Includes small amounts for intarest on refunds of taxea.

Includes interest.
Excludes adjustment purauant to tha act of September 6, 1958, (45 U.S.C. 361 (a)); see footnote 19.

19 Includes an adjustment of \$7.2 million pursuant to the act of Septemb 6, 1958 ( 45 U.S.C. 361 (a)); see footnote 10.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1965 in Special Analysis A). Show also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are
reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## ACCOUNT OF THE TREASURER OF THE UNITED STATES

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United states rellects not only budget recelpts and expenditures but also trust, deposit fund, and public debt transactions.

The working oash of the Treasury is beld mainly in Treasurer'a accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Depoeits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby cuetomers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan aocount in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account syatom pormits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluotuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary aystem may be found in the Annual Roport of the Ssoretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2)
2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3/ Amounts shown, beginning fiscal 1963, are net of uncollected items, exchanges, etc. Freviously these items were included under liabilities.

1. Spacial dapositaries are permitted to make payment in the form of a deposit credit for the purchase price of U. S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employars and employees under the Federal
Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
3) Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

* Less than $\$ 500,000$.

Figures in the first four columns of this table may differ somewhat from those originally published in the daily Treasury statement because of subsequent reclassification of certain transactions.

1. Beginning with the February 1963 Bulletin figures have been revised, as shown in daily Treasury statements beginning January 2, 1963, to exclude transactions of claaring accounts.

Note: The computed annual interest cherge represents the amount of interest thet would be peid if each interest-bearing issue outstanding et the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the eppropriate annuel interest rate to the emount outstanding on that date (the amount ectually borrowed in tha case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for ell interest-bearing issues constitutes the total computed ennual interest charge. The everege annual interest rate is computed by dividing the computed annual interest charge for
the totel, or for any group of issues, by the corresponding principal amount. Beginning with date for December 31, 1958, the computetion is besed on the rete of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Guarsnteed securities included are those held outside the Treasury. Total includes "Other bonds" through 1960; see Table 3.
2/ Included in debt outstanding at face amount, but discount value is used in computing annuel interest cherge and annael interest rate. 4 On United States savings bonds the rate to maturity is epplied egainst the amount outstending.

Table 5.- Securities Issued in Advance Refunding Operations-(Continued)

2/ The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premium or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the prorata amortization of the original premium or diacount to the date of

6) Includes savings and loan associations, nonprofit institutions, and investments of foreign balances and international accounts in this country.
7) Tax anticipation security.

8/ Issued as a rollover of bills maturing January 16,1957 , and February 15,1957 , respectively.
9) Reopening of earlier issue.

12 Issued in special allotment to Government investment accounts.
11. Issued as a rollover of quarterly one-year bills.

12 Offerings subject to allotment, were made for the purpose of paying off maturing securities in cash. Holders of the maturing securities were not offered preemptive rights to exchange their holdings but were permitted to present them in payment or exchange, in whole or in part, for the new issues.
13 Offerings consist of an additional \$100 million each of a series of outstanding weekly bills issued in "strip" form. Offerings include 18 series for June 14, 1961; 8 series for November 15, 1961; and 10 series each for November 15, 1962, and October 28, 1963.
14 Sold at competitive bidding with allotment distribution based on sales reported by syndicate members.
15 One-year bills issued monthly beginning September 3, 1963, to replace the existing quarterly cycle.

* Less than \$500,000.

Table 4.- Redemptions of Matured and Unmatured Savings Bonds

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value througbout. Matured bonds which have been redeemed are included in redemptions. Matured $F$ and $G$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual serias have matured, qnd are then transferred to matured debt on which interest has ceased.

1) Sales and redemption figures include exchanges of minor amounts of (1) mstured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series $F$ and J bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series $E$ bonds for Series $H$ bonds, which are reported in Table 3.
2) Datails by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions the distribution of redemptions between sales prica and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown heve been revised on this basis.
4/ Series F and G sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent arjustments.
5/ Includes exchanges of Series 1941 F and $G$ savings bonds for $3-1 / 4 \%$ marketable bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1964.
7/ Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968.
2 Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

1/ Gonsists of purchases or sales made by the Treasury of securities issued or guaranteed by the U. S. Government for (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain J. S. Government agencies whose investments are handled through the facilities of the Treasury Department. It will be noted that these
transactions differ from those reflected in Table 1 because they exclude those Government investment accounts for which investments are not handled by the Treasury. Table 2 also includes purchases under Section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a), and excludes the Exchange Stabilization Fund.

* Less than \$50,000.

The tables which follow provide an analysis of the security holdings of commercial banks reporting in the Treasury survey of ownership of securities lsaued by the United States Government and by Federal agencies. The ilgures show the total holdings distributed according to Federal Reserve member bank classes and nonmember banks.

This analysis of commercial bank ownership was first published in the May 1944 issue of the "Treasury Bulletin," based on the survey data for December 31, 1943. It has appeared at semiannual or quarterly intervals oince that time, and is now being published for the June 30 and December 31 survey data.

1/ Includes approximately $\$ 100$ million issued for cash on October 28, 1963, as part of a "strip" of additional amounts of ten series of Treasury bills, maturing each week from February 6 to April 9, 1964.
2/ Amount issued on February 6, 1964, was \$1,000 million.
Beginning April 1953, prices are closing bid quotations in the over-thecounter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they ara closing prices on the New York Stock Exchange. "When issued" prices are included
in the history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.
4) On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or balow.
5/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

Nate: The smaoth curve is filted by eye. Morket yields an coupan issues due in less than 3 manths are excluded

1) Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.
2) The following paper currencies are in process of retiretuent and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes issued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 ( 31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note) and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30 , 1934; silver certificates, United States notes, Federal Reserve Bank
notes, and national bank notes all issued before July l, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; and on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificates, $\$ 18$ million of Federal Reserve notes, $\$ 1$ million of Federal Reserve Bank notes, and $\$ 15$ million of national bank notes.

## 3) Highest amount to date.

4/ Issued prior to January 30, 1934.
5/ Includes $\$ 15$ million issued before July 1, 1929.
6/ Includes \$18 million issued prior to the series of 1928.
7/ Based on the Bureau of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawai

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of \$4,125 million. In accordance with Fund policies, these drawing righta include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund ( $\$ 1,031.2$ million) and the Fund's net use of dollars; on January 31 1964 , these two amounts totaled $\$ 1,033.9$ million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

1 Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of January 31, 1964, this amounted to $\$ 800$ million.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935 , pursuant to Executive Order 6560 of January 15,1934 , Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is publisheó monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealere, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures tc the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May $31,1963.1$ A detalled description of the content of the statistics, including the changes instituted, appeared in the July 19631 ssue of the "Treasury Bulletin," pages 79-81. As a result of changee in presentation introóuced in that issue, not all vreakdowns previously publiched will be exactly comparable to those now presented.

## Basic delinitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks anc business concerns; the central governments, central banis, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In gereral, data are reported opposite the foreign country or geographical ares in which the foreigner is domiciled. Datá pertaining to branches or agencies of forelgn official institutions are reported opposite the country to which the official institution belonge. Data pertaining to international and regional orgarizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securitles having no contractual maturity.

## Exclusions

The data publiehed herein do not cover all types of capital movements between the United States and foreign
countries. The data reportec to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United states with their own branches and subsidiaries abroad or with their forelgn parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shlpments and recelpts of United states currency are also excluced from the Treasury reports. Certain capital transactions not effected through reporting institutions, suoh as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolldated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterArerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency serles (see "International Financial Statistics" section, Table $2)$.

## Presentation of statictics

Data collected monthly on the Treasury Foreign Exchange Forms are publisheó in the "Treasury Bulletin" in three sections. Section $I$ provides a summary of the principal data by period; Section II presents data by country and by perioc; ano section III shows detalled breakdowns of the latest avallable preliminary data.

Section IV presents supplementary data in five tables which appear less frequently than monthly. Table $I$, shortterm foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2 , estimated gold reserves and dollar holdings of forelgn countries and international institutions, 18 published quarterly in the March, Juns, September, and December 1s6ues. Table 3, foreign credit and debit balances in brokerage accounta, appears semiannually In the March and September 1saues. Table 4, short-term banking liabilities to foreigners in countries and areas not regularly reported separately, heretofore has been presentec annually in the March issue, but beginning with the August 1963 issue is published twice a year, covering data as of Apr11 30 and December 31. Table 5, purchases and sales of long-term securities by forelgners during the preceding calendar year, appeara annually in the April is 1 ue.

# Section II.- Summary by Countries <br> Table 9.- Estimated Holdings of U. S. Government Bonds and Notes 

(Position at end of period in millions of dollars)

Note: Data represent estimated official and private holdings of U. S. Govern-
ment securities with an original maturity of more than one year. (For
exclusions, see headnote on page 89.) Beginning with this issue, annual
and monthly data are shown in this section. For quarterly data and
statistics for earlier dates, see Section IV of previous issues.
Data are shown as of December 31 for 1960 through 1962, and for July 31 hrough December 31, 1963, on the basis of a November 30, 1960 survey of
holdings and the regular monthly reports of securities transactions
of a survey as of July 31, 1963, and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from or errors in reporting, shifts in ownership not involving purchases or sales through U. S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

1/ As reported by exporters, importers, industrial and commercial firms, and other nonfinancial concerns in the United States. Data exclude claims held through United States banks, and intercompany accounts between United Statas companies and their foraign affiliates.
2) Under a continuing program instituted at the end of 1960 to enlarge coverage and to improve reporting by nonfinancial concerns, data are
included from a number of firms reporting for the first time as of December 31, 1961 (fourth revised series), as of June 30, 1962 (fifth revised series), as of December 31, 1962 (sixth revised series), and as of March 31, 1963 (seventh revised series). Changes in liabilities and claims between quarter-ends can thus be computed based on comparable coverage.

The current inancial otatements of corporations and certain other business-type activities of the United States Government which appear in the "Treasury Bulletin" beginning with the Auguat 195618848 are complled from reports submitted to the Treasury under Department Circular No. 966 , 1s sued January 30, 1956, and Supplement No. 1, 1ssued June 1, 1956. The regulations so issued are pursuant to section 114 of the Budget and Accounting Proceduree Act of 1950 ( 31 U.S.C. 66b), and represent another step in the program of comprehenaive and integrated Government accounting and financial reporting for which authority was provided in that-act. They supersede Budget-Treasury Regulation No. 3 , 18sued under Exscutive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which ifnancial statements previously published in the Bulletin were submitted.

In coverage, Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended ( 31 U.S.C. 846,856 ); and all other actlvities of the Government operating as revolving funds for which businesetype public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget. Other activities and agencles who 8 operations, services, or functions are largely $s e l f-11 q u i d a t i n g$ or primarily of a revenue-procucing nature, and activities and agencles whose operations result in the accumulation of substantial inventoriea, investments and other recoverable assets, may be brought under the regulations as agency accounting systems are developed to the point where they are capable of furnishing the financial reports required.

Four kinde of ilnancial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain commitments and contingencies. The
etatements of financial condition are published quarterly and appear as Section $I$ in the serles of tables. The firat data under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Sections II and III. The first of these statements under the new regulations cover the fiscal year 1956, and were published in the January 1957 Bulletin. Within the section, the agencies are grouped in separate tables by type, as Pollows: public enterprise revolving funds, intragovernmental revolving funds, certain other activities, deposit funds, anc trust revolving funds.

Supplement No. 1 added to the coverage by including all executive agencies and activities not reporting under Department Circular No. 966, but required only a statement of Pinancial condition annually as of June 30. These are mainly not business-typs activities, and those which had not yet developed formal accounting procedures to provide complete balance sheet types of ststemente were authorized temporarily to report only the asset side. Thus the supplement rouncis out provision for the information on properties and assets of the United States Government which the Treasury has been asked to furnish to the Committee on Government Operations, House of Representatives, for $s$ continuing study of the assets of the Government. The first comprehensive reporting under Supplement No. 1 is for June 30, 1957, and the data were published in the December 1957 issue of the Bulletin as Part B of Table 4 in Section $I$.

A summary of loans outstanding for a series of dates 18 included in Section I of the Bulletin presentation beginning with the June 1958 iesue. Two claselfications of the loano are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.
